

# Real-time debugging with DDMS perspective

# Real-time debugging with DDMS perspective

The screenshot displays the DDMS interface with several panels:

- Devices:** A table listing connected devices. A yellow callout labeled "Device" points to the first row.
- File Explorer:** A file browser showing the directory structure of the selected device. A yellow callout labeled "File system on device" points to the file list.
- Emulator Control:** A panel for controlling telephony status, including voice and data settings.
- LogCat:** A log viewer showing system messages. A yellow callout labeled "Messages on the device" points to the log entries.
