# “VIBE BEFORE YOU ARRIVE.”

Value Proposition

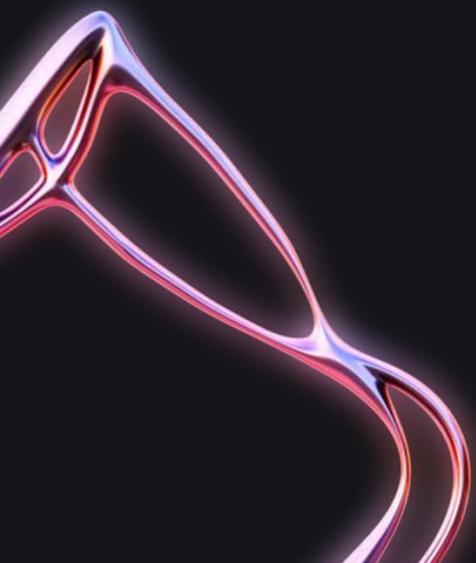

# PROBLEM

Most people find menus intuitive, but they **struggle** to identify the vibe, or ambience, of a restaurant

With ambi, you'll never have to guess again. Scope out and experience the vibe prior to your arrival.

# SOLUTION

H11 Accessible Design

oops!

# VIOLATIONS: HOME SCREEN

**H2**

The meaning of “Disco” is unclear (3)

*We updated the title to “Discover” to match the user’s intuition*

**H5**

Users may not know that restaurant tags are clickable (3)

*We added a right arrow > so users know that clicking on the restaurant title leads to another screen*

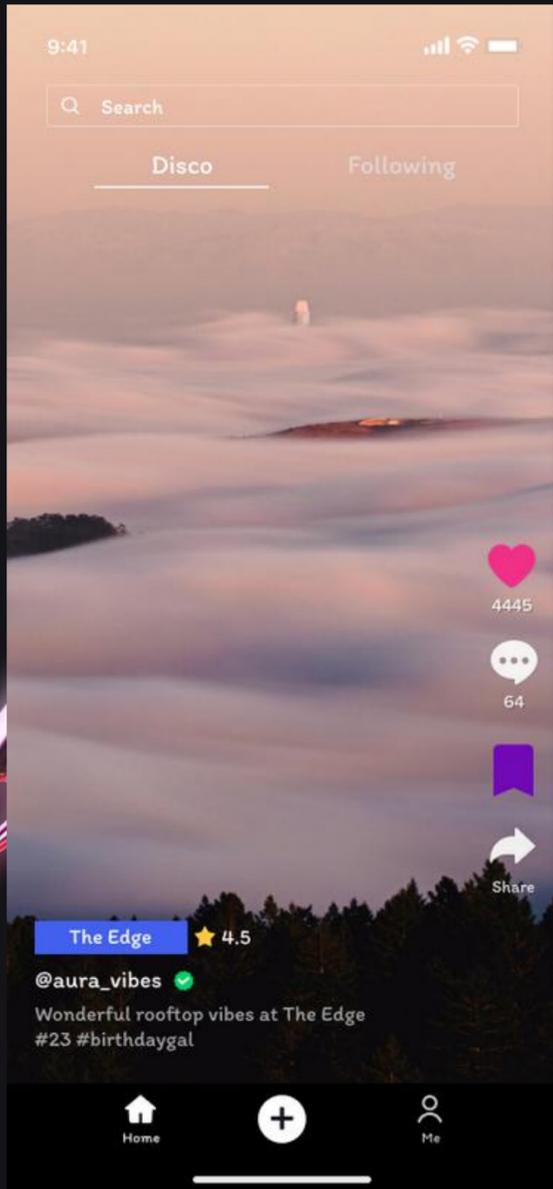

**H11**

The posting user and description are difficult to see on a light background (4)

*We added a dark gradient background to descriptions for ease of reading*

# VIOLATIONS: HOME SCREEN

Before

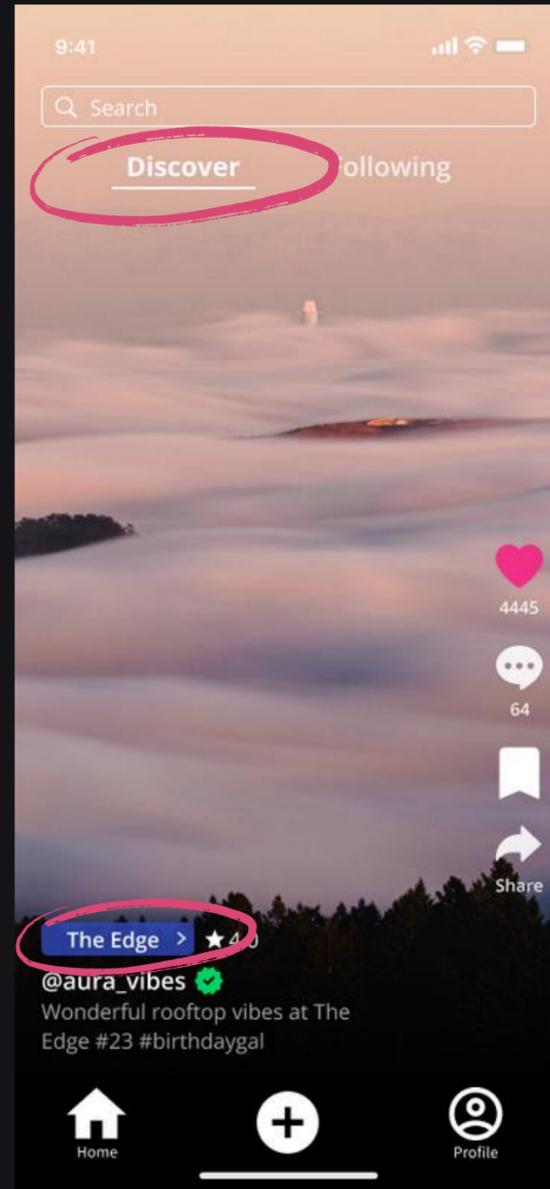

"Disco" is  
"Discover"

Restaurant  
tags have  
clickable  
arrow

After

Captions  
have dark  
gradient bg

# VIOLATIONS: SEARCH

H2

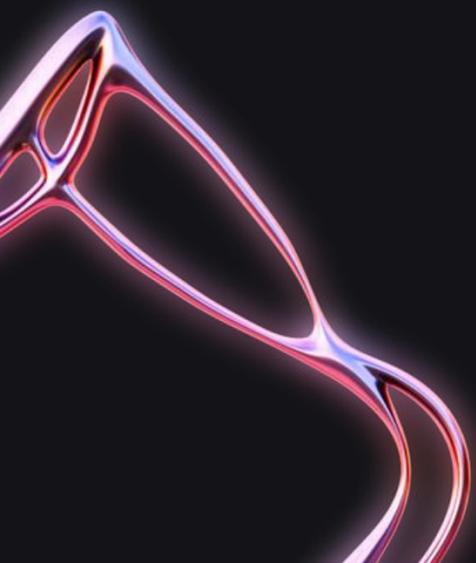

The “Distance” feature is not intuitive (3)

*We reworded the filter title to help users better understand its functionality*

H3

Users are unable to return to the default distance setting (3)

*We added a button “Back to default” to allow users to easily revert their changes*

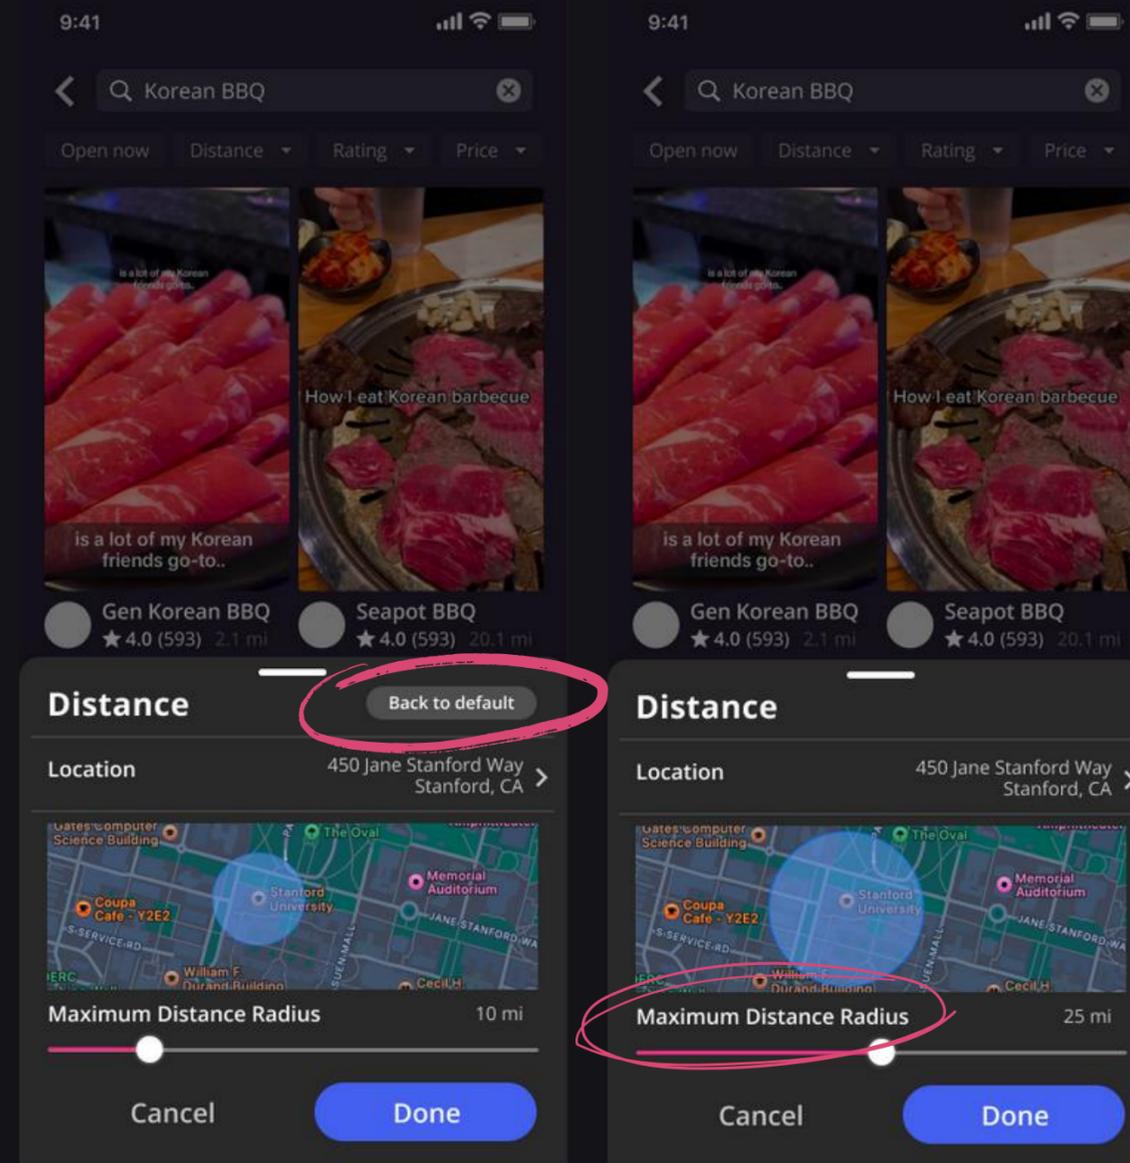

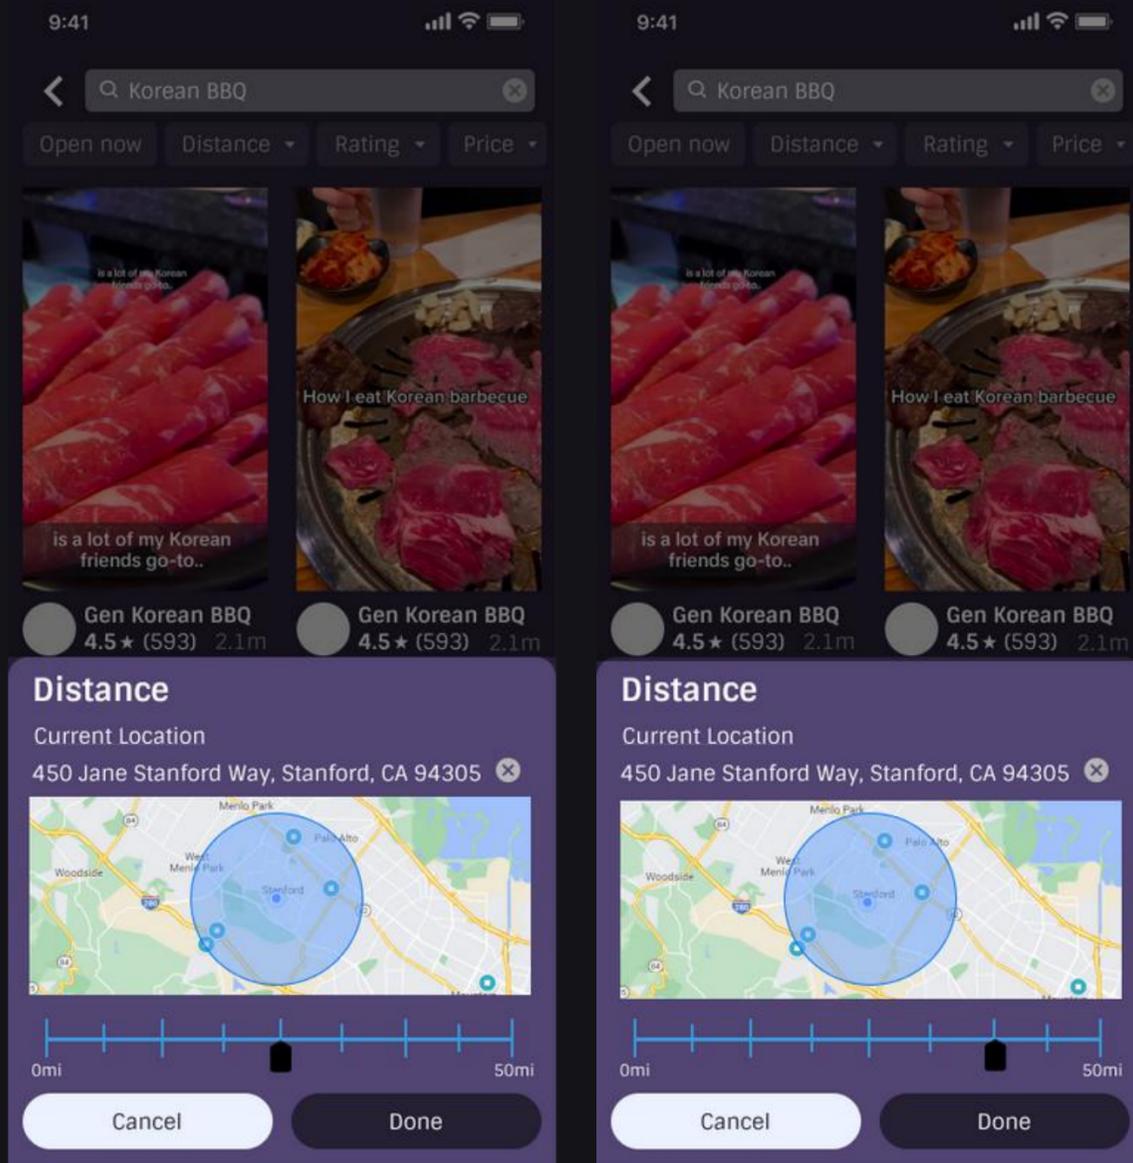

# REVISIONS: SEARCH

Before

After

“Back to default” snaps the filter back to default state

Distance as the circle’s radius is clearly marked

# VIOLATIONS: RESTAURANT LANDING PAGE

**H12**

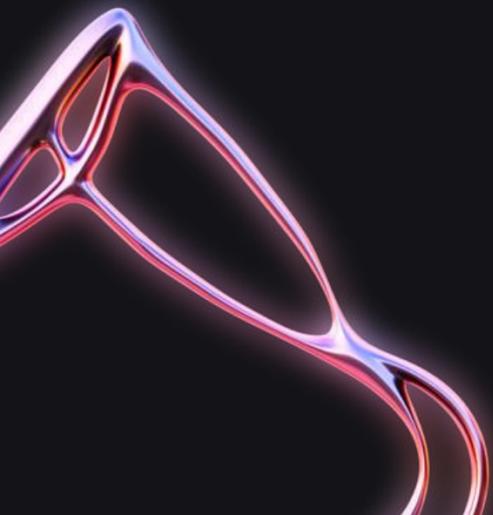

The purpose of the speaker icon is unknown (3)

*We replaced the speaker icon with a music icon to match users' intuition*

**H3**

Some elements of the restaurant home page are hidden unless users know to scroll (4)

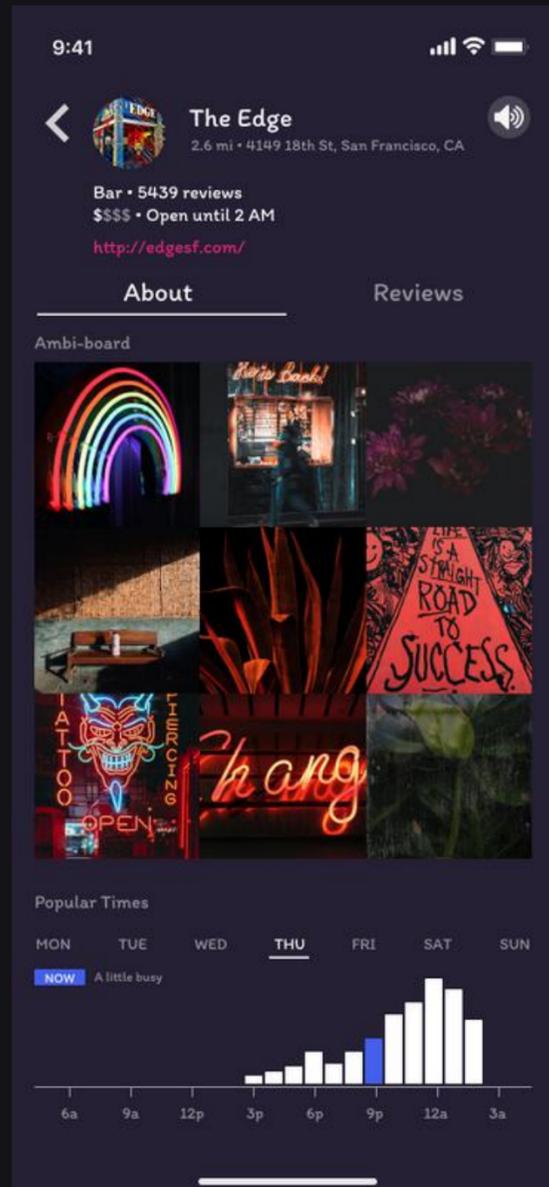

*We made the scroll functionality more obvious by cutting off the popular times content, prompting the user to scroll down*

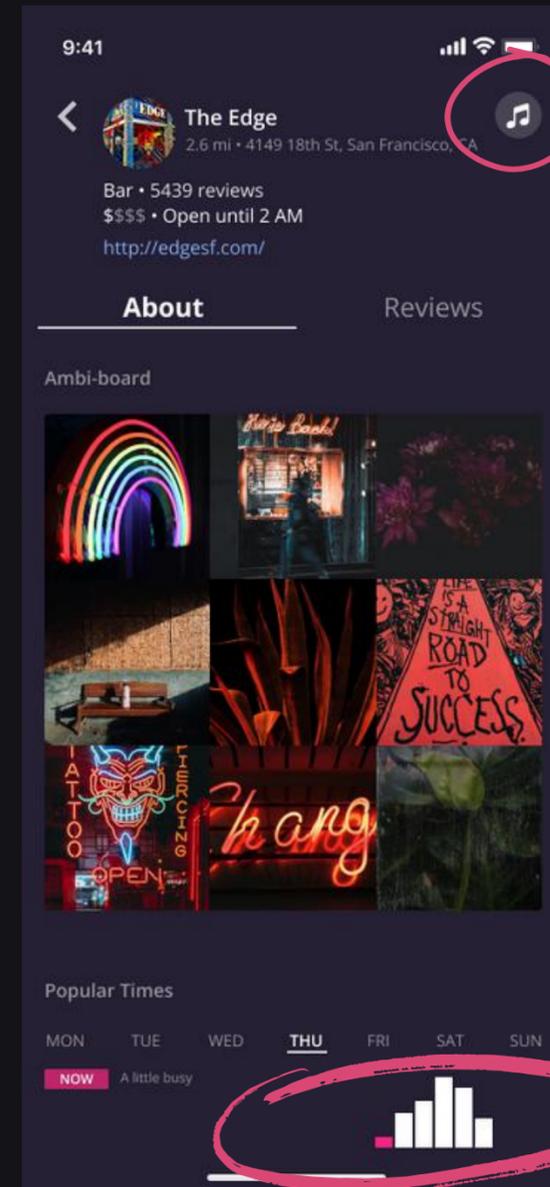

# REVISIONS: RESTAURANT LANDING PAGE

Before

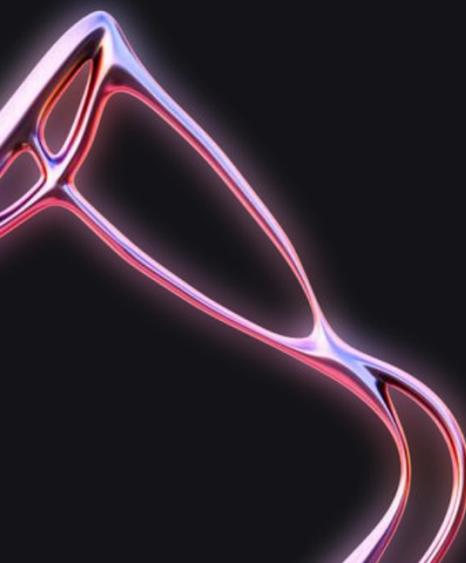

After

Speaker icon is replaced with intuitive music icon

Popular times is cut off, so users know to scroll down

# VIOLATIONS: POSTING CONTENT

**H1**

Users are not told why they should scan their receipt QR code (3)  
*We added a "Verify your customer status" option*

**H3**

Selecting the "X" icon should cancel the entire process, not just the latest step (3)  
*We route back to the home screen if the "X" is selected*

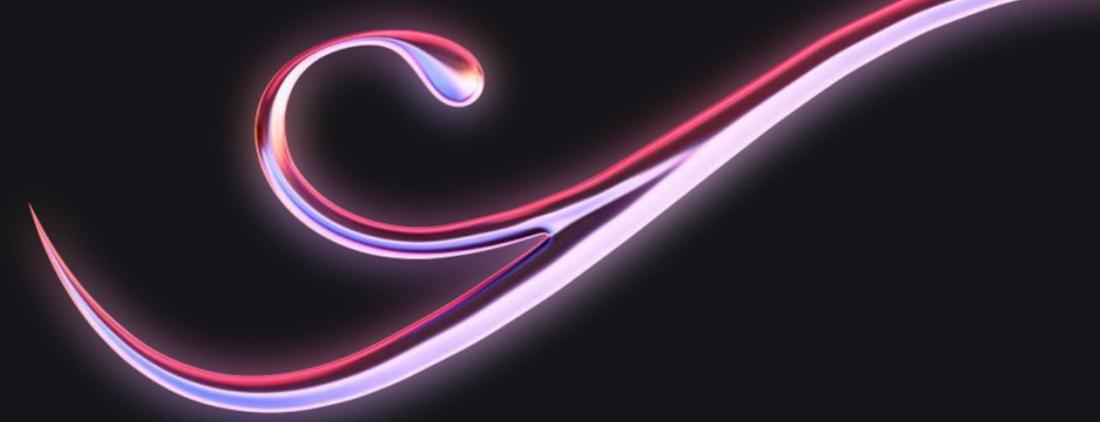

**H11**

Difficulty reading "Let others know what you thought" in blue text (4)  
*We changed the font color to have greater contrast with the background*

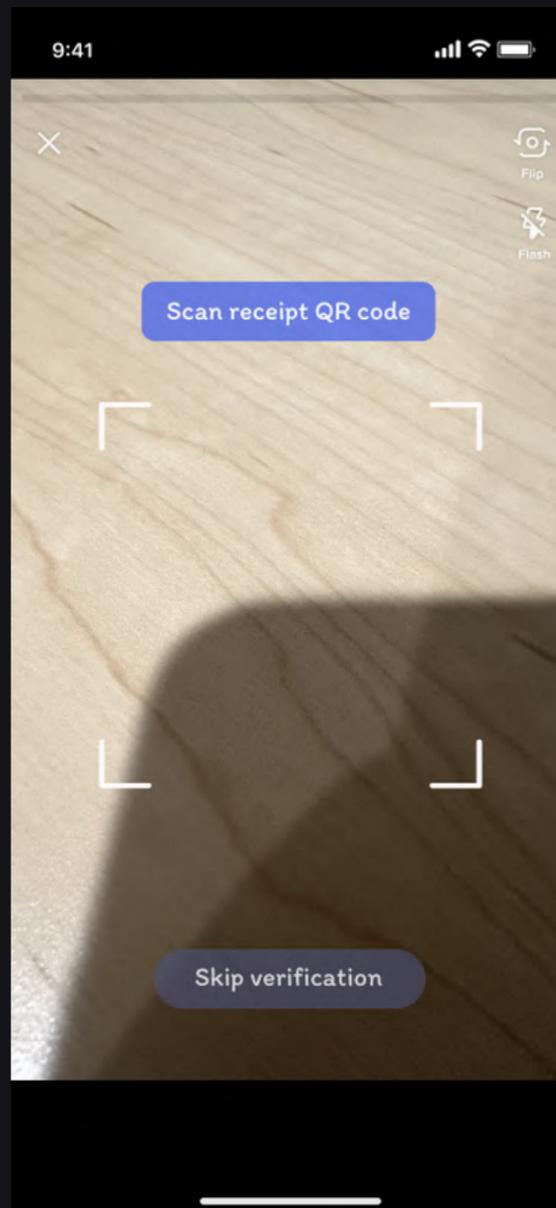

**H11**

Upload buttons are difficult to see (3)  
*We made the icons bigger*

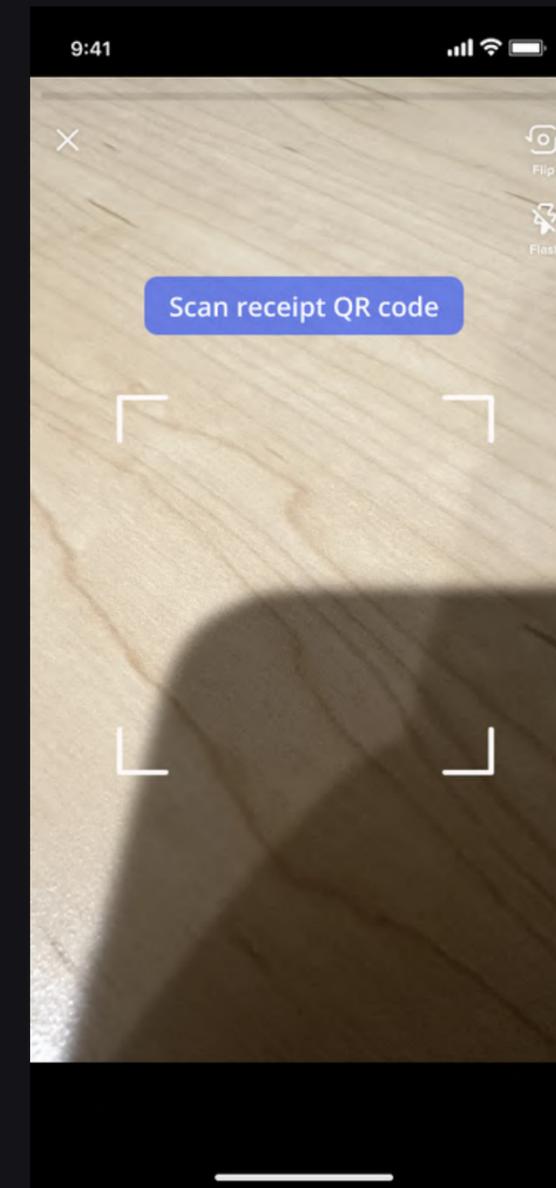

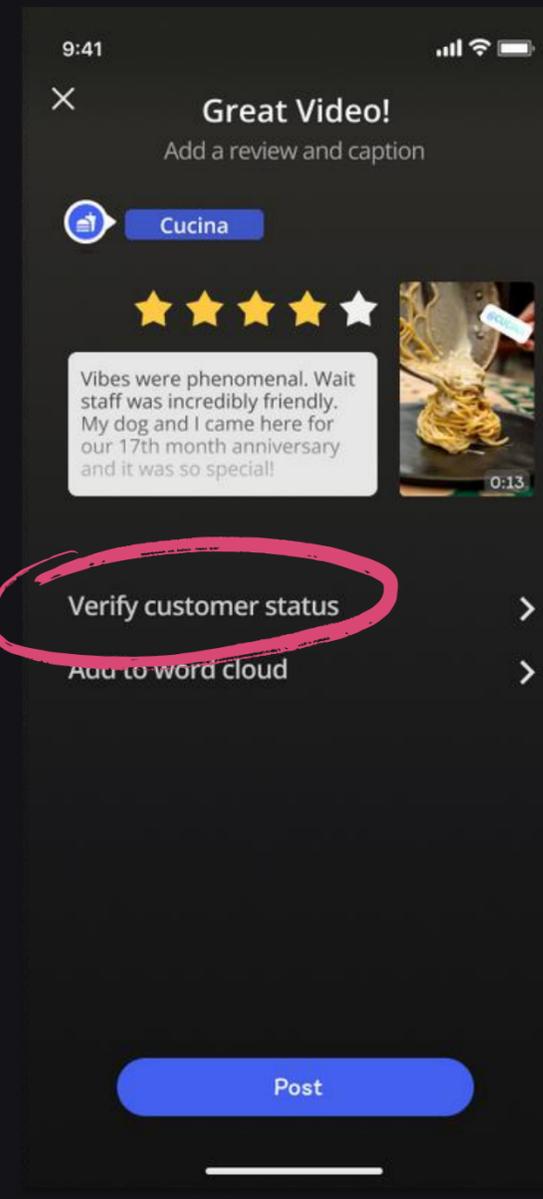

# REVISIONS: POSTING CONTENT

Before

After

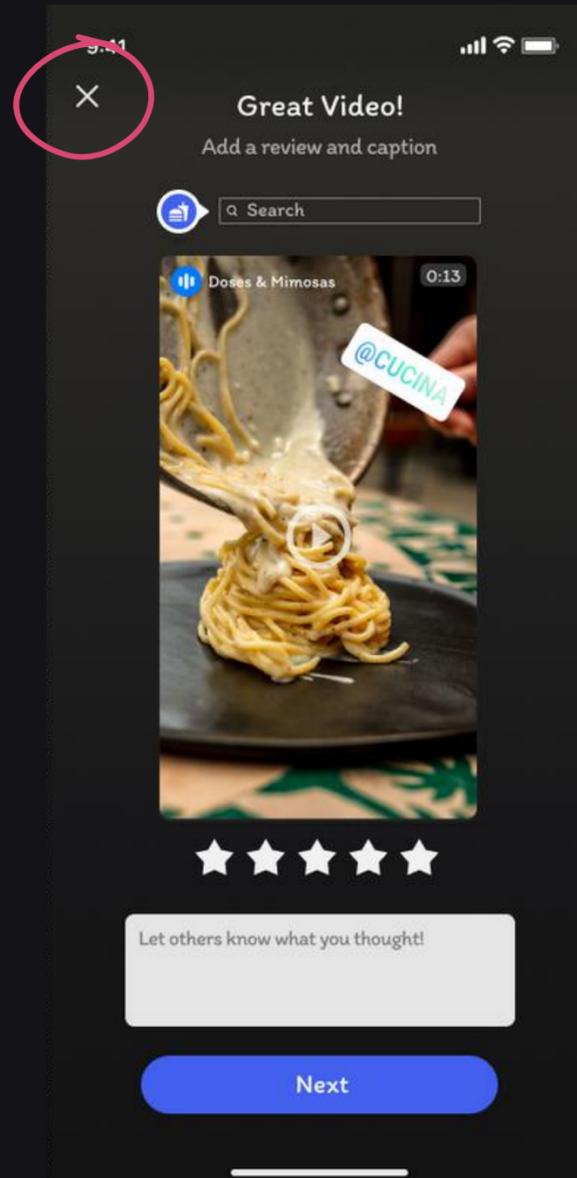

Explain purpose  
for scanning  
receipt

# REVISIONS: POSTING CONTENT

Before

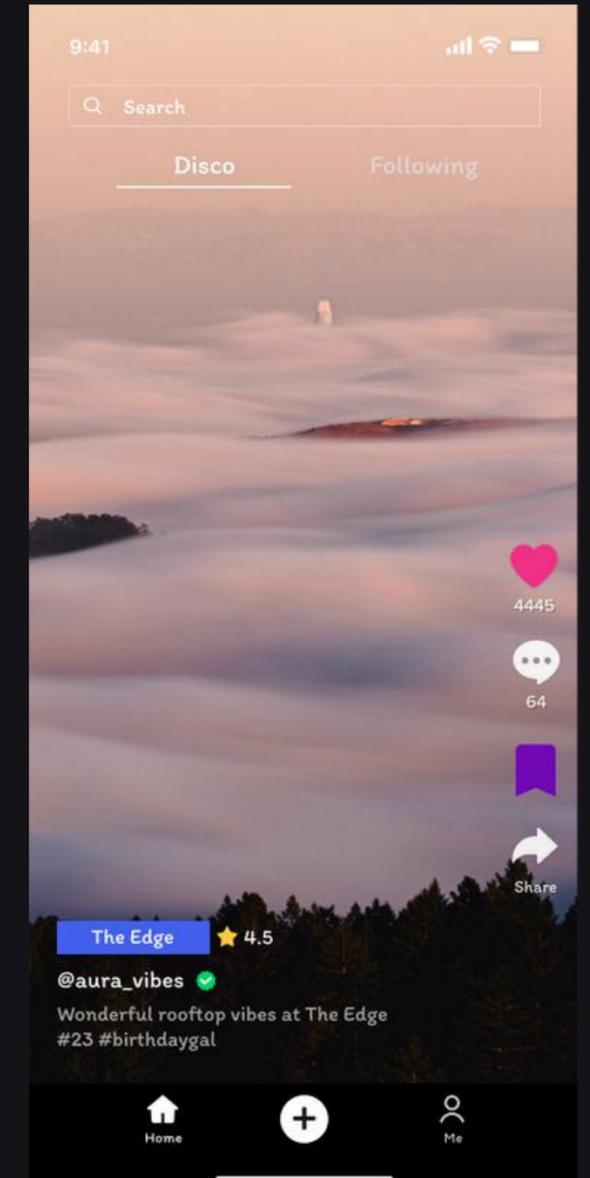

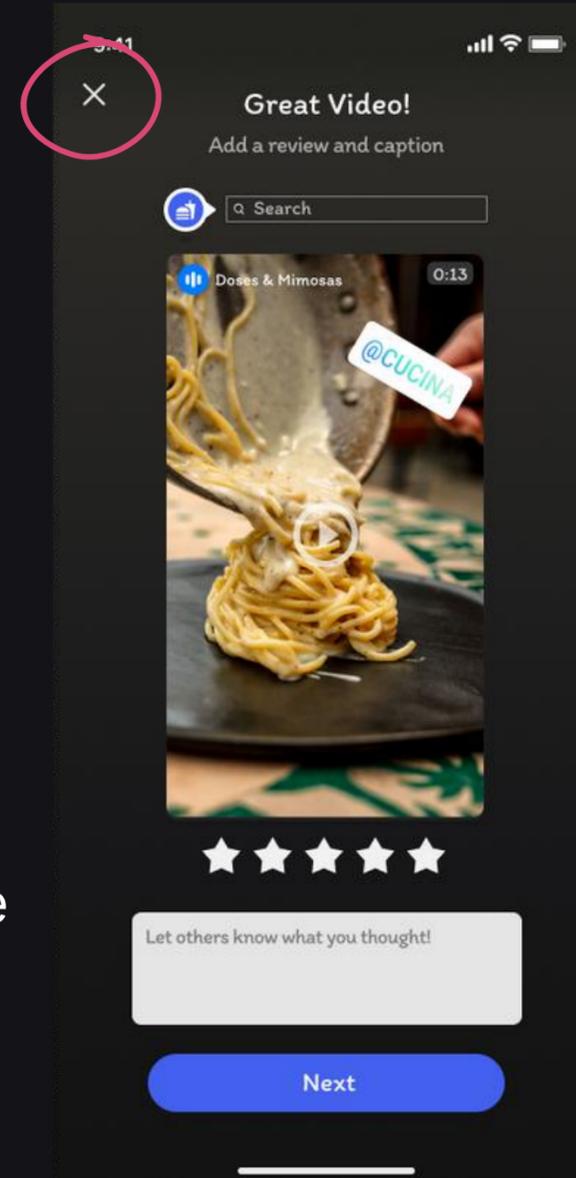

Routed back to  
end of video  
recording screen

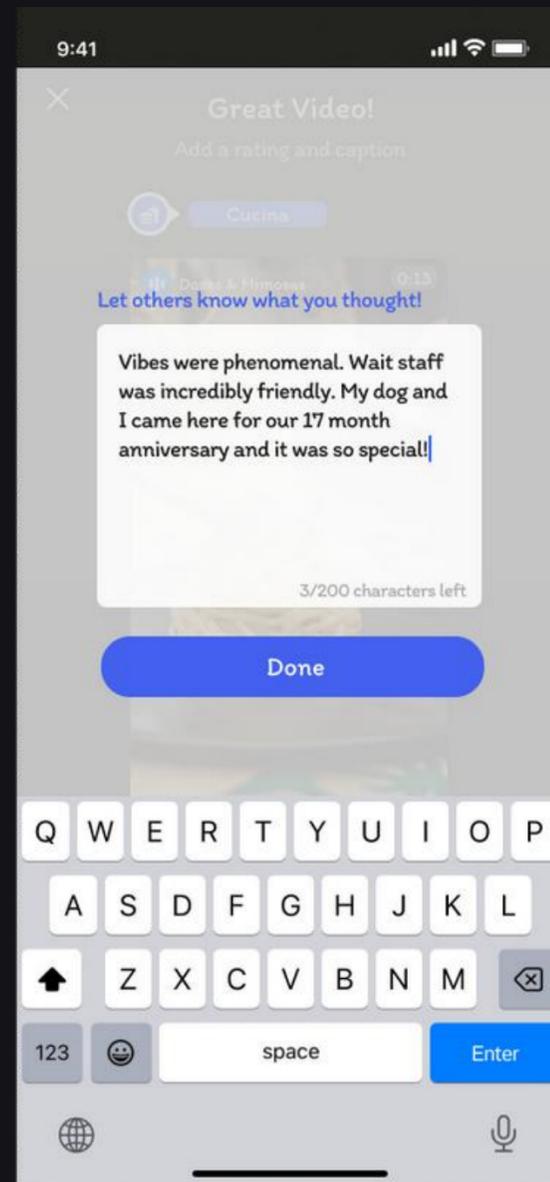

Cancels entire  
action, routes  
user back to  
home screen

After

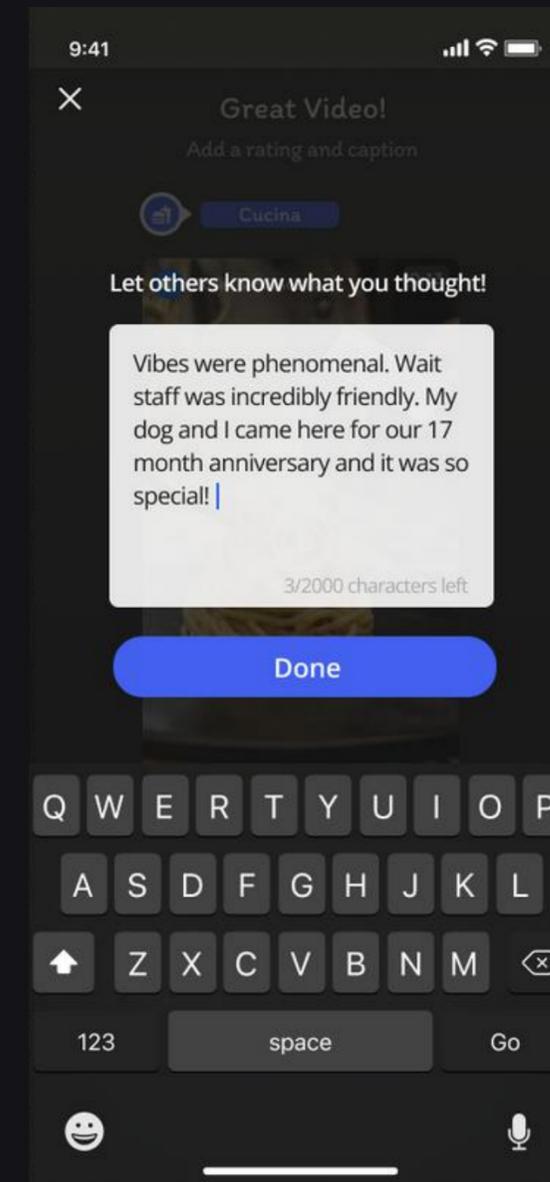

# REVISIONS: POSTING CONTENT

Before

Changed blue  
text to white

After

# REVISIONS: POSTING CONTENT

Before

After

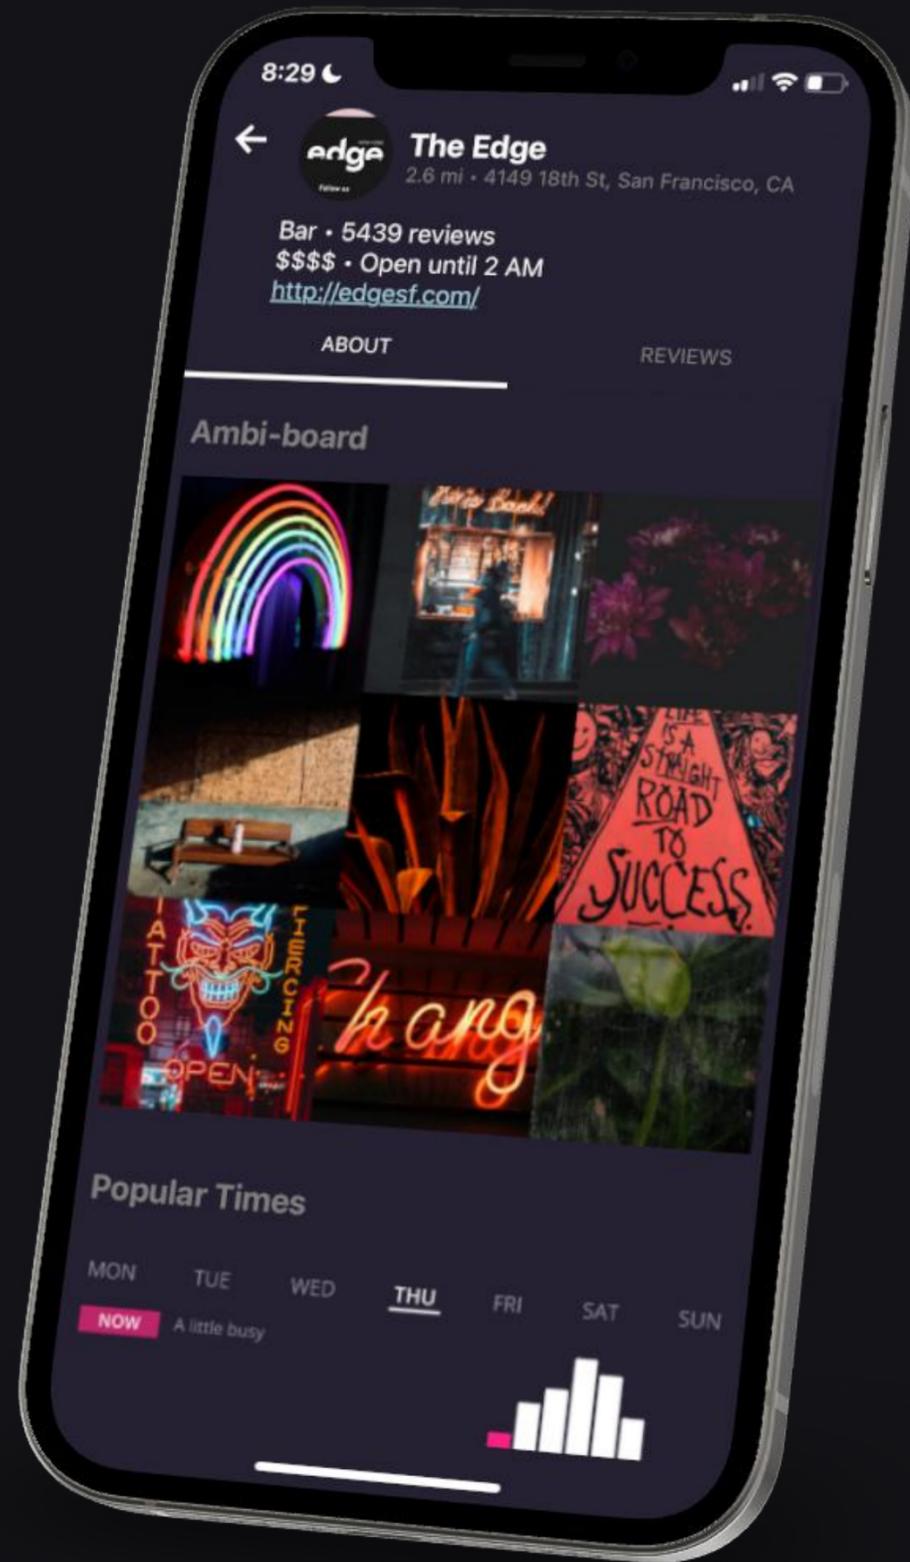

Increased  
button sizes

A bouquet of chrysanthemum flowers in shades of pink, red, and white, set against a dark background. The flowers are illuminated with a gradient of red and blue light, creating a vibrant, ethereal effect. The text 'PROTOTYPE OVERVIEW' is overlaid in the center in a bold, white, sans-serif font.

# PROTOTYPE OVERVIEW

# GENERAL CHANGES

## HOME SCREEN

- Features are reworded to help users better understand their functionality
- Clickable titles are easily identifiable through icons
- Text is more readable with a darker background

## SEARCH

- The purpose of the distance filter is clear
- Users can undo their changes and return to the filter's default state
- Search functionality is more error resistant

*These changes help us achieve our usability goal of providing a pleasing experience by making content more digestible and minimizing what users must remember between screens*

# GENERAL CHANGES

## RESTAURANT LANDING PAGE

- Mysterious icons are replaced with more intuitive ones
  - Addition of a music note symbol
- Helpful functionality, like scrolling, is more obvious to the user

# GENERAL CHANGES

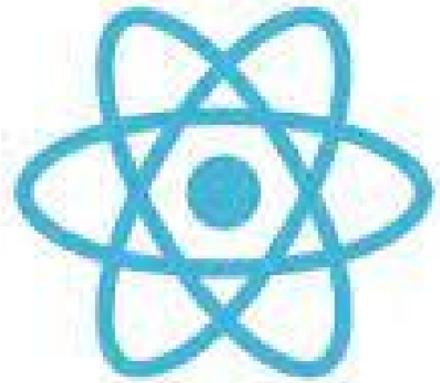

## POSTING CONTENT

- The video playback page (pre-post) is entirely revamped
  - Clickable options to “Verify customer status” and “Add to word cloud” route to separate screen flows
- Users can abandon the posting process completely with one click
- Incomplete required fields prevent the user from moving on
- Users are no longer required to travel down screen paths for optional fields
- Directions are more readable and easy to follow

*These changes help us achieve our usability goal of increasing efficiency by allowing users greater autonomy over their interactions*

# IMPLEMENTED

## Create Video Reviews!

IMPLEMENTED

Likes,  
Comments,  
Search bar,  
Profile Page

# UNIMPLEMENTED FEATURES

- **Search result page and screens for search tasks**
- **Screens for creating non-video reviews**

# PLAN TO FINISH

## THIS WEEKEND

- Finalize Hifi Figma Prototype
- Implement sceens for non-video reviews
- UI clean-up

## BY TUESDAY

- Implement search results and screens for search task

## BY THURSDAY

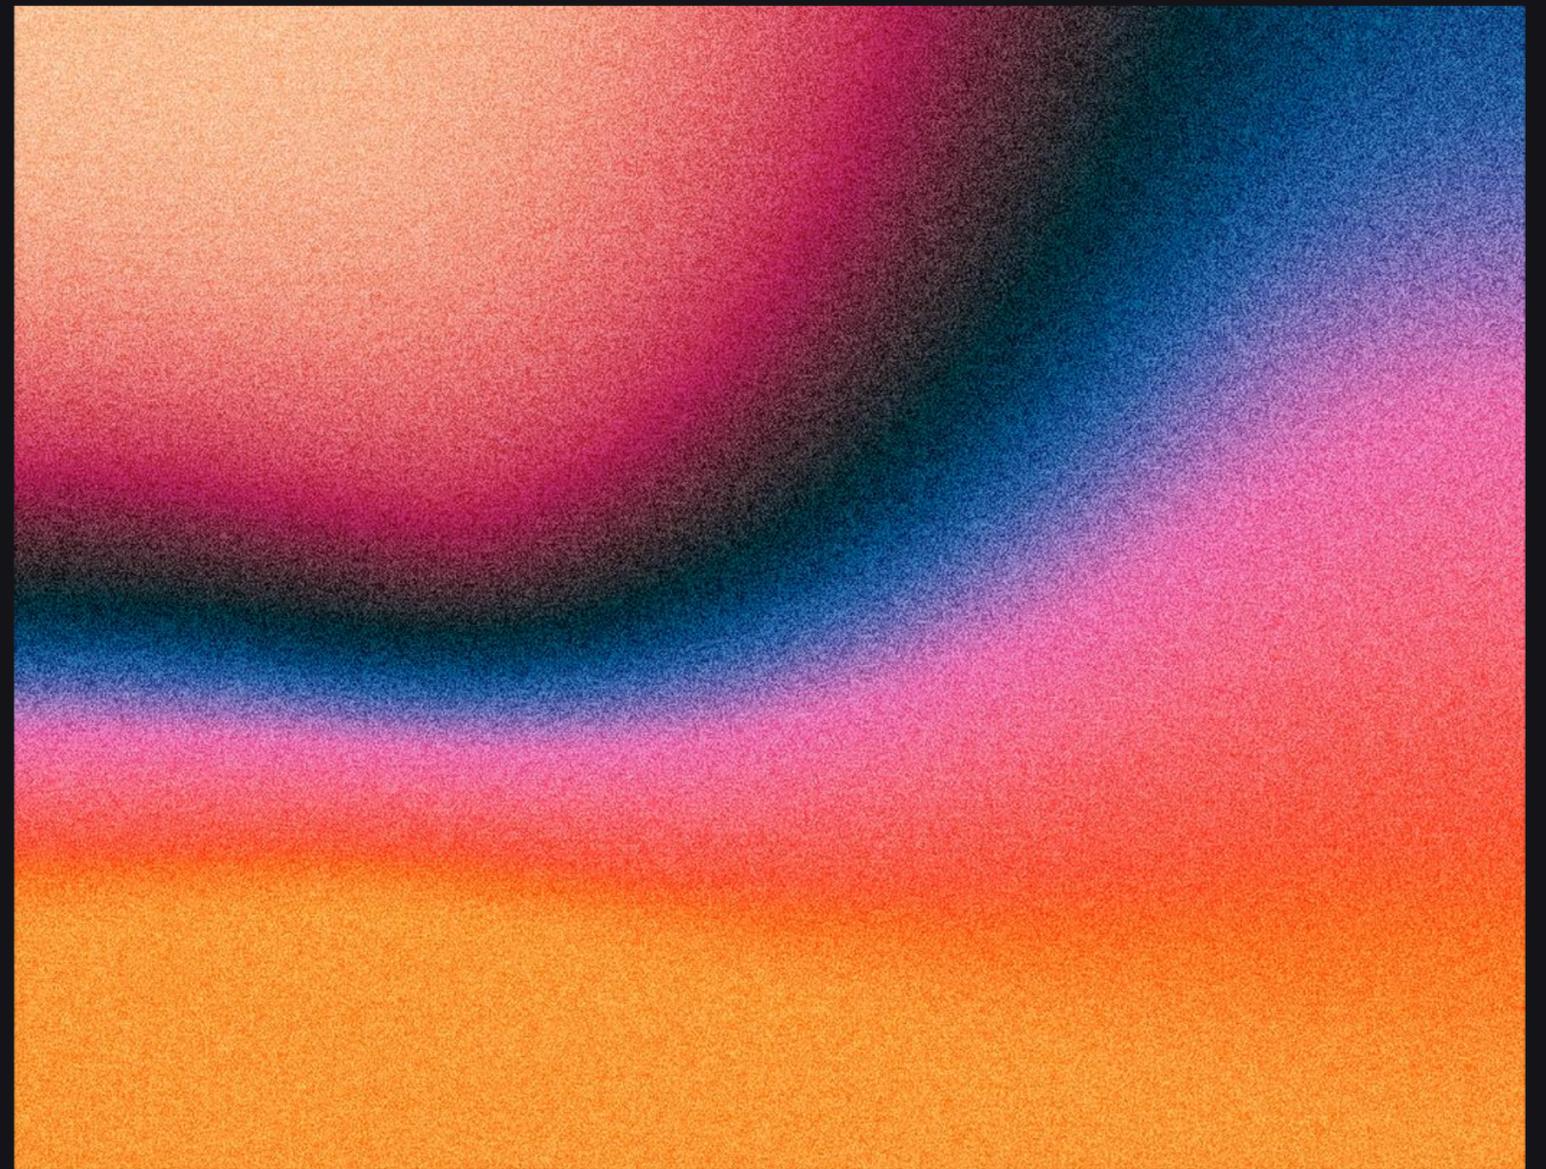

- Standardize styling and check UI consistency
- Populate all media content

## IF WE HAVE TIME

- Onboarding screens
- Profile screens

# WIZARD OF OZ TECHNIQUES

- Discovery page magically organizes and filters itself according to the user's location
- The search algorithm functions flawlessly every time
- Details of the restaurant homepage automatically update following restaurant changes made to Google

# HARD-CODED DATA

- The starter content is all hard-coded but still interactive
- Searching only reveals a single clickable result
- With no registered restaurants, all restaurant homepages are hardcoded
- Discovery page content is curated by us

# QUESTIONS

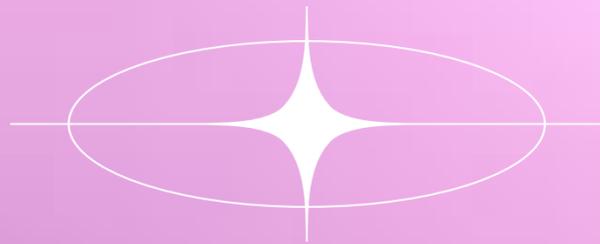

- Does the current restaurant landing page sufficiently convey its ambience (video content, moodboard, crowd-voted dress code, word cloud) or is there anything lacking that you feel would increase your understanding of the restaurant's vibe?

# LIVE DEMO

# APPENDIX

# VIOLATIONS WE DID NOT ADDRESS

## HOME SCREEN

H11 “A STAR AMOUNT IS DISPLAYED NEXT TO A RESTAURANT IN A POST. IT IS UNCLEAR WHETHER THIS IS THE OVERALL RATING OF THE RESTAURANT OR THE USER’S RATING OF THE RESTAURANT”

*ALTHOUGH A VALID CONCERN, WE WANT TO MINIMIZE ANY CONFLICTING DATA AS TO NOT OVERWHELM THE USER. DETAILS ABOUT THE RESTAURANT ONLY ARE ON THEIR LANDING PAGES*

## SEARCHING FOR A RESTAURANT

H3 “THE HOME AND PROFILE OPTIONS ARE NOT PROVIDED IN THE SEARCH RESULTS PAGE”

*AS OF RIGHT NOW, WE INTEND THE SEARCH FUNCTIONALITY TO BE USED TO LOCATE RESTAURANT HOME PAGES ONLY. USERS CAN FIND THEIR PROFILES THROUGH THE NAVIGATION BAR*

# VIOLATIONS WE DID NOT ADDRESS

## POSTING CONTENT

H5 “ADDING THE SOUNDTRACK OPTION IS NOT APPARENT AS THE SAME WHITE TEXT HAS BEEN USED AND DOES NOT STAND OUT TO THE USER AS SOMETHING ACTIONABLE.”

*THE SAME WHITE TEXT USED FOR ALL OTHER ACTIONABLE ITEMS (#FFFFFF) IS ALSO USED FOR THE SOUNDTRACK BUTTON*

H8 “AFTER POSTING THE CONTENT, THE SCREENS REDIRECT TO THE HOME PAGE WITH A COMPLETELY DIFFERENT RESTAURANT WHILE UPLOAD IS IN PROGRESS, AND THEN SHOWS THE RESTAURANT POSTED AFTER UPLOADING.”

*THIS IS THE SAME BEHAVIOR ADOPTED BY POPULAR SOCIAL MEDIA APPS LIKE TIKTOK AND INSTAGRAM. IT FOLLOWS INDUSTRY STANDARDS, SO USERS KNOW WHAT TO EXPECT*
