

The Mechanical Engineering Design Group in collaboration with Perspectives in Assistive Technology present

When: **Tuesday, March 5th at 4:15pm**

Where: **Atrium of Thomas F. Peterson Engineering Laboratory - Building 550
416 Escondido Mall, Stanford University**

Free and open to everyone

A Day with Danny

Danny's daily experiences and challenges living with cerebral palsy are documented in this short video from 2015. (11:32)

**Fixed:
The Science / Fiction of Human Enhancement**

From bionic limbs and neural implants to prenatal screening, researchers from around the world are hard at work developing a myriad of technologies to fix or enhance the human body. This film takes a close look at the drive to be "better than human" and the radical technological innovations that may take us there. (61:00)
