Doesn't it suck when you get home from a night out and have nothing to remember it by? Or even worse, having to pester your friends for last night's photos?

Introducing timelock. An app that allows you and your friends to collectively capture all different types of media into a custom digital memento. You and your friends get pinged throughout the night to submit to your timelock. Add photos, videos, voice memos, and more, and we create a memento to remember your night by.

Your memories locked, all in one place. We help you capture the moment, while letting you enjoy the experience. Come to Booth 19 to learn more about timelock.
