

# clarus

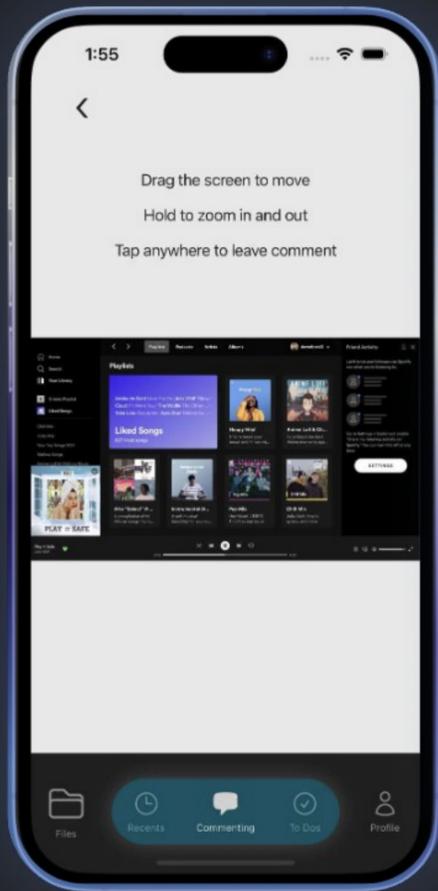

seamless, flexible communication between founders and designers

“

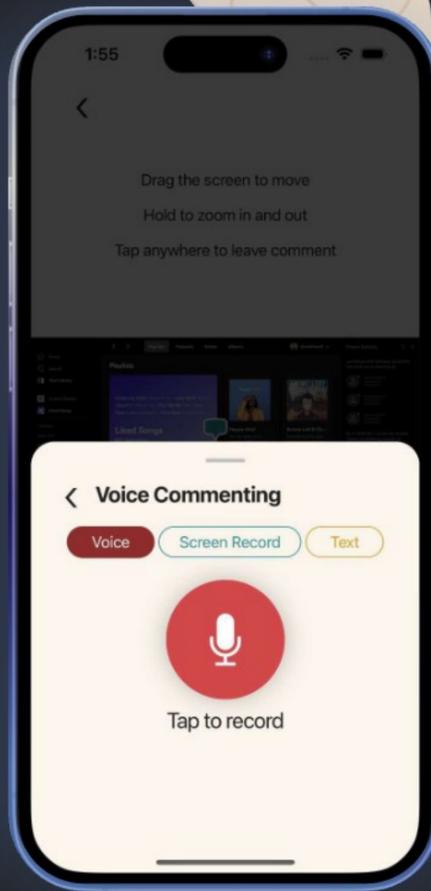

Current design tools create **scattered, text-heavy feedback** that **slows communication** and makes collaboration inefficient.

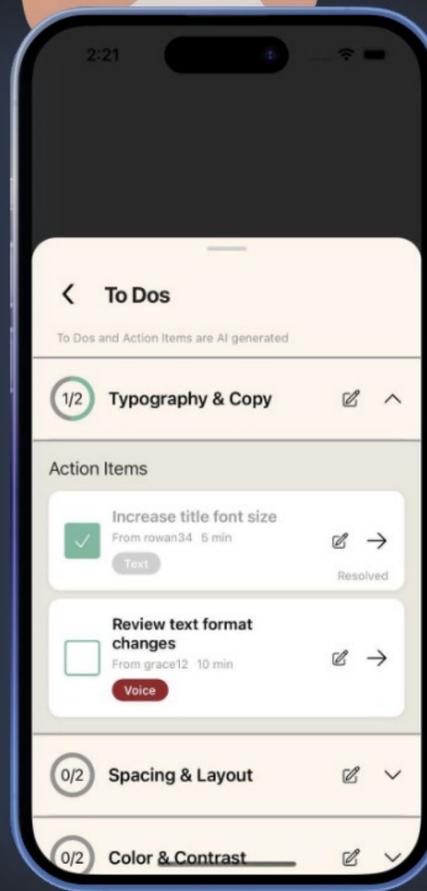

Clarus organizes **multimodal design feedback** with AI, turning voice, video, and text into clear, actionable, and effortless commenting and collaboration.

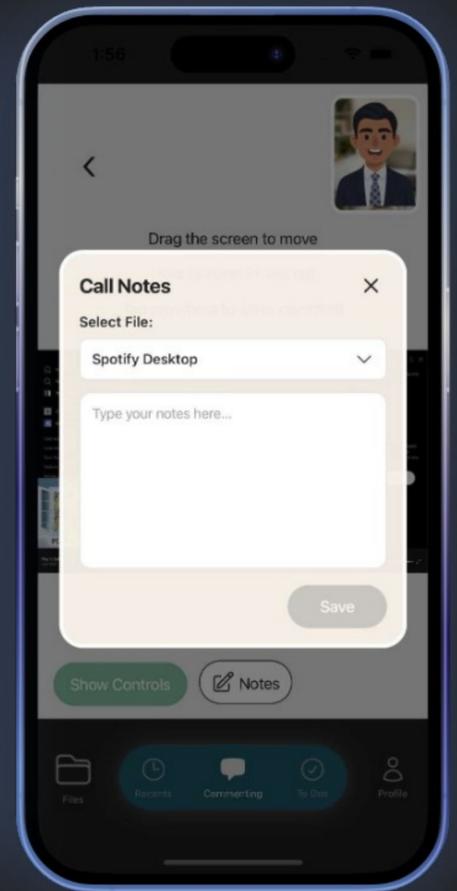

Upload design files to add comments

Voice, screen record & text commenting

AI generated task organization

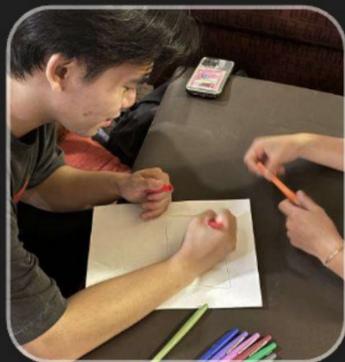

Screen sharing, live calling & note taking
