

Final Thoughts - March 15, 2018

Sign in for the last time and pick up and fill out a Course Evaluation & Comments Form

My Course Evaluation:

- provides me with better, more specific info than the online VPTL
- when finished, deposit in bag

Final Report and Individual Reflection due date:

- Inform me by email when I can expect these documents next week. If I don't hear from you, I'll assume you will send them on Monday

Project reimbursements: after you turn in your Final Report and Individual Reflection:

- no deadline
- follow emailed instructions
- submit documentation after you turn in your Final Report and Individual Reflection

Thanks for enrolling in the course

Final Presentations:

- awesome!
- appreciate the time and effort you put into your projects and the interest you had in assistive technology

Thank you: Oscar winner who said, "I did all by myself"

- 36 - students - without you there would be no course
- 12 - community members who attended classes
- 885 - community members who receive the course newsletter
- 22 - guest lecturers
- 7 - carpool drivers
- 10 - project suggestors
- 16 - videographers
- Haas Center for Public Service
- ME Design Group
- 19 - PRL TAs
- Over 1000 people!

Students who took the course for 1 unit & attended more than the ten required class sessions (not counting today):

Elvin & Tyler

The course had a deeper goal than learning about assistive technology. I hope you have had a chance to develop, improve, and practice professional skills:

- working in a team
- working in the community
- using a process to address a problem
- exercising critical thinking
- fabricating, testing, and evaluating prototypes
- writing reports
- presenting your project

Most memorable experiences:

- Magical Bridge Playground
- VA
- Ekso Bionics
- Assistive Technology Faire
- Film screening
- Project efforts
- Guest presenters:
 - Panel of Stanford students with a disability
 - Peter Axelson
 - Ralf Hotchkiss
- Cookies - how many cookies have we been thru? 544!
- Meetings with students and teams

Opportunities:

- Design competitions - especially RESNA
- SURF this summer, rising seniors
- Independent study

Project demonstrations:

- find a space to set up your projects
- check out what other teams have done
- show me your project's functionality
- have a burrito & soda

Are any students taking ME113 next quarter?

I hope your course experience will stay with you

Was this the best assistive technology course you have ever taken?

Good luck on wherever life takes you, please keep in touch

Thank you for the privilege of presenting this material to you.

Dave
