(Updated March, 2019)

1. Education

- 1988: Ph.D. major in Engineering-Economic Systems and minor in Operations Research. Thesis Title: “Interior Algorithms for Linear, Quadratic and Linearly Constrained Convex Programming,” Stanford University, Stanford, California. Ph.D. Thesis Committee (in alphabetic order): Sam Chiu, George Dantzig, David Luenberger, Edison Tse (Advisor).
- 1987: Visiting Ph.D. Student of Michael Todd, School of Operations Research and Industrial Engineering, Cornell University, Ithaca, New York.
- 1983: M.S. in Engineering-Economic Systems, Stanford University.
- 1982: B.S. in Systems and Control, Huazhong University of Science and Technology (HUST), Wuhan, the People's Republic of China.

2. Professional Experience

- 04/02---: K.T. Li Chair Professor of Engineering, and Director of the Industrial Affiliates Program of Department of Management Science and Engineering and, by courtesy, Electrical Engineering, Stanford University, Stanford. Areas: Mathematical Programming, Algorithm Design and Analysis, Network and Information System Applications.
- 12/07---: Honorary professor, The Hong Kong Polytechnic University.
- 04/06-07/06: Visiting Chair Professor, Tsinghua University, China.
- 01/98---04/02: Henry B. Tippie Research Professor, Department of Management Sciences and Applied Mathematical and Computational Sciences, University of Iowa, Iowa.
- 12/00---05/01: Visiting Professor, Department of Systems Engineering and Engineering Management, Chinese University of Hong Kong, Hong Kong.
- 09/98---11/98: Visiting Fellow, Mathematical Science Research Institute, UC Berkeley, California.
- 09/93---01/98: Professor, Department of Management Sciences, University of Iowa, Iowa.
- 08/93---12/93: Visiting Scientist, Department of Operations Research and Industrial Engineering, Cornell University, Ithaca, NY.
- 06/93---present: Adjunct Professor, Institute of Applied Mathematics, the Chinese Academy, Beijing, China.
- 06/93---present: Adjunct Professor, Department of Mathematics, Fudan University, Shanghai and Huazhong University of Science and Technology, Wuhan, China.
- 09/90---08/93: Associate Professor, Department of Management Sciences, University of Iowa, Iowa.
- 07/91---08/91: Visiting Scientist, Department of Mathematical and Computational Sciences, Rice University, Houston, TX.
- 09/88---08/90: Assistant Professor, Department of Management Sciences, University of Iowa, Iowa.
- 11/87---08/88: Research Scientist, Optimization Software Development, Integrated Systems Inc., Santa Clara, California.
- 09/86---06/87: Lecturer, Mathematical Programming and Systems Optimization, Department of Engineering-Economic Systems, Stanford University.
- 06/83---06/86: Research Assistant, Mathematical Programming, Decision Systems and Network Planning, Department of Engineering-Economic Systems, Stanford University.

3. Publications (singly authored if no author names shown)

3.1 Refereed Journal Papers

[J176] “Exact semidefinite formulations for a class of (random and non-random) nonconvex quadratic programs,” (Samuel Burer and Yinyu Ye), *Math. Program*, 1-17 (2018/2/7).

[J175] “Worst-case Complexity of Cyclic Coordinate Descent: $\mathcal{O}(n^2)$ Gap with Randomized Version,” (R Sun, Y Ye), arXiv preprint arXiv:1604.07130, to appear in *Math Prog.* 2019.

[J174] “On the Efficiency of Random Permutation for ADMM and Coordinate Descent,” (Sun, LUO and Ye), to appear in *Math. of OR*, 2019.

[J173] “Optimality condition and complexity analysis for linearly-constrained optimization without differentiability on the boundary,” (Haeser, G., Liu, H. & Ye, Y.) *Math. Program.* (2018). <https://doi.org/10.1007/s10107-018-1290-4>.

[J172] “Sample Average Approximation with Sparsity-Inducing Penalty for High-Dimensional Stochastic Programming,” (Hongcheng Liu, Xue Wang, Tao Yao, Runze Li, Ye), *Math. Program.* (2018). <https://doi.org/10.1007/s10107-018-1278-0>.

[J171] “On Doubly Positive Semidefinite Programming Relaxations,” (Fu, Ge and Ye), *Journal of Computational Mathematics*, Vol.36, No.3, 391–403 (2018).

[J170] “A computation study on an integrated alternating direction method of multipliers for large scale optimization,” (Masoud Zarepisheh, Lei Xing, Yinyu Ye), *Optimization Letters*, 12(1), 3-15 (2018).

[J169] “Extended ADMM and BCD for nonseparable convex minimization models with quadratic coupling terms: convergence analysis and insights,” (C Chen, M Li, X Liu, Y Ye), *Math. Program.* (2017) <https://doi.org/10.1007/s10107-017-1205-9>

[J168] “Assessing the System Value of Optimal Load Shifting,” (James Merrick, Yinyu Ye, and Robert Entriken), *IEEE Transactions on Smart Grid* 9 (6), 5943-5952, 2018.

[J167] “Folded Concave Penalized Sparse Linear Regression: Sparsity, Statistical Performance, and Algorithmic Theory for Local Solutions,” (Hongcheng Liu, Tao Yao, Runze Li, Ye), *Mathematical programming* 166 (1-2), 207-240, 2017

[J166] “On a New SDP-SOCP Method for Acoustic Source Localization Problem,” (Mingjie Gao, Ka-Fai Cedric Yiu, Sven Nordholm, Yinyu Ye), *ACM Transactions on Sensor Networks (TOSN)* 12 (4) 2016/10/25, pp 36-

[J165] “A Mathematical Formulation for Optimal Load Shifting of Electricity Demand for the Smart Grid,” (Hu, Skorupski, Entriken and Ye), *IEEE Transactions on Big Data*, 2016/12/15,

[J164] “An Integrated Alternating Direction Method of Multipliers for Treatment Planning Optimization,” (M Zarepisheh, Y Ye, L Xing) *Medical physics* 42 (6) (2015) 3532-3532.

[J163] “Likelihood robust optimization for data-driven problems,” (Zizhuo Wang , Peter W. Glynn, Yinyu Ye) *Computational Management Science*, Online (September 2015) 1-21.

[J162] “A fixed point iterative approach to integer programming and its distributed computation,” (Dang and Ye), *Fixed Point Theory and Applications*, 2015(1), 1-15.

- [J161] “The simplex method is strongly polynomial for deterministic Markov decision processes,” (Ian Post and Ye), *Math of Operations Research*, 40 (4) (2015) 859-868.
- [J160] “Linear operators and positive semidefiniteness of symmetric tensor spaces,” (Luo, Qi and Ye), *Science China Mathematics*, 58(1) (2015) 197-212.
- [J159] “The Direct Extension of ADMM for Multi-block Convex Minimization Problems is Not Necessarily Convergent,” (Caihua Chen, Bingsheng He, Yinyu Ye, Xiaoming Yuan), *Math Programming*. 155(1-2) (2016) 57-79.
- [J158] “Hidden-City Ticketing: the Cause and Impact,” (Wang and Ye), *Transportation Science*, 50(1) (2016) 288-305.
- [J157] “The Value of Stochastic Modeling in Two-Stage Stochastic Programs with Cost Uncertainty,” (Delage, Arroyo and Ye), *Operations Research*, 62 (6) (2014) 1377-1393.
- [J156] “Complexity Analysis of Interior Point Algorithms for Non-Lipschitz and Nonconvex Minimization,” (W. Bian, X. Chen, and Ye), *Math Programming*, 149 (2015) 301-327.
- [J155] “Simultaneous Beam Sampling and Aperture Shape Optimization for Station Parameter Optimized Radiation Therapy (SPORT)” (M Zarepisheh, Y Ye, S Boyd, R Li, L Xing), *Medical Physics* 41(6) (2014) 292-292.
- [J154] “Waterflood management using two-stage optimization with streamline simulation” (T Wen, MR Thiele, DE Ciaurri, K Aziz, Y Ye), *Computational Geosciences*, February (2014) 1-22.
- [J153] “A Dynamic Near-Optimal Algorithm for Online Linear Programming” (Agrawal, Wang and Ye), *Operations Research*, 62(4) (2014) 876 - 890.
- [J152] “A Homogeneous Interior-Point Algorithm for Nonsymmetric Convex Conic Optimization,” (Anders Skajaa and Ye), *Math Programming*, May (2014) 1-32.
- [J151] “Competitive Communication Spectrum Economy and Equilibrium,” *Journal of the Operations Research Society of China*, 2(1) (2014) 1-16,
- [J150] “Close the Gaps: A Learning-while-Doing Algorithm for a Class of Single-Product Revenue Management Problems,” (Wang, Deng and Ye), *Operations Research*, 62(2) (2014) 318-331.
- [J149] “Analytical results and efficient algorithm for optimal portfolio deleveraging with market impact,” (Jingnan Chen, Liming Feng, Jiming Peng, Yinyu Ye), *Operations Research*, 62(1) (2014) 195-206.
- [J148] “A Behavioral Model of “Muddling Through” in the Chinese Bureaucracy: The Case of Environmental Protection,” (Xueguang Zhou, Hong Lian, Leonard Ortolano, Yinyu Ye), *China Journal*, 70 (2013) 120-147.
- [J147] “A Levenberg-Marquardt method with approximate projections,” (R Behling, A Fischer, M Herrich, A Iusem, Y Ye), *Computational Optimization and Applications*, 59 (1-2) (2014) 5-26.
- [J146] “Space tensor conic programming,” (L Qi and Y Ye), *Computational Optimization and Applications*, 6(26) (2013) 1-13.
- [J145] “A Dynamic Algorithm for Facilitated Charging of Plug-In Electric Vehicles,” (Nicole Taheri, Robert Entriken, Yinyu Ye), *IEEE Transactions on Smart Grid*, 4(4) (2013) 1772-1779.
- [J144] “Complexity of Unconstrained L2-Lp Minimization,” (Chen, Ge, Wang, Ye), *Math Programming*, 143 (1-2) (2014) 371-383
- [J143] “Newsvendor Optimization with Limited Distribution Information,” (Zhu, Zhang and Ye), *Optimization Methods and Software* 28(3) (2013) 640-667

- [J142] “Warmstarting the Homogeneous and Self-Dual Interior Point Method for Linear and Conic Quadratic Problems,” (Anders Skajaa, Erling D. Andersen and Yinyu Ye), *Math Programming Computation*; 5(1) (2013) 1-25.
- [J141] “On affine motions and bar frameworks in general position,” (Alfakih and Ye), *Linear Algebra and Applications*, 438 (1) (2013) 31–36.
- [J140] “A variational principle for computing nonequilibrium fluxes and potentials in genome-scale biochemical networks” (Fleming, Maes, Saunders, Ye, Palsson), *Journal of Theoretical Biology*, 292 (2012) 71-77.
- [J139] “Price of Correlations in Stochastic Optimization” (Agrawal, Ding, Sebari, and Ye), *Operations Research*, 60:1 (2012), 150-162.
- [J138] “The cubic spherical optimization problem,” (Zhang, Qi and Ye), *Math of Computation*, 81 (2012) 1513.
- [J137] “On stress matrices of $(d + 1)$ -lateration frameworks in general position,” (Alfakih, Taheri, and Ye), *Mathematical Programming* 137 (1-2) (2013), 1-17.
- [J136] “The Simplex and Policy-Iteration Methods are Strongly Polynomial for the Markov Decision Problem with a Fixed Discount Rate,” *Math Operations Res*, 36:4 (2011) 593-603.

Over 200 invited presentations

Patents through Stanford Technology License:

* A Semi-Definite Programming Method for AD HOC Network Node Localization, 2005

- * Convex Parimutuel Call Auction Mechanism (S05-349), 2006

5. Professional Affiliations and Activities

Membership

- * The Institute for Operations Research and the Management Sciences (INFORMS)
- * Society for Industrial and Applied Mathematics (SIAM)
- * Mathematical Optimization Society (MOS)

Positions

- * Co-organizer of the 2011 Fields Research Institute Thematic Program on Geometry and Optimization.
- * Elected Vice Chair of the SIAM Activity Group on Optimization (SIAG/OPT), 2008-.
- * Co-organizer of Workshop of Internet and Network Economics, 2005-.
- * Section Officer (Linear Programming) of the Institute for Operations Research and the Management Sciences, (1997-2000).
- * Co-organizer of the 1999 DIMACS Princeton workshop on discrete optimization.
- * Member of the International Advisory Committee for the 15th and 16th International Symposium on Mathematical Programming (1992-1997).
- * Topic Coordinator for the 15th International Symposium on Mathematical Programming (1992-1994).

Special Presentations

- * Invited Lecture at the 8th International Congress on Industrial and Applied Mathematics (ICIAM 2015), August 2015.
- * Plenary Tseng Lectureship speaker at the 21th International Symposium on Mathematical Programming, Berlin, 2012
- * Invited Presentations, IPAM workshops on the Simplex Method, Stochastic and Robust Optimization and Continuous Optimization, UCLA, October 2010 to January 2011.
- * Semi-plenary speaker, The Chinese Mathematical Programming Society Annual Meeting, 2010
- * Plenary speaker in Workshop on Internet and Network Economics, 2008
- * Plenary speaker at the 19th International Symposium on Mathematical Programming, Rio de Janeiro, 2006
- * Distinguished Speaker in High Performance Computation for Engineered Systems (HPCES), MIT, 2002.
- * Semi-plenary speaker at the 17th International Symposium on Mathematical Programming, Atlanta, 2000.

Journal Boards

- * Area Editor of *Math Operations Res* (2010-), *Operations Research* (2005-2010), Chief Editor of *Optimization & Engineering* (2000-) and *Pacific Journal of Optimization* (2003-).
- * Associate Editor of *Management Science* (2004-2009), *Math Operations Res* (1998-2001), *Optimization Methods and Software* (2003-), *SIAM Journal on Optimization* (1990-1997), *Journal of the Operations Research Society of Japan* (1998-), *Journal of Computational Mathematics* (2004-).

Reviewers

- * NSF proposal review panelist (1994, 1995, 1996, 2000, 2002, 2009, 2011).
- * Referee for *Mathematics of Operations Research*, *Mathematical Programming*, *SIAM Journals*, *Operations Research*, *Linear Algebra and its Applications*, and *Journal of Optimization Theory and Applications*, etc.
- * Reviewer for National Science Foundation; Natural Sciences and Engineering Research Council of Canada, Research Grant Council of Australia, Research Grant Council of Hong Kong, Sciences and Engineering Research Council of Chile.

6. Industrial and Consulting Activities

Chairman of the technical advisory board of MOSEK (2009-)
 Director of the Industrial Affiliate Program, Management Science and Engineering, Stanford (2002-2018)
 Recipient of the 2010 and 2011 EPRI (Electric Power Research Institute) Gift
 Recipient of the 2009 IBM Faculty Award
 Sample of Industrial Projects and Activities:
 JD.com (2015-)
 49ers (2014-), Stadium Management

American on Line (AOL) (2013-), Data Analytics
 Oracle (2013-), Meta-Heuristic Optimization
 Boeing (2004-2013), Stochastic and Robust Decision Making and Optimization
 Boeing (2004-2013), Dynamic Resource Allocation
 American Express (2005-2008), Game and Dynamic Decision
 Huawei Technologies Co., Ltd. (China) (2005-2010), Supply Chain Management and Facility Location
 TISCO Inc. (China) (2006-2007), Supply Chain and Project Management
 Polaris Wireless Inc (2006-2007), Mobile Phone Localization
 AtRoad, Inc. Fremont (2006-2007), Vehicle Routing
 Barcelona Design Inc, (1998-2004), Analog Circuit Design
 AT&T (1992-1993), Linear Programming Solver Development
 MCI Telecommunication (1991-1992), Real Time Restoration for Telecommunication Network

7. Honors

Yinyu Ye

- * The 2015 IEEE SPS **Signal Processing Magazine Best Paper** Award for the paper "Semidefinite Relaxation of Quadratic Optimization Problems" by Zhi-Quan Luo, Wing-Kin Ma, Anthony Man-Cho So, Yinyu Ye, and Shuzhong Zhang.
- * The winner of the **2014 SIAM Optimization Prize**, awarded every three years to the author(s) of the most outstanding paper, as determined by the prize committee, on a topic in optimization published in English in a peer-reviewed journal.
- * 2012 ISMP Tseng Lectureship Prize (Inaugural Recipient) for outstanding contributions in the area of continuous optimization, consisting of original theoretical results, innovative applications, or successful software development.
- * 2009 INFORMS **John von Neumann Theory Prize** (Co-Recipient) for fundamental sustained contributions to theory in Operations Research and the Management Sciences
- * 2007 Stanford Asian American Faculty of Year Award
- * 2006 INFORMS **Optimization Society Farkas Prize** (Inaugural Recipient) for fundamental contributions to optimization
- * 2006 INFORMS Fellow
- * 2003 ISI Highly Cited Mathematical Researcher (one of 250 in Mathematical Sciences for 1983-2002, <http://www.ISIhighlycited.com>)
- * 2004 BASES Innovators' Challenge First-Place Winners: Pratik Biswas and Yinyu Ye on sensor network localization.
- * 2005 BASES Innovators' Challenge First-Place Winners: Holy Jin, Mike Carter, Mike Saunders and Yinyu Ye on sensor network management.
- * Research Fellow, Mathematical Science Research Institute, UC Berkeley, 1998.
- * Australian Research Council Fellowship, University of New South Wales, 1997.
- * Japan Education Ministry Fellowship, Institute of Statistical Mathematics, 1996.
- * Dutch Organization for Scientific Research (NWO) Fellowship, Delft University, 1994-1997.
- * Obermann Fellowship, University of Iowa, 1994.
- * Cornell University Theory Center Fellowship, 1993-1994.
- * Fellowship Award of K. C. WONG Education Foundation, Hong Kong, 1993.

Students Supervised by Yinyu Ye

- * 2015 Second Prize of INFORMS Nicholson Student Paper Competition, Ruoyu Sun, for the joint paper "On the Expected Convergence of Randomly Permuted ADMM."
- * 2013 INFORMS Computing Society Prize, John Carlsson, for his best English language papers dealing with the Operations Research/Computer Science interface
- * 2013 Second Prize of INFORMS Nicholson Student Paper Competition, Ian Post, for the joint paper "The simplex method is strongly polynomial for deterministic Markov decision processes."

- * 2010 INFORMS Best Interactive Session Award, John Carlsson, for his paper “Dividing a territory between several facilities.”
- * 2010 INFORMS Optimization Prize for Young Researchers, Anthony Man-Cho So, for his paper “Moment inequalities for sums of random matrices and their applications to optimization.”
- * 2008 First Prize of INFORMS Nicholson Student Paper Competition, E. Delage, for the joint paper “Distributionally Robust Optimization under Moment Uncertainty with Application to Data-Driven Problems”
- * 2004 INFORMS Optimization Prize for Young Researchers, Jiawei Zhang, for his paper “Approximating the Two-Level Facility Location Problem via a Quasi-Greedy Approach”

8. Funded Research

- *China Electricity Power Research Institute (CEPRI), Power Dispatch Optimization, 2014-.
- * Principal Investigator (1 of 2), Air Force Grant on Quadratic Mixed Integer Optimization, 2012-2015.
- * Principal Investigator (1 of 1), the Precourt Energy Efficiency Center: “A Robust Mechanism to Dynamically Provide Grid Services with a Fleet of Plug-in Electric Vehicles,” 2012-2013.
- * Principal Investigator (1 of 2), DOE Grant on Numerical Optimization Algorithms and Software for Systems Biology, 2009-2012.
- * Principal Investigator (1 of 3), Air Force Grant on Optimization Algorithms and Equilibrium Analysis for Dynamic Resource Allocation, 2009-2012.
- * Principal Investigator, NSF GOALI on Region Partitioning, 2008-2011.
- * Principal Investigator, NSF Grant on Complexity of Market Equilibrium, 2006-2010.
- * Principal Investigator, NSF Grant for Markov Decision Problem and Linear Programming, 2003-2006.
- * Principal Investigator, NSF Grant for Semidefinite Programming and Approximation Algorithms, 1999-2003.
- * Principal Organizer (1 of 2), Semidefinite Programming and Large-Scale Discrete Optimization Workshop, DIMACS and Princeton University, 1999.
- * Co-Principal Investigator (1 of 5), NSF Grant for Computational Infrastructure and Equipment, 1998-1999.
- * Co-Principal Investigator (1 of 4), NSF Grant for Hybrid Optimization for Protein Structure, 1998-1999.
- * Co-Principal Investigator (1 of 4), University of Iowa Biosciences Initiative Pilot Grant, 1998.
- * Principal Investigator, NSF Grant for computational complexity, 1997-2000.
- * Principal Investigator, NSF Grant for mathematical programming, 1995-1998.
- * Principal Investigator, NSF Grant for linear programming interior-point algorithms, 1993-1995.
- * Principal Investigator, NSF Grant for linear programming, 1990-1992.
- * Principal Investigator, College Summer Grants, College of Business of Administration, University of Iowa, 1989-1997.
- * Principal Investigator (1 of 2), Center for Advanced Studies Interdisciplinary Research Grant, University of Iowa, 1991-1992.
