(Same as FILMSTUD 330) The post-WW II era. Aesthetic and sociopolitical dimensions of neorealism; 60s cinema of economic miracle; and Italian variations on popular film genres such as the spaghetti western. Filmmakers include Rossellini, De Sica, Visconti, Pasolini, and Antonioni. GER:DB-Hum

4 units, *not given this year*

**FILMSTUD 132. East Asian Cinema**

(Same as FILMSTUD 332) Social, historical, and aesthetic dimensions of the cinemas of Japan, Hong Kong, Taiwan, mainland China, and Korea. Topics such as nation and gender, form and genre, and local and transnational conditions of practice and reception. Screenings include popular and art films from the silent to contemporary eras, including, Zhang Yimou, Wong Kar-wai, Hou Hsiao-hsien, Ozu Yasujiro, Kurosawa Akira, and Im Kwon-taek.

4 units, *not given this year*

**FILMSTUD 134A. Poetic Cinema: The Soviet School**

(Same as FILMSTUD 334A) The poetic or archaic school of Soviet cinema which emerged primarily in the non-Russian Soviet Republics in the 60s and 70s and traced its aesthetic to the films of Aleksandr Dovzhenko. Films by Dovzhenko, Andrei Tarkovsky, Sergei Parajanov, Tengiz Abuladze, and Otar Ioseliani. GER:DB-Hum

4 units, *Spr (Staff)*

**FILMSTUD 135. History of Video Art**

(Same as FILMSTUD 335) Focus is on artists who have contributed to the history of video art. Topics include: theoretical analyses of the medium; challenges to the performer-spectator dynamic (Dan Graham and Vito Acconci); feminist culture critique (Martha Rosler and Dara Birnbaum); closed-circuit installations and performances (Peter Campus and Joan Jonas); combinations of linguistic and bodily investigations (Bruce Nauman and Gary Hill); representations of girl culture (Sadie Benning); guerrilla television (TVTV and Ant Farm); image processing (Woody and Steina Vasulka); the turn toward cinematic installations (Stan Douglas and Douglas Gordon); and more recent trends (Cory Arcangel and Ryan Trecartin).

4 units, *not given this year*

**FILMSTUD 136. Gender and Sexuality in East Asian Cinema**

(Same as FILMSTUD 336) Representations of gender and sexuality in the cinemas of China, Taiwan, and Hong Kong, covering key periods and genres such as the golden age of Shanghai film, Hong Kong action pictures, opera films, post-socialist art films, and new queer cinema. Historical and contemporary perspectives on cinematic constructions of femininity, masculinity, and sexuality as they relate to issues of nationalism, modernity, globalization, and feminist and queer politics. Weekly screening required. GER:EC-Gender

4 units, *Aut (Ma, J)*

**FILMSTUD 138A. The Films of Arturo Ripstein**

(Same as FILMSTUD 338A) Mexican director Arturo Ripstein offers a course on the creative process through an examination of several of his feature films. His films derive from Mexican melodrama, a genre known for its aesthetic plasticity and its roots in Mexican culture and society.

4 units, *Win (Staff)*

**FILMSTUD 145. Politics and Aesthetics in East European Cinema**

(Same as FILMSTUD 345) From 1945 to the mid-80s, emphasizing Polish, Hungarian, Czech, Slovak, and Yugoslav contexts. The relationship between art and politics; postwar establishment of film industries; and emergence of national film movements such as the Polish school, Czech new wave, and new Yugoslav film. Thematic and aesthetic preoccupations of filmmakers such as Wajda, Jancso, Forman, and Kusturica. GER:DB-Hum

4 units, *Spr (Levi, P)*

**FILMSTUD 150. Cinema and the City**

(Same as FILMSTUD 350) Utopian built environments of vast perceptual and experiential richness in the cinema and city. Chang-

ing understandings of urban space in film. The cinematic city as an arena of social control, social liberation, collective memory, and complex experience. Films from international narrative traditions, industrial films, experimental cinema, documentaries, and musical sequences. Recommended: 4 or equivalent. GER:DB-Hum, EC-GlobalCom

4 units, *not given this year*

**FILMSTUD 153A. Transmedia TV**

(Same as FILMSTUD 353A) Beginning from theoretical questions about the structure of media texts and their production, distribution, reception, and regulation, this course analyzes how the collision of broadcast and broadband is reshaping the media landscape. Course investigates the definition of television and its articulation across multiple platforms, including streaming video, online tie-ins, fan remixes, and web shows. Such convergence involves both intensified corporate consolidation and intensified viewer participation. As the boundary between producers and consumers of entertainment breaks down, course explores renegotiating the possibilities of the TV experience.

4 units, *Spr (Staff)*

**FILMSTUD 220. Being John Wayne**

John Wayne's imposing corporeality and easy comportment combined to create an icon of masculinity, the American West, and America itself. Focus is on the films that contributed most to the establishment, maturation, and deconstruction of the iconography and mythology of the John Wayne character. The western and war film as genres; the crisis of and performance of masculinity in postwar culture; gender and sexuality in American national identity; relations among individualism, community, and the state; the Western and national memory; and patriotism and the Vietnam War.

5 units, *not given this year*

**FILMSTUD 230. Cinema and Ideology**

The relationship between cinema and ideology from theoretical and historical perspectives, emphasizing Marxist and psychoanalytic approaches. The practice of political filmmaking, and the cinema as an audiovisual apparatus and socio-cultural institution. Topics include: dialectics; revolutionary aesthetics; language and power; commodity fetishism; and nationalism. Filmmakers include Dziga Vertov, Jean-Luc Godard, Bruce Conner, and Marco Ferreri. Theoretical writers include Karl Marx, Sergei Eisenstein, and Slavoj Zizek. Prerequisite: consent of instructor.

5 units, *not given this year*

**FILMSTUD 231. Contemporary Chinese Auteurs**

New film cultures and movements in Taiwan, Hong Kong, and mainland China in the 80s. Key directors including Jia Zhangke, Wu Wenguang, Tsai Ming-liang, Hou Hsiao-hsien, Wong Kar-wai, Ann Hui. Topics include national cinema in the age of globalization, the evolving parameters of art cinema, and authorship.

5 units, *not given this year*

**FILMSTUD 240A. History and Poetics of Cinematography**

The history of cinematographic devices and styles through the work of such cinematographers as Billy Bitzer, Eduard Tisse, Greg Toland, Kazuo Miyagawa, John Alton, James Wong Howe, Sergei Urusevskii, Raoul Coutard, and Jack Cardiff.

5 units, *Spr (Oeler, K)*

**FILMSTUD 250A. Politics of Representation**

Counterpoising viewpoints on media visibility drawn from identity politics and poststructuralist theory: the questions entangled in negotiating a politics of representation: Can images show how things really are? Who is seen and who is not? Can interpretation go beyond stereotypes? How are people situated as media content and consumers? Focusing primarily on gender, race, sexuality, and their intersections, analysis of invocations of these categories in film, television, and cyberculture. Texts presenting opposing perspectives by theorists, critics, and activists to scaffold each example. How different media forms open or close possibilities for progressive representation, reception, and political change.

5 units, *Spr (Staff)*

**FILMSTUD 290. Senior Seminar: Movies and Methods**

Capstone course for majors. Topics vary year to year. Focus is on historiography and theory.

5 units, *Spr (Levi, P)*

**FILMSTUD 297. Honors Thesis Writing**

May be repeated for credit.

*1-5 units, Aut (Staff), Win (Staff), Spr (Staff)*

**FILMSTUD 299. Independent Study: Film and Media Studies**

May be repeated for credit.

*1-15 units, Aut (Staff), Win (Staff), Spr (Staff)*

**FILMSTUD 338A. The Films of Arturo Ripstein**

(Same as FILMSTUD 138A) Mexican director Arturo Ripstein offers a course on the creative process through an examination of several of his feature films. His films derive from Mexican melodrama, a genre known for its aesthetic plasticity and its roots in Mexican culture and society.

*4 units, Win (Staff)*

**GRADUATE COURSES IN FILM STUDIES****FILMSTUD 300A. History of World Cinema I, 1895-1929**

(Same as FILMSTUD 100A) From cinema's precursors to the advent of synchronized sound.

*4 units, Aut (Oeler, K)*

**FILMSTUD 300B. History of World Cinema II, 1930-1959**

(Same as FILMSTUD 100B) The impact of sound to the dissolution of Hollywood's studio system.

*4 units, not given this year*

**FILMSTUD 300C. History of World Cinema III, 1960-Present**

(Same as FILMSTUD 100C) From the rise of the French New Wave to the present.

*4 units, Spr (Ma, J)*

**FILMSTUD 301. Fundamentals of Cinematic Analysis**

(Same as FILMSTUD 101) The close analysis of film. Emphasis is on formal and narrative techniques in structure and style, and detailed readings of brief sequences. Elements such as cinematography, mise-en-scène, composition, sound, and performance. Films from various historical periods, national cinemas, directors, and genres. Prerequisite: FILMSTUD 4 or equivalent. Recommended: ARTHIST 1 or FILMSTUD 102.

*4 units, Win (Oeler, K)*

**FILMSTUD 302. Theories of the Moving Image**

(Same as FILMSTUD 102) Major theoretical arguments and debates about cinema: realism, formalism, poststructuralism, feminism, postmodernism, and phenomenology. Prerequisites: ARTHIST 1, FILMSTUD 4.

*4 units, Spr (Ma, J)*

**FILMSTUD 311. The Body in American Genre Film: From Chaplin to The Matrix**

(Same as FILMSTUD 111) The American genre film as a mass form that shares elements with a carnivalesque, folk culture such as a rejection of politeness and piety, and an emphasis on the physical. Genres include comedy, western, war, science fiction, musical, horror, melodrama, gangster, and cult, exploitation, and blaxploitation films. The place of the body onscreen. How does the body exist in relation to the world, other bodies, and the act of perception? What meaning does bodily movement have in relation to narrative?

*4 units, not given this year*

**FILMSTUD 314. Comics**

(Same as FILMSTUD 114) The modern medium of comics, a history that spans 150 years. The flexibility of the medium encountered through the genres of humorous and dramatic comic strips, superheroes, undergrounds, independents, journalism, and autobiography. Innovative creators including McCay, Kirby, Barry, Ware, and critical writings including McCloud, Eisner, Groensteen. Topics include text/image relations, panel-to-panel relations, the page, caricature, sequence, seriality, comics in the context of the fine arts, and relations to other media.

*4 units, Spr (Bukatman, S)*

**FILMSTUD 315. Documentary Issues and Traditions**

(Same as FILMSTUD 115) Issues include objectivity/subjectivity, ethics, censorship, representation, reflexivity, responsibility to the audience, and authorial voice. Parallel focus on form and content.

*4 units, Aut (Krawitz, J)*

**FILMSTUD 316. International Documentary**

(Same as FILMSTUD 116) Historical, aesthetic, and formal devel-

opments of documentary through nonfiction films in Europe, Asia, Latin America, and Africa.

*4 units, not given this year*

**FILMSTUD 322. Kubrick**

(Same as FILMSTUD 122) Thematic and stylistic richness of the cinema of Stanley Kubrick. Methodological approaches to the subject. Emphasis is on questions of close textual analysis, authorship and genre, and critique of ideology. Focus is on *A Clockwork Orange*. Other films include: 2001: A Space Odyssey, Barry Lyndon, *Killer's Kiss*, and *The Shining*.

*4 units, Win (Levi, P)*

**FILMSTUD 330. Italian Cinema: Neorealism and Beyond**

(Same as FILMSTUD 130) The post-WW II era. Aesthetic and sociopolitical dimensions of neorealism; 60s cinema of economic miracle; and Italian variations on popular film genres such as the spaghetti western. Filmmakers include Rossellini, De Sica, Visconti, Pasolini, and Antonioni.

*4 units, not given this year*

**FILMSTUD 332. East Asian Cinema**

(Same as FILMSTUD 132) Social, historical, and aesthetic dimensions of the cinemas of Japan, Hong Kong, Taiwan, mainland China, and Korea. Topics such as nation and gender, form and genre, and local and transnational conditions of practice and reception. Screenings include popular and art films from the silent to contemporary eras, including, Zhang Yimou, Wong Kar-wai, Hou Hsiao-hsien, Ozu Yasujiro, Kurosawa Akira, and Im Kwon-taek.

*4 units, not given this year*

**FILMSTUD 334A. Poetic Cinema: The Soviet School**

(Same as FILMSTUD 134A) The poetic or archaic school of Soviet cinema which emerged primarily in the non-Russian Soviet Republics in the 60s and 70s and traced its aesthetic to the films of Aleksandr Dovzhenko. Films by Dovzhenko, Andrei Tarkovsky, Sergei Parajanov, Tengiz Abuladze, and Otar Ioseliani.

*4 units, Spr (Staff)*

**FILMSTUD 335. History of Video Art**

(Same as FILMSTUD 135) Focus is on artists who have contributed to the history of video art. Topics include: theoretical analyses of the medium; challenges to the performer-spectator dynamic (Dan Graham and Vito Acconci); feminist culture critique (Martha Rosler and Dara Birnbaum); closed-circuit installations and performances (Peter Campus and Joan Jonas); combinations of linguistic and bodily investigations (Bruce Nauman and Gary Hill); representations of girl culture (Sadie Benning); guerrilla television (TVTV and Ant Farm); image processing (Woody and Steina Vasulka); the turn toward cinematic installations (Stan Douglas and Douglas Gordon); and more recent trends (Cory Arcangel and Ryan Trecartin).

*4 units, not given this year*

**FILMSTUD 336. Gender and Sexuality in East Asian Cinema**

(Same as FILMSTUD 136) Representations of gender and sexuality in the cinemas of China, Taiwan, and Hong Kong, covering key periods and genres such as the golden age of Shanghai film, Hong Kong action pictures, opera films, post-socialist art films, and new queer cinema. Historical and contemporary perspectives on cinematic constructions of femininity, masculinity, and sexuality as they relate to issues of nationalism, modernity, globalization, and feminist and queer politics. Weekly screening required.

*4 units, Aut (Ma, J)*

**FILMSTUD 345. Politics and Aesthetics in East European Cinema**

(Same as FILMSTUD 145) From 1945 to the mid-80s, emphasizing Polish, Hungarian, Czech, Slovak, and Yugoslav contexts. The relationship between art and politics; postwar establishment of film industries; and emergence of national film movements such as the Polish school, Czech new wave, and new Yugoslav film. Thematic and aesthetic preoccupations of filmmakers such as Wajda, Jancso, Forman, and Kusturica.

*4 units, Spr (Levi, P)*

**FILMSTUD 350. Cinema and the City**

(Same as FILMSTUD 150) Utopian built environments of vast perceptual and experiential richness in the cinema and city. Changing understandings of urban space in film. The cinematic city as an arena of social control, social liberation, collective memory, and complex experience. Films from international narrative traditions,

industrial films, experimental cinema, documentaries, and musical sequences. Recommended: 4 or equivalent.

4 units, not given this year

#### **FILMSTUD 353A. Transmedia TV**

(Same as FILMSTUD 153A) Beginning from theoretical questions about the structure of media texts and their production, distribution, reception, and regulation, this course analyzes how the collision of broadcast and broadband is reshaping the media landscape. Course investigates the definition of television and its articulation across multiple platforms, including streaming video, online tie-ins, fan remixes, and web shows. Such convergence involves both intensified corporate consolidation and intensified viewer participation. As the boundary between producers and consumers of entertainment breaks down, course explores renegotiating the possibilities of the TV experience.

4 units, Spr (Staff)

#### **FILMSTUD 406. Montage**

Graduate seminar in film aesthetics. Theoretical and practical approaches to editing/montage. Stylistic, semiotic, epistemological, and ideological functions of montage considered in film-historical contexts including: development of the continuity system of editing; flourishing of the Soviet montage school; and achievements of the post-war new waves. Filmmakers include D. W. Griffith, Sergei Eisenstein, Jean-Luc Godard, and Dusan Makavejev.

4 units, Aut (Levi, P)

#### **FILMSTUD 407. The Still Moving Image**

Tension and overlap between cinema and photography as technological media, beginning with Frankfurt school critiques of media theory, classical film, and photography theory through recent considerations of the post-cinematic age of digital and virtual images. How ideas of indexicality, medium specificity, memory, duration, narrativity, chance, stasis, repetition have informed accounts of the relationship of these media.

5 units, not given this year

#### **FILMSTUD 410A. Documentary Perspectives I**

Restricted to M.F.A. documentary film students. Topics in nonfiction media. Presentations and screenings by guest filmmakers. Prerequisite: consent of instructor.

4 units, Win (Meltzer, J)

#### **FILMSTUD 410B. Documentary Perspectives II**

Restricted to M.F.A. documentary film students. Continuation of 410A. Topics in nonfiction media. Presentations and screenings by guest filmmakers. Prerequisite: consent of instructor.

4 units, not given this year

#### **FILMSTUD 411. Animation**

The fantasy of an image coming to life dates back centuries but it was not until the onset of the cinema that the fantasy was actualized. The implications of animation, considering its underlying fantasies in art and literature, its particular phenomenologies, its relation to the uncanny, its status as a pure cinema, and its place in film theory. Different modes of production and style including realist animation, abstract animation; animistic animation; animated drawings, objects, and puppets; CGI, and live/animation hybrids.

5 units, Spr (Bukatman, S)

#### **FILMSTUD 440. Sound Technology**

Development of sound technology and reproduction in context of modernity, with some emphasis on the crossings of sound and image in the history and theory of technological reproduction. Topics include phonography, recording, and mass culture (Adorno, Sterne, Thompson, Lastra); cinematic sound and music (Chion, Altman, Gorbman); filmic and compositional practices in the American avant-garde (Joseph, Kahn); acoustic ecology (Schafer). Weekly screenings or listenings.

5 units, Win (Ma, J)

#### **FILMSTUD 660. Independent Study**

For graduate students only. Approved independent research projects with individual faculty members.

1-15 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

## FILM, PRACTICE OF (FILMPROD)

### UNDERGRADUATE COURSES IN FILM PRACTICE

#### **FILMPROD 101. Screenwriting**

(Same as FILMPROD 301) Priority to Film and Media Studies majors. Craft, form, and approaches to writing for the screen. Prerequisites: ENGLISH 90, 190F, and consent of instructor.

5 units, Spr (Tobin, A)

#### **FILMPROD 105. Script Analysis**

(Same as FILMPROD 305) Analysis of screenplay and film from the writer's perspective, with focus on ideation, structure, and dramatic tension in narrative features. Sources include screenplays and screenings.

4 units, Aut (Tobin, A)

#### **FILMPROD 114. Introduction to Film and Video Production**

Hands-on. Techniques of film and video making including conceptualization, visualization, story structure, cinematography, sound recording, and editing.

5 units, Spr (Symons, J)

### GRADUATE COURSES IN FILM PRACTICE

#### **FILMPROD 301. Screenwriting**

(Same as FILMPROD 101) Priority to Film and Media Studies majors. Craft, form, and approaches to writing for the screen. Prerequisites: ENGLISH 90, 190F, and consent of instructor.

5 units, Spr (Tobin, A)

#### **FILMPROD 305. Script Analysis**

(Same as FILMPROD 105) Analysis of screenplay and film from the writer's perspective, with focus on ideation, structure, and dramatic tension in narrative features. Sources include screenplays and screenings.

4 units, Aut (Tobin, A)

#### **FILMPROD 400. Film/Video Writing and Directing**

Restricted to M.F.A. documentary students. Emphasis is on the development of the research, conceptualization, visualization, and preproduction skills required for nonfiction filmmaking. Prerequisite: consent of instructor.

4 units, Aut (Meltzer, J)

#### **FILMPROD 401. Nonfiction Film Production**

Restricted to M.F.A. documentary students. 16mm production techniques and concepts. Final project is a short black-and-white film with multitrack sound design. Prerequisite: consent of instructor.

4 units, Aut (Krawitz, J)

#### **FILMPROD 402. Digital Video**

Restricted to M.F.A. documentary students. Fundamentals of digital storytelling. Working with small format cameras, interviewing techniques, and nonlinear editing skills. Prerequisite: consent of instructor.

4 units, Win (Krawitz, J)

#### **FILMPROD 403. Advanced Documentary Directing**

Restricted to M.F.A. documentary students. Further examination of structure, emphasizing writing and directing nonfiction film. Prerequisite: consent of instructor.

4 units, Spr (Symons, J)

#### **FILMPROD 404. Advanced Film and Video Production**

Restricted to M.F.A. documentary students. Techniques of visual storytelling and observational shooting. Final quarter of professional training in 16mm motion picture production. Prerequisite: consent of instructor.

4 units, Spr (Meltzer, J)

#### **FILMPROD 405. Producing Practicum**

Restricted to M.F.A. documentary students. Advanced producing principles through the preproduction of the M.F.A. thesis project, including development of a professional film proposal. Practical training in fundraising. Prerequisite: consent of instructor.

4 units, Aut (Symons, J)

**FILMPROD 406A. Documentary M.F.A. Thesis Seminar I**  
Restricted to M.F.A. documentary students. Production of film or video project. Focus is on shooting strategies, ethical challenges, and practical production issues. Prerequisite: consent of instructor.  
*4 units, Win (Meltzer, J)*

**FILMPROD 406B. Documentary M.F.A. Thesis Seminar II**  
Restricted to M.F.A. documentary students. Editing and post-production of film or video project. Emphasis is on aesthetic choices (structure, narration, music), distribution, contracts, and audience. Prerequisite: consent of instructor.  
*4 units, Spr (Krawitz, J)*

## FRENCH GENERAL (FRENGEN)

### UNDERGRADUATE COURSES IN FRENCH GENERAL

**FRENGEN 181. Philosophy and Literature**  
(Same as CLASSGEN 81, COMPLIT 181, ENGLISH 81, ITALGEN 181, GERGEN 181) Required gateway course for Philosophical and Literary Thought; crosslisted in departments sponsoring the Philosophy and Literature track: majors should register in their home department; non-majors may register in any sponsoring department. Introduction to major problems at the intersection of philosophy and literature. Issues may include authorship, selfhood, truth and fiction, the importance of literary form to philosophical works, and the ethical significance of literary works. Texts include philosophical analyses of literature, works of imaginative literature, and works of both philosophical and literary significance. Authors may include Plato, Montaigne, Nietzsche, Borges, Beckett, Barthes, Foucault, Nussbaum, Walton, Nehamas, Pavel, and Pippin. GER:DB-Hum  
*4-5 units, Win (Anderson, L; Landy, J)*

**FRENGEN 192E. Images of Women in French Cinema: 1930-1990**

The myth of the feminine idol in French films in historical and cultural context. The mythology of stars as the imaginary vehicle that helped France to change from traditional society to modern nation after 1945. Filmmakers include Renoir, Truffaut, and Nelly Kaplan. The evolution of the role of women in France over 60 years. Lectures in English; films in French with English subtitles. GER:DB-Hum, EC-Gender  
*3-5 units, Spr (Apostolides, J)*

### GRADUATE COURSES IN FRENCH GENERAL

**FRENGEN 204. Songs of Love and War: Gender, Crusade, Politics**

Medieval love, satirical and Crusade lyrics in the Old Occitan, and Old French traditions. Focus on deictic address, corporeal subjectivity, the female voice, love debates, and the body as a figure of political conflict. Also modern translation and reception of the troubadour tradition. Poets include Ovid, Bernard de Ventadorn, Bertran de Born, La Comtesse de Dia, Thibaut de Champagne, Sordello, Dante, Pound, and Neruda.  
*3-5 units, Win (Galvez, M)*

**FRENGEN 219. The Renaissance Body**

The body as locus for desire, pleasure, disease, mortality, sexuality, and gender; and as canon of beauty and reflection of cosmic harmony. How literature responded to the development of an anatomical gaze in arts and medicine; how it staged the aesthetic, religious, philosophical, and moral issues related to such a promotion or deconstruction of the body. Does literature aim at representing the body, or use it as signifier for intellectual, emotional, and political ideas? Readings from Rabelais, Ronsard, Labé, Montaigne; medical texts and archival documents from <http://renaissancebodyproject.stanford.edu>.  
*3-5 units, not given this year*

**FRENGEN 223. Fiction and Interpretation: Rabelais' Trilogy**  
An introduction to the Renaissance in France and a close study of the work of François Rabelais, through his trilogy Gargantua, Pantagruel, and Le Tiers Livre in the context of a series of political,

religious, and linguistic crises that mark the first decades of the sixteenth century. Rabelais' fiction puts into question former modes of reading (Scholasticism, allegorism) and any accepted interpretative authorities (religious and classical intertexts; authorial presence, common wisdom; superstitions).

*3-5 units, Spr (Alduy, C)*

**FRENGEN 228E. Getting Through Proust**

Seminar. Selections from *In Search of Lost Time*. Themes: habit, heredity, constitution of the self; language, names, metaphor, and metonymy; aesthetics, music, photography, and painting; truth, lies, belief, and disenchantment; sleep, dreams, memory, time, modernity, and technology; friendship, love, homosexuality, jealousy, and mediated desire. Readings in French or English.

*3-5 units, Aut (Landy, J)*

**FRENGEN 233. The Afterlife of the Middle Ages**

(Same as ITALGEN 233) Literary works that evoke a medieval past in contrast to a historical present, and critical texts that treat aspects of the medieval or medievalism. How does the concept of medievalism emerge and evolve through the ages? The impact of the Reformation and romanticism, the study of Gothic architecture, and the use of the term medieval in modern political discourse. Authors include Hugo, Grimm brothers, Flaubert, Mâle, Pound, de Rougemont, Eco, Bataille, and Holsinger; films by Bresson and Pasolini.

*3-5 units, Aut (Galvez, M)*

**FRENGEN 242. Women Mystics from the Middle Ages to the Present**

(Same as ITALGEN 242) This course explores the predominantly female mystical experience or direct embodied encounter with a spiritual reality that is difficult, perhaps impossible, to reduce to words, or to explain rationally. Through a variety of European texts from the Middle Ages to the present, by women and men, we will explore attempts to convey the experience metaphorically, to interpret it theologically and philosophically, and finally, to transmit it actively to others.

*3-5 units, Win (Wittman, L)*

**FRENGEN 252. Historiography of Theater**

(Same as DRAMA 166H, DRAMA 304) Goal is to design an undergraduate theater history class. Standard theater history textbooks, alternative models of theater history scholarship, and critical literature engaging historiography in general.

*3-5 units, Win (Apostolides, J)*

**FRENGEN 265. The Problem of Evil in Literature, Film, and Philosophy**

(Same as POLISCI 338E) Conceptions of evil and its nature and source, distinctions between natural and moral evil, and what belongs to God versus to the human race have undergone transformations reflected in literature and film. Sources include Rousseau's response to the 1755 Lisbon earthquake; Hannah Arendt's interpretation of Auschwitz; Günther Anders' reading of Hiroshima; and current reflections on looming climatic and nuclear disasters. Readings from Rousseau, Kant, Dostoevsky, Arendt, Anders, Jonas, Camus, Ricoeur, Houellebeck, Girard. Films by Lang, Bergman, Losey, Hitchcock.

*3-5 units, Win (Dupuy, J)*

**FRENGEN 267. French and Italian Literary Theory**

(Same as ITALGEN 267) This course considers major French and Italian authors essential in the creation of contemporary Literary Theory. Many belong to the intellectual movement known as Structuralism, even if they may disagree with some of its fundamental concepts. Introduction of post-structuralist works which permit a different approach to Literature. Among the authors considered, special attention is given to Jacques Lacan, Luce Irigaray, Jacques Derrida, Michel Foucault, Guy Debord and Umberto Eco.

*3-5 units, Win (Apostolides, J)*

**FRENGEN 273. Post-Revolutionary Passions**

Coming to terms with the Enlightenment, the French Revolution and the collapse of the political and spiritual authority that grounded the old regime, post-revolutionary thinkers confronted critically the responsibility of the intellectual and the nature of ideological violence; they reinvented the sacred in an attempt to shape a new self and redraw the boundaries between reason and belief. Classes in English, readings in French (most also available in translation). Works by Constant, Staël, Chateaubriand, Maistre,

Quinet, Ballanche, Musset, Tocqueville, Michelet, Taine.  
3-5 units, Aut (Russo, E)

**FRENGEN 289. French and Italian Women Writers**

(Same as ITALGEN 289) How does women's writing evolve from the very early twentieth-century, when women's liberation movements first began, and World War One brought major social changes, all the way to the big flowering of "feminine writing" in the 1970s and beyond? What is the relationship between women writers, women filmmakers, and feminism? Is it legitimate to consider women writers in a separate category? To what extent does a reevaluation of women writers mean reconsidering modern literary history? Authors/filmmakers include Aleramo, Yourcenar, de Beauvoir, Banti, Duras, Cavani.

3-5 units, Aut (Wittman, L)

**FRENGEN 301E. New Methods and Sources in French and Italian Studies**

(Same as ITALGEN 301E) Based on student interest. Changes in research methods: the use of digitized texts, resources, and databases available through Stanford Libraries' gateways. Emphasis is on strategies for exploration of broad and specialized topics through new and traditional methods. Using a flexible schedule based on enrollment and the level of students' knowledge, may be offered in forms including a shortened version on the basics, independent study, or a syllabus split over two quarters. Unit levels adjusted accordingly.

1-4 units, Spr (Sussman, S)

**FRENGEN 325. Modern Seminar**

(Same as HUMNTIES 325) Modern anxieties about the place of human concerns within a disenchanted natural world, focusing on texts of philosophy, social theory, and imaginative literature. Cultural and psychological consequences of perceived decline in and threats to religious faith. Authors may include Schiller, Schopenhauer, Coleridge, Kierkegaard, Marx, Baudelaire, Darwin, Nietzsche, Weber, Eliot, Woolf, Sartre, and Camus.

3-5 units, Aut (Apostolides, J)

**FRENGEN 328. Literature, Narrative and the Self**

(Same as ITALGEN 328) The role of narrative in the well-lived life. Are narratives necessary? Can they, and should they, be literary? When might non-narrative approaches, whether literary or otherwise, be more relevant? Is unity of self something given, something to be achieved, or something to be overcome? Readings from Plato, Aristotle, Montaigne, Schopenhauer, Nietzsche, Camus, MacIntyre, G. Strawson; Shklovsky, Genette, Ricoeur, Brooks; Boccaccio, Lazarillo de Tormes, Shakespeare, Nerval, Musil, Beckett, Nabokov, Morrison; film.

5 units, Spr (Landy, J)

**FRENGEN 356. Theories of the Novel**

(Same as COMPLIT 322A) The novel as the literary genre most closely identified with the development of cultural modernity by literary historians and theorists. Critical models for defining the novel's poetics and cultural work. Critical readings such as texts by Lukacs, Bakhtin, Auerbach, Barthes, Armstrong, Gallagher, Bourdieu, Macherey, Jameson, Said and Spivak. Tutor texts such as Defoe's Robinson Crusoe, Flaubert's Madame Bovary, and Woolf's To the Lighthouse.

3-5 units, Spr (Cohen, M)

**FRENGEN 361. Theories of Resistance**

A critique of theories of resistance developed by Agamben, Althusser, Butler, Deleuze, Foucault, Latour, Mouffe, Rancière by testing their assumptions and methodologies against concrete practices of resistance drawn from postcolonialism, postsocialism and postapartheid sites and embodied in the works of scholarship, art, and literature produced mainly by natives as analysts of their own condition. How to build theory from the bottom-up based on student's own research material.

3-5 units, Spr (Domanska, E)

**FRENGEN 369. Introduction to Graduate Studies: Criticism as Profession**

(Same as COMPLIT 369, ITALGEN 369, GERLIT 369) Major texts of modern literary criticism in the context of professional scholarship today. Readings of critics such as Lukacs, Auerbach, Frye, Ong, Benjamin, Adorno, Szondi, de Man, Abrams, Bourdieu, Vendler, and Said. Contemporary professional issues including scholarly associations, journals, national and comparative litera-

tures, university structures, and career paths.

5 units, Aut (Berman, R)

**FRENGEN 395. Philosophical Reading Group**

(Same as COMPLIT 359A, ITALGEN 395) Discussion of one contemporary or historical text from the Western philosophical tradition per quarter in a group of faculty and graduate students. For admission of new participants, a conversation with H. U. Gumbrecht is required. May be repeated for credit.

1 unit, not given this year

## FRENCH LANGUAGE (FRENLANG)

### UNDERGRADUATE COURSES IN FRENCH LANGUAGE

**FRENLANG 1. First-Year French, First Quarter**

Proficiency-based. Development of discourse appropriate in French and Francophone contexts.

5 units, Aut (Staff), Win (Shashko, T), Spr (Howard, H)

**FRENLANG 1A. Intensive First-Year French, Part A**

Completes first-year language sequence in two rather than three quarters. Recommended for students with previous knowledge of French who place into 5A on the placement test. 2A fulfills the University foreign language requirement. Prerequisite: French placement test and consent of instructor. Win, Spr

5 units, Aut (Howard, H), Win (Lasnier, M)

**FRENLANG 2. First-Year French, Second Quarter**

Continuation of 1. Prerequisite 1 or equivalent

5 units, Aut (Shashko, T), Win (Staff), Spr (Shashko, T)

**FRENLANG 2A. Intensive First-Year French, Part B**

Continuation of 1A. Fulfills the University foreign language requirement. Prerequisite: 1A, or French placement test and consent of instructor.

5 units, Win (Howard, H), Spr (Dozer-Rabedeau, J)

**FRENLANG 3. First-Year French, Third Quarter**

Continuation of 2. Prerequisite: 2 or equivalent. Fulfills the language requirement.

5 units, Aut (Dozer-Rabedeau, J), Win (Shashko, T), Spr (Staff)

**FRENLANG 5A. Intensive First-Year French, Part A**

Accelerated. Written exercises, compositions, conversational practice, and daily work.

5 units, Sum (Calefas-Strebelle, A)

**FRENLANG 5B. Intensive First-Year French, Part B**

Continuation of 5B.

5 units, Sum (Tamas, J)

**FRENLANG 5C. Intensive First-Year French, Part C**

Continuation of 5B. Fulfills the University language requirement.

5 units, Sum (Conroy, M)

**FRENLANG 10. Beginning French Oral Communication**

For students who have completed 2 or equivalent. Emphasis is on speaking skills, vocabulary, and pronunciation. May be repeated once for credit.

2 units, Aut (Dozer-Rabedeau, J), Win (Dozer-Rabedeau, J), Spr (Dozer-Rabedeau, J)

**FRENLANG 15. Intermediate French Oral Communication**

For students who have completed the first-year language requirement. May be repeated once for credit.

2 units, Aut (Dozer-Rabedeau, J), Win (Dozer-Rabedeau, J), Spr (Dozer-Rabedeau, J)

**FRENLANG 15S. Intermediate Conversation: French in Everyday Life**

Same content as 15. May be repeated once for credit. Prerequisite: one year of college French or equivalent.

3 units, Sum (Lasnier, M)

**FRENLANG 20A. France and Francophonie**

Second-year French conversation based on themes from the regions of France and the Francophone world. Intermediate-level speaking skills and advanced-level functions. Topics include tra-

vel, food, and crosscultural comparisons. Students returning from study abroad programs are encouraged to enroll. May be repeated once for credit. Prerequisite: 22 or equivalent.

2 units, Aut (Staff)

**FRENLANG 20B. French Cinema**

Second-year French conversation based on films. Intermediate-level speaking skills and advanced-level functions. Themes include: French filmmakers, stars, and trends. Required film viewing in and outside class in French. May be repeated once for credit. Prerequisite: 22 or equivalent.

2 units, Win (Staff)

**FRENLANG 20C. Contemporary French Language**

Second-year French conversation. Intermediate-level speaking skills and advanced-level functions for formal and informal situations. Useful for students planning to travel or study abroad. May be repeated once for credit. Prerequisite: 22 or equivalent.

2 units, Spr (Staff)

**FRENLANG 22. Second-Year French, Part A**

Proficiency-based. Advanced-level skills including past, present, and future narration, description, and defending points of view on social and cultural issues. Topics from cultural comparisons with French and Francophone contexts. Prerequisite: 3 or consent of coordinator.

4-5 units, Aut (Staff), Win (Howard, H), Spr (Howard, H)

**FRENLANG 23. Second-Year French, Part B**

Continuation of 22. Prerequisite: FRENLANG 22 or consent of coordinator.

4-5 units, Aut (Howard, H), Win (Dozer-Rabedeau, J), Spr (Dozer-Rabedeau, J)

**FRENLANG 24C. Second-Year French: Literary Texts**

Proficiency oriented. Discussion, writing, reading, and listening comprehension based on literary texts. Prerequisite: 23.

3-4 units, not given this year

**FRENLANG 24R. Second-Year French: International Relations, Political Science, and Economics Emphasis**

Proficiency-based. Discussion, writing, reading, and listening comprehension based on political, economic, and social topics. Prerequisite: 23.

3-4 units, not given next year

**FRENLANG 50. Reading French**

For seniors or graduate students seeking to meet the University reading requirement for advanced degrees. Reading strategies for comprehension of secondary literature for academic research. Fulfills the University foreign language requirement for advanced degrees if student earns a grade of 'B.' Prerequisite: one year or reading proficiency in another Romance language.

4 units, Aut (Gilleland, J)

**FRENLANG 50S. Reading French**

Same content as 50.

2-4 units, Sum (Gilleland, J)

**FRENLANG 60A. Beginning French Conversation**

1 unit, Aut (de Castris, P), Win (de Castris, P), Spr (de Castris, P)

**FRENLANG 60B. Intermediate French Conversation (Staff)**

1 unit, Aut (de Castris, P), Win (de Castris, P), Spr (de Castris, P)

**FRENLANG 60C. Advanced French Conversation**

1 unit, Aut (de Castris, P), Win (de Castris, P), Spr (de Castris, P)

**FRENLANG 60D. French Viticulture**

See <http://www.stanford.edu/class/frenlang60d/>. Prerequisite: 21 or older.

1 unit, Aut (de Castris, P), Win (Staff), Spr (de Castris, P)

**FRENLANG 60E. French Cooking**

1 unit, Aut (de Castris, P), Win (de Castris, P), Spr (de Castris, P)

**FRENLANG 60F. French Cinema**

May be repeated for credit.

1 unit, Win (de Castris, P)

**FRENLANG 60K. Thought for the 21st Century**

1 unit, not given this year

**FRENLANG 60N. French Drama**

1 unit, Aut (Staff)

**FRENLANG 60P. French House Projects**

Prerequisite: consent of instructor.

1 unit, Aut (de Castris, P), Win (de Castris, P), Spr (de Castris, P)

**FRENLANG 60T. Teaching French Conversation**

1 unit, Aut (de Castris, P), Win (de Castris, P), Spr (de Castris, P)

**FRENLANG 120. Advanced French Oral Communication**

Speaking skills and functions including narration, description, supporting opinions, and hypothesizing about current events and issues in France. May be repeated once for credit. Prerequisites: 23 or equivalent, and consent of instructor.

3 units, Aut (Staff), Win (Staff), Spr (Staff)

**FRENLANG 121. Introduction to French Texts**

Readings of major literary figures and themes from medieval times to the present. Prerequisite: 23 or consent of coordinator. Recommended: 124.

3-4 units, not given this year

**FRENLANG 122. Introduction to French Culture and Civilization**

Discussion of French art, geography, history, political change, and social institutions. Prerequisite: 23 or equivalent.

3-4 units, not given this year

**FRENLANG 123. French Creative Writing**

Advanced. Model texts introduce students to genres and styles; review of grammar and vocabulary. Discussion of original writing by students. Prerequisite: 23 or equivalent.

3-4 units, not given this year

**FRENLANG 124. Advanced French Grammar**

Required for students majoring or minoring in French; recommended for students planning to take literature courses. Review of difficulties in French. Grammatical and logical analysis. Prerequisite: 23 or equivalent.

3-4 units, Aut (Howard, H), Win (Howard, H)

**FRENLANG 125. French Phonetics**

For majors and other students who plan to enroll in advanced courses. Study and practice of the French language sound system. Language lab. Prerequisite: 23 or equivalent.

3-4 units, not given this year

**FRENLANG 126. French Stylistics and Textual Analysis**

For majors and minors. Writing intensive. Control of grammar and syntax in research and argumentative papers. Prerequisite 124 or placement.

3-4 units, Spr (Staff)

**FRENLANG 199. Language Specials**

Prerequisite: consent of instructor.

1-5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**GRADUATE COURSES IN FRENCH LANGUAGE**

**FRENLANG 33G. Business French III**

For GSB students only. Enrollment limited to 18. (Staff)

4 units, Spr (Howard, H)

**FRENLANG 205A. Intensive First-Year French**

Accelerated. Written exercises, compositions, conversational practice, and daily work. Stanford graduate students restricted to 9 units may take 205A,B,C courses for a total of 9 units.

3-5 units, Sum (Staff)

**FRENLANG 205C. Intensive First-Year French - Part C**

Accelerated. Written exercises, compositions, conversational practice, and daily work. Stanford graduate students restricted to 9 units may take both courses for a total of 9 units.

3-5 units, Sum (Staff)

**FRENLANG 250S. Reading French**

For graduate students only. Same content as 50.

2-4 units, Sum (Staff)

**FRENLANG 394. Graduate Studies in French Conversation**

Prerequisite: consent of the instructor.

*1-3 units, Aut (Staff), Win (Staff), Spr (Staff)***FRENLANG 395. Graduate Studies in French**

Prerequisite: consent of instructor.

*2-5 units, Aut (Staff), Win (Staff), Spr (Staff)*

# FRENCH LITERATURE (FRENLIT)

## UNDERGRADUATE COURSES IN FRENCH LITERATURE

**FRENLIT 130. Authorship, Book Culture, and National Identity in Medieval and Renaissance France**

Introduction to the Middle Ages and the Renaissance. The birth of a national literature and its evolution. Literature as addressing cultural, philosophical, and artistic issues which question assumptions on love, ethics, art, and the nature of the self. Readings: epics (La Chanson de Roland), medieval romances (Tristan, Chrétien de Troyes' Yvain), post-Petrarchan poetics (Du Bellay, Ronsard, Labé), and prose humanists (Rabelais, Montaigne). Prerequisite: FRENLANG 126 or consent of instructor. GER:DB-Hum, WIM

*4 units, Aut (Galvez, M)***FRENLIT 131. Absolutism, Enlightenment, and Revolution in 17th- and 18th-Century France**

The literature, culture, and politics of France from Louis XIV to Olympe de Gouges. How this period produced the political and philosophical foundations of modernity. Readings include Corneille, Molière, Racine, Lafayette, Voltaire, Diderot, Rousseau, Beaumarchais, and Gouges. Prerequisite: FRENLANG 126 or consent of instructor. GER:DB-Hum, WIM

*4 units, Win (Pichichero, C)***FRENLIT 132. Literature, Revolutions, and Changes in 19th- and 20th-Century France**

Major literary genres, and social and cultural contexts. Focus is on the emergence of new literary forms such as *surréalisme*, *nouveau roman*, and *nouveau théâtre*. Topics of colonization, decolonization, and feminism. Readings include Balzac, Baudelaire, Césaire, Colette, and Ionesco. Prerequisite: FRENLANG 126 or consent of instructor. GER:DB-Hum, WIM

*4 units, Win (Boyi, E)***FRENLIT 133. Literature and Society in Africa and the Caribbean**

(Same as COMPLIT 141) Major African and Caribbean writers. Issues raised in literary works which reflect changing aspects of the societies and cultures of Francophone Africa and the French Caribbean. Topics include colonization and change, quest for identity, tradition and modernity, and new roles and status for women. Readings in fiction and poetry. Authors include Laye Camara, Mariama Ba, and Joseph Zobel. In French. Prerequisite: FRENLANG 126 or consent of instructor. GER:DB-Hum, EC-GlobalCom, WIM

*4 units, Aut (Boyi, E)***FRENLIT 148. Outsiders, Conspirators, and the Masses: 19th-Century French Fiction**

The emergence of new social types in nineteenth-century fiction. Questions: How do groups differentiate themselves? Which groups are heroized and which are villainized? Who belongs and who doesn't? Topics include social climbers, dandies, philosophers, the poor, students, criminals, actresses, crowds, and the bourgeoisie. Authors include Balzac, Stendhal, Sue, Nerval, Vigny, Flaubert, Zola. Taught in French. GER:DB-Hum

*3-5 units, Spr (Conroy, M)***FRENLIT 167. The Essayistic Tradition in 20th-Century France**

The essay, whose tradition is firmly rooted in France, resists conventional taxonomies and tests the plasticity of genre. Not only does the essay borrow from all Aristotelian categories, it also merges disciplines, conflating art and science while constructing its own system of logic and its own codes. With exemplary works

by 20th-century French essayists, issues include generic hybridity, open-endedness, voice, form, rhetorical devices and style, and political engagement. Montaigne, Apollinaire, Proust, Valéry, Beckett, Artaud, Ponge, Yourcenar, Sartre, Camus, Robbe-Grillet, Barthes, and Cixous. GER:DB-Hum

*3-5 units, Spr (Wampole, C)***FRENLIT 189A. Honors Research**

Senior honors students enroll for 5 units in Winter while writing the honors thesis, and may enroll in 189B for 2 units in Spring while revising the thesis. Prerequisite: DLCL 189.

*5 units, Win (Staff)***FRENLIT 189B. Honors Research**

Open to juniors with consent of adviser while drafting honors proposal. Open to senior honors students while revising honors thesis. Prerequisites for seniors: 189A, DLCL 189.

*2 units, Spr (Staff)***FRENLIT 199. Individual Work**

Restricted to French majors with consent of department. Normally limited to 4-unit credit toward the major. May be repeated for credit.

*1-12 units, Aut (Staff), Win (Staff), Spr (Staff)*

## GRADUATE COURSES IN FRENCH LITERATURE

**FRENLIT 202. Inventing the Enlightenment**

How the idea of the Enlightenment emerged in French intellectual circles, and how it evolved over the course of the eighteenth century. Focus in particular on the articulation between the Enlightenment and its two most illustrious precursors: the Scientific Revolution and the grand siècle. Readings include texts by Montesquieu, Voltaire, Diderot, d'Alembert, Rousseau, Hume, and Kant.

*3-5 units, Spr (Edelstein, D)***FRENLIT 222. The Political Unconscious of the Ancien Régime**

The lasting influence in Europe of absolutism. Topics include political theories, the importance of court life, art as a political tool, modifications in human sensibility, literature, and social transformations.

*3-5 units, not given this year***FRENLIT 225. Multicultural Molière**

Molière's life and work as a point of departure for the notion of multiculturalism. Born in a bourgeois family, Molière was in contact with social milieux including the French peasantry for whom he wrote farces, and the court of Louis XIV for whom he provided spectacles at Versailles. Major plays, including *Tartuffe*, *Le bourgeois gentilhomme*, and *Le malade imaginaire* as the expression of the new court culture. Sociohistorical and contemporary literary approaches: Molière as the unifying artistic figure in a multicultural France.

*3-5 units, not given this year***FRENLIT 248. Literature, History, and Representation**

(Same as COMPLIT 250) Literary works as historical narratives; texts which envision ways of reconstructing or representing an ancient or immediate past through collective or individual narratives. Narration and narrator; relation between individual and collective history; historical events and how they have shaped the narratives; master narratives; and alternative histories. Reading include Glissant, Césaire, Dadié, Cixous, Pérec, Le Clézio, Mokkedem, Benjamin, de Certeau, and White.

*3-5 units, not given this year***FRENLIT 250. When Poets Write Prose: 20th-Century French Poetry**

Liberated from traditional forms and rhythms in the 19th century, poetry as an open field for exploration and self-redefinition in the 20th century. The poem as a fixed form, obsolete or artificial, endangers poetry as a privileged gate to truth, presence, ethics, or an authentic relation to the world. How in times of suspicion over the powers and failures of language, prose becomes the only truthful medium to approach a poetic essence beyond poetry. Readings include Mallarmé, René Char, Yves Bonnefoy, Philippe Jaccottet, Jacques Dupin, Jacques Réda, and literary critics.

*3-5 units, Spr (Staff)*

**FRENLIT 252. Theater of the Absurd**

The theater of the absurd as an evolving commentary on modern alienation and attempt to make a humorous yet philosophical peace with it through the concreteness of performance. Authors include Jarry, Marinetti, Pirandello, Salacrou, Cocteau, Camus, and Sartre.

3-4 units, Win (Wittman, L)

**FRENLIT 256. Mind and Body in 20th-Century French Fiction**

How fiction articulates the tensions among the sensuous, the sensual, the embodied, and the aspiration to purity, abstraction, and transcendence. Focus is on questioning dichotomies such as nature/culture, masculine/feminine, sacred/profane, and written word/voice. Authors include Gide, Camus, Butor, Duras, and Tournier.

3-5 units, not given this year

**FRENLIT 278. Special Topics (Francophone Literature): From Exoticism to a Discourse of Auto-Representation**

(Same as AFRICAST 278, COMPLIT 278) Critical analysis of major issues relating to literatures in French language in and outside France. Focus is on exoticism and self-representation, with an emphasis on the evolution of mentalities, new sensitivities and the role of literature in developing individual or collective identity. Readings include Le Clézio, Memmi, Malouf, Lopes, Schwarz-Bart, Delaygue, Glissant, Todorov, Kane and others. Primary sources, secondary sources and film. Taught in French.

3-5 units, Aut (Boyi, E)

**FRENLIT 293A. Topics in French Literature and Philosophy**

Five-week course. May be repeated for credit.

2 units, Aut (Serres, M)

**FRENLIT 293B. Topics in French Literature and Philosophy**

Five-week course. May be repeated for credit.

2 units, Spr (Serres, M)

**FRENLIT 299. Individual Work**

May be repeated for credit.

1-12 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**FRENLIT 399. Individual Work**

For students in French working on special projects or engaged in predissertation research.

1-12 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

## GENETICS (GENE)

### UNDERGRADUATE COURSES IN GENETICS

**GENE 109Q. Genomics: A Technical and Cultural Revolution (S,Sem)** (Same as BIOMEDIN 109Q) Stanford Introductory Seminar. Preference to sophomores. Concepts of genomics, high-throughput methods of data collection, and computational approaches to analysis of data. The social, ethical, and economic implications of genomic science. Students may focus on computational or social aspects of genomics.

3 units, Win (Altman, R)

**GENE 199. Undergraduate Research**

Students undertake investigations sponsored by individual faculty members. Prerequisite: consent of instructor.

1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

### GRADUATE COURSES IN GENETICS

**GENE 202. Human Genetics**

Theoretical and experimental basis for the genetics of human health and disease. Molecular, chromosomal, biochemical, developmental, cancer, and medical genetics, emphasizing the last. Clinical cases. Prerequisites: biochemistry; basic genetics.

4 units, Aut (Ormond, K; Hudgins, L)

**GENE 203. Advanced Genetics**

(Same as BIO 203, DBIO 203) For graduate students in Bioscience programs; may be appropriate for graduate students in other programs. The genetic toolbox. Examples of analytic methods, genetic manipulation, genome analysis, and human genetics. Emphasis is on use of genetic tools in dissecting complex biological pathways,

developmental processes, and regulatory systems. Faculty-led discussion sections with evaluation of papers. Students with minimal experience in genetics should prepare by working out problems in college level textbooks.

4 units, Aut (Stearns, T; Sidow, A; Barsh, G)

**GENE 206. Epigenetics**

(Same as PATH 206) For graduate students; undergraduates by consent of instructor. Mechanisms by which phenotypes not determined by the DNA sequence are stably inherited in successive cell divisions. From the discovery of position-effect variegation in *Drosophila* in the 1920s to present-day studies of covalent modifications of histones and DNA methylation. Topics include: position effect, gene silencing, heterochromatin, centromere identity, genomic imprinting, histone code, variant histones, and the role of epigenetics in cancer. Prerequisite: BIO41 and BIO42, or GENE 203, or consent of instructor.

2 units, Spr (Lipsick, J; Gozani, O), alternate years, not given next year

**GENE 211. Genomics**

Genome evolution, organization, and function; technical, computational, and experimental approaches; hands-on experience with representative computational tools used in genome science; and a beginning working knowledge of PERL.

3 units, Win (Cherry, J; Sherlock, G)

**GENE 212. Introduction to Biomedical Informatics Research Methodology**

(Same as BIOE 212, BIOMEDIN 212, CS 272) Hands-on software building. Student teams conceive, design, specify, implement, evaluate, and report on a software project in the domain of biomedicine. Creating written proposals, peer review, providing status reports, and preparing final reports. Guest lectures from professional biomedical informatics systems builders on issues related to the process of project management. Software engineering basics. Prerequisites: BIOMEDIN 210, 211, 214, 217 or consent of instructor.

3 units, Aut (Altman, R; Cheng, B; Klein, T)

**GENE 214. Representations and Algorithms for Computational Molecular Biology**

(Same as BIOE 214, BIOMEDIN 214, CS 274) Topics: introduction to bioinformatics and computational biology, algorithms for alignment of biological sequences and structures, computing with strings, phylogenetic tree construction, hidden Markov models, Gibbs Sampling, basic structural computations on proteins, protein structure prediction, protein threading techniques, homology modeling, molecular dynamics and energy minimization, statistical analysis of 3D biological data, integration of data sources, knowledge representation and controlled terminologies for molecular biology, microarray analysis, machine learning (clustering and classification), and natural language text processing. Prerequisites: programming skills; consent of instructor for 3 units.

3-4 units, Spr (Staff)

**GENE 215. Frontiers in Biological Research**

(Same as BIOC 215, DBIO 215) Literature discussion in conjunction with the Frontiers in Biological Research seminar series in which investigators present current work. Students and faculty meet beforehand to discuss papers from the speaker's primary research literature. Students meet with the speaker after the seminar to discuss their research and future direction, commonly used techniques to study problems in biology, and comparison between the genetic and biochemical approaches in biological research.

1 unit, Aut (Harbury, P; Calos, M; Villeneuve, A), Win (Harbury, P; Villeneuve, A; Calos, M)

**GENE 218. Computational Analysis of Biological Images**

(Same as PATH 218) Physical and computational tools for acquisition, processing, interpretation, and archiving of biological images. Emphasis is on digital microscopy.

2 units, alternate years, not given this year

**GENE 221. Current Issues in Aging**

(Same as DBIO 221, NENS 221) Current research literature on genetic mechanisms of aging in animals and human beings. Topics include: mitochondria mutations, insulin-like signaling, sirtuins, aging in flies and worms, stem cells, human progeria, and centenarian studies. Prerequisite: GENE 203.

2 units, Spr (Staff)

**GENE 222. Method and Logic in Experimental Genetics**

For graduate students only. How experimental strategies are applied to biological questions irrespective of discipline boundaries. Examples include purifying activities from complex mixtures, localizing molecules in space and time, discovering macromolecular interactions, inferences from sequence similarity, using structure to elucidate function, and applying genomics to biological problems. Weekly discussion of two representative papers selected by faculty and a student presentation of a third paper which illustrate principles of biochemistry and cell and molecular biology, and the historical context of important scientific advances.

3 units, Win (Baker, J; Calos, M)

**GENE 233. The Biology of Small Modulatory RNAs**

(Same as MI 233, PATH 233) Open to graduate and medical students. How recent discoveries of miRNA, RNA interference, and short interfering RNAs reveal potentially widespread gene regulatory mechanisms mediated by small modulatory RNAs during animal and plant development. Required paper proposing novel research.

2 units, Aut (Fire, A; Chen, C), alternate years, not given this year

**GENE 234. Fundamentals of RNA Biology**

(Same as MI 234, PATH 234) For graduate or medical students and (if space allows) to active participants from other segments of the Stanford Community (e.g., TGR students); undergraduates by instructor consent. Fundamental issues of RNA biology, with the goal of setting a foundation for students to explore the expanding world of RNA-based regulation. Each week a topic is covered by a faculty lecture and journal club presentations by students.

2 units, Aut (Chen, C; Fire, A; Sarnow, P)

**GENE 235. C. Elegans Genetics**

Genetic approaches to *C. elegans*, practice in designing experiments and demonstrations of its growth and anatomy. Probable topics include: growth and genetics, genome map and sequence, mutant screens that start with a desired phenotype, reverse genetics and RNAi screens, genetic duplications, uses of null phenotype non-null alleles, genetic interactions and pathway analysis, and embryogenesis and cell lineage. Focus of action, mosaic analysis, and interface with embryological and evolutionary approaches.

2 units, Win (Staff), alternate years, not given next year

**GENE 238. Current Concepts and Dilemmas in Genetic Testing**

(Same as INDE 238) For M.D., biomedical graduate, and genetic counseling students. Issues arising from the translational process from research to commercialization. Diagnostic inventions and applications, community implications, newborn screening, cancer genetics, and pharmacogenomics. Guest experts.

2 units, Spr (Tobin, S; Schrijver, I; Cowan, T; Magnus, D)

**GENE 243. Scientific Evidence and Expert Testimony: Patent Litigation**

Open to clinical MD and graduate students. How to explain science to judge and jury; how litigators determine which legal issues to argue. Patent and expert testimony law. Student teams choose patents for final simulation projects, prepare claim charts, devise a design-around, and present oral arguments. Prerequisite: Graduate students must have completed all coursework in their departments for the PhD degree.

3 units, Aut (Morris, R)

**GENE 244. Introduction to Statistical Genetics**

Statistical methods for analyzing human genetics studies of Mendelian disorders and common complex traits. Probable topics include: principles of population genetics; epidemiologic designs; familial aggregation; segregation analysis; linkage analysis; linkage-disequilibrium-based association mapping approaches; and genome-wide analysis based on high-throughput genotyping platforms. Prerequisite: STATS 116 or equivalent or consent of instructor.

3 units, alternate years, not given this year

**GENE 245. Computational Algorithms for Statistical Genetics**

(Same as STATS 345) Computational algorithms for human genetics research. Topics include: permutation, bootstrap, expectation maximization, hidden Markov model, and Markov chain Monte Carlo. Rationales and techniques illustrated with existing implementations commonly used in population genetics research, dis-

ease association studies, and genomics analysis. Prerequisite: GENE 244 or consent of instructor.

2-3 units, alternate years, not given this year

**GENE 260. Supervised Study**

Genetics graduate student lab research from first quarter to filing of candidacy. Prerequisite: consent of instructor.

1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**GENE 271. Human Molecular Genetics**

For genetic counseling students, graduate students in genetics, medical students, residents, and postdoctoral fellows interested in the practice of medical genetics. Gene structure and function; the impact of mutation and polymorphism as they relate to developmental pathways and health and human disease; population based genetics; approaches to the study of complex genetic conditions, and gene therapy, proteomics, stem cell biology, and pharmacogenetics. Undergraduates require consent of instructor and a basic genetics course.

4 units, Aut (Ormond, K; Francke, U)

**GENE 272. Introduction to Medical Genetics**

For genetic counseling students, graduate students in human genetics, medical students, residents, and fellows; undergraduates with consent of instructor. Principles of medical genetics including taking a family history, modes of inheritance, and mathematical principles of medical genetics (Bayes theorem, population genetics). An additional paper is required for 3 units.

2-3 units, Aut (Hudgins, L; Ormond, K)

**GENE 273. Introduction to Clinical Genetics Testing**

For genetic counseling students, graduate students in genetics, medical students, residents, and postdoctoral fellows; undergraduates with consent of instructor. Principles of cytogenetic, molecular, and biochemical laboratory analysis. How to select the appropriate laboratory for testing and laboratory quality assurance, including the CLIA process. An additional paper is required for 3 units.

2-3 units, Aut (Ormond, K; Cowan, T; Cherry, J; Schrijver, I)

**GENE 274A. A Case Based Approach to Clinical Genetics**

For genetic counseling students, graduate students in genetics, medical students, residents, and post-doctoral fellows. Case-based scenarios and guest expert lectures. Skills in case preparation, management, and presentation.

2 units, Win (Hudgins, L; Ormond, K)

**GENE 274B. A Case Based Approach to Clinical Genetics**

For genetic counseling students, graduate students in genetics, medical students, residents, and post-doctoral fellows. Case-based scenarios and guest expert lectures. Skills in case preparation, management, and presentation.

2 units, Spr (Hudgins, L; Ormond, K)

**GENE 275. Role Play and Genetic Counseling Observations**

Observation includes genetic counseling sessions in prenatal, pediatric, and cancer settings, and medical genetics procedures and testing settings.

2 units, Aut (Ormond, K)

**GENE 276. Genetic Counseling Clinical Rotations**

For genetic counseling students only. Supervised clinical experiences. May be repeated for credit. Prerequisite: GENE 275.

4-7 units, Aut (Staff), Win (Ormond, K), Spr (Ormond, K), Sum (Ormond, K)

**GENE 278. Prenatal Genetic Counseling**

Internet-based course for genetic counseling students, graduate students in genetics, medical students, residents, and postdoctoral fellows; genetic counseling students should take this course in conjunction with their initial prenatal genetics rotation. Topics include prenatal genetic screening and diagnosis in the first and second trimesters, ultrasound, teratology, and genetic carrier screening.

1 unit, Aut (Ormond, K), Win (Ormond, K), Spr (Ormond, K), Sum (Ormond, K)

**GENE 279. Pediatric and Adult Genetic Counseling**

Internet-based course for genetic counseling students, graduate students in genetics, medical students, residents, and postdoctoral fellows; genetic counseling students should take this course in conjunction with their initial general genetics rotation. Topics include: common genetic conditions; assessment of child develop-

ment and medical history in the context of a genetic workup; dysmorphology; development of a differential diagnosis; and resources for case management and family support.

1 unit, Aut (Ormond, K), Win (Ormond, K), Spr (Ormond, K), Sum (Ormond, K)

#### **GENE 280. Metabolic Genetic Counseling**

Internet-based course for genetic counseling students, graduate students in genetics, medical students, residents, and postdoctoral fellows; genetic counseling students should take this course in conjunction with their metabolic genetics rotation. Topics include: overview of metabolic diseases; common pathways; diagnosis, management, and treatment of metabolic disorders; and newborn screening.

1 unit, Aut (Ormond, K), Win (Ormond, K), Spr (Ormond, K), Sum (Ormond, K)

#### **GENE 281. Cancer Genetic Counseling**

Internet-based course for genetic counseling students, graduate students in genetics, medical students, residents, and postdoctoral fellows; genetic counseling students should take this course in conjunction with their initial cancer genetics rotation. Topics include: cancer cytogenetics and genetic principles; diagnosis and management of common cancer genetic syndromes; predictive testing; psychology of cancer genetic counseling; and topics recommended by ASCO guidelines.

1 unit, Aut (Ormond, K), Win (Ormond, K), Spr (Ormond, K), Sum (Ormond, K)

#### **GENE 282. Genetic Counseling Research Seminar**

For genetic counseling students only. Facilitated discussions on identifying a topic and mentor for genetic counseling departmental research projects. Corequisite: GENE 299.

2 units, Win (Staff)

#### **GENE 282. Genetic Counseling Research Seminar**

For genetic counseling students only. Facilitated discussions on identifying a topic and mentor for genetic counseling departmental research projects. Corequisite: GENE 299.

2 units, Win (Ormond, K)

#### **GENE 283. Genetic Counseling Research**

Investigations sponsored by individual faculty members. Students complete an approved research project. May be repeated for credit. Prerequisite: GENE 282.

1-8 units, Aut (Staff), Win (Ormond, K), Spr (Ormond, K), Sum (Staff)

#### **GENE 284. Medical Genetics Seminar**

Presentation of research and cases. Students enrolling for 2 units also attend and report on external seminars. May be repeated for credit.

1-2 units, Aut (Ormond, K), Win (Ormond, K), Spr (Ormond, K)

#### **GENE 285A. Genetic Counseling Seminar**

Year-long seminar primarily for genetic counseling students. Autumn: basics of medical communication; crosscultural and disability sensitive communication about genetics, and principles of providing genetic counseling. Winter: the impact of chronic illness and genetic disease in a developmental manner. Spring: applying therapeutic counseling approaches to the practice of genetic counseling. Undergraduates may enroll in Autumn Quarter with consent of instructor.

2-3 units, Aut (Ormond, K)

#### **GENE 285B. Genetics Counseling Seminar**

Year-long seminar primarily for genetic counseling students. Autumn: basics of medical communication; crosscultural and disability sensitive communication about genetics, and principles of providing genetic counseling. Winter: the impact of chronic illness and genetic disease in a developmental manner. Spring: applying therapeutic counseling approaches to the practice of genetic counseling. Prerequisite: GENE 285A.

2-3 units, Win (Ormond, K)

#### **GENE 285C. Genetic Counseling Seminar**

Year-long seminar primarily for genetic counseling students. Autumn: basics of medical communication; crosscultural and disability sensitive communication about genetics, and principles of providing genetic counseling. Winter: the impact of chronic illness and genetic disease in a developmental manner. Spring: applying therapeutic counseling approaches to the practice of genetic coun-

seling. Prerequisite: 285 A/B.

2-3 units, Spr (Ormond, K)

#### **GENE 286A. Advanced Genetic Counseling Seminar**

For genetic counseling students only. Psychosocial issues associated with genetic counseling cases through cases that students have seen throughout their training. Professional development topics including: the expanding roles of genetic counselors; billing, reimbursement, and licensing; the role of genetic counseling in the changing healthcare system; the incorporation of genetics into all areas of medicine and public health; and implications of direct-to-consumer genetic testing. Prerequisites: GENE 285 A,B,C and 276.

2 units, Aut (Ormond, K)

#### **GENE 286B. Advanced Genetic Counseling Seminar**

Continuation of GENE 286A. For genetic counseling students only. Psychosocial issues associated with genetic counseling cases through cases that students have seen throughout their training. Professional development topics including: the expanding roles of genetic counselors; billing, reimbursement, and licensing; the role of genetic counseling in the changing healthcare system; the incorporation of genetics into all areas of medicine and public health; and implications of direct-to-consumer genetic testing. Prerequisites: GENE 285 A,B,C and 276.

2 units, Win (Staff)

#### **GENE 286C. Advanced Genetic Counseling Seminar**

Continuation of 286A/B. For genetic counseling students only. Psychosocial issues associated with genetic counseling cases through cases that students have seen throughout their training. Professional development topics including: the expanding roles of genetic counselors; billing, reimbursement, and licensing; the role of genetic counseling in the changing healthcare system; the incorporation of genetics into all areas of medicine and public health; and implications of direct-to-consumer genetic testing. Prerequisites: GENE 285 A,B,C and 276.

2 units, Spr (Ormond, K)

#### **GENE 299. Directed Reading in Genetics**

Prerequisite: consent of instructor.

1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

#### **GENE 399. Graduate Research**

Investigations sponsored by individual faculty members. Prerequisite: consent of instructor.

1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

#### **GENE 801. TGR Project**

0 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

#### **GENE 802. TGR Dissertation**

0 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

## GEOLOGICAL AND ENVIRONMENTAL SCIENCES (GES)

### UNDERGRADUATE COURSES IN GEOLOGICAL AND ENVIRONMENTAL SCIENCES

#### **GES 1A. Introduction to Geology: The Physical Science of the Earth**

For non-majors or prospective majors in the Earth Sciences. Lectures, hands-on laboratories, and three one-day weekend field trips. Focus is on the physical and chemical processes of heat and mass transfer within the earth and its fluid envelopes, including deep-earth, crustal, surface, and atmospheric processes. Topics include the dynamics of and interactions between the inner earth, plate tectonics, surface processes, and atmospheric processes such as climate change and global warming. Only one of GES 1A, 1B, or 1C may be taken for credit. Prerequisites: Math 19 or equivalent.

5 units, Aut (Hilley, G)

#### **GES 1B. Introductory to Geology: California Desert Field Geology**

California's Death Valley and Owens Valley are used as natural laboratories for studying active geologic processes and a billion

years of earth history: ancient ocean sediments, mountain building, earthquake faulting, glacial landscapes, volcanic eruptions, hot springs and ore deposits, prehistoric climate changes, and historic human impacts. The course culminates in a 6-day field trip to these areas during Spring Break. Class lectures provide the basics of plate tectonics and physical geology. Laboratory exercises involve rock identification and interpreting topographic and geologic maps and remote sensing imagery. Camping and moderate hiking required. Limited enrollment. Only one of GES 1A, 1B, or 1C may be taken for credit. Recommended: high school chemistry. GER: DB-NatSci

4 units, Win (Mahood, G)

#### GES 1C. Introduction to Geology: Dynamic Earth

For non-majors or prospective majors in the Earth Sciences. Activity-based; field trips. Focus is on reading the dynamic geological landscape, with an emphasis on California geology. Plate tectonics, earthquakes and volcanoes, earth materials, geologic time, stream processes, erosion, climate change, and natural resources. Only one of GES 1A, 1B, or 1C may be taken for credit. GER: DB-NatSci

4 units, Spr (Egger, A)

#### GES 4. Evolution and Extinction: Introduction to Historical Geology

Focus is on the end-Cretaceous mass extinction. Principles of stratigraphy, correlation, the geological timescale, the history of biodiversity, and the interpretation of fossils. The use of data from sedimentary geology, geochemistry, and paleontology to test theories to explain the mass extinction event. Two half-day field trips. GER: DB-NatSci

4 units, Win (Payne, J)

#### GES 7A. An Introduction to Wilderness Skills

Living, traveling, and working in the wilderness for those planning fieldwork in the backcountry. Local geology, environmental ethics, trip planning, first aid, and leadership techniques. Four mandatory weekend outings focus on backcountry travel, minimum impact camping, equipment use and maintenance, rock climbing, and navigation. 7A emphasizes wilderness travel and climbing. 7B emphasizes winter camping skills and backcountry skiing. Food, group, and major personal gear provided. Guest speakers. Fee. See <http://www.stanford.edu/class/ges7>, or email [oepteachers@lists.stanford.edu](mailto:oepteachers@lists.stanford.edu).

1 unit, Aut (Bird, D)

#### GES 7B. An Introduction to Wilderness Skills

Living, traveling, and working in the wilderness for those planning fieldwork in the backcountry. Local geology, environmental ethics, trip planning, first aid, and leadership techniques. Four mandatory weekend outings focus on backcountry travel, minimum impact camping, equipment use and maintenance, rock climbing, and navigation. 7A emphasizes wilderness travel and climbing. 7B emphasizes winter camping skills and backcountry skiing. Food, group, and major personal gear provided. Guest speakers. Fee. See <http://www.stanford.edu/class/ges7>, or email [oepteachers@lists.stanford.edu](mailto:oepteachers@lists.stanford.edu).

1 unit, Win (Bird, D)

#### GES 7C. Advanced Wilderness Skills

For students with prior backcountry experience. Backcountry skiing, mountaineering, climbing, first aid, and trip planning. Focus is on outdoor leadership experience and trip management techniques. Food, group, and major personal gear provided. Four mandatory weekend trips. Fee. See <http://www.stanford.edu/class/ges7/> for information or contact [oepteachers@lists.stanford.edu](mailto:oepteachers@lists.stanford.edu). Prerequisite: application.

1 unit, Spr (Bird, D)

#### GES 8. Oceanography: An Introduction to the Marine Environment

For non-majors and earth science and environmental majors. Topics: topography and geology of the sea floor; evolution of ocean basins; circulation of ocean and atmosphere; nature of sea water, waves, and tides; and the history of the major ocean basins. The interface between continents and ocean basins, emphasizing estuaries, beaches, and continental shelves with California margin examples. Relationships among the distribution of inorganic constituents, ocean circulation, biologic productivity, and marine environments from deep sea to the coast. One-day field trip to measure

and analyze waves and currents. GER: DB-NatSci

3 units, Sum (Ingle, J)

#### GES 39N. Forensic Geoscience: Stanford CSI

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Geological principles, materials, and techniques indispensable to modern criminal investigations. Basic earth materials, their origin and variability, and how they can be used as evidence in criminal cases and investigations such as artifact provenance and environmental pollution. Sources include case-based, simulated forensic exercises and the local environments of the Stanford campus and greater Bay Area. Local field trips; research presentation and paper. GER: DB-NatSci

3 units, Spr (Maher, K)

#### GES 40N. Diamonds

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Topics include the history of diamonds as gemstones, prospecting and mining, and their often tragic politics. How diamond samples provide clues for geologists to understand the Earth's deep interior and the origins of the solar system. Diamond's unique materials properties and efforts in synthesizing diamonds. GER: DB-NatSci

3 units, Spr (Mao, W)

#### GES 43Q. Environmental Problems

(S,Sem) Stanford Introductory Seminar. Preference to sophomores. Components of multidisciplinary environmental problems and ethical questions associated with decision making in the regulatory arena. Students lead discussions on environmental issues such as groundwater contamination from point and nonpoint sources, cumulative watershed effects related to timber and mining practices, acid rain, and subsurface disposal of nuclear waste. GER: DB-NatSci

3 units, Win (Loague, K)

#### GES 55Q. The California Gold Rush: Geologic Background and Environmental Impact

(S,Sem) Stanford Introductory Seminar. Preference to sophomores. Topics include: geologic processes that led to the concentration of gold in the river gravels and rocks of the Mother Lode region of California; and environmental impact of the Gold Rush due to population increase, mining operations, and high concentrations of arsenic and mercury in sediments from hard rock mining and milling operations. Recommended: introductory geology. GER: DB-NatSci

3 units, Win (Bird, D)

#### GES 90. Introduction to Geochemistry

The chemistry of the solid earth and its atmosphere and oceans, emphasizing the processes that control the distribution of the elements in the earth over geological time and at present, and on the conceptual and analytical tools needed to explore these questions. The basics of geochemical thermodynamics and isotope geochemistry. The formation of the elements, crust, atmosphere and oceans, global geochemical cycles, and the interaction of geochemistry, biological evolution, and climate. Recommended: introductory chemistry. GER: DB-NatSci

3-4 units, Win (Stebbins, J)

#### GES 101. Environmental and Geological Field Studies in the Rocky Mountains

(Same as EESS 101) Three-week, field-based program in the Greater Yellowstone/Teton and Wind River Mountains of Wyoming. Field-based exercises covering topics including: basics of structural geology and petrology; glacial geology; western cordillera geology; paleoclimatology; chemical weathering; aqueous geochemistry; and environmental issues such as acid mine drainage and changing land-use patterns.

3 units, Aut (Chamberlain, P; Graham, S)

#### GES 102. Earth Materials

The minerals, rocks, soils, and liquids that comprise the earth. How to identify, classify, and interpret rock-forming minerals and igneous, metamorphic, and sedimentary rock types. Emphasis is on information provided by common minerals and rocks about the earth's major processes including magmatism, metamorphism, weathering, erosion, and deposition; the relationship of these processes to plate tectonics and earth cycles. Prerequisite: introductory geology course. Recommended: introductory chemistry. GER: DB-NatSci

5 units, Aut (Brown, G; Mahood, G)

**GES 103. Rocks in Thin Section**

Use of petrographic microscope to identify minerals and common mineral associations in igneous, metamorphic, and sedimentary rocks. Crystallization histories, mineral growth and reaction relations, deformation textures in metamorphic rocks, and provenance of siliciclastic rocks. Prerequisite: 102.

3 units, Win (Miller, E)

**GES 105. Introduction to Field Methods**

Two-week, field-based course in the White Mountains of eastern California. Introduction to the techniques for geologic mapping and geologic investigation in the field: systematic observations and data collection for lithologic columns and structural cross-sections. Interpretation of field relationships and data to determine the stratigraphic and deformational history of the region. Prerequisite: GES 1. Recommended: GES 102.

3 units, Aut (Miller, E; Grove, M)

**GES 107. Journey to the Center of the Earth**

(Same as GES 207, GEOPHYS 107, GEOPHYS 207) The interconnected set of dynamic systems that make up the Earth. Focus is on fundamental geophysical observations of the Earth and the laboratory experiments to understand and interpret them. What earthquakes, volcanoes, gravity, magnetic fields, and rocks reveal about the Earth's formation and evolution.

3 units, Win (Lawrence, J; Mao, W)

**GES 110. Structural Geology and Tectonics**

Theory, principles, and practical techniques to measure, describe, analyze, and interpret deformation-related structures on Earth. Collection of fault and fold data in the field followed by lab and computer analysis; interpretation of geologic maps and methods of cross-section construction; structural analysis of fault zone and metamorphic rocks; measuring deformation; regional structural styles and associated landforms related to plate tectonic convergence, rifting, and strike-slip faulting; the evolution of mountain belts and formation of sedimentary basins. Prerequisite: GES 1, calculus. Recommended: 102. GER: DB-NatSci

5 units, Spr (Miller, E)

**GES 111A. Fundamentals of Structural Geology**

(Same as CEE 195A) Techniques for structural mapping; using differential geometry to characterize structures; dimensional analysis and scaling relations; kinematics of deformation and flow; measurement and analysis of stress. Sources include field and laboratory data integrated with conceptual and mechanical models. Models of tectonic processes are constructed and solutions visualized using MATLAB. Prerequisites: GES 1, MATH 51, 52. GER: DB-NatSci

3 units, Aut (Pollard, D)

**GES 111B. Fundamentals of Structural Geology**

(Same as CEE 195B) Continuation of GES 111A/CEE 195A. Conservation of mass and momentum in a deformable continuum; linear elastic deformation and elastic properties of rock; brittle deformation including fracture and faulting; linear viscous flow including folding and magma dynamics; model development and methodology. Sources include field and laboratory data integrated with conceptual and mechanical models. Models of tectonic processes are constructed and solutions visualized using MATLAB. Prerequisite: GES 111A/CEE 195B.

3 units, Win (Pollard, D)

**GES 112. Mapping the Geological Environment**

Geological mapping tools and techniques. Field training with GPS and laser ranging tools. Data sets from modern surveying and mapping campaigns employing lab and field-based laser scanning, field-based total stations, airborne photography and laser swath mapping (ALS), the satellite Global Positioning System (GPS), and 3D seismic reflection surveys. These data analyzed using elementary differential geometry. MATLAB introduced as the computational and graphics engine. Prerequisites: GES 1, MATH 51, 52. GER: DB-NatSci

3 units, Win (Staff), alternate years, not given next year

**GES 115. Engineering Geology Practice**

(Same as CEE 196) The application of geology and global change to the planning, design, and operation of engineering projects. Case histories taught in a seminar setting and field trips emphasize the impact of geology and global change on both individual engineering works and the built environment by considering Quaternary history and tectonics, anthropogenic sea level rise, active

geologic processes, engineering properties of geologic deposits, site exploration, and professional ethics. Prerequisite: GES 1 or consent of instructor. GER: DB-NatSci

3 units, Spr (Holzer, T)

**GES 120. Planetary and Early Biological Evolution Seminar**

(Same as GES 220) Interdisciplinary. For upper division science undergraduates and graduate students. Synthesis of biology, geology, physics, and chemistry. Recent approaches for identifying traces of past life on Earth. How to look for life on other planets such as Mars, Europa, and Titan. May be repeated for credit.

2-3 units, not given this year

**GES 121. What Makes a Habitable Planet?**

(Same as GES 221) Physical processes affecting habitability such as large impacts and the atmospheric greenhouse effect, comets, geochemistry, the rise of oxygen, climate controls, and impact cratering. Detecting and interpreting the spectra of extrasolar terrestrial planets. Student-led discussions of readings from the scientific literature. Team taught by planetary scientists from NASA Ames Research Center.

3 units, Aut (Staff), alternate years, not given next year

**GES 122. Planetary Systems: Dynamics and Origins**

(Students with a strong background in mathematics and the physical sciences should register for 222.) Motions of planets and smaller bodies, energy transport in planetary systems, composition, structure and dynamics of planetary atmospheres, cratering on planetary surfaces, properties of meteorites, asteroids and comets, extrasolar planets, and planetary formation. Prerequisite: some background in the physical sciences, especially astronomy, geophysics, or physics.

3-4 units, Aut (Marley, M; Lissauer, J)

**GES 123. Paleobiology**

Introduction to the fossil record with emphasis on marine invertebrates. Major debates in paleontological research. The history of animal life in the oceans. Topics include the nature of the fossil record, evolutionary radiations, mass extinctions, and the relationship between biological evolution and environmental change. Fossil taxa through time. Exercises in phylogenetics, paleoecology, biostratigraphy, and statistical methods. GER: DB-NatSci

4 units, alternate years, not given this year

**GES 130. Soil Physics and Hydrology**

The occurrence, distribution, circulation, and reaction of water at the surface and within the near surface. Topics: precipitation, evapotranspiration, infiltration and vadose zone, groundwater, surface water and streamflow generation, and water balance estimates. Current and classic theory in soil physics and hydrology. Urban, rangeland, and forested environments. GER: DB-NatSci

3 units, Aut (Loague, K)

**GES 131. Hydrologically-Driven Landscape Evolution**

Materials of the Earth and hydrologically driven landscape processes. Topics: hillslope hydrology, weathering of rocks and soils, erosion, flow failures, mass wasting, and conceptual models of landscape evolution. Current and classic theory in geomorphology. GER: DB-NatSci

3 units, Win (Loague, K)

**GES 150. Senior Seminar: Issues in Earth Sciences**

Focus is on written and oral communication in a topical context. Topics from current frontiers in earth science research and issues of concern to the public. Readings, oral presentations, written work, and peer review.

3 units, Aut (Bird, D; Egger, A)

**GES 151. Sedimentary Geology and Petrography: Depositional Systems**

Topics: weathering, erosion and transportation, deposition, origins of sedimentary structures and textures, sediment composition, diagenesis, sedimentary facies, tectonics and sedimentation, and the characteristics of the major siliciclastic and carbonate depositional environments. Lab: methods of analysis of sediments in hand specimen and thin section. Field trips. Prerequisites: 1, 102, 103. GER: DB-NatSci

4 units, Win (Graham, S; Lowe, D)

**GES 163. Introduction to Isotope Geochemistry**

(Same as GES 263) Stable, cosmogenic, and radiogenic isotopes; processes that govern isotopic variations. Application of isotopes

to geologic, biologic, and hydrologic questions. Major isotopic systems and their applications. Simple modeling techniques used in isotope geochemistry.

3 units, Aut (Maher, K)

### GES 170. Environmental Geochemistry

Solid, aqueous, and gaseous phases comprising the environment, their natural compositional variations, and chemical interactions. Contrast between natural sources of hazardous elements and compounds and types and sources of anthropogenic contaminants and pollutants. Chemical and physical processes of weathering and soil formation. Chemical factors that affect the stability of solids and aqueous species under earth surface conditions. The release, mobility, and fate of contaminants in natural waters and the roles that water and dissolved substances play in the physical behavior of rocks and soils. The impact of contaminants and design of remediation strategies. Case studies. Prerequisite: 90 or consent of instructor. GER: DB-NatSci

4 units, Win (Brown, G)

### GES 171. Geochemical Thermodynamics

Introduction to the application of chemical principles and concepts to geologic systems. The chemical behavior of fluids, minerals, and gases using simple equilibrium approaches to modeling the geochemical consequences of diagenetic, hydrothermal, metamorphic, and igneous processes. Topics: reversible thermodynamics, solution chemistry, mineral-solution equilibria, reaction kinetics, and the distribution and transport of elements by geologic processes. Prerequisite: GES 102. GER: DB-NatSci

3 units, Aut (Bird, D)

### GES 172. Nontraditional Stable Isotope Geochemistry

(Same as GES 272) Elements other than C, N, O, S, and H that exhibit mass-dependent and non mass-dependent isotopic fractionation; examples include Mg, Ca, Si, Fe, Cr, Mo, Cu, Zn, and Hg. These systems represent a new frontier in isotope geochemistry and Earth Sciences as new tools for understanding geochemical, environmental and biological cycles. The theoretical calculations that form the basis for predicting fractionation, as well as the current state and applications of non-traditional isotope systems.

3 units, Win (Staff), alternate years, not given next year

### GES 173. Isotope Geochemistry Seminar

(Same as GES 273) Current topics including new analytical techniques, advances in isotopic measurements, and new isotopic approaches and systems.

1-3 units, Spr (Maher, K)

### GES 180. Igneous Processes

For juniors, seniors and beginning graduate students in Earth Sciences. Structure and physical properties of magmas; use of phase equilibria and mineral barometers and thermometers to determine conditions of magmatic processes; melting and magmatic lineages as a function of tectonic setting; processes that control magma composition including fractional crystallization, partial melting, and assimilation; petrogenetic use of trace elements and isotopes. Labs emphasize identification of volcanic and plutonic rocks in thin section and interpretation of rock textures. May be taken for 3 units without lab. Prerequisite 102, 103, or consent of instructor.

4 units, Spr (Stebbins, J)

### GES 183. California Desert Geology

Field seminar. For upper division undergraduates and graduate students in the earth sciences and archaeology. Six-day field trip over Spring Break to Mojave Desert, Death Valley, and Owens Valley. Basin-and-range faulting, alluvial fans, playas, sand dunes, metamorphic rocks, granites of the Sierra Nevada, obsidian lava flows and the deposits of major explosive eruptions, hot springs and ore deposits, and desert landscapes. Camping and moderate hiking. May be repeated for credit.

1 unit, Win (Staff)

### GES 185. Volcanology

For juniors, seniors, and beginning graduate students in Earth Sciences and Archaeology. How volcanic landforms and deposits relate to the composition and physical properties of magmas and the modes of emplacement. Labs emphasize recognizing types of lavas and products of explosive eruptions. Volcanic hazards and the effects of eruptions on climate and the atmosphere; volcanic-hosted geothermal systems and mineral resources. Required four-

day field trip over Memorial Day weekend to study silicic and mafic volcanism associated with the western margin of the Basin and Range province. Prerequisite: 1, 102 or equivalent. GER: DB-NatSci

3-4 units, Spr (Staff), alternate years, not given next year

### GES 190. Field Research

Two-three week field research projects. Written report required. May be repeated three times.

2-4 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

### GES 191. GES Field Trips

Four- to seven-day field trips to locations of geologic and environmental interest. Includes trips offered during Thanksgiving and Spring breaks. May be repeated for credit. See <http://pangea.stanford.edu/GES/undergraduates/courses/>.

1 unit, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

### GES 192. Undergraduate Research in Geological and Environmental Sciences

Field-, lab-, or literature-based. Faculty supervision. Written reports. May be repeated for credit.

1-10 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

### GES 197. Senior Thesis

For seniors who wish to write a thesis based on research in 192 or as a summer research fellow. May not be repeated for credit; may not be taken if enrolled in 199.

3-5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

### GES 198. Special Problems in Geological and Environmental Sciences

Reading and instruction under faculty supervision. Written reports. May be repeated for credit.

1-10 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

### GES 199. Honors Program

Research on a topic of special interest. See "Undergraduate Honors Program" above. May be repeated for credit.

1-10 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

## GRADUATE COURSES IN GEOLOGICAL AND ENVIRONMENTAL SCIENCES

### GES 207. Journey to the Center of the Earth

(Same as GES 107, GEOPHYS 107, GEOPHYS 207) The interconnected set of dynamic systems that make up the Earth. Focus is on fundamental geophysical observations of the Earth and the laboratory experiments to understand and interpret them. What earthquakes, volcanoes, gravity, magnetic fields, and rocks reveal about the Earth's formation and evolution.

3 units, Win (Lawrence, J; Mao, W)

### GES 209. Microstructures

Microstructures in metamorphic rocks reveal temperature, pressure, and rates of deformation in the crust and variations in its thermo-mechanical behavior. Topics include the rheology of rocks and minerals, strain partitioning, shear zones and brittle-ductile transition in the crust, mechanisms of foliation and lineation development, preferred crystallographic fabrics, and geochronologic methods useful for dating deformation. Labs involve microstructure analysis of suites of rocks from classic localities. 5 units for extra project.

3-5 units, not given this year

### GES 210. Geologic Evolution of the Western U.S. Cordillera

The geologic and tectonic evolution of the U.S. Cordillera based on its rock record through time. This region provides good examples of large-scale structures and magmatic activity generated during crustal shortening, extension, and strike-slip faulting and affords opportunity to study crustal-scale processes involved in mountain building in context of plate tectonic motions.

2-3 units, Aut (Staff), alternate years, not given this year

### GES 211. Topics in Regional Geology and Tectonics

May be repeated for credit.

2-3 units, Aut (Miller, E)

### GES 212. Topics in Tectonic Geomorphology

For upper-division undergraduates and graduate students. Topics vary and may include coupling among erosional, tectonic, and chemical weathering processes at the scale of orogens; historical review of tectonic geomorphology; hillslope and fluvial process

response to active uplift; measures of landscape form and their relationship to tectonic uplift and bedrock lithology. May be repeated for credit.

2 units, Aut (Hilley, G)

### GES 213. Topics in Sedimentary Geology

For upper division undergraduates and graduate students. Topics vary each year but the focus is on current developments and problems in sedimentary geology, sedimentology, and basin analysis. These include issues in deep-water sediments, their origin, facies, and architecture; sedimentary systems on the early Earth; and relationships among tectonics, basin development, and basin fill. May be repeated for credit.

2 units, by arrangement

### GES 214. Topics in Paleobiology

For upper division undergraduates and graduate students. Topics vary each year; focus is on paleontological, sedimentological, and geochemical approaches to the history of life. Topics may include: mass extinction events; evolutionary radiations; the history of global biodiversity; links between evolutionary histories of primary producers and consumers; and the quality of the fossil record. Term paper. May be repeated for credit.

2 units, offered occasionally

### GES 215A. Structural Geology and Rock Mechanics

(Same as CEE 297G) Quantitative field and laboratory data integrated with solutions to initial and boundary-value problems of continuum mechanics introduce tectonic processes in Earth's crust that lead to the development of geological structures including folds, faults, fractures and fabrics. Topics include: techniques and tools for structural mapping; using differential geometry to characterize structures; dimensional analysis and scaling relations; kinematics of deformation and flow; traction and stress analysis. Data sets analyzed using MATLAB. Prerequisites: GES 1, MATH 53, MATLAB or equivalent.

3-5 units, Aut (Pollard, D)

### GES 215B. Structural Geology and Rock Mechanics

(Same as CEE 297H) Field equations for elastic solids and viscous fluids derived from conservation laws to develop mechanical models for tectonic processes and their structural products. Topics include: conservation of mass and momentum in a deformable continuum; linear elastic deformation and elastic properties of rock; brittle deformation including fracture and faulting; linear viscous flow including folding, model development, and methodology. Models constructed and solutions visualized using MATLAB. Prerequisite: GES 215A.

3-5 units, Win (Pollard, D)

### GES 216. Rock Fracture Mechanics

Principles and tools of elasticity theory and fracture mechanics are applied to the origins and physical behaviors of faults, dikes, joints, veins, solution surfaces, and other natural structures in rock. Field observations, engineering rock fracture mechanics, and the elastic theory of cracks. The role of natural fractures in brittle rock deformation, and fluid flow in the earth's crust with applications to crustal deformation, structural geology, petroleum geology, engineering, and hydrogeology. Prerequisite: 215 or equivalent.

3-5 units, Spr (Staff), not given next year

### GES 217. Faults, Fractures, and Fluid Flow

Process-based approach to rock failure; the microstructures and overall architectures of the failure products including faults, joints, solution seams, and types of deformation bands. Fluid flow properties of these structures are characterized with emphasis on sealing and transmitting of faults and their role in hydrocarbon flow, migration, and entrapment. Case studies of fracture characterization experiments in aquifers, oil and gas reservoirs, and waste repository sites. Guest speakers; weekend field trip. Prerequisite: first-year graduate student in Earth Sciences.

3 units, Win (Staff), alternate years, not given next year

### GES 220. Planetary and Early Biological Evolution Seminar

(Same as GES 120) Interdisciplinary. For upper division science undergraduates and graduate students. Synthesis of biology, geology, physics, and chemistry. Recent approaches for identifying traces of past life on Earth. How to look for life on other planets such as Mars, Europa, and Titan. May be repeated for credit.

2-3 units, not given this year

### GES 221. What Makes a Habitable Planet?

(Same as GES 121) Physical processes affecting habitability such as large impacts and the atmospheric greenhouse effect, comets, geochemistry, the rise of oxygen, climate controls, and impact cratering. Detecting and interpreting the spectra of extrasolar terrestrial planets. Student-led discussions of readings from the scientific literature. Team taught by planetary scientists from NASA Ames Research Center.

3 units, Aut (Staff), alternate years, not given next year

### GES 222. Planetary Systems: Dynamics and Origins

(For students with a strong background in mathematics and the physical sciences; other should register for 122.) Motions of planets, moons, and small bodies; energy transport in planetary systems; meteorites and the constraints they provide on the formation of the solar system; asteroids and Kuiper belt objects; comets; planetary rings; planet formation; and extrasolar planets. In-class presentation of student papers.

3-4 units, Aut (Staff)

### GES 223. Planetary Systems: Atmospheres, Surfaces, and Interiors

Physical processes, such as radiation transport, atmospheric dynamics, thermal convection, and volcanism, shaping the interiors, surfaces, and atmospheres of the major planets in the solar system. How these processes manifest themselves under various conditions in the solar system. Case study of the surface and atmosphere of Mars. Application of comparative planetary science to extrasolar planets and brown dwarfs. In-class presentation of student papers.

3 units, by arrangement

### GES 224. Modeling Environmental Transformations

Quantitative overview of chemical and physical transport and transformation processes that govern elemental and contaminant concentrations in solids, fluids, and gases. Topics include the kinetics of mass transfer across environmental interfaces, formulation of reactor models, and elementary transport phenomena. Emphasis is on reactive transport modeling of fluid-mineral, isotopic, and microbial processes in the context of water-rock systems. Quantitative techniques for conceptualizing environmental processes from simple finite difference approaches to more sophisticated numerical reactive transport models.

3 units, Win (Staff), alternate years, not given next year

### GES 237. Surface and Near-Surface Hydrologic Response

(Same as CEE 260B) Quantitative review of process-based hydrology and geomorphology. Introduction to finite-difference and finite-element methods of numerical analysis. Topics: biometeorology, unsaturated and saturated subsurface fluid flow, overland and open channel flow, and physically-based simulation of coupled surface and near-surface hydrologic response. Links hydrogeology, soil physics, and surface water hydrology.

3 units, Aut (Loague, K)

### GES 238. Soil Physics

Physical properties of the soil solid phase emphasizing the transport, retention, and transformation of water, heat, gases, and solutes in the unsaturated subsurface. Field experiments.

3 units, Aut (Staff), alternate years, not given next year

### GES 240. Geostatistics for Spatial Phenomena

(Same as ENERGY 240) Probabilistic modeling of spatial and/or time dependent phenomena. Kriging and cokriging for gridding and spatial interpolation. Integration of heterogeneous sources of information. Multiple-point geostatistics and training image-based stochastic imaging of reservoir/field heterogeneities. Introduction to GSLIB and SGEMS software. Case studies from the oil and mining industry and environmental sciences. Prerequisites: introductory calculus and linear algebra, STATS 116, GES 161, or equivalent.

3-4 units, Win (Journel, A)

### GES 246. Reservoir Characterization and Flow Modeling with Outcrop Data

(Same as ENERGY 146, ENERGY 246) Project addressing a reservoir management problem by studying an outcrop analog, constructing geostatistical reservoir models, and performing flow simulation. How to use outcrop observations in quantitative geological modeling and flow simulation. Relationships between disciplines. Weekend field trip.

3 units, Aut (Graham, S; Tchalepi, H; Boucher, A)

**GES 249. Petroleum Geochemistry in Environmental and Earth Science**

How molecular fossils in crude oils, oil spills, refinery products, and human artifacts identify their age, origin, and environment of formation. The origin and habitat of petroleum, technology for its analysis, and parameters for interpretation, including: origins of molecular fossils; function, biosynthesis, and precursors; tectonic history related to the evolution of life, mass extinctions, and molecular fossils; petroleum refinery processes and the kinds of molecular fossils that survive; environmental pollution from natural and anthropogenic sources including how to identify genetic relationships among crude oil or oil spill samples; applications of molecular fossils to archaeology; worldwide petroleum systems through geologic time.

3 units, Win (Moldowan, J)

**GES 250. Sedimentation Mechanics**

The mechanics of sediment transport and deposition and the origins of sedimentary structures and textures as applied to interpreting ancient rock sequences. Dimensional analysis, fluid flow, drag, boundary layers, open channel flow, particle settling, erosion, sediment transport, sediment gravity flows, soft sediment deformation, and fluid escape. Field trip required.

4 units, Aut (Lowe, D)

**GES 251. Sedimentary Basins**

Analysis of the depositional framework and tectonic evolution of sedimentary basins. Topics: tectonic and environmental controls on facies relations, synthesis of basin development through time in terms of depositional systems and tectonic settings. Weekend field trip required. Prerequisites: 110, 151.

3 units, Aut (Graham, S)

**GES 252. Sedimentary Petrography**

Siliciclastic sediments and sedimentary rocks. Research in modern sedimentary mineralogy and petrography and the relationship between the composition and texture of sediments and their provenance, tectonic settings, and diagenetic histories. Topics vary yearly. Prerequisite: 151 or equivalent.

4 units, Aut (Staff), alternate years, not given next year

**GES 253. Petroleum Geology and Exploration**

The origin and occurrence of hydrocarbons. Topics: thermal maturation history in hydrocarbon generation, significance of sedimentary and tectonic structural setting, principles of accumulation, and exploration techniques. Prerequisites: 110, 151. Recommended: GEOPHYS 184.

3 units, Spr (Staff), alternate years, not given next year

**GES 254. Carbonate Sedimentology**

Processes of precipitation and sedimentation of carbonate minerals with emphasis on marine systems. Topics include: geographic and bathymetric distribution of carbonates in modern and ancient oceans; genesis and environmental significance of carbonate grains and sedimentary textures; carbonate rocks and sediments as sources of geochemical proxy data; carbonate diagenesis; changes in styles of carbonate deposition through Earth history; carbonate depositional patterns and the global carbon cycle. Lab exercises emphasize petrographic and geochemical analysis of carbonate rocks including map and outcrop scale, hand samples, polished slabs, and thin sections.

3-4 units, Spr (Payne, J)

**GES 255. Basin and Petroleum System Modeling**

For advanced undergraduates or graduate students. Students use stratigraphy, subsurface maps, and basic well log, lithologic, paleontologic, and geochemical data to construct 1-D, 2-D, and 3-D models of petroleum systems that predict the extent of source-rock thermal maturity, petroleum migration paths, and the volumes and compositions of accumulations through time (4-D). Recent software such as PetroMod designed to reconstruct basin geohistory. Recommended: 251 or 253.

3 units, Win (Staff), alternate years, not given next year

**GES 257. Clastic Sequence Stratigraphy**

Sequence stratigraphy facilitates integration of all sources of geologic data, including seismic, log, core, and paleontological, into a time-stratigraphic model of sediment architecture. Tools applicable to regional and field scales. Emphasis is on practical applications and integration of seismic and well data to exploration and field reservoir problems. Examples from industry data; hands-on exercises.

3 units, Spr (Staff), alternate years, not given next year

**GES 258. Introduction to Depositional Systems**

The characteristics of the major sedimentary environments and their deposits in the geologic record, including alluvial fans, braided and meandering rivers, aeolian systems, deltas, open coasts, barred coasts, marine shelves, and deep-water systems. Emphasis is on subdivisions; morphology; the dynamics of modern systems; and the architectural organization and sedimentary structures, textures, and biological components of ancient deposits.

3 units, Spr (Lowe, D)

**GES 260. Laboratory Methods in Organic Geochemistry**

Knowledge of components in geochemical mixtures to understand geological and environmental samples. The presence and relative abundance of these compounds provides information on the biological source, depositional environment, burial history, biodegradation, and toxicity of organic materials. Laboratory methods to detect and quantify components of these mixtures. Methods for separation and analysis of organic compounds in geologic samples: extraction, liquid chromatography, absorption by zeolites, gas chromatography and gas chromatography-mass spectrometry. Student samples considered as material for analysis. Recommended: 249.

2-3 units, Spr (Moldowan, J)

**GES 261. Physics and Chemistry of Minerals and Mineral Surfaces**

The concepts of symmetry and periodicity in crystals; the physical properties of crystals and their relationship to atomic-level structure; basic structure types; crystal chemistry and bonding in solids and their relative stability; the interaction of x-rays with solids and liquids (scattering and spectroscopy); structural variations in silicate glasses and liquids; UV-visible spectroscopy and the color of minerals; review of the mineralogy, crystal chemistry, and structures of selected rock-forming silicates and oxides; mineral surface and interface geochemistry.

4 units, Spr (Brown, G)

**GES 262. Thermodynamics and Disorder in Minerals and Melts**

The thermodynamic properties of crystalline, glassy, and molten silicates and oxides in light of microscopic information about short range structure and ordering. Measurements of bulk properties such as enthalpy, density, and their pressure and temperature derivatives, and structural determination by spectroscopies such as nuclear magnetic resonance and Mössbauer. Basic formulations for configurational entropy, heats of mixing in solid solutions, activities; and the energetics of exsolution, phase transitions, and nucleation. Quantitative models of silicate melt thermodynamics are related to atomic-scale views of structure. A general view of geothermometry and geobarometry. Prerequisites: introductory mineralogy and thermodynamics.

3 units, Win (Staff), alternate years, not given next year

**GES 263. Introduction to Isotope Geochemistry**

(Same as GES 163) Stable, cosmogenic, and radiogenic isotopes; processes that govern isotopic variations. Application of isotopes to geologic, biologic, and hydrologic questions. Major isotopic systems and their applications. Simple modeling techniques used in isotope geochemistry.

3 units, Aut (Maher, K)

**GES 267. Solution-Mineral Equilibria: Theory**

Procedures for calculating and evaluating the thermodynamic properties of reversible and irreversible reactions among rock-forming minerals and aqueous solutions in geologic systems. Emphasis is on the generation and utility of phase diagrams depicting solution-mineral interaction relevant to phase relations associated with weathering diagenetic, hydrothermal, and metamorphic processes, and the prediction of temperature, pressure, and the chemical potential of thermodynamic components compatible with observed mineralogic phase relations in geologic outcrops. Individual research topics. Prerequisite: 171.

3 units, alternate years, not given this year

**GES 272. Nontraditional Stable Isotope Geochemistry**

(Same as GES 172) Elements other than C, N, O, S, and H that exhibit mass-dependent and non mass-dependent isotopic fractionation; examples include Mg, Ca, Si, Fe, Cr, Mo, Cu, Zn, and Hg. These systems represent a new frontier in isotope geochemistry and Earth Sciences as new tools for understanding geochemical,

environmental and biological cycles. The theoretical calculations that form the basis for predicting fractionation, as well as the current state and applications of non-traditional isotope systems.

3 units, Win (Staff), alternate years, not given next year

### GES 273. Isotope Geochemistry Seminar

(Same as GES 173) Current topics including new analytical techniques, advances in isotopic measurements, and new isotopic approaches and systems.

1-3 units, Spr (Maher, K)

### GES 275. Electron Probe Microanalytical Techniques

The practical and theoretical aspects of x-ray generation and detection, and the behavior of electron beams and x-rays in solids. The basic principles needed to quantitatively analyze chemically complex geological materials. Operation of the JEOL 733 electron microprobe and associated computer software for quantitatively analyzing materials. X-ray chemical mapping. Enrollment limited to 8.

2-3 units, Win (Jones, R)

### GES 277. Flood Basalts and Mass Extinctions

Recent work in geochronology and paleobiology supports the temporal coincidence of the eruption of continental flood basalts with mass extinction in the marine and terrestrial realms. The mechanisms and timescale of flood basalt eruptions, their likely environmental and biological consequences, and the evidence for flood basalt eruptions as the triggers of many mass extinction events. Sources include recent primary literature.

3 units, Aut (Staff), alternate years, not given next year

### GES 283. Thermochronology and Crustal Evolution

Thermochronology analyzes the competition between radioactive in-growth and temperature-dependant loss of radiogenic isotopes within radioactive mineral hosts in terms of temperature-time history. Coupled with quantitative understanding of kinetic phenomena and crustal- or landscape-scale interpretational models, thermochronology provides an important source of data for the Earth Sciences, notably tectonics, geomorphology, and petrogenesis. The underpinning concepts and key developments in thermochronology, focusing upon analytical and interpretative innovations developed over the past decade.

4 units, Spr (Staff), alternate years, not given this year

### GES 284. Field Seminar on Eastern Sierran Volcanism

For graduate students in the earth sciences and archaeology. Four-day trip over Memorial Day weekend to study silicic and mafic volcanism associated with the western margin of the Basin and Range province: basaltic lavas and cinder cones erupted along normal faults bounding Owens Valley, Long Valley caldera, post-caldera rhyolite lavas, hydrothermal alteration and hot springs, Holocene rhyolite lavas of the Inyo and Mono craters, volcanism of the Mono Basin with subaqueous basaltic eruptions, floating pumice blocks, and cryptodomes punching up lake sediments. If snow-level permits, silicic volcanism associated with the Bodie gold district. Prerequisite: 1, 102 or equivalent.

1 unit, Spr (Staff), alternate years, not given next year

### GES 285. Igneous Petrogenesis

Radiogenic isotopes, stable isotopes, and trace elements applied to igneous processes; interaction of magmas with mantle and crust; convergent-margin magmatism; magmatism in extensional terrains; origins of rhyolites; residence times of magmas and magma chamber processes; granites as imperfect mirrors of their source regions; trace element modeling of igneous processes; trace element discriminant diagrams in tectonic analysis; phase equilibria of partial melting of mantle and crust; geothermometry and geobarometry. Topics emphasize student interest. Prerequisite: 180 or equivalent.

4 units, offered occasionally

### GES 290. Departmental Seminar in Geological and Environmental Sciences

Current research topics. Presentations by guest speakers from Stanford and elsewhere. May be repeated for credit.

1 unit, Aut (Maher, K; Mao, W), Win (Maher, K; Mao, W), Spr (Maher, K; Mao, W)

### GES 291. GES Field Trips

Field trips for teaching and research purposes. Trips average 5-10 days. Prerequisite: consent of instructor.

1 unit, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

### GES 292. Directed Reading with Geological and Environmental Sciences Faculty

May be repeated for credit.

1-10 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

### GES 299. Field Research

Two-three week field research projects. Written report required. May be repeated three times.

2-4 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

### GES 310. Climate Change, Climate Variability, and Landscape Development

The impact of long-term climate change on erosional processes and the evolution of Cenozoic landscapes. Climate data that highlight recurring climate variability on inter-annual to decadal time-scales. The behavior of climate on multi-decadal to tectonic time-scales over which significant changes in topography take place. The effects of climate change and variability on landscape development, sedimentary environments, and the deposits of these events. May be repeated for credit.

1 unit, not given this year

### GES 314. Structural Geology and Geomechanics

Research seminar. May be repeated for credit. (Staff)

1-5 units, Aut (Staff), Win (Staff), Spr (Staff)

### GES 315. Literature of Structural Geology

Classic studies and current journal articles. May be repeated for credit.

1 unit, Aut (Pollard, D), Win (Pollard, D), Spr (Pollard, D)

### GES 328. Seminar in Paleobiology

For graduate students. Current research topics including paleobotany, vertebrate and invertebrate evolution, paleoecology, and major events in the history of life on Earth.

1 unit, Spr (Payne, J)

### GES 333. Water Policy Colloquium

(Same as CEE 333) Student-organized interdisciplinary colloquium. Creation, implementation, and analysis of policy affecting the use and management of water resources. Weekly speakers from academia and local, state, national, and international agencies and organizations.

1 unit, Spr (Staff)

### GES 336. Stanford Alpine Project Seminar

Seminar on Iceland geology. Weekly student presentations on Icelandic hot-spot and mid-ocean ridge volcanism, geothermal power, culture, and other topics of interest. Students create a guidebook of geologic stops in advance of field trip in summer 2009. May be repeated for credit.

1 unit, offered occasionally

### GES 355. Advanced Stratigraphy Seminar and Field Course

Student-led presentations; poster-sized display on assigned topic; field trip.

1-3 units, offered occasionally

### GES 381. Igneous Petrology and Petrogenesis Seminar

Topics vary by quarter. May be repeated for credit.

1-2 units, Spr (Mahood, G)

### GES 384. Volcanology Seminar

Specialized and advanced topics vary by offering. May be repeated for credit.

1-2 units, Spr (Mahood, G)

### GES 385. Practical Experience in the Geosciences

On-the-job training in the geosciences. May include summer internship; emphasizes training in applied aspects of the geosciences, and technical, organizational, and communication dimensions. Meets USCIS requirements for F-1 curricular practical training. (Staff)

1 unit, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

### GES 399. Advanced Projects

Graduate research projects that lead to reports, papers, or other products during the quarter taken. On registration, students designate faculty member and agreed-upon units.

1-10 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

### GES 400. Graduate Research

Faculty supervision. On registration, students designate faculty member and agreed-upon units.

1-15 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

# GEOPHYSICS (GEOPHYS)

## UNDERGRADUATE COURSES IN GEOPHYSICS

### **GEOPHYS 25. Hands-on Introduction to Astrobiology**

Are human beings alone; are microbes common in the universe? Historical development and modern status of topics such as: the vastness of space and time; star evolution; planetary climate; effects of geological processes and asteroid impacts on life; other habitable places in the solar system with updates on Mars; the Earth as a biological organism; maintenance of society for a geologically long time; and the search for intelligent extraterrestrials. Outdoor lab exercises designed to work in K-12 science classes. Non-science majors welcome.

3 units, Aut (*Sleep, N*)

### **GEOPHYS 60N. Man versus Nature: Coping with Disasters Using Space Technology**

(F,Sem) (Same as EE 60N) Stanford Introductory Seminar. Preference to freshman. Natural hazards, earthquakes, volcanoes, floods, hurricanes, and fires, and how they affect people and society; great disasters such as asteroid impacts that periodically obliterate many species of life. Scientific issues, political and social consequences, costs of disaster mitigation, and how scientific knowledge affects policy. How spaceborne imaging technology makes it possible to respond quickly and mitigate consequences; how it is applied to natural disasters; and remote sensing data manipulation and analysis. GER:DB-EngrAppSci

4 units, Win (*Zebker, H*)

### **GEOPHYS 100. Directed Reading**

(Staff)

1-2 units, Aut (*Staff*), Win (*Staff*), Spr (*Staff*), Sum (*Staff*)

### **GEOPHYS 104. The Water Course**

(Same as EARTHSYS 104) The pathway that water takes from rainfall to the tap using student home towns as an example. How the geological environment controls the quantity and quality of water; taste tests of water from around the world. Current U.S. and world water supply issues. GER: DB-NatSci

3 units, Spr (*Knight, R*)

### **GEOPHYS 107. Journey to the Center of the Earth**

(Same as GES 107, GES 207, GEOPHYS 207) The interconnected set of dynamic systems that make up the Earth. Focus is on fundamental geophysical observations of the Earth and the laboratory experiments to understand and interpret them. What earthquakes, volcanoes, gravity, magnetic fields, and rocks reveal about the Earth's formation and evolution.

3 units, Win (*Lawrence, J; Mao, W*)

### **GEOPHYS 112. Exploring Geosciences with MATLAB**

How to use MATLAB as a tool for research and technical computing, including 2-D and 3-D visualization features, numerical capabilities, and toolboxes. Practical skills in areas such as data analysis, regressions, optimization, spectral analysis, differential equations, image analysis, computational statistics, and Monte Carlo simulations. Emphasis is on scientific and engineering applications.

1-3 units, Aut (*Mukerji, T*)

### **GEOPHYS 113. Earthquakes and Volcanoes**

(Same as EARTHSYS 113) Earthquake location, magnitude and intensity scales, seismic waves, styles of eruptions and volcanic hazards, tsunami waves, types and global distribution of volcanoes, volcano forecasting. Plate tectonics as a framework for understanding earthquake and volcanic processes. Forecasting; earthquake resistant design; building codes; and probabilistic hazard assessment. For non-majors and potential earth scientists. GER:DB-EngrAppSci

3 units, Spr (*Beroza, G; Segall, P*)

### **GEOPHYS 140. The Earth From Space: Introduction to Remote Sensing**

(Same as EE 140) Global change science as viewed using space remote sensing technology. Global warming, ozone depletion, the hydrologic and carbon cycles, topographic mapping, and surface deformation. Physical concepts in remote sensing. EM waves and

geophysical information. Sensors studied: optical, near and thermal IR, active and passive microwave. GER:DB-EngrAppSci

3 units, not given this year

### **GEOPHYS 150. General Geophysics and Physics of the Earth**

Elementary study of gravitational, magnetic, seismic, and thermal properties of the Earth. Earth's crust, mantle, core. Plate tectonics and mantle convection. Probing Earth structure with seismic waves. Measurements, interpretation, and applications to Earth structure and exploration. Prerequisites: calculus, first-year college physics. GER: DB-NatSci

3 units, Win (*Klemperer, S*)

### **GEOPHYS 160. Waves**

Topics: derivations of wave equations and their solutions in 1-D, 2-D, and 3-D; amplitude, polarization, phase and group velocities, attenuation, and dispersion; reflection and transmission at single and multiple interfaces; ray theory. Applications from acoustics, elastodynamics, and electromagnetics. Prerequisites: differential/integral calculus and complex functions. GER: DB-NatSci

3 units, not given this year

### **GEOPHYS 162. Laboratory Methods in Geophysics**

Lab. Types of equipment used in experimental rock physics. Principles and measurements of geophysical properties such as porosity, permeability, acoustic wave velocity, and resistivity through lectures and laboratory experiments. Training in analytical project writing skills and understanding errors for assessing accuracy and variability of measured data. Students may investigate a scientific problem to support their own research.

2-3 units, Win (*Vanorio, T*)

### **GEOPHYS 170. Global Tectonics**

(Formerly 220.) The architecture of the Earth's crust; regional assembling of structural or deformational features and their relationship, origin and evolution. The plate-tectonic cycle: rifting, passive margins, sea-floor spreading, subduction zones, and collisions. Case studies.

3 units, alternate years, not given this year

### **GEOPHYS 171. Tectonics Field Trip**

Long weekend field trip to examine large-scale features in the crust. Destinations may include the San Andreas fault, Mendocino Triple Junction, Sierra Nevada, and western Basin and Range province.

3 units, alternate years, not given this year

### **GEOPHYS 180. Geophysical Inverse Problems**

(Same as GEOPHYS 281) Concepts of inverse theory, with application to geophysics. Inverses with discrete and continuous models, generalized matrix inverses, resolving kernels, regularization, use of prior information, singular value decomposition, nonlinear inverse problems, back-projection techniques, and linear programming. Application to seismic tomography, earthquake location, migration, and fault-slip estimation. Prerequisite: MATH 103. GER:DB-Math

3 units, alternate years, not given this year

### **GEOPHYS 185A. Reflection Seismology**

(Same as GEOPHYS 385A) Research in reflection seismology and petroleum prospecting. May be repeated for credit. WIM at 3-unit level.

1-3 units, Aut (*Biondi, B; Clapp, R*), Win (*Biondi, B; Clapp, R*), Spr (*Biondi, B; Clapp, R*), Sum (*Staff*)

### **GEOPHYS 185B. Environmental Geophysics**

(Same as GEOPHYS 385B) Research on the use of geophysical methods for near-surface environmental problems. May be repeated for credit. WIM at 3-unit level.

1-3 units, Aut (*Knight, R*), Win (*Knight, R*), Spr (*Knight, R*), Sum (*Staff*)

### **GEOPHYS 185E. Tectonics**

(Same as GEOPHYS 385E) Research on the origin, major structures, and tectonic processes of the Earth's crust. Emphasis is on use of deep seismic reflection and refraction data. May be repeated for credit. WIM at 3-unit level.

1-3 units, Aut (*Klemperer, S; Sleep, N; Thompson, G*), Win (*Klemperer, S; Sleep, N; Thompson, G*), Spr (*Klemperer, S; Sleep, N; Thompson, G*), Sum (*Staff*)

**GEOPHYS 185J. Global Seismic Techniques, Theory, and Application**

(Same as GEOPHYS 385J) Topics chosen from surface wave dispersion measurement, 1D inversion techniques, regional tomographic inversion, receiver functions, ray theory in spherical geometry, seismic attenuation, seismic anisotropy, seismic focusing, reflected phases, stacking, and interpretations of seismic results in light of other geophysical constraints. May be repeated for credit. WIM at 3-unit level.

*1-3 units, Aut (Lawrence, J), Win (Lawrence, J), Spr (Lawrence, J), Sum (Lawrence, J)*

**GEOPHYS 185K. Crustal Mechanics**

(Same as GEOPHYS 385K) Research in areas of petrophysics, seismology, in situ stress, and subjects related to characterization of the physical properties of rock in situ. May be repeated for credit. WIM at 3-unit level.

*1-3 units, Aut (Zoback, M), Win (Zoback, M), Spr (Zoback, M)*

**GEOPHYS 185L. Earthquake Seismology, Deformation, and Stress**

(Same as GEOPHYS 385L) Research on seismic source processes, crustal stress, and deformation associated with faulting and volcanism. May be repeated for credit. WIM at 3-unit level.

*1-3 units, Aut (Zoback, M; Segall, P; Beroza, G), Win (Beroza, G; Segall, P; Zoback, M), Spr (Beroza, G; Segall, P; Zoback, M)*

**GEOPHYS 185S. Wave Physics**

(Same as GEOPHYS 385S) Theory, numerical simulation, and experiments on seismic and electromagnetic waves in complex porous media. Applications from Earth imaging and in situ characterization of Earth properties, including subsurface monitoring. Presentations by faculty, research staff, students, and visitors. May be repeated for credit. WIM at 3-unit level.

*1-3 units, Aut (Harris, J), Win (Harris, J), Spr (Harris, J)*

**GEOPHYS 185V. Poroelasticity**

(Same as GEOPHYS 385V) Research on the mechanical properties of porous rocks: dynamic problems of seismic velocity, dispersion, and attenuation; and quasi-static problems of faulting, fluid transport, crustal deformation, and loss of porosity. Participants define, investigate, and present an original problem of their own. May be repeated for credit. WIM at 3-unit level.

*1-3 units, Aut (Mavko, G), Win (Mavko, G), Spr (Mavko, G)*

**GEOPHYS 185Z. Radio Remote Sensing**

(Same as GEOPHYS 385Z) Research applications, especially crustal deformation measurements. Recent instrumentation and system advancements. May be repeated for credit. WIM at 3-unit level.

*1-3 units, Aut (Zebker, H), Win (Zebker, H), Spr (Zebker, H)*

**GEOPHYS 187. Introduction to SES Computing (ISESC)**

For beginning undergraduates and graduate students in the School of Earth Sciences. Computer concepts. What are computers and networks, and how do they work? Web page authoring. Introduction to scientific programming. Free computing tools for plotting data. Computer resources available to students in the school. An online repository of source codes useful for and developed by SES students, faculty, and staff. Specialists from around the school provide practical instruction and concrete examples of how to achieve basic computing needs. 2 units requires a class project: code development to be uploaded to the course's code repository.

*1-2 units, Aut (Lawrence, J)*

**GEOPHYS 190. Introduction to Geophysical Field Methods**

Applications of geophysical methods for imaging and characterizing the top 500 meters of the Earth. Field-based equipment demonstrations and data acquisition practices; underlying theories; and modeling and interpreting the data. Techniques include electrical resistivity, ground penetrating radar, gravity, magnetics, electromagnetic and seismic methods focusing on applications in hydrology, engineering, and archaeology. GER:DB-EngrAppSci

*3 units, alternate years, not given this year*

**GRADUATE COURSES IN GEOPHYSICS****GEOPHYS 200. Fluids and Flow in the Earth: Computational Methods**

Interdisciplinary problems involving the state and movement of fluids in crustal systems, and computational methods to model

these processes. Examples of processes include: nonlinear, time-dependent flow in porous rocks; coupling in porous rocks between fluid flow, stress, deformation, and heat and chemical transport; percolation of partial melt; diagenetic processes; pressure solution and the formation of stylolites; and transient pore pressure in fault zones. MATLAB, Lattice-Boltzmann, and COMSOL Multiphysics. Term project. No experience with COMSOL Multiphysics required.

*3 units, Win (Mukerji, T)*

**GEOPHYS 201. Frontiers of Geophysical Research at Stanford: Faculty Lectures**

Required for new students entering the department. Second-year and other graduate students may attend either for credit or as auditors. Department faculty and senior research staff introduce the frontiers of research problems and methods being employed or developed in the department and unique to department faculty and students: what the current research is, why the research is important, what methodologies and technologies are being used, and what the potential impact of the results might be.

*1 unit, Aut (Beroza, G)*

**GEOPHYS 202. Reservoir Geomechanics**

Basic principles of rock mechanics and the state of stress and pore pressure in sedimentary basins related to exploitation of hydrocarbon and geothermal reservoirs. Mechanisms of hydrocarbon migration, exploitation of fractured reservoirs, reservoir compaction and subsidence, hydraulic fracturing, utilization of directional and horizontal drilling to optimize well stability.

*3 units, Win (Zoback, M)*

**GEOPHYS 205. Honors Program**

Experimental, observational, or theoretical honors project and thesis in geophysics under supervision of a faculty member. Students who elect to do an honors thesis should begin planning it no later than Winter Quarter of the junior year. Prerequisites: department approval.

*1-3 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

**GEOPHYS 207. Journey to the Center of the Earth**

(Same as GES 107, GES 207, GEOPHYS 107) The interconnected set of dynamic systems that make up the Earth. Focus is on fundamental geophysical observations of the Earth and the laboratory experiments to understand and interpret them. What earthquakes, volcanoes, gravity, magnetic fields, and rocks reveal about the Earth's formation and evolution.

*3 units, Win (Lawrence, J; Mao, W)*

**GEOPHYS 210. Basic Earth Imaging**

Echo seismogram recording geometry, head waves, moveout, velocity estimation, making images of complex shaped reflectors, migration by Fourier and integral methods. Anti-aliasing. Dip moveout. Computer labs. See <http://sep.stanford.edu/sep/prof/>.

*3-4 units, Aut (Claerbout, J; Clapp, R)*

**GEOPHYS 211. Environmental Soundings Image Estimation**

Imaging principles exemplified by means of imaging geophysical data of various uncomplicated types (bathymetry, altimetry, velocity, reflectivity). Adjoints, back projection, conjugate-gradient inversion, preconditioning, multidimensional autoregression and spectral factorization, the helical coordinate, and object-based programming. Common recurring issues such as limited aperture, missing data, signal/noise segregation, and nonstationary spectra. See <http://sep.stanford.edu/sep/prof/>.

*3 units, Aut (Claerbout, J)*

**GEOPHYS 222. Reflection Seismology**

(Formerly 182.) The principles of seismic reflection profiling, focusing on methods of seismic data acquisition and seismic data processing for hydrocarbon exploration.

*3 units, Aut (Klemperer, S)*

**GEOPHYS 223. Reflection Seismology Interpretation**

(Formerly 183.) The structural and stratigraphic interpretation of seismic reflection data, emphasizing hydrocarbon traps in two and three dimensions on industry data, including workstation-based interpretation. Lectures only, 1 unit. Prerequisite: 222, or consent of instructor.

*1-4 units, Spr (Klemperer, S)*

**GEOPHYS 224. Seismic Reflection Processing**

(Formerly 184.) Workshop in computer processing of seismic ref-

lection data. Students individually process a commercial seismic reflection profile from field tapes to migrated stack, using interactive software on a workstation. Prerequisite: consent of instructor.

3 units, alternate years, not given this year

#### **GEOPHYS 240. Crosswell Seismic Profiling**

Seismic imaging between boreholes for applications to subsurface characterization, reservoir imaging, and reservoir monitoring. Topics include data acquisition, data analysis, data processing and imaging. Inversion models for transmitted, reflected, and diffracted waves for imaging velocity, attenuation, and anisotropy in heterogeneous media. Use of field datasets and field applications. Prerequisites: 160 or equivalent; familiarity with Matlab or other programming language.

3 units, alternate years, not given this year

#### **GEOPHYS 241A. Practice of Geostatistics and Seismic Data Integration**

(Same as ENERGY 141, ENERGY 241) Students build a synthetic 3D fluvial channel reservoir model with layer depths, channel geometry, and facies-specific petrophysical and seismic properties, stressing the physical significance of geophysical data. Reference data set is sparsely sampled, providing the sample data typically available for an actual reservoir assessment. Geostatistical reservoir modeling uses well and seismic data, with results checked against the reference database. Software provided (GSLIB and SRBtools). Prerequisite: ENERGY 240. Recommended: experience with Unix, MATLAB/C++/Fortran programming.

3-4 units, Spr (Mukerji, T)

#### **GEOPHYS 255. Report on Energy Industry Training**

On-the-job-training for master's and doctoral degree students under the guidance of on-site supervisors. Students submit a report detailing work activities, problems, assignment, key results. May be repeated for credit. Prerequisite: written consent of adviser.

1-3 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

#### **GEOPHYS 257. Introduction to Computational Earth Sciences**

Techniques for mapping numerically intensive algorithms to modern high performance computers such as the Center for Computational Earth and Environmental Science's (CEES) high productivity technical computing (HPTC). Topics include: debugging, performance analysis, and concepts of parallel programming; efficient serial and parallel programs; OpenMP; and MPI. Exercises using SMP and cluster computers. See <http://pangea.stanford.edu/research/cees/>. Recommended: familiarity with MATLAB, C, or Fortran. May be repeated for credit.

2-4 units, Spr (Clapp, R; Harris, J)

#### **GEOPHYS 260. Rock Physics for Reservoir Characterization**

How to integrate well log and laboratory data to determine and theoretically generalize rock physics transforms between sediment wave properties (acoustic and elastic impedance), bulk properties (porosity, lithology, texture, permeability), and pore fluid conditions (pore fluid and pore pressure). These transforms are used in seismic interpretation for reservoir properties, and seismic forward modeling in what-if scenarios.

3 units, Spr (Staff)

#### **GEOPHYS 262. Rock Physics**

Properties of and processes in rocks as related to geophysical exploration, crustal studies, and tectonic processes. Emphasis is on wave velocities and attenuation, hydraulic permeability, and electrical resistivity in rocks. Application to in situ problems, using lab data and theoretical results.

3 units, not given this year

#### **GEOPHYS 265. Imaging Radar and Applications**

(Same as EE 355) Radar remote sensing, radar image characteristics, viewing geometry, range coding, synthetic aperture processing, correlation, range migration, range/Doppler algorithms, wave domain algorithms, polar algorithm, polarimetric processing, interferometric measurements. Applications: polarimetry and target discrimination, topographic mapping surface displacements, velocities of ice fields.

3 units, not given this year

#### **GEOPHYS 270. Electromagnetic Properties of Geological Materials**

Laboratory observations and theoretical modeling of the electromagnetic properties and nuclear magnetic resonance response of geological material. Relationships between these properties and

water-saturated materials properties such as composition, water content, surface area, and permeability.

2-3 units, Win (Knight, R)

#### **GEOPHYS 280. 3-D Seismic Imaging**

The principles of imaging complex structures in the Earth subsurface using 3-D reflection seismology. Emphasis is on processing methodologies and algorithms, with examples of applications to field data. Topics: acquisition geometries of land and marine 3-D seismic surveys, time vs. depth imaging, migration by Kirchhoff methods and by wave-equation methods, migration velocity analysis, velocity model building, imaging irregularly sampled and aliased data. Computational labs involve some programming. Lab for 3 units.

2-3 units, Win (Biondi, B)

#### **GEOPHYS 281. Geophysical Inverse Problems**

(Same as GEOPHYS 180) Concepts of inverse theory, with application to geophysics. Inverses with discrete and continuous models, generalized matrix inverses, resolving kernels, regularization, use of prior information, singular value decomposition, nonlinear inverse problems, back-projection techniques, and linear programming. Application to seismic tomography, earthquake location, migration, and fault-slip estimation. Prerequisite: MATH 103.

3 units, alternate years, not given this year

#### **GEOPHYS 287. Earthquake Seismology**

Theorems in elastodynamics, Green's functions, attenuation, wave propagation in layered media, ray theory, seismic moment tensors, finite-source effects, kinematics and dynamics of earthquakes, and engineering aspects of seismology.

3 units, Win (Beroza, G)

#### **GEOPHYS 288A. Crustal Deformation**

Earthquake and volcanic deformation, emphasizing analytical models that can be compared to data from GPS, InSAR, and strain meters. Deformation, stress, and conservation laws. Dislocation models of strike slip and dip slip faults, in 2 and 3 dimensions. Crack models, including boundary element methods. Dislocations in layered and elastically heterogeneous earth models. Models of volcano deformation, including sills, dikes, and magma chambers.

3-5 units, Aut (Segall, P)

#### **GEOPHYS 288B. Crustal Deformation**

Earthquake and volcanic deformation, emphasizing analytical models that can be compared to data from GPS, InSAR, and strain meters. Viscoelasticity, post-seismic rebound, and viscoelastic magma chambers. Effects of surface topography and earth curvature on surface deformation. Gravity changes induced by deformation and elastogravitational coupling. Poro-elasticity, coupled fluid flow and deformation. Earthquake nucleation and rate-state friction. Models of earthquake cycle at plate boundaries.

3-5 units, Win (Segall, P)

#### **GEOPHYS 289. Global Positioning System in Earth Sciences**

The basics of GPS, emphasizing monitoring crustal deformation with a precision of millimeters over baselines tens to thousands of kilometers long. Applications: mapping with GIS systems, airborne gravity and magnetic surveys, marine seismic and geophysical studies, mapping atmospheric temperature and water content, measuring contemporary plate motions, and deformation associated with active faulting and volcanism.

3-5 units, alternate years, not given this year

#### **GEOPHYS 290. Tectonophysics**

The physics of faulting and plate tectonics. Topics: plate driving forces, lithospheric rheology, crustal faulting, and the state of stress in the lithosphere. Exercises: lithospheric temperature and strength profiles, calculation of seismic strain from summation of earthquake moment tensors, slip on faults in 3D, and stress triggering and inversion of stress from earthquake focal mechanisms.

3 units, alternate years, not given this year

#### **GEOPHYS 385A. Reflection Seismology**

(Same as GEOPHYS 185A) Research in reflection seismology and petroleum prospecting. May be repeated for credit. WIM at 3-unit level.

1-3 units, Aut (Biondi, B; Clapp, R), Win (Biondi, B; Clapp, R), Spr (Biondi, B; Clapp, R), Sum (Staff)

#### **GEOPHYS 385B. Environmental Geophysics**

(Same as GEOPHYS 185B) Research on the use of geophysical

methods for near-surface environmental problems. May be repeated for credit. WIM at 3-unit level.

*1-3 units, Aut (Knight, R), Win (Knight, R), Spr (Knight, R), Sum (Staff)*

#### **GEOPHYS 385E. Tectonics**

(Same as GEOPHYS 185E) Research on the origin, major structures, and tectonic processes of the Earth's crust. Emphasis is on use of deep seismic reflection and refraction data. May be repeated for credit. WIM at 3-unit level.

*1-3 units, Aut (Klemperer, S; Sleep, N; Thompson, G), Win (Klemperer, S; Sleep, N; Thompson, G), Spr (Klemperer, S; Sleep, N; Thompson, G), Sum (Staff)*

#### **GEOPHYS 385J. Global Seismic Techniques, Theory, and Application**

(Same as GEOPHYS 185J) Topics chosen from surface wave dispersion measurement, 1D inversion techniques, regional tomographic inversion, receiver functions, ray theory in spherical geometry, seismic attenuation, seismic anisotropy, seismic focusing, reflected phases, stacking, and interpretations of seismic results in light of other geophysical constraints. May be repeated for credit. WIM at 3-unit level.

*1-3 units, Aut (Lawrence, J), Win (Lawrence, J), Spr (Lawrence, J), Sum (Lawrence, J)*

#### **GEOPHYS 385K. Crustal Mechanics**

(Same as GEOPHYS 185K) Research in areas of petrophysics, seismology, in situ stress, and subjects related to characterization of the physical properties of rock in situ. May be repeated for credit. WIM at 3-unit level.

*1-3 units, Aut (Zoback, M), Win (Zoback, M), Spr (Zoback, M)*

#### **GEOPHYS 385L. Earthquake Seismology, Deformation, and Stress**

(Same as GEOPHYS 185L) Research on seismic source processes, crustal stress, and deformation associated with faulting and volcanism. May be repeated for credit. WIM at 3-unit level.

*1-3 units, Aut (Zoback, M; Segall, P; Beroza, G), Win (Beroza, G; Segall, P; Zoback, M), Spr (Beroza, G; Segall, P; Zoback, M)*

#### **GEOPHYS 385S. Wave Physics**

(Same as GEOPHYS 185S) Theory, numerical simulation, and experiments on seismic and electromagnetic waves in complex porous media. Applications from Earth imaging and in situ characterization of Earth properties, including subsurface monitoring. Presentations by faculty, research staff, students, and visitors. May be repeated for credit. WIM at 3-unit level.

*1-3 units, Aut (Harris, J), Win (Harris, J), Spr (Harris, J)*

#### **GEOPHYS 385V. Poroelasticity**

(Same as GEOPHYS 185V) Research on the mechanical properties of porous rocks: dynamic problems of seismic velocity, dispersion, and attenuation; and quasi-static problems of faulting, fluid transport, crustal deformation, and loss of porosity. Participants define, investigate, and present an original problem of their own. May be repeated for credit. WIM at 3-unit level.

*1-3 units, Aut (Mavko, G), Win (Mavko, G), Spr (Mavko, G)*

#### **GEOPHYS 385Z. Radio Remote Sensing**

(Same as GEOPHYS 185Z) Research applications, especially crustal deformation measurements. Recent instrumentation and system advancements. May be repeated for credit. WIM at 3-unit level.

*1-3 units, Aut (Zebker, H), Win (Zebker, H), Spr (Zebker, H)*

#### **GEOPHYS 399. Teaching Experience in Geophysics**

On-the-job training in the teaching of geophysics. An opportunity to develop problem sets and lab exercises, grade papers, and give occasional lectures under the supervision of the regular instructor of a geophysics course. Regular conferences with instructor and with students in the class provide the student teacher with feedback about effectiveness in teaching.

*2-4 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

#### **GEOPHYS 400. Research in Geophysics**

*1-15 units, Aut (Staff), Win (Lawrence, J), Spr (Staff), Sum (Staff)*

## GERMAN GENERAL (GERGEN)

### UNDERGRADUATE COURSES IN GERMAN GENERAL

#### **GERGEN 38A. Introduction to Germanic Languages**

(Same as GERLIT 138) The oldest attested stages of the Germanic language family, including Gothic, Old Norse, Old Saxon, Old English, Old Frisian, Old Low Franconian (Old Dutch), and Old High German. The linguistic interrelationships, prehistory, Germanic tribal groupings, and literature. GER:DB-Hum

*4 units, not given this year*

#### **GERGEN 104N. Resistance Writings in Nazi Germany**

(F,Sem) Stanford Introductory Seminar. Preference to sophomores. The letters and diaries of individuals who resisted Nazi oppression and paid with their lives. Readings include the Scholl diaries, Bonhoeffer's letters and his Ethics, and letter exchanges from other crucial figures. No knowledge of German required; students may read texts in original if able. GER:DB-Hum

*3 units, Win (Bernhardt, E)*

#### **GERGEN 122Q. The Culture of Pessimism in 19th- and 20th-Century Europe**

(S,Sem) Stanford Introductory Seminar. European culture long relied on a narrative of inexorable human progress. Starting in the 19th century, this triumphalist narrative was shadowed by another tradition that rejected such trust in progress. The pessimistic tradition in Europe in literature, philosophy, the study of history, anthropology, and psychology; the distinction between pessimism in the fields of morality, culture, and intellectual life. Authors include Giacomo Leopardi, Arthur Schopenhauer, Lautréamont, T. S. Eliot, and Sigmund Freud. GER:DB-Hum

*3-5 units, Spr (Daub, A)*

#### **GERGEN 125. Varieties of freedom in German culture**

For undergraduates. Changing ideas of human self-determination in works by Luther, Goethe, Kant, Kleist, Hegel, Heine, Marx, Keller, Nietzsche, Adorno, and Horkheimer. Students may read assignments in English or in German. Discussion in English. GER:DB-Hum

*3-5 units, Aut (Dornbach, M)*

#### **GERGEN 129. German Cinema**

(Same as GERGEN 229) History of German cinema in the Weimar Republic, Nazi era, and the immediate aftermath of WWII. German thought, political valences, and social potential as portrayed in film.

*5 units, not given next year*

#### **GERGEN 141. Fables of Retreat**

Modern anti-heroes who assert themselves through feats of reduction and retreat. Writers include Rousseau, Tieck, Emerson, Thoreau, Melville, Dostoevsky, and Kafka.

*3-5 units, not given this year*

#### **GERGEN 148. A Brief History of Misogyny**

(Same as GERGEN 248) Genealogy of philosophical misogyny in 19th- and 20th-century German thought from German idealism. Authors include Schopenhauer, Nietzsche, Weininger, and the George circle. In English. GER:DB-Hum, EC-Gender

*3-5 units, not given this year*

#### **GERGEN 160. Interiors and Interiority in the 19th Century**

Interiority and the interior as focal points of 19th-century Europe. Domestic space, and its political dimensions and structures of feeling in 19th-century German literature, from the romance to the detective novel. Ideology of domesticity in German music, design, architecture, visual art, and science of the period. In German. GER:DB-Hum

*4 units, not given this year*

#### **GERGEN 161. Wagnerian Echos: A Cultural History from Modernism to Popular Culture**

(Same as HUMNTIES 192T, MUSIC 150G) The afterlives of mythological themes from the operas and music dramas of Richard Wagner (The Flying Dutchman, Tannhäuser, Lohengrin, Ring Cycle, Parsifal) in literature, modernist aesthetics, fascist politics, film, philosophy, and contemporary media. GER:DB-Hum

*3-5 units, Spr (Daub, A; Grey, T)*

## **GERGEN 170A. Postwar: German Culture after World War II**

(Same as GERGEN 270A) How did German culture react to WW II, the Holocaust, and the exile of Germans from E. Europe? Questions of representations, political debate, and the future of Germany in Europe. German cinema, architecture, and art related to the subject. Readings include: Adorno, Grass, Habermas, Kluge, Bachmann, Jelinek, and Beyer. Recommended: German, but not required.

*3-5 units, not given this year*

## **GERGEN 177. Culture and Politics in Modern Germany**

Germany's troubled transition to modernity in literature and theory. Themes include romanticism and an emerging national identity, pietism and the Bildungsbürgertum, the Marxian intervention, life and strife in the Weimar Republic, the Third Reich as reactionary modernism, 1968, really-existing socialism in the GDR, and unification and its discontents. The articulation of gender in shifting historical contexts. Fifth unit for reading literary texts in German. GER:EC-Gender

*4-5 units, Aut (Kramer, K)*

## **GERGEN 181. Philosophy and Literature**

(Same as CLASSGEN 81, COMPLIT 181, ENGLISH 81, FREN-GEN 181, ITALGEN 181) Required gateway course for Philosophical and Literary Thought; crosslisted in departments sponsoring the Philosophy and Literature track: majors should register in their home department; non-majors may register in any sponsoring department. Introduction to major problems at the intersection of philosophy and literature. Issues may include authorship, selfhood, truth and fiction, the importance of literary form to philosophical works, and the ethical significance of literary works. Texts include philosophical analyses of literature, works of imaginative literature, and works of both philosophical and literary significance. Authors may include Plato, Montaigne, Nietzsche, Borges, Beckett, Barthes, Foucault, Nussbaum, Walton, Nehamas, Pavel, and Pippin. GER:DB-Hum

*4-5 units, Win (Anderson, L; Landy, J)*

## **GERGEN 183. Scenarios of Dissolution in the Modern Novel**

(Same as GERGEN 283) How do novels capture chaos? 20th-century novels responding to catastrophes such as: the disintegration of the Austro-Hungarian monarchy (Musil, Roth); demise of the Third Reich (Mann); chaotic forces in an oppressive order (Bulgakov); corrosion of imperial confidence through fear of barbarian invaders (Coetzee); and transformation of masses into a mob destroying the body politic from within (Krasznahorkai). GER:DB-Hum

*4 units, not given this year*

## **GERGEN 201. Conservative Revolution**

(Same as COMPLIT 234) An examination of conservative critiques of modernity in the early 20th century, including topics such as German nationalism, the war experience, responses to democracy, anti-liberalism, cultural pessimism in the decline of the West, crises of authority, technology, geopolitics, existentialism, and tradition. Readings from authors such as Oswald Spengler, Thomas Mann, Carl Schmitt, Ernst Jünger, Hugo von Hofmannsthal, Rudolf Borchardt, Karl Haushofer, Konrad Weiss. Readings in either English or German. GER:DB-Hum

*3-5 units, Win (Berman, R)*

## **GERGEN 205. Technologies of the Self**

Important moments in the history of the discursive and rhetorical construction of the subject. Emphasis is on tensions between uniqueness and exemplariness, chronology and repetition, narrative and archive, and aesthetics and ethics of retrospection. Works by Augustine, Teresa of Avila, Montaigne, Rousseau, Goethe, Nietzsche, Joyce, Gide, Sartre, Leiris, and Barthes. Theoretical and critical essays including by Lejeune, Starobinski, De Man, Derrida, Marin, Koerner, Foucault, and Beaujour. GER:DB-Hum

*3-5 units, not given this year*

## **GERGEN 212. The Invention of Experience**

Experience viewed as a source of orientation irreducible to discursive knowledge in the 19th century. The encounter with art as the paradigm of experience; lived vs. cumulative experience; the modern crisis of experience; experiential openness and the authority conferred by experience. If it is neither pleasure nor knowledge sought in art, could it be experience? Role of Goethe in the cult of

experience (Faust I, Elective Affinities). Montaigne, Hegel, Emerson, Rilke, Benjamin, Koselleck, and Gadamer. GER:DB-Hum

*3-5 units, Spr (Dornbach, M)*

## **GERGEN 221. Memory in the Modernist Novel**

Preference to freshmen. The art of memory as one of the main characteristics of modernity. The relationship between memory and modernism through major narrative texts: Rainer Maria Rilke's The Notebooks of Malte Laurids Brigge; James Joyce's A Portrait of the Artist as a Young Man; and Marcel Proust's Combray. How memory is represented in the novels, and its role in the perception of external reality. How memory helps to constitute personal identity. The metaphors used to define memory. Readings include theoretical and critical essays, and primary texts. GER:DB-Hum, DB-Hum

*4 units, Spr (Douvaldzi, C)*

## **GERGEN 221A. Modernism and the Jewish Voice in Europe**

(Same as COMPLIT 247, SLAVGEN 221) Some of the most haunting literary voices of the 20th century emerged from the Jewish communities of Eastern and Central Europe. The Jewishness of the modernists is thematized, asking whether it contributed to shared attitudes toward text, history, or identity. Their works are situated in specific linguistic traditions: Yiddish, Hebrew, Russian, Polish, or German. Primary readings from Ansky, Bialik, Mandelstam, Babel, Schulz, Kafka, Celan; secondary readings in history, E. European literature, and theory, including Marx, Freud, Benjamin, and Arendt. GER:DB-Hum

*3-4 units, Spr (Eshel, A; Safran, G)*

## **GERGEN 267. Freud and the Apostle Paul**

(Same as GERGEN 367) Intersections between Freud's psychoanalysis of society and Paul's political theology. Emphasis is on the issues of law, love, justice, community, and language. Readings include Freud and Paul, and theoretical essays by Taubes, Badiou, Santner, Agamben, Assmann, Zizek, and Boyarin. GER:DB-Hum

*3-5 units, not given this year*

## **GRADUATE COURSES IN GERMAN GENERAL**

### **GERGEN 206. Narrative, Visuality, Memory**

(Same as GERGEN 306) Moments in the history of the relationship between the verbal and the visual: the classical ars memoriae; the ekphrasis debates of the 18th century; the emergence of a new visuality and mnemonic art as structuring principles for modernist narrative. Authors include Plato, Aristotle, Cicero, Augustine, Winckelmann, Lessing, Diderot, Goethe, Moritz, Flaubert, Rilke, Joyce, and Proust.

*3-5 units, not given this year*

### **GERGEN 211. Theodor W. Adorno**

Adorno's work; his philosophical development from the 30s to the posthumous works of the late 60s. Focus is on his late works Negative Dialectics and Aesthetic Theory Attention to waypoints of his earlier development, such as his engagement with Heideggerian ontology, his developing thinking about Wagner, and his attitude to mass culture.

*3-5 units, Aut (Daub, A)*

### **GERGEN 229. German Cinema**

(Same as GERGEN 129) History of German cinema in the Weimar Republic, Nazi era, and the immediate aftermath of WWII. German thought, political valences, and social potential as portrayed in film.

*5 units, not given next year*

### **GERGEN 230. Truth in Art**

Does art disclose an ultimate truth or does it help people avoid, endure, or affirm a truth which would otherwise be hard to bear? How modern thinking about art is defined by the tension between the idea that pleasure in art is disinterested and outside striving for true knowledge or ethical orientation and the idea that art offers some kind of deeper insight into people's place in the world. How these tensions play out in Kant, Schopenhauer, Nietzsche, Heidegger, and Adorno. In English.

*3-5 units, not given this year*

### **GERGEN 246. Being at Home in the World: Kant's Critique of the Power of Judgment**

Close reading of Kant's influential attempt to show that humans

are at home in the world. How we establish order among the contingent contents of experience; aesthetic pleasure and its bearing on knowledge and morality; creative genius and 'common sense'; organic life; the relation between life of the mind and life of the body; the peculiarity of the human standpoint and the notion of an absolute, divine intellect. Critical responses from the 1790s to the present. Readings and discussion in English. For advanced undergraduate and graduate students.

3-5 units, Aut (Dornbach, M)

#### **GERGEN 248. A Brief History of Misogyny**

(Same as GERGEN 148) Genealogy of philosophical misogyny in 19th- and 20th-century German thought from German idealism. Authors include Schopenhauer, Nietzsche, Weininger, and the George circle. In English.

3-5 units, not given this year

#### **GERGEN 268A. Freud and the Enterprise of Psychoanalysis**

Psychoanalysis at the juncture of its multiple meanings as a therapeutic practice, a theory of the functioning of the human mind, a method of textual interpretation, a cultural critique, and a genealogy that accounts for the origins of morality, religion, art, and other social institutions. Readings include Freud's major works, and Nietzsche, Ferenczi, Lacan, Laplanche, de Certeau, Kristeva, and Irigaray.

3-5 units, Aut (Douvaldzi, C)

#### **GERGEN 270A. Postwar: German Culture after WW II**

(Same as GERGEN 170A) How did German culture react to WW II, the Holocaust, and the exile of Germans from E. Europe? Questions of representations, political debate, and the future of Germany in Europe. German cinema, architecture, and art related to the subject. Readings include: Adorno, Grass, Habermas, Kluge, Bachmann, Jelinek, and Beyer. Recommended: German, but not required.

3-5 units, not given this year

#### **GERGEN 283. Scenarios of Dissolution in the Modern Novel**

(Same as GERGEN 183) How do novels capture chaos? 20th-century novels responding to catastrophes such as: the disintegration of the Austro-Hungarian monarchy (Musil, Roth); demise of the Third Reich (Mann); chaotic forces in an oppressive order (Bulgakov); corrosion of imperial confidence through fear of barbarian invaders (Coetzee); and transformation of masses into a mob destroying the body politic from within (Krasznahorkai).

4 units, not given this year

#### **GERGEN 291A. Oedipus, Hamlet, Moses: Archetypes of the Hero**

Texts that provided psychoanalysis with its foundational myths. Oedipus, Moses, and Hamlet as archetypes of the hero related to moments of emerging modernity: from mythos to logos, polytheism to monotheism, and action to thought. The interplay among knowledge, recognition, and desire; the role of sameness and alterity in the constitution of personal, familial, and national identities; and the relation between violence and the construction of history. Readings include: Exodus, Sophocles, Shakespeare, Freud, Aeschylus, Euripides, Cavafy, Hofmannsthal, and Wolf; theoretical and critical essays by Laplanche, Lyotard, Lacan, de Certeau, Kofman, Assmann, Said, and Cavell.

3-5 units, Spr (Douvaldzi, C)

#### **GERGEN 306. Narrative, Visuality, Memory**

(Same as GERGEN 206) Moments in the history of the relationship between the verbal and the visual: the classical ars memoriae; the ekphrasis debates of the 18th century; the emergence of a new visuality and mnemonic art as structuring principles for modernist narrative. Authors include Plato, Aristotle, Cicero, Augustine, Winckelmann, Lessing, Diderot, Goethe, Moritz, Flaubert, Rilke, Joyce, and Proust.

3-5 units, not given this year

#### **GERGEN 367. Freud and the Apostle Paul**

(Same as GERGEN 267) Intersections between Freud's psychoanalysis of society and Paul's political theology. Emphasis is on the issues of law, love, justice, community, and language. Readings include Freud and Paul, and theoretical essays by Taubes, Badiou, Santner, Agamben, Assmann, Zizek, and Boyarin.

3-5 units, not given this year

## GERMAN LANGUAGE (GERLANG)

### UNDERGRADUATE COURSES IN GERMAN LANGUAGE

#### **GERLANG 1. First-Year German, First Quarter**

Speaking, reading, writing, and listening. Authentic materials. Interactive approach with emphasis on developing communicative expression. The cultural context in which German is spoken.

5 units, Aut (Strachota, K), Win (Staff), Spr (Nissler, P)

#### **GERLANG 2. First-Year German, Second Quarter**

Continuation of 1. Prerequisite 1 or equivalent.

5 units, Aut (Petig, W), Win (Strachota, K), Spr (Staff)

#### **GERLANG 3. First-Year German, Third Quarter**

Continuation of 2. Fulfills the University language requirement. Prerequisite 2 or equivalent.

5 units, Aut (Staff), Win (Staff), Spr (Petig, W)

#### **GERLANG 5A. Intensive First-Year German, Part A**

Equivalent of 1,2,3 combined. Stanford graduate students restricted to 9 units register for 205A,B.

5 units, Sum (McQueen, K)

#### **GERLANG 5B. Intensive First-Year German, Part B**

Continuation of 5A. Fulfills the University language requirement. Prerequisite 5A or equivalent. Stanford graduate students restricted to 9 units register for 205B.

5 units, Sum (Tsui, C)

#### **GERLANG 10. Elementary German for Seniors and Graduate Students**

Intensive. For students who need to acquire reading ability in German for the Ph.D. or for advanced research in their own field. 52 fulfills Ph.D. reading exam.

4 units, Win (Petig, W), Sum (Petig, W)

#### **GERLANG 11P. Individually Programmed Beginning German**

For those who wish to complete more or fewer than 5 units a quarter, have scheduling conflicts, or prefer to work independently. Self-paced work with text and tapes; instructor available for consultation on a regular basis. 3-unit minimum for beginners. Conversational practice available for additional unit.

1-12 units, Aut (Strachota, K), Win (Strachota, K), Spr (Petig, W)

#### **GERLANG 20A. Beginning German Conversation**

1 unit, Aut (McQueen, K), Win (Staff), Spr (Staff)

#### **GERLANG 20B. Intermediate German Conversation**

1 unit, Aut (McQueen, K), Win (Staff), Spr (Staff)

#### **GERLANG 20C. Advanced German Conversation**

1 unit, Aut (McQueen, K), Win (Staff), Spr (McQueen, K)

#### **GERLANG 20E. Fun Facts about Europe**

1 unit, Win (Staff)

#### **GERLANG 20K. Küche Mitt (German Cooking Class)**

1 unit, Aut (McQueen, K), Win (Staff), Spr (Staff)

#### **GERLANG 20M. Mitt Movie Series**

1 unit, Aut (McQueen, K), Win (Staff), Spr (Staff)

#### **GERLANG 20P. Theme Projects**

1 unit, Aut (McQueen, K), Win (Staff), Spr (Staff)

#### **GERLANG 20T. Teaching German Conversation**

1 unit, Aut (McQueen, K), Win (Staff), Spr (Staff)

#### **GERLANG 21. Intermediate German I**

Reading short stories, and review of German structure. Discussions in German, short compositions, videos.

4 units, Aut (Petig, W)

#### **GERLANG 21S. Intermediate German**

Reading short stories, and review of German structure. Discussions in German, short compositions, videos. Prerequisite: one year of college German; or two years high school German or equivalent, or AP German.

4 units, Sum (Petig, W)

#### **GERLANG 21W. Intermediate German I: German for Business and International Relations**

Equivalent to 21, but focus is on business and the political and economic geography of Germany. CDs and videos. For students

planning to do a business internship in a German-speaking country. Prerequisite: 3.

4 units, Aut (Staff)

### **GERLANG 22. Intermediate German II**

Continuation of 21, with greater emphasis on reading and writing skills. Literary texts of major 20th-century writers in historical context.

4 units, Win (Petig, W)

### **GERLANG 22W. Intermediate German II: German for Business and International Relations**

Equivalent to 22, but continuation of 21W. Recommended for students planning to do a business internship in a German-speaking country. Prerequisite: 21 or 21W.

4 units, alternate years, not given this year

### **GERLANG 52. Readings in Humanities**

For undergraduates and graduate students with a knowledge of German who want to acquire reading proficiency. Readings from scholarly works and professional journals. Recommended for students who need to pass the Ph.D. reading exam. Prerequisite: one year of German, or 10, or equivalent.

4 units, Spr (Petig, W)

### **GERLANG 99. Language Specials**

Prerequisite: consent of instructor.

1-12 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

### **GERLANG 100. Hundert Deutsche Jahre: One Hundred German Years**

Hones German language skills while introducing the history and culture of Germany as experienced by ordinary people over the course of the 20th century. Themes include Germans and democracy, money, Hitler, books, the Wall, and food. Video series, parallel readings, discussion in German. Extra listening, reading, or speaking for fourth unit.

3-4 units, Win (Strachota, K)

### **GERLANG 101. Advanced Language Study I**

Short fictional and expository readings, discussions, compositions. Review of grammatical structures. Vocabulary building with emphasis on common idiomatic expressions and troublesome lexical distinctions.

3-4 units, Aut (Staff)

### **GERLANG 102. Advanced Language Study II**

Continuation of 101.

3-4 units, Spr (Staff)

### **GERLANG 105. Advanced Business German**

For students planning to work in a German-speaking country and for preparation of the International Business German exams. Case studies of typical business situations with accompanying videos, listening comprehension exercises, and class simulations. Business correspondence and reports in German. Prerequisite: 22 or equivalent.

4 units, Spr (Petig, W)

### **GERLANG 110. German Newspapers**

For intermediate and advanced students. Articles from current newspapers and magazines, reading comprehension strategies with online news updates, and vocabulary. Writing practice if desired. May be repeated once for credit

3-4 units, not given this year

### **GERLANG 111. Television News from Germany**

For intermediate and advanced students. Current news reports and features for listening comprehension and vocabulary. Extra listening, speaking, or writing practice for fourth unit.

3-4 units, Aut (Strachota, K)

### **GERLANG 199. Individual Reading**

Prerequisite: consent of instructor.

1-12 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

## **GRADUATE COURSES IN GERMAN LANGUAGE**

### **GERLANG 205A. Intensive First-Year German**

Equivalent of 1,2,3 combined. Stanford graduate students restricted to 9 units may take 205A and B for a total of 9 units.

4-5 units, Sum (Staff)

### **GERLANG 210. Elementary German for Graduate Students**

Restricted to Stanford graduate students. Prerequisite: consent of instructor.

3-4 units, Sum (Staff)

### **GERLANG 395. Graduate Studies in German**

Prerequisite: consent of instructor.

2-5 units, Aut (Staff), Win (Staff), Spr (Staff)

### **GERLANG 399. Independent Study**

Prerequisite: consent of instructor.

1-6 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

## **GERMAN LITERATURE (GERLIT)**

### **UNDERGRADUATE COURSES IN GERMAN LITERATURE**

#### **GERLIT 16N. Music, Myth, and Modernity: Wagner's Ring Cycle and Tolkien's Lord of the Rings**

(F,Sem) (Same as MUSIC 16N) Stanford Introductory Seminar. Preference to freshmen. Roots of Wagner's operatic cycle and Tolkien's epic trilogy in a common core of Norse, Germanic, and Anglo-Saxon mythology. The role of musical motive and characterization in Wagner's music dramas and the film version of Tolkien's trilogy. Music as a key element in the psychological, political, and cultural revision of ancient myth in modern opera and film. GER:DB-Hum, EC-GlobalCom

3 units, Spr (Grey, T)

#### **GERLIT 120Q. Is God Dead?**

(S,Sem) (Same as COMPLIT 50Q) Stanford Introductory Seminar. A consideration of Nietzsche's claim that God is dead in relation to other texts of German literature and philosophy. The status of religious faith in relation to modernity and secularization; religion and science; culture and faith. Readings in German include selections from sacred and liturgical texts; fictional depictions of religious experience; religion in poetry; German theories of religion. Authors to be studied include Rilke, Hesse, Weiss, Schöder, Buber, Sachs, Haecker, Weber, Taubes, Ratzinger. GER:DB-Hum

3-5 units, Win (Berman, R)

#### **GERLIT 121. The Viennese Coffeehouse**

Cultural and literary significance of fin de siècle Vienna's enduring symbol, the coffeehouse. What was the function of the café in aesthetic, literary, and political debates central to Vienna at the turn of the century? How did coffeehouse and newspaper culture influence developments in modernist prose? Texts by Hermann Bahr, Arthur Schnitzler, Karl Kraus, Peter Altenberg, Felix Salten, Sigmund Freud, Egon Friedell and Alfred Polgar, in English translation; German texts available.

3-5 units, Aut (McQueen, K)

#### **GERLIT 123N. The Brothers Grimm and Their Fairy Tales**

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Historical, biographical, linguistic, and literary look at the Kinder- und Hausmärchen of Jacob and Wilhelm Grimm. Readings from the fairy tales, plus materials in other media such as film and the visual arts. Small group performances of dramatized fairy tales. In German. Prerequisite: GERLANG 3 or equivalent. GER:DB-Hum, WIM

4 units, Spr (Robinson, O)

#### **GERLIT 127. Uncanny Literature in the Nineteenth Century**

From ghost children and animated statues, the walking dead to machine women and doppelgangers, 19th-century German literature teems with things that go bump in the night. The history of this tradition of fantastic literature in Germany, its origins, main authors, and defining features. Authors include E.T.A. Hoffmann, Wilhelm Hauff, Friedrich Schiller, Joseph von Eichendorff and Jeremias Gotthelf. Readings and writing in German. GER:DB-Hum

4 units, not given this year

#### **GERLIT 127A. The German Ballad**

This course charts the history of the German ballad, from Goethe and Schiller, to Romantic and Realist poets - additional reading will attempt to contextualize the German ballad in the European context. Musical ballads and song arrangements will also be considered. WIM

3-4 units, Aut (Daub, A)

**GERLIT 129. The German Novella**

Authors such as Kleist, Eichendorff, E.T.A. Hoffmann, Goethe, Keller, Fontane, and Thomas Mann. Focus is on structural-textual elements such as event, situation, conflict, symbol, and turning point as well as questions concerning order, chaos, contingency, the relation between fiction and reality, and ostracism. Readings in German include novellas such as *Das Erdbeben in Chili*, *Das Marmorbild*, *Mario und der Zauberer*, *Traumnovelle*, *Die Taube*, *Im Krebsgang*.

3-5 units, *Aut (Shamel, M)*

**GERLIT 130. Brecht and Modern Aesthetics**

Bertolt Brecht's poetic and dramatic works, and analysis of his contribution to modern paradigms of poetic and dramatic practice. Readings in German include poetry, dramas such as *Baal*, *Im Dickicht der Staedte*, *Die Dreigroschenoper*, *Aufstieg und Fall der Stadt Mahagonny*, *Mutter Courage und ihre Kinder*, and theoretical writings on lyric poetry and drama.

3-3 units, *Spr (Shamel, M)*

**GERLIT 131. Goethe: Poetic Vision and Vocation in the Age of Reason**

Introduction to Goethe's major works, reading across genres of poetry, drama, the novel, and autobiography; critical writings on art, nature, and aesthetics. Central trends in Goethe's thought; the interrelatedness of poetic vision and philosophical thinking in his works. Goethe in relation to other intellectual and philosophical movements of the period, including romanticism. GER:DB-Hum

3-5 units, *not given next year*

**GERLIT 131A. Immigrant/Minority Literature and the Emergence of Multiculturalism in Germany**

Immigrant culture and literature in Germany across genres, including stories, drama, memoirs, and film. What do immigrants in Germany write about? What role does immigrant literary culture play in the formation of notions of cultural difference and dialogue? How do the dynamics of ethnic and cultural diversity influence concepts and notions of culture and nationhood in Germany? GER:DB-Hum

3 units, *not given this year*

**GERLIT 131B. German Lyric and the Oriental Tradition**

German lyric and Oriental models: German poets' encounter with Persian and Arab literary culture; adaptation and transformation of poetic forms and stories; theories of lyric. Readings include poets such as Goethe (*West-oesstlicher Divan*), Rueckert (*Oestliche Rosen*), Platen (*Ghaselen*), and Heine (selected poems) as well as Hafiz (selected poems in German translation). The course will focus on the development of informed reading skills through close analysis of poems and will explore the idea of lyric poetry as a trans-cultural and trans-national phenomenon as well as lyric's relationship to music both in the context of Germany and the Orient. GER:DB-Hum

3-5 units, *Win (Shamel, M)*

**GERLIT 133Q. Modernism and Fiction**

Preference to sophomores. Innovative ideas and narrative forms in German modernism. International and specifically German features. Problems of narration. Texts such as Musil's *Törless*, Mann's *Tod in Venedig*, Kafka's *Die Verwandlung*, and Broch's *Pasenow*. Close reading technique. Prerequisite: reading knowledge of German. GER:DB-Hum

4 units, *not given this year*

**GERLIT 135. Outsiders and Outcasts: introduction to German Prose Fiction**

Close reading and discussion of literary works by Hebel, Tieck, Kleist, Hoffmann, Heine, Keller, Storm, R. Walser, and Kafka. Attention paid to writers' divergent responses to the artistic, ethical, and political challenges of modernity. Readings, discussion, and writing assignments in German; length of assignments adjusted to students' linguistic competence. Prerequisite: German language sequence at Stanford or equivalent. GER:DB-Hum, WIM

4 units, *Win (Dornbach, M)*

**GERLIT 136. Berlin Topographies in the 20th Century**

Development of Berlin's spatial imaginaries from the boulevards of the late 19th century to the Weimar Republic's urban agendas, and to the repeated reconstructions by the Nazis, the GDR and Berlin Republic. Sources: Walter Benjamin, Siegfried Kracauer, Berthold Brecht, Peter Weiss, Mascha Kaleko, Peter Schneider,

Blixa Bargeld, Wolf Biermann, Christoph Hein, Monika Maron, Thomas Hetteche, and Wim Wenders. In German. GER:DB-Hum

4 units, *not given this year*

**GERLIT 137. Introduction to German Poetry**

Major poets writing in German including Gryphius, Goethe, Hölderlin, Novalis, Eichendorff, Heine, Rilke, Lasker-Schüler, Trakl, Benn, Celan, Brecht, Enzensberger, and Falkner. Close reading technique. Interpretive tools and theoretical concepts. Poetic form, voice, figural language, and the interaction of sensory registers. In German. GER:DB-Hum

4 units, *not given this year*

**GERLIT 138. Introduction to Germanic Languages**

(Same as GERGEN 38A) The oldest attested stages of the Germanic language family, including Gothic, Old Norse, Old Saxon, Old English, Old Frisian, Old Low Franconian (Old Dutch), and Old High German. The linguistic interrelationships, prehistory, Germanic tribal groupings, and literature. GER:DB-Hum

4 units, *not given this year*

**GERLIT 139. Love, Marriage and Passion in German Literature of the 19th and 20th Centuries**

(Same as GERLIT 339) The thesis that love relationships, in shifting social, cultural, and communication contexts, reflect and determine the dominant value system of a society. How the concepts of romantic, passionate, and pragmatic love evolved and competed with one another in texts by Goethe, Schlegel, Keller, Sacher-Masoch, Fontane, and Böll. In German. GER:DB-Hum

3-5 units, *not given this year*

**GERLIT 148. Heart to Heart: Theories of Expression at the Turns of Two Centuries**

(Same as GERLIT 248) Paradigms of expression around 1800 and 1900, from *Empfindsamkeit* (sensitivity) to German Expressionism. The heart that overflows into speech in the works of Klopstock, Goethe, Tieck, and Kleist, and the reformulation a century later of this idea as *avant garde* practice and modernist credo. Readings of poets, philosophers, and artists on relationships between inside and out, heart and voice, emotion and language, and self and art. Discussion in English. GER:DB-Hum

3-5 units, *not given this year*

**GERLIT 151. German Underworlds**

(Same as GERLIT 251) German theories about what lies beneath: is it hell or the subterranean foundations that keep the world from collapsing? Cosmic architecture and the question of the inferno in Kant, Novalis, Wagner, Marx, Freud, Kafka, and the films of Fritz Lang.

3-5 units, *not given this year*

**GERLIT 163. Readings in 19th-Century German Literature**

(Same as GERLIT 263) Works by Goethe, Tieck, Kleist, Hoffmann, Heine, Büchner, Grillparzer, Droste-Hülshoff, Stifter, and Keller. Their divergent responses to artistic, ethical, and political challenges of modernity. Prerequisite: GERLANG 3 or equivalent. In German. GER:DB-Hum

4 units, *not given this year*

**GERLIT 177. Downright DEFA: Films from the German Democratic Republic**

Against the backdrop of the 20th anniversary of the opening of the Berlin Wall on November 9, this film series will be an exercise in projected memory, conjuring the 'First Workers' and Farmers' State on German Soil' through the images of its state film production agency, the DEFA. The films selected are a diverse and telling sampling of DEFA's best.

1 unit, *Aut (Kramer, K)*

**GERLIT 189A. Honors Research**

Senior honors students enroll for 5 units in Winter while writing the honors thesis, and may enroll in 189B for 2 units in Spring while revising the thesis. Prerequisite: DLCL 189.

5 units, *Win (Staff)*

**GERLIT 189B. Honors Research**

Open to juniors with consent of adviser while drafting honors proposal. Open to senior honors students while revising honors thesis. Prerequisites for seniors: 189A, DLCL 189.

2 units, *Spr (Staff)*

**GERLIT 197. Theories of Art after Idealism**

(Same as GERLIT 297) Key responses to the failure of idealism to

integrate artistic creation and aesthetic experience into a philosophical system. Works by Schopenhauer, Kierkegaard, Nietzsche, Dilthey, and Lukács.

3-5 units, not given this year

**GERLIT 199. Independent Reading**

36 hours of reading per unit, weekly conference with instructor. May be repeated for credit. Prerequisite: consent of instructor.

1-10 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**GERLIT 206. Narrative, Visuality, Memory**

(Same as GERLIT 306) Moments in the history of the relationship between verbal and visual: the classical *ars memoriae*; the ekphrasis debates of the 18th century; and the emergence of a new visuality and mnemonic art as structuring principles for modernist narrative. Authors include Plato, Aristotle, Cicero, Augustine, Winkelmann, Lessing, Diderot, Goethe, Moritz, Flaubert, Rilke, and Proust. GER:DB-Hum

3-5 units, not given this year

**GERLIT 223. Literary Diaries of Classic Modernity**

(Same as COMPLIT 223) Focus is on self-analysis in works of key modern writers. Since Montaigne's *Essais* and Rousseau's *Confessions*, analysis of the self has been a central topic for modern literature. Texts include Baudelaire's *Intimate Journals*, Kafka's *Diaries*, Gide's *Journals*, Woolf's *Moments of Being*, Benjamin's *Berlin Childhood*, and Pavese's *Diaries*. Analysis of the self as polarizing between the imagination of a utopian childhood and self-deprivation.

3-5 units, Spr (Bohrer, C)

**GERLIT 241. Deutsche Geistesgeschichte I: German Aesthetic Thought, 1790-1872**

The seminal tradition of writing about art including the German idealists (Kant, Schelling, Hegel, and Schiller), romantics (Schlegel, Novalis, and Hoffmann), and Schopenhauer, Kierkegaard, and Nietzsche. In English. GER:DB-Hum

4 units, not given this year

**GERLIT 242. Narrative and Ethics**

(Same as COMPLIT 226) Major terms of narratology; how different literary, cinematic, and popular culture narratives raise ethical issues, stir public debates and contribute to understanding human values. Readings include Biblical texts, *Antigone*, Kleist, Kafka, Coetzee, *V for Vendetta*, *South Park*, Kant, Arendt, Nussbaum, Rorty, and Levinas.

3-5 units, Win (Eshel, A)

**GRADUATE COURSES IN GERMAN LITERATURE**

**GERLIT 217. Hölderlin's Poetry**

(Same as COMPLIT 217) A discussion of key poems by Friedrich Hölderlin with regard to themes including the utopian fatherland as mythological landscape; the idea of the Greek gods; the concept of poetry as event; and the emphatic "now". The seminar also explores the relationship between the philosophy of history and poetic metaphor.

3-5 units, Spr (Bohrer, C)

**GERLIT 219. German Utopias and Dystopias in the 20th Century**

This course investigates the fraught relationship of Geist and politics in 20th century visions of a utopian republic of letters, mostly from Germany's conservative intellectuals: The George-circle's idea of a 'secret Germany,' the 'conservative revolution' of Hugo von Hofmannsthal, Mann's *Reflections of a Non-Political Man* are the most influential such attempts at an aesthetic politics. Other texts instead interrogate and at times parody their attempts, for instance Hesse's *Glass Bead Game* and Arno Schmidt's *Egghead Republic*.

3-5 units, Win (Daub, A)

**GERLIT 246. Memory, History, and the Contemporary Novel**

(Same as COMPLIT 221) How the watershed events of the 20th century, the philosophic linguistic turn, and the debate regarding the end of history left their mark on the novel. How does the contemporary novel engage with the past? How does its interest in memory and history relate to late- or postmodern culture of time or to political and ethical concerns? Novels by Toni Morrison, W. G. Sebald, J. M. Coetzee, Kazuo Ishiguro, and A. B. Yehoshua; theo-

retical works by Nietzsche, Freud, Heidegger, Hannah Arendt, Walter Benjamin, Fredric Jameson, Paul Ricoeur, Avishai Margalit, and Walter Benn Michaels.

3-5 units, not given this year

**GERLIT 248. Heart to Heart: Theories of Expression at the Turns of Two Centuries**

(Same as GERLIT 148) Paradigms of expression around 1800 and 1900, from *Empfindsamkeit* (sensitivity) to German Expressionism. The heart that overflows into speech in the works of Klopstock, Goethe, Tieck, and Kleist, and the reformulation a century later of this idea as *avant garde* practice and modernist credo. Readings of poets, philosophers, and artists on relationships between inside and out, heart and voice, emotion and language, and self and art. Discussion in English.

3-5 units, not given this year

**GERLIT 250A. Modern Drama**

Problems of drama as genre, especially in relationship to problems of modernism. Transitions from classical and popular theater. New structures of action and conflict; epic theater; competition with film; transformed theatrical practices. Authors: Nestroy, Hauptmann, Hofmannsthal, Brecht, and Horvath. (Satisfied by enrollment in GERLIT 369 in 2008-09.)

3-5 units, not given this year

**GERLIT 250B. German Romanticism and Its Repercussions**

Works by Novalis, the Schlegel brothers, Tieck, Wackenroder, Hoffmann, Klingemann. Theory of the subject; transformative politics and conservative-religious retreat into inwardness; the fragment form and the novel; reflection, play, irony; the productive self-movement of language; the hieroglyph of nature; animating effects of Romantic desire and its impasses; interactions among literature, music, and painting. Ambivalent and critical responses to Romanticism (Hegel, Heine, Nietzsche) and recent revivals (Benjamin, Lacoue-Labarthe, Nancy, and Frank). Readings in German, discussion in English.

3-5 units, not given this year

**GERLIT 250C. Postwar German Culture and Thought: 1945 to the Present**

How German culture and thought confronted the legacy of National Socialism, German guilt, and the possibility of a new beginning. German culture and the memory of communism (the German Democratic Republic) after 1989. Fiction of Thomas Mann, Gunter Grass, Alexander Kluge, and Hans Ulrich Treichel; poetry of Paul Celan and Ingeborg Bachmann; philosophical essays of Martin Heidegger, Theodor Adorno, Jürgen Habermas; films of Rainer Werner Fassbinder, Florian Henkel (*The Life of Others*), and Oliver Hirschbiegel (*Downfall*).

3-5 units, Spr (Eshel, A)

**GERLIT 251. German Underworlds**

(Same as GERLIT 151) German theories about what lies beneath: is it hell or the subterranean foundations that keep the world from collapsing? Cosmic architecture and the question of the inferno in Kant, Novalis, Wagner, Marx, Freud, Kafka, and the films of Fritz Lang.

3-5 units, not given this year

**GERLIT 255. Middle High German**

Introduction to medieval German language and culture. Readings include Hartmann von Aue and Gottfried von Strassburg; genres include Minnesang, epic, and romance. Grammar review; emphasis is on rapid and accurate reading.

3-5 units, not given this year

**GERLIT 256. Old High German**

Introduction to the grammar and the texts of the earliest attested stage of high German

3-4 units, not given this year

**GERLIT 257. Gothic**

Introduction to the grammar, texts, and history of this earliest extensively-documented Germanic language, a relative of German and English. Issues surrounding the Germanic parent language.

4 units, not given this year

**GERLIT 258. German Dialects**

Linguistic characteristics of dialect areas. History of the study of language variation in Germany; traditional dialect grammars; dialect-geographical revolution; and insights of modern sociolinguistics.

tics. Sources include native speakers, professionally-made tapes with transcripts, and secondary readings.

3-4 units, *Win (Robinson, O)*

**GERLIT 263. Readings in 19th-Century German Literature** (Same as GERLIT 163) Works by Goethe, Tieck, Kleist, Hoffmann, Heine, Büchner, Grillparzer, Droste-Hülshoff, Stifter, and Keller. Their divergent responses to artistic, ethical, and political challenges of modernity. Prerequisite: GERLANG 3 or equivalent. In German.

4 units, *not given this year*

**GERLIT 297. Theories of Art after Idealism**

(Same as GERLIT 197) Key responses to the failure of idealism to integrate artistic creation and aesthetic experience into a philosophical system. Works by Schopenhauer, Kierkegaard, Nietzsche, Dilthey, and Lukács.

3-5 units, *not given this year*

**GERLIT 298. Individual Work**

Open only to German majors and to students working on special projects, including written reports for internships. Honors students use this number for the honors essay. May be repeated for credit.

1-15 units, *Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

**GERLIT 306. Narrative, Visuality, Memory**

(Same as GERLIT 206) Moments in the history of the relationship between verbal and visual: the classical *ars memoriae*; the ekphrasis debates of the 18th century; and the emergence of a new visuality and mnemonic art as structuring principles for modernist narrative. Authors include Plato, Aristotle, Cicero, Augustine, Winkelmann, Lessing, Diderot, Goethe, Moritz, Flaubert, Rilke, and Proust.

3-5 units, *not given this year*

**GERLIT 339. Love, Marriage and Passion in German Literature of the 19th and 20th Centuries**

(Same as GERLIT 139) The thesis that love relationships, in shifting social, cultural, and communication contexts, reflect and determine the dominant value system of a society. How the concepts of romantic, passionate, and pragmatic love evolved and competed with one another in texts by Goethe, Schlegel, Keller, Sacher-Masoch, Fontane, and Böll. In German.

3-5 units, *not given this year*

**GERLIT 369. Introduction to Graduate Studies: Criticism as Profession**

(Same as COMPLIT 369, FRENGEN 369, ITALGEN 369) Major texts of modern literary criticism in the context of professional scholarship today. Readings of critics such as Lukács, Auerbach, Frye, Ong, Benjamin, Adorno, Szondi, de Man, Abrams, Bourdieu, Vendler, and Said. Contemporary professional issues including scholarly associations, journals, national and comparative literatures, university structures, and career paths.

5 units, *Aut (Berman, R)*

**GERLIT 399. Independent Study**

1-15 units, *Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

**GERLIT 400. Dissertation Research**

For graduate students in German working on dissertations only.

1-12 units, *Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

## HEALTH RESEARCH AND POLICY (HRP)

### UNDERGRADUATE COURSES IN HEALTH RESEARCH AND POLICY

**HRP 89Q. Introduction to Cross Cultural Issues in Medicine**

(S,Sem) Stanford Introductory Seminar. Preference to sophomores. Introduction to social factors that impact health care delivery, such as ethnicity, immigration, language barriers, and patient service expectations. Focus is on developing a framework to understand culturally unique and non-English speaking populations in the health care system. GER:EC-AmerCul

3 units, *Win (Corso, I)*

**HRP 199. Undergraduate Research**

Students undertake investigations sponsored by individual faculty members. Prerequisite: consent of instructor.

1-18 units, *Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

## GRADUATE COURSES IN HEALTH RESEARCH AND POLICY

**HRP 207. Introduction to Concepts and Methods in Health Services and Policy Research I**

Primarily for medical students in the Health Services and Policy Research scholarly concentration. Topics include health economics, statistics, decision analysis, study design, quality measurement, cost benefit and effectiveness analysis, and evidence based guidelines.

2 units, *Aut (Haberland, C)*

**HRP 208. Introduction to Concepts and Methods in Health Services and Policy Research II**

Primarily for medical students in the Health Services and Policy Research scholarly concentration; continuation of 207. Topics include health economics, statistics, decision analysis, study design, quality measurement, cost benefit and effectiveness analysis, and evidence based guidelines. Recommended: 207.

2 units, *Win (Haberland, C)*

**HRP 209. FDA's Regulation of Health Care**

(Same as LAW 458) Open to law and medical students; other graduate students by consent of instructor. The FDA's regulatory authority over drugs, biologics, medical devices, and dietary supplements. The nature of the pharmaceutical, biotech, medical device, and nutritional supplement industries.

2-3 units, *not given this year*

**HRP 210. Health Law and Policy**

(Same as Law 313) Open to law or medical students; other graduate students by consent of instructor. Focus this term is on the American health care financing system and its reform, how the present system works, diagnosing where it does not work, and exploring how it might be improved.

3 units, *Aut (Greely, H)*

**HRP 211. Law and the Biosciences**

(Same as LAW 368) Legal, social, and ethical issues arising from advances in neuroscience, including effects upon law and society through improvements in predicting illnesses and behaviors, reading minds through neuroimaging, understanding responsibility and consciousness, treating criminal behavior, cognitive enhancement.

3 units, *not given this year*

**HRP 212. Crosscultural Medicine**

Developing interviewing and behavioral skills needed to facilitate culturally relevant health care across all population groups. Discussions focus on explicit and implicit cultural influences operating in formal and informal medical contexts.

3 units, *Spr (Corso, I)*

**HRP 214. Scientific Writing**

Step-by-step through the process of writing and publishing a scientific manuscript. How to write effectively, concisely, and clearly. Preparation of an actual scientific manuscript. Students are encouraged to bring a manuscript on which they are currently working to develop and polish throughout the course.

2-3 units, *Win (Sainani, K)*

**HRP 215. Scientific Writing for Basic and Translational Scientists**

How to write clearly, concisely, and effectively. Focus is on the process of writing and publishing a scientific manuscript. Not intended for Epidemiology graduate students.

2-3 units, *Sum (Sainani, K)*

**HRP 216. Analytical and Practical Issues in the Conduct of Clinical and Epidemiologic Research**

Topics include: advanced aspects of study design and data analyses; development of health measurement instruments; methods of summarizing literature and quantifying effect sizes; and multivariable nature of health events in human populations. 3 units requires a term paper. Prerequisites: 225, and 258 or 261, or consent of instructor.

2-3 units, *Spr (Staff)*

**HRP 220. Biotechnology Law and Policy**

(Same as LAW 440) Open to law or medical students; other graduate students by consent of the instructor. Focus is on the biotechnology industry, with some discussion of the med tech or medical device industry and the pharmaceutical industry. The life cycle of a biotech firm, from a good idea to a start-up company to FDA approval and beyond. Guest speakers. Group project making law and business recommendations about a biotech firm.

3 units, Spr (Greely, H)

**HRP 221. Law and the Biosciences: Genetics**

(Same as LAW 480) Open to all law or medical students; other graduate students by consent of the instructor. Ethical, legal, and social issues arising primarily from advances in knowledge of human genetics. May also include a section on stem cell research.

3 units, Spr (Greely, H)

**HRP 223. Epidemiologic Analysis: Data Management and Statistical Programming**

The skills required for management and analysis of biomedical data. Topics include importing and exporting data from multiple database systems, visualizing and cleaning data, data management for multicenter projects, and data security. Introduction to applied statistical programming relevant to epidemiologic and clinical research. No previous programming experience required.

2-3 units, Aut (Balise, R)

**HRP 225. Design and Conduct of Clinical and Epidemiologic Studies**

Intermediate-level. The skills to design, carry out, and interpret epidemiologic studies, particularly of chronic diseases. Topics: epidemiologic concepts, sources of data, cohort studies, case-control studies, cross-sectional studies, sampling, estimating sample size, questionnaire design, and the effects of measurement error. Prerequisite: A basic/introductory course in statistics or consent of instructor.

3-4 units, Aut (Popat, R)

**HRP 226. Advanced Epidemiologic and Clinical Research Methods**

Principles of measurement, measures of effect, confounding, effect modification, and strategies for minimizing bias in clinical and epidemiologic studies. Prerequisite: 225 or consent of instructor.

3-4 units, Win (Nelson, L)

**HRP 228. Genetic Epidemiology**

Reading of seminal papers in genetic epidemiology. Topics include human genetic variation, genetics of complex diseases, genome-wide association studies, and new genomic technologies. Provides a background for clinicians, epidemiologists, and other scientists to incorporate the study of genetic factors into human disease research. Prerequisite: HRP 225 or consent of instructor.

2 units, Spr (Staff)

**HRP 229. Methods in Chronic Disease Epidemiology**

Descriptive epidemiology and sources of incidence and mortality data; biological bases of neurological, musculoskeletal, cardiovascular, and other chronic diseases except cancer; methodological and analytic issues relevant to chronic epidemiologic research; causal inference; major environmental risk factors; genetic susceptibility; and examples of current research and critiques of literature. Prerequisite: 225 or consent of instructor.

2-3 units, alternate years, not given this year

**HRP 230. Cancer Epidemiology**

Descriptive epidemiology and sources of incidence/mortality data; the biological basis of carcinogenesis and its implications for epidemiologic research; methodological issues relevant to cancer research; causal inference; major environmental risk factors; genetic susceptibility; cancer control; examples of current research; and critique of the literature. 3 units requires paper or project. Prerequisite: 225, or consent of instructor.

2-3 units, Win (Staff)

**HRP 231. Epidemiology of Infectious Diseases**

Principles of the transmission of the infectious agents (viruses, bacteria, rickettsiae, mycoplasma, fungi, and protozoan and helminth parasites). The role of vectors, reservoirs, and environmental factors. Pathogen and host characteristics that determine the spectrum of infection and disease. Endemicity, outbreaks, and epidemics of selected infectious diseases. Principles of control and surveillance.

3 units, Win (Staff)

**HRP 236. Epidemiology Research Seminar**

Weekly forum for ongoing epidemiologic research by faculty, staff, guests, and students, emphasizing research issues relevant to disease causation, prevention, and treatment. May be repeated for credit.

1 unit, Aut (Henderson, V), Win (West, D), Spr (Whittemore, A)

**HRP 238. Genes and Environment in Disease Causation: Implications for Medicine and Public Health**

(Same as HUMBIO 159) The historical, contemporary, and future research and practice among genetics, epidemiology, clinical medicine, and public health as a source of insight for medicine and public health. Genetic and environmental contributions to multifactorial diseases; multidisciplinary approach to enhancing detection and diagnosis. The impact of the Human Genome Project on analysis of cardiovascular and neurological diseases, and cancer. Ethical and social issues in the use of genetic information. Prerequisite: basic course in genetics; for undergraduates, Human Biology core or equivalent or consent of instructor.

2-3 units, Win (Popat, R)

**HRP 239. Understanding Statistical Models and their Social Science Applications**

(Same as EDUC 260X, STATS 209) Critical examination of statistical methods in social science applications, especially for cause and effect determinations. Topics: path analysis, multilevel models, matching and propensity score methods, analysis of covariance, instrumental variables, compliance, longitudinal data, mediating and moderating variables. See <http://www-stat.stanford.edu/~rag/stat209>. Prerequisite: intermediate-level statistical methods

3 units, Win (Rogosa, D)

**HRP 251. Design and Conduct of Clinical Trials**

The rationale for phases 1-3 clinical trials, the recruitment of subjects, techniques for randomization, data collection and endpoints, interim monitoring, and reporting of results. Emphasis is on the theoretical underpinnings of clinical research and the practical aspects of conducting clinical trials.

3 units, Spr (Henderson, V; Lavori, P)

**HRP 252. Outcomes Analysis**

(Same as BIOMEDIN 251) Methods of conducting empirical studies which use large existing medical, survey, and other databases to ask both clinical and policy questions. Econometric and statistical models used to conduct medical outcomes research. How research is conducted on medical and health economics questions when a randomized trial is impossible. Problem sets emphasize hands-on data analysis and application of methods, including re-analyses of well-known studies. Prerequisites: one or more courses in probability, and statistics or biostatistics.

3 units, Spr (Bhattacharya, J)

**HRP 256. Economics of Health and Medical Care**

(Same as BIOMEDIN 156, BIOMEDIN 256, ECON 126) Graduate students with research interests should take ECON 248. Institutional, theoretical, and empirical analysis of the problems of health and medical care. Topics: institutions in the health sector; measurement and valuation of health; nonmedical determinants of health; medical technology and technology assessment; demand for medical care and medical insurance; physicians, hospitals, and managed care; international comparisons. Prerequisites: ECON 50 and ECON 102A or equivalent statistics. Recommended: ECON 51.

5 units, Aut (Bhattacharya, J)

**HRP 258. Introduction to Probability and Statistics for Clinical Research**

Open to medical and graduate students; required of medical students in the Clinical Research Scholarly Concentration. Tools to evaluate medical literature. Topics include random variables, expectation, variance, probability distributions, the central limit theorem, sampling theory, hypothesis testing, confidence intervals, correlation, regression, analysis of variance, and survival analysis.

3 units, Spr (Sainani, K)

**HRP 259. Introduction to Probability and Statistics for Epidemiology**

Topics: random variables, expectation, variance, probability distributions, the central limit theorem, sampling theory, hypothesis testing, confidence intervals. Correlation, regression, analysis of

variance, and nonparametric tests. Introduction to least squares and maximum likelihood estimation. Emphasis is on medical applications.

4-5 units, Aut (Sainani, R)

**HRP 260A. Workshop in Biostatistics**

(Same as STATS 260A) Applications of statistical techniques to current problems in medical science.

1-2 units, Aut (Olshen, R)

**HRP 260B. Workshop in Biostatistics**

(Same as STATS 260B) Applications of statistical techniques to current problems in medical science.

1-2 units, Win (Olshen, R)

**HRP 260C. Workshop in Biostatistics**

(Same as STATS 260C) Applications of statistical techniques to current problems in medical science.

1-2 units, Spr (Olshen, R)

**HRP 261. Intermediate Biostatistics: Analysis of Discrete Data**

(Same as BIOMEDIN 233, STATS 261) Methods for analyzing data from case-control and cross-sectional studies: the 2x2 table, chi-square test, Fisher's exact test, odds ratios, Mantel-Haenzel methods, stratification, tests for matched data, logistic regression, conditional logistic regression. Emphasis is on data analysis in SAS. Special topics: cross-fold validation and bootstrap inference.

3 units, Win (Sainani, K)

**HRP 262. Intermediate Biostatistics: Regression, Prediction, Survival Analysis**

(Same as STATS 262) Methods for analyzing longitudinal data. Topics include Kaplan-Meier methods, Cox regression, hazard ratios, time-dependent variables, longitudinal data structures, profile plots, missing data, modeling change, MANOVA, repeated-measures ANOVA, GEE, and mixed models. Emphasis is on practical applications. Prerequisites: basic ANOVA and linear regression.

3 units, Spr (Staff)

**HRP 280. Spanish for Medical Students**

(Same as SPANLANG 121M) Goal is a practical and culturally appropriate command of spoken Spanish. Emphasis is on taking the medical history. Topics include the human body, hospital procedures, diagnostics, food, and essential doctor-patient phrases when dealing with Spanish-speaking patients. Series can be taken independently, depending on the level of prior knowledge.

3 units, Aut (Corso, I)

**HRP 281. Spanish for Medical Students**

(Same as SPANLANG 122M) Goal is a practical and culturally appropriate command of spoken Spanish. Emphasis is on performing a physical examination. Topics include the human body, hospital procedures, diagnostics, food, and essential doctor-patient phrases when dealing with Spanish-speaking patients. Series can be taken independently, depending on the level of prior knowledge.

3 units, Win (Corso, I)

**HRP 282. Spanish for Medical Students**

(Same as SPANLANG 123M) Goal is a practical and culturally appropriate command of spoken Spanish. Emphasis is on different specialties and medical conditions. Topics include the human body, hospital procedures, diagnostics, food, and essential doctor-patient phrases when dealing with Spanish-speaking patients. Series can be taken independently, depending on the level of prior knowledge.

3 units, Spr (Corso, I)

**HRP 283. Health Services Research Core Seminar**

Presentation of research in progress and tutorials in the field of health services research.

1 unit, Aut (Haberland, C), Win (Haberland, C), Spr (Haberland, C)

**HRP 290. Advanced Medical Spanish Oral Communication**

Enrollment limited to medical students. Designed to further develop linguistic skills, covering all medical specialties according to student needs. Sessions also include topics on patient education and diseases, such as diabetes, asthma, TB, and CVDs.

3 units, Aut (Corso, I), Win (Corso, I), Spr (Corso, I)

**HRP 299. Directed Reading in Health Research and Policy**

Epidemiology, health services research, preventive medicine, med-

ical genetics, public health, economics of medical care, occupational or environmental medicine, international health, or related fields. May be repeated for credit. Prerequisite: consent of instructor.

1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**HRP 351. Health Care Technology: From Innovators to Providers to Patients**

(Same as GSBGEN 351) How health care businesses use biotechnology, medical technology and information technology to improve patient outcomes and manage costs. New technologies commercialized by innovator biotech and pharmaceutical companies, device manufacturers, diagnostics developers, and health IT companies, and adopted by hospitals and physicians in patient care and paid for by third-party payers. Case studies: how innovators finance and manage new product development; clinical trial management and gaining regulatory approval; strategies to drive product adoption; business models to drive innovation; clinical and business models for adopting new technology; organizational change; criteria for reimbursement and coverage decisions; selective provider network design to manage added costs; and IT-intensive business models. Guest speakers and panelists.

4 units, not given this year

**HRP 370. Medical Scholars Research**

Provides an opportunity for student and faculty interaction, as well as academic credit and financial support, to medical students who undertake original research. Enrollment is limited to students with approved projects.

4-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**HRP 391. Health Care Regulation, Finance and Policy**

(Same as PUBLPOL 231) (SAME AS LAW 348) Provides the legal, institutional, and economic background necessary to understand the financing and production of health services in the U.S. Potential topics include: health reform, health insurance (Medicare and Medicaid, employer-sponsored insurance, the uninsured), medical malpractice and quality regulation, pharmaceuticals, the corporate practice of medicine, regulation of fraud and abuse, and international comparisons.

3 units, Win (Kessler, D)

**HRP 392. Analysis of Costs, Risks, and Benefits of Health Care**

(Same as BIOMEDIN 432) (Same as MGTECON 332) For graduate students. How to do cost/benefit analysis when the output is difficult or impossible to measure. How do M.B.A. analytic tools apply in health services? Literature on the principles of cost/benefit analysis applied to health care. Critical review of actual studies. Emphasis is on the art of practical application.

4 units, Aut (Garber, A; Owens, D)

**HRP 399. Graduate Research**

Investigations sponsored by individual faculty members. Prerequisite: consent of instructor.

1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

## HISTORY (HISTORY)

### UNDERGRADUATE COURSES IN HISTORY

**HISTORY 6N. Utopia: History of Nowhere Land**

(F,Sem) Stanford Introductory Seminar. What would the perfect society be? How would work be organized, and education, honor and profit be distributed? How would children be raised, and who would govern? Such questions have engaged philosophers, revolutionaries, and dreamers in every historical age. Examines utopian literature from ancient Greece through the modern age, focusing on the early modern period. GER:DB-Hum

4 units, Spr (Stokes, L)

**HISTORY 7S. The Age of Discovery: Maritime Imperialism and Science, 1400-1850**

Chinese, Portuguese, Spanish, and British voyages of trade, exploration and science. The voyages of Zheng He, Da Gama, Magellan, Cook, Malaspina, Darwin. Topics include: developments in maritime technology during this period; the interrelationship between science and empire in the early modern world; non-European accounts of the Age of Discovery with examples from Japan, Malac-

ca, and E. Africa; and changing perspectives on exploration and explorers, using Columbus and Zheng He as comparisons.

5 units, Aut (Aranda, M)

#### **HISTORY 10A. Europe from Antiquity to 1500**

(Same as History 110A. History majors and others taking 5 units, register for 110A.) Focus is on religion and politics. Issues include: the rise of Christianity and its impact on Rome; transformations of Catholicism and its institutions including the impact of barbarian tribes and the struggle between church and state; antisemitism, heresy, Crusades, and inquisition; courtly love; and scholasticism.

3 units, Win (Buc, P)

#### **HISTORY 10B. Early Modern Europe**

(Same as HISTORY 110B. History majors and others taking 5 units, register for 110B.) Survey of early modern European history from the Reformation through the Enlightenment. Topics include religious war, state building and revolt, exploration and colonialism, gender and society.

3 units, Spr (Stokes, L)

#### **HISTORY 13N. Slavery and Rebellion in Ancient Rome: Spartacus in Legend and History**

(Same as CLASSHIS 23N) Preference to freshmen. Spartacus and his army of slaves resisted the power of the Roman legions for two years and became the stuff of legend. Introduction to Roman history. Slavery in ancient Rome in its psychological, social, and economic dimensions. Causes of Spartacus' rebellion; how the traumatic end of the rebellion gave rise to a legend popularized in Stanley Kubrick's 1960 film.

3 units, Aut (Saller, R)

#### **HISTORY 14N. The Crusades**

(F,Sem) Stanford Introductory Seminar. What were the European crusades? How can we explain this phenomenon, which mobilized entire societies for holy wars against pagans, Muslims, heretics, and sometimes bad kings? Was religion the main motivator, or should one factor in economics and political ambitions? How did European minorities, including Jews, fit within this phenomenon? Was there a difference between crusading warfare and ordinary warfare? GER:DB-SocSci

5 units, Aut (Buc, P)

#### **HISTORY 20A. Russian Civilization from Beginnings to the Enlightenment**

(Same as HISTORY 120A. History majors and others taking 5 units, register for 120A.) Fundamental building blocks of Russian civilization, treated thematically, from the tenth to the eighteenth centuries: religion, art and architecture, literature, social structures, political ideology, and political culture.

3 units, Aut (Kollmann, N)

#### **HISTORY 20Q. Russia in the Early Modern European Imagination**

(S,Sem) Stanford Introductory Seminar. Preference to sophomores. The contrast between the early modern image of Europe as free, civilized, democratic, rational, and clean against the notion of New World Indians, Turks, and Chinese as savage. The more difficult, contemporary problem regarding E. Europe and Russia which seemed both European and exotic. Readings concerning E. Europe and Russia from the Renaissance to the Enlightenment; how they construct a positive image of Europe and conversely a negative stereotype of E. Europe. Prerequisite: PWR 1. GER:DB-Hum, EC-GlobalCom

5 units, Spr (Kollmann, N)

#### **HISTORY 22N. Crime, Punishment, and Rebellion in Early Modern Russia**

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Goal is to understand the social values that shaped and moderated violence in Russia and the stresses created by the rise of the early modern state. Rising crime and banditry, corporal and capital punishment, and bloody rebellions as response to the rising demands that the state placed on society. The early modern state-building project, a process of empire building and military reform that required higher taxation and more stringent social control. Forms in which violence erupted in early modern Russia. Causes, the moral economy of violence and rebellion, and the symbolism of public executions. Readings include law codes, court cases, and studies of rebellions in the time of troubles and in Catherine the Great's time. Violence engendered by religious dissidents in the name of true

faith in the late 17th century. GER:DB-Hum

5 units, Win (Kollmann, N)

#### **HISTORY 24S. The Soviet Union Through Western Eyes: Workers' Paradise and Evil Empire**

Soviet history through the experiences and perceptions of foreigners including travelers, diplomats, writers, journalists, and statesmen. Events and topics include: the 1917 Revolution; NEP and the 1920s; collectivization, industrialization, and Stalinist terror; World War II; Cold War; developed socialism; last years and downfall of the Soviet Union. Issues of perception and historical interpretation, and the problems and opportunities of observing secretive totalitarian societies.

5 units, Win (Frese, A)

#### **HISTORY 27S. Life in the Divided City: A History of Postwar Berlin, 1945-2009**

Sources such as declarations by the Allies, speeches, Berliners' diaries, novels, examples of East and West Berlin art, popular music, and film. Topics include the emergence of the Cold War, postwar reconstruction, 60s youth protests in the West, life under Stasi surveillance, the fall of the wall, and historical memory.

5 units, Aut (Matro, K)

#### **HISTORY 30C. Culture and Society in Reformation England**

(Same as HISTORY 130C. History majors and others taking 5 units, register for 130C.) Focuses on the appeal of both Reformed and Catholic ideas in the political and cultural contexts of early modern Europe. Topics include: the Lutheran revolt; the spread of Protestant ideas; Calvin's Geneva; the English Reformation; Tridentine reform and the Jesuits; toleration and the underground churches; wars and religious violence; and the making of European confessional identities. Sources include sermons, religious polemic, autobiographies, graphic prints, poetry, and music.

3 units, not given this year

#### **HISTORY 30Q. English Society Through Fiction**

(S,Sem) Stanford Introductory Seminar. Preference to sophomores. England from the eighteenth century to the twentieth century through the reading of seven novels ranging from Henry Fielding's Joseph Andrews, to Evelyn Waugh's A Handful of Dust. Focus is on the novels themselves and the historical context of the novels to acquire a knowledge of British history over two hundred years. GER:DB-Hum

4 units, Spr (Stansky, P)

#### **HISTORY 31S. The Renaissance of War: War, Technology, and Art in the High Renaissance**

How did the Renaissance contribute to the history of warfare? The Italian Wars (1494-1530) were a critical period of military innovation, laying the foundations for European military advantage. Topics include tactics, grand strategy, and the development of diplomatic system, state-building, and war finance. Also examines the rapid development of field artillery, handguns, new fortifications, and related military technology as well as the intersections with art and literature. Sources include Ariosto, Castiglione, Cellini, Contarini, da Vinci, Guicciardini, Machiavelli, Michelangelo, Vasari.

5 units, Win (Brege, B)

#### **HISTORY 33A. Blood and Roses: The Age of the Tudors**

(Same as HISTORY 133A. History majors and others taking 5 units, register for 133A.) English society and state from the Wars of the Roses to the death of Elizabeth. Political, social, and cultural upheavals of the Tudor period and the changes wrought by the Reformation. The establishment of the Tudor monarchy; destruction of the Catholic church; rise of Puritanism; and 16th-century social and economic changes.

3 units, Win (Como, D)

#### **HISTORY 33S. The France of Louis XIV**

Louis XIV's reign as the foundation of France's modern global eminence despite the imposition of governing practices that undermined France's chance of effective modernization. Sources include 17th-century documents and a computer simulation in game format to define the problems faced by the Sun King and his contemporaries in an era of economic, political, and social change. GER:DB-Hum

5 units, not given this year

#### **HISTORY 34A. European Witch Hunts**

(Same as HISTORY 134A. History majors and others taking 5 units, register for 134A.) After the Reformation, in the midst of

state building and scientific discovery, Europeans conducted deadly witch hunts, violating their own laws and procedures in the process. What was it about early modernity that fueled witch hunting? Witch trials and early modern demonology as well as historians' interpretations of events to seek answers to this question.

3 units, Aut (Stokes, L)

**HISTORY 34S. From Tears of Joy to the Reign of Terror: The French Revolution, 1789-1794**

How politicians described themselves and each other, and how competing political groups claimed to speak for the people, energized the French Revolution of 1789. Declaring themselves representatives of the people against traitors, royalists, aristocrats, and most of Europe, French politicians destroyed the social order and reformed it with a mixture of bombastic rhetoric and practical solutions. The changing political discourse that first spoke of an ideal community and eventually declared it necessary to kill political opponents.

5 units, Spr (St Meyer, J)

**HISTORY 36N. Gay Autobiography**

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Gender, identity, and solidarity as represented in nine autobiographies: Isherwood, Ackerley, Duberman, Monette, Louganis, Barbin, Cammermeyer, Gingrich, and Lorde. To what degree do these writers view sexual orientation as a defining feature of their selves? Is there a difference between the way men and women view identity? What politics follow from these writers' experiences? GER:DB-Hum, EC-Gender

4 units, Spr (Robinson, P)

**HISTORY 36S. Folk Tales, Fairy Tales, Carnival & Magic: Popular Culture in Early Modern Europe**

How did popular culture in early modern Europe affect people's worldviews and vice versa? What role did the popular play in the political? How can historians use cultural sources to understand the past? Stories, rituals, festivals, how-to manuals and other sources point to the possibilities and problems of studying history through the lens of popular culture.

5 units, Aut (Otto, H)

**HISTORY 39. Modern Britain and the Empire**

(Same as HISTORY 139. History majors and others taking 5 units, register in 139.) From American Independence to the latest war in Iraq. Topics include: the rise of the modern British state and economy; imperial expansion and contraction; the formation of class, gender, and national identities; mass culture and politics; the world wars; and contemporary racial politics. Focus is on questions of decline, the fortunes and contradictions of British liberalism in an era of imperialism, and the weight of the past in contemporary Britain.

3 units, Spr (Satia, P)

**HISTORY 40. World History of Science, Technology and Medicine: From Prehistory to the Scientific Revolution**

(Same as HISTORY 140. History majors and others taking 5 units, register for 140.) The earliest developments in science, the prehistoric roots of technology, the scientific revolution, and global voyaging. Theories of human origins and the oldest known tools and symbols. Achievements of the Mayans, Aztecs, and native N. Americans. Science and medicine in ancient Greece, Egypt, China, Africa, and India. Science in medieval and Renaissance Europe and the Islamic world including changing cosmologies and natural histories. Theories of scientific growth and decay; how science engages other factors such as material culture and religions.

3 units, Win (Proctor, R)

**HISTORY 41A. The Emergence of Medicine: The Middle Ages and Renaissance**

(Same as HISTORY 141A. History majors and others taking 5 units, register for 141A.) How did medicine emerge as a distinctive body of knowledge and a profession? The history of medicine from ca. 1000 to 1750. Topics: new ways of examining and treating the body; the religious and cultural significance of disease; the development of hospitals; and the rise of public health systems. Comparison of the status of medicine in Europe and the Islamic world. The work of key figures such as Vesalius and Harvey. GER:DB-SocSci

3 units, Win (Findlen, P)

**HISTORY 42. Darwin in the History of Life**

(Same as HISTORY 142. History majors and others taking 5 units, register for 142.) Origins and impact of evolutionary theory from the nineteenth century to the present. Early theories of fossils, the discovery of deep time and uniformitarian geology, debates over evolution vs. extinction, the origin of life, and human origins; the rise of anthropology and racial theory; the changing challenge of creationism, the abuse of evolution in eugenics and Nazi racial hygiene; and new discoveries in the realm of extreme life, evo-devo, neocatastrophism, and the new technological frontier of biomimicry.

3 units, Spr (Proctor, R)

**HISTORY 42N. Science, Medicine, and Empire**

(F,Sem) Stanford Introductory Seminar. The global exchange of medicines, knowledges, technologies, flora, peoples, and disease within French, British, and Dutch empires in the 18th-century Atlantic world. Amerindian, slave, and European knowledges within the context of slave and trade economies. Examples may be drawn from other traditions in India and Indonesia. Readings on voyaging, colonialism, science, slavery, materia medica, and environmental exchange. GER:DB-SocSci

4 units, Win (Schiebinger, L)

**HISTORY 44S. Sex and Power in South African History**

At key moments in South African history, sexual behavior has captured national attention. Examines state attempts to regulate sex while asking the following questions: How can we think historically about something as seemingly private as sex? What drives public institutions to regulate sexual behavior? What is the relationship between sexuality and race, gender, and class? And what struggles over sexuality tell us about the rest of South African history?

5 units, Aut (Thornberry, E)

**HISTORY 45B. Africa in the Twentieth Century**

(Same as HISTORY 145B. History majors and others taking 5 units, register for 145B.) The challenges facing Africans from when the continent fell under colonial rule until independence. Case studies of colonialism and its impact on African men and women drawn from West, Central, and Southern Africa. Novels, plays, polemics, and autobiographies written by Africans.

3 units, Win (Roberts, R)

**HISTORY 46S. The History and Legacy of Mau Mau in Kenya: Civil War, Peasant Revolt, or Nationalist Struggle?**

Competing narratives concerning Mau Mau, the 50s Kenyan war. How to reconstruct a history of this war using documents, oral history, and material artifacts. The war as a case study for understanding the effects of colonialism and the fluidity of historical memory.

5 units, Win (Weitzberg, K)

**HISTORY 47. History of South Africa**

(Same as HISTORY 147. History majors and others taking 5 units, register for 147.) Introduction, focusing particularly on the modern era. Topics include: precolonial African societies; European colonization; the impact of the mineral revolution; the evolution of African and Afrikaner nationalism; the rise and fall of the apartheid state; the politics of post-apartheid transformation; and the AIDS crisis.

3 units, Aut (Campbell, J)

**HISTORY 48N. African History through Literature and Film**

(F,Sem) Stanford Introductory Seminar. Literary and cinematic works as a window into the history of sub-Saharan Africa.; and the difficulty of using artistic works as historical sources, the value of art as representation and artifact of the past. Premodern traditions of political narrative; art in the era of the slave trade; the impact of colonialism on African intellectuals; the political uses of art by nationalists; and the struggle to represent rapidly changing social and culture norms. GER:DB-Hum

4-5 units, Win (Hanretta, S)

**HISTORY 48Q. South Africa: Contested Transitions**

(S,Sem) Stanford Introductory Seminar. Preference to sophomores. The inauguration of Nelson Mandela as president in May 1994 marked the end of an era and a way of life for S. Africa. The changes have been dramatic, yet the legacies of racism and inequality persist. Focus: overlapping and sharply contested transitions. Who advocates and opposes change? Why? What are their historical and social roots and strategies? How do people reconstruct

their society? Historical and current sources, including films, novels, and the Internet. GER:DB-Hum, EC-GlobalCom

3 units, Win (Samoff, J)

#### **HISTORY 50A. Colonial and Revolutionary America**

(Same as HISTORY 150A. History majors and others taking 5 units, register for 150A.) Survey of the origins of American society and polity in the 17th and 18th centuries. Topics: the migration of Europeans and Africans and the impact on native populations; the emergence of racial slavery and of regional, provincial, Protestant cultures; and the political origins and constitutional consequences of the American Revolution.

3 units, Aut (Winterer, C)

#### **HISTORY 50B. 19th Century America**

(Same as HISTORY 150B. History majors and others taking 5 units, register in 150B.) Territorial expansion, social change, and economic transformation. The causes and consequences of the Civil War. Topics include: urbanization and the market revolution; slavery and the Old South; sectional conflict; successes and failures of Reconstruction; and late 19th-century society and culture.

3 units, Win (White, R)

#### **HISTORY 50C. The United States in the Twentieth Century**

(Same as HISTORY 150C. History majors and others taking 5 units, register for 150C.) Major political, economic, social, and diplomatic developments in the U.S. Themes: the economic and social role of government (Progressive, New Deal, Great Society, and Reagan-Bush eras); ethnic and racial minorities in society (mass immigration at the turn of the century and since 1965, the civil rights era of the 50s and 60s); the changing status of women since WW II; shifting ideological bases, institutional structures, and electoral characteristics of the political system (New Deal and post-Vietnam); determinants of foreign policy in WW I and II, and the Cold War.

3 units, Spr (Chang, G)

#### **HISTORY 50S. The History of Development in Africa**

Africa's experience with international development. Large- and small-scale development projects, from state-led development schemes to community education, examining the doctors, institutions, and agencies that have sought to pursue development. From the colonial to the postcolonial era; the complicated and politically charged processes by which development theory becomes translated into development practice.

5 units, Spr (Bourbonniere, M)

#### **HISTORY 51. Slavery and Freedom in American History**

(Same as HISTORY 151. History majors and others taking 5 units, register for 151.) What does the fact that the preamble to the Declaration of Independence, with its professions about equality and unalienable rights, was written by a slaveowner tell us about the history of the U.S., and about the experience of African Americans? Topics: the transatlantic slave trade, slavery and the American Revolution, the Haitian Revolution, the African colonization movement, abolitionism, the Civil War, and Reconstruction.

3 units, Aut (Campbell, J)

#### **HISTORY 54. 19th-Century U.S. Cultural and Intellectual History, 1790-1860**

(Same as HISTORY 154. History majors and others taking 5 units, register for 154.) How Americans considered problems such as slavery, imperialism, and sectionalism. Topics include: the political legacies of revolution; biological ideas of race; the Second Great Awakening; science before Darwin; reform movements and utopianism; the rise of abolitionism and proslavery thought; phrenology and theories of human sexuality; and varieties of feminism. Sources include texts and images.

3 units, Spr (Winterer, C)

#### **HISTORY 54N. African American Women's Lives**

(F,Sem) (Same as AFRICAAM 54N) Stanford Introductory Seminar. Preference to freshmen. The everyday lives of African American women in 19th- and 20th-century America in comparative context of histories of European, Hispanic, Asian, and Native American women. Primary sources including personal journals, memoirs, music, literature, and film, and historical texts. Topics include slavery and emancipation, labor and leisure, consumer culture, social activism, changing gender roles, and the politics of sexuality. GER:DB-Hum

4-5 units, Aut (Hobbs, A)

#### **HISTORY 57. The Constitution: A Short History**

(Same as POLISCI 128S) A broad survey of the Constitution, from its Revolutionary origins to the contemporary disputes over interpretation. Topics include the invention of the written constitution and interpretative canons; the origins of judicial review; the Civil War and Reconstruction as constitutional crises; the era of substantive due process; the rights revolution; and the Constitution in wartime. GER:EC-AmerCul

5 units, Win (Rakove, J)

#### **HISTORY 59. Introduction to Asian American History**

The historical experience of people of Asian ancestry in the U.S. Immigration, labor, community formation, family, culture and identity, and contemporary social and political controversies. Readings: interpretative texts, primary material, and historical fiction. GER:DB-SocSci, EC-AmerCul

5 units, not given this year

#### **HISTORY 62N. The Atomic Bomb in Policy and History**

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Emphasis is on declassified files from WW II and recent interpretations. Why did the U.S. drop A-bombs on Japan? Were there viable alternatives, and, if so, why were they not pursued? What did the use of the A-bombs mean then and later? How have post-war interpreters explained, and justified or criticized, the A-bombings? Approaches from history, international relations, American studies, political science, and ethics address the underlying conceptions, the roles of evidence, the logic and models of explanation, ethical values, and cultural/social influences. GER:DB-SocSci

5 units, Spr (Bernstein, B)

#### **HISTORY 64C. From Freedom to Freedom Now!: African American History, 1865-1965**

(Same as AFRICAAM 64) (Same as HISTORY 164C. History majors and others taking 5 units, register for 164C.) Explores the working lives, social worlds, political ideologies and cultural expressions of African Americans from emancipation to the early civil rights era. Topics include: the transition from slavery to freedom, family life, work, culture, leisure patterns, resistance, migration and social activism. Sources include memoirs, letters, personal journals, pamphlets, speeches, literature, film and music. GER:EC-AmerCul

3 units, Win (Hobbs, A)

#### **HISTORY 67S. The Virgin Mary: Religion and Identity from Mexico City to Los Angeles**

Examines the cult of Latin America's most venerated saint, the Virgin of Guadalupe. Focuses on Mexico and the American Southwest from the colonial period to the twentieth century and emphasizes national and ethnic identity, gender, family, syncretism, and the role of religion in immigrant communities.

5 units, Spr (Fontes, G)

#### **HISTORY 68S. The Cultural Margins of America: Witches, Indians, Africans, Arabs in the 18th-Century Imagination**

Contradictions in the myth of a cultural melting pot: instances in early American history when groups, such as women, Africans, Native Americans, and Arabs, were excluded from and not absorbed into the ideal of America. Sources include: 18th-century documents; modern theories in sociology, anthropology, and history to understand the judicial, literary, and linguistic processes that European settlers used to define their communities; case studies that show how cultural myths sustain collective identities.

5 units, Win (Mansfield, J)

#### **HISTORY 70. Culture, Politics, and Society in Latin America**

Introduction to the political and social history of Latin America. Emphasis is on interactions among institutional change, social structure, and political movements, emphasizing the environment and cultural values. GER:DB-SocSci, EC-GlobalCom

5 units, not given this year

#### **HISTORY 70A. Colonial Latin America**

(Same as HISTORY 170. History majors and others taking 5 units, register for 170.) 16th-19th centuries. Indigenous cultures. The arrival of Europeans and its impact on native and European societies. Culture, religion and institutions, and everyday life. The independence period and the formation of new nations. Readings include primary and secondary sources.

3 units, Win (Herzog, T)

**HISTORY 84Q. The American Empire in the Middle East since the Cold War: Afghanistan, Iraq, and Israel/Palestine** (S,Sem) Stanford Introductory Seminar. What were the traditional objectives of U.S. policy in the Middle East since the end of WW II? What forces shaped U.S. policy towards the Middle East? Did those interests and the means employed to pursue them change substantially after the demise of the Soviet Union? What has been the impact of U.S. policy on the region itself? The three principal cases to be examined are Afghanistan, Iraq, and Israel/Palestine. GER:DB-SocSci, EC-GlobalCom  
3 units, Aut (Beinin, J)

**HISTORY 90S. The Social and Cultural History of Tokogawa Japan, 1603-1868**  
Lived experience and culture of ordinary Japanese people in the samurai era, from the age of Tokugawa shogun to Perry's arrival. Topics include: peasant uprisings; village life; agrarian economy and commercial economy; gender and women; class status and tensions; pilgrimage; system of affiliation between Buddhist temples and households; tourism; publishing boom; popular culture of townspeople; and people's riots on the eve of the Meiji revolution. Sources include historical maps, popular novels, legal documents, and folktales.  
5 units, Spr (Sakakibara, S)

**HISTORY 91D. China: The Northern and Southern Dynasties** (Same as HISTORY 191D.) History majors and others taking 5 units, register for 191D.) Examines one of the most dynamic periods of Chinese history with the emergence of the institutional religions (Buddhism and Daoism), the development of the garden as an art form, the rise of landscape as a theme of verse and art, the invention of lyric poetry, and the real beginnings of the southward spread of Chinese civilization.  
3 units, Spr (Lewis, M)

**HISTORY 91S. The Making of Nationalism in Modern China**  
Nationalism as a force in fueling historical change in China. How has the meaning of Chinese nationalism changed over time? How nationalism has been constructed and expressed from the late 1890s to the 2008 Olympics. Sources include government documents, memoirs, revolutionary texts, and Internet discussion forums, reflecting distinct perspectives and ideologies.  
5 units, Win (Vanden Bussche, E)

**HISTORY 92A. The Historical Roots of Modern East Asia** (Same as HISTORY 392E) Focus is on China and Japan before and during their transition to modernity. The populous, urbanized, economically advanced, and culturally sophisticated Ming empire and Muromachi shogunate in the 16th century when Europeans first arrived. How the status quo had turned on its head by the early 20th century when European and American steamships dominated the Pacific, China was in social and political upheaval, and Japan had begun its march to empire. GER:DB-SocSci, EC-GlobalCom  
4-5 units, not given this year

**HISTORY 93. Late Imperial China** (Same as HISTORY 193.) History majors and others taking 5 units, register for 193.) From the Tang-Song transition until the collapse of imperial order. The rise of absolutism and gentry society, and concomitant shifts in culture, gender relations, and the economy. The threat of steppe nomadism which produced the Mongol and Manchu conquest dynasties. The last imperial dynasty, the Qing, which solved traditional problems but was confronted by new ones. How simultaneous disasters of internal rebellion and Western imperialist invasion destroyed the old order.  
3 units, Win (Sommer, M)

**HISTORY 94B. Japan in the Age of the Samurai** (Same as HISTORY 194B.) History majors and others taking 5 units, register for 194B.) From the Warring States Period to the Meiji Restoration. Topics include the three great unifiers, Tokugawa hegemony, the samurai class, Neoconfucian ideologies, suppression of Christianity, structures of social and economic control, frontiers, the other and otherness, castle-town culture, peasant rebellion, black marketing, print culture, the floating world, National Studies, food culture, samurai activism, black ships, unequal treaties, anti-foreign terrorism, restorationism, millenarianism, modernization as westernization, Japan as imagined community.  
3 units, Aut (Wigen, K)

**HISTORY 95. Modern Korean History** (Same as HISTORY 195.) History majors and others taking 5 units, register for 195.) Themes include status, gender, and monarchy in the Choson dynasty; intellectual life and social transformation in the 19th century; the rise of Korean nationalism; Japan's colonial rule and Korean identities; culture, economy, and society in colonial Korea; the Korean War, and the different state building processes in North and South after the Korean War.  
3 units, Spr (Moon, Y)

**HISTORY 95C. Modern Japanese History** (Same as History 195C.) History majors and others taking 5 units, register for 195C.) Japan's modern transformation from the late 19th century to the present. Topics include: the Meiji revolution; industrialization and social dislocation; the rise of democracy and empire; total war and US occupation; economic miracle and malaise; Japan as soft power; and politics of memory. Readings and films focus on the lived experiences of ordinary men and women across social classes and regions.  
3 units, Win (Uchida, J)

**HISTORY 96. Modern South Asia** (Same as HISTORY 196.) History majors and others taking 5 units, register for 196.) History and politics of the Indian subcontinent across two centuries of transformation. Topics: interactions among colonial power, nationalism, and modern institutions; S. Asia at the crossroads of world history in an age of empire, capitalism, and war; history and memory through political traditions, social movements, and religious experiences that shaped S. Asian modernity; from Edmund Burke to Gandhi; East India Company's statemaking to origins of nationality; Tagore to Iqbal; peasants and rebels to liberals and revolutionaries; decolonization and Partition.  
3 units, Aut (Kumar, A)

**HISTORY 98. The History of Modern China** (Same as HISTORY 198.) History majors and others taking 5 units, register for 198.) Major historical transformations including the decline of the last imperial dynasty, the formation of the first Chinese republic, WW II, the rise of Communism, China under Mao, post-Mao reforms, and the Beijing Olympics of 2008.  
3 units, Aut (Mullaney, T)

**HISTORY 102. The History of the International System**  
World politics and international relations from the dominance of empires and nation states at the turn of the century to the present. The influence of communism, fascism, and anti-imperialism, and the emergence of society as a factor in international relations. Questions of sovereignty versus the new world order. GER:DB-SocSci, EC-GlobalCom  
5 units, Spr (Ward, J)

**HISTORY 103E. History of Nuclear Weapons** (Same as POLISCI 116) The development of nuclear weapons and policies. How existing nuclear powers have managed their relations with each other. How nuclear war has been avoided so far and whether it can be avoided in the future. GER:DB-SocSci  
5 units, Spr (Holloway, D)

**HISTORY 104. Trials that Made History: Courtroom Martyrs and Villains from the Classical to Modern Period**  
Socrates, the Knights Templar, Galileo, Salem witchcraft, and the Scopes (monkey) trials. How trials reflect cultural conflicts and political climate. Tensions between individuals and the state and between science and religion that are evident in trials. The role of trials in public discourse. Trial as drama. Reading assignments are interdisciplinary and range from surviving trial transcripts to the work of literary scholars and filmmakers. GER:DB-Hum  
5 units, not given this year

**HISTORY 105. Gandhi, King, and Nonviolence** (Same as RELIGST 118) Lives, times, theory, and practice of Mohandas Gandhi and Martin Luther King, Jr.; their significance to issues of violence and nonviolence today. GER:DB-Hum  
4 units, not given this year

**HISTORY 106A. Global Human Geography: Asia and Africa** (Same as INTNLREL 161A) Global patterns of demography, economic and social development, geopolitics, and cultural differentiation, covering E. Asia, S. Asia, S.E. Asia, Central Asia, N. Africa, and sub-Saharan Africa. Use of maps to depict geographical patterns and processes. GER:DB-SocSci  
5 units, Aut (Staff)

**HISTORY 106A. Global Human Geography: Asia and Africa**  
Global patterns of demography, economic and social development, geopolitics, and cultural differentiation, covering E. Asia, S. Asia, S.E. Asia, Central Asia, N. Africa, and sub-Saharan Africa. Use of maps to depict geographical patterns and processes. GER:DB-SocSci, EC-GlobalCom

5 units, Aut (Lewis, M)

**HISTORY 106B. Global Human Geography: Europe and Americas**

Patterns of demography, economic and social development, geopolitics, and cultural differentiation. Use of maps to depict geographical patterns and processes. GER:DB-SocSci, EC-GlobalCom

5 units, Win (Lewis, M)

**HISTORY 106C. Global Historical Geography**

The sweep of human history through the medium of maps. The rise, expansion, and fall of kingdoms, empires, and other states; the spread of major religions; the paths of explorers, conquerors, and diseases; and the development and intensification of trade networks. Overview of the prehistoric period and ancient times, but focus is on the modern world.

5 units, Spr (Lewis, M)

**HISTORY 110A. Europe from Late Antiquity to 1500**

(Same as HISTORY 10A. History majors and others taking 5 units, register for 110A.) Focus is on religion and politics. Issues include: the rise of Christianity and its impact on Rome; transformations of Catholicism and its institutions including the impact of barbarian tribes and the struggle between church and state; antisemitism, heresy, Crusades, and inquisition; courtly love; and scholasticism. GER:DB-Hum, WIM

5 units, Win (Buc, P)

**HISTORY 110B. Early Modern Europe**

(Same as HISTORY 10B. History majors and others taking 5 units, register for 110B.) Survey of early modern European history from the Reformation through the Enlightenment. Topics include religious war, state building and revolt, exploration and colonialism, gender and society. GER:DB-SocSci, EC-GlobalCom

5 units, Spr (Stokes, L)

**HISTORY 110C. Introduction to Modern Europe**

From the late 18th century to the present. How Europeans responded to rapid social changes caused by political upheaval, industrialization, and modernization. Political ideologies such as liberalism, socialism, communism, and fascism that Europeans developed in response to revolution, nation building, imperialism, and international competition. GER:DB-Hum

5 units, Aut (Daughton, J)

**HISTORY 120A. Russian Civilization from Beginnings to the Enlightenment**

(Same as HISTORY 20A. History majors and others taking 5 units, register for 120A.) Fundamental building blocks of Russian civilization, treated thematically, from the tenth to the eighteenth centuries: religion, art and architecture, literature, social structures, political ideology, and political culture. GER:DB-Hum, EC-GlobalCom

5 units, Aut (Kollmann, N)

**HISTORY 120B. The Russian Empire**

From Peter the Great to the Bolsheviks. Russia as an empire; its varied regions, including the Caucasus, Central Asia, Ukraine, Poland, and the Baltics. Focus is on the politics and cultures of empire. Sources include novels, political tracts, paintings, music, and other primary sources. GER:DB-Hum

5 units, not given this year

**HISTORY 120C. 20th-Century Russian and Soviet History**

The Soviet polity from the 1917 Revolution to its collapse in 1991. Essentials of Marxist ideology; the Russian Empire in 1917. Causation in history; interpretations of the Revolution; state building in a socialist polity; social engineering through collectivization of agriculture, force-paced industrialization, and cultural revolution; terror as concept and practice; nationality policies in a multiethnic socialist empire; the routinization, decline, and collapse of the revolutionary ethos; and the legacy of the Soviet experiment in the new Russia. GER:DB-Hum

5 units, not given this year

**HISTORY 125. 20th-Century Eastern Europe**

Major historical trends in 20th-century E. European history. Empires and national movements. The creation of independent Eastern Europe after WW I; social movements and the emergence of dictatorships and fascism in the inter-war period. WW II, Stalinism, and destalinization in contemporary E. Europe. GER:DB-SocSci, EC-GlobalCom

5 units, Win (Jolluck, K)

**HISTORY 132. Ordinary Lives: A Social History of the Everyday in Early Modern Europe**

What war meant for foot soldiers and the peasants across whose fields they marched. Ordinary people's lives in the eras of Machiavelli, Shakespeare, the Reformation, and the scientific revolution. Topics include: birth, marriage, and death; city life and peasant culture; lay encounters with religious and intellectual ideas; war and crime; and gender and sexuality. GER:DB-Hum

5 units, not given this year

**HISTORY 132A. Enlightenment and the Arts**

Gateway course for the History, Literature, and the Arts track of the History major. Novels, poetry, music, paintings, and architecture, and what they reveal about the society that produced them. GER:DB-Hum

5 units, Spr (Lougee Chappell, C)

**HISTORY 133A. Blood and Roses: The Age of the Tudors**

English society and state from the Wars of the Roses to the death of Elizabeth. Political, social, and cultural upheavals of the Tudor period and the changes wrought by the Reformation. The establishment of the Tudor monarchy; destruction of the Catholic church; rise of Puritanism; and 16th-century social and economic changes. GER:DB-Hum

5 units, Win (Como, D)

**HISTORY 133B. Revolutionary England: The Stuart Age**

From the accession of King James I in 1603 to the death of Queen Anne in 1714: a brutal civil war, the execution of one anointed king, and the deposition of another. Topics include the causes and consequences of the English Revolution, the origins of Anglo-American democratic thought, the rise and decline of Puritanism, and the emergence of England as an economic and colonial power. (Como) GER:DB-Hum

5 units, not given this year

**HISTORY 134A. The European Witch Hunts**

(Same as HISTORY 34A. History majors and others taking 5 units, register for 134A.) After the Reformation, in the midst of state-building and scientific discovery, Europeans conducted a series of deadly witch hunts, violating their own laws and procedures in the process. What was it about early modernity that fueled witch hunting? Examines witch trials and early modern demonology as well as historians' interpretations of events to seek answers to this question. GER:DB-Hum

5 units, Aut (Stokes, L)

**HISTORY 135. History of European Law, Medieval to Contemporary**

(Same as HISTORY 335) From the fall of the Roman Empire to the establishment of the EU. How law changed over time. Sources and nature of law, organization of legal systems, and relationships between law and society, law and lawmaker, law and the legal professions. GER:DB-SocSci

4-5 units, Spr (Herzog, T)

**HISTORY 137. The Holocaust**

(Same as HISTORY 337) The emergence of modern racism and radical anti-Semitism. The Nazi rise to power and the Jews. Anti-Semitic legislation in the 30s. WW II and the beginning of mass killings in the East. Deportations and ghettos. The mass extermination of European Jewry. GER:DB-Hum

4-5 units, Win (Felstiner, M)

**HISTORY 137A. Europe, 1945-2002**

Europe's transformation from the end of WW II to an expanded EU. Political, cultural, economic, and social history. Topics: post-war reconstruction, Cold War, consumer versus socialist culture, collapse of Communism, postcommunist integration. GER:DB-SocSci

5 units, not given this year

**HISTORY 138A. Germany and the World Wars, 1870-1990**

Germany's history from Bismarck's wars of unification through the end of the Cold War. The radicalizing relationship between international conflict, social upheaval, and state transformation with a focus on the clashes of the Second Empire, the road to WW I, interwar instability, the rise of Nazism, WW II, the Holocaust, the division of communist E. and capitalist W. Germany, and the fall of the Iron Curtain. GER:DB-SocSci

5 units, Spr (Sheffer, E)

**HISTORY 139. Modern Britain and the Empire**

(Same as HISTORY 39. History majors and others taking 5 units, register in 139.) From American Independence to the latest war in Iraq. Topics include: the rise of the modern British state and economy; imperial expansion and contraction; the formation of class, gender, and national identities; mass culture and politics; the world wars; and contemporary racial politics. Focus is on questions of decline, the fortunes and contradictions of British liberalism in an era of imperialism, and the weight of the past in contemporary Britain. GER:DB-Hum, EC-GlobalCom, EC-GlobalCom

5 units, Spr (Satia, P)

**HISTORY 140A. The Scientific Revolution**

What do people know and how do they know it? What counts as scientific knowledge? In the 16th and 17th centuries, understanding the nature of knowledge engaged the attention of individuals and institutions including Copernicus, Galileo, Descartes, Newton, the early Royal Society, and less well-known contemporaries. New meanings of observing, collecting, experimenting, and philosophizing, and political, religious, and cultural ramifications in early modern Europe. GER:DB-Hum

5 units, not given this year

**HISTORY 141A. The Emergence of Medicine: The Middle Age and the Renaissance**

(Same as HISTORY 41A. History majors and others taking 5 units, register for 141A.) How did medicine emerge as a distinctive body of knowledge and a profession? The history of medicine from ca. 1000 to 1750. Topics: new ways of examining and treating the body; the religious and cultural significance of disease; the development of hospitals; and the rise of public health systems. Comparison of the status of medicine in Europe and the Islamic world. The work of key figures such as Vesalius and Harvey.

5 units, Win (Findlen, P)

**HISTORY 142. Darwin in the History of Life**

(Same as HISTORY 42. History majors and others taking 5 units, register for 142.) Origins and impact of evolutionary theory from the nineteenth century to the present. Early theories of fossils, the discovery of deep time and uniformitarian geology, debates over evolution vs. extinction, the origin of life, and human origins; the rise of anthropology and racial theory; the changing challenge of creationism, the abuse of evolution in eugenics and Nazi racial hygiene; and new discoveries in the realm of extreme life, evodevo, neocatastrophism, and the new technological frontier of biomimicry. GER:DB-SocSci

5 units, Spr (Proctor, R)

**HISTORY 145A. Africa Until European Conquest**

Episodes in African history from the earliest records up until European partition of the continent, focusing on how knowledge about the natural, social, and spiritual worlds was linked to the exercise of power. The effects of technological innovations on states and other forms of social complexity; use of religious beliefs and practices to legitimate or critique authority. The effects of slave trades and imperial conquest on these forms of authority. WIM GER:DB-Hum, EC-GlobalCom

5 units, not given this year

**HISTORY 145B. Africa in the 20th Century**

(Same as HISTORY 45B. History majors and others taking 5 units, register for 145B.) The challenges facing Africans from when the continent fell under colonial rule until independence. Case studies of colonialism and its impact on African men and women drawn from West, Central, and Southern Africa. Novels, plays, polemics, and autobiographies written by Africans. GER:DB-SocSci, EC-GlobalCom

5 units, Win (Roberts, R)

**HISTORY 145C. Africa in the Age of Empire**

Radical transformations in political, social, economic, and cultural

systems that took place in Africa in the 19th century. The formation of indigenous empires in West, East, and South Africa; the struggles of warlords and independent entrepreneurs to control the continuing slave trade and slave production; the modernization of state bureaucracies and ideologies; and the gradual collapse of African political autonomy in the face of growing European colonial involvement. GER:DB-SocSci

5 units, Spr (Hanretta, S)

**HISTORY 147. History of South Africa**

(Same as HISTORY 47. History majors and others taking 5 units, register for 147.) Introduction, focusing particularly on the modern era. Topics include: precolonial African societies; European colonization; the impact of the mineral revolution; the evolution of African and Afrikaner nationalism; the rise and fall of the apartheid state; the politics of post-apartheid transformation; and the AIDS crisis. GER:DB-SocSci

5 units, Aut (Campbell, J)

**HISTORY 150A. Colonial and Revolutionary America**

(Same as HISTORY 50A. History majors and others taking 5 units, register for HISTORY 150A.) Survey of the origins of American society and polity in the 17th and 18th centuries. Topics: the migration of Europeans and Africans and the impact on native populations; the emergence of racial slavery and of regional, provincial, Protestant cultures; and the political origins and constitutional consequences of the American Revolution. GER:DB-SocSci, EC-AmerCul

5 units, Aut (Winterer, C)

**HISTORY 150B. 19th-Century America**

(Same as HISTORY 50B. History majors and others taking 5 units, register for 150B.) Territorial expansion, social change, and economic transformation. The causes and consequences of the Civil War. Topics include: urbanization and the market revolution; slavery and the Old South; sectional conflict; successes and failures of Reconstruction; and late 19th-century society and culture. GER:DB-SocSci, EC-AmerCul, WIM

5 units, Win (White, R)

**HISTORY 150C. The United States in the Twentieth Century**

(Same as HISTORY 50C. History majors and others taking 5 units, register for 150C.) Major political, economic, social, and diplomatic developments in the U.S. Themes: the economic and social role of government (Progressive, New Deal, Great Society, and Reagan-Bush eras); ethnic and racial minorities in society (mass immigration at the turn of the century and since 1965, the civil rights era of the 50s and 60s); the changing status of women since WW II; shifting ideological bases, institutional structures, and electoral characteristics of the political system (New Deal and post-Vietnam); determinants of foreign policy in WW I and II, and the Cold War. GER:DB-SocSci, EC-AmerCul

5 units, Spr (Chang, G)

**HISTORY 151. Slavery and Freedom in American History**

(Same as HISTORY 51. History majors and others taking 5 units, register for 151.) What does the fact that the preamble to the Declaration of Independence, with its professions about equality and unalienable rights, was written by a slaveowner tell us about the history of the U.S., and about the experience of African Americans? Topics: the transatlantic slave trade, slavery and the American Revolution, the Haitian Revolution, the African colonization movement, abolitionism, the Civil War, and Reconstruction. GER:DB-SocSci

5 units, Aut (Campbell, J)

**HISTORY 154. 19th-Century U.S. Cultural and Intellectual History, 1790-1860**

(Same as HISTORY 54. History majors and others taking 5 units, register for 154.) How Americans considered problems such as slavery, imperialism, and sectionalism. Topics include: the political legacies of revolution; biological ideas of race; the Second Great Awakening; science before Darwin; reform movements and utopianism; the rise of abolitionism and proslavery thought; phrenology and theories of human sexuality; and varieties of feminism. Sources include texts and images. GER:DB-Hum, EC-AmerCul

5 units, Spr (Winterer, C)

**HISTORY 154A. Religion and American Society**

How and why is the U.S. at once the most secular and the most religious industrialized nation in the world; why does it matter?

How has American religion influenced reform, wars, politics, civil rights, popular culture, and national identity? Larger connections between religion and society; how religious institutions and movements have shaped the American experience and vice versa. GER:DB-Hum, EC-AmerCul

5 units, Aut (Herzog, J)

### **HISTORY 158. The United States Since 1945**

Focus is on foreign policy and politics with less attention to social and intellectual history. Topics include nuclear weapons in WW II, the Cold War, the Korean and Vietnam wars, Eisenhower revisionism, the Bay of Pigs and Cuban missile crisis, civil rights and the black freedom struggle, the women's movement, the Great Society and backlash, welfare policy, conservatism and liberalism, the 60s anti-war movement, Watergate and the growth of executive power, Iran-Contra and Reagan revisionism, Silicon Valley, the Gulf War, the Clinton impeachment controversy, 2004 election, and 9/11 and Iraq war. GER:DB-SocSci, EC-AmerCul

4-5 units, Win (Bernstein, B)

### **HISTORY 161. U.S. Women's History, 1890s-1990s**

The transformation of Victorian womanhood in the late 19th century, including the workforce participation of immigrant and black women, educational and professional opportunities for middle class white women, impact of wars and depression on 20th-century women's lives, and rebirth of feminism. GER:DB-SocSci, EC-Gender

5 units, not given this year

### **HISTORY 163. A History of North American Wests**

The history, peoples, and natural systems of a region that has never been contained within a single empire or nation state, but has been united by the movement of peoples, species, and things. Topics include smallpox, horses, gold, salmon, rivers, coal, and oil. GER:DB-SocSci

5 units, not given this year

### **HISTORY 164C. From Freedom to Freedom Now!: African American History, 1865-1965**

(Same as HISTORY 64C.) History majors and others taking 5 units, register for 164C.) Explores the working lives, social worlds, political ideologies and cultural expressions of African Americans from emancipation to the early civil rights era. Topics include: the transition from slavery to freedom, family life, work, culture, leisure patterns, resistance, migration and social activism. Sources include memoirs, letters, personal journals, pamphlets, speeches, literature, film and music. GER:DB-SocSci, EC-AmerCul

5 units, Win (Hobbs, A)

### **HISTORY 166. Introduction to African American History: The Modern African American Freedom Struggle**

Focus is on political thought and protest movements after 1930. Individuals who have shaped and been shaped by modern African American struggles for freedom and justice. Sources include audiovisual materials. Research projects required for fifth unit. GER:DB-SocSci, EC-AmerCul

4-5 units, Spr (Carson, C)

**HISTORY 168. American History in Film: Since World War II** U.S. society, culture, and politics since WW II through feature films. Topics include: McCarthyism and the Cold War; ethnicity and racial identity; changing sex and gender relationships; the civil rights and anti-war movements; and mass media. Films include The Best Years of Our Lives, Salt of the Earth, On the Waterfront, Raisin in the Sun, Medium Cool, and Broadcast News. GER:DB-Hum

3-4 units, Sum (Carroll, P)

### **HISTORY 170. Colonial Latin America**

(Same as HISTORY 70A.) History majors and others taking 5 units, register for 170.) 16th-19th centuries. Indigenous cultures. The arrival of Europeans and its impact on native and European societies. Culture, religion and institutions, and everyday life. The independence period and the formation of new nations. Readings include primary and secondary sources. GER:DB-SocSci

5 units, Win (Herzog, T)

### **HISTORY 181B. The Middle East in the 20th Century**

(Formerly 187B.) The history of the Middle East since WW I, focusing on the eastern Arab world, Egypt, the Fertile Crescent, and the Arabian Peninsula, with attention to Turkey, Iran, and Israel.

5 units, Spr (Beinin, J)

### **HISTORY 182A. The Ottoman Empire**

From the rise of the Empire in the 13th century to its end in WW I. Geographic coverage from the Balkans to Iraq and from N. Africa to the Caucasus. Military expansion; political, religious, and cultural institutions; relations with Iran, Europe, Africa, and S. Asia; nature of imperial rule; gender; trade; landholding; popular culture; law. GER:DB-SocSci

5 units, not given this year

### **HISTORY 182B. Three Empires of Islam: The Ottomans, Safavids, and Mughals**

Comparative history of Islam's three major early modern empires. Comparative treatment of topics including representations of political authority, the arts, gender, trade, science, and social life.

5 units, Win (Mikhail, A)

### **HISTORY 182C. From Prophet to Empire: The Making of the Muslim Middle East, 600-1500**

Traces the establishment of a Muslim religious and political presence in the Middle East from the formative years of conquest in Arabia and early experiments in state formation to the emergence of empires defining the early modern world. Explores the construction of a remarkable social, intellectual and artistic culture out of the various indigenous and imported elements then available. GER:DB-SocSci

5 units, Aut (Staff)

### **HISTORY 185B. Jews in the Modern World**

Possible themes: the restructuring of Jewish existence during the Enlightenment and legal emancipation at the end of the 18th century in W. Europe, the transformation of Jewish life in E. Europe under the authoritarian Russian regime, colonialism in the Sephardic world, new ideologies (Reform Judaism and Jewish nationalisms), the persistence and renewal of antisemitism, the destruction of European Jewry under the Nazis, new Jewish centers in the U.S., and the State of Israel. GER:DB-Hum, EC-GlobalCom

5 units, Aut (Zipperstein, S)

### **HISTORY 191. East Asia in the Early Buddhist Age**

(Same as HISTORY 391) Evolution of cities in imperial China through early imperial, medieval, and early modern periods. Topics include physical structure, social order, cultural forms, economic roles, relations to rural hinterlands, and the contrast between imperial capitals and other cities. Comparative examination of cases from European history. GER:DB-Hum, EC-GlobalCom

4-5 units, not given this year

### **HISTORY 191D. China: The Northern and Southern Dynasties**

(Same as HISTORY 91D.) History majors and others taking 5 units, register for 191D.) Examines one of the most dynamic periods of Chinese history with the emergence of the institutional religions (Buddhism and Daoism), the development of the garden as an art form, the rise of landscape as a theme of verse and art, the invention of lyric poetry, and the real beginnings of the southward spread of Chinese civilization. GER:DB-Hum

5 units, Spr (Lewis, M)

### **HISTORY 192. China: The Early Empires**

How China was transformed as a consequence of its political unification by the Qin dynasty. The geographical reorganization of China in the process of unification. The changing nature of rulership, cities, rural society, military organization, kinship structure, religion, literary practice, law, and relations to the outside world. The nature of empire as a political system. GER:DB-Hum

3-5 units, not given this year

### **HISTORY 193. Late Imperial China**

(Same as HISTORY 93.) History majors and others taking 5 units, register for 193.) From the Tang-Song transition until the collapse of imperial order. The rise of absolutism and gentry society, and concomitant shifts in culture, gender relations, and the economy. The threat of steppe nomadism which produced the Mongol and Manchu conquest dynasties. The last imperial dynasty, the Qing, which solved traditional problems but was confronted by new ones. How simultaneous disasters of internal rebellion and Western imperialist invasion destroyed the old order. GER:DB-Hum

5 units, Win (Sommer, M)

### **HISTORY 194B. Japan in the Age of the Samurai**

(Same as HISTORY 94B.) History majors and others taking 5 units, register for 194B.) From the Warring States Period to the Meiji

Restoration. Topics include the three great unifiers, Tokugawa hegemony, the samurai class, Neoconfucian ideologies, suppression of Christianity, structures of social and economic control, frontiers, the other and otherness, castle-town culture, peasant rebellion, black marketing, print culture, the floating world, National Studies, food culture, samurai activism, black ships, unequal treaties, anti-foreign terrorism, restorationism, millenarianism, modernization as westernization, Japan as imagined community. GER:DB-Hum

5 units, Aut (*Wigen, K*)

**HISTORY 195. Modern Korean History**

(Same as HISTORY 95. History majors and others taking 5 units, register for 195.) Themes include status, gender, and monarchy in the Choson dynasty; intellectual life and social transformation in the 19th century; the rise of Korean nationalism; Japan's colonial rule and Korean identities; culture, economy, and society in colonial Korea; the Korean War, and the different state building processes in North and South after the Korean War. GER:DB-Hum, EC-GlobalCom, EC-GlobalCom

5 units, Spr (*Moon, Y*)

**HISTORY 195C. Modern Japanese History**

(Same as HISTORY 95C. History majors and others taking 5 units, register for 195C.) Japan's modern transformation from the late 19th century to the present. Topics include: the Meiji revolution; industrialization and social dislocation; the rise of democracy and empire; total war and US occupation; economic miracle and malaise; Japan as soft power; and politics of memory. Readings and films focus on the lived experience of ordinary men and women across social classes and regions. GER:DB-SocSci, EC-GlobalCom

5 units, Win (*Uchida, J*)

**HISTORY 196. Modern South Asia**

(Same as HISTORY 96. History majors and others taking 5 units, register for 196.) History and politics of the Indian subcontinent across two centuries of transformation. Topics: interactions among colonial power, nationalism, and modern institutions; S. Asia at the crossroads of world history in an age of empire, capitalism, and war; history and memory through political traditions, social movements, and religious experiences that shaped S. Asian modernity; from Edmund Burke to Gandhi; East India Company's statemaking to origins of nationality; Tagore to Iqbal; peasants and rebels to liberals and revolutionaries; decolonization and Partition. GER:DB-SocSci, EC-GlobalCom

5 units, Aut (*Kumar, A*)

**HISTORY 198. The History of Modern China**

(Same as HISTORY 98. History majors and others taking 5 units, register for 198.) Major historical transformations including the decline of the last imperial dynasty, the formation of the first Chinese republic, WW II, the rise of Communism, China under Mao, post-Mao reforms, and the Beijing Olympics of 2008. GER:DB-SocSci, DB-SocSci, EC-GlobalCom

5 units, Aut (*Mullaney, T*)

**HISTORY 201. Introduction to Public History in the U.S., 19th Century to the Present**

(Same as HISTORY 301) Gateway course for the History and Public Service interdisciplinary track. Topics include the production, presentation, and practice of public history through narratives, exhibits, web sites, and events in museums, historical sites, parks, and public service settings in nonprofit organizations, government agencies, and educational institutions. GER:DB-SocSci

4-5 units, Aut (*McKibben, C*)

**HISTORY 201G. Sexual Encounters: The Middle East and Europe**

(Same as HISTORY 301G) The Middle East and Europe have been engaged for millennia. Examines this relationship from the middle ages to the present through romance, desire, sex, love, sexuality, and gender. Topics include: travel, homosexuality, marriage, family, violence, prostitution, and policing.

4-5 units, Win (*Mikhail, A; Sheffer, E*)

**HISTORY 202. International History and International Relations Theory**

(Same as HISTORY 306E, POLISCI 216E, POLISCI 316) The relationship between history and political science as disciplines. Sources include studies by historians and political scientists on

topics such as the origins of WW I, the role of nuclear weapons in international politics, the end of the Cold War, nongovernmental organizations in international relations, and change and continuity in the international system. GER:DB-SocSci

5 units, Win (*Staff*)

**HISTORY 204G. War, Culture, and Society in the Modern Age**

(Same as HISTORY 304G) How Western societies and cultures have responded to modern warfare. The relationship between its destructive capacity and effects on those who produce, are subject to, and must come to terms with its aftermath. Literary representations of WW I; destructive psychological effects of modern warfare including those who take pleasure in killing; changes in relations between the genders; consequences of genocidal ideology and racial prejudice; the theory of just war and its practical implementation; and how wars are commemorated. GER:DB-SocSci

5 units, not given this year

**HISTORY 205B. Quantitative Methods in Historical Research**

(Same as HISTORY 305B) Latest techniques applied to research issues in current historical debates. Preparation of data, processing, statistical procedures to examine theoretical historical issues, and how to present quantitative materials in historical writing. Mathematical or statistical training not required. GER:DB-SocSci

4-5 units, Spr (*Klein, H*)

**HISTORY 207. Biography and History**

(Same as HISTORY 308) Relationship between biographical and historical writing, primarily in Europe and America. Problems of methodology, evidence, dispassion, and empathy. Texts: biographies, critical literature on biographical work, and novels (*A. S. Byatt's Possession, Bernard Malamud's Dubin's Lives*) that illuminate the intellectual underpinnings of biographical labor. GER:DB-Hum

4-5 units, Spr (*Zipperstein, S*)

**HISTORY 208. Private Lives, Public Stories: Autobiography in Women's History**

Changing contexts of women's lives and how women's actions have shaped and responded to those contexts. GER:DB-Hum, EC-Gender

5 units, Win (*Lougee Chappell, C*)

**HISTORY 208A. Science and Law in History**

(Same as HISTORY 308A) How the intertwined modern fields of science and law, since the early modern period, together developed central notions of fact, evidence, experiment, demonstration, objectivity, and proof. GER:DB-SocSci

4-5 units, Win (*Riskin, J*)

**HISTORY 208B. Women Activists' Response to War**

(Same as HISTORY 308B) Theoretical issues, historical origins, changing forms of women's activism in response to war in the 20th century, and cases such as the Russian Committee of Soldiers Mothers, Bosnian Mothers of Srebrenica, Serbian Women in Black, and Cindy Sheehan. Focus is on the U.S. and E. Europe, with attention to Israel, England, and Argentina. GER:DB-Hum, EC-Gender

4-5 units, not given this year

**HISTORY 208S. Facing the Past: The Politics of Retrospective Justice**

Forms of injustice in history including slavery, genocide, ethnic cleansing, mass rape, forced religious conversion, and torture of prisoners. Mechanisms developed over the last century to define, deter, and alleviate the effects of such offenses, including war crimes tribunals, truth commissions, national apologies, and monetary reparations. Case studies chart the international field of retrospective justice, exploring the legal, political, and moral implications of confronting traumatic pasts. GER:DB-SocSci

5 units, Win (*Campbell, J*)

**HISTORY 209B. The Century: Problem of the Present in Twentieth-Century Thought**

(Same as HISTORY 309B) What is the present? Can it stand on its own, without invoking history and without promising a future? How did the 20th century make sense of itself, as violent and ruptured from all preceding centuries as it was, yet so prolific and promising in its revolutionary achievements and futures? The century through four concepts: time, ambiguity, cruelty, and crisis. 20th-century politics through what happened to dialectic, humanism, history, and Europe.

4-5 units, Win (*Kumar, A*)

**HISTORY 209C. Liberalism and Violence: A Conceptual History**

What place does violence have in modern political thought? Liberalism eschews violence, yet condones moral war. Marxism justifies revolutionary violence. Anticolonialism invokes insurgency. Gandhi seeks truth in nonviolent suffering. Can modern politics and life be grasped without reference to violence? How is violence related to law and justice? Is there a theology of violence? Liberalism and its critics: Agamben, Arendt, Benjamin, Derrida, Fanon, Foucault, Gandhi, Heidegger, Nietzsche, Schmitt, and Sorel. Biopolitics, civil society, friend/enemy, sovereignty, terror, and strikes. GER:EC-EthicReas

5 units, Aut (Kumar, A)

**HISTORY 209S. Research Seminar for Majors**

Required of History majors. How to conduct original, historical research and analysis, including methods such as using the libraries and archives at Stanford and elsewhere, and working collaboratively to frame topics, identify sources, and develop analyses. Autumn quarter focuses on United States topics; winter quarter on European topics; spring quarter on History of Science topics.

5 units, Aut (Hobbs, A), Win (Baker, K), Spr (Riskin, J)

**HISTORY 211B. Jews under Islam and Christianity in the Middle Ages**

(Same as HISTORY 311B) Addresses the relationship between the Jews and the host Islamic and Christian societies during the Middle Ages (AD 500-1500). Themes, covered in a comparative context, include: the Jews' legal status, economic and political rule, toleration and persecutions, adaptation and acculturation, and religious polemics. GER:DB-SocSci

4-5 units, Spr (Staff)

**HISTORY 212. Holy Wars: Medieval Perspectives**

(Same as HISTORY 312) Cultural and societal factors at play in Christian holy war from late antiquity to the early modern era. Topics include: the Crusades and their meanings; armed struggle against heresy; and the wars of religion. Prerequisite: consent of instructor. GER:DB-Hum

4-5 units, not given this year

**HISTORY 216A. Muslims and Infidels: Islam and the Crusades**

(Same as HISTORY 316A) The impact of the Crusades on the Muslim world and consciousness from the Middle Ages and to the present. Primary and secondary sources. Themes include: jihad; cultural interaction between Muslims and Christians in the Holy Land; and military, political, and ideological developments in the 12th and 13th centuries. Modern interpretations and debates about jihadist theology and global jihad. GER:DB-Hum

4-5 units, not given this year

**HISTORY 217A. Poverty and Charity in Medieval Christianity, Judaism, and Islam**

(Same as HISTORY 317A) Topics include: Jewish, Christian, and Islamic theoretical discussions of poverty and charity; normative law versus actual practice; the voice of the poor in available source; and formal and informal institutions of charity in the medieval Mediterranean region. GER:DB-Hum

4-5 units, Spr (Miller, K)

**HISTORY 217B. Land of Three Religions: Medieval Spain**

(Same as HISTORY 317B) The history of the Iberian peninsula from the Islamic conquest of 711 to the Christian expulsion of the Jews in 1492. Focus is on forms of confrontation, confluence, and hostile indifference among medieval Jews, Christians, and Muslims. What were undercurrents of aggression that gave rise to persecution of the other; what elements of commonality among groups gave rise to intellectual advancements? GER:DB-SocSci

4-5 units, Aut (Miller, K)

**HISTORY 218A. Barcelona to Berlin: Muslim Minorities in History**

(Same as HISTORY 318A) Muslim minorities under non-Muslim rule in different historical contexts and configurations such as enclaves and diasporas, from the Middle Ages to the present. GER:DB-SocSci

4-5 units, Spr (Miller, K)

**HISTORY 220G. Demons, Witches, Holy Fools, and Folk Belief: Popular Religion in Russia, 19th and 20th Centuries**

(Same as HISTORY 320G) Popular religion in Russia, focusing on life in the provinces and villages in the nineteenth and early twentieth centuries. The double faith of Orthodox Christianity combined with folk beliefs. Topics include: parish priests, witchcraft, possession, Holy Fools, Old Believers, spiritual elders, saints, icons, religious cults, and women's lay religious movements.

4-5 units, Win (Kollmann, J)

**HISTORY 221A. Men, Women, and Power in Early Modern Russia, 1500-1800**

Social values, gender relations, and social change in an era of rapid change; challenges to established norms by new constructions of deviance (witchcraft, religious reform, and revolt) and new standards of civility; encounters with non-Russians and the construction of national consciousness. Social values as political ethos: patrimonial autocracy and the reality of female rule in the late 17th and 18th century. GER:DB-Hum, DB-Hum, EC-Gender

5 units, Win (Kollmann, N)

**HISTORY 221B. The Woman Question in Modern Russia**

Russian radicals believed that the status of women provided the measure of freedom in a society and argued for the extension of rights to women as a basic principle of social progress. The social status and cultural representations of Russian women from the mid-19th century to the present. The arguments and actions of those who fought for women's emancipation in the 19th century, theories and policies of the Bolsheviks, and the reality of women's lives under them. How the status of women today reflects on the measure of freedom in post-Communist Russia. GER:DB-SocSci, EC-Gender

5 units, Spr (Jolluck, K)

**HISTORY 222. Honor, Law, and Modernity**

How Europe evolved from medieval to modern; focus is on standards for conflict resolution emphasizing insults to honor. How attitudes towards the self and society, and the state's relationship to individuals, changed from the 16th to 18th centuries in Europe and Russia. Traditional concepts of honor and patterns of settling disputes contrasted to early modern concepts of honor, private life, civility, and crime and punishment. GER:DB-Hum

5 units, not given this year

**HISTORY 223. Art and Ideas in Imperial Russia**

(Same as HISTORY 323) Poetry, novels, symphonic music, theater, opera, painting, design, and architecture: what they reveal about the politics and culture of tsarist Russia. GER:DB-Hum

4-5 units, not given this year

**HISTORY 223F. The Nationality Question in the Russian Empire and the Soviet Union**

(Same as HISTORY 323F) Examines the shaping of ethnonational identity and nationalities policy in imperial Russia and the Soviet Union, concluding with an overview of nationalism in the post-Soviet states. Topics include the cultural strategies pursued by governments in St. Petersburg and Moscow under the Romanovs and the Soviets, Marxist ideology on the nationality question, the influence of the Second World War on national identities inside the Soviet Union, and the role of ethnonationalism in the break up of the USSR. GER:DB-SocSci

4-5 units, Spr (Patenaude, B)

**HISTORY 224B. Modern Afghanistan**

(Same as HISTORY 324B) Politics, society, and culture in Afghanistan from the 19th century to the present. Topics include state building, tribal politics, Islamic law, geopolitics, the Taliban, and the post-Taliban disorder. GER:DB-SocSci

4-5 units, not given this year

**HISTORY 227. East European Women and War in the 20th Century**

(Same as HISTORY 327) Thematic chronological approach through conflicts in the region: the Balkan Wars, WW I, WW II, and the recent wars in the former Yugoslavia. The way women in E. Europe have been involved in and affected by these wars compared to women in W. Europe in the two world wars. Women's involvement in war as members of the military services, the backbone of underground movements, workers in war industries, mothers of soldiers, subjects and supporters of war aims and propaganda, activists in peace movements, and objects of wartime destruction, dislocation,

and sexual violation. GER:DB-SocSci, EC-Gender  
4-5 units, Win (Jolluck, K)

**HISTORY 228. Circles of Hell: Poland in World War II**  
(Same as HISTORY 328) The experience and representation of Poland's wartime history from the Nazi-Soviet Pact of 1939 to the aftermath of Yalta in 1945. Nazi and Soviet ideology and practice regarding the Poles and the ways Poles responded, resisted, and survived. The self-characterization of Poles as innocent victims, and their involvement or complicity in the Holocaust, thus engaging in a current debate in Polish society. GER:DB-SocSci  
5 units, not given this year

**HISTORY 229. Poles and Jews**  
(Same as HISTORY 329) Focus is on the period since WW I. The place of the Jews in interwar Poland, WW II, surviving Jews after the war, Polish memorialization of the Holocaust, the reality and mythology of Jews in the communist apparatus, the manipulation of anti-Semitism by the communist government, and post-communist movement toward reconciliation. Memory and national mythology emphasizing Polish wartime behavior and the relationship of Jews to communism. The sources and uses of stereotypes, and the state of Polish-Jewish relations today. GER:DB-Hum, DB-Hum, EC-GlobalCom  
4-5 units, Spr (Jolluck, K)

**HISTORY 231S. Early Modern Things**  
(Same as HISTORY 431) How do objects reveal their histories? What can be learned about the past by studying things? The material culture of early modern Europe, ca 1450-1750. Recent work on the circulation, use, and consumption of things, starting with the Columbian exchange which expanded the material horizons of the early modern world in the late 15th century, exploring challenges to the meaning of things in the age of the Reformation and Scientific Revolution, and ending with the birth of consumer society in the 18th century How did the meaning of things and people's relationships to them change over these centuries? What objects, ordinary and extraordinary, secular and sacred, natural and man-made, came to define the emerging features of the early modern world?  
4-5 units, Win (Findlen, P)

**HISTORY 232D. Rome: The City and the World, 1350-1750**  
(Same as HISTORY 332D) What lies beyond the ruins of an ancient city? The history of Rome from the Renaissance to the age of the grand tour. Topics include: the political, diplomatic, and religious history of the papacy; society and cultural life; the everyday world of Roman citizens; the relationship between the city and the surrounding countryside; the material transformation of Rome as a city; and its meaning for foreigners. GER:DB-Hum  
4-5 units, not given this year

**HISTORY 233. Reformation, Political Culture, and the Origins of the English Civil War**  
(Same as HISTORY 333) English political and religious culture from the end of the Wars of the Roses to the Civil War of the 1640s. Themes include the growth of the size and power of the state, Reformation, creation of a Protestant regime, transformation of the political culture of the ruling elite, emergence of Puritanism, and causes of the Civil War. GER:DB-Hum  
4-5 units, not given this year

**HISTORY 233B. Early Modern Sexualities**  
(Same as HISTORY 333B) History of sexuality in early modern Europe. Normative sexuality, heterosexual transgressions, and minority sexualities. Theoretical approaches to and debates about the history of sexuality, in particular prior to the 19th century. Tools for critiquing the heteronormativity of early modern sources and for reading those sources for evidence of sexual diversity. Readings include monographs and primary sources. GER:DB-SocSci, EC-Gender  
4-5 units, not given this year

**HISTORY 233C. Two British Revolutions**  
(Same as HISTORY 333C) Current scholarship on Britain, 1640-1700, focusing on political and religious history. Topics include: causes and consequences of the English civil war and revolution; rise and fall of revolutionary Puritanism; the Restoration; popular politics in the late 17th century; changing contours of religious life; the crisis leading to the Glorious Revolution; and the new order that emerged after the deposing of James II. GER:DB-Hum  
4-5 units, Aut (Como, D)

**HISTORY 233F. Political Thought in Early Modern Britain**  
1500 to 1700. Theorists include Hobbes, Locke, Harrington, the Levellers, and lesser known writers and schools. Foundational ideas and problems underlying modern British and American political thought and life. GER:DB-Hum  
5 units, Aut (Como, D)

**HISTORY 233G. Catholic Politics in Europe, 1789-1992**  
What led to the creation of a specifically Catholic mass politics? How did these parties and movements interact with the Vatican and the wider Church? What accounts for political Catholicism's involvement in clerical-fascist states and its important role in shaping the EU? Sources focus on monographs. Research paper using primary sources. GER:DB-SocSci  
5 units, not given this year

**HISTORY 233K. The Invention of the Modern Republic**  
(Same as HISTORY 333K) Examines the history of republican thinking in the Atlantic World from the Renaissance to the French Revolution.  
4-5 units, Spr (Staff)

**HISTORY 234C. Counterinsurgency in History**  
(Same as HISTORY 334C) Classic texts and case studies of insurgency and counterinsurgency from the 19th century to the present. GER:DB-SocSci  
4-5 units, Win (Sheehan, J)

**HISTORY 236. The Ethics of Imperialism**  
Can a commitment to liberty, progress, and universal rights be reconciled with imperialism? The ethical underpinnings of empire; how modern Europeans provided ethical and political justifications for colonial expansion. How European ideals were used to defend and justify inequality, violence, and genocide. The ethics of American-driven globalization and humanitarianism. Texts include primary sources, philosophical treatises, and historical studies. GER:DB-Hum  
5 units, not given this year

**HISTORY 236A. European Nationalism, 1600 to the Present**  
(Same as HISTORY 336A) Theory and practice of nationalism from its genesis. What is the nation and how is it built? What is its relationship to the state? How do national movements adapt to changing ideological and geopolitical contexts? Focus is on Europe; attention to other parts of the world as required by theory studies. GER:DB-SocSci  
4-5 units, Aut (Ward, J)

**HISTORY 236B. The Idea of Society**  
(Same as HISTORY 336B) Classic texts in social theory from the seventeenth century to the present. Readings include Locke, Smith, Hegel, Comte, and Durkheim, and Weber.  
4-5 units, Win (Baker, K; Sheehan, J)

**HISTORY 236C. Reordering Europe, 1917-1923**  
(Same as HISTORY 336C) The struggle to craft a new European order after the disaster of the First World War. Topics: Wilsonian versus Leninist visions for Europe, Paris Peace Conference, early Weimar Germany, state-building in Yugoslavia, Greek-Turkish population exchanges, Polish-Soviet War, and Fascist rise to power in Italy. Major component of course involves student presentations and research with primary sources. GER:DB-SocSci  
4-5 units, Win (Ward, J)

**HISTORY 237E. Violence, Law, and Order in Eighteenth- and Nineteenth-Century Ireland**  
Experiences of and attitudes to both violence and the law in eighteenth and nineteenth century Ireland on both the interpersonal and collective levels. Topics include the varying causes and motives for violent activity in Irish society; the role of the law and, in particular, its effectiveness in controlling violent activity in Irish society; how legal provisions interacted with and were shaped by the broader sociocultural conditions from the eighteenth century onwards; and the impact that Irish patterns of violent activity and attitudes to law and authority had overseas, particularly in N. America. GER:DB-SocSci  
5 units, Win (Staff)

**HISTORY 238K. European Collaboration, Resistance, and Retribution: 1938-1948**  
Experiences of European populations under occupation or suzerainty during WW II. How did populations respond to an invader

or hegemonic power such as Nazi Germany? What other options were open to them? How and why did postwar Europe judge their choices? Readings span high politics and individual lives. GER:DB-SocSci

5 units, Aut (Ward, J)

**HISTORY 239D. Capital and Empire**

(Same as HISTORY 339D, HUMNTIES 191S) Can empire be justified with balance sheets of imperial crimes and boons, a calculus of racism versus railroads? The political economy of empire through its intellectual history from Adam Smith to the present; the history of imperial corporations from the East India Company to Wal-mart; the role of consumerism; the formation of the global economy; and the relationship between empire and the theory and practice of development. GER:DB-SocSci

4-5 units, Spr (Satie, P)

**HISTORY 239F. Empire and Information**

(Same as HISTORY 339F) How do states see? How do they know what they know about their subjects, citizens, economies, and geographies? How does that knowledge shape society, politics, identity, freedom, and modernity? Focus is on the British imperial state activities in S. Asia and Britain: surveillance technologies and information-gathering systems, including mapping, statistics, cultural schemata, and intelligence systems, to render geographies and social bodies legible, visible, and governable. GER:DB-Hum, EC-GlobalCom

4-5 units, not given this year

**HISTORY 239H. Colonialism and Empire in Modern Europe**

To better understand the history of modern Europe within a global context, explores the following questions: What impact did more than a century of colonialism have on the social lives, cultural attitudes, political loyalties, and intellectual world views of European women and men during the nineteenth century? What accounts for the resiliency of empire during a period of rapid global change that witnessed the rise of modern democracy, economic liberalism, ethnic nationalism, and international socialism? GER:DB-SocSci

5 units, Win (Naranch, B)

**HISTORY 243C. 18th-Century Colonial Science and Medicine**

(Same as HISTORY 343C) The exchange of knowledge, technologies, plants, peoples, disease, and medicines. Focus is on French, British, and Dutch interests in the West Indies; examples from elsewhere. Sources include primary and secondary texts on voyaging, colonialism, slavery, and environmental exchange. GER:DB-SocSci

4-5 units, not given this year

**HISTORY 243G. Tobacco and Health in World History**

(Same as HISTORY 343G) GER:DB-SocSci

4-5 units, Aut (Proctor, R)

**HISTORY 243J. Climate Change in the West: A History of the Future**

(Same as EARTHSYS 143) Global warming is changing the American West. But this region is no stranger to environmental change and human adaption to harsh environments. How can history help us think more clearly about the current crisis and our choices for the future? Examines the long history of climate change in the West, as well as current warming, through scientific research, historical sources, environmental histories, and visions for the future, including plans for mitigation and adaption, scientific predictions, and science fiction.

5 units, Spr (Christensen, J)

**HISTORY 243S. Human Origins: History, Evidence, and Controversy**

(Same as HISTORY 443A) Research seminar. Debates and controversies include: theories of human origins; interpretations of fossils, early art, and the oldest tools; the origin and fate of the Neanderthals; evolutionary themes in literature and film; visual rhetoric and cliché in anthropological dioramas and phyletic diagrams; the significance of hunting, gathering, and grandmothering; climatological theories and neocatastrophic geologies; molecular anthropology; the impact of racial theories on human origins discourse. Background in human evolution not required. GER:DB-SocSci

4-5 units, not given this year

**HISTORY 244C. The History of the Body in Science, Medicine, and Culture**

(Same as HISTORY 444C) The human body as a natural and cultural object, historicized. The crosscultural history of the body from the 18th century to the present. Topics include: sciences of sex and race; medical discovery of particular body parts; human experimentation, foot binding, veiling, and other bodily coverings; thinness and obesity; notions of the body politic. GER:DB-SocSci, EC-Gender

4-5 units, not given this year

**HISTORY 245E. Health and Society in Africa**

(Same as HISTORY 347E) The history of disease, therapeutic and diagnostic systems, and the definition of health in precolonial, colonial, and postcolonial Africa. The social and political histories of specific epidemics, including sleeping sickness, influenza, TB, mental illness, and AIDS. The colonial contexts of epidemics and the social consequences of disease. GER:DB-SocSci, EC-GlobalCom

4-5 units, not given this year

**HISTORY 245G. Law and Colonialism in Africa**

(Same as HISTORY 348D) Law in colonial Africa provides an opportunity to examine the meanings of social, cultural, and economic change in the anthropological, legal, and historical approaches. Court cases as a new frontier for the social history of Africa. Topics: meanings of conflicts over marriage, divorce, inheritance, property, and authority. GER:DB-SocSci

4-5 units, Win (Roberts, R)

**HISTORY 246S. Research Seminar: African Nationalism and Beyond**

(Same as HISTORY 446A) African intellectual, political, social and cultural institutions confronting issues of sovereignty, authority, heterarchy, and power during the 19th and 20th centuries. GER:DB-SocSci

4-5 units, not given this year

**HISTORY 247S. Intellectual and Cultural History in Modern Africa**

(Same as HISTORY 447A) GER:DB-SocSci, EC-GlobalCom

4-5 units, Win (Hanretta, S)

**HISTORY 248. Islam in Africa**

(Same as HISTORY 348) Relations between African Muslims and the broader Islamic tradition over the last 1200 years. The roots of the Islamic tradition, its adoption, endogenization, and elaboration by African Muslims. The interplay of religion, politics, culture and society, and how tradition exercises influence even while being transformed. The worldviews and lives of African Muslims; how and why those worldviews and experiences changed. GER:DB-Hum, EC-GlobalCom

4-5 units, Spr (Hanretta, S)

**HISTORY 248S. African Societies and Colonial States**

(Same as HISTORY 448A) The encounter between African societies and European colonialism in the colony or region of their choice. Approaches to the colonial state; tours of primary source collections in the Hoover Institution and Green Libraries. Students present original research findings and may continue research for a second quarter. GER:DB-SocSci

4-5 units, not given this year

**HISTORY 249. History without Documents**

(Same as HISTORY 349) Can history be written about places and times for which are no written sources, or for people in literate societies who left no written traces? Practical training in historical methods for non-documentary sources, including oral traditions and history, archaeology, ecological sources, historical linguistics, ethnography, rituals, myths, songs, and art. GER:DB-Hum

4-5 units, not given this year

**HISTORY 251. Creating the American Republic**

(Same as POLISCI 222P) Concepts and developments in the late 18th-century invention of American constitutionalism; the politics of constitution making and ratifying; emergence of theories of constitutional interpretation including originalism; early notions of judicial review. Primary and secondary sources.

5 units, Win (Rakove, J)

**HISTORY 252. Decision Making in International Crises: The A-Bomb, the Korean War, and the Cuban Missile Crisis**  
(Same as HISTORY 355) For advanced undergraduates and graduate students. Primary documents and secondary literature. Topics include: the decision to use the atomic bomb on Japan, the Korean War, and the Cuban missile crisis. GER:DB-SocSci  
*4-5 units, Aut (Bernstein, B)*

**HISTORY 253D. Approaches to American Legal History**  
(Same as POLISCI 226U) Legal history, once primarily devoted to exploring legal doctrines and key judicial opinions and thus of interest mainly to legal scholars and lawyers, now resembles historical writing more generally; the study of legal ideas and practices is increasingly integrated with social, intellectual, cultural, and political history. Recent writings in American legal history; how the field reflects developments in historical writing; and how the use of legal materials affects understanding of American history.  
*5 units, Aut (Rakove, J)*

**HISTORY 254. Popular Culture and American Nature**  
Despite John Muir, Aldo Leopold, and Rachel Carson, it is arguable that the Disney studios have more to do with molding popular attitudes toward the natural world than politicians, ecologists, and activists. Disney as the central figure in the 20th-century American creation of nature. How Disney, the products of his studio, and other primary and secondary texts see environmentalism, science, popular culture, and their interrelationships. GER:DB-Hum, WIM  
*5 units, Aut (White, R)*

**HISTORY 255. Martin Luther King, Jr.: The Social Gospel and the Struggle for Justice**  
The religious and political thought of Martin Luther King, Jr., using the documentary resources of the King Institute at Stanford. His social gospel Christianity and prophetic message of radical social transformation. Readings include the forthcoming *The Papers of Martin Luther King, Jr., Volume VI: Advocate of the Social Gospel*. GER:DB-Hum  
*5 units, not given this year*

**HISTORY 255D. Racial Identity in the American Imagination**  
(Same as AFRICAAM 255, HISTORY 355D) Major historical transformations shaping the understanding of racial identity and how it has been experienced, represented, and contested in American history. Topics include: racial passing and racial performance; migration, immigration, and racial identity in the urban context; the interplay between racial identity and American identity; the problems of class, gender, and sexuality in the construction of racial identity. Sources include historical and legal texts, memoirs, photography, literature, film, and music. GER:DB-SocSci, EC-AmerCul  
*4-5 units, Spr (Hobbs, A)*

**HISTORY 256. U.S.-China Relations: From the Opium War to Tiananmen**  
(Same as HISTORY 356) The history of turbulent relations, military conflict, and cultural clashes between the U.S. and China, and the implications for the domestic lives of these increasingly interconnected countries. Diplomatic, political, social, cultural, and military themes from early contact to the recent past. WIM GER:DB-SocSci, EC-GlobalCom  
*4-5 units, Win (Chang, G)*

**HISTORY 258. History of Sexuality in the U.S.**  
(Same as HISTORY 358) (Formerly 265A.) Priority to History and Feminist Studies majors; a limited number of graduate students may be admitted. Recent historical interpretations of sexual violence, emphasizing the intersections of gender and race in the construction of rape in early America and in Canada, the racialization of rape in the U.S., lynching and anti-lynching in the U.S., and feminist responses to sexual violence. Prerequisite: consent of instructor. GER:DB-SocSci, EC-Gender  
*4-5 units, not given this year*

**HISTORY 259A. Poverty and Homelessness in America**  
Service learning. Students participate in a two quarter internship at a local shelter for homeless individuals or families. Readings include historical, social science, and social commentary literature. GER:DB-SocSci  
*4-5 units, Win (Camarillo, A)*

**HISTORY 259B. Poverty and Homelessness in America II**  
Students participate in an internship with the Emergency Housing

Consortium, the primary agency providing shelter for homeless people in Santa Clara and San Mateo counties, while learning about homelessness and poverty through readings and discussions. Prerequisite: interview with instructor. Service learning. Students participate in a two quarter internship at a local shelter for homeless individuals or families. Readings include historical, social science, and social commentary literature. Prerequisite: 259A.  
*3 units, Spr (Camarillo, A)*

**HISTORY 260. California's Minority-Majority Cities**  
Historical development and the social, cultural, and political issues that characterize large cities and suburbs where communities of color make up majority populations. Case studies include cities in Los Angeles, Santa Clara, and Monterey counties. Comparisons to minority-majority cities elsewhere in the U.S. GER:DB-SocSci, EC-AmerCul  
*5 units, Spr (McKibben, C)*

**HISTORY 261. Race, Gender, and Class in Jim Crow America**  
How African American life and labor were redefined from 1890-1954. Topics include family life, work, leisure patterns, transnational relations, cultural expressions emphasizing literature and music, resistance and social activism. Primary sources including visual materials, literature, and film; historical interpretations of the period. GER:DB-SocSci  
*5 units, not given this year*

**HISTORY 265. Writing Asian American History**  
(Same as HISTORY 365) Recent scholarship in Asian American history, with attention to methodologies and sources. Topics: racial ideologies, gender, transnationalism, culture, and Asian American art history. Primary research paper. GER:DB-SocSci, EC-AmerCul  
*5 units, Win (Chang, G)*

**HISTORY 268E. American Foreign Policy and International History, 1941-2009**  
(Same as HISTORY 368E) Major events and interpretations from WW II to the war in Iraq. Issues of race, expansionism and power; nuclear weapons; and war. GER:DB-SocSci  
*4-5 units, Spr (Bernstein, B)*

**HISTORY 273. The European Expansion**  
(Same as HISTORY 373A) The relationship between European monarchies and their colonial domains from the 16th-18th centuries. Reasons for expansion, methods, and results. Case studies include the Spanish, Portuguese, Dutch, French, and English domains in Africa, Asia, and the Americas. Readings include primary and secondary sources.  
*4-5 units, not given this year*

**HISTORY 275F. Social Change in Latin America Since 1900**  
(Same as HISTORY 375F, LATINAM 201, LATINAM 301) Changes in the social and demographic characteristics of Latin American populations since 1900 and the response of national governments in terms of the evolution of social welfare, health, and educational systems. Fulfills requirement for Latin American Studies honors seminar. Required core course for Latin American Studies master's students. GER:DB-SocSci  
*4-5 units, Spr (Klein, H)*

**HISTORY 278A. Political Economy of Property Rights**  
(Same as POLISCI 242D) This course seeks to understand how property rights systems influence economic growth and the stewardship of resources. We are also interested in explaining the political process by which societies create property systems. In order to answer these questions we will read and discuss the work of political scientists, economists, and historians.  
*5 units, Win (Haber, S)*

**HISTORY 279. Latin American Development: Economy and Society, 1800-2000**  
(Same as HISTORY 379) The newly independent nations of Latin America began the 19th century with economies roughly equal to, or even ahead of, the U.S. and Canada. What explains the economic gap that developed since 1900? Why are some Latin American nations rich and others poor? Marxist, dependency, neoclassical, and institutionalist interpretive frameworks. The effects of globalization on Latin American economic growth, autonomy, and potential for social justice. GER:DB-SocSci, EC-GlobalCom  
*4-5 units, not given this year*

**HISTORY 281. Economic and Social History of the Modern Middle East**

(Same as HISTORY 381) The integration of the Middle East into the world capitalist market on a subordinate basis and the impact on economic development, class formation, and politics. Alternative theoretical perspectives on the rise and expansion of the international capitalist market are combined with possible case studies of Egypt, Iraq, and Palestine. GER:DB-SocSci

4-5 units, Aut (Beinin, J)

**HISTORY 281A. Twentieth-Century Iraq: A Political and Social History**

The colonial experience, creation of the modern Iraqi state, and transition to military dictatorship. Political movements, religious and tribal elements, and their relation to the state. Geopolitical context. GER:DB-SocSci

5 units, not given this year

**HISTORY 281B. Modern Egypt**

(Same as HISTORY 381B) From just before the Napoleonic expedition of 1798 to the present. Topics: European imperialism, the political economy of cotton, rise of nationalism, gender and the nation, minorities, the coup of 1952, positive neutralism and the Cold War, and the neo-liberal reconstruction of Egypt. GER:DB-SocSci

4-5 units, not given this year

**HISTORY 281C. Urban History of the Middle East: Aleppo and Istanbul on the Eve of Modernity, 1650-1850**

(Same as HISTORY 381C) Questions both Orientalist and modernist assumptions concerning urban life in the Middle East during a transformative moment in global history, commercialization and the emergence of modern imperialism. The critical relevance of cultural debates and institutional changes in provincial centers such as Aleppo to the unfolding of a modern Ottoman Empire. GER:DB-SocSci

5 units, Spr (Staff)

**HISTORY 281D. The Origins and Formation of Islam**

(Same as HISTORY 381D) The modern debate over the origins of Islam and the appearance of distinctive disciplines and institutions in the ninth century. Course taught in English; however, students with a proficiency in Arabic may do separate work.

4-5 units, Win (Staff)

**HISTORY 282. The United States and the Middle East since 1945**

(Same as HISTORY 382) Since the end of WW II, U.S. interests in the Middle East have traditionally been defined as access to oil at a reasonable price, trade and markets, containing the influence of the Soviet Union, and the security of Israel. Is this the full range of U.S. interests? How has the pursuit of these interests changed over time? What forces have shaped U.S. policy? What is the impact of U.S. policy on the region itself? GER:DB-SocSci, EC-GlobalCom

4-5 units, Spr (Beinin, J)

**HISTORY 282D. The Late Ottoman Empire, its Collapse, and the Making of the Turkish Nation State**

(Same as HISTORY 382D) The turbulent 1910s and the WW I, the catastrophe of the old European and Ottoman world. Focus is on the political elites, their biographies, networks, and ideologies (Ottomanism, Islamism, Turkism, social Darwinism). Topics include the Young Turk revolution of 1908, the entrance into world war, the Armenian genocide, and the Turkish revolution of the 20s. GER:DB-SocSci

4-5 units, Win (Staff)

**HISTORY 283. The New Global Economy, Oil, and Islamic Movements in the Middle East**

(Same as HISTORY 383) The integration of the Middle East into the world capitalist market on a subordinate basis and the impact on economic development, class formation, and politics. Alternative theoretical perspectives on the rise and expansion of the international capitalist market combined with case studies of Egypt, Iraq, and Palestine. GER:DB-SocSci

4-5 units, not given this year

**HISTORY 285K. History of Modern Antisemitism**

(Same as HISTORY 385K) Focus is on Europe. Topics include: origins of modern antisemitism and difference from theological forms of hatred, differences in antisemitic patterns in eastern cen-

tral and western Europe; intellectual origins of modern racism, the question of Jewish self-hatred and internalization of antisemitic stereotypes; connections between philo-semitism and antisemitism; contemporary patterns of antisemitism. Emphasis is on cultural and intellectual history as well as a discussion of Jews' major ideological, political, and social responses to antisemitism.

4-5 units, Spr (Staff)

**HISTORY 287C. Zionism and Its Critics**

(Same as HISTORY 387C) Zionism from its genesis in the 1880s up until the establishment of the state of Israel in May, 1948, exploring the historical, ideological and political dimensions of Zionism. Topics include: the emergence of Zionist ideology in connection to and as a response to challenges of modernity; emancipation; Haskalah (Jewish enlightenment); other national and ideological movements of the period; the ideological crystallization of the movement; and the immigration waves to Palestine.

4-5 units, Aut (Staff)

**HISTORY 287D. Tel Aviv: Site, Symbol, City**

(Same as HISTORY 387D) Tel Aviv, the first Israeli city, from a cultural history perspective combining high and low cultural texts. Topics include: the utopian origins behind the establishment of Tel Aviv in Zionist texts; artists, poets, and writers in Tel Aviv's early years; as the capital of Bauhaus architecture; the emergence of Israeli pop culture in Tel Aviv of the late 60s and 70s; as the site of the Israeli Zionist and post-Zionist intellectuals. Sources include art, cinema, and literature. GER:DB-Hum

4-5 units, Win (Staff)

**HISTORY 287E. Jewish Intellectuals and Modernity**

(Same as HISTORY 387E) Intellectual responses of Jewish thinkers to the age of extremes. Readings include a wide assemblage of twentieth-century thinkers, such as Theodor Adorno, Leo Strauss, Hannah Arendt, Isaiah Berlin, Isaac Deutscher, Hans Kohn, Lionel Trilling, Judith Shklar, George Steiner, Emmanuel Levinas, and Jacques Derrida. From these readings, an analysis of enlightenment, nationalism and socialism; political response to totalitarian ideologies, and the extent to which the Jewishness of these political thinkers and philosophers notify their writings.

4-5 units, Spr (Staff)

**HISTORY 288. Palestine and the Arab-Israeli Conflict**

(Same as HISTORY 388, IPS 388) 1882 to the present. Comparison of representative expressions of competing historical interpretations. U.S. policy towards the conflict since 1948. (Beinin) GER:DB-Hum

4-5 units, Win (Beinin, J)

**HISTORY 291A. Archaeology and Modernity in Asia: The Excavation of Ancient Civilizations in Modern Times**

(Same as HISTORY 391A) The interplay in Asia between antiquity and modernity, civilization and nation state, and national versus colonial science. The recent excavation of artifacts and places associated with Asian civilization such as the terracotta warriors in China and Angkor Wat in Cambodia. How Asian states have grappled with modernity and colonialism as they simultaneously dug up their ancient pasts. GER:DB-SocSci

4-5 units, not given this year

**HISTORY 291B. The City in Imperial China**

(Same as HISTORY 391B) The evolution of cities in the early imperial, medieval, and early modern periods. Topics include physical structure, social order, cultural forms, economic roles, relations to rural hinterlands, and the contrast between imperial capitals and other cities. Comparative cases from European history. Readings include primary and secondary sources, and visual materials.

3-5 units, not given this year

**HISTORY 291D. Colonialism and Collaboration in East Asia**

(Same as HISTORY 391D) The roles and problems of collaboration in the rise, sustenance, and fall of empires. Themes include conceptual definitions of collaboration and empire, collaboration of traditional elites, accommodation of religious communities, assimilation and collaboration, local intermediaries, and class and empire. Regional focus is East Asia; also cases from other colonial situations. GER:DB-SocSci

4-5 units, Win (Moon, Y)

**HISTORY 291E. Maps, Borders, and Conflict in East Asia**

(Same as HISTORY 391E) The nature of borders and border con-

licts in N.E. Asia from the 17th to the early 20th century. Focus is on contact zones between China, Russia, Korea, and Japan. The geopolitical imperatives that drove states to map their terrain in variable ways. Cultural, diplomatic, and imperial contexts. European pressures and contributions to E. Asian cartography; the uses of maps in surveillance, diplomacy, identity, and war. Student projects focus on a contested border zone. GER:DB-SocSci

4-5 units, not given this year

**HISTORY 292. The Korean War: The Origins, Outbreak, and Aftermath**

(Same as HISTORY 392) Examines major themes and scholarly works to understand the origins, outbreak, and consequences of the Korean War. One focus will be the division of Korea into ROK and DPRK and their subsequent developments. Themes include World War II in East Asia; Korean communist movements during Japanese colonial rule; the Cold War in East Asia; the roles of the US, China, and USSR in the Korean War; the ideas of key North and South Korean leaders, and the consolidation of the two Koreas after the Korean War. GER:DB-SocSci

4-5 units, Win (Moon, Y)

**HISTORY 292D. Japan in Asia, Asia in Japan**

(Same as HISTORY 392D) How Japan and Asia mutually shaped each other in the late 19th and 20th centuries. Focus is on Japanese imperialism in Asia and its postwar legacies. Topics include: pan-Asianism and orientalism; colonial modernization in Korea and Taiwan; collaboration and resistance; popular imperialism in Manchuria; total war and empire; comfort women and the politics of apology; the issue of resident Koreans; and economic and cultural integration of postwar Asia. GER:DB-SocSci, DB-SocSci, EC-GlobalCom

4-5 units, Aut (Uchida, J)

**HISTORY 292F. Traditional Korea: History and Culture**

(Same as HISTORY 392F) How iconic features of Korean tradition were created and reinvented. Themes include Korea's ancient kingdoms, the creation of Korean alphabets and its aftermath, commerce and travelers, Korean food and art, religions, the life of women and ordinary people, the kingship and court culture of the Choson dynasty, and Korea's place in premodern East Asia. The modern and contemporary debates.

4-5 units, Spr (Moon, Y)

**HISTORY 293. Law and Society in Late Imperial China**

(Same as HISTORY 392B) Connections between legal and social history. Ideology and practice, center and periphery, and state-society tensions and interactions. Readings introduce the work of major historians on concepts and problems in Ming-Qing history. GER:DB-Hum

4-5 units, not given this year

**HISTORY 293B. Homosexuality in Historical and Comparative Perspective**

(Same as HISTORY 393B) Comparative history of homoerotic desire, relations, and identity through scholarship on different historical periods and parts of the world: the classical Mediterranean, early modern European cities, late imperial and modern China, Tokugawa and modern Japan, and the U.S. GER:EC-Gender

4-5 units, not given this year

**HISTORY 293D. Empire and Cosmopolitanism: Traveling Ideas in Global Political Thought**

(Same as HISTORY 393D) GER:DB-SocSci

4-5 units, not given this year

**HISTORY 295F. Race and Ethnicity in East Asia**

(Same as HISTORY 395F) Historical, cultural, political and theoretical perspectives. Commonly misunderstood as an ethnically homogeneous country, the People's Republic of China is home to 55 officially recognized minority groups, many of whom inhabit the strategic border regions of the country. How similar assumptions of ethnic and racial homogeneity in Taiwan, Japan, and Korea are being reexamined by scholars in disciplines including anthropology, history, and political science. GER:DB-SocSci

4-5 units, Win (Mullaney, T)

**HISTORY 295J. Chinese Women's History**

The lives of women in the last 1,000 years of Chinese history. Focus is on theoretical questions fundamental to women's studies. How has the category of woman been shaped by culture and history? How has gender performance interacted with bodily disciplines

and constraints such as medical, reproductive, and cosmetic technologies? How relevant is the experience of Western women to women elsewhere? By what standards should liberation be defined? GER:DB-Hum, EC-Gender

5 units, Aut (Sommer, M)

**HISTORY 296. Communism and Revolution in China**

From the formation of the Chinese Communist Party (CCP) in 1921 through the 1949 founding of the People's Republic of China (PRC). Topics include: early theories of socialism in China; the relationship between Chinese communism and the Communist International and Soviet Union; agrarian reformulation of communism by Mao; the communist-nationalist civil war; the Communist Revolution of 1949; and the consolidation of communist power in the PRC. GER:DB-Hum

5 units, not given this year

**HISTORY 296E. Contentious Identities: The Formation of Race, Ethnicity, and Nationhood in Modern Japan**

(Same as HISTORY 396E) Exclusion and assimilation of minority groups including Ainu, Burakumin, Okinawans, Koreans, and Taiwanese; how this process was related to the construction of national, racial, and ethnic self-understanding in modern Japan. Ethno-racial formation and nationalism in Japanese society. GER:DB-SocSci

4-5 units, Spr (Shin, H)

**HISTORY 299A. Senior Research I**

1-5 units, Aut (Staff), Win (Staff), Spr (Staff)

**HISTORY 299B. Senior Research II**

1-5 units, Aut (Staff), Win (Staff), Spr (Staff)

**HISTORY 299C. Senior Research III**

1-5 units, Aut (Staff), Win (Staff), Spr (Staff)

**HISTORY 299H. Junior Honors Colloquium**

Required of junior History majors planning to write a History honors thesis during senior year. Meets twice during quarter, including the first Friday class day of the quarter.

1 unit, Win (Sommer, M)

**HISTORY 299M. Undergraduate Directed Research: Martin Luther King, Jr., Research and Education Institute**

May be repeated for credit.

1-4 units, Aut (Carson, C), Win (Staff), Spr (Staff)

**HISTORY 299S. Undergraduate Directed Research and Writing**

May be repeated for credit.

1-5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**HISTORY 299W. Undergraduate Directed Writing**

May be repeated for credit.

1-5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**HISTORY 299X. Design and Methodology for International Field Research**

(Same as HISTORY 399A) Problems involved in research abroad: ethical issues; safety; security and conduct; human subjects protocol. Methodologies of research: interviewing, networking, case studies, participant observation, large surveys.

1 unit, Spr (Kollmann, N; Roberts, R)

**GRADUATE COURSES IN HISTORY**

**HISTORY 158B. History of Education in the United States**

(Same as EDUC 201) How education came to its current forms and functions, from the colonial experience to the present. Focus is on the 19th-century invention of the common school system, 20th-century emergence of progressive education reform, and the developments since WW II. The role of gender and race, the development of the high school and university, and school organization, curriculum, and teaching. (SSPEP)

3-5 units, Win (Gordon, L), Spr (Gordon, L)

**HISTORY 158C. History of Higher Education in the U.S.**

(Same as EDUC 165, EDUC 265) Major periods of evolution, particularly since the mid-19th century. Premise: insights into contemporary higher education can be obtained through its antecedents, particularly regarding issues of governance, mission, access, curriculum, and the changing organization of colleges and universities. (SSPEP-APA)

3-5 units, Aut (Gordon, L)

**HISTORY 255E. Education, Race, and Inequality in African American History, 1880-1990**

(Same as EDUC 216X) Seminar. The relationship among race, power, inequality, and education from the 1880s to the 1990s. How schools have constructed race, the politics of school desegregation, and ties between education and the late 20th-century urban crisis.

3-5 units, Spr (Gordon, L)

**HISTORY 258D. School: What Is It Good For?**

(Same as EDUC 207X) Focus is on authors who establish claims that the purposes, functions, impacts, and social roles of schooling promote human capital, citizenship, social reproduction, values transmission, social mobility, class equality, racial equality, social stratification, disciplinary power, and the pursuit of individual interests. Historical and sociological approaches.

3-4 units, Win (Labaree, D)

**HISTORY 258E. History of School Reform: Origins, Policies, Outcomes, and Explanations**

(Same as EDUC 220D) Required for students in the POLS M.A. program; others welcome. Focus is on 20th-century U.S. Intended and unintended patterns in school change; the paradox of reform that schools are often reforming but never seem to change much; rhetorics of reform and factors that inhibit change. Case studies emphasize the American high school. (SSPEP/APA)

3-5 units, Aut (Labaree, D)

**HISTORY 258F. Education Schools: Historical and Sociological Perspectives**

(Same as EDUC 231X) The lowly status of the education school in the United States is the issue that defines the starting point of this course. Topics include an exploration the historical development of this institution, its major social function, and the interaction between the two. The course touches on a variety of scholarly domains, including the history of education, sociology of education, higher education, and educational policy.

3-4 units, Spr (Labaree, D)

**HISTORY 301. Introduction to Public History in the U.S., 19th Century to the Present**

(Same as HISTORY 201) Gateway course for the History and Public Service interdisciplinary track. Topics include the production, presentation, and practice of public history through narratives, exhibits, web sites, and events in museums, historical sites, parks, and public service settings in nonprofit organizations, government agencies, and educational institutions.

4-5 units, Aut (McKibben, C)

**HISTORY 301G. Sexual Encounters: The Middle East and Europe**

(Same as HISTORY 201G) The Middle East and Europe have been engaged for millennia. Examines this relationship from the middle ages to the present through romance, desire, sex, love, sexuality, and gender. Topics include: travel, homosexuality, marriage, family, violence, prostitution, and policing.

4-5 units, Win (Mikhail, A; Sheffer, E)

**HISTORY 304. Approaches to History**

Required of first-year History Ph.D. students.

4-5 units, Aut (Baker, K)

**HISTORY 304G. War, Culture, and Society in the Modern Age**

(Same as HISTORY 204G) How Western societies and cultures have responded to modern warfare. The relationship between its destructive capacity and effects on those who produce, are subject to, and must come to terms with its aftermath. Literary representations of WW I; destructive psychological effects of modern warfare including those who take pleasure in killing; changes in relations between the genders; consequences of genocidal ideology and racial prejudice; the theory of just war and its practical implementation; and how wars are commemorated.

5 units, not given this year

**HISTORY 305. Graduate Workshop in Teaching**

Required of first-year History Ph.D. students. Perspectives on pedagogy for historians: use of technology in teaching lectures and seminars. Addressing today's classroom: sexual harassment issues, integrating diversity, designing syllabi to include students with disabilities

1 unit, Spr (Kollmann, N)

**HISTORY 305B. Quantitative Methods in Historical Research**

(Same as HISTORY 205B) Latest techniques applied to research issues in current historical debates. Preparation of data, processing, statistical procedures to examine theoretical historical issues, and how to present quantitative materials in historical writing. Mathematical or statistical training not required.

4-5 units, Spr (Klein, H)

**HISTORY 306D. World History: Graduate Colloquium**

How do historians engage the global scale in the classroom as well as in research? The world history canon including Toynbee, McNeill, Braudel, Wolf, and Wallerstein; contrasting approaches, recent research, and resources for teaching. Recommended: concurrent enrollment in HISTORY 306E.

4 units, Aut (Wigen, K; Lewis, M)

**HISTORY 306E. International History and International Relations Theory**

(Same as HISTORY 202, POLISCI 216E, POLISCI 316) The relationship between history and political science as disciplines. Sources include studies by historians and political scientists on topics such as the origins of WW I, the role of nuclear weapons in international politics, the end of the Cold War, nongovernmental organizations in international relations, and change and continuity in the international system.

5 units, Win (Staff)

**HISTORY 306F. Identities and Identification in the Atlantic World**

How identities and processes of identification changed in Europe, Africa, and the Americas during the early modern period and as a result of the engagement of the inhabitants of these three continents in the Atlantic world.

4-5 units, Win (Herzog, T)

**HISTORY 306K. World History Pedagogy Workshop**

Students draft a syllabus and create a curriculum module for use in a world history lecture course. Corequisite: HISTORY 306D, recommended.

1 unit, Aut (Wigen, K; Lewis, M)

**HISTORY 307A. Legal History Workshop**

(Same as LAW 372.) Faculty and students from the Law school and the History department discuss research in the field of legal history. Guest speakers. Secondary literature relevant to the speaker's research. Undergraduates require consent of instructors.

4-5 units, Spr (Herzog, T; Kessler, A)

**HISTORY 308. Biography and History**

(Same as HISTORY 207) The relationship between biographical and historical writing, primarily in Europe and America. Problems of methodology, evidence, dispassion, and empathy. Texts: biographies, critical literature on biographical work, and novels (A. S. Byatt's *Possession*, Bernard Malamud's *Dubin's Lives*) that illuminate the intellectual underpinnings of biographical labor.

4-5 units, Spr (Zipperstein, S)

**HISTORY 308A. Science and Law in History**

(Same as HISTORY 208A) How the intertwined modern fields of science and law, since the early modern period, together developed central notions of fact, evidence, experiment, demonstration, objectivity, and proof.

4-5 units, Win (Riskin, J)

**HISTORY 308B. Women Activists' Response to War**

(Same as HISTORY 208B) Theoretical issues, historical origins, changing forms of women's activism in response to war throughout the 20th century, and contemporary cases, such as the Russian Committee of Soldiers Mothers, Bosnian Mothers of Srebrenica, Serbian Women in Black, and the American Cindy Sheehan. Focus is on the U.S. and Eastern Europe, with attention to Israel, England, and Argentina.

4-5 units, not given this year

**HISTORY 309A. Postcolonial Theory and Universal History**

Key texts and motifs from postcolonial theory: empire, class, exile, suffering, textuality, archive in juxtaposition to 20th-century philosophical questions about universal history and the relevance of humanist inquiry.

4-5 units, Win (Kumar, A)

**HISTORY 309B. The Century: Problem of the Present in Twentieth-Century Thought**

(Same as HISTORY 209B) What is the present? Can it stand on its own, without invoking history and without promising a future? How did the 20th century make sense of itself, as violent and ruptured from all preceding centuries as it was, yet so prolific and promising in its revolutionary achievements and futures? The century through four concepts: time, ambiguity, cruelty, and crisis. 20th-century politics through what happened to dialectic, humanism, history, and Europe.

4-5 units, Win (Kumar, A)

**HISTORY 309E. History Meets Geography**

Focus is on developing competence in GIS computer applications and applying it to historical problems. Previous experience with GIS not required. Recommended: complete the GIS tutorial in Branner Library before the course starts.

4-5 units, not given this year

**HISTORY 309F. Historical Geography Colloquium: Maps in the Early Modern World**

The significance of cartographic enterprise across the early modern world. Political, economic, and epistemological imperatives that drove the proliferation of nautical charts, domain surveys, city plans, atlases, and globes; the types of work such artifacts performed for their patrons, viewers, and subjects. Contributions of indigenous knowledge to imperial maps; the career of the map in commerce, surveillance, diplomacy, conquest, and indoctrination. Sources include research from Asia, Europe, and the Americas.

4-5 units, not given this year

**HISTORY 311A. Family, Gender, and Production in Ancient Rome**

(Same as CLASSGEN 220) Seminar. The household as the basic unit of production in Rome in the context of family relations and ideologies of gender. Methodological challenges of doing social and economic history from literary, epigraphic, and literary texts. Demography of family and kinship in ancient Rome. Ideologies of gender and family roles and their influence on economic production. Economic theories of the family and human capital.

4-5 units, not given this year

**HISTORY 311B. Jews under Islam and Christianity in the Middle Ages**

(Same as HISTORY 211B) Addresses the relationship between the Jews and the host Islamic and Christian societies during the Middle Ages (AD 500-1500). Themes, covered in a comparative context, include: the Jews' legal status, economic and political rule, toleration and persecutions, adaptation and acculturation, and religious polemics.

4-5 units, Spr (Staff)

**HISTORY 311E. Ancient War**

(Same as CLASSHIS 235A) Seminar on Greco-Roman warfare, looking at why and how wars were fought, their causes and consequences, and the experience and expense of fighting. Emphasis on comparative approaches, juxtaposing ancient Mediterranean war with warfare in other parts of the world, wars in earlier and later periods, and conflict among other species.

3-5 units, Win (Morris, I; Scheidel, W)

**HISTORY 311F. Ancient War**

(Same as CLASSHIS 235B) Continuation of 135A. Seminar on Greco-Roman warfare, looking at why and how wars were fought, their causes and consequences, and the experience and expense of fighting. Emphasis on comparative approaches, juxtaposing ancient Mediterranean war with warfare in other parts of the world, wars in earlier and later periods, and conflict among other species.

3-5 units, Spr (Morris, I)

**HISTORY 311G. Big Ancient History**

(Same as CLASSHIS 312) How the shift away from thinking about European history in terms of a western civilization model toward embedding it in stories of how global history affects research and teaching on ancient Greece and Rome. Conventional, evolutionary, and global history narratives of the past 5,000 to 15,000 years and some new ideas about how Greco-Roman history might fit into different storylines.

4-5 units, not given this year

**HISTORY 312. Holy Wars: Medieval Perspectives**

(Same as HISTORY 212) Cultural and societal factors at play in Christian holy war from late antiquity to the early modern era. Topics include: the Crusades and their meanings; armed struggle against heresy; and the wars of religion. Prerequisite: consent of instructor.

4-5 units, not given this year

**HISTORY 313. Core Colloquium in Medieval European History**

4-5 units, not given this year

**HISTORY 314. Graduate Core Colloquium in Medieval European History**

4-5 units, Aut (Miller, K)

**HISTORY 316A. Muslims and Infidels: Islam and the Crusades**

(Same as HISTORY 216A) The impact of the Crusades on the Muslim world and consciousness from the Middle Ages and to the present. Primary and secondary sources. Themes include: jihad; cultural interaction between Muslims and Christians in the Holy Land; and military, political, and ideological developments in the 12th and 13th centuries. Modern interpretations and debates about jihadist theology and global jihad.

4-5 units, not given this year

**HISTORY 317. Medieval Seminar: Classics and Key Works**

(Same as HUMNTIES 322) Colloquium focused on key primary sources that allow entry into Medieval European culture. Readings include: Augustine, On Christian Doctrine; Gregory the Great, Moralia on the Book of Job; Beowulf; the Song of Roland; and Aquinas, Summa Theologica.

3-5 units, not given this year

**HISTORY 317A. Poverty and Charity in Medieval Christianity, Judaism, and Islam**

(Same as HISTORY 217A) Topics include: Jewish, Christian, and Islamic theoretical discussions of poverty and charity; normative law versus actual practice; the voice of the poor in available source; and formal and informal institutions of charity in the medieval Mediterranean region.

4-5 units, Spr (Miller, K)

**HISTORY 317B. Land of Three Religions: Medieval Spain**

(Same as HISTORY 217B) The history of the Iberian peninsula from the Islamic conquest of 711 to the Christian expulsion of the Jews in 1492. Focus is on forms of confrontation, confluence, and hostile indifference among medieval Jews, Christians, and Muslims. What were undercurrents of aggression that gave rise to persecution of the other; what elements of commonality among groups gave rise to intellectual advancements?

4-5 units, Aut (Miller, K)

**HISTORY 318A. Barcelona to Berlin: Muslim Minorities in History**

(Same as HISTORY 218A) Muslim minorities under non-Muslim rule in different historical contexts and configurations such as enclaves and diasporas, from the Middle Ages to the present.

4-5 units, Spr (Miller, K)

**HISTORY 319B. Secularity**

Classic theories of secularity. Is a secular world possible? How does, historically seen, the notion of the secular emerge, impose itself, and get challenged? Readings include Max Weber, E. Durkheim, R.A. Markus, Carl Schmitt, and Hans Blumenberg, and studies bearing on the Middle Ages, English monastic secularization, the French Revolution, and 20th-century political religions.

4-5 units, Spr (Buc, P)

**HISTORY 320G. Demons, Witches, Holy Fools, and Folk Belief: Popular Religion in Russia, 19th and 20th Centuries**

(Same as HISTORY 220G) Popular religion in Russia, focusing on life in the provinces and villages in the nineteenth and early twentieth centuries. The double faith of Orthodox Christianity combined with folk beliefs. Topics include: parish priests, witchcraft, possession, Holy Fools, Old Believers, spiritual elders, saints, icons, religious cults, and women's lay religious movements.

4-5 units, Win (Kollmann, J)

**HISTORY 321A. Classics of Russian Historiography**

Main trends of Russian intellectual history as seen through major historians' treatment of Muscovy: Romanticism, Slavophilism,

Hegelianism, Populism, Social Democracy, New Idealism, and Marxism-Leninism.

4-5 units, *Aut (Kollmann, N)*

**HISTORY 321B. Imperial Russian Historiography**

4-5 units, *not given this year*

**HISTORY 321C. Historiography of the Soviet Union**

Major schools of interpretation of the Soviet phenomenon through works representative of a specific school, in chronological order, from the first major interpretation of the Soviet polity by Trotsky to postmodernist theories.

4-5 units, *not given this year*

**HISTORY 322. Topics in Early Modern Russian History**

4-5 units, *not given this year*

**HISTORY 323. Art and Ideas in Imperial Russia**

(Same as HISTORY 223) Poetry, novels, symphonic music, theater, opera, painting, design, and architecture: what they reveal about the politics and culture of tsarist Russia.

4-5 units, *not given this year*

**HISTORY 323B. Research Methodologies in Early Modern Russian History**

4-5 units, *not given this year*

**HISTORY 323F. The Nationality Question in the Russian Empire and the Soviet Union**

(Same as HISTORY 223F) Examines the shaping of ethnonational identity and nationalities policy in imperial Russia and the Soviet Union, concluding with an overview of nationalism in the post Soviet states. Topics include the cultural strategies pursued by governments in St. Petersburg and Moscow under the Romanovs and the Soviets, Marxist ideology on the nationality question, the influence of the Second World War on national identities inside the Soviet Union, and the role of ethnonationalism in the break up of the USSR.

4-5 units, *Spr (Patenaude, B)*

**HISTORY 324B. Modern Afghanistan**

(Same as HISTORY 224B) Politics, society, and culture in Afghanistan from the 19th century to the present. Topics include state building, tribal politics, Islamic law, geopolitics, the Taliban, and the post-Taliban disorder.

4-5 units, *not given this year*

**HISTORY 324F. The Caucasus and the Muslim World**

The linkages connecting the societies of the Caucasus to Muslim communities in Iran, Russia, the Ottoman Empire and Turkey, S. Asia, and the Middle East.

4-5 units, *not given this year*

**HISTORY 327. East European Women and War in the 20th Century**

(Same as HISTORY 227) Thematic chronological approach through conflicts in the region: the Balkan Wars, WW I, WW II, and the recent wars in the former Yugoslavia. The way women in E. Europe have been involved in and affected by these wars compared to women in W. Europe in the two world wars. Women's involvement in war as members of the military services, the backbone of underground movements, workers in war industries, mothers of soldiers, subjects and supporters of war aims and propaganda, activists in peace movements, and objects of wartime destruction, dislocation, and sexual violation.

4-5 units, *Win (Jolluck, K)*

**HISTORY 328. Circles of Hell: Poland in World War II**

(Same as HISTORY 228) The experience and representation of Poland's wartime history from the Nazi-Soviet Pact of 1939 to the aftermath of Yalta in 1945. Nazi and Soviet ideology and practice regarding the Poles and the ways Poles responded, resisted, and survived. The self-characterization of Poles as innocent victims, and their involvement or complicity in the Holocaust, thus engaging in a current debate in Polish society.

5 units, *not given this year*

**HISTORY 329. Poles and Jews**

(Same as HISTORY 229) Focus is on the period since WW I. The place of the Jews in interwar Poland, WW II, surviving Jews after the war, Polish memorialization of the Holocaust, the reality and mythology of Jews in the communist apparatus, the manipulation of anti-Semitism by the communist government, and post-communist movement toward reconciliation. Memory and national

mythology emphasizing Polish wartime behavior and the relationship of Jews to communism. The sources and uses of stereotypes, and the state of Polish-Jewish relations today.

4-5 units, *Spr (Jolluck, K)*

**HISTORY 330. Core Colloquium on Early Modern Europe: Ancien Regime**

Topics in the social, political, and religious history of Western Europe, 1550-1789, with an emphasis on France. May be repeated for credit.

4-5 units, *not given this year*

**HISTORY 330A. Core Colloquium on Early Modern Europe**

Historiographical survey from the Renaissance to the Enlightenment. Topics include the Reformations, European expansion, state and nation building, invention and scientific discovery, intellectual history, and gender. In-depth reviews determined by student interests.

4-5 units, *Aut (Stokes, L)*

**HISTORY 331B. Core Colloquium on Modern Europe: The 19th Century**

The major historical events and historiographical debates of the long 19th century from the French Revolution to WW I.

4-5 units, *not given this year*

**HISTORY 331C. Core Colloquium on Modern Europe**

The historiography of 20th-century Europe. Topics include WW I, the Russian Revolution, National Socialism, and the EU.

4-5 units, *Win (Satia, P)*

**HISTORY 331D. Core Colloquium on Modern Europe: Intellectual History**

4-5 units, *not given this year*

**HISTORY 332A. Power, Art, and Knowledge in Renaissance Italy**

Defining features of the world of Leonardo, Machiavelli, and Michelangelo. Intersections of history, politics, art, and literature. The relationship between the Renaissance and the Reformation.

4-5 units, *not given this year*

**HISTORY 332D. Rome: The City and the World, 1350-1750**

(Same as HISTORY 232D) What lies beyond the ruins of an ancient city? The history of Rome from the Renaissance to the age of the grand tour. Topics include: the political, diplomatic, and religious history of the papacy; society and cultural life; the everyday world of Roman citizens; the relationship between the city and the surrounding countryside; the material transformation of Rome as a city; and its meaning for foreigners.

4-5 units, *not given this year*

**HISTORY 332F. The Scientific Revolution**

What do people know and how do they know it? What counts as scientific knowledge? In the 16th and 17th centuries, understanding the nature of knowledge engaged the attention of individuals and institutions including Copernicus, Galileo, Descartes, Newton, the early Royal Society, and less well-known contemporaries. New meanings of observing, collecting, experimenting, and philosophizing, and political, religious, and cultural ramifications in early modern Europe.

4-5 units, *not given this year*

**HISTORY 333. Reformation, Political Culture, and the Origins of the English Civil War**

(Same as HISTORY 233) English political and religious culture from the end of the Wars of the Roses to the Civil War of the 1640s. Themes include the growth of the size and power of the state, Reformation, creation of a Protestant regime, transformation of the political culture of the ruling elite, emergence of Puritanism, and causes of the Civil War.

4-5 units, *not given this year*

**HISTORY 333B. Early Modern Sexualities**

(Same as HISTORY 233B) History of sexuality in early modern Europe. Normative sexuality, heterosexual transgressions, and minority sexualities. Theoretical approaches to and debates about the history of sexuality, in particular prior to the 19th century. Tools for critiquing the heteronormativity of early modern sources and for reading those sources for evidence of sexual diversity. Readings include monographs and primary sources.

4-5 units, *not given this year*

**HISTORY 333C. Two British Revolutions**

(Same as HISTORY 233C) Current scholarship on Britain, 1640-1700, focusing on political and religious history. Topics include: causes and consequences of the English civil war and revolution; rise and fall of revolutionary Puritanism; the Restoration; popular politics in the late 17th century; changing contours of religious life; the crisis leading to the Glorious Revolution; and the new order that emerged after the deposing of James II.

4-5 units, Aut (Como, D)

**HISTORY 333K. The Invention of the Modern Republic**

(Same as HISTORY 233K) Examines the history of republican thinking in the Atlantic World from the Renaissance to the French Revolution.

4-5 units, Spr (Staff)

**HISTORY 334. Enlightenment Seminar**

(Same as HUMNTIES 324) The Enlightenment as a philosophical, literary, and political movement. Themes include the nature and limits of philosophy, the grounds for critical intellectual engagement, the institution of society and the public, and freedom, equality and human progress. Authors include Voltaire, Montesquieu, Rousseau, Hume, Diderot, and Condorcet.

3-5 units, Win (Riskin, J)

**HISTORY 334C. Counterinsurgency in History**

(Same as HISTORY 234C) Classic texts and case studies of insurgency and counterinsurgency from the 19th century to the present.

4-5 units, Win (Sheehan, J)

**HISTORY 335. History of European Law, Medieval to Contemporary**

(Same as HISTORY 135) From the fall of the Roman Empire to the establishment of the EU. How law changed over time. Sources and nature of law, organization of legal systems, and relationships between law and society, law and lawmaker, law and the legal professions.

4-5 units, Spr (Herzog, T)

**HISTORY 336. Modern France**

4-5 units, not given this year

**HISTORY 336A. European Nationalism, 1600 to the Present**

(Same as HISTORY 236A) Theory and practice of nationalism from its genesis. What is the nation and how is it built? What is its relationship to the state? How do national movements adapt to changing ideological and geopolitical contexts? Focus is on Europe; attention to other parts of the world as required by theory studies.

4-5 units, Aut (Ward, J)

**HISTORY 336B. The Idea of Society**

(Same as HISTORY 236B) Classic texts in social theory from the seventeenth century to the present. Readings include Locke, Smith, Hegel, Comte, and Durkheim, and Weber.

4-5 units, Win (Baker, K; Sheehan, J)

**HISTORY 336C. Reordering Europe, 1917-1923**

(Same as HISTORY 236C) The struggle to craft a new European order after the disaster of the First World War. Topics: Wilsonian versus Leninist visions for Europe, Paris Peace Conference, early Weimar Germany, state-building in Yugoslavia, Greek-Turkish population exchanges, Polish-Soviet War, and Fascist rise to power in Italy. Major component of course involves student presentations and research with primary sources.

4-5 units, Win (Ward, J)

**HISTORY 336E. Violence in History and Theory**

Methodological challenges associated with defining and analyzing violence in late-19th- and 20th-century contexts. How people witnessed, coped with, and survived violent episodes. Cases of state violence, ethnic and religious conflict, warfare, genocide, and decolonization. The notion of everyday suffering in the contemporary world. Sources include anthropology, sociology, and history.

4-5 units, not given this year

**HISTORY 337. The Holocaust**

(Same as HISTORY 137) The emergence of modern racism and radical anti-Semitism. The Nazi rise to power and the Jews. Anti-Semitic legislation in the 30s. WW II and the beginning of mass killings in the East. Deportations and ghettos. The mass extermination of European Jewry.

4-5 units, Win (Felstiner, M)

**HISTORY 337C. Memory, History, and Education**

(Same as EDUC 356) Interdisciplinary. Since Herodotus, history and memory have competed to shape minds: history cultivates doubt and demands interpretation; memory seeks certainty and detests that which thwarts its aims. History and memory collide in modern society, often violently. How do young people become historical amidst these forces; how do school, family, nation, and mass media contribute to the process?

3-5 units, not given this year

**HISTORY 338A. Modern Britain: Facing Europe and Empire, Part I**

Influential approaches to problems in British, European, and imperial history. The 19th-century British experience and its relationship to Europe and empire. National identity, the industrial revolution, class formation, gender, liberalism, and state building. Goal is to prepare specialists and non-specialists for oral exams.

4-5 units, not given this year

**HISTORY 338B. Modern Britain, Part II**

Themes include empire and racism, the crisis of liberalism, the rise of the welfare state, national identity, the experience of total war, the politics of decline, and modernity and British culture.

4-5 units, not given this year

**HISTORY 339D. Capital and Empire**

(Same as HISTORY 239D, HUMNTIES 191S) Can empire be justified with balance sheets of imperial crimes and boons, a calculus of racism versus railroads? The political economy of empire through its intellectual history from Adam Smith to the present; the history of imperial corporations from the East India Company to Wal-mart; the role of consumerism; the formation of the global economy; and the relationship between empire and the theory and practice of development.

4-5 units, Spr (Satia, P)

**HISTORY 339F. Empire and Information**

(Same as HISTORY 239F) How do states see? How do they know what they know about their subjects, citizens, economies, and geographies? How does that knowledge shape society, politics, identity, freedom, and modernity? Focus is on the British imperial state activities in S. Asia and Britain: surveillance technologies and information-gathering systems, including mapping, statistics, cultural schemata, and intelligence systems, to render geographies and social bodies legible, visible, and governable.

4-5 units, not given this year

**HISTORY 339H. Modern European History in a Global Age**

How scholars can write the history of modern Europe in a way that integrates global and transnational perspectives. Discussed the methodological challenges and merits of various approaches and reviews relevant theoretical and interdisciplinary models for how this can best be done. Topics include globalization, migration, internationalism, colonialism, postcolonialism, modern warfare, and the media.

4-5 units, Aut (Naranch, B)

**HISTORY 341A. The Emergence of Medicine: The Middle Ages and the Renaissance**

How did medicine emerge as a distinctive body of knowledge and a profession? The history of medicine from ca. 1000 to 1750. Topics: new ways of examining and treating the body; the religious and cultural significance of disease; the development of hospitals; and the rise of public health systems. Comparison of the status of medicine in Europe and the Islamic world. The work of key figures such as Vesalius and Harvey. Students are required to attend the concurrent lectures of HISTORY 141A.

4-5 units, Win (Findlen, P)

**HISTORY 342. Darwin in the History of Life**

Origins and impact of evolutionary theory from the nineteenth century to the present. Early theories of fossils, the discovery of deep time and uniformitarian geology, debates over evolution vs. extinction, the origin of life, and human origins; the rise of anthropology and racial theory; the changing challenge of creationism, the abuse of evolution in eugenics and Nazi racial hygiene; and new discoveries in the realm of extreme life, evo-devo, neocatastrophism, and the new technological frontier of biomimicry. Attendance at the lectures of HISTORY 142 is required.

4-5 units, Spr (Proctor, R)

**HISTORY 343C. 18th-Century Colonial Science and Medicine**  
(Same as HISTORY 243C) The exchange of knowledge, technologies, plants, peoples, disease, and medicines. Focus is on French, British, and Dutch interests in the West Indies; examples from elsewhere. Sources include primary and secondary texts on voyaging, colonialism, slavery, and environmental exchange.

*4-5 units, not given this year*

**HISTORY 343G. Tobacco and Health in World History**  
(Same as HISTORY 243G)

*4-5 units, Aut (Proctor, R)*

**HISTORY 345A. Africa in the Era of the Slave Trade**

The slave trade, including the trans-Saharan, Indian Ocean, and trans-Atlantic trades, constituted nearly a millennium of interaction with the wider world and set in motion transformations in African societies, polities, and cultures. Topics include the debates about slavery in Africa, the impact of the slave trade on African societies, state formation, economic change, religious change, and household change in the period before the scramble for Africa in the late 19th century.

*4-5 units, Aut (Roberts, R)*

**HISTORY 346. The Dynamics of Change in Africa**

(Same as AFRICAST 301A) Crossdisciplinary colloquium; required for the M.A. degree in African Studies. Addresses critical issues in African Studies by exploring intersections of the organization of power, structure of the economy, and patterns of social stratification. Interpretive debates on Africa's engagement with the slave trade, impact of colonialism, decolonization, democratization and civil wars, health and society, and Africa's engagement with globalization. The process of knowledge production and its social location, and the current state of knowledge.

*4-5 units, Aut (Roberts, R)*

**HISTORY 347E. Health and Society in Africa**

(Same as HISTORY 245E) The history of disease, therapeutic and diagnostic systems, and the definition of health in precolonial, colonial, and postcolonial Africa. The social and political histories of specific epidemics, including sleeping sickness, influenza, TB, mental illness, and AIDS. The colonial contexts of epidemics and the social consequences of disease.

*4-5 units, not given this year*

**HISTORY 348. Islam in Africa**

(Same as HISTORY 248) Relations between African Muslims and the broader Islamic tradition over the last 1200 years. The roots of the Islamic tradition, its adoption, endogenization, and elaboration by African Muslims. The interplay of religion, politics, culture and society, and how tradition exercises influence even while being transformed. The worldviews and lives of African Muslims; how and why those worldviews and experiences changed.

*4-5 units, Spr (Hanretta, S)*

**HISTORY 348D. Law and Colonialism in Africa**

(Same as HISTORY 245G) Law in colonial Africa provides an opportunity to examine the meanings of social, cultural, and economic change in the anthropological, legal, and historical approaches. Court cases as a new frontier for the social history of Africa. Topics: meanings of conflicts over marriage, divorce, inheritance, property, and authority.

*4-5 units, Win (Roberts, R)*

**HISTORY 349. History without Documents**

(Same as HISTORY 249) Can history be written about places and times for which are no written sources, or for people in literate societies who left no written traces? Practical training in historical methods for non-documentary sources, including oral traditions and history, archaeology, ecological sources, historical linguistics, ethnography, rituals, myths, songs, and art.

*4-5 units, not given this year*

**HISTORY 351B. Core in American History, Part II**

*4-5 units, Aut (Winterer, C)*

**HISTORY 351C. Core in American History, Part III**

*4-5 units, not given this year*

**HISTORY 351D. Core in American History, Part IV**

*4-5 units, Win (White, R)*

**HISTORY 351E. Core in American History, Part V**

*4-5 units, not given this year*

**HISTORY 351F. Core in American History, Part VI**

Required of all first-year Ph.D. students in U.S. History.

*4-5 units, Spr (Chang, G)*

**HISTORY 352. Creating the American Republic**

(Same as LAW 246, POLISCI 222P) Concepts and developments in the late 18th-century invention of American constitutionalism; the politics of constitution making and ratifying; emergence of theories of constitutional interpretation including originalism; early notions of judicial review. Primary and secondary sources.

*5 units, Win (Staff)*

**HISTORY 352B. History of American Law**

(Same as LAW 318.) Modern history of American law, legal thought, legal institutions and the legal profession. Topics include law and regulation of corporate organizations and labor relations in the age of enterprise, law of race relations in the South and North, development of classical legalism, critiques of classical legalism, modern administrative state, organized legal profession, New Deal legal thought and legislation, legal order of the 50s, expansion of enterprise liability, civil rights movements from 1940, rights revolution of the Warren Court and Great Society.

*5 units, Spr (Friedman, L)*

**HISTORY 353D. Approaches to American Legal History**

(Same as LAW 651.) Legal history may once have been primarily devoted to exploring legal doctrines and key judicial opinions, and thus to be of interest mainly to legal scholars and lawyers. Now, the best writing in legal history resembles historical writing more generally, and the study of legal ideas and practices is increasingly integrated with social, intellectual, cultural, and political history. Examines recent writings in American legal history, ranging broadly across time and space to ask how the field reflects developments in historical writing more generally, and how the use of legal materials affects our understanding of major aspects of American history.

*4-5 units, Aut (Rakove, J)*

**HISTORY 355. Decision Making in International Crises: The A-Bomb, the Korean War, and the Cuban Missile Crisis**

(Same as HISTORY 252) For advanced undergraduates and graduate students. Primary documents and secondary literature. Topics include: the decision to use the atomic bomb on Japan, the Korean War, and the Cuban missile crisis.

*4-5 units, Aut (Bernstein, B)*

**HISTORY 355D. Racial Identity in the American Imagination**

(Same as AFRICAAM 255, HISTORY 255D) Major historical transformations shaping the understanding of racial identity and how it has been experienced, represented, and contested in American history. Topics include: racial passing and racial performance; migration, immigration, and racial identity in the urban context; the interplay between racial identity and American identity; the problems of class, gender, and sexuality in the construction of racial identity. Sources include historical and legal texts, memoirs, photography, literature, film, and music.

*4-5 units, Spr (Hobbs, A)*

**HISTORY 356. U.S.-China Relations: From the Opium War to Tiananmen**

(Same as HISTORY 256) The history of turbulent relations, military conflict, and cultural clashes between the U.S. and China, and the implications for the domestic lives of these increasingly interconnected countries. Diplomatic, political, social, cultural, and military themes from early contact to the recent past. WIM

*4-5 units, Win (Chang, G)*

**HISTORY 358. History of Sexuality in the U.S.**

(Same as HISTORY 258) Priority to History and Feminist Studies majors; a limited number of graduate students may be admitted. Recent historical interpretations of sexual violence, emphasizing the intersections of gender and race in the construction of rape in early America and in Canada, the racialization of rape, lynching and anti-lynching in the U.S., and feminist responses to sexual violence.

*4-5 units, not given this year*

**HISTORY 365. Writing Asian American History**

(Same as HISTORY 265) Recent scholarship in Asian American history, with attention to methodologies and sources. Topics: racial ideologies, gender, transnationalism, culture, and Asian American art history. Primary research paper.

*5 units, Win (Chang, G)*

**HISTORY 368E. American Foreign Policy and International History, 1941-2009**

(Same as HISTORY 268E) Major events and interpretations from WW II to the war in Iraq. Issues of race, expansionism and power; nuclear weapons; and war.

4-5 units, Spr (Bernstein, B)

**HISTORY 373A. The European Expansion**

(Same as HISTORY 273) The relationship between European monarchies and their colonial domains from the 16th-18th centuries. Reasons for expansion, methods, and results. Case studies include the Spanish, Portuguese, Dutch, French, and English domains in Africa, Asia, and the Americas. Readings include primary and secondary sources.

4-5 units, not given this year

**HISTORY 375F. Social Change in Latin America Since 1900**

(Same as HISTORY 275F, LATINAM 201, LATINAM 301) Changes in the social and demographic characteristics of Latin American populations since 1900 and the response of national governments in terms of the evolution of social welfare, health, and educational systems. Fulfills requirement for Latin American Studies honors seminar. Required core course for Latin American Studies master's students.

4-5 units, Spr (Klein, H)

**HISTORY 378A. The Logic of Authoritarian Government, Ancient and Modern**

(Same as POLISCI 346S) If authoritarianism is less economically efficient than democracy, and if authoritarianism is a less stable form of political organization than democracy, then why are there more authoritarian governments than democracies? To address this paradox, focus is on theoretical and empirical literature on authoritarian governments, and related literatures on the microeconomic analysis of property rights and credible commitments.

5 units, not given this year

**HISTORY 378E. Political Economy of Development**

(Same as POLISCI 440B) Required of Political Science Ph.D. students with comparative politics as a first or second concentration; others by consent of the instructor. The origins of political and economic institutions and their impact on long run outcomes for growth and democracy. Emphasis is on the analysis of causal models, hypothesis testing, and the quality of evidence.

5 units, Win (Haber, S)

**HISTORY 379. Latin American Development: Economy and Society, 1800-2000**

(Same as HISTORY 279) The newly independent nations of Latin America began the 19th century with economies roughly equal to, or even ahead of, the U.S. and Canada. What explains the economic gap that developed since 1900? Why are some Latin American nations rich and others poor? Marxist, dependency, neoclassical, and institutionalist interpretive frameworks. The effects of globalization on Latin American economic growth, autonomy, and potential for social justice.

4-5 units, not given this year

**HISTORY 381. Economic and Social History of the Modern Middle East**

(Same as HISTORY 281) The integration of the Middle East into the world capitalist market on a subordinate basis and the impact on economic development, class formation, and politics. Alternative theoretical perspectives on the rise and expansion of the international capitalist market are combined with possible case studies of Egypt, Iraq, and Palestine.

4-5 units, Aut (Beinin, J)

**HISTORY 381B. Modern Egypt**

(Same as HISTORY 281B) From just before the Napoleonic expedition of 1798 to the present. Topics: European imperialism, the political economy of cotton, rise of nationalism, gender and the nation, minorities, the coup of 1952, positive neutralism and the Cold War, and the neo-liberal reconstruction of Egypt.

4-5 units, not given this year

**HISTORY 381C. Urban History of the Middle East: Aleppo and Istanbul on the Eve of Modernity, 1650-1850**

(Same as HISTORY 281C) Questions both Orientalist and modernist assumptions concerning urban life in the Middle East during a transformative moment in global history, commercialization and

the emergence of modern imperialism. The critical relevance of cultural debates and institutional changes in provincial centers such as Aleppo to the unfolding of a modern Ottoman Empire.

5 units, Spr (Staff)

**HISTORY 381D. The Origins and Formation of Islam**

(Same as HISTORY 281D) The modern debate over the origins of Islam and the appearance of distinctive disciplines and institutions in the ninth century. Course taught in English; however, students with a proficiency in Arabic may do separate work.

4-5 units, Win (Staff)

**HISTORY 382. The United States and the Middle East since 1945**

(Same as HISTORY 282) Since the end of WW II, U.S. interests in the Middle East have traditionally been defined as access to oil at a reasonable price, trade and markets, containing the influence of the Soviet Union, and the security of Israel. Is this the full range of U.S. interests? How has the pursuit of these interests changed over time? What forces have shaped U.S. policy? What is the impact of U.S. policy on the region itself?

4-5 units, Spr (Beinin, J)

**HISTORY 382D. The Late Ottoman Empire, its Collapse, and the Making of the Turkish Nation State**

(Same as HISTORY 282D) The turbulent 1910s and the WW I, the catastrophe of the old European and Ottoman world. Focus is on the political elites, their biographies, networks, and ideologies (Ottomanism, Islamism, Turkism, social Darwinism). Topics include the Young Turk revolution of 1908, the entrance into world war, the Armenian genocide, and the Turkish revolution of the 20s.

4-5 units, Win (Staff)

**HISTORY 383. The New Global Economy, Oil, and Islamic Movements in the Middle East**

(Same as HISTORY 283) The integration of the Middle East into the world capitalist market on a subordinate basis and the impact on economic development, class formation, and politics. Alternative theoretical perspectives on the rise and expansion of the international capitalist market combined with case studies of Egypt, Iraq, and Palestine.

4-5 units, not given this year

**HISTORY 385A. Core in Jewish History, 17th-19th Centuries**

4-5 units, Aut (Rodrigue, A)

**HISTORY 385B. Core in Jewish History, 20th Century**

4-5 units, Win (Zipperstein, S)

**HISTORY 385K. History of Modern Antisemitism**

(Same as HISTORY 285K) Focus is on Europe. Topics include: origins of modern antisemitism and difference from theological forms of hatred, differences in antisemitic patterns in eastern central and western Europe; intellectual origins of modern racism, the question of Jewish self-hatred and internalization of antisemitic stereotypes; connections between philo-semitism and antisemitism; contemporary patterns of antisemitism. Emphasis is on cultural and intellectual history as well as a discussion of Jews' major ideological, political, and social responses to antisemitism.

4-5 units, Spr (Staff)

**HISTORY 387C. Zionism and Its Critics**

(Same as HISTORY 287C) Zionism from its genesis in the 1880s up until the establishment of the state of Israel in May, 1948, exploring the historical, ideological and political dimensions of Zionism. Topics include: the emergence of Zionist ideology in connection to and as a response to challenges of modernity; emancipation; Haskalah (Jewish enlightenment); other national and ideological movements of the period; the ideological crystallization of the movement; and the immigration waves to Palestine.

4-5 units, Aut (Staff)

**HISTORY 387D. Tel Aviv: Site, Symbol, City**

(Same as HISTORY 287D) Tel Aviv, the first Israeli city, from a cultural history perspective combining high and low cultural texts. Topics include: the utopian origins behind the establishment of Tel Aviv in Zionist texts; artists, poets, and writers in Tel Aviv's early years; as the capital of Bauhaus architecture; the emergence of Israeli pop culture in Tel Aviv of the late 60s and 70s; as the site of the Israeli Zionist and post-Zionist intellectuals. Sources include art, cinema, and literature.

4-5 units, Win (Staff)

**HISTORY 387E. Jewish Intellectuals and Modernity**

(Same as HISTORY 287E) Intellectual responses of Jewish thinkers to the age of extremes. Readings include a wide assemblage of twentieth-century thinkers, such as Theodor Adorno, Leo Strauss, Hannah Arendt, Isaiah Berlin, Isaac Deutscher, Hans Kohn, Lionel Trilling, Judith Shklar, George Steiner, Emmanuel Levinas, and Jacques Derrida. From these readings, an analysis of enlightenment, nationalism and socialism; political response to totalitarian ideologies, and the extent to which the Jewishness of these political thinkers and philosophers notify their writings.

4-5 units, Spr (Staff)

**HISTORY 388. Palestine and the Arab-Israeli Conflict**

(Same as HISTORY 288, IPS 388) 1882 to the present. Comparison of representative expressions of competing historical interpretations. U.S. policy towards the conflict since 1948. (Beinin)

4-5 units, Win (Beinin, J)

**HISTORY 390. Han Chinese and the Global White: The Production of Ethnoracial Majorities, East and West**

4-5 units, not given this year

**HISTORY 390A. Major Topics in Modern Chinese History: Qing/Republican Transition**

Continuities and discontinuities in society, economy, politics, culture, and thought during the transition from the Qing dynasty to the republic. May be repeated for credit.

4-5 units, not given this year

**HISTORY 391. East Asia in the Early Buddhist Age**

(Same as HISTORY 191) Evolution of cities in imperial China through early imperial, medieval, and early modern periods. Topics include physical structure, social order, cultural forms, economic roles, relations to rural hinterlands, and the contrast between imperial capitals and other cities. Comparative examination of cases from European history.

4-5 units, not given this year

**HISTORY 391A. Archaeology and Modernity in Asia: The Excavation of Ancient Civilizations in Modern Times**

(Same as HISTORY 291A) The interplay in Asia between antiquity and modernity, civilization and nation state, and national versus colonial science. The recent excavation of artifacts and places associated with Asian civilization such as the terracotta warriors in China and Angkor Wat in Cambodia. How Asian states have grappled with modernity and colonialism as they simultaneously dug up their ancient pasts.

4-5 units, not given this year

**HISTORY 391B. The City in Imperial China**

(Same as HISTORY 291B) The evolution of cities in the early imperial, medieval, and early modern periods. Topics include physical structure, social order, cultural forms, economic roles, relations to rural hinterlands, and the contrast between imperial capitals and other cities. Comparative cases from European history. Readings include primary and secondary sources, and visual materials.

3-5 units, not given this year

**HISTORY 391D. Colonialism and Collaboration in East Asia**

(Same as HISTORY 291D) The roles and problems of collaboration in the rise, sustenance, and fall of empires. Themes include conceptual definitions of collaboration and empire, collaboration of traditional elites, accommodation of religious communities, assimilation and collaboration, local intermediaries, and class and empire. Regional focus is East Asia; also cases from other colonial situations.

4-5 units, Win (Moon, Y)

**HISTORY 391E. Maps, Borders, and Conflict in East Asia**

(Same as HISTORY 291E) The nature of borders and border conflicts in N.E. Asia from the 17th to the early 20th century. Focus is on contact zones between China, Russia, Korea, and Japan. The geopolitical imperatives that drove states to map their terrain in variable ways. Cultural, diplomatic, and imperial contexts. European pressures and contributions to E. Asian cartography; the uses of maps in surveillance, diplomacy, identity, and war. Student projects focus on a contested border zone.

4-5 units, not given this year

**HISTORY 392. The Korean War: The Origins, Outbreak, and Aftermath**

(Same as HISTORY 292) Examines major themes and scholarly works to understand the origins, outbreak, and consequences of the Korean War. One focus will be the division of Korea into ROK and DPRK and their subsequent developments. Themes include World War II in East Asia; Korean communist movements during Japanese colonial rule; the Cold War in East Asia; the roles of the US, China, and USSR in the Korean War; the ideas of key North and South Korean leaders, and the consolidation of the two Koreas after the Korean War.

4-5 units, Win (Moon, Y)

**HISTORY 392B. Law and Society in Late Imperial China**

(Same as HISTORY 293) Connections between legal and social history. Ideology and practice, center and periphery, and state-society tensions and interactions. Readings introduce the work of major historians on concepts and problems in Ming-Qing history.

4-5 units, not given this year

**HISTORY 392D. Japan in Asia, Asia in Japan**

(Same as HISTORY 292D) How Japan and Asia mutually shaped each other in the late 19th and 20th centuries. Focus is on Japanese imperialism in Asia and its postwar legacies. Topics include: pan-Asianism and orientalism; colonial modernization in Korea and Taiwan; collaboration and resistance; popular imperialism in Manchuria; total war and empire; comfort women and the politics of apology; the issue of resident Koreans; and economic and cultural integration of postwar Asia.

4-5 units, Aut (Uchida, J)

**HISTORY 392E. The Historical Roots of Modern East Asia**

(Same as HISTORY 92A) Focus is on China and Japan before and during their transition to modernity. The populous, urbanized, economically advanced, and culturally sophisticated Ming empire and Muromachi shogunate in the 16th century when Europeans first arrived. How the status quo had turned on its head by the early 20th century when European and American steamships dominated the Pacific, China was in social and political upheaval, and Japan had begun its march to empire.

4-5 units, not given this year

**HISTORY 392F. Traditional Korea: History and Culture**

(Same as HISTORY 292F) How iconic features of Korean tradition were created and reinvented. Themes include Korea's ancient kingdoms, the creation of Korean alphabets and its aftermath, commerce and travelers, Korean food and art, religions, the life of women and ordinary people, the kingship and court culture of the Choson dynasty, and Korea's place in premodern East Asia. The modern and contemporary debates.

4-5 units, Spr (Moon, Y)

**HISTORY 393. Frontier Expansion and Ethnic Statecraft in the Qing Empire**

The legacy of the Qing dynasty in the territorial boundaries claimed by the People's Republic of China including the frontier zones that lie outside China proper. How the Qing acquired and ruled its frontier territories. Growth and migration of the Han Chinese population. How the dynasty's Manchu rulers managed ethnic difference. Consequences of Qing expansionism and ethnic statecraft for subject peoples and for the dynasty itself. At what point and by what processes did the Qing become China.

4-5 units, not given this year

**HISTORY 393A. State, Society, and Economy in Qing Dynasty China**

Historical scholarship on China during the Qing period, including the gentry, civil examinations, and the debate about social mobility; merchants, cities, and the debate about civil society/public sphere; taxation, local security, and famine relief; heterodoxy, collective violence, and rebellion; and rival approaches (neo-Malthusian, neo-conservative, and neo-Marxist) to understanding the high Qing economy.

4-5 units, not given this year

**HISTORY 393B. Homosexuality in Historical and Comparative Perspective**

(Same as HISTORY 293B) Comparative history of homoerotic desire, relations, and identity through scholarship on different historical periods and parts of the world: the classical Mediterranean, early modern European cities, late imperial and modern China,

Tokugawa and modern Japan, and the U.S.  
4-5 units, not given this year

**HISTORY 393D. Empire and Cosmopolitanism: Traveling Ideas in Global Political Thought**  
(Same as HISTORY 293D)  
4-5 units, not given this year

**HISTORY 395F. Race and Ethnicity in East Asia**  
(Same as HISTORY 295F) Historical, cultural, political and theoretical perspectives. Commonly misunderstood as an ethnically homogeneous country, the People's Republic of China is home to 55 officially recognized minority groups, many of whom inhabit the strategic border regions of the country. How similar assumptions of ethnic and racial homogeneity in Taiwan, Japan, and Korea are being reexamined by scholars in disciplines including anthropology, history, and political science.  
4-5 units, Win (Mullaney, T)

**HISTORY 395J. Gender and Sexuality in Chinese History**  
4-5 units, Spr (Sommer, M)

**HISTORY 396D. Modern Japan**  
Fourth in a four-part core colloquium series for graduate students. Classic and recent works that span Japan's nineteenth century, contrasting those that configure the Meiji disjuncture as a resolution with those that emphasize continuities across the 1868 divide. Emphasis is on economic, social, and cultural developments. In English.  
4-5 units, Aut (Uchida, J)

**HISTORY 396E. Contentious Identities: The Formation of Race, Ethnicity, and Nationhood in Modern Japan**  
(Same as HISTORY 296E) Exclusion and assimilation of minority groups including Ainu, Burakumin, Okinawans, Koreans, and Taiwanese; how this process was related to the construction of national, racial, and ethnic self-understanding in modern Japan. Ethno-racial formation and nationalism in Japanese society.  
4-5 units, Spr (Shin, H)

**HISTORY 399A. Design and Methodology for International Field Research**  
(Same as HISTORY 299X) Problems involved in research abroad: ethical issues; safety; security and conduct; human subjects protocol. Methodologies of research: interviewing, networking, case studies, participant observation, large surveys.  
1 unit, Spr (Kollmann, N; Roberts, R)

**HISTORY 399W. Graduate Directed Reading**  
1-10 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**HISTORY 401A. Spatial History: Concepts, Methods, Problems**  
Technical training in GIS, with modules taught by Stanford Spatial History Lab staff; conceptual work in the use of these techniques in spatial historical analysis. Students develop their own spatial history projects and produce beta versions of dynamic visualizations.  
4-5 units, Spr (Frank, Z)

**HISTORY 401B. Spatial History, Part II**  
Prerequisite: 401A.  
4-5 units, not given this year

**HISTORY 414A. Medieval History**  
4-5 units, not given this year

**HISTORY 414B. Medieval History**  
4-5 units, not given this year

**HISTORY 421A. Early Modern Russia**  
4-5 units, not given this year

**HISTORY 422A. Research Seminar on the History of the Russian Empire**  
4-5 units, not given this year

**HISTORY 422B. Research Seminar in Imperial Russia**  
4-5 units, not given this year

**HISTORY 424A. The Soviet Civilization**  
Socialist visions and practices of the organization of society and messianic politics; the Soviet understanding of mass violence, political and ethnic; and living space. Primary and secondary sources. Research paper or historiographical essay.  
4-5 units, not given this year

**HISTORY 424B. The Soviet Civilization**  
4-5 units, not given this year

**HISTORY 424C. The End of Communism in Europe**  
Causes, course, and consequences.  
4-5 units, not given this year

**HISTORY 430. Graduate Research Seminar: Early Modern Europe, 1400-1800**  
Prerequisite: 431.  
4-5 units, Spr (Findlen, P)

**HISTORY 431. Early Modern Things**  
(Same as HISTORY 231S) How do objects reveal their histories? What can be learned about the past by studying things? The material culture of early modern Europe, ca 1450-1750. Recent work on the circulation, use, and consumption of things, starting with the Columbian exchange which expanded the material horizons of the early modern world in the late 15th century, exploring challenges to the meaning of things in the age of the Reformation and Scientific Revolution, and ending with the birth of consumer society in the 18th century How did the meaning of things and people's relationships to them change over these centuries? What objects, ordinary and extraordinary, secular and sacred, natural and man-made, came to define the emerging features of the early modern world?  
4-5 units, Win (Findlen, P)

**HISTORY 433A. European History**  
4-5 units, Aut (Daughton, J)

**HISTORY 433B. European History**  
4-5 units, Win (Daughton, J)

**HISTORY 438. European History Workshop**  
All European history graduate students in residence register for this weekly workshop, at which dissertation chapters and prospectuses, papers, and grant proposals by students and faculty are read and discussed.  
1 unit, Spr (Robinson, P)

**HISTORY 439A. Graduate Research Seminar: Modern Britain and the British Empire**  
4-5 units, not given this year

**HISTORY 439B. Graduate Research Seminar: Modern Britain and the British Empire II**  
4-5 units, not given this year

**HISTORY 443A. Human Origins: History, Evidence, and Controversy**  
(Same as HISTORY 243S) Research seminar. Debates and controversies include: theories of human origins; interpretations of fossils, early art, and the oldest tools; the origin and fate of the Neanderthals; evolutionary themes in literature and film; visual rhetoric and cliché in anthropological dioramas and phyletic diagrams; the significance of hunting, gathering, and grandmothering; climatological theories and neocatastrophic geologies; molecular anthropology; the impact of racial theories on human origins discourse.  
4-5 units, not given this year

**HISTORY 444C. The History of the Body in Science, Medicine, and Culture**  
(Same as HISTORY 244C) The human body as a natural and cultural object, historicized. The crosscultural history of the body from the 18th century to the present. Topics include: sciences of sex and race; medical discovery of particular body parts; human experimentation, foot binding, veiling, and other bodily coverings; thinness and obesity; notions of the body politic.  
4-5 units, not given this year

**HISTORY 445A. Research Seminar in African History**  
Primary sources such as government records and missionary archives. Students present work in progress. Prerequisite: consent of instructor.  
4-5 units, not given this year

**HISTORY 445B. Research Seminar in African History**  
Primary sources such as government records and missionary archives. Students present work in progress. Prerequisite: consent of instructor.  
4-5 units, not given this year

**HISTORY 446A. Research Seminar: African Nationalism and Beyond**  
(Same as HISTORY 246S) African intellectual, political, social

and cultural institutions confronting issues of sovereignty, authority, heterarchy, and power during the 19th and 20th centuries.

*4-5 units, not given this year*

**HISTORY 446B. Research Seminar: African Nationalism and Beyond**

Prerequisite: 446A and consent of instructor.

*4-5 units, not given this year*

**HISTORY 447A. Intellectual and Cultural History in Modern Africa**

(Same as HISTORY 247S)

*4-5 units, Win (Hanretta, S)*

**HISTORY 448A. African Societies and Colonial States**

(Same as HISTORY 248S) The encounter between African societies and European colonialism in the colony or region of their choice. Approaches to the colonial state; tours of primary source collections in the Hoover Institution and Green Libraries. Students present original research findings and may continue research for a second quarter.

*4-5 units, not given this year*

**HISTORY 448B. African Societies and Colonial States**

*4-5 units, not given this year*

**HISTORY 459A. Graduate Research Seminar in United States History**

*4-5 units, Win (Campbell, J)*

**HISTORY 459B. Graduate Research Seminar in United States History, Part 2**

Prerequisite: HISTORY 459A.

*4-5 units, Spr (Campbell, J)*

**HISTORY 461A. U.S. Women's Family and Sexual History**

Research, design, research methods, and historical writing on topics in the history of women, the family, or sexuality in the U.S. Prepares graduate students for dissertation work. Workshop model involves exchanging preliminary prospectus, outline, writing sample, and draft for peer responses. Article-length original paper based on primary sources, to be completed by the end of Spring Quarter.

*4-5 units, not given this year*

**HISTORY 461B. U.S. Women's Family and Sexual History, Part II**

Prerequisite: 461A.

*4-5 units, not given this year*

**HISTORY 470A. Research Seminar in Latin American Social History**

How to use primary sources such as government records, estate inventories, and parish records for social history. 470A: methodological readings in social history and the development of a research project. 470B: research and writing of a seminar paper. Prerequisite: consent of instructor.

*4-5 units, not given this year*

**HISTORY 470B. Research Seminar in Latin American Social History II**

How to use primary sources such as government records, estate inventories, and parish records for social history. 470A: methodological readings in social history and the development of a research project. 470B: research and writing of a seminar paper. Prerequisite: consent of instructor.

*4-5 units, not given this year*

**HISTORY 486A. Graduate Research Seminar in Jewish History**

*4-5 units, Spr (Zipperstein, S)*

**HISTORY 486B. Graduate Research Seminar in Jewish History**

*4-5 units, not given this year*

**HISTORY 492. Society in Ancient and Medieval China**

Proseminar on conducting research in ancient or medieval China. Focus is on the theme of the emotions of the period. Sources include theoretical and comparative materials in secondary literature and primary sources. Students present research paper to class.

*4-5 units, Spr (Lewis, M)*

**HISTORY 495A. Qing Legal Documents**

How to use Qing legal documents for research. Winter: sample

documents that introduce the main genres including: the Qing code and commentaries; magistrates' handbooks and published case collections; and case records from Chinese archives. Spring: class meets occasionally; students complete research papers. Prerequisite: advanced reading ability in Chinese.

*4-5 units, not given this year*

**HISTORY 496A. Graduate Research Seminar in Modern Chinese History**

First part of a two part sequence. Primary sources and research methods to be used in the study of modern Chinese history.

*4-5 units, Win (Mullaney, T)*

**HISTORY 496B. Graduate Research Seminar in Modern Chinese History**

Second part of a two part sequence. Primary sources and research methods to be used in the study of modern Chinese history. Prerequisite: HISTORY 496A.

*4-5 units, Spr (Mullaney, T)*

**HISTORY 497A. Maps and Gazetteers as Sources for East Asian History**

For graduate students of early modern or modern East Asia. Weekend workshop on Chinese historical GIS with Harvard's Peter Bol. Students work with the Stanford Spatial History Lab to develop analytical techniques. Prerequisite: background in GIS.

*4-5 units, not given this year*

**HISTORY 497B. Maps and Gazetteers as Sources for East Asian History, Part 2**

Prerequisite: HISTORY 497A.

*4-5 units, not given this year*

**HISTORY 498C. Japanese Colonial Archives**

First part of a two quarter sequence. Graduate seminar on conducting research in modern Japanese history. Focus is on Japanese imperialism and colonialism in Asia, especially Korea. Different types of archives, from national and research libraries to online databases, and methods of research including oral history. Primary sources include government publications, classified police records, and media sources.

*4-5 units, Spr (Uchida, J)*

**HISTORY 498D. Japanese Colonial Archives, Part 2**

Second part of a two quarter sequence. Graduate seminar on conducting research in modern Japanese history. Focus is on Japanese imperialism and colonialism in Asia, especially Korea. Different types of archives, from national and research libraries to online databases, and methods of research including oral history. Primary sources include government publications, classified police records, and media sources. Prerequisite: HISTORY 498C.

*4-5 units, Sum (Uchida, J)*

**HISTORY 499X. Graduate Research**

Units by arrangement. May be repeated for credit.

*1-10 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

## HISTORY AND PHILOSOPHY OF SCIENCE (HPS)

### UNDERGRADUATE COURSES IN HISTORY AND PHILOSOPHY OF SCIENCE

**HPS 60. Introduction to Philosophy of Science**

(Same as PHIL 60) 20th-century views on the nature of scientific knowledge. Logical positivism and Popper; the problem of induction; Kuhn, Feyerabend, and radical philosophies of science; subsequent attempts to rebuild moderate empiricist and realist positions. GER:DB-Hum

*5 units, Aut (Ryckman, T)*

**HPS 61. Science, Religion, and the Birth of Modern Philosophy**

(Same as PHIL 61) Galileo's defense of the Copernican world-system that initiated the scientific revolution of the 17th century, led to conflict between science and religion, and influenced the development of modern philosophy. Readings focus on Galileo and Descartes. GER:DB-Hum

*5 units, not given this year*

**HPS 158. The Social History of Mental Illness**

An Exploration of the variety of meanings of mental illness in the past, and the diagnostic, therapeutic, cultural and policy challenges historically posed by mental illness. The course focuses on the U.S. but is not limited to it. How has mental illness been defined in history? How has the mind been medicalized and managed? Topics include the rise of institutions for the mentally ill, the growth of the psychiatric profession and the relationship between psychiatry, deviance and anti-psychiatry, and gender and psychiatric norms. GER:DB-SocSci

5 units, Aut (Horn, M)

**HPS 199. Directed Reading**

1-15 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**HPS 220. Nineteenth-Century Philosophy of Science**

The transition in philosophy of science between the determinism of the seventeenth and eighteenth centuries and the more statistically oriented science of the late nineteenth century and the early twentieth. A concentrated examination of the reconceptualization in England of induction and inductive science. The Baconian and Newtonian heritage, Scottish science, Whately's revival of logic, the Mill-Whewell debate, Charles Darwin, introduction of statistical science, Adolphe Quetelet, James Clerk Maxwell, late-century logicians and mathematicians, prelude to quantum mechanics. GER:DB-Hum

4 units, Aut (McCaskey, J)

**GRADUATE COURSES IN HISTORY AND PHILOSOPHY OF SCIENCE****HPS 299. Graduate Individual Work**

May be repeated for credit. (Staff)

1-15 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**HUMAN BIOLOGY (HUMBIO)****UNDERGRADUATE COURSES IN HUMAN BIOLOGY****HUMBIO 2A. Genetics, Evolution, and Ecology**

Introduction to the principles of classical and modern genetics, evolutionary theory, and population biology. Topics: micro- and macro-evolution, population and molecular genetics, population dynamics, and community ecology, emphasizing the genetics of the evolutionary process and applications to human populations. GER: DB-NatSci

5 units, Aut (Boggs, C; Durham, W; Francke, U)

**HUMBIO 2B. Culture, Evolution, and Society**

Introduction to the evolutionary study of human diversity. Hominid evolution, the origins of social complexity, social theory, and the emergence of the modern world system, emphasizing the concept of culture and its influence on human differences. GER:DB-SocSci

5 units, Aut (Brown, M; Klein, R)

**HUMBIO 3A. Cell and Developmental Biology**

The principles of the biology of cells: principles of human developmental biology, biochemistry of energetics and metabolism, the nature of membranes and organelles, hormone action and signal transduction in normal and diseased states (diabetes, cancer, autoimmune diseases), drug discovery, immunology, and drug addiction. Prerequisite: college chemistry, a passing grade on the Human Biology core chemistry exam, or HUMBIO 2C. GER: DB-NatSci

5 units, Win (Fuller, M; Kaiser, A; Nusse, R; Scott, M; Talbot, W)

**HUMBIO 3B. Behavior, Health, and Development**

Research and theory on human behavior, health, and life span development. How biological factors and cultural practices influence cognition, emotion, motivation, personality, and health in childhood, adolescence, and adulthood. GER:DB-SocSci

5 units, Win (Lyons, D; Lickliter, R)

**HUMBIO 3Y. Practicum in Child Development**

Practical experience at Bing Nursery School for 3.5 hours per week. Pre- or corequisite: 3B.

1 unit, Win (Winters, J)

**HUMBIO 4A. The Human Organism**

Organ system physiology: the principles of neurobiology and endocrinology, and the functions of body organs. The mechanisms of control, regulation, and integration of organ systems function. GER: DB-NatSci

5 units, Spr (Heller, C)

**HUMBIO 4B. Environmental and Health Policy Analysis**

Connections among the life sciences, social sciences, public health, and public policy. The economic, social, and institutional factors that underlie environmental degradation, the incidence of disease, and inequalities in health status and access to health care. Public policies to address these problems. Topics include pollution regulation, climate change policy, biodiversity protection, health care reform, health disparities, and women's health policy. GER:DB-SocSci

5 units, Spr (Goulder, L; Baker, L)

**HUMBIO 6. Human Origins**

(Same as ANTHRO 6, ANTHRO 206, BIO 106) The human fossil record from the first non-human primates in the late Cretaceous or early Paleocene, 80-65 million years ago, to the anatomically modern people in the late Pleistocene, between 100,000 to 50,000 B.C.E. Emphasis is on broad evolutionary trends and the natural selective forces behind them. GER: DB-NatSci

5 units, Win (Klein, R)

**HUMBIO 14. Introduction to Anthropological Genetics**

(Same as ANTHRO 14) How genetic methods address anthropological questions. Examples include the evolutionary relationships between humans and the apes, the place of the Neanderthals in human evolution, the peopling of the New World, ancient DNA, the genetics of ethnicity, forensic genetics, genomics, behavioral genetics, and hereditary diseases. GER: DB-NatSci

3-5 units, not given this year

**HUMBIO 21. Introduction to Brain and Behavior**

(Same as BIO 20) Evolutionary principles to understand how the brain regulates behavior physiologically, and is also influenced by behavioral interactions. Topics include neuron structure and function, transmission of neural information, anatomy and physiology of sensory and motor systems, regulation of body states, the biological basis of learning and memory, and behavioral abnormalities. GER: DB-NatSci

3 units, alternate years, not given this year

**HUMBIO 27. Traditional Chinese Medicine**

The philosophy and history behind traditional Chinese medicine. Concepts such as Qi, Yin/Yang, meridians, Chinese organs, and the 5 elements. How these concepts are applied through techniques such as acupuncture, herbal medicine, Qi gong, and massage. How traditional Chinese medicine is understood from a scientific standpoint. Political and socioeconomic implications. Observation of an acupuncturist. Readings on the integration of Eastern and Western medicine and on traditional Chinese medicine.

1 unit, Win (Golianu, B)

**HUMBIO 82A. Qualitative Research Methodology**

Goal is to develop knowledge and skills for designing and conducting qualitative research studies including purposes, conceptual contexts, research questions, methods, validity issues, and interactions among these facets. Each student designs a qualitative research study.

3 units, Win (Wolf, J), Spr (Wolf, J)

**HUMBIO 82B. Advanced Data Analysis in Qualitative Research**

For students writing up their own qualitative research. Students prepare a complete draft presenting their own qualitative research study including results, with reports drafted section by section, week by week. Class provides feedback, guidance, support.

3 units, Aut (Wolf, J)

**HUMBIO 84Q. Social Justice, Responsibility, Health**

(S,Sem) Stanford Introductory Seminar. Preference to sophomores. Reducing health disparities among segments of the US population is an over-arching goal of the Centers for Disease Control and Prevention (CDC). Evidence for and cause of existing health disparities; criteria for calling a health disparity unjust; and assignment of responsibility for maintaining or recovering good health.

4 units, Aut (Heaney, C)

**HUMBIO 86Q. Love as a Force for Social Change**

(S,Sem) Stanford Introductory Seminar. Preference to sophomores. Biological, psychological, religious, social and cultural perspectives on the concept of love. How love is conceptualized across cultures; love as the basis of many religions; different kinds of love; the biology of love; love as sickness; love and sex; the languages of love including art, literature, music, and poetry. Emphasis is on writing. Oral presentation.

3 units, Spr (Murray, A)

**HUMBIO 87Q. Women and Aging**

(S,Sem) (Same as MED 87Q) Stanford Introductory Seminar. Preference to sophomores. Biology, clinical issues, social and health policies of aging; relationships, lifestyles, and sexuality; wise women and grandmothers. Sources include scientific articles, essays, poetry, art, and film. Service-learning experience with older women. GER:EC-Gender

5 units, Win (Winograd, C)

**HUMBIO 90Q. Contemporary Issues in Human Experimentation**

(S,Sem) Stanford Introductory Seminar. Preference to sophomores. The guiding principles currently used to protect human subjects in terms of informed consent and protection of privacy; ethical issues relating to compensatory mechanisms for inherent risks; historical perspective and the development of the current mechanisms to safeguard the privacy and integrity of the individual; examples of use/abuse of human experimentation during medieval, Nazi, and modern times. Guest speakers currently performing human experiments or involved in approving such experimentation.

3 units, Aut (Constantinou, C)

**HUMBIO 91Q. Neuroethology: The Neural Control of Behavior**

(S,Sem) Stanford Introductory Seminar. Preference to sophomores. Animal behavior offers insights about evolutionary adaptations. The origins of the study of animal behavior and its development to the present. Discussion of original research papers. The use and misuse of parallels between animal and human behavior. Possible field trip to observe animals in their natural habitat. GER: DB-NatSci

3 units, Aut (Fernald, R)

**HUMBIO 97Q. Sport, Exercise, and Health: Exploring Sports Medicine**

(S,Sem) (Same as ORTHO 97Q) Stanford Introductory Seminar. Preference to sophomores. Sports medicine is the practice of clinical medicine at the interface between health and performance, competition and well-being. While sports medicine had its origins in providing care to athletes, medical advances developed in care of athletes exerted a great effect on the nature and quality of care to the broader community. Topics include sports injuries, medical conditions associated with sport and exercise, ethics, coaching, women's issues, fitness and health, and sports science. Case studies.

3 units, Win (Matheson, G)

**HUMBIO 99Q. Becoming a Doctor: Readings from Medical School, Medical Training, Medical Practice**

(S,Sem) Stanford Introductory Seminar. Preference to sophomores. For students considering medicine as a career. Goal is to acquaint students with medical school, training in medicine and surgery, and the practice of medicine and surgery. Topics include: how to pick a medical school and a residency; how medicine affects family life, especially children; the differences between surgical and medical specialties; the advantages and disadvantages among academic/teaching, pure research, group practice, HMO, hospital staff, or private practice; malpractice concerns; and financial considerations.

3 units, Aut (Zaroff, L)

**HUMBIO 111. Human Dimensions of Global Environmental Change: Resilience, Vulnerability, and Environmental Justice**

(Same as ANTHRO 173) The complexity of social and political issues surrounding global environmental change. Emphasis is on synergies precipitated by human-induced climatic change. Case studies and scenarios to explore the vulnerability and resilience in households, communities, regions, and nation-states most affected by extreme weather conditions. Their concerns, livelihood changes, and diverse responses of rural smallholders, indigenous

communities, the state, and local and regional migrants. Central theme is environmental justice.

3 units, Spr (Curran, L)

**HUMBIO 112. Conservation Biology**

(Same as BIO 144) Principles and application of the science of preserving biological diversity. Topics: sources of endangerment of diversity; the Endangered Species Act; conservation concepts and techniques at the population, community, and landscape levels; reserve design and management; conflict mediation. 4 units if taken with a service learning component. Prerequisite: BIO 101, or BIO 43 or HUMBIO 2A with consent of instructor. GER: DB-NatSci

3-4 units, Win (Boggs, C; Launer, A)

**HUMBIO 113. The Biologies of Humans and Plants**

The biological interdependence of humans and plants, particularly the ways in which people have imposed selection pressures and ecological change on one another. Topics include: evolution and basic plant structure; plant characteristics and genetic variants allowing domestication; effects of plant domestication on human biology; plants in traditional and contemporary diets; and human influences on plant biology through genetic manipulation and environmental change. Class meetings center on discussing journal articles.

3 units, Aut (Preston, K)

**HUMBIO 114. Environmental Change and Emerging Infectious Diseases**

(Same as ANTHRO 177, ANTHRO 277) The changing epidemiological environment. How human-induced environmental changes, such as global warming, deforestation and land-use conversion, urbanization, international commerce, and human migration, are altering the ecology of infectious disease transmission, and promoting their re-emergence as a global public health threat. Case studies of malaria, cholera, hantavirus, plague, and HIV. GER:DB-SocSci

3-5 units, not given this year

**HUMBIO 115. Environmental Crises and State Collapse: Lessons from the Past**

(Same as ANTHRO 115A) The effects and consequences of long-term human interaction with the environment. How and why past societies adapted, or failed to adapt, to changing environmental conditions and relevance to current environmental problems. Demographic, archaeological, and environmental data assessed using case studies from around the world since the late Pleistocene. Development of agriculture, societal collapse, sustainability, and policy response. Prerequisite: Human Biology core or equivalent or consent of instructor.

3 units, Aut (Truncer, J)

**HUMBIO 116. Controlling Climate Change in the 21st Century**

(Same as BIO 147, BIO 247, EARTHSYS 147, EARTHSYS 247) Global climate change science, impacts, and response strategies. Topics: scientific understanding of the climate system; modeling future climate change; global and regional climate impacts and vulnerability; mitigation and adaptation approaches; the international climate policy challenge; and decarbonization of energy and transportation systems. GER: DB-NatSci

3 units, alternate years, not given this year

**HUMBIO 117. Human Behavioral Ecology**

(Same as ANTHRO 361) Theory, method, and application in anthropology. How theory in behavioral ecology developed to understand animal behavior is applied to questions about human economic decision making in ecological and evolutionary contexts. Topics include decisions about foraging and subsistence, competition and cooperation, mating, and reproduction and parenting. GER:DB-SocSci

3-5 units, Win (Bird, R)

**HUMBIO 118. Theory of Ecological and Environmental Anthropology**

(Same as ANTHRO 90C) Dynamics of culturally inherited human behavior and its relationship to social and physical environments. Topics include a history of ecological approaches in anthropology, subsistence ecology, sharing, risk management, territoriality, warfare, and resource conservation and management. Case studies from Australia, Melanesia, Africa, and S. America. GER:DB-SocSci

5 units, Win (Bird, D)

**HUMBIO 119. Demography: Health, Development, Environment**

(Same as BIO 102) Demographic methods and their application to understanding and projecting changes in human infant, child, and adult mortality and health, fertility, population, sex ratios, and demographic transitions. Progress in human development, capabilities, and freedoms. Relationships between population and environment. Prerequisites: numeracy and basic statistics; Biology or Human Biology core; or consent of instructor. GER:DB-SocSci

3 units, Spr (Tuljapurkar, S)

**HUMBIO 120. Health Care in America: The Organizations and Institutions that Shape the Health Care System**

Health policy and health care delivery. Options for health care reform. Prerequisite: Human Biology core or equivalent, or consent of instructor.

4 units, Aut (Barr, D)

**HUMBIO 120A. Health Policy and Health Care System Design**

The design of health care systems and their ability to improve the health of the population successfully. Concepts related to health care systems and components. Focus is on the health care systems of the U.S. and UK.

4 units, not given this year

**HUMBIO 121. Critical Issues in Child Health**

Integrated picture of the physical and psychosocial health factors that result in a healthy child building on principles taught in the Human Biology core. Students apply basic human physiology to the physiology of the child to develop perspective on global pediatric health challenges and how the cultural context influences and defines the child living within it.

4 units, Aut (Adam-Seeff, M)

**HUMBIO 122. Beyond Health Care--Seeking Health in Society**

(Same as PEDS 222) Available evidence both at the national and cross-country level linking social welfare interventions and health outcomes. If and how non-health programs and policies could have an impact on positive health outcomes. Evaluation of social programs and policies that buffer the negative health impact of economic instability and unemployment among adult workers and their children. Examination of safety nets, including public health insurance, income maintenance programs, and disability insurance. Prerequisites: 4B or equivalent and background in research methods and statistics.

3 units, Win (Rodriguez, E)

**HUMBIO 122S. Social Class, Race, Ethnicity, Health**

Socioeconomic, racial, and ethnic differences in health status. Access to care of racial and ethnic minorities and those from lower social classes. Institutional factors such as government programs, and individual factors such as unconscious racial bias on the part of care providers or distrust of providers on the part of patients. The intersection of lower social class and ethnic minority status in health status and health care access. GER:DB-SocSci, EC-AmerCul

5 units, Win (Barr, D)

**HUMBIO 124. Fat Nutrition and Current Health Concerns**

Relationships between dietary fats and heart disease, cancer, obesity, diabetes, and fitness. Proposed benefits of omega-3 fats and antioxidants. Historical and economic influences on fat nutrition. Prerequisite: 3A; pre- or corequisite: 4A; preference to students who have completed 4A. Recommended: 130.

4 units, Spr (Endemann, G)

**HUMBIO 125. Current Controversies in Women's Health**

(Same as OBGYN 256) Interdisciplinary. Focus is on the U.S. Topics include: health research; bioethical, legal, and policy issues; scientific and cultural perspectives; social influences; environmental and lifestyle effects on health; and issues related to special populations. Guest lecturers; student debates. Prerequisite: Human Biology core or equivalent, or consent of instructor. GER:EC-Gender

3 units, Spr (Jacobson, M; Stefanick, M)

**HUMBIO 126. Promoting Health Over the Life Course: Multidisciplinary Perspectives**

Disease prevention and health promotion topics pertinent to different stages of the life span emphasizing healthy lifestyle and reducing risk factors in both individuals and communities. Focus is on scientific investigation, the application of behavioral science to risk reduction strategies, and the importance of health promotion

as a social and economic imperative. Topics include: epidemiology of chronic diseases; social determinants of health, behavior change; obesity, nutrition, and stress; young adult, mid-life and aging health issues; health care delivery and public health system; workplace wellness programs; and environmental and international issues. Prerequisite: Human Biology core or equivalent, or consent of instructor.

3 units, Aut (Stefanick, M; Alles, W)

**HUMBIO 127A. Community Health: Assessment & Planning I**

Major determinants of health in a community. Working with community partners to identify health issues and plan programs and policies to prevent disease and promote health. Service learning component involving students in community health assessment techniques. Prerequisite: 4B or equivalent, or consent of instructor.

4 units, Win (Heaney, C), alternate years, not given next year

**HUMBIO 127B. Community Health: Assessment & Planning II**

Continuation of 127A. Service learning course with emphasis on conducting community health assessment and planning projects in collaboration with community-based organizations. Prerequisite: 4B or equivalent, 127A, or consent of instructor.

4 units, Spr (Heaney, C), alternate years, not given next year

**HUMBIO 128. Community Health Psychology**

(Same as PSYCH 101) Social ecological perspective on health emphasizing how individual health behavior is shaped by social forces. Topics include: biobehavioral factors in health; health behavior change; community health promotion; and psychological aspects of illness, patient care, and chronic disease management. Prerequisites: HUMBIO 3B or PSYCH 1, or equivalent.

4 units, Win (Heaney, C)

**HUMBIO 129. Critical Issues in International Women's Health**

Women's lives, from childhood through adolescence, reproductive years, and aging. Economic, social, and human rights factors, and the importance of women's capacities to have good health and manage their lives in the face of societal pressures and obstacles. Emphasis is on life or death issues of women's health that depend on their capacity to negotiate or feel empowered, including maternal mortality, violence, HIV/AIDS, reproductive health, and sex trafficking. Organizations addressing these issues. Prerequisites: Human Biology core or equivalent or consent of instructor. GER:EC-Gender

4 units, Aut (Murray, A), Spr (Murray, A)

**HUMBIO 129P. International Health Policy: Comparative Health Care Systems**

Identify key dimensions and issues involved in affluent health care systems in countries such as the UK-England, Canada, Germany, Sweden, Japan, and France, including pharmaceutical policy and lessons for U.S. Learn what the key problems are that health care systems face, principal characteristics of several systems, forces of change, and structural differences. How a given country approaches health care takes us to its values, its sense of justice, its views on rationing, its interest groups, and its political power structure.

3 units, Aut (Light, D)

**HUMBIO 129S. Global Public Health**

Concepts of health and wellness and major descriptors and determinants of health status. International organizations and control programs, disease-related problems within population groups from an epidemiologic viewpoint, health care delivery methods, efforts to improve health through examination of current and previous programs and projects. Cultural, economic, and political contexts in international health.

4 units, Win (Wise, P)

**HUMBIO 130. Human Nutrition**

The study of food, and the nutrients and substances therein. Their action, interaction, and balance in relation to health and disease. Emphasis is on the biological, chemical, and physiological processes by which humans ingest, digest, absorb, transport, utilize, and excrete food. Dietary composition and individual choices are discussed in relationship to the food supply, and to population and cultural, race, ethnic, religious, and social economic diversity. The relationships between nutrition and disease; eating disorders; ethnic diets; vegetarianism; nutritional deficiencies; nutritional supplementation; phytochemicals; and food safety. Prerequisite: Human Biology core or consent of instructor.

4 units, Spr (Gardner, C)

**HUMBIO 132. Functional Anatomy of Exercise**

Interdisciplinary: physiology, pathology, and biomechanics. Anatomy of the body's major joints in the context of exercise and movement emphasizing adaptations that occur with intensity and nature of exercise, age, and disease. Students work in cooperative groups with students at the Gothenburg School of Sports Science in Sweden to produce original research. Sources include the Stanford Human Performance Laboratory. Enrollment limited to 40. Prerequisites: 139 or consent of instructor.

*4 units, not given this year*

**HUMBIO 133. Human Physiology**

(Same as BIO 112, BIO 212) The functioning of organ systems emphasizing mechanisms of control and regulation. Topics: structure and function of endocrine and central nervous systems, cardiovascular physiology, respiration, salt and water balance, exercise, and gastrointestinal physiology. Prerequisite: Biology or Human Biology core. GER: DB-NatSci

*4 units, Win (Garza, D)*

**HUMBIO 135. Exercise Physiology**

How body systems respond to the stress of acute exercise and adapt to chronic exercise training. How the cardiovascular system adapts to optimize oxygen delivery and utilization, how muscles generate force and hypertrophy in response to training, how metabolic/biochemical pathways are regulated to support the increased energy demand of exercise. Theories on the causes of fatigue and muscle soreness, and on what limits human performance. Applied topics such as the effects of aging, gender, and environmental conditions (high altitude, heat, cold) on exercise capacity will also be discussed. Prerequisite: Human Biology core, Biology core, or equivalent, or consent of instructor.

*4 units, Aut (Friedlander, A)*

**HUMBIO 135S. Applied Topics in Exercise Physiology and Metabolism**

Scientific research on topics related to exercise physiology, aging and mobility. Exercise physiology lab and field work experience. Student presentations. Summary paper. Enrollment limited to 12. Prerequisites: Human Biology core or equivalent; preference to those who have taken 135.

*3 units, Spr (Friedlander, A)*

**HUMBIO 139. Sports Medicine**

Sports, exercise, health, and medicine throughout the human performance continuum. Exercise as therapy; injuries and illnesses that result from sports and exercise; and the use of technology in modern sports science. Sources include physiology, nutrition, and biomechanics. Medical problems exacerbated or caused by exercise and sport; maximizing performance in elite athletes; and population-based issues such as exercise and its relationship to health, drugs in sport, and aging. Prerequisite: Biology or Human Biology core, or consent of instructor. GER: DB-NatSci

*4 units, Aut (Garza, D)*

**HUMBIO 140. Sex Differences in Human Physiology and Disease**

(Same as OBGYN 240, MED 240) Chromosomal and hormonal influences on cells, tissues, and organs that underlie the development of reproductive organs and sexual dimorphism of the neuroendocrine system. Consequences of sex hormones and environmental factors that differ between men and women in systems including the musculoskeletal, neurological, cardiovascular, and immunological. Guest lecturers. Prerequisite: Human Biology core or equivalent, or consent of instructor.

*2-3 units, Win (Stefanick, M)*

**HUMBIO 141. Human Developmental Biology and Medicine**

(Same as DBIO 156) The biological, medical, and social aspects of normal and abnormal human development. Topics: in vitro fertilization and embryo transfer; gene and cell therapy; gametogenesis; pattern formation in the nervous system and limb development; gene and grand multiple pregnancies; prematurity, in utero effects of teratogens; sex determination and differentiation; growth control; gigantism and dwarfism; neural tube defects; cardiac morphogenesis; progress in the developmental biology of humans. Limited enrollment. Prerequisites: Human Biology or Biology core, or consent of instructor.

*4 units, not given this year*

**HUMBIO 142. Adolescent Development**

Underlying changes and their consequences in everyday functioning. Physical, cognitive, social, and sexual development; how these changes influence the emerging sense of identity, autonomy, and intimacy. Contexts in which adolescents move such as family, friends and peers, school, and workplace. Focus is on normal development of boys and girls; attention to problem outcomes including eating disorders, depression, and teen pregnancy. Prerequisite: 3B or PSYCH 1, or consent of instructor.

*4 units, Spr (Medoff, L)*

**HUMBIO 143. Adolescent Sexuality**

Developmental perspective. Issues related to scientific, historical, and cultural perceptions; social influences on sexual development; sexual risk; and the limitations and future directions of research. Sexual identity and behavior, sexually transmitted diseases including HIV, pregnancy, abortion, gay and lesbian youth, sex education and condom availability in schools, mass media, exploitative sexual activity, and difficulties and limitations in studying adolescent sexuality. Legal and policy issues, gender differences, and international and historical trends. Prerequisite: Human Biology core or equivalent, or consent of instructor.

*4 units, Win (Medoff, L)*

**HUMBIO 144. Boys' Psychosocial Development**

(Same as EDUC 143) From early childhood through adolescence. Emphasis is on how boys' lives and experiences are embedded within their interpersonal relationships and social and cultural contexts. Interdisciplinary approach including perspectives from fields such as psychology, sociology, anthropology, family studies, and education. Prerequisite: Human Biology core or equivalent, or consent of instructor. GER:EC-Gender

*4 units, Win (Chu, J)*

**HUMBIO 145. Birds to Words: Cognition, Communication, and Language**

(Same as PSYCH 137, PSYCH 239A) Although the communicative abilities of animals are determined by their genetic endowment, and human communicative skills dwarf those of other species, the relation between language and genetics remains the subject of debate. Is human language genetically specified? Or are human communicative powers just one facet of human cognitive advantage? Focus is on the nature and origins of language, using evidence from studies of animals, children, and adults. GER:DB-SocSci

*4 units, not given this year*

**HUMBIO 145L. The Biology and Evolution of Language**

(Same as ANTHRO 171, ANTHRO 271) Language as an evolutionary adaptation of humans. Comparison of communicative behavior in humans and animals, and the inference of evolutionary stages. Structure, linguistic functions, and the evolution of the vocal tract, ear, and brain, with associated disorders (stuttering, dyslexia, autism, schizophrenia) and therapies. Controversies over language centers in the brain and the innateness of language acquisition. Vision, color terminology, and biological explanation in linguistic theory. GER: DB-NatSci

*4-5 units, Aut (Fox, J)*

**HUMBIO 146. Culture and Madness: Anthropological Approaches to Psychiatric Illness**

(Same as ANTHRO 181, ANTHRO 281) Interdisciplinary. Culture and social context on the identification, course, and outcome of psychiatric illness. What is known from psychiatry about the nature of illness as a biomedical process and from anthropology about the life course of illness within particular settings. Prerequisite: Human Biology core or equivalent or consent of instructor.

*3 units, Spr (Luhmann, T)*

**HUMBIO 147. Population and Society in Europe and China**

Comparison of family life and population dynamics in the radically different societies found at the opposite ends of Eurasia. Life at the extremes.

*4 units, Spr (Wolf, A)*

**HUMBIO 147C. Chinese Culture and Society**

An anthropological survey of life in China in the 19th and 20th centuries. Readings include literary works as well as research monographs.

*4 units, Win (Wolf, A)*

**HUMBIO 148. Kinship and Marriage**

The courses compares selected societies in Africa, Asia, and South Asia with the aim of discovering the nature of human kinship systems. GER:DB-SocSci, EC-Gender

4 units, Spr (Wolf, A)

**HUMBIO 149. Psychological and Educational Resilience Among Children and Youth**

(Same as EDUC 256) Psychological and educational theories of resilience as they relate to children and youth. Emphasis is on family, school, and community assets as they relate to protective factors that create conditions of resilience. How protective factors can be used to create healthy communities that enhance the life qualities of at-risk children and youth.

4 units, Spr (Padilla, A)

**HUMBIO 149L. Longevity**

(Same as NENS 202, PSYCH 102) Interdisciplinary. Challenges to and solutions for the young from increased human life expectancy: health care, financial markets, families, work, and politics. Guest lectures from engineers, economists, geneticists, and physiologists. GER:DB-SocSci

4 units, Win (Carstensen, L; Rando, T)

**HUMBIO 151. Introduction to Epidemiology**

Principles of epidemiology: the distribution and determinants of disease, the control of health problems, and the medical detective work required to understand disease outbreaks. Case studies from developed and developing countries to explore the use of epidemiological techniques in describing disease dynamics of human, emerging and zoonotic (animal to human) diseases (e.g., SARS, plague, HIV, influenza); the impacts of changes in policy, law, and behavior on disease control and eradication (e.g., hepatitis vaccination); and examine modern challenges in epidemiology such as global disease transmission, environmental change and bioterrorism threats.

4 units, Aut (Salkeld, D)

**HUMBIO 152. Viral Lifestyles**

Contemporary topics related to microorganism. Relevance of microorganisms to disciplines beyond molecular biology and medicine. Public health implications of human/viral interactions, and the human behaviors that bring about such interactions. The ecological role played by viruses and their role in environmental health. Prerequisite: familiarity with biological systems, evolutionary biology, and microbiology.

3 units, Spr (Wolfe, N)

**HUMBIO 153. Parasites and Pestilence: Infectious Public Health Challenges**

Parasitic and other pestilence of public health importance. Pathogenesis, clinical syndromes, complex life cycles, and the interplay among environment, vectors, hosts, and reservoirs in historical context. Public health policy initiatives aimed at halting disease transmission. World Health Organization tropical disease targets including river blindness, sleeping sickness, leishmaniasis, schistosomiasis, mycobacterial disease (tuberculosis and leprosy), malaria, toxoplasmosis, dracunculiasis, and intestinal helminthes. Guest lecturers with expertise in disease control. Prerequisite: Human Biology core or equivalent, or consent of instructor.

4 units, Win (Smith, D)

**HUMBIO 154. Cancer Epidemiology**

Epidemiological methods relevant to human research in cancer. The concepts of risk; case control, cohort, and cross-sectional studies; clinical trials; bias; confounding; interaction; screening; and causal inference. Social, political, economic, and ethical controversies surrounding cancer screening, prevention, and research. Prerequisite: Human Biology core or equivalent, or consent of instructor.

4 units, Win (Fisher, P)

**HUMBIO 155B. The Vaccine Revolution**

(Same as MI 115B) Advanced seminar. Human aspects of viral disease, focusing on recent discoveries in vaccine development and emerging infections. Journal club format: students choose articles from primary scientific literature, write formal summaries, and synthesize them into a literature review. Emphasis is on analysis, experimental design, and interpretation of data. Oral presentations. Enrollment limited to 10. Prerequisites: HUMBIO 155H, MI 155V.

6 units, alternate years, not given this year

**HUMBIO 155H. Humans and Viruses I**

(Same as MI 155H) Introduction to human virology integrating epidemiology, molecular biology, clinical sciences, social sciences, history, and the arts. Emphasis is on host pathogen interactions and policy issues. Topics: polio and vaccination, smallpox and eradication, yellow fever and history, influenza and genomic diversity, rubella and childhood infections, adenovirus and viral morphology, ebola and emerging infection, lassa fever and immune response.

6 units, not given this year

**HUMBIO 156. Global HIV/AIDS**

(Same as MED 256) Public health, policy, and research issues. Resources at Stanford and institutions such as government, NGOs, and pharmaceutical, advocacy, and international organizations. Sources include biomedical, social, and behavioral sciences. Student projects. Guest lectures. Prerequisite: Human Biology core or equivalent, or consent of instructor. GER: DB-NatSci, EC-GlobalCom

3 units, Spr (Katzenstein, D)

**HUMBIO 157. The Biology of Stem Cells**

(Same as DBIO 257) The role of stem cells in human development and potential for treating disease. Guest lectures by biologists, ethicists, and legal scholars. Prerequisites: 2A,B.

3 units, not given this year

**HUMBIO 158. The Human Genome and Disease**

(Same as BIO 109A, BIO 209A) The variability of the human genome and the role of genomic information in research, drug discovery, and human health. Concepts and interpretations of genomic markers in medical research and real life applications. Human genomes in diverse populations. Original contributions from thought leaders in academia and industry and interaction between students and guest lecturers. GER: DB-NatSci

3 units, Win (Heller, R)

**HUMBIO 159. Genes and Environment in Disease Causation: Implications for Medicine and Public Health**

(Same as HRP 238) The historical, contemporary, and future research and practice among genetics, epidemiology, clinical medicine, and public health as a source of insight for medicine and public health. Genetic and environmental contributions to multifactorial diseases; multidisciplinary approach to enhancing detection and diagnosis. The impact of the Human Genome Project on analysis of cardiovascular and neurological diseases, and cancer. Ethical and social issues in the use of genetic information. Prerequisite: basic course in genetics; for undergraduates, Human Biology core or equivalent or consent of instructor.

2-3 units, Win (Popat, R)

**HUMBIO 160. Human Behavioral Biology**

(Same as BIO 150, BIO 250) Multidisciplinary. How to approach complex normal and abnormal behaviors through biology. How to integrate disciplines including sociobiology, ethology, neuroscience, and endocrinology to examine behaviors such as aggression, sexual behavior, language use, and mental illness. GER: DB-NatSci

5 units, Spr (Sapolsky, R), alternate years, not given next year

**HUMBIO 161. The Neurobiology of Sleep**

(Same as BIO 149, BIO 249) (Graduate students register for 249.) Preference to seniors and graduate students. The neurochemistry and neurophysiology of changes in brain activity and conscious awareness associated with changes in the sleep/wake state. Behavioral and neurobiological phenomena including sleep regulation, sleep homeostasis, circadian rhythms, sleep disorders, sleep function, and the molecular biology of sleep. Enrollment limited to 16. GER: DB-NatSci

4 units, alternate years, not given this year

**HUMBIO 162. Clinical Neuroscience in Women's Health**

Mental health from the perspectives of neuroscience, psychology, human physiology, and feminist studies. Major depression, bipolar, and obsessive compulsive disorders; how the female reproductive system affects the clinical presentation and course of these disorders. Eating disorders, substance abuse and dependence, and sexual trauma within a biopsychosocial model. Pharmacologic and therapeutic treatment of illnesses. Prerequisite: Human Biology core or equivalent, or consent of instructor. GER:EC-Gender

4 units, Win (Williams, K; Rasgon, N; Zappert, L)

**HUMBIO 163. Neural Systems and Behavior**

(Same as BIO 163, BIO 263) The field of neuroethology and its vertebrate and invertebrate model systems. Research-oriented. Readings include reviews and original papers. How animal brains compare; how neural circuits are adapted to species-typical behavior; and how the sensory worlds of different species represent the world. Lectures and required discussions. Prerequisites: BIO 42, HUMBIO 4A. GER: DB-NatSci

4 units, Aut (Fernald, R), alternate years, not given next year

**HUMBIO 165. Promoting Behavior Change**

(Same as EARTHSYS 165) How to apply principles of behavioral change to a real world public health problem: climate change and environmental sustainability. Sources include theory, research, and practice from perspectives such as social and cognitive psychology, media and communication, education, behavioral medicine, social marketing, and consumer behavior. Student groups create an intervention to help elementary school students reduce their environmental footprint. Research performed in local high schools to develop optimally feasible, acceptable, and effective interventions. Prerequisite: Human Biology core or equivalent, or consent of instructor.

4 units, Spr (Robinson, T)

**HUMBIO 166. Food and Society: Exploring Eating Behaviors in Social, Environmental, and Policy Context**

The array of forces that affect the foods human beings eat, and when, where, and how we eat them, including economics, business, agriculture, law, politics, trade, ideology, culture, biology, and psychology. The impact of current policies, and actions that might be taken to improve human nutrition and health. Macro-scale influences on food, nutrition, and eating behavior.

3 units, Win (Robinson, T; Gardner, C)

**HUMBIO 167. The Art of Vision**

This course concerns eyes: how they are built, how they process visual information, and how they are affected by diseases that are major problems in our society. These issues are analyzed largely through fine art and famous artists to show the implications of normal and abnormal vision. Other examples include animal eyes, and the role of vision in music, literature, and sports.

3 units, Win (Marmor, M)

**HUMBIO 170. Justice, Policy, and Science**

Topics include civil rights, criminal justice, evidence, education, and disabled rights.

5 units, Spr (Abrams, W)

**HUMBIO 172A. Children, Youth, and the Law**

How the legal rights of children and adolescents in America are defined, protected, and enforced through the legal process within the context of their developmental needs and competing societal interests. Topics: origins and definitions of children's rights; adoption; custody; the juvenile justice system; education; informed consent; health care; protection from harm and child welfare; due process; and privacy and freedom of expression. Interactive, using hypotheticals for discussion and analysis. A and B alternate annually; students may take one or both. Prerequisite: Human Biology core or equivalent, or consent of instructor.

5 units, Aut (Abrams, W)

**HUMBIO 172B. Children, Youth, and the Law**

How the legal rights of children and adolescents in America are defined, protected, and enforced through the legal process within the context of their developmental needs and competing societal interests. Topics: origins and definitions of children's rights; adoption; custody; the juvenile justice system; education; informed consent; health care; protection from harm and child welfare; due process; and privacy and freedom of expression. Interactive, using hypotheticals for discussion and analysis. A and B alternate annually; students may take one or both. Prerequisite: Human Biology core or equivalent, or consent of instructor.

5 units, alternate years, not given this year

**HUMBIO 174. Foundations of Bioethics**

Classic articles, legal cases, and foundational concepts. Theoretical approaches derived from philosophy. The ethics of medicine and research on human subjects, assisted reproductive technologies, genetics, cloning, and stem cell research. Ethical issues at the end of life. Prerequisite: Human Biology core or equivalent, or consent of instructor. GER:EC-EthicReas

3 units, Win (Magnus, D)

**HUMBIO 175. Health Care as Seen Through Medical History, Literature, and the Arts**

The differences between disease as pathology and as the patient's experience. Topics include: patient-doctor relationships; medical technology; the changing focus on illness; gender issues; love, sex, and illness; mental illness; sick children; and death and dying. Limited enrollment. Prerequisite: Human Biology core or equivalent or consent of instructor.

3 units, Aut (Zaroff, L)

**HUMBIO 175S. Novels and Theater of Illness**

Illness and disease through novels and plays by authors including Shakespeare, Miller, Sophocles, Hemingway, and Camus. How sickness involves the patient, family, community, and state. Limited enrollment. Prerequisite: Human Biology core or equivalent or consent of instructor.

3 units, Spr (Zaroff, L)

**HUMBIO 180. Human Osteology**

(Same as ANTHRO 175, ANTHRO 275) The human skeleton. Focus is on identification of fragmentary human skeletal remains. Analytical methods include forensic techniques, archaeological analysis, paleopathology, and age/sex estimation. Students work independently in the laboratory with the skeletal collection. GER: DB-NatSci

5 units, Win (DeGusta, D)

**HUMBIO 182. Biology, Culture, and Behavior**

The examination of various aspects of human behavior (including aggression, maternal sentiments, sexual segregation, and incest) in an effort to discover whether or not there is such a thing as human nature. Prerequisite: HUMBIO 2A, 2B or equivalent. GER:DB-SocSci

4 units, Win (Wolf, A)

**HUMBIO 183. Astrobiology and Space Exploration**

Evolution in the context of space and time, focusing on the emergence of life in a planetary context on Earth and possibly elsewhere. The evolution of intelligence and the search for it elsewhere. The biological, psychological, sociological, and philosophical issues of human space exploration. Integrates information from astronautics, astrophysics, biochemistry, chemistry, evolutionary biology, geology, paleontology, physiology, psychology, and sociology. Guest lectures by scientists and astronauts from NASA, Stanford, SETI, and other universities. Prerequisite: two college-level science courses such as Human Biology core, or consent of instructor. GER: DB-NatSci

3-4 units, Win (Rothschild, L)

**HUMBIO 187. Human Diversity: A Linguistic Perspective**

The diversity and distribution of human language and its implications for the origin and evolution of the human species. The origin of existing languages and the people who speak them. Where did current world languages come from and how can this diversity be used to study human prehistory? Evidence from related fields such as archaeology and human genetics. Topics: the origin of the Indo-European languages, the peopling of the Americas, and evidence that all human languages share a common origin. GER:DB-SocSci, EC-GlobalCom

3 units, Spr (Ruhlen, M)

**HUMBIO 193. Research in Human Biology**

Independent research conducted under faculty supervision, in junior or senior year, normally but not necessarily in pursuit of an honors project. May be repeated for credit; petition required for more than 5 units. Prerequisite: application available in student services office.

1-5 units, Aut (Staff), Win (Staff), Spr (Staff)

**HUMBIO 194. Honors**

Completion of the honors project, normally taken in the student's final quarter. First component: the honors thesis, a final paper providing evidence of rigorous research, fully referenced, and written in an accepted scientific style. Second component: participation in the honors symposium, including a 10-minute oral presentation followed by a brief question and answer session. Prerequisites: 193 or 199, and acceptance into the honors program.

1-10 units, Aut (Staff), Win (Staff), Spr (Staff)

**HUMBIO 197. Human Biology Internship**

Limited to and required of Human Biology majors. A supervised field, community, or lab experience of student's choosing, pre-

approved by Human Biology faculty and student advisers, and initiated at least three quarters prior to graduation. Participation in a poster session on the internship experience is required during the first quarter that the student is in residence at Stanford after completion of the internship. May be repeated for credit. Prerequisite: Human Biology core.

1-4 units, Aut (Staff), Win (Staff), Spr (Staff)

#### **HUMBIO 198. Senior Tutorial in Human Biology**

Reading for Human Biology majors in exceptional circumstances and under sponsorship of Human Biology associated faculty. Students must apply through Human Biology student services before registering. Reading list, paper, and evaluation required. May be repeated for credit.

1-5 units, Aut (Boggs, C; Cacciari, L), Win (Boggs, C; Cacciari, L), Spr (Staff)

#### **HUMBIO 199. Directed Reading/Special Projects**

Human Biology majors must obtain a sponsor from the Human Biology associated faculty or the Academic Council. Non-majors and students who have not declared must obtain a sponsor only from the Human Biology associated faculty. Students must complete application in student services office.

1-4 units, Aut (Staff), Win (Staff), Spr (Staff)

#### **HUMBIO 200. Teaching of Human Biology**

For upper division undergraduates and graduate students. Practical experience in teaching Human Biology or serving as an assistant in a lecture course. May be repeated for credit.

1-5 units, Aut (Staff), Win (Staff), Spr (Staff)

## HUMANITIES AND SCIENCES (HUMSCI)

### UNDERGRADUATE COURSES IN HUMANITIES AND SCIENCES

#### **HUMSCI 190. Individually Designed Major Honor's Thesis**

May be repeated for credit. (Staff)

1-10 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

### GRADUATE COURSES IN HUMANITIES AND SCIENCES

#### **HUMSCI 201. Graduate Environment of Support**

Psychosocial, financial, and career issues in adapting graduate students to Stanford; how these issues relate to diversity, resources, policies, and procedures. Discussions among faculty, advanced graduate students, campus resource people, and the dean's office.

1 unit, Aut (Thomas, A)

## IBERIAN AND LATIN AMERICAN STUDIES (ILAC)

### UNDERGRADUATE COURSES IN IBERIAN AND LATIN AMERICAN STUDIES

#### **ILAC 114N. Lyric Poetry**

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. For students with considerable competence in Spanish. Elements and expressive devices of lyric poetry: multidimensional language, denotation, connotation, image, metaphor, symbol, allegory, paradox, irony, meaning, idea, rhythm, and meter. Poets of Spain and Latin America of the late 19th and early 20th century including G. A. Bécquer, Rosalía de Castro, Rubén Darío, Miguel de Unamuno, Antonio Machado, García Lorca, Pablo Neruda, and Gabriela Mistral. In English and Spanish.

3-5 units, Aut (Predmore, M)

#### **ILAC 117N. Film, Nation, Latinidad**

(F,Sem) Stanford Introductory Seminar. Examination of films from Spain, Mexico, and Latina/o USA that expand, trouble, contest, parody, or otherwise interrogate notions of national identity.

Filmmakers may include Lourdes Portillo, Alejandro González Iñárritu, John Sayles, María Novaro, Pedro Almodóvar, and Gregory Nava.

3-4 units, Spr (Yarbro-Bejarano, Y)

#### **ILAC 120. Introduction to Literary and Scholarly Research**

Strategies and tactics for research and writing in the humanities; focus is on the Spanish-speaking world. How to write a research proposal; how to conduct research online and in the library; annotated bibliographies; bibliographical essays; rhetorical strategies; and common logical fallacies. WIM

3 units, Aut (Surwillo, L)

#### **ILAC 130. Cultural Perspectives in Iberia**

The historical dynamics, linguistic plurality, and social complexity of the Iberian world. Topics include: war and revolution; absolutism and liberalism; republicanism; the crisis at the end of the century: the year 98; the civil war; dictatorships, Franco, and Salazar; the revolution of cloves and the transition towards democracy; and open society and El manifiesto por la lengua común. GER:DB-Hum

3-5 units, Spr (Predmore, M)

#### **ILAC 131. Cultural Perspectives in the Luso-Hispanic Americas**

Major theoretical debates about the construction of Latin American identities, from the 19th century to the present. Readings by writers, poets, philosophers, and historians, including Rodo, Retamar, O'Gorman, Vasconcelos, Henríquez-Ureña, Ramos, Paz, Carpentier, Lezama Lima, Borges, and Fuentes. GER:DB-Hum

3-5 units, Win (Librandi Rocha, M)

#### **ILAC 136. Survey of Modern Iberian Literatures**

1800 to the present. Topics include: romanticism; realism and its variants; the turn of the century; modernism and the avant garde; the Civil War; and the second half of the 20th century. Authors may include Mariano José de Larra, Gustavo Adolfo Bécquer, Rosalía de Castro, Benito Pérez Galdós, Migue de Unamuno, Pío Baroja, Joan Maragall, Antonio Machado, Federico García Lorca, Salvador Espriu. GER:DB-Hum

3-5 units, Aut (Resina, J)

#### **ILAC 137E. Viewing Modern Barcelona**

An introduction to the salient aspects of Barcelona's history, its role in Spain's modernization and democratization as well as its tensions with the state. Emphasis on the modern period, from the tearing down of the ancient walls and the city's expansion in the mid-nineteenth century to the Olympic and post-Olympic definition of public space. Attention will be given to city planning, the architecture of Gaudí, the art work of Picasso and Dalí, popular music and literature about the city.

3-5 units, Aut (Resina, J)

#### **ILAC 148. Animals and Animality in Modern Latin American Literature**

The quest for a decisive criterion dividing the human and the animal, the function it serves in reality and in fantasy, and how this divide can be challenged or contested. Animals as they appear in the literary canon of Latin America in relation to modernity and modernization. Authors may include: Alegría, Quiroga, Ramos, Cortázar, Lispector, Borges, Vargas Llosa, Bataille, and Derrida.

3-5 units, Aut (Briceno, X)

#### **ILAC 150. Pseudonyms, Plagiarism and Identity Theft in Modern Iberian Literature**

Cervantes' attribution of Don Quijote's authorship to Cide Hamete Benengeli demonstrates the aesthetic freedom made possible by considering a text's signature as a mask donned in the process of literary creation. Cervantes' legacy survives through a host of modern Iberian authors who have fractured the notion of a stable relationship between the proper name as it appears on a work and the identity of the artist. This process allows writers to work around censorship and other prohibitions in order to create an artistic space, alter conceptions of identity and engage with the work of others in ways that may seem unethical

3-5 units, Win (Viestenz, W)

#### **ILAC 157. Introduction to Medieval and Early Modern Iberian Literatures**

Topics may include: lyric and epic poetry; Jewish and Muslim literatures; the development of Castilian, Catalan, and Portuguese prose; the Valencian golden age; texts of the Renaissance and Ba-

roque; the literature of imperial expansion into Africa, Asia, and the Americas. GER:DB-Hum

3-5 units, *Win (Barletta, V)*

**ILAC 158. New Latin American Short Stories and Films (1980-2009)**

The short form in literature and film in Latin American countries with a focus on Mexico, Cuba, Argentina, Colombia, and Brazil from the 80s to the present. Authors include Bellatin, Portela, Vega Serova, Parra, and Paz Soldán. Filmmakers include Cuarón, Gruener, Furtado, Moya, and Novaro.

3-5 units, *Win (Ruffinelli, J)*

**ILAC 161. Survey of Latin American Literature**

From independence to the present. Topics include romantic allegories of the nation; modernism and postmodernism; avant garde poetry; regionalism versus cosmopolitanism; indigenous and indigenist literature; magical realism and the literature of the boom; Afro-Hispanic literature; and testimonial narrative. Authors: Bolívar, Bello, Gómez de Avellaneda, Isaacs, Sarmiento, Machado de Assis, Darío, Martí, Mistral, Vallejo, Huidobro, Borges, Cortázar, Neruda, Guillén, Rulfo, Ramos, Arguedas, García Márquez, Lispector, Menchú, and Bolaño. GER:DB-Hum

3-5 units, *Spr (Bricheno, X)*

**ILAC 169. The Hedgehog's Awakening: Basque Culture's Return**

Austrian linguist Hugo Schuchardt predicted that the Basque language, Euskera, would vanish in the first half of the 20th century. But there was a Basque reawakening from 1960. Topics: reasons for this cultural reawakening, analysis of cultural aspects, from phenomena like *bertsolaritza* (oral improvisation) to literary, film, and art production by new Basque authors.

3-5 units, *Spr (Garmendia, J)*

**ILAC 189A. Honors Research**

Senior honors students enroll for 5 units in Winter while writing the honors thesis, and may enroll in 189B for 2 units in Spring while revising the thesis. Prerequisite: DLCL 189.

5 units, *Win (Staff)*

**ILAC 189B. Honors Research**

Open to juniors with consent of adviser while drafting honors proposal. Open to senior honors students while revising honors thesis. Prerequisites for seniors: 189A, DLCL 189.

2 units, *Spr (Staff)*

**ILAC 193. The Cinema of Pedro Almodovar**

The evolution of Spain's most recognizable director from marginal, transgressive amateur cinema to polished visual style. The deliberate blurring of frontiers between mass and high culture; his use of metafilmic allusions and attention to sexuality, extreme experiences, and marginal characters. From his early work to recent award-winning films. Prerequisite: spoken Spanish. GER:DB-Hum

3-5 units, *Spr (Resina, J)*

**ILAC 197. Brazilian Culture in a Comparative Latin American Perspective**

Brazilian modernization and cultural dynamism in the second half of the 20th century. Concrete poetry and its relation to the construction of Brasilia, the bossa nova movement, and tropicalism. Comparative studies in the global art context. Authors include: Haroldo de Campos, Augusto de Campos, Decio Pignatari, Eugen Gomringer, Severo Sarduy, Octavio Paz, Ramón Xirau, Max Bense, and Charles Bernstein. Texts in English, Spanish, and Portuguese.

3-5 units, *not given this year*

**ILAC 199. Individual Work**

Open to students in the department, or by consent of instructor.

1-12 units, *Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

**ILAC 231. War of Images: Photography in Catalonia During the Spanish Civil War**

War of Images: Photography in Catalonia During the Spanish Civil War The Spanish Civil War was the first war ever to be photographed in situ. The production and circulation of images was central to the internationalization of the conflict. This war marked the appearance of war photojournalism and the origin of a certain way of explicating history. Because of its strategic and cultural significance, Catalonia was a true visual laboratory. The course will examine the photographic work by Robert Capa, Gerda Taro,

and Margaret Michaelis, as well as the work of Catalan photographers such as Agustí Centelles and Josep Maria Sagarra.

3-5 units, *Aut (Antich, X)*

**ILAC 240E. Borges and Philosophy**

Analysis of the Argentine author's literary renditions of philosophical ideas. Topics may include: time, free will, infinitude, authorship and self, nominalism vs. realism, empiricism vs. idealism, skepticism, peripheral modernities, postmodernism, and Eastern thought. Close reading of short stories, poems, and essays from *Labyrinths* paired with selections by authors such as Augustine, Berkeley, James, and Lao Tzu. The course will be conducted in English; Spanish originals will be available. Satisfies the capstone seminar requirement for the major in Philosophy and Literature. GER:DB-Hum

3-5 units, *Aut (Hoyos, H)*

**ILAC 241. Fiction Workshop in Spanish**

Latin American and Iberian short stories approached through the theory and craft of this genre. Assignments are creative in nature and focus on the formal elements of fiction (e.g. character and plot development, point of view, creating a scene). Students will also write, workshop, and revise an original short story throughout the term. No previous experience with creative writing is required. Readings include works by Ayala, Bolaño, Borges, Cervantes, Clarín, Cortázar, García Márquez, Piglia, and others. Prerequisite: Spanish 102 or permission of instructor.

3-5 units, *Aut (Santana, C)*

**ILAC 247E. Magical Realism and Globalization**

Is magical realism a genre, a style, a politics, or a label for elaborate fiction from the Third World? Seminal works and their role in the 20th century. Topics include: postcolonial discourse, myth and truth, tradition versus modernity, and realism versus fantasy. Novels, plays, and short stories by García Márquez, Rushdie, and Morrison; films by Schlöndorff and Begnigni; essays by Roh and Carpentier. GER:DB-Hum

3-5 units, *not given next year*

**ILAC 250. Latin America at the End of the Cold War**

Systematic study of the cultural transformations in Latin America before and after the fall of the Berlin Wall. Comparisons between works that respond to the defining moments of the conflict (Neruda, Cardinal) and texts that reflect on its later, residual stage. Fiction: *Sin remedio* by Antonio Caballero, *Literatura nazi en América* by Roberto Bolaño, and *Pasado Perfecto* by Leonardo Padura. Film: *Hijos de la guerra fría* by Gonzalo Justiniano. Theoretical readings by Jorge Castañeda, Michael Reid, and Jean Franco.

3-5 units, *Spr (Hoyos, H)*

**ILAC 256. Drug Wars in Latin America: Policies & Politics through Literature and Film**

Representations of Latin American (and Chicano) Narcos and Druglords in film, telenovelas, corridos, essays and novels and how these representations affect governmental policies. Films: *Tropical Snow* by Ciro Durán; *The Camarena Story* by Brian Gibson; *Escobar, The King of Cocaine* by Steven Dupler; *True Story of Killing Pablo* by David Keane; *Kingpin* by David Mills; *El rey* by José Antonio Dorado; *Sumas y restas* by Víctor Gaviria; *María llena eres de gracia* by Joshua Marston. Books: *La reina del sur* by Pérez-Reverte; *Killing Pablo* by Bowden; *Drugs, Thugs, and Divas: Telenovelas and Narco-Dramas in Latin America* by O. Hugo Benavides.

3-5 units, *Aut (Ruffinelli, J)*

**ILAC 259. Military, Intelligentsia, Las Madres of Plaza de Mayo & Tlatelolco: Film & Politics 1968-2009**

An examination of how contemporary Latin American cinema (in documentaries and feature films) has focused on several historical "pockets" of the Continent: the Dirty War, the Falkland Islands war, the Tlatelolco Massacre, the Vladvideos and corruption in Peru, the Disappeared, as part of the historical reconstruction of the recent past. Films: *La deuda interna*, *Rojo Amanecer*, *La historia oficial*, *Por esos ojos*, *La noche de los lápices*, *Mariposa Negra*, *Cautiva*, *Hijos/Figli* and others.

3-5 units, *Spr (Ruffinelli, J)*

**ILAC 263. Visions of the Andes**

What visions and images of the Andes circulate in contemporary Latin American literature? How are they constructed? How is their value accrued? An exploration of the visual economy of the Andes

in representative literary texts of the 20th century, vis-à-vis critical discourses about Andean culture. Topics: visual culture and identity, iconography and the word/image tension, nature vs. culture, debates on utopia, indigenismo, mestizaje, and hibridez. Authors may include: Pablo Neruda, Gabriela Mistral, Martín Chambi, José Carlos Mariátegui, César Vallejo, José María Arguedas, Mario Vargas Llosa, Raúl Salmón, Aurelio Arturo. Spanish proficiency required.

3-5 units, *Win (Briceno, X)*

**ILAC 271. Brazilian Presence: Landscape, Life and Literature**  
Brazil's literary representation of the it's diverse regional cultures and ecology through the works of Euclides da Cunha describing the Amazon in the early 1900s; the travels of anthropologist Claude Lévi-Strauss and his contact with Caduveo, Nhambiquara, Bororo and Tupi indigenous tribes; Mario de Andrade's novel, *Macunaima* and its ironical representation of Brazilian identity and miscegenation; Guimarães Rosa's short stories that show the imagery of the sertão and its people (the sertanejo culture); Milton Hatoum's novel, *The Brothers*, and its impressive portrayal of Manaus city in the 20th century as an unstable world seen through the lens of Lebanese immigrants. GER:EC-GlobalCom

3-5 units, *Aut (Librandi Rocha, M)*

**ILAC 272E. Clarice Lispector: the Style of Ecstasy**

An exploration of the presence, both in the mystic and in the erotic sense, of the feeling of ecstasy in Clarice Lispector's texts (novels, short stories, chronicles). Ecstasy favors a non-conceptual approach to writing and reading and an effect of delight that can be only communicated by words that mimitizes music and visual arts. Theoreticians of ecstasy, eroticism and epiphany: G. Bataille, H. Cixous, Jean-Luc Nancy; Gumbrecht, Lyotard. Course taught English with readings in English and Portuguese.

3-5 units, *Spr (Librandi Rocha, M)*

**ILAC 278. Senior Seminar: Nineteenth Century Iberia in 1868**

Social, political, and cultural aspects of 19th-century Iberia as seen through the frame of a single year, the Glorious Revolution of 1868 that led to the abdication of the Bourbon monarch. Readings include primary and secondary texts, from newspapers to legal treatises to poetry and theater from all areas of the Iberian Peninsula and overseas provinces. GER:DB-Hum

3-5 units, *Spr (Surwillo, L)*

**ILAC 278A. Senior Seminar: Accursed Writers**

Exploration of the figure of the outcast in Colombian literature. After a succinct consideration of the term "maudit" in Rimbaud, we will focus on the life, poetry, and prose of José Asunción Silva (1865-1896) and Porfirio Barba-Jacob (1883-1942). We will then turn our attention to the fiction and autobiographical writing of Andrés Caicedo (1951-1977) and Fernando Vallejo (1942), who revisit outcast motifs while veering from the mainstream tradition epitomized by García Márquez. Topics: decadence, incest, homosexuality, exile, addiction, and faith.

3-5 units, *Win (Hoyos, H)*

**ILAC 280. Latina/o Literature**

Examination of a diverse set of literary texts by Latinas/os, bringing history, politics, and cultural theory to bear in order to apprehend the significant intracultural differences amongst Latinas/os (most notably concerning im/migration). Gender and sexuality as critical lenses that reflect and refract themes such as identity, language politics, transnationalism, political turmoil, socioeconomic status, and the notion of home/land and its loss, reinvention, and/or reclamation

3-5 units, *Aut (Yarbro-Bejarano, Y)*

**ILAC 332. Race and Slavery in Nineteenth Century Spanish Empire**

An analysis of the literature written in Spain during the nineteenth and twentieth centuries dealing with the empire post 1808. Authors discussed include Blanco White, Baroja, Avellaneda, and Rusiñol, among others

3-5 units, *Aut (Surwillo, L)*

## GRADUATE COURSES IN IBERIAN AND LATIN AMERICAN STUDIES

**ILAC 218. Anticlericalism in the Iberian Novel of XIX**

The rapid social and cultural changes in which 19th-century novel-

ists wrote; the anti-clerical stance as marker of society's attempts to modernize. Why were monks and priests reviled by many Spanish novelists? How and why did they re-write Spanish history around these figures? What was the role of the church and religious men in modern society? Questions of individualism, property, and labor in novels by major Iberian prose realists. In Spanish.

3-5 units, *Win (Surwillo, L)*

**ILAC 222. The Problem of Two Spains: Literature and Society in 19th-Century Spain**

Representative literary figures including Larra, Espronceda, Zorrilla, Rosalía de Castro, Bécquer, and Galdós. Modern lyric poetry and the modern realist novel against the background of Napoleonic invasions, the loss of overseas colonies, two Carlist civil wars, and frustrated attempts to establish the First Spanish Republic.

3-5 units, *Spr (Predmore, M)*

**ILAC 225E. Theater, Society, and Politics in 20th-Century Spain**

Ramón del Valle-Inclán and Federico García Lorca. The avant garde nature of their major plays and their engagement with social and political issues of the times including feudalism, the emerging liberal state, women's protest, class struggle, and civil war. Symbolism, expressionism, and realism.

3-5 units, *not given this year*

**ILAC 299. Individual Work**

Open to department advanced undergraduates or graduate students by consent of professor. May be repeated for credit.

1-12 units, *Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

**ILAC 323. Renaissance/Early Modern Seminar**

(Same as HUMNTIES 323) Focus is on how authors and readers from this period theorize various historical processes: the rise of European imperialism; religious conflicts and revolutions; new understandings of the self and the world; and the rise of the novel. Authors: Boccaccio, Machiavelli, Núñez Muley, Martorell, Rabelais, Camões, Cervantes, Montaigne, and Shakespeare.

3-5 units, *Spr (Barletta, V)*

**ILAC 326. Philosophies of Otherness: Aesthetics of Difference**

Two of theories most important contributions in the second half of the 20th century were the notions of otherness and difference. Both notions condense the deconstruction of the notions of totality and identity on which the Western philosophical tradition rested, with aesthetic, ethical, and political implications. An exploration of the impact of these theoretical reflections with reference to critical theory (Benjamin, Adorno) and the French philosophy of difference (Lévinas, Derrida, Cixous). Their aesthetic implications will be analyzed with the help of the Catalan visual culture from the same period.

3-5 units, *Aut (Antich, X)*

**ILAC 330. Josep Pla: From Journalism to Literature**

In the 1920s and 30s journalism gave the tone to a "normalized" Catalan culture, whose distinctive traits were a cosmopolitan outlook and a high degree of professionalism. It is in this context that the works of journalist Josep Pla grow from an underbrush of quality journalism that, long neglected, throws light on the social and political situation of the time and constitutes an unsurpassed civilizational referent for today's culture wars. Some of the journalists studied are Josep Pla, Eugeni d'Ors, Eugeni Xammar, and Gaziel. Readings in Catalan will be available in Spanish, but students are responsible for ordering the texts in the preferred version.

3-5 units, *Win (Resina, J)*

**ILAC 336. Early 20th-Century Peninsular Spanish Poetry**

Poetry in restoration Spain, 1871-1930, against the background of the democratic tradition of Spanish liberalism. Emphasis is on stylistic analysis and concepts such as the generation of 1898, modernism, Krausism, pure poetry, and symbolic systems.

3-5 units, *Win (Predmore, M)*

**ILAC 337. Cultural and Political Change in the Basque Country**

Toward the middle of the 1970s Basque society reacted against the cultural and political poverty in which it had been immersed by the long Spanish postwar. An analysis of the work and influence on today's Basque social life of leading figures of the cultural rebirth, such as sculptor Jorge Oteiza, linguist Luis Mitxelena, poet Gabriel Aresti and the musicians of the group *Ez dok amairu*, specially Mikel Laboa.

3-5 units, *Spr (Garmendia, J)*

**ILAC 340. The Crowded Solitude of Juan Rulfo: his Writing, his Photography, his Children, his Legacy**

A study of Mexican writer Juan Rulfo's literary work and photography as well as the film adaptations of his work, his portrayal in documentaries authored by his son Juan Carlos Rulfo and his literary legacy among young writers who have "continue" his work, like Elmer Mendoza's Cóbraselo Caro and Susana Pagano's Y si yo fuera Susana San Juan?

3-5 units, Win (Ruffinelli, J)

**ILAC 344. Theorizing the Novel after 1989**

Issues of literary historiography, canon formation, and cultural relevance through a detailed study of selected works, criticism, and theory from the last two decades. Topics may include: postnationalism, cultural synchronization, fiction as commodity, revisions of dictatorship, new media ecologies, anxiety of influence, meaning-making communities, and relations to visual culture. Readings by Latin American authors: Bolaño, Vallejo, Eltit, Bellatin and Fuguet. Critical texts by Richard, Sarlo, Rancière, and Casanova.

3-5 units, Aut (Hoyos, H)

**ILAC 370E. Machado de Assis: Mimesis, Memory, and Money Machinations**

Machado de Assis's paradoxes: the great author of the 19th century and his oblique and peripheral perspective. The ruins and rebuilds of memory: *Memórias Póstumas de Brás Cubas* and *Memorial de Aires*; mimesis in Dom Casmurro; his short stories and Rio de Janeiro's 19th-century's sociability. The economy in his chronicles. Recent critical readings and editions. In English; readings in English and Portuguese.

3-5 units, Spr (Librandi Rocha, M)

**ILAC 374. Luso-Brazilian Practices of Representation in the 16th, 17th, and 18th Centuries**

Appropriations of the description of Luso-Brazilian literary production of the 16th, 17th, and 18th centuries by Brazilian literary historiography through the exclusion of the baroque from the literary canon by Antonio Candido de Mello e Souza; and through the critique of such exclusion in *O Sequestro do Barroco: O caso Gregório de Matos* by Haroldo de Campos. The institutional conditionings, linguistic (rhetorical and theopolitical) and bibliographical codes of this literary production, presuming the long international duration of the Iberian Catholic politics, in order to define and analyse the processes of verbal action and the norms of social regulation.

3-5 units, Win (Hansen, J)

**ILAC 380E. Critical Concepts in Chicana/o Literature**

Interrogation of the critical discourses that have configured and reconfigured the canon of Chicana/o literature over the last thirty years. Close readings of primary texts, mainly narrative, within the development of Chicana/o literary and cultural criticism. Construction of narrative genealogies and foundational texts. Impact of the publication of late-19th or pre-movement novels and Chicana feminist/lesbian/queer critiques. Consideration of alternative paradigms such as positioning Chicana/o literature within a U.S. Latina/o literary imaginary, and the shift of critical discourse in the field of visual art from a paradigm of resistance and affirmation to one of post-Chicano.

3-5 units, Aut (Yarbro-Bejarano, Y)

**ILAC 389E. Race, Gender and Sexuality in Cultural Representations**

Critical theory and cultural representations in a variety of media that address issues surrounding the representation of race, gender, sexuality and politics. How is desire racialized? How is racial difference produced through sex as a material practice and what is the function of sex in racial self-formation? How are questions of pleasure and desire and the structures of power reconciled? How do these texts reinforce or contest stereotypes and the ideal bodies of national identity? Is it desirable to envision a bridging of queer communities of color, or a transnational, transfronterizo or global network?

3-5 units, Spr (Yarbro-Bejarano, Y)

**ILAC 399. Individual Work**

For Spanish and Portuguese department graduate students only. Prerequisite: consent of instructor.

1-12 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

## IMMUNOLOGY (IMMUNOL)

### UNDERGRADUATE COURSES IN IMMUNOLOGY

**IMMUNOL 185. Brain and the Immune System**

(Same as IMMUNOL 285) For advanced undergraduates, co-terminal students, and graduate students. Molecular and cellular interactions between the nervous and immune systems. Focus is on the role of immune molecules in neural development, the bi-directional mechanisms by which the brain and immune system communicate with each other, and the role of the immune system in the diseased and infected brain. Topics include: molecular basis of fever, stress and inflammation, gender differences in autoimmune diseases, inflammation in neurodegenerative diseases, central nervous system infections, and the immune system in psychiatric disorders. Expert guest lectures, weekly discussion sections, and student presentations. Prerequisite: Biology or Human Biology core.

3 units, Win (Steinman, L; Brownell, S; Price, J)

### GRADUATE COURSES IN IMMUNOLOGY

**IMMUNOL 201. Advanced Immunology I**

(Same as MI 211) For graduate and medical students and advanced undergraduates. Molecules and cells of the innate and adaptive immune systems; genetics, structure, and function of immune molecules; lymphocyte differentiation and activation; regulation of immune responses; autoimmunity and other problems in immune system dysfunction. Prerequisites: undergraduate course in Immunology and familiarity with experimental approaches in biochemistry, molecular biology, and cell biology.

3 units, Win (Chien, Y)

**IMMUNOL 202. Advanced Immunology II**

(Same as MCP 202) Readings of immunological literature. Classic problems and emerging areas based on primary literature. Student and faculty presentations. Prerequisite: IMMUNOL 201/MI 211.

3 units, Spr (Garcia, K)

**IMMUNOL 203. Advanced Immunology III**

Key experiments and papers in immunology. Student presentations and faculty participation; faculty describe their experimental process and scientific papers. Prerequisite: IMMUNOL 201/MI 211 or IMMUNOL 202/MCP 202.

3 units, Sum (Staff)

**IMMUNOL 204. Innate Immunology**

(Same as MI 104, MI 204) Innate immune mechanisms as the only defenses used by the majority of multicellular organisms. Topics include Toll signaling, NK cells, complement, antimicrobial peptides, phagocytes, neuroimmunity, community responses to infection, and the role of native flora in immunity. How microbes induce and defeat innate immune reactions, including examples from vertebrates, invertebrates, and plants.

3 units, Spr (Schneider, D)

**IMMUNOL 205. Immunology in Health and Disease**

Concepts and application of adaptive and innate immunology and the role of the immune system in human diseases. Case presentations of diseases including autoimmune diseases, infectious disease and vaccination, hematopoietic and solid organ transplantation, genetic and acquired immunodeficiencies, hypersensitivity reactions, and allergic diseases. Problem sets based on lectures and current clinical literature. Laboratory in acute and chronic inflammation.

2-4 units, Win (Lewis, D)

**IMMUNOL 215. Principles of Biological Technologies**

(Same as MI 215) The principles underlying commonly utilized technical procedures in biological research. Lectures and primary literature critiques on gel electrophoresis, protein purification and stabilization, immunofluorescence microscopy, FACS. Prerequisites: biochemistry. Required of first-year graduate students in Microbiology and Immunology, and the Immunology program.

3 units, Spr (Kirkegaard, K)

**IMMUNOL 231. Medicine for Innovators and Entrepreneurs**

(Same as PEDS 231) Interdisciplinary, project-based course in

which bioscience, bioinformatics, biodesign, bioengineering students learn concepts and principles to understand human disease and work together to propose solutions to medical problems. Diabetes mellitus is used as a paradigm for understanding human disease. Guest medical school and outside faculty. Field trips to Stanford clinics and biotechnology companies. Prerequisite: college level biology.

3-4 units, Spr (Aye, T; Mellins, E)

#### **IMMUNOL 275. Tumor Immunology**

(Same as CBIO 275) Focuses on the ability of innate and adaptive immune responses to recognize and control tumor growth. Topics include: tumor antigens, tumor immunosurveillance and immunoeediting, tumor immunotherapy, cancer vaccines and dendritic cell therapy. Tracks the historical developments of our understanding of modulating tumor immune response and discusses their relative significance in the light of current research findings. Prerequisite: for undergraduates, human biology or biology core.

3 units, Aut (Engleman, E; Rothbard, J)

#### **IMMUNOL 285. Brain and the Immune System**

(Same as IMMUNOL 185) For advanced undergraduates, coterminal students, and graduate students. Molecular and cellular interactions between the nervous and immune systems. Focus is on the role of immune molecules in neural development, the bi-directional mechanisms by which the brain and immune system communicate with each other, and the role of the immune system in the diseased and infected brain. Topics include: molecular basis of fever, stress and inflammation, gender differences in autoimmune diseases, inflammation in neurodegenerative diseases, central nervous system infections, and the immune system in psychiatric disorders. Expert guest lectures, weekly discussion sections, and student presentations. Prerequisite: Biology or Human Biology core.

3 units, Win (Steinman, L; Brownell, S; Price, J)

#### **IMMUNOL 290. Teaching in Immunology**

Practical experience in teaching by serving as a teaching assistant in an immunology course. Unit values are allotted individually to reflect the level of teaching responsibility assigned to the student. May be repeated for credit.

1-15 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

#### **IMMUNOL 299. Directed Reading in Immunology**

Prerequisite: consent of instructor.

1-15 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

#### **IMMUNOL 305. Immunology Journal Club**

Required of first- to fourth-year graduate students. Graduate students present and discuss recent papers in the literature. May be repeated for credit.

1 unit, Aut (Steinman, L; Martinez, O), Win (Steinman, L), Spr (Steinman, L)

#### **IMMUNOL 311. Seminar in Immunology**

Enrollment limited to Ph.D., M.D./Ph.D., and medical students whose scholarly concentrations are in Immunology.

1 unit, Aut (Steinman, L; Fathman, C), Win (Steinman, L; Fathman, C), Spr (Steinman, L; Fathman, C)

#### **IMMUNOL 311A. Discussions in Immunology**

Students discuss papers of speakers in 311, and meet with the speakers. Corequisite: 311.

1 unit, Aut (Steinman, L; Fathman, C), Win (Steinman, L; Fathman, C), Spr (Steinman, L; Fathman, C)

#### **IMMUNOL 399. Graduate Research**

For Ph.D., M.D./Ph.D. students, and medical students whose scholarly concentrations are in Immunology.

1-15 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

## INSTITUTE FOR INTERNATIONAL STUDIES (FREEMAN SPOGLI) (FSI)

### UNDERGRADUATE COURSES IN INSTITUTE FOR INTERNATIONAL STUDIES (FREEMAN SPOGLI)

#### **IIS 195. Interschool Honors Program in Environmental Science, Technology, and Policy**

Students from the schools of Humanities and Sciences, Engineering, and Earth Sciences analyze important problems in a year-long small group seminar. Combines research methods, oral presentations, preparation of an honors thesis by each student, and where relevant, field study. May be repeated for credit.

1-9 units, Aut (Staff), Win (Staff), Spr (Kennedy, D)

#### **IIS 199. Interschool Honors Program in International Security Studies**

Students from different schools meet in a year-long seminar to discuss, analyze, and conduct research on international security. Combines research methods, policy evaluation, oral presentation, and preparation of an honors thesis by each student. May be repeated for credit.

1-5 units, Aut (Staff), Win (Stedman, S), Spr (Kapur, S; Cuellar)

## INTERDISCIPLINARY STUDIES IN HUMANITIES (HUMNTIES)

### UNDERGRADUATE COURSES IN INTERDISCIPLINARY STUDIES IN HUMANITIES

#### **HUMNTIES 100. Text and Context in Humanities: Oedipus and His Vicissitudes**

(Same as ENGLISH 184B) Tales of Modernity from Sophocles, Freud, Chekhov, Babel, and Woolf. Introduction to cross-disciplinary approach in humanities through foundational texts in the modern tradition. The main focus is on Sigmund Freud's Totem and Taboo (1913), alongside his ancillary writings. Contemporary social thought and historical scholarship provide the context (Georg Simmel, Norbert Elias, Karl Schorske, John Murray Cud-dihy) while works of imaginative literature (Sophocles, Anton Chekhov, Isaac Babel, and Virginia Woolf) illuminate the significance of the Oedipus myth for understanding the inter-generational conflict in antiquity and modernity. GER:DB-Hum

3 units, Win (Freidin, G; Staveley, A)

#### **HUMNTIES 161. Texts in History: Classics from Greece to Rome**

(Same as CLASSGEN 163, DRAMA 161R) Priority to students in the Humanities honors program. Ancient texts situated in their intellectual and cultural contexts. Readings include Homer's Iliad and Odyssey, plays of Aeschylus, Sophocles' Antigone, Euripides' Medea, Thucydides Peloponnesian War., Plato's Symposium, Aristotle's Poetics, Virgil's Aeneid, Seneca's Trojan Women and Agamemnon, and Augustine's On Christian Doctrine. GER:DB-Hum

3-5 units, Aut (Rehm, R)

#### **HUMNTIES 162. Texts in History: Medieval to Early Modern**

(Same as ENGLISH 184C) The impact of change from the Middle Ages to the early modern world; how such historical pressures along with developments in mathematical perspective and science challenged earlier conceptions of space, artistic form, the self, politics, the divine, and the physical universe on the threshold of the modern era. Interdisciplinary methods of interpretation. Texts include: Aristotle, Dante, Chaucer, Canterbury Tales; Christine de Pizan, Letters of Columbus; Machiavelli, The Prince; Luther, Montaigne, Marlowe, Doctor Faustus; Wroth, Galileo, Donne,

Shakespeare, Othello; and works of art and music. GER:DB-Hum  
5 units, Spr (Brooks, H)

**HUMNTIES 163. Texts in History: Enlightenment to the Modern**

(Same as ENGLISH 184D) Priority to students in the Humanities honors program and English majors. The relationship between intellectual, political, and cultural history, and imaginative literature in the modern period. Rousseau, Kant, Austen, Mary Wollstonecraft, Marx, Dostoevsky, Nietzsche, Mill, Virginia Woolf, T.S. Eliot, Beckett. GER:DB-Hum  
5 units, Win (Staveley, A)

**HUMNTIES 170. Media Studies Internship**

Practical experience working with a film or media company for six to eight weeks. Students make arrangements with companies individually and receive the consent of the director of the Humanities honors program. Credit awarded for submitting a paper after completing the internship, focused on a topic relevant to the student's studies.

2-3 units, Aut (Freidin, G), Win (Freidin, G), Spr (Freidin, G), Sum (Staff)

**HUMNTIES 175. Individual Work**

1-5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**HUMNTIES 181. Philosophy and Literature**

(Same as CLASSGEN 81, COMPLIT 181, ENGLISH 81, FREN-GEN 181, ITALGEN 181, GERGEN 181) Required gateway course for Philosophical and Literary Thought; crosslisted in departments sponsoring the Philosophy and Literature track: majors should register in their home department; non-majors may register in any sponsoring department. Introduction to major problems at the intersection of philosophy and literature. Issues may include authorship, selfhood, truth and fiction, the importance of literary form to philosophical works, and the ethical significance of literary works. Texts include philosophical analyses of literature, works of imaginative literature, and works of both philosophical and literary significance. Authors may include Plato, Montaigne, Nietzsche, Borges, Beckett, Barthes, Foucault, Nussbaum, Walton, Nehamas, Pavel, and Pippin. GER:DB-Hum

4-5 units, Win (Anderson, L; Landy, J)

**HUMNTIES 185. Sex, Sacrifice, and Civilization: Baroque Opera and Tragedy**

(Same as ENGLISH 185, MUSIC 190H) The revival of ancient tragedy in the Baroque opera house. The central mysteries of tragedy: knowledge of suffering, necessity of sacrifice, pleasure of pathos. How tragic drama and opera used poetry, dance, and music to sway the passions and prompt reflection. Greek myths of Medea, Iphigenia, Alceste, Idomeneo. Plays by Euripides and Racine; operas by Mozart, Gluck, and Charpentier. GER:DB-Hum

4-5 units, Aut (Hoxby, B; Hadlock, H)

**HUMNTIES 191S. Capital and Empire**

(Same as HISTORY 239D, HISTORY 339D) Can empire be justified with balance sheets of imperial crimes and boons, a calculus of racism versus railroads? The political economy of empire through its intellectual history from Adam Smith to the present; the history of imperial corporations from the East India Company to Wal-mart; the role of consumerism; the formation of the global economy; and the relationship between empire and the theory and practice of development. GER:DB-SocSci

4-5 units, Spr (Satia, P)

**HUMNTIES 192G. Musical Shakespeare: Theater, Song, Opera, and Film**

(Same as MUSIC 148, MUSIC 248) The role of music in productions, adaptations, and interpretations of Shakespeare's plays as theater, opera, and film from the Elizabethan era through the present. Emphasis is on the role of songs, stage music, and music in operatic and film adaptations. Incidental music, orchestral tone poems, and art-song settings of lyrics from the plays. Plays include Romeo and Juliet, Othello, Macbeth, Hamlet, The Tempest, Midsummer Night's Dream, and Twelfth Night. Pre-/corequisite (for music majors): MUSIC 22. (WIM at 4- or 5-unit level only.) GER:DB-Hum

3-5 units, not given this year

**HUMNTIES 192T. Wagnerian Echos: A Cultural History from Modernism to Popular Culture**

(Same as GERGEN 161, MUSIC 150G) The afterlives of mytho-

logical themes from the operas and music dramas of Richard Wagner (The Flying Dutchman, Tannhäuser, Lohengrin, Ring Cycle, Parsifal) in literature, modernist aesthetics, fascist politics, film, philosophy, and contemporary media. GER:DB-Hum  
3-5 units, Spr (Daub, A; Grey, T)

**HUMNTIES 194M. Globalization and Contemporary Fiction**

(Same as ENGLISH 261D) The globalization of the contemporary Anglophone novel. How the English language novel relates to recent models of archiving world literature. How novels from Nigeria, India, Guyana and Australia foreground the socio-political implications of colonialism and decolonization, the amorphous relationship of the public and private spheres, the contended fates of human rights and territorial sovereignty. Texts by Sinha, Kempadoo, Shangvi, Greenville, Moretti, Casanova, Slaughter and others.

5 units, Aut (Majumdar, S)

**HUMNTIES 199A. Honors Essay Writing Workshop**

Two quarter sequence. Students discuss progress on research and writing the senior honors essay. Required for seniors in the Humanities honors program.

1 unit, Aut (Batuman, E)

**HUMNTIES 199B. Honors Essay Writing Workshop**

Two quarter sequence. Students discuss progress on research and writing the senior honors essay. Required for seniors in the Humanities honors program.

1 unit, Win (Batuman, E)

**HUMNTIES 200A. Research Proposal**

Preliminary planning and study. Student drafts a proposal in Winter Quarter of the junior year to submit to the committee in charge for suggestions regarding focus and bibliography. After revisions, the student resubmits a fully developed proposal to the committee for additional comment and/or final approval. 60 hours over two quarters are expected of students developing their essay proposals for 2 units, usually 1 unit each in Winter and Spring of the junior year. Students usually make revisions of some kind in either scope or formulation of the topic. Students overseas submit proposals and receive feedback by fax or email. [WIM]

1-2 units, Aut (Staff), Win (Staff), Spr (Staff)

**HUMNTIES 200B. Senior Research**

Regular meetings with tutor (thesis adviser). Prerequisite: 200A. WIM

1-5 units, Aut (Staff), Win (Staff), Spr (Staff)

**HUMNTIES 200C. Senior Research**

Regular meetings with tutor; submission of complete first draft at least two weeks before final deadline. Prerequisite: 200B.

1-5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**GRADUATE COURSES IN INTERDISCIPLINARY STUDIES IN HUMANITIES**

**HUMNTIES 275. Individual Work**

1-5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**HUMNTIES 298. Graduate Program in Humanities Symposium**

Required of GPH doctoral and master's students. Participation in the student-organized symposium; presentation of a paper informed by texts addressed in GPH seminars.

1-3 units, Spr (Freidin, G)

**HUMNTIES 299. Interdisciplinary Teaching**

For doctoral students in the GPH. Supervised interdisciplinary teaching to satisfy the program teaching requirement.

1-2 units, Aut (Freidin, G), Win (Freidin, G), Spr (Freidin, G)

**HUMNTIES 301. GPH/DLCL Colloq: Refractions & Adaptations: Revising the Cultural & Historical Canon**

For graduate students in the Division of Literatures, Cultures, and Languages (DLCL) and the Graduate Program in Humanities (GPH). Required of students in the GPH who have not yet completed the course requirements for the program. May be repeated for credit.

1 unit, Aut (Staff), Win (Freidin, G), Spr (Freidin, G)

**HUMNTIES 321. Classical Seminar: Origins of Political Thought**

(Same as CLASSHIS 133, CLASSHIS 333, PHIL 176A, PHIL 276A, POLISCI 230A) Political philosophy in classical antiquity, focusing on canonical works of Thucydides, Plato, Aristotle, and Cicero. Historical background. Topics include: political obligation, citizenship, and leadership; origins and development of democracy; and law, civic strife, and constitutional change.

5 units, Win (Ober, J; Simonton, M)

**HUMNTIES 322. Medieval Seminar: Classics and Key Works**

(Same as HISTORY 317) Colloquium focused on key primary sources that allow entry into Medieval European culture. Readings include: Augustine, On Christian Doctrine; Gregory the Great, *Moralia on the Book of Job*; Beowulf; the Song of Roland; and Aquinas, *Summa Theologica*.

3-5 units, not given this year

**HUMNTIES 323. Renaissance/Early Modern Seminar**

(Same as ILAC 323) Focus is on how authors and readers from this period theorize various historical processes: the rise of European imperialism; religious conflicts and revolutions; new understandings of the self and the world; and the rise of the novel. Authors: Boccaccio, Machiavelli, Núñez Muley, Martorell, Rabelais, Camões, Cervantes, Montaigne, and Shakespeare.

3-5 units, Spr (Barletta, V)

**HUMNTIES 324. Enlightenment Seminar**

(Same as HISTORY 334) The Enlightenment as a philosophical, literary, and political movement. Themes include the nature and limits of philosophy, the grounds for critical intellectual engagement, the institution of society and the public, and freedom, equality and human progress. Authors include Voltaire, Montesquieu, Rousseau, Hume, Diderot, and Condorcet.

3-5 units, Win (Riskin, J)

**HUMNTIES 325. Modern Seminar**

(Same as FRENGEN 325) Modern anxieties about the place of human concerns within a disenchanted natural world, focusing on texts of philosophy, social theory, and imaginative literature. Cultural and psychological consequences of perceived decline in and threats to religious faith. Authors may include Schiller, Schopenhauer, Coleridge, Kierkegaard, Marx, Baudelaire, Darwin, Nietzsche, Weber, Eliot, Woolf, Sartre, and Camus.

3-5 units, Aut (Apostolides, J)

## INTERNATIONAL POLICY STUDIES (IPS)

### GRADUATE COURSES IN INTERNATIONAL POLICY STUDIES

**IPS 201. Managing Global Complexity**

(Same as POLISCI 312S) The value of major theories and concepts in international relations for understanding and addressing global policy issues. Country case study with policy challenges such as development, democracy promotion, proliferation, and terrorism; the challenge of creating coherent policies that do not run at cross purposes. Case study of a policy challenge that cuts across academic disciplines and policy specializations to provide the opportunity to bring together skills and policy perspectives.

3 units, Spr (Krasner, S; Stedman, S)

**IPS 202. Topics in International Macroeconomics**

Topics: standard theories of open economy macroeconomics, exchange rate regimes, causes and consequences of current account imbalances, the economics of monetary unification and the European Monetary Union, recent financial and currency crises, the International Monetary Fund and the reform of the international financial architecture.

5 units, Aut (Aturupane, C)

**IPS 203. Issues in International Economics**

Topics in international trade and international trade policy: trade, growth and poverty, regionalism versus multilateralism, the political economy of trade policy, trade and labor, trade and the environment, and trade policies for developing economies. Prerequisite:

site: ECON 165, ECON 166.

5 units, Win (Aturupane, C)

**IPS 204A. Microeconomics**

(Same as PUBLPOL 301A) Microeconomic concepts relevant to decision making. Topics include: competitive market clearing, price discrimination; general equilibrium; risk aversion and sharing, capital market theory, Nash equilibrium; welfare analysis; public choice; externalities and public goods; hidden information and market signaling; moral hazard and incentives; auction theory; game theory; oligopoly; reputation and credibility.

4 units, Aut (Bulow, J)

**IPS 204B. Cost-Benefit Analysis and Evaluation**

(Same as PUBLPOL 301B) Ex ante and ex post evaluation of projects and policies, value of life calculations, and welfare evaluation of public and private decisions. Welfare measures; tradeoffs between efficiency and equity. Second best. Statistical decision theory. Use of incentives in implementing policies. Relationship between microeconomic analysis and public policy making. Economic rationales for policy interventions. Economic models of politics and application to policy making. Relationship of income distribution to policy choice.

4 units, Spr (Lim, C)

**IPS 205A. Foundations Of Statistical Inference**

(Same as PUBLPOL 303A) (Same as LAW 362.) Statistical background and introduction to regression. Topics include hypothesis testing, linear regression, nearest-neighbors regression, and other statistical concepts. Hands-on empirical analysis using popular statistical packages. Goal is to analyze empirical studies, conduct empirical research, and to crossexamine or work with statistical experts.

4 units, Aut (Strnad, J)

**IPS 205B. Econometrics**

(Same as PUBLPOL 303B) (Same as LAW 366.) Descriptive statistics. Regression analysis. Hypothesis testing. Analysis of variance. Heteroskedasticity, serial correlation, errors in variables, simultaneous equations. The construction and use of models for analyzing economic and social phenomena. Bayesian analysis. Univariate and bivariate analysis. Simple regression model. Multiple regression model. Inference and heteroskedasticity. Linear probability model. Instrumental variables. Maximum likelihood methods. Measurement of social and political attitudes and ideologies. Statistical analysis of large data sets.

4 units, Win (Strnad, J)

**IPS 206A. Politics and Collective Action**

(Same as POLISCI 331S, PUBLPOL 304A) Classic theories for why collective action problems occur and how they can be solved. Politics of aggregating individual decisions into collective action, including voting, social protest, and competing goals and tactics of officials, bureaucrats, interest groups, and other stakeholders. Economic, distributive, and moral frameworks for evaluating collective action processes and outcomes. Applications to real-world policy problems involving collective action.

4 units, Spr (Stone, P)

**IPS 206B. Organizations**

(Same as PUBLPOL 304B) Policy reform and organizational resistance. Organizations include government and other bureaucracies such as not-for-profit schools, universities, hospitals, international organizations, political parties, and agencies. Hubris and policy making, including pathologies of decision making and planning, abuse of intelligence, biased information, overselling to publics, lack of knowledge about context, and unintended consequences.

4 units, Spr (Stedman, S; Eden, L)

**IPS 207. Governance, Corruption, and Development**

The role of governance in the growth and development experience across countries emphasizing the economics of corruption. The concept and measurement of governance. Theory and evidence on the impact of corruption on growth and development outcomes, including investment, international trade and financial flows, human capital accumulation, poverty and income inequality. The cultural, economic, and political determinants of corruption and policy implications for improving governance. Prerequisite: ECON 50.

3-5 units, Spr (Aturupane, C)

**IPS 207A. Judgment and Decision Making**

(Same as PUBLPOL 305A) (Same as LAW 333.) Theories and research on heuristics and biases in human inference, judgment, and decision making. Experimental and theoretical work in prospect theory emphasizing loss and risk aversion. Challenges that psychology offers to the rationalist expected utility model; attempts to meet this challenge through integration with modern behavioral economics. Decision making biases and phenomena of special relevance to public policy such as group polarization, group think, and collective action.

4 units, Win (Brest, P)

**IPS 207B. Public Policy and Social Psychology: Implications and Applications**

(Same as PSYCH 216, PUBLPOL 305B) Theories, insights, and concerns of social psychology relevant to how people perceive issues, events, and each other, and links between beliefs and individual and collective behavior. Topics include: situationist and subjectivist traditions of applied and theoretical social psychology; social comparison, dissonance, and attribution theories; social identity, stereotyping, racism, and sources of intergroup conflict and misunderstanding; challenges to universality assumptions regarding human motivation, emotion, and perception of self and others; the problem of producing individual and collective changes in norms and behavior.

4 units, Spr (Ross, L)

**IPS 208. Justice**

(Same as ETHICSOC 171, PHIL 171, PHIL 271, POLISCI 136S, PUBLPOL 103C) Focus is on the ideal of a just society, and the place of liberty and equality in it, in light of contemporary theories of justice and political controversies. Topics include protecting religious liberty, financing schools and elections, regulating markets, assuring access to health care, and providing affirmative action and group rights. Issues of global justice including human rights and global inequality.

4-5 units, Aut (Cohen, J)

**IPS 209. Practicum**

(Same as PUBLPOL 309) Applied policy exercises in various fields. Multidisciplinary student teams apply skills to a contemporary problem in a major policy exercise with a public sector client such as a government agency. Problem analysis, interaction with the client and experts, and presentations. Emphasis is on effective written and oral communication to lay audiences of recommendations based on policy analysis.

1-10 units, Aut (Nation, J), Win (Nation, J)

**IPS 210. The Politics of International Humanitarian Action**

The relationship between humanitarianism and politics in international responses to civil conflicts and forced displacement. Focus is on policy dilemmas and choices, and the consequences of action or inaction. Case studies include northern Iraq (Kurdistan), Bosnia, Rwanda, Kosovo, and Darfur.

3-5 units, Aut (Morris, E)

**IPS 211. The Transition from War to Peace: Peacebuilding Strategies**

How to find sustainable solutions to intractable internal conflicts that lead to peace settlements. How institutions such as the UN, regional organizations, and international financial agencies attempt to support a peace process. Case studies include Bosnia, East Timor, Kosovo, Burundi, Liberia, and Afghanistan.

3-5 units, Win (Morris, E)

**IPS 219. The Role of Intelligence in U.S. Foreign Policy**

How intelligence supports U.S. national security and foreign policies. How it has been used by U.S. presidents to become what it is today; organizational strengths and weaknesses; how it is monitored and held accountable to the goals of a democratic society; and successes and failures. Current intelligence analyses and national intelligence estimates are produced in support of simulated policy deliberations.

5 units, not given this year

**IPS 221. International Organizations and Institutions**

3-5 units, Win (Staff)

**IPS 221A. Globalization and Its Discontents: An Introduction to International Political Economy**

What is globalization? Its impacts on different countries and population including those that multilateral organizations such as the

World Bank, International Monetary Fund, and World Trade Organization have on the economic policies of member states and the functioning of the global economy. Topics include: political economy of trade; exchange rate policy; the liberalization of trade and finance; the global move to openness; development, debt and aid; and the role of international organizations.

3-5 units, Spr (Staff)

**IPS 221B. Citizenship and Immigration**

How people define and delineate nations. How states define their citizens. Different models of citizenship. Historical and political review of immigration in the U. S., W. Europe, Asia, and Australia. Political and economic effects of immigration. The economic impact of immigration, refugees and asylum seekers, public opinion, nationalist parties, and immigrant rights.

5 units, not given this year

**IPS 222. Economic Development**

General theories of economic development with focus on development policies. Topics include: agriculture, industrialization, role of financial development, income distribution, human resource development, international relations, and economic aid.

5 units, not given this year

**IPS 230. Democracy, Development, and the Rule of Law**

(Same as INTNLREL 114D, POLISCI 114D, POLISCI 314D) Links among the establishment of democracy, economic growth, and the rule of law. How democratic, economically developed states arise. How the rule of law can be established where it has been historically absent. Variations in how such systems function and the consequences of institutional forms and choices. How democratic systems have arisen in different parts of the world. Available policy instruments used in international democracy, rule of law, and development promotion efforts.

5 units, Aut (Diamond, L; Stoner-Weiss, K)

**IPS 233. Public Policy and South Asian Development**

Trends in socioeconomic conditions in South Asia from independence to present and the policies that influenced them. Topics: theoretical framework of the relationship between forms of governance and development; governance choices in South Asia, particularly democracy and federalism; and influence of political governance, national identity, and socioeconomic institutions on development. Review of case studies, including the Kerala development experience, India's IT industry, Bangladesh's microfinance initiative, and Sri Lanka's education system.

3-5 units, Win (Staff)

**IPS 241. International Security in a Changing World**

(Same as POLISCI 114S) The major international and regional security problems in the modern world. Interdisciplinary faculty lecture on the political and technical issues involved in nuclear proliferation, terrorism and homeland security, civil wars and insurgencies, and future great power rivalries.

5 units, Win (Blacker, C; Crenshaw, M)

**IPS 244. U.S. Policy toward Northeast Asia**

Case study approach to the study of contemporary U.S. policy towards Japan, Korea, and China. Historical evolution of U.S. foreign policy and the impact of issues such as democratization, human rights, trade, security relations, military modernization, and rising nationalism on U.S. policy. Case studies include U.S.-Japan trade tensions, anti-Americanism in Korea, and cross-strait relations between China and Taiwan.

5 units, Win (Armacost, M; Sneider, D; Straub, W)

**IPS 250. International Conflict: Management and Resolution**

(Same as POLISCI 210R, POLISCI 310R, PSYCH 383) (Same as LAW 656) Interdisciplinary. Theoretical insights and practical experience in resolving inter-group and international conflicts. Sources include social psychology, political science, game theory, and international law. Personal, strategic, and structural barriers to solutions. How to develop a vision of a mutually bearable shared future, trust in the enemy, and acceptance of loss that a negotiated settlement may produce. Spoilers who seek to sabotage agreements. Advantages and disadvantages of unilateral versus reciprocal measures. Themes from the Stanford Center of International Conflict and Negotiation (SCICN). Prerequisite for undergraduates: consent of instructor.

3-5 units, Win (Holloway, D)

**IPS 262. Contemporary Issues in Nuclear Energy Policy**

Current nuclear energy trends related to economic growth and carbon-free energy production to reduce global warming. Topics include: trends, promise, and perils; environment; proliferation; and international security. Policy considerations for nuclear safety and safeguards, environmentally responsible management from raw uranium to spent fuel, international security and nonproliferation, economic competition with other energy sources, domestic and foreign politics, and international law and treaties. International guest expert lecturers.

5 units, Win (Agvaanluvsan, U)

**IPS 263. Energy Cooperation in the Western Hemisphere**

(Same as EARTHSYS 132, EARTHSYS 232) Current political dynamics in major western hemisphere fossil fuel producers in N. America, the Andean region, the Southern Cone of S. America, and Trinidad and Tobago. The potential for developing sustainable alternative energy resources in the western hemisphere for export particularly biofuels, and its impact on agricultural policy, environmental protection, and food prices. The feasibility of creating regional energy security rings such as the proposed N. American Energy Security and Prosperity Partnership.

4 units, not given this year

**IPS 264. Behind the Headlines: An Introduction to Contemporary South Asia**

Introduction to South Asia. Historical forces that shaped the region: diverse religions and ethnicities, geography, and colonialism. Recent history and current state of the region: rise of the Taliban and Al Qaeda in Afghanistan; Pakistan's government, military, and mullahs; U.S. intervention in Afghanistan, its relationship with Pakistan, and its policy shift toward India; regional problems and opportunities amongst neighboring countries; and the economic and political rise of India.

3-5 units, Aut (Staff)

**IPS 299. Directed Reading**

IPS students only. May be repeated for credit.

1-5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**IPS 300. Issues in International Policy Studies**

Presentations of techniques and applications of international policy analysis by students, faculty, and guests, including policy analysis practitioners.

1 unit, Aut (Stedman, S)

**IPS 314S. Decision Making in U.S. Foreign Policy**

(Same as POLISCI 314S) Priority to IPS students. Formal and informal processes involved in U.S. foreign policy decision making. The formation, conduct, and implementation of policy, emphasizing the role of the President and executive branch agencies. Theoretical and analytical perspectives; case studies.

5 units, Spr (Staff)

**IPS 388. Palestine and the Arab-Israeli Conflict**

(Same as HISTORY 288, HISTORY 388) 1882 to the present. Comparison of representative expressions of competing historical interpretations. U.S. policy towards the conflict since 1948. (Beinin)

4-5 units, Win (Beinin, J)

## INTERNATIONAL RELATIONS (INTNLREL)

### UNDERGRADUATE COURSES IN INTERNATIONAL RELATIONS

**INTNLREL 114D. Democracy, Development, and the Rule of Law**

(Same as IPS 230, POLISCI 114D, POLISCI 314D) Links among the establishment of democracy, economic growth, and the rule of law. How democratic, economically developed states arise. How the rule of law can be established where it has been historically absent. Variations in how such systems function and the consequences of institutional forms and choices. How democratic systems have arisen in different parts of the world. Available policy instruments used in international democracy, rule of law, and de-

velopment promotion efforts. GER:DB-SocSci

5 units, Aut (Diamond, L; Stoner-Weiss, K)

**INTNLREL 120. Terrorism and Security in Israel: Law and Politics**

Challenges that Israel faces in the area of security and anti-terrorism. Mechanisms used by Israel in this context, their legal and political context, and public response to their use. The law of emergency in Israel. Topics such as interrogations of suspects in terrorist activities, detentions, censorship, targeted killings of suspected terrorists, profiling, and issues related to the occupied territories such as the security barrier. Comparative case studies from other countries.

5 units, Aut (Staff)

**INTNLREL 122A. The Political Economy of the European Union**

EU institutions, the legislative process, policies, relations with the U.S., and enlargement and the future of the EU. History and theories of EU integration. Democratic accountability of the institutions, and the emerging party system. Principal policies in agriculture, regional development, the internal market, single currency, and competition. Emphasis is on policies that affect the relations with the U.S. including trade and security. Results of the EU's constitutional convention.

5 units, Win (Crombez, C)

**INTNLREL 130. Science, Technology, and Development**

Global and sociological perspectives on science and technology expansion, comparing nations and regions. Social features such as gender equity; and social impact economic development strategies such as tech incubators, the triple helix model, and UN initiatives. Democratization, human rights, welfare of local populations, and national security. Policy issues, the digital divide, development debates, commodification of the public good, and notions of social change.

5 units, Win (Staff)

**INTNLREL 136R. Introduction to Global Justice**

(Same as ETHICSOC 136R, PHIL 76, POLISCI 136R, POLISCI 336) Recent work in political theory on global justice. Topics include global poverty, human rights, fair trade, immigration, climate change. Do developed countries have a duty to aid developing countries? Do rich countries have the right to close their borders to economic immigrants? When is humanitarian intervention justified? Readings include Charles Beitz, Thomas Pogge, John Rawls.

5 units, Spr (McLeod, A)

**INTNLREL 140A. International Law and International Relations**

What is the character of international legal rules? Do they matter in international politics, and if so, to what degree? The foundational theories, principles, and sources of public international law. Prominent theories of international relations and how they address the role of law in international politics. Practical problems such as human rights, humanitarian intervention, and enforcement of criminal law. International law as a dynamic set of rules, at times influenced by power, at other times constraining it, but always essential to studying international relations. WIM

5 units, Aut (Lutomski, P)

**INTNLREL 140C. The U.S., U.N. Peacekeeping, and Humanitarian War**

The involvement of U.S. and the UN in major wars and international interventions since the 1991 Gulf War. The UN Charter's provisions on the use of force, the origins and evolution of peacekeeping, the reasons for the breakthrough to peacemaking and peace enforcement in the 90s, and the ongoing debates over the legality and wisdom of humanitarian intervention. Case studies include Croatia and Bosnia, Somalia, Rwanda, Kosovo, East Timor, and Afghanistan.

5 units, Spr (Patenaude, B)

**INTNLREL 141A. Camera as Witness: International Human Rights Documentaries**

Rarely screened documentary films, focusing on global problems, human rights issues, and aesthetic challenges in making documentaries on international topics. Meetings with filmmakers. GER:DB-Hum

5 units, Aut (Bojic, J)

**INTNLREL 147. The Political Economy of the Southern Cone of South America**

Argentina, Brazil, Paraguay, Uruguay, Bolivia, and Chile. Post-WW II political economy developments and political relations. Impacts of military rule from the 60s into the 80s. Regional and international political developments that led to MERCOSUR in 1991, and subsequent expansion.

5 units, Aut (Staff)

**INTNLREL 148. Economic Integration of the Americas**

Current attempts at economic integration throughout the Western Hemisphere, including the Andean Community, the Caribbean Common Market (CARICOM), the Latin American Integration Association (ALADI), MERCOSUR, the North American Free Trade Area (NAFTA), and the Central American Integration System (SICA). Emphasis is on practical applications of integration efforts and nuts-and-bolts issues of how integration efforts function.

5 units, Win (O'Keefe, T)

**INTNLREL 149. The Economics and Political Economy of the Multilateral Trade System**

The historical development of the multilateral trade system, the current agenda of the World Trade Organization, and prospects for trade liberalization. Emphasis is on the economic rationale for multilateral trade rules, the political problems facing countries in supporting further liberalization, and the challenges to the legitimacy of WTO procedures and practices. Issues include the greater participation of developing countries, the impact of new members, and the relationship between the WTO and other multilateral bodies. Guest speakers; student research paper presentations.

5 units, Win (Josling, T)

**INTNLREL 161A. Global Human Geography: Asia and Africa** (Same as HISTORY 106A) Global patterns of demography, economic and social development, geopolitics, and cultural differentiation, covering E. Asia, S. Asia, S.E. Asia, Central Asia, N. Africa, and sub-Saharan Africa. Use of maps to depict geographical patterns and processes. GER:DB-SocSci

5 units, Aut (Staff)

**INTNLREL 165A. Globalization, Governance, and Human Rights**

Although globalization is associated with a downward spiral of human rights, paradoxically, more countries now subscribe to human rights treaties than ever before. Aspects of globalization drawing on theories from sociology, political science, cultural anthropology, and law. Tensions within globalization and their paradoxical effects on human rights. Global governance mechanisms aimed at improving human rights, including governmental treaties, international NGOs advocacy work, and corporate codes of conduct and their effects on human rights. The effects of the U.N. International Labour Organization on labor related human rights, such as child labor and discrimination, serve as examples.

5 units, Spr (Staff)

**INTNLREL 166. Russia and Islam**

Seminar. Focus is on 1985 to the present. The policies of Gorbachev toward the Muslim populace of the Soviet Union; how post-communist Russia under Yeltsin and Putin has dealt with its Muslim minorities; and the relationship of Russia to the newly independent states of Central Asia and the South Caucasus after the breakup of the USSR in 1991. The two major wars which Russia has fought with the secessionist Russian autonomous republic of Chechnya. GER:EC-GlobalCom

5 units, not given this year

**INTNLREL 170. ENERGY AND CLIMATE**

The seminar provides an interdisciplinary introduction to the technology, economics, and international politics of energy and climate. We investigate specific energy technologies and discuss their impact on geopolitics, the environment and mitigating the effects of climate change. What is the role of energy in national security? What will climate change mean for our energy mix? How do developing countries view energy and climate change? What is the proper balance between regulation and free market operation in energy markets?

5 units, Spr (Staff)

**INTNLREL 191. IR Journal**

1 unit, Aut (Schultz, K), Win (Schultz, K), Spr (Schultz, K)

**INTNLREL 197. Directed Reading in International Relations**

Open only to declared International Relations majors. (Staff)

3-5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**INTNLREL 198. Senior Thesis**

Open only to declared International Relations majors with approved senior thesis proposals.

2-5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**INTNLREL 199. Honors Research: Democracy, Development, and the Rule of Law in Developing Countries**

Restricted to students in the CDDR option of the International Relations honors program. Goal is to prepare students to do research and/or fieldwork to complete their thesis research. Main currents in democracy and development literature concerning how economic growth and democratization are related; how the rule of law supports these processes in countries undergoing change. Student presentations of thesis questions; student groups develop research problems and designs. May be repeated for credit.

3-5 units, Win (Staff), Spr (Stoner-Weiss, K)

**INTNLREL 200A. International Relations Honors Field Research**

For juniors planning to write an honors thesis during senior year. Initial steps to prepare for independent research. Professional tools for conceptualizing a research agenda and developing a research strategy. Preparation for field research through skills such as data management and statistics, references and library searches, and fellowship and grant writing. Creating a work schedule for the summer break and first steps in writing. Prerequisite: acceptance to IR honors program.

3 units, Spr (Drori, G)

**INTNLREL 200B. International Relations Honors Seminar**

Second of two-part sequence. For seniors working on their honors theses. Professional tools, analysis of research findings, and initial steps in writing of thesis. How to write a literature review, formulate a chapter structure, and set a timeline and work schedule for the senior year. Skills such as data analysis and presentation, and writing strategies. Prerequisites: acceptance to IR honors program, and 199 or 200A.

3 units, Aut (Drori, G)

**INTNLREL 206. Palestinian Nationalism, Past and Present**

The Palestinian national movement and its role in the Arab-Israeli conflict. The roots of the movement in the Ottoman Empire, its growth through the British Mandate, the 1948 and 1967 wars, the Intifada, and the Israeli-Palestinian peace process. Emphasis is on components which contributed to or delayed the growth of a distinct Palestinian identity, including Zionism.

5 units, not given this year

**INTNLREL 207. Tribe, State, and Society in the Modern Middle East**

Tribal identities and values in the Middle East, including the Iraqi Sunni tribal insurgency against the U.S. The role of tribes in the formation of Middle Eastern states and how tribal values continue to impact social, political, and economic issues today.

5 units, not given this year

## INTRODUCTION TO THE HUMANITIES (IHUM)

### UNDERGRADUATE COURSES IN INTRODUCTION TO THE HUMANITIES

**IHUM 2. Epic Journeys, Modern Quests**

First of a twoquarter sequence. Great religious, philosophical, and literary texts that have addressed timeless questions about human identity and the meaning of human life. Focus is on the epic tradition in the ancient and classical worlds. Compares conceptions of the afterlife. How traditions about the afterlife are created. GER:IHUM-2

4 units, Win (Harrison, R; Galvez, M)

**IHUM 3. Epic Journeys, Modern Quests**

Second of a two quarter sequence. Great religious, philosophical, and literary texts that have addressed timeless questions about human identity and the meaning of human life. Focus is on the

transformations or abandonment of the epic tradition in modernity. Compares conceptions of the afterlife. How traditions about the afterlife are appropriated. The diminished importance of the dead and increased emphasis on the power of the living in literary genres. GER:IHUM-3

4 units, Spr (Harrison, R; Apostolides, J)

**IHUM 7A. Rebellious Daughters and Filial Sons of the Chinese Family: Present and Past**

First in a two quarter sequence. The family in its enduring role in shaping members of a community and citizens of society. The Chinese family as a case study. How family has been revolted against, broken up, critiqued, and transformed through social and political changes. The authority of the father, care of the mother, supportive or antagonistic relations of siblings, and the extension of these relations in kinship community and society. How notions of love, emotion, and gender play into the formation of the family and how family connects with interpersonal and social relations. GER:IHUM-2

4 units, Win (Wang, B)

**IHUM 7B. Rebellious Daughters and Filial Sons of the Chinese Family: Present and Past**

Second in a two quarter sequence. The family in its enduring role in shaping members of a community and citizens of society. The Chinese family as a case study. How family has been revolted against, broken up, critiqued, and transformed through social and political changes. The stern authority of the father, nourishing care of the mother, supportive or antagonistic relations of siblings, and the extension of these relations in kinship community and society. How notions of love, emotion, and gender play into the formation of the family and how family connects with interpersonal and social relations. GER:IHUM-3

4 units, Spr (Zhou, Y)

**IHUM 10A. Humanistic Perspectives on Science**

First in a two quarter sequence. A humanistic perspective views science itself as an essential part of human culture and explores the many relationships between scientific activity and religion, philosophy, society, politics, and the arts. Exploration of these relationships from a philosophical point of view, across a large part of the development of Western science from ancient Greece and the medieval period, through the scientific revolution of the 16th and 17th centuries, and up to recent times. GER:IHUM-2

4 units, Win (Friedman, M)

**IHUM 10B. Humanistic Perspectives on Science**

Second in a two quarter sequence. A humanistic perspective views science itself as an essential part of human culture and explores the many relationships between scientific activity and religion, philosophy, society, politics, and the arts. Exploration of these relationships from a philosophical point of view, across a large part of the development of Western science from ancient Greece and the medieval period, through the scientific revolution of the 16th and 17th centuries, and up to recent times. GER:IHUM-3

4 units, Spr (Longino, H)

**IHUM 11A. Making of the Modern World: Europe and Latin America**

First in a two quarter sequence. The emergence of modernity from 1300 to the present. Demographic and religious transformations in Europe. The development of ideologies, social formations, and political institutions as they eventually crossed the Atlantic and were modified in the Americas. 20th-century shocks of social revolution and authoritarianism throughout Latin America. The creative/destructive tensions inherent in this long transformation. GER:IHUM-2

4 units, Win (Como, D)

**IHUM 11B. Making of the Modern World: Europe and Latin America**

Second in a two quarter sequence. The emergence of modernity from 1300 to the present. Demographic and religious transformations in Europe. The development of ideologies, social formations, and political institutions as they eventually crossed the Atlantic and were modified in the Americas. 20th-century shocks of social revolution and authoritarianism throughout Latin America. The creative/destructive tensions inherent in this long transformation. GER:IHUM-3

4 units, Spr (Frank, Z)

**IHUM 13. BEYOND SURVIVAL**

How do men and women survive not just physically, but intellectually, creatively, spiritually? Texts that imaginatively model strategies to overcome physical deprivation, from enslavement to prison camp confinement to sexual violence, and social oppression (from religious persecution to gender discrimination). How does a legacy of psychic and social trauma manifest itself in the contemporary moment? Works from the 17th century to the present that consider not only how to survive but also the constraints of gender, race, nation, and history. At what cost and for what greater purpose does one survive? GER: IHUM 1

4 units, Aut (Elam, H; Elam, M)

**IHUM 25A. Art and Ideas**

First in a two quarter sequence. Art forms of theatre and dance explore fundamental questions about cultural, political and aesthetic issues surrounding the use of the body as an art medium. Examples of global performance from 19th to 21st centuries ranging from Romantic ballet to athletic experimental theatre. History and evolution of representing life through performance in a range of live and digital examples. GER:IHUM-2

4 units, Win (Ross, J; Rayner, A)

**IHUM 25B. Art and Ideas**

Second in a two quarter sequence. Art forms of theatre and dance explore fundamental questions about cultural, political and aesthetic issues surrounding the use of the body as an art medium. Global performance from 19th to 21st centuries ranging from Romantic ballet to athletic experimental theatre. History and evolution of representing life through performance in a range of live and digital examples. GER:IHUM-3

4 units, Spr (Rayner, A; Ross, J)

**IHUM 34A. A Life of Contemplation or Action? Debates in Western Literature and Philosophy**

First in a two quarter sequence. Literary treatments of the debate over the active versus the contemplative life from the classical to the modern era. Changing literary, historical and philosophical contexts. GER:IHUM-2

4 units, Win (Summit, J)

**IHUM 34B. A Life of Contemplation or Action? Debates in Western Literature and Philosophy**

Second in a two quarter sequence. Literary treatments of the debate over the active versus the contemplative life from the classical to the modern era. Changing literary, historical and philosophical contexts. GER:IHUM-3

4 units, Spr (Vermeule, B)

**IHUM 39A. Inventing Classics: Greek and Roman Literature in Its Mediterranean Context**

First in a two quarter sequence. The ancient Mediterranean world was as consumed with questions about the nature of human society and human existence as is present-day society. Sources include influential literary texts from Greece and Rome, and from other cultures in the Mediterranean and the Near East, organized by literary genre. The origins of such genres. GER:IHUM-2

4 units, Win (McCall, M)

**IHUM 39B. Inventing Classics: Greek and Roman Literature in Its Mediterranean Context**

Second in a two quarter sequence. The ancient Mediterranean world was as consumed with questions about the nature of human society and human existence as is present-day society. Sources include influential literary texts from Greece and Rome, and from other cultures in the Mediterranean and the Near East, organized by literary genre. The origins of such genres. GER:IHUM-3

4 units, Spr (Kaesser, C)

**IHUM 40A. World Archaeology and Global Heritage**

First in a two quarter sequence. The impact of the past on the present, and of the present on the past: the role of the past in contemporary society, and of present-day archaeological research, management, and conservation in approaching the past. Topics include debates about the peopling of the New World, religious conflicts over heritage sites, and archaeology's roles in heritage and conflicts. Sources include archaeological sites, landscapes, architecture, objects, literary works, religious texts, films, political essays, and scientific articles. GER:IHUM-2

4 units, Win (Hodder, I)

**IHUM 40B. World Archaeology and Global Heritage**

Second in a two quarter sequence. The impact of the past on the present, and of the present on the past: the role of the past in contemporary society, and of present-day archaeological research, management, and conservation in approaching the past. Topics include debates about the peopling of the New World, religious conflicts over heritage sites, and archaeology's roles in heritage and conflicts. Sources include archaeological sites, landscapes, architecture, objects, literary works, religious texts, films, political essays, and scientific articles. GER:IHUM-3

4 units, Spr (Voss, B)

**IHUM 48. The Art of Living**

Whether we realize it or not, all of us are forced to make a fundamental choice: by deciding what is most valuable to us, we decide how we are going to live our life. We may opt for a life of reason and knowledge; one of faith and discipline; one of nature and freedom; one of community and altruism; or one of originality and style. Where, however, do such ideals come from and what role do great works of art play in all this? GER: IHUM-1 GER:IHUM-1

4 units, Aut (Anderson, L; Landy, J; Taylor, K)

**IHUM 57. Humans and Machines**

Shifting boundaries between mechanical and human: how humans interact with machines, and how they may be conceived, designed, and manipulated as machines; how machines in turn reflect upon their human creators. What it means to think of the human body as a machine or as not a machine: what is a machine; what forms can machinery take; what is a living body; what have concepts such as machine, human, alive, and intelligent meant in different times and places; and how have their meanings changed? GER:IHUM-1

4 units, Aut (Lowood, H; Bukatman, S)

**IHUM 63. Freedom, Equality, Difference**

Which freedoms should a just society promote and which should be curtailed for the sake of justice? What equalities properly concern government and how can the achievement of equality be reconciled with respect for freedom? What roles should social and political institutions take in guaranteeing freedom and equality? Focus is on interdisciplinary inquiry including political philosophy, education, literature, history, and law. Abstract ideas and case histories, using one to shed light on the other. GER:IHUM-1

4 units, Aut (Palumbo-Liu, D; Koski, W; Reich, R)

**IHUM 64. Journeys**

Works spanning 2,300 years, diverse cultural and historical situations, and different forms and genres, which present essential aspects of the journey from birth to death. These texts trace moral, spiritual, and emotional passages within that one great journey, passages that challenge and transform people as they advance toward what poet Thomas Gray called the inevitable hour. GER:IHUM-1

4 units, Aut (Wolff, T; Yearley, L)

**IHUM 65. Race and Reunion: American Memory and the Civil War**

The place of slavery and the war in American cultural memory; its representation in literature, visual arts, music, high art, popular culture, and film. How the battle shifted from real to imagined locations. How stories told by writers and artists are shaped by memories and narratives of the past. Themes include competing ideas of race and nation, freedom and citizenship, personal and collective identity, and the purpose of literature and the arts. GER:IHUM-1

4 units, Aut (Wolf, B; Fishkin, S)

**IHUM 66. Laws and Orders**

The roles of law as a vehicle to establish order and as a tool with which customary order can be called into question. How norms may or may not apply equally in different cultural traditions. Five key texts represent watershed moments in the history of law as a force of regulation, order and normalization, but also as a source of emancipation: sometimes law imposes order, but the law can demand that we resist orders as well. GER:IHUM-1

4 units, Aut (Berman, R; Stacy, H)

**IHUM 67. Truth and Morality**

Investigates whether there is one truth or many; whether truth is in some way relative to particular groups of people, cultures, societies, or traditions in particular places and times; whether, as some philosophers have argued, human beings are not capable of know-

ing any truth whatsoever. Descriptive truths, the kinds of things physics, chemistry, biology, psychology, and economics claim to reveal, and normative or evaluative truths, the purported truths of morality, values, and rationality. GER:IHUM-1

4 units, Aut (Bobovich, C; Hussain, N)

**IHUM 68A. Performing Religion**

First in a two quarter sequence. Religion as a process of constructing meaning. Sources include philosophical texts, stories, rituals, dramatic performances, and other forms of religious expression. Historical contingency in the development of ideas and practices. Examples from Hinduism and Islam. GER:IHUM-2

4 units, Win (Hess, L; Bashir, S)

**IHUM 68B. Performing Religion**

Second in a two quarter sequence. Religion as a process of constructing meaning. Sources include philosophical texts, stories, rituals, dramatic performances, and other forms of religious expression. Historical contingency in the development of ideas and practices. Examples from Judaism and Buddhism. GER:IHUM-3

4 units, Spr (Fonrobert, C; Bielefeldt, C)

**IHUM 69A. HUMAN HISTORY: A Global Approach**

First of a two quarter sequence. How did we get here? And where are we going? This course tries to answer these questions by taking a global approach to the whole of human history. It looks at every continent, from the Ice Age to 21st century, asking how and why humans have multiplied so much, spread out so much, fought so much, consumed so much, and made some of their number so much richer than others. It focuses on the great global processes that have brought us to this point—the biological evolution of humans; the creation of art and religion; the origins of agriculture; the invention of hierarchy, gender discrimination, and slavery; the rise of cities and states; the formation of empires; globalization; the scientific and industrial revolutions; and finally the ongoing revolutions in genetics, nanotechnology, and robotics and the competing revolutions in weapons of mass destruction. GER: IHUM 2

4 units, Win (Morris, I)

**IHUM 69B. HUMAN HISTORY: A Global Approach**

Second of a two quarter sequence. How did we get here? And where are we going? This course tries to answer these questions by taking a global approach to the whole of human history. It looks at every continent, from the Ice Age to 21st century, asking how and why humans have multiplied so much, spread out so much, fought so much, consumed so much, and made some of their number so much richer than others. It focuses on the great global processes that have brought us to this point—the biological evolution of humans; the creation of art and religion; the origins of agriculture; the invention of hierarchy, gender discrimination, and slavery; the rise of cities and states; the formation of empires; globalization; the scientific and industrial revolutions; and finally the ongoing revolutions in genetics, nanotechnology, and robotics and the competing revolutions in weapons of mass destruction. ## ITALIAN GENERAL (ITALGEN)

### UNDERGRADUATE COURSES IN ITALIAN GENERAL

**ITALGEN 149. New Frontiers in Italian Cinema**

A new generation of Italian filmmakers who examine the contradictory encounters between Italians and the migrant others in contemporary Italy. Critical texts from film studies, gender studies, ethnic and cultural studies, psychoanalysis, and history. I English; films, in Italian with English subtitles, by Amelio, Ozpetek, Munzi, Garrone, Melliti, Tornatore, and Giordana. GER:DB-Hum

3-5 units, not given this year

**ITALGEN 181. Philosophy and Literature**

(Same as CLASSGEN 81, COMPLIT 181, ENGLISH 81, FREN-GEN 181, GERGEN 181) Required gateway course for Philosophical and Literary Thought; crosslisted in departments sponsoring the Philosophy and Literature track: majors should register in their home department; non-majors may register in any sponsoring department. Introduction to major problems at the intersection of philosophy and literature. Issues may include authorship, selfhood,

truth and fiction, the importance of literary form to philosophical works, and the ethical significance of literary works. Texts include philosophical analyses of literature, works of imaginative literature, and works of both philosophical and literary significance. Authors may include Plato, Montaigne, Nietzsche, Borges, Beckett, Barthes, Foucault, Nussbaum, Walton, Nehamas, Pavel, and Pippin. GER:DB-Hum

4-5 units, Win (Anderson, L; Landy, J)

## GRADUATE COURSES IN ITALIAN GENERAL

### ITALGEN 233. The Afterlife of the Middle Ages

(Same as FRENGEN 233) Literary works that evoke a medieval past in contrast to a historical present, and critical texts that treat aspects of the medieval or medievalism. How does the concept of medievalism emerge and evolve through the ages? The impact of the Reformation and romanticism, the study of Gothic architecture, and the use of the term medieval in modern political discourse. Authors include Hugo, Grimm brothers, Flaubert, Mâle, Pound, de Rougemont, Eco, Bataille, and Holsinger; films by Bresson and Pasolini.

3-5 units, Aut (Galvez, M)

### ITALGEN 242. Women Mystics from the Middle Ages to the Present

(Same as FRENGEN 242) This course explores the predominantly female mystical experience or direct embodied encounter with a spiritual reality that is difficult, perhaps impossible, to reduce to words, or to explain rationally. Through a variety of European texts from the Middle Ages to the present, by women and men, we will explore attempts to convey the experience metaphorically, to interpret it theologically and philosophically, and finally, to transmit it actively to others.

3-5 units, Win (Wittman, L)

### ITALGEN 264E. Petrarch and Petrarchism

(Same as COMPLIT 216) The works of Petrarch (1304-1374), acknowledged as the founder of Renaissance humanism, and a bibliophile, collector of manuscripts, and devotee of erudition. How he dedicated his life to harmonizing the Christian faith with classical learning. Sources include his Latin moral works, epistles, epics, and treatises on illustrious men, and the Triumphs and Canzoniere.

5 units, not given this year

### ITALGEN 267. French and Italian Literary Theory

(Same as FRENGEN 267) This course considers major French and Italian authors essential in the creation of contemporary Literary Theory. Many belong to the intellectual movement known as Structuralism, even if they may disagree with some of its fundamental concepts. Introduction of post-structuralist works which permit a different approach to Literature. Among the authors considered, special attention is given to Jacques Lacan, Luce Irigaray, Jacques Derrida, Michel Foucault, Guy Debord and Umberto Eco.

3-5 units, Win (Apostolides, J)

### ITALGEN 289. French and Italian Women Writers

(Same as FRENGEN 289) How does women's writing evolve from the very early twentieth-century, when women's liberation movements first began, and World War One brought major social changes, all the way to the big flowering of "feminine writing" in the 1970s and beyond? What is the relationship between women writers, women filmmakers, and feminism? Is it legitimate to consider women writers in a separate category? To what extent does a reevaluation of women writers mean reconsidering modern literary history? Authors/filmmakers include Aleramo, Yourcenar, de Beauvoir, Banti, Duras, Cavani.

3-5 units, Aut (Wittman, L)

### ITALGEN 301E. New Methods and Sources in French and Italian Studies

(Same as FRENGEN 301E) Based on student interest. Changes in research methods: the use of digitized texts, resources, and databases available through Stanford Libraries' gateways. Emphasis is on strategies for exploration of broad and specialized topics through new and traditional methods. Using a flexible schedule based on enrollment and the level of students' knowledge, may be offered in forms including a shortened version on the basics, inde-

pendent study, or a syllabus split over two quarters. Unit levels adjusted accordingly.

1-4 units, Spr (Sussman, S)

### ITALGEN 321. Giambattista Vico

Vico's New Science in historical context, its polemic against the rise of Cartesian critical philosophy, the basis of his original aesthetic theories, and the relationship of his thought to the traditions it foreshadows such as Hegelianism, Marxism, structuralism, hermeneutics, and speech-act theory. Readings: On the Most Ancient Wisdom of the Italians and The New Science; Descartes' Discourse on Method; Rousseau's Origin of Language; and Hegel's Introduction to the Philosophy of History. (Harrison)

4 units, Spr (Harrison, R)

### ITALGEN 328. Literature, Narrative and the Self

(Same as FRENGEN 328) The role of narrative in the well-lived life. Are narratives necessary? Can they, and should they, be literary? When might non-narrative approaches, whether literary or otherwise, be more relevant? Is unity of self something given, something to be achieved, or something to be overcome? Readings from Plato, Aristotle, Montaigne, Schopenhauer, Nietzsche, Camus, MacIntyre, G. Strawson; Shklovsky, Genette, Ricoeur, Brooks; Boccaccio, Lazarillo de Tormes, Shakespeare, Nerval, Musil, Beckett, Nabokov, Morrison; film.

5 units, Spr (Landy, J)

### ITALGEN 369. Introduction to Graduate Studies: Criticism as Profession

(Same as COMPLIT 369, FRENGEN 369, GERLIT 369) Major texts of modern literary criticism in the context of professional scholarship today. Readings of critics such as Lukács, Auerbach, Frye, Ong, Benjamin, Adorno, Szondi, de Man, Abrams, Bourdieu, Vendler, and Said. Contemporary professional issues including scholarly associations, journals, national and comparative literatures, university structures, and career paths.

5 units, Aut (Berman, R)

### ITALGEN 395. Philosophical Reading Group

(Same as COMPLIT 359A, FRENGEN 395) Discussion of one contemporary or historical text from the Western philosophical tradition per quarter in a group of faculty and graduate students. For admission of new participants, a conversation with H. U. Gumbrecht is required. May be repeated for credit.

1 unit, not given this year

## INTRODUCTORY SEMINARS

F = preference to freshmen; S = preference to sophomores; Dial = dialogue; Sem = Seminar.

## AERONAUTICS AND ASTRONAUTICS INTRODUCTORY COURSES

### AA 113N. Structures: Why Things Don't (and Sometimes Do) Fall Down

(F,Sem) SU Intro Seminar - Freshman. Preference to freshmen. How structures created by nature or built by human beings keep things up and keep things in. Topics: nature's structures from microorganisms to large vertebrae; buildings from ancient dwellings to modern skyscrapers; spacecraft and airplanes; boats from ancient times to America's Cup sailboats, and how they win or break; sports equipment; and biomedical devices including bone replacements and cardiovascular stents. How composite materials are used to make a structure light and strong. GER:DB-EngrAppSci

3 units, Win (Springer, G)

### AA 115N. The Global Positioning System: Where on Earth are We, and What Time is It?

(F,Sem) SU Intro Seminar - Freshman. Preference to freshmen. Why people want to know where they are: answers include cross-Pacific trips of Polynesians, missile guidance, and distraught callers. How people determine where they are: navigation technology from dead-reckoning, sextants, and satellite navigation (GPS). Hands-on experience. How GPS works; when it does not work; possibilities for improving performance. GER:DB-EngrAppSci

3 units, Aut (Enge, P)

## AFRICAN AND AFRICAN AMERICAN STUDIES INTRODUCTORY COURSES

**AFRICAAM 54N. African American Women's Lives** (F,Sem) (Same as HISTORY 54N) Stanford Introductory Seminar. Preference to freshmen. The everyday lives of African American women in 19th- and 20th-century America in comparative context of histories of European, Hispanic, Asian, and Native American women. Primary sources including personal journals, memoirs, music, literature, and film, and historical texts. Topics include slavery and emancipation, labor and leisure, consumer culture, social activism, changing gender roles, and the politics of sexuality. GER:DB-Hum  
4-5 units, Aut (Hobbs, A)

## AMERICAN STUDIES INTRODUCTORY COURSES

**AMSTUD 114N. Visions of the 1960s** (S,Sem) Stanford Introductory Seminar. Preference to sophomores. Introduction to the ideas, sensibility, and, to a lesser degree, the politics of the American 60s. Topics: the early 60s vision of a beloved community; varieties of racial, generational, and feminist dissent; the meaning of the counterculture; and current interpretive perspectives on the 60s. Film, music, and articles and books. GER:DB-Hum, EC-AmerCul  
5 units, Aut (Gillam, R)

## ANTHROPOLOGY INTRODUCTORY COURSES

**ANTHRO 21N. The Anthropology of Globalization** (F,Sem) Stanford Introductory Seminar. Preference to freshmen. Anthropological approach to how cultural change, economic restructuring, and political mobilization are bound up together in the process of globalization. GER:DB-SocSci  
3-4 units, Aut (Ebron, P)

**ANTHRO 22N. Ethnographies of North America: An Introduction to Cultural and Social Anthropology** (F,Sem) Stanford Introductory Seminar. Preference to freshmen. Ethnographic look at human behavior, including cultural transmission, social organization, sex and gender, culture change, and related topics in N. America. Films. GER:DB-SocSci  
3-4 units, Win (Wilcox, M)

## APPLIED PHYSICS INTRODUCTORY COURSES

**APPPHYS 79N. Energy Options for the 21st Century** (F,Sem) Stanford Introductory Seminar. Preference to freshmen. Choices for meeting the future energy needs of the U.S. and the world. Basic physics of energy sources, technologies that might be employed, and related public policy issues. Trade-offs and societal impacts of different energy sources. Policy options for making rational choices for a sustainable world energy economy. GER:DB-EngrAppSci  
3 units, Aut (Fox, J; Geballe, T)

## BIOCHEMISTRY INTRODUCTORY COURSES

**BIOC 118Q. Genomics and Medicine** (S,Sem) Stanford Introductory Seminar. Preference to sophomores. Knowledge gained from sequencing human, bacterial, and viral genomes and implications for medicine and biomedical research. Novel diagnoses (chips, SNPs and gene expression) and treatment of diseases including gene therapy, stem cell therapy, and rational drug design. Ethical implications of stem cell therapy and uses of genetic information. Use of genome and disease databases to determine gene function in disease, diagnosis, and potential treatments. See <http://biochem118.stanford.edu/>. GER:DB-EngrAppSci  
3 units, Aut (Brutlag, D)

## BIOENGINEERING INTRODUCTORY COURSES

**BIOE 70Q. Medical Device Innovation** (S,Sem) Stanford Introductory Seminar. Preference to sophomores. Commonly used medical devices in different medical specialties. Guest lecturers include Stanford Medical School physicians, entrepreneurs, and venture capitalists. How to identify clinical needs and design device solutions to address these needs. Fundamentals of starting a company. Field trips to local medical device companies; workshops. No previous engineering training required.  
3 units, Spr (Staff)

## BIOLOGY INTRODUCTORY COURSES

**BIO 11N. Biotechnology in Everyday Life** (F,Sem) Stanford Introductory Seminar. Preference to freshmen. The science that makes transgenic plants and animals possible. Current and future applications of biotechnology and the ethical issues raised. GER: DB-NatSci, DB-NatSci  
3 units, Aut (Walbot, V)

**BIO 13N. Environmental Problems and Solutions** (F,Sem) Stanford Introductory Seminar. Preference to freshmen. Students do independent investigations of current environmental problems, analyzing differing views of them and discussing possible solutions. Each student gives seminar presentations and leads seminar discussions. Short, documented position papers are written for policy makers. GER: DB-NatSci  
3 units, Spr (Ehrlich, P)

**BIO 14N. Plants and Civilization** (F,Sem) Stanford Introductory Seminar. Preference to freshmen. The role of plants in the development of civilization. Topics: the use of forests, woodlands, and grazing lands; centers of origins and spread of crops; viticulture, and wine and beer making; the spice route and the age of exploration; the use of plants as medicine; the global spread of weeds; engineering plants for the future; the importance of tea, coffee, chocolate, sugar, potatoes, natural dyes, and rubber in societal affairs and change. GER: DB-NatSci  
3 units, Win (Mooney, H)

**BIO 16N. Island Ecology** (F,Sem) Stanford Introductory Seminar. Preference to freshmen. How ecologists think about the world. Focus is on the Hawaiian Islands: origin, geology, climate, evolution and ecology of flora and fauna, and ecosystems. The reasons for the concentration of threatened and endangered species in Hawaii, the scientific basis for their protection and recovery. How knowledge of island ecosystems can contribute to ecology and conservation biology on continents. GER: DB-NatSci  
3 units, Spr (Vitousek, P), alternate years, not given next year

**BIO 26N. Maintenance of the Genome** (F,Sem) Stanford Introductory Seminar. Preference to freshmen. Focus is on DNA repair systems that monitor the genome to ensure genomic stability in the face of natural endogenous threats to DNA and those due to radiation and genotoxic toxic environmental chemicals. Redundancy of the genetic message ensured by complementary DNA strands facilitates recovery of information by excision repair when one of the strands is damaged. Predisposition to cancer is often a consequence of defective DNA repair. Relevance for oncology, aging, developmental biology, environmental health, and neurobiology. GER: DB-NatSci  
3 units, Spr (Hanawalt, P)

**BIO 27N. Nature and Nurture in Brain Development** (S,Sem) Stanford Introductory Seminar. Preference to sophomores. Examination of the roles of genes and the environment in shaping brain wiring and behavior, using readings of papers from the primary scientific literature as examples of how the developing nervous system integrates information from both the genetic blueprint and external experience in forming neural connections.  
3 units, Spr (McConnell, S)

**BIO 33N. Conservation Science and Practice** (F,Sem) Stanford Introductory Seminar. Preference to freshmen. Interdisciplinary. The science and art of conservation today. The forces that are driving change in Earth's atmosphere, lands, waters, and variety of life forms. Which broad dimensions of the biosphere, and which elements of ecosystems, most merit protection?

The prospects for, and challenges in, making conservation economically attractive and commonplace. Field trip; project. GER:DB-NatSci

3 units, Spr (Daily, G)

### BIO 34N. Hunger

(F,Sem) Stanford Introductory Seminar. The biology of hunger and satiety, disease states that disrupt normal responses to hunger and satiety, starvation responses and adaptations to starvation in a variety of organisms, food production and distribution mechanisms, historic famines and their causes, the challenges of providing adequate food and energy for the Earth's growing population, local and global efforts to alleviate hunger, and hunger in fiction. GER:DB-NatSci

3 units, Aut (Barton, K)

### BIO 37N. Green Revolution and Plant Biotechnology

(F,Sem) Stanford Introductory Seminar. Feeding ever-growing populations is a constant challenge to mankind. In the second half of the 20th century, the breeding of improved varieties combined with the use of chemical fertilizers and pesticides led to crop yield increases labeled the Green Revolution. Modern technologies in genetic engineering are expected to bring the second green revolution. Meeting the current and future global food needs without further damaging the fragile environment requires innovative effort from scientists and the society.

3 units, Win (Wang, Z)

### BIO 38N. Photosynthesis: From Basic Mechanisms to Biofuels

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Photosynthetic processes in terrestrial and aquatic environments. Biological and chemical ways that have been developed to capture the energy of sunlight; how this light energy can be converted to usable forms of energy, including biofuels; and potential impacts of anthropogenic energy generation on the health of the planet.

3 units, Aut (Grossman, A)

### BIO 39N. Networks in Biology

(F,Sem) Stanford Introductory Seminar. Networks are everywhere, including friendship links on Facebook, airline routes, power grids, and the Internet. Biology is no exception. Examples include food chains, protein interaction maps, and metabolic pathways. Despite their ubiquitousness, the study of networks in the real world only started about a decade ago. Exploration of the types of networks in biology and the approaches people use in studying them. Discussions and presentations of original research papers.

3 units, Spr (Staff), alternate years, not given next year

## BIOMEDICAL INFORMATICS INTRODUCTORY COURSES

### BIOMEDIN 109Q. Genomics: A Technical and Cultural Revolution

(S,Sem) (Same as GENE 109Q) Stanford Introductory Seminar. Preference to sophomores. Concepts of genomics, high-throughput methods of data collection, and computational approaches to analysis of data. The social, ethical, and economic implications of genomic science. Students may focus on computational or social aspects of genomics.

3 units, Win (Altman, R)

## CHEMICAL ENGINEERING INTRODUCTORY COURSES

### CHEMENG 35N. Renewable Energy for a Sustainable World

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. An overall world energy assessment, projections, and technologies. How to assess good and bad potential impacts of leading renewable energy candidates: benefit versus impact ratio using quantitative cradle-to-grave approach. Technologies suitable for near-term application in developing economic systems. Governmental policies, governmental versus private sector investments, raw materials supply issues, and impact of cultural influences on technology choices and speed of implementation. GER:DB-EngrAppSci

3 units, Aut (Swartz, J)

### CHEMENG 60Q. Environmental Regulation and Policy

(S,Sem) Stanford Introductory Seminar. Preference to sophomores. How environmental policy is formulated in the U.S. How and what type of scientific research is incorporated into decisions. How to

determine acceptable risk, the public's right to know of chemical hazards, waste disposal and clean manufacturing, brownfield redevelopment, and new source review regulations. The proper use of science and engineering including media presentation and misrepresentation, public scientific and technical literacy, and emotional reactions. Alternative models to formulation of environmental policy. Political and economic forces, and stakeholder discussions. GER:DB-EngrAppSci

3 units, Aut (Robertson, C; Libicki, S)

### CHEMENG 70Q. Masters of Disaster

(S,Sem) Stanford Introductory Seminar. Preference to sophomores. For students interested in science, engineering, politics, and the law. Learn from past disasters to avoid future ones. How disasters can be tracked to failures in the design process. The roles of engineers, artisans, politicians, lawyers, and scientists in the design of products. Failure as rooted in oversight in adhering to the design process. Student teams analyze real disasters and design new products presumably free from the potential for disastrous outcomes. GER:DB-EngrAppSci

3 units, Aut (Robertson, C; Moalli, J)

### CHEMENG 80Q. Art, Chemistry, and Madness: The Science of Art Materials

(S,Sem) Stanford Introductory Seminar. Preference to sophomores. Chemistry of natural and synthetic pigments in five historical palettes: earth (paleolithic), classical (Egyptian, Greco-Roman), medieval European (Middle Ages), Renaissance (old masters), and synthetic (contemporary). Composite nature of paints using scanning electron microscopy images; analytical techniques used in art conservation, restoration, and determination of provenance; and inherent health hazards. Paintings as mechanical structures. Hands-on laboratory includes stretching canvas, applying gesso grounds, grinding pigments, preparing egg tempera paint, bamboo and quill pens, gilding and illumination, and papermaking. GER:DB-EngrAppSci

3 units, Spr (Frank, C; Loesch-Frank, S)

## CHEMISTRY INTRODUCTORY COURSES

### CHEM 24N. Nutrition and History

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Intended to broaden the introductory chemistry experience. The biochemical basis of historically important nutritional deficiencies (vitamins, minerals, starvation, metabolic variants that predispose to disease) and environmental toxins is related to physiological action and the sociological, political, and economic consequences of its effect on human populations. Prerequisite: high school chemistry. Recommended: 31A,B, or 31X, or 33.

2 units, Spr (Huestis, W)

### CHEM 25N. Science in the News

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Possible topics include: diseases such as avian flu, HIV, and malaria; environmental issues such as climate change, atmospheric pollution, and human population; energy sources in the future; evolution; stem cell research; nanotechnology; and drug development. Focus is on the scientific basis for these topics as a basis for intelligent discussion of societal and political implications. Sources include the popular media and scientific media for the nonspecialist, especially those available on the web.

3 units, Aut (Andersen, H)

### CHEM 25Q. Science-in-Theatre: A New Genre?

(S,Sem) (Same as DRAMA 25N) Stanford Introductory Seminar. Preference to sophomores. How scientists acquire their rules, mores, and idiosyncrasies through a form of intellectual osmosis in a mentor-disciple relationship. Scientists represented as Franksteins or nerds, rather than normal. Why more intellectually challenging plays have appeared on the Anglo-American theatre scene where scientific behavior and even science are presented accurately. Students engage in a playwriting experiment.

3 units, Win (Djerassi, C)

### CHEM 26N. The What, Why, How, and Wow's of Nanotechnology

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. An intro to nanotechnology with discussion of basic science at the nanoscale, its difference from molecular and macroscopic scales, and implications and applications. Includes important develop-

ments in nanotechnology made in the past two decades, from imaging and moving single atoms on surfaces to killing cancer cells with nanoscale tools and gadgets. GER: DB-NatSci  
3 units, Win (Dai, H)

## CHICANA/O STUDIES INTRODUCTORY COURSES

### CHICANST 160N. Salt of the Earth: Docudrama in Latino America

(F,Sem) (Same as CSRE 160N) Stanford Introductory Seminar. Preference to freshmen. An introduction to docudrama as a form of factually based, politically-motivated, dramatic writing (film and theater), related to the Chicana/o and Latina/o experience. The 1954 blacklisted film *Salt of the Earth*. Students create a short original docudrama. GER:DB-Hum  
3-5 units, Win (Moraga, C)

## CHINESE GENERAL INTRODUCTORY COURSES

### CHINGEN 70N. Marvelous Creatures: Animals and Humans in Chinese Literature

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Read novels and short stories as well as view films that feature an array of marvelous creatures from late imperial times to the contemporary era. What animal imageries and metaphors can reveal about the Chinese and how they relate to the natural, supernatural, and human worlds across the centuries. GER:DB-Hum  
3-4 units, Spr (Lee, H)

## CIVIL AND ENVIRONMENTAL ENGINEERING INTRODUCTORY COURSES

### CEE 31Q. Accessing Architecture Through Drawing

(S,Sem) Stanford Introductory Seminar. Preference to sophomores. Drawing architecture provides a deeper understanding of the intricacies and subtleties that characterize contemporary buildings. How to dissect buildings and appreciate the formal elements of a building, including scale, shape, proportion, colors and materials, and the problem solving reflected in the design. Students construct conventional architectural drawings, such as plans, elevations, and perspectives. Limited enrollment. GER:DB-EngrAppSci  
4 units, Win (Barton, J)

### CEE 44Q. Critical Thinking and Career Skills

(S,Sem) Stanford Introductory Seminar. Factors required for successful careers. Guest speakers. Case studies. Participation in real world corporate interviews, testing and reviews conducted by industry trainers. Limited enrollment.  
3 units, Aut (Clough, R)

### CEE 46Q. Fail Your Way to Success

(S,Sem) Stanford Introductory Seminar. Preference to sophomores. How to turn failures into successes; cases include minor personal failures and devastating engineering disasters. How personalities and willingness to take risks influence the way students approach problems. Field trips, case studies, and guest speakers applied to students day-to-day interactions and future careers. Goal is to redefine what it means to fail. GER:DB-EngrAppSci  
3 units, Spr (Clough, R)

### CEE 48N. Organizing Global Projects

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Challenges associated with planning and managing both commercial and governmental/non-profit global projects; theory, methods, and tools to enhance global project outcomes. Students teams model and simulate crosscultural teams engaged in global projects. Opportunities to participate in research in the Collaboratory for Research on Global Projects involving faculty from Stanford departments and schools; see <http://crgp.stanford.edu>.  
4 units, Win (Levitt, R)

## CLASSICS ART/ARCHAEOLOGY INTRODUCTORY COURSES

**CLASSART 21Q. Eight Great Archaeological Sites in Europe**  
(S,Sem) Stanford Introductory Seminar. Preference to sophomores. Focus is on excavation, features and finds, arguments over interpretation, and the place of each site in understanding the archaeological history of Europe. Goal is to introduce the latest archaeological and anthropological thought, and raise key questions about ancient society. The archaeological perspective foregrounds interdisciplinary study: geophysics articulated with art history, source criticism with analytic modeling, statistics interpretation. A web site with resources about each site, including plans, photographs, video, and publications, is the basis for exploring. GER:DB-Hum  
3-5 units, Aut (Shanks, M)

## CLASSICS GENERAL INTRODUCTORY COURSES

### CLASSGEN 6N. Antigone: From Ancient Democracy to Contemporary Dissent

(F,Sem) (Same as DRAMA 12N) Stanford Introductory Seminar. Preference to freshmen. Tensions inherent in the democracy of ancient Athens; how the character of Antigone emerges in later drama, film, and political thought as a figure of resistance against illegitimate authority; and her relevance to contemporary struggles for women's and workers' rights and national liberation. Readings and screenings include versions of Antigone by Sophocles, Anouilh, Brecht, Fugard/Kani/Ntshona, Paulin, Glowacki, Gurney, and von Trotta. GER:DB-Hum, EC-Gender  
3-5 units, Aut (Rehm, R)

### CLASSGEN 24N. Sappho: Erotic Poetess of Lesbos

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Sappho's surviving fragments in English; traditions referring to or fantasizing about her disputed life. How her poetry and legend inspired women authors and male poets such as Swinburne, Baudelaire, and Pound. Paintings inspired by Sappho in ancient and modern times, and composers who put her poetry to music. GER:DB-Hum, EC-Gender  
4-5 units, Spr (Peponi, A)

## COMMUNICATION INTRODUCTORY COURSES

### COMM 118Q. Theories of Film Practice

(S,Sem) Stanford Introductory Seminar. Preference to sophomores. How theory connects with practice in the production of film and television. Film and television from the perspectives of practitioners who have theorized about their work in directing, editing, screenwriting, cinematography, and sound, and social scientists whose research has explored similar issues empirically.  
4 units, Win (Breitrose, H)

## COMPARATIVE LITERATURE INTRODUCTORY COURSES

### COMPLIT 11Q. Shakespeare, Playing, Gender

(S,Sem) Stanford Introductory Seminar. Preference to sophomores. Focus is on several of the best and lesser known plays of Shakespeare, on theatrical and other kinds of playing, and on ambiguities of both gender and playing gender. Topics: transvestism inside and outside the theater, medical and other discussions of sex changes from female to male, hermaphrodites, and fascination with the monstrous. GER:DB-Hum, EC-Gender  
3 units, Spr (Parker, P)

### COMPLIT 41Q. Ethnicity and Literature

(S,Sem) Stanford Introductory Seminar. Preference to sophomores. What is meant by ethnic literature? How is ethnic writing different from non-ethnic writing, or is there such a thing as either? How does ethnicity as an analytic perspective affect the way literature is read by ethnic peoples? Articles and works of fiction; films on ethnic literature and cultural politics. How ethnic literature represents the nexus of social, historical, political, and personal issues. GER:DB-Hum, EC-AmerCul  
3-5 units, Aut (Palumbo-Liu, D)

**COMPLIT 50Q. Is God Dead?**

(S,Sem) (Same as GERLIT 120Q) Stanford Introductory Seminar. A consideration of Nietzsche's claim that God is dead in relation to other texts of German literature and philosophy. The status of religious faith in relation to modernity and secularization; religion and science; culture and faith. Readings in German include selections from sacred and liturgical texts; fictional depictions of religious experience; religion in poetry; German theories of religion. Authors to be studied include Rilke, Hesse, Weiss, Schöder, Buber, Sachs, Haecker, Weber, Taubes, Ratzinger. GER:DB-Hum  
3-5 units, Win (Berman, R)

**COMPARATIVE MEDICINE INTRODUCTORY COURSES****COMP MED 81N. Comparative Anatomy and Physiology of Mammals**

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Comparative approach to common mammals, laboratory, and domestic species. The unique adaptations of each species in terms of its morphological, anatomical, and behavioral characteristics. How these species interact with human beings and other animals. GER:DB-NatSci

3 units, Win (Bouley, D)

**COMP MED 84Q. Globally Emerging Zoonotic Diseases**

(S,Sem) Stanford Introductory Seminar. Preference to sophomores. Infectious diseases impacting veterinary and human health around the world today. Mechanisms of disease, epidemiology, and underlying diagnostic, treatment and control principles associated with these pathogens.

3 units, Spr (Felt, S)

**COMP MED 87Q. Introduction to the Mouse in Biomedical Research**

(S,Sem) Stanford Introductory Seminar. Preference to sophomores. The laboratory mouse, one of the most widely used models for biomedical research. The natural history and origin of the laboratory mouse, its relationship to its wild cousins, the history and uses of some common laboratory mice, widely used research models (transgenic mice, knock-out and knock-in mice, cloning, immunodeficient mice) and their uses in the understanding and treatment of human diseases. Reading and discussion of scientific papers; presentation of a paper that uses the mouse as a model for the study of a human disease.

3 units, Aut (Nagamine, C)

**COMPARATIVE STUDIES IN RACE AND ETHNICITY INTRODUCTORY COURSES**

**CSRE 160N. Salt of the Earth: Docudrama in Latino America**  
(F,Sem) (Same as CHICANST 160N) Stanford Introductory Seminar. Preference to freshmen. An introduction to docudrama as a form of factually based, politically-motivated, dramatic writing (film and theater), related to the Chicana/o and Latina/o experience. The 1954 blacklisted film *Salt of the Earth*. Students create a short original docudrama. GER:DB-Hum

3-5 units, Win (Moraga, C)

**COMPUTER SCIENCE INTRODUCTORY COURSES****CS 21N. Can Machines Know? Can Machines Feel?**

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Can mental attitudes attributed to people and sometimes to animals, including knowledge, belief, desire, and intention, also be ascribed to machines? Can light sensors have a belief? Can a pool cleaning robot or tax-preparation software have an intention? If not, why not? If yes, what are the rules of such ascription, and do they vary between human beings and machines? Sources include philosophy, neuroscience, computer science, and artificial intelligence. Topics: logic, probability theory, and elements of computation. Students present a paper. GER:DB-EngrAppSci

3 units, Aut (Shoham, Y)

**CS 26N. Motion Planning for Robots, Digital Actors, and Other Moving Objects**

(F,Sem) Stanford Introductory Seminar. Preference to freshmen.

Motion planning theory and computational approaches: how to represent, simulate, and plan motions in a computer. Intriguing algorithms, representations, and applications: terminology and concepts for reading motion planning research literature. Problems include: how a robot arm manipulates parts without colliding with its environment; how many maneuvers are required to park a car in a tight spot; how characters in computer games avoid running into obstacles; how molecules change shapes to perform biological functions; how to assemble a product from individual parts; how a multi-limbed robot can navigate on rough terrain; how robots can perform surgical procedures. Prerequisite: some computer programming experience in any language. GER:DB-EngrAppSci

3 units, Spr (Latombe, J)

**CS 47N. Computers and the Open Society**

(F,Sem) Stanford Introductory Seminar. How online technologies change our lives and the social structure that we live in. Course emphasizes critical analyses of current trends i.e. blogging, social networks, and instant mobile communication. Readings include case studies and analyses of basic principles i.e. privacy, equity and sustainability. Guest speakers who have participated in development of computers and the net will share their experiences and enter into debates on current issues. Students work individually and in small groups to research issues, develop the capacity for critical thinking about them, and use the results as the basis for writing and discussions both in class and on-line.

3 units, Aut (Winograd, T)

**CS 73N. Business on the Information Highways**

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. The capabilities of the Internet and its services. Writing for the web. The effect on commerce, education, government, and health care. Technical and business alternatives. Who is hurt and who benefits from the changes? Participants develop web publications. GER:DB-EngrAppSci

3 units, Spr (Wiederhold, G; Barr, A; Tessler, S)

**CS 74N. Digital Dilemmas**

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Issues where policy decision making requires understanding computer and communications technology. Technology basics taught in non-technology terms. Topics include consumer privacy, government surveillance, file sharing and intellectual property, and electronic voting. GER:DB-EngrAppSci

3 units, Aut (Dill, D)

**DIVISION OF LITERATURES, CULTURES, AND LANGUAGES INTRODUCTORY COURSES****DLCL 70N. From Vampires to Bathroom Walls: Folklore and Literature**

(F,Sem) Stanford Introductory Seminar. In the early 19th century, some Europeans started seeing the stories and songs of illiterate peasants as folklore to be collected, preserved, and perhaps transformed into new literature, art, and music. These folktales, such as legends of vampires, continue to inspire artists. The idea of folklore has expanded to include the shared practices or utterances of any group with at least one linking factor, including latrinalia (wall writings in a public bathroom). Sources include folklore from German, English, Russian, and Yiddish sources, and theoretical essays. Students collect living folklore, and analyze and present it.

4 units, Spr (Safran, G)

**DRAMA INTRODUCTORY COURSES****DRAMA 11N. Dramatic Tensions: Theater and the Marketplace**

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Tension between artistic and commercial forces in modern theater; the conflicted state of the art form. Sources include major and emerging contemporary figures in commercial, fringe, and non-profit theater in the U.S. and UK. Visits with writers, directors, and dramaturges. GER:DB-Hum

4 units, Aut (Freed, A)

**DRAMA 12N. Antigone: From Ancient Democracy to Contemporary Dissent**

(F,Sem) (Same as CLASSGEN 6N) Stanford Introductory Semi-

nar. Preference to freshmen. Tensions inherent in the democracy of ancient Athens; how the character of Antigone emerges in later drama, film, and political thought as a figure of resistance against illegitimate authority; and her relevance to contemporary struggles for women's and workers' rights and national liberation. Readings and screenings include versions of Antigone by Sophocles, Anouilh, Brecht, Fugard/Kani/Ntshona, Paulin, Glowacki, Gurney, and von Trotta. GER:DB-Hum, EC-Gender

3-5 units, Aut (Rehm, R)

#### **DRAMA 15N. Screening the Stage**

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Stage plays that have been adapted for film and the differences in narrative, scene, character, the effects of star actors, audiences, and expectations in each medium. Play texts include: Look Back in Anger, A Streetcar Named Desire, A Raisin in the Sun, Who's Afraid of Virginia Woolf?, Mel Gibson's 1990 Hamlet, Closer, and Doubt.

4 units, Spr (Rayner, A)

#### **DRAMA 17N. Salt of the Earth: The Docudrama in America**

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Docudrama as a form of dramatic writing which provides a social critique of current or historical events through creative documentation and dramatization. Sources include Chicana/o and Latina/o texts, Brecht, Teatro Campesino, and Culture Clash. Students produce a short docudrama. GER:DB-Hum, EC-AmerCul

3 units, Win (Moraga, C)

#### **DRAMA 25N. Science-in-Theatre: A New Genre?**

(S,Sem) (Same as CHEM 25Q) Stanford Introductory Seminar. Preference to sophomores. How scientists acquire their rules, mores, and idiosyncrasies through a form of intellectual osmosis in a mentor-disciple relationship. Scientists represented as Franksteins or nerds, rather than normal. Why more intellectually challenging plays have appeared on the Anglo-American theatre scene where scientific behavior and even science are presented accurately. Students engage in a playwriting experiment.

3 units, Win (Djerassi, C)

#### **DRAMA 180Q. Noam Chomsky: The Drama of Resistance**

(S,Sem) Stanford Introductory Seminar. Preference to sophomores. Chomsky's ideas and work which challenge the political and economic paradigms governing the U.S. Topics include his model for linguistics; cold war U.S. involvements in S.E. Asia, the Middle East, Central and S. America, the Caribbean, and Indonesia and E. Timor; the media, terrorism, ideology, and culture; student and popular movements; and the role of resistance. GER:DB-Hum

3-5 units, Aut (Rehm, R)

#### **DRAMA 189Q. Mapping and Wrapping the Body**

(S,Sem) Stanford Introductory Seminar. Preference to sophomores. The concepts behind gender boundaries and clothing systems. GER:DB-Hum

3 units, Aut (Eddelman, W)

## **ECONOMICS INTRODUCTORY COURSES**

#### **ECON 11N. Understanding the Welfare System**

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Welfare reform legislation and the devolution revolution. The transfer of responsibility for antipoverty programs to the states. How recent reforms change the welfare system and who is likely to be affected. Food stamps, AFDC, TANF, SSI, and Medicaid. Income transfer programs such as earned income tax credit and income taxes, and labor market regulations such as minimum wages and overtime rules. Economic principles to understand the effectiveness of these programs and their consequences on the behavior of families. Pre- or corequisite: ECON 1. Recommended: basic understanding of labor markets, taxes, and transfers.

2 units, Aut (MaCurdy, T)

#### **ECON 17N. Energy, the Environment, and the Economy**

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. The relationship between environmental quality and production and consumption of energy. Can environmentally-friendly energy production and consumption compete with conventional sources? How to estimate and compare environmental impact costs of non-renewable sources such as fossil fuels and nuclear power versus renewable sources such as solar and wind power. Implicit subsidies in conventional energy sources and the environmental costs of

these subsidies. Regulatory and legal barriers to more environmentally friendly energy sources.

2 units, Spr (Wolak, F)

#### **ECON 20N. Economy and Economics of Ancient Greece**

(F,Sem) Stanford Introductory Seminar. Cultural background for Athens of the 5th and 4th century BC. Strengths and weaknesses of Athenian democracy. Athenian economy of the 4th century BC. Economic ideas of Plato, Aristotle, and Xenophon. Pros and cons of utilitarianism in light of the ethical theories of Plato and Aristotle.

2 units, Win (Amemiya, T)

## **ELECTRICAL ENGINEERING INTRODUCTORY COURSES**

#### **EE 14N. Things about Stuff**

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Most engineering curricula present truncated, linear histories of technology, but the stories behind disruptive inventions such as the telegraph, telephone, wireless, television, transistor, and chip are as important as the inventions themselves. How these stories elucidate broadly applicable scientific principles. Focus is on studying consumer devices; optional projects to build devices including semiconductors made from pocket change. Students may propose topics of interest to them. GER:DB-EngrAppSci

3 units, Aut (Lee, T)

#### **EE 20N. Hacking Stuff**

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. The design of a complete system by combining electrical engineering disciplines such as control theory, circuit design, microprocessors, and semiconductor devices. Based on radio-controlled toy cars, the design and construction of a robot capable of autonomously following a track. Teams compete in a race against the clock in a version of the DARPA Grand Challenge. GER:DB-EngrAppSci

3 units, Aut (Peumans, P)

#### **EE 21N. What is Nanotechnology?**

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Possibilities and impossibilities of nanotechnology. Sources include Feynman's There's Plenty of Room at the Bottom, Drexler's Engines of Creation: The Coming Era of Nanotechnology, and Crichton's Prey. Assumptions and predictions of these classic works; what nano machinery may do; scenarios of a technology that may go astray. Prerequisites: high school math, physics and chemistry. GER:DB-EngrAppSci

3 units, Aut (Wong, P)

#### **EE 23N. Imaging: From the Atom to the Universe**

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Forms of imaging including human and animal vision systems, atomic force microscope, microscope, digital camera, holography and three-dimensional imaging, telescope, synthetic aperture radar imaging, nuclear magnetic imaging, sonar and gravitational wave imaging, and the Hubble Space telescope. Physical principles and exposure to real imaging devices and systems. GER:DB-EngrAppSci

3 units, Spr (Hesselink, L)

#### **EE 24N. Incentive Mechanisms for Societal Networks**

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Examples of societal networks include: transportation networks; electricity, water, and gas networks; recycling systems. The efficient operation of such networks and their dependence on their use of technology and on human actions.

3 units, Spr (Prabhakar, B)

#### **EE 60N. Man versus Nature: Coping with Disasters Using Space Technology**

(F,Sem) (Same as GEOPHYS 60N) Stanford Introductory Seminar. Preference to freshman. Natural hazards, earthquakes, volcanoes, floods, hurricanes, and fires, and how they affect people and society; great disasters such as asteroid impacts that periodically obliterate many species of life. Scientific issues, political and social consequences, costs of disaster mitigation, and how scientific knowledge affects policy. How spaceborne imaging technology makes it possible to respond quickly and mitigate consequences; how it is applied to natural disasters; and remote sensing data ma-

nipulation and analysis. GER:DB-EngrAppSci  
4 units, Win (Zebker, H)

## ENGINEERING INTRODUCTORY COURSES

**ENGR 159Q. Japanese Companies and Japanese Society** (S,Sem) (Same as MATSCI 159Q) Stanford Introductory Seminar. Preference to sophomores. The structure of a Japanese company from the point of view of Japanese society. Visiting researchers from Japanese companies give presentations on their research enterprise. The Japanese research ethic. The home campus equivalent of a Kyoto SCTI course. GER:DB-SocSci  
3 units, Spr (Sinclair, R)

## ENGLISH INTRODUCTORY COURSES

**ENGLISH 53N. Aesthetic Taste and Gastronomy** (F,Sem) Stanford Introductory Seminar. Preference to freshmen. A sampling of aesthetics and gastronomy as defined by 18th-century British essayists and their heirs from England and France. Focus is on the development of middle class taste, figurative as well as food-oriented, and manners, snobbery, and sensibility. GER:DB-Hum  
3 units, Spr (Gigante, D)

**ENGLISH 61N. British Romanticism and Poetic Form** (F,Sem) Stanford Introductory Seminar. The major romantics emphasizing their innovations in poetic forms including sonnet, elegy, ode, hymn, and dramatic lyric. GER:DB-Hum  
3 units, Aut (Rovee, C)

**ENGLISH 62N. Eros in Modern American Poetry** (F,Sem) Stanford Introductory Seminar. Preference to freshmen. Anne Carson, treating love from Sappho to Socrates, shows how the Greeks derived their philosophy from the erotic poetic tradition. Readings include: Carson's poetry which locates erotic desire in the larger context of the desire for knowledge; classic Japanese haiku masters such as Basho; and William Carlos Williams, Louise Bogan, and C.K. Williams. GER:DB-Hum  
3 units, Aut (Fields, K)

**ENGLISH 64N. Growing Up in America** (F,Sem) Stanford Introductory Seminar. Preference to freshmen. How do race, class, gender, sexuality, and geography affect a person's experience of belonging to this country? The diversity of childhood and young adult experiences of people who have grown up in America. Fictional and autobiographical narratives and their rhetorical and aesthetic strategies. GER:DB-Hum  
3 units, Aut (Moya, P)

**ENGLISH 65N. Contemporary Women Fiction Writers** (F,Sem) Stanford Introductory Seminar. Preference to freshmen. Novels and story collections by women writers whose work explores: domestic and global politics; love, sexuality, and orientation; and spirituality and its meanings. Readings includes Dandicant, Eisenberg, Munro, Morrison, O'Brien, and Erdrich. GER:DB-Hum  
3 units, Aut (Tallent, E)

**ENGLISH 75N. Poetry and Environmental Awareness** (F,Sem) Stanford Introductory Seminar. Can Poetry Save the Earth? It can help, because the nature of poetry interacts vitally with the poetry of nature. Poems display a human presence, and human presence, for better or worse, stands at the core of our environmental, ecologic predicament. Native American song-prayers, the Bible, the Wordsworths, Coleridge, Keats, Clare, Whitman, Dickinson, Hardy, Hopkins, Yeats, Frost, Williams, D. H. Lawrence, Jeffers, Roethke, Lowell, Millay, Swenson, Bishop, Leverlov, and later poets through Hughes, Walcott, and Snyder.  
3 units, Win (Felstiner, J)

**ENGLISH 80Q. All the World's a Stage: Dramatic Realism on the Threshold of the Modern World** (S,Sem) Stanford Introductory Seminar. The relationship between heightened dramatic realism and historical, scientific, and cultural changes occurring in the early modern world, a defining moment in explorations of uncharted realms of the self, the world, the universe, and artistic form. Readings include Shakespeare's Othello, John Donne's dramatic poetry, and Marlowe's Doctor Faustus. How these, and other texts, point their readers and viewers toward

the modern world through experiments in the art of perspective.  
4-5 units, Win (Brooks, H)

**ENGLISH 84Q. Charles Dickens' David Copperfield: A Victorian Reading** (S,Sem) Stanford Introductory Seminar. Preference to sophomores. Dickens' favorite child, David Copperfield, has been a classic of the Victorian novel since its serial publication began in 1849. The comic masterpiece of the most popular novelist of his time, the sentimental favorite of Queen Victoria and of the author himself, this fictionalized autobiography tells the story of a difficult coming of age in the threatening world of early industrialized England. Work to be read in serial numbers, replicating as closely as possible the experience of Victorian readers. Primary publications and secondary sources on political, cultural, and historical surroundings.  
4 units, Win (Paulson, L)

**ENGLISH 86N. American Hauntings** (F,Sem) Stanford Introductory Seminar. Exploration of the cultural, psychological, social, and political dynamics of haunting in American literature, ranging from the early national period to the late twentieth century, looking at ghost stories as well as other instances of supernatural, emotional, or mental intervention. Authors include Charles Brockden Brown, Washington Irving, Edgar Allan Poe, Nathaniel Hawthorne, Charlotte Perkins Gilman, Charles Chesnutt, Henry James, Edith Wharton, Toni Morrison, Stephen King.  
3 units, Win (Richardson, J)

**ENGLISH 87N. The Graphic Novel: Word, Image, Sound, Silence** (S,Sem) Stanford Introductory Seminar. Preference to sophomores. The evolution of funnies to comics and graphic novels. How definitions and representations of this genre have changed over the last century. The controversy over the status of the graphic novel. GER:DB-Hum  
4-5 units, Win (Lunsford, A)

## ENVIRONMENTAL EARTH SYSTEM SCIENCE INTRODUCTORY COURSES

**EESS 37N. Energy and the Environment on the Back of an Envelope** (F,Sem) Stanford Introductory Seminar. Preference to freshmen. How quantitative understanding of the Earth helps inform decisions about energy supply. How can enough energy be provided to support future growth and development throughout the world without damaging the natural environment? Focus is on simple quantitative observations and calculations that facilitate evaluation of potential solutions to this problem; algebra only, no calculus. GER: DB-NatSci  
3 units, Aut (Staff)

**EESS 39N. The Carbon Cycle: Reducing Your Impact** (F,Sem) Stanford Introductory Seminar. Preference to freshmen. Changes in the long- and short-term carbon cycle and global climate through the burning of fossil fuels since the Industrial Revolution. How people can shrink their carbon footprints. Long-term sources and sinks of carbon and how they are controlled by tectonics and short-term sources and sinks and the interaction between the biosphere and ocean. How people can shrink their carbon footprints. Held at the Stanford Community Farm. GER: DB-NatSci  
3 units, Spr (Chamberlain, P)

**EESS 57Q. Climate Change from the Past to the Future** (S,Sem) Stanford Introductory Seminar. Preference to sophomores. Numeric models to predict how climate responds to increase of greenhouse gases. Paleoclimate during times in Earth's history when greenhouse gas concentrations were elevated with respect to current concentrations. Predicted scenarios of climate models and how these models compare to known hyperthermal events in Earth history. Interactions and feedbacks among biosphere, hydrosphere, atmosphere, and lithosphere. Topics include long- and short-term carbon cycle, coupled biogeochemical cycles affected by and controlling climate change, and how the biosphere responds to climate change. Possible remediation strategies.  
3 units, Spr (Staff)

## FEMINIST STUDIES INTRODUCTORY COURSES

### FEMST 188N. *Imagining Women: Writers in Print and in Person*

(S,Sem) Stanford Introductory Seminar. Gender roles, gender relations and sexual identity explored in contemporary literature and conversation with guest authors. Poetry and narrative examining relationships between race and gender set in 19th-21st centuries in The Phillippines, Jamaica, Japan, China and various parts of the U.S. Expository writing and oral skills are emphasized. Writing experience not necessary. GER:DB-Hum, EC-Gender  
4-5 units, Win (*Miner, V*)

### FEMST 191Q. *Writing Women's Lives*

(F,Dial) Stanford Introductory Dialogue. Creative writing through dialogue focusing on prose about the lives of women in different cultures and generations. Novels, short stories, and micro-narrative including fiction and memoir. Students produce work using research, memory, imagination, and metaphor.  
2 units, Aut (*Miner, V*)

## GENETICS INTRODUCTORY COURSES

### GENE 109Q. *Genomics: A Technical and Cultural Revolution*

(S,Sem) (Same as BIOMEDIN 109Q) Stanford Introductory Seminar. Preference to sophomores. Concepts of genomics, high-throughput methods of data collection, and computational approaches to analysis of data. The social, ethical, and economic implications of genomic science. Students may focus on computational or social aspects of genomics.  
3 units, Win (*Altman, R*)

## GEOLOGICAL AND ENVIRONMENTAL SCIENCES INTRODUCTORY COURSES

### GES 39N. *Forensic Geoscience: Stanford CSI*

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Geological principles, materials, and techniques indispensable to modern criminal investigations. Basic earth materials, their origin and variability, and how they can be used as evidence in criminal cases and investigations such as artifact provenance and environmental pollution. Sources include case-based, simulated forensic exercises and the local environments of the Stanford campus and greater Bay Area. Local field trips; research presentation and paper. GER: DB-NatSci  
3 units, Spr (*Maher, K*)

### GES 40N. *Diamonds*

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Topics include the history of diamonds as gemstones, prospecting and mining, and their often tragic politics. How diamond samples provide clues for geologists to understand the Earth's deep interior and the origins of the solar system. Diamond's unique materials properties and efforts in synthesizing diamonds. GER: DB-NatSci  
3 units, Spr (*Mao, W*)

### GES 43Q. *Environmental Problems*

(S,Sem) Stanford Introductory Seminar. Preference to sophomores. Components of multidisciplinary environmental problems and ethical questions associated with decision making in the regulatory arena. Students lead discussions on environmental issues such as groundwater contamination from point and nonpoint sources, cumulative watershed effects related to timber and mining practices, acid rain, and subsurface disposal of nuclear waste. GER: DB-NatSci  
3 units, Win (*Loague, K*)

### GES 55Q. *The California Gold Rush: Geologic Background and Environmental Impact*

(S,Sem) Stanford Introductory Seminar. Preference to sophomores. Topics include: geologic processes that led to the concentration of gold in the river gravels and rocks of the Mother Lode region of California; and environmental impact of the Gold Rush due to population increase, mining operations, and high concentrations of arsenic and mercury in sediments from hard rock mining and milling operations. Recommended: introductory geology. GER: DB-NatSci  
3 units, Win (*Bird, D*)

## GEOPHYSICS INTRODUCTORY COURSES

### GEOPHYS 60N. *Man versus Nature: Coping with Disasters Using Space Technology*

(F,Sem) (Same as EE 60N) Stanford Introductory Seminar. Preference to freshman. Natural hazards, earthquakes, volcanoes, floods, hurricanes, and fires, and how they affect people and society; great disasters such as asteroid impacts that periodically obliterate many species of life. Scientific issues, political and social consequences, costs of disaster mitigation, and how scientific knowledge affects policy. How spaceborne imaging technology makes it possible to respond quickly and mitigate consequences; how it is applied to natural disasters; and remote sensing data manipulation and analysis. GER:DB-EngrAppSci  
4 units, Win (*Zebker, H*)

## GERMAN GENERAL INTRODUCTORY COURSES

### GERGEN 104N. *Resistance Writings in Nazi Germany*

(F,Sem) Stanford Introductory Seminar. Preference to sophomores. The letters and diaries of individuals who resisted Nazi oppression and paid with their lives. Readings include the Scholl diaries, Bonhoeffer's letters and his Ethics, and letter exchanges from other crucial figures. No knowledge of German required; students may read texts in original if able. GER:DB-Hum  
3 units, Win (*Bernhardt, E*)

### GERGEN 122Q. *The Culture of Pessimism in 19th- and 20th-Century Europe*

(S,Sem) Stanford Introductory Seminar. European culture long relied on a narrative of inexorable human progress. Starting in the 19th century, this triumphalist narrative was shadowed by another tradition that rejected such trust in progress. The pessimistic tradition in Europe in literature, philosophy, the study of history, anthropology, and psychology; the distinction between pessimism in the fields of morality, culture, and intellectual life. Authors include Giacomo Leopardi, Arthur Schopenhauer, Lautréamont, T. S. Eliot, and Sigmund Freud. GER:DB-Hum  
3-5 units, Spr (*Daub, A*)

## GERMAN LITERATURE INTRODUCTORY COURSES

### GERLIT 16N. *Music, Myth, and Modernity: Wagner's Ring Cycle and Tolkien's Lord of the Rings*

(F,Sem) (Same as MUSIC 16N) Stanford Introductory Seminar. Preference to freshmen. Roots of Wagner's operatic cycle and Tolkien's epic trilogy in a common core of Norse, Germanic, and Anglo-Saxon mythology. The role of musical motive and characterization in Wagner's music dramas and the film version of Tolkien's trilogy. Music as a key element in the psychological, political, and cultural revision of ancient myth in modern opera and film. GER:DB-Hum, EC-GlobalCom  
3 units, Spr (*Grey, T*)

### GERLIT 120Q. *Is God Dead?*

(S,Sem) (Same as COMPLIT 50Q) Stanford Introductory Seminar. A consideration of Nietzsche's claim that God is dead in relation to other texts of German literature and philosophy. The status of religious faith in relation to modernity and secularization; religion and science; culture and faith. Readings in German include selections from sacred and liturgical texts; fictional depictions of religious experience; religion in poetry; German theories of religion. Authors to be studied include Rilke, Hesse, Weiss, Schöder, Buber, Sachs, Haecker, Weber, Taubes, Ratzinger. GER:DB-Hum  
3-5 units, Win (*Berman, R*)

### GERLIT 123N. *The Brothers Grimm and Their Fairy Tales*

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Historical, biographical, linguistic, and literary look at the *Kinder- und Hausmärchen* of Jacob and Wilhelm Grimm. Readings from the fairy tales, plus materials in other media such as film and the visual arts. Small group performances of dramatized fairy tales. In German. Prerequisite: GERLANG 3 or equivalent. GER:DB-Hum, WIM  
4 units, Spr (*Robinson, O*)

## HEALTH RESEARCH AND POLICY INTRODUCTORY COURSES

**HRP 89Q. Introduction to Cross Cultural Issues in Medicine**  
(S,Sem) Stanford Introductory Seminar. Preference to sophomores. Introduction to social factors that impact health care delivery, such as ethnicity, immigration, language barriers, and patient service expectations. Focus is on developing a framework to understand culturally unique and non-English speaking populations in the health care system. GER:EC-AmerCul  
3 units, Win (Corso, I)

## HISTORY INTRODUCTORY COURSES

**HISTORY 6N. Utopia: History of Nowhere Land**  
(F,Sem) Stanford Introductory Seminar. What would the perfect society be? How would work be organized, and education, honor and profit be distributed? How would children be raised, and who would govern? Such questions have engaged philosophers, revolutionaries, and dreamers in every historical age. Examines utopian literature from ancient Greece through the modern age, focusing on the early modern period. GER:DB-Hum  
4 units, Spr (Stokes, L)

**HISTORY 14N. The Crusades**  
(F,Sem) Stanford Introductory Seminar. What were the European crusades? How can we explain this phenomenon, which mobilized entire societies for holy wars against pagans, Muslims, heretics, and sometimes bad kings? Was religion the main motivator, or should one factor in economics and political ambitions? How did European minorities, including Jews, fit within this phenomenon? Was there a difference between crusading warfare and ordinary warfare? GER:DB-SocSci  
5 units, Aut (Buc, P)

**HISTORY 20Q. Russia in the Early Modern European Imagination**  
(S,Sem) Stanford Introductory Seminar. Preference to sophomores. The contrast between the early modern image of Europe as free, civilized, democratic, rational, and clean against the notion of New World Indians, Turks, and Chinese as savage. The more difficult, contemporary problem regarding E. Europe and Russia which seemed European and exotic. Readings concerning E. Europe and Russia from the Renaissance to the Enlightenment; how they construct a positive image of Europe and a negative stereotype of E. Europe. Prerequisite: PWR 1. GER:DB-Hum, EC-GlobalCom  
5 units, Spr (Kollmann, N)

**HISTORY 22N. Crime, Punishment, and Rebellion in Early Modern Russia**  
(F,Sem) Stanford Introductory Seminar. Preference to freshmen. The social values that shaped and moderated violence in Russia and the stresses created by the rise of the early modern state. Rising crime and banditry, corporal and capital punishment, and bloody rebellions as response to the rising demands that the state placed on society. The early modern state-building project, a process of empire building and military reform that required higher taxation and more stringent social control. Forms in which violence erupted in early modern Russia. Causes, the moral economy of violence and rebellion, and the symbolism of public executions. Readings include law codes, court cases, and studies of rebellions in the time of troubles and in Catherine the Great's time. Violence engendered by religious dissidents in the name of true faith in the late 17th century. GER:DB-Hum  
5 units, Win (Kollmann, N)

**HISTORY 30Q. English Society Through Fiction**  
(S,Sem) Stanford Introductory Seminar. Preference to sophomores. England from the eighteenth century to the twentieth century through the reading of seven novels ranging from Henry Fielding's Joseph Andrews, to Evelyn Waugh's A Handful of Dust. Focus is on the novels themselves and the historical context of the novels to acquire a knowledge of British history over two hundred years. GER:DB-Hum  
4 units, Spr (Stansky, P)

**HISTORY 36N. Gay Autobiography**  
(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Gender, identity, and solidarity as represented in nine autobiographies: Isherwood, Ackerley, Duberman, Monette, Louganis, Bar-

bin, Cammermeyer, Gingrich, and Lorde. To what degree do these writers view sexual orientation as a defining feature of their selves? Is there a difference between the way men and women view identity? What politics follow from these writers' experiences? GER:DB-Hum, EC-Gender  
4 units, Spr (Robinson, P)

**HISTORY 42N. Science, Medicine, and Empire**  
(F,Sem) Stanford Introductory Seminar. The global exchange of medicines, knowledges, technologies, flora, peoples, and disease within French, British, and Dutch empires in the 18th-century Atlantic world. Amerindian, slave, and European knowledges within the context of slave and trade economies. Examples may be drawn from other traditions in India and Indonesia. Readings on voyaging, colonialism, science, slavery, materia medica, and environmental exchange. GER:DB-SocSci  
4 units, Win (Schiebinger, L)

**HISTORY 48N. African History through Literature and Film**  
(F,Sem) Stanford Introductory Seminar. Literary and cinematic works as a window into the history of sub-Saharan Africa.; and the difficulty of using artistic works as historical sources, the value of art as representation and artifact of the past. Premodern traditions of political narrative; art in the era of the slave trade; the impact of colonialism on African intellectuals; the political uses of art by nationalists; and the struggle to represent rapidly changing social and culture norms. GER:DB-Hum  
4-5 units, Win (Hanretta, S)

**HISTORY 48Q. South Africa: Contested Transitions**  
(S,Sem) Stanford Introductory Seminar. Preference to sophomores. The inauguration of Nelson Mandela as president in May 1994 marked the end of an era and a way of life for S. Africa. The changes have been dramatic, yet the legacies of racism and inequality persist. Focus: overlapping and sharply contested transitions. Who advocates and opposes change? Why? What are their historical and social roots and strategies? How do people reconstruct their society? Historical and current sources, including films, novels, and the Internet. GER:DB-Hum, EC-GlobalCom  
3 units, Win (Samoff, J)

**HISTORY 54N. African American Women's Lives**  
(F,Sem) (Same as AFRICAAM 54N) Stanford Introductory Seminar. Preference to freshmen. The everyday lives of African American women in 19th- and 20th-century America in comparative context of histories of European, Hispanic, Asian, and Native American women. Primary sources including personal journals, memoirs, music, literature, and film, and historical texts. Topics include slavery and emancipation, labor and leisure, consumer culture, social activism, changing gender roles, and the politics of sexuality. GER:DB-Hum  
4-5 units, Aut (Hobbs, A)

**HISTORY 62N. The Atomic Bomb in Policy and History**  
(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Emphasis is on declassified files from WW II and recent interpretations. Why did the U.S. drop A-bombs on Japan? Were there viable alternatives, and, if so, why were they not pursued? What did the use of the A-bombs mean then and later? How have post-war interpreters explained, and justified or criticized, the A-bombings? Approaches from history, international relations, American studies, political science, and ethics address the underlying conceptions, the roles of evidence, the logic and models of explanation, ethical values, and cultural/social influences. GER:DB-SocSci  
5 units, Spr (Bernstein, B)

**HISTORY 84Q. The American Empire in the Middle East since the Cold War: Afghanistan, Iraq, and Israel/Palestine**  
(S,Sem) Stanford Introductory Seminar. What were the traditional objectives of U.S. policy in the Middle East since the end of WW II? What forces shaped U.S. policy towards the Middle East? Did those interests and the means employed to pursue them change substantially after the demise of the Soviet Union? What has been the impact of U.S. policy on the region itself? The three principal cases to be examined are Afghanistan, Iraq, and Israel/Palestine. GER:DB-SocSci, EC-GlobalCom  
3 units, Aut (Beinin, J)

## HUMAN BIOLOGY INTRODUCTORY COURSES

### HUMBIO 84Q. Social Justice, Responsibility, Health

(S,Sem) Stanford Introductory Seminar. Preference to sophomores. Reducing health disparities among segments of the US population is an over-arching goal of the Centers for Disease Control and Prevention (CDC). Evidence for and cause of existing health disparities; criteria for calling a health disparity unjust; and assignment of responsibility for maintaining or recovering good health.

4 units, Aut (Heaney, C)

### HUMBIO 86Q. Love as a Force for Social Change

(S,Sem) Stanford Introductory Seminar. Preference to sophomores. Biological, psychological, religious, social and cultural perspectives on the concept of love. How love is conceptualized across cultures; love as the basis of many religions; different kinds of love; the biology of love; love as sickness; love and sex; the languages of love including art, literature, music, and poetry. Emphasis is on writing. Oral presentation.

3 units, Spr (Murray, A)

### HUMBIO 87Q. Women and Aging

(S,Sem) (Same as MED 87Q) Stanford Introductory Seminar. Preference to sophomores. Biology, clinical issues, social and health policies of aging; relationships, lifestyles, and sexuality; wise women and grandmothers. Sources include scientific articles, essays, poetry, art, and film. Service-learning experience with older women. GER:EC-Gender

5 units, Win (Winograd, C)

### HUMBIO 90Q. Contemporary Issues in Human Experimentation

(S,Sem) Stanford Introductory Seminar. Preference to sophomores. The guiding principles currently used to protect human subjects in terms of informed consent and protection of privacy; ethical issues relating to compensatory mechanisms for inherent risks; historical perspective and the development of the current mechanisms to safeguard the privacy and integrity of the individual; examples of use/abuse of human experimentation during medieval, Nazi, and modern times. Guest speakers currently performing human experiments or involved in approving such experimentation.

3 units, Aut (Constantinou, C)

### HUMBIO 91Q. Neuroethology: The Neural Control of Behavior

(S,Sem) Stanford Introductory Seminar. Preference to sophomores. Animal behavior offers insights about evolutionary adaptations. The origins of the study of animal behavior and its development to the present. Discussion of original research papers. The use and misuse of parallels between animal and human behavior. Possible field trip to observe animals in their natural habitat. GER: DB-NatSci

3 units, Aut (Fernald, R)

### HUMBIO 97Q. Sport, Exercise, and Health: Exploring Sports Medicine

(S,Sem) (Same as ORTHO 97Q) Stanford Introductory Seminar. Preference to sophomores. Sports medicine is the practice of clinical medicine at the interface between health and performance, competition and well-being. While sports medicine had its origins in providing care to athletes, medical advances developed in care of athletes exerted a great effect on the nature and quality of care to the broader community. Topics include sports injuries, medical conditions associated with sport and exercise, ethics, coaching, women's issues, fitness and health, and sports science. Case studies.

3 units, Win (Matheson, G)

### HUMBIO 99Q. Becoming a Doctor: Readings from Medical School, Medical Training, Medical Practice

(S,Sem) Stanford Introductory Seminar. Preference to sophomores. For students considering medicine as a career. Goal is to acquaint students with medical school, training in medicine and surgery, and the practice of medicine and surgery. Topics include: how to pick a medical school and a residency; how medicine affects family life, especially children; the differences between surgical and medical specialties; the advantages and disadvantages among academic/teaching, pure research, group practice, HMO, hospital staff, or private practice; malpractice concerns; and financial con-

siderations.

3 units, Aut (Zaroff, L)

## IBERIAN AND LATIN AMERICAN STUDIES INTRODUCTORY COURSES

### ILAC 114N. Lyric Poetry

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. For students with considerable competence in Spanish. Elements and expressive devices of lyric poetry: multidimensional language, denotation, connotation, image, metaphor, symbol, allegory, paradox, irony, meaning, idea, rhythm, and meter. Poets of Spain and Latin America of the late 19th and early 20th century including G. A. Bécquer, Rosalía de Castro, Rubén Darío, Miguel de Unamuno, Antonio Machado, García Lorca, Pablo Neruda, and Gabriela Mistral. In English and Spanish.

3-5 units, Aut (Predmore, M)

### ILAC 117N. Film, Nation, Latinidad

(F,Sem) Stanford Introductory Seminar. Examination of films from Spain, Mexico, and Latina/o USA that expand, trouble, contest, parody, or otherwise interrogate notions of national identity. Filmmakers may include Lourdes Portillo, Alejandro González Iñárritu, John Sayles, Maria Novaro, Pedro Almodóvar, and Gregory Nava.

3-4 units, Spr (Yarbro-Bejarano, Y)

## JAPANESE GENERAL INTRODUCTORY COURSES

### JAPANGEN 75N. Around the World in Seventeen Syllables: Haiku in Japan, the U.S., and the Digital World

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Origins of the haiku form in Japan, its place in the discourse of Orientalism during the 19th and early 20th centuries in the West, its appropriation by U.S. devotees of Zen and the beat poets after WW II, and its current transformation into a global form through the Internet. GER:DB-Hum

3-4 units, Aut (Carter, S)

## LAW, NONPROFESSIONAL INTRODUCTORY COURSES

### LAWGEN 110Q. Criminal Justice and the Criminal Courts

(S,Sem) Stanford Introductory Seminar. Preference to sophomores. Introduction to the American criminal justice system, through the lens of the criminal courts. Focus is on the structures and theories at play in the criminal court system, emphasizing court procedures, structures, constitutional guarantees, and the trial process. The roles of individual agents, including police, prosecutors, defense attorneys, judges, probation officers, and corrections officials.

3 units, Aut (Dansky, K)

## LINGUISTICS INTRODUCTORY COURSES

### LINGUIST 5N. What's Your Accent? Investigations in Acoustic Phonetics

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Phonetic variation across accents of English; experimental design; practical experience examining accents of seminar participants; acoustic analysis of speech using Praat. GER:DB-SocSci

3 units, Aut (Sumner, M)

### LINGUIST 83N. Translation

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. What is a translation? The increased need for translations in the modern world due to factors such as tourism and terrorism, localization and globalization, diplomacy and treaties, law and religion, and literature and science. How to meet this need; different kinds of translation for different purposes; what makes one translation better than another; why some texts are more difficult to translate than others. Can some of this work be done by machines? Are there things that cannot be said in some languages? GER:DB-SocSci

3 units, Aut (Kay, M)

## MANAGEMENT SCIENCE AND ENGINEERING INTRODUCTORY COURSES

### MS&E 22Q. The Flaw of Averages

(S,Sem) Stanford Introductory Seminar. Uncertain assumptions in business and public policy are often replaced with single ‘best guess’ or average numbers. This leads to a fallacy as fundamental as the belief that the earth is flat, which I call the Flaw of Averages. It states, in effect, that: plans based on average assumptions are wrong on average. This class will discuss mitigations of the flaw of averages using simulation and other methods from probability management.

3 units, Aut (Savage, S)

### MS&E 92Q. International Environmental Policy

(S,Sem) Stanford Introductory Seminar. Preference to sophomores. Science, economics, and politics of international environmental policy. Current negotiations on global climate change, including actors and potential solutions. Sources include briefing materials used in international negotiations and the U.S. Congress.

4 units, Win (Weyant, J)

### MS&E 93Q. Nuclear Weapons, Energy, Proliferation, and Terrorism

(S,Sem) Stanford Introductory Seminar. Preference to sophomores. What are nuclear weapons; what do they do? How are they different from other weapons? What drives proliferation of nuclear weapons? Why do countries want them? Can they be eliminated? What about Iran and North Korea? What role does nuclear energy play? Can it help combat global climate change? What are the risks of nuclear terrorism? Recommended: a course in international relations, engineering, or physical science. GER:DB-EngrAppSci, DB-EngrAppSci

3 units, Spr (Hecker, S)

## MATERIALS SCIENCE AND ENGINEERING INTRODUCTORY COURSES

### MATSCI 70N. Building the Future: Invention and Innovation with Engineering Materials

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. The technological importance of materials in human civilization is captured in historical names such as the Stone, Bronze, and Iron Ages. The present Information Age could rightly be called the Silicon Age. The pivotal roles of materials in the development of new technologies. Quantitative problem sets, field trips, and formal presentations of small-group projects. GER:DB-EngrAppSci

5 units, Spr (Bravman, J)

### MATSCI 159Q. Japanese Companies and Japanese Society

(S,Sem) (Same as ENGR 159Q) Stanford Introductory Seminar. Preference to sophomores. The structure of a Japanese company from the point of view of Japanese society. Visiting researchers from Japanese companies give presentations on their research enterprise. The Japanese research ethic. The home campus equivalent of a Kyoto SCTI course. GER:DB-SocSci

3 units, Spr (Sinclair, R)

## MATHEMATICS INTRODUCTORY COURSES

### MATH 88Q. The Mathematics of the Rubik’s Cube

(S,Sem) Stanford Introductory Seminar. Preference to sophomores. Group theory through topics that can be illustrated with the Rubik’s cube: subgroups, homomorphisms and quotient groups, the symmetric and alternating groups, conjugation, commutators, and Sylow subgroups.

3 units, Spr (Kahle, M)

## MECHANICAL ENGINEERING INTRODUCTORY COURSES

### ME 12N. The Jet Engine

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. How a jet engine works; the technologies and analytical techniques required to understand them. Dynamics, thermodynamics, turbomachinery, combustion, advanced materials, cooling technologies,

and control systems. Visits to research laboratories, examination of a partially disassembled engine, and probable operation of a small jet engine. Prerequisites: high school physics. GER:DB-EngrAppSci

3 units, Aut (Eaton, J)

### ME 14N. How Stuff Is Made

(F,Sem) Stanford Introductory Seminar. The design and engineering of products and processes. Machined, fabric, food, and electrical goods. Tradeoffs in choice of serial, continuous, and batch fabrication. Final project: students research and create a web site about the engineering aspects of a product and its processes. Field trips to manufacturing facilities.

3 units, Spr (Staff)

### ME 18Q. Teamology: Creative Teams and Individual Development

(S,Sem) Stanford Introductory Seminar. Preference to sophomores. Roles on a problem solving team that best suit individual creative characteristics. Two teams are formed for teaching experientially how to develop less conscious abilities from teammates creative in those roles. Reinforcement teams have members with similar personalities; problem solving teams are composed of people with maximally different personalities.

3 units, Aut (Wilde, D)

### ME 25N. Global Warming and Climate Change: Fact or Fiction

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Scientific arguments concerning debates between the view that anthropogenic activities are not causing global warming versus the view that these activities are responsible for a global warming that results in significant climate change. Consequences of increased demand for energy. Prerequisites: high school physics, chemistry, and biology.

3 units, Win (Bowman, C)

### ME 26N. Think Like a Designer

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Techniques designers use to create innovative solutions across domains. Project-based. Emphasis is on approaches to problem identification and problem solving. Topics include need finding, structured brainstorming, synthesis, rapid prototyping, and visual communication. Field trips to a local design firm, a robotics lab, and a machining lab. The pleasures of creative design and hands-on development of tangible solutions.

3 units, Aut (Burnett, W)

## MEDICINE INTRODUCTORY COURSES

### MED 70Q. Cancer and the Immune System

(S,Sem) Stanford Introductory Seminar. Preference to sophomores. Myths and facts surrounding the idea that the immune system is capable of recognizing malignant cells. The biological basis and function of effector arms of the immune system; how these mechanisms may be used to investigate the biological basis and potential therapy of cancer. How the immune system functions.

3 units, Spr (Negrin, R)

### MED 83Q. Ethical, Legal, and Social Dimensions of Stem Cell Research

(S,Sem) Stanford Introductory Seminar. Preference to sophomores. Ethical, legal, social, and economic dimensions of stem cell research such as the discovery of human embryonic stem cells and the international landscape of public policy. How stem cells work, their role in the upkeep of the human body, and current and future uses in medicine. Issues at the intersection of science and society such as human-animal hybrids, notions of justice in intellectual property law, distribution of health care, and the major ethical frameworks defining the debate.

3 units, Spr (Scott, C)

### MED 86Q. Seeing the Heart

(F,Dial) Stanford Introductory Dialogue. Introduction to biomedical technology, science, clinical medicine, and public policy through cardiovascular imaging. Invasive and noninvasive techniques to detect early stage heart disease and to see inside the heart and blood vessels. Topics include: common forms of heart disease, how they develop, and why they affect so many people; imaging technologies such as ultrasound, CT, MRI, PET, and optical; a cost-effective public screening program. Field trips to Stanford

Medical Center imaging centers.  
2 units, Win (McConnell, M)

#### **MED 87Q. Women and Aging**

(S,Sem) (Same as HUMBIO 87Q) Stanford Introductory Seminar. Preference to sophomores. Biology, clinical issues, social and health policies of aging; relationships, lifestyles, and sexuality; wise women and grandmothers. Sources include scientific articles, essays, poetry, art, and film. Service-learning experience with older women. GER:EC-Gender

5 units, Win (Winograd, C)

#### **MED 88Q. Dilemmas in Current Medical Practice**

(S,Sem) Stanford Introductory Seminar. Preference to sophomores. Social, political, scientific, and economic forces influencing medical practice. Spiraling costs, impaired access to health care, and disillusionment toward the health care system. Attempts by government and medical insurers to control costs through managed care and health maintenance organizations. Medical education and how it has affected the practice of medicine. Alternative health care, preventive medicine, and the doctor-patient relationship. The paradox of health in America: why do so many people who are healthy feel unhealthy? Observation of instructors in their medical practices.

3 units, Aut (Croke, J; Jones, H)

#### **MED 93Q. The AIDS Epidemic: Biology, Behavior, and Global Responses**

(S,Sem) Stanford Introductory Seminar. Preference to sophomores. How the discovery of the causative agent and the modes of transmission of HIV fueled a quest for prevention, treatments, and a vaccine. Discoveries in biology, biotechnology, epidemiology, and medicine during the last 20 years. Hypotheses about the origins of HIV as a human disease; the spread of AIDS and HIV; social, political, and economic consequences of the epidemic; and national and global responses.

3 units, Aut (Katzenstein, D)

#### **MED 108Q. Human Rights and Health**

(S,Sem) Stanford Introductory Seminar. Preference to sophomores. History of human-rights law. International conventions and treaties on human rights as background for social and political changes that could improve the health of groups and individuals. Topics such as: regional conflict and health, the health status of refugees and internally displaced persons; child labor; trafficking in women and children; HIV/AIDS; torture; poverty, the environment and health; access to clean water; domestic violence and sexual assault; and international availability of drugs. Possible optional opportunities to observe at community sites where human rights and health are issues. Guest speakers from national and international NGOs including Doctors Without Borders; McMaster University Institute for Peace Studies; UC Berkeley Human Rights Center; Kiva. PowerPoint presentation on topic of choice required.

3 units, Win (Laws, A)

### **MUSIC INTRODUCTORY COURSES**

#### **MUSIC 11N. A View from the Podium: The Art of Conducting**

(F,Sem) Stanford Introductory Seminar. How a conductor interprets music, realizes a personal vision through the rehearsal process, and communicates with orchestra and audience. Conducting as based on human communication skills. How to apply these lessons to other fields of endeavor. GER:DB-Hum

3 units, Aut (Cai, J)

#### **MUSIC 13Q. Classical Music and Politics: Western Music in Modern China**

(S,Sem) Stanford Introductory Seminar. Preference to sophomores. Social history, cultural studies, China studies, international relations, and music. From the Italian Jesuit, Matteo Ricci who presented a clavichord to the Chinese emperor to the emergence of a modern generation of Chinese musicians. GER:DB-Hum, EC-GlobalCom

3 units, Spr (Cai, J)

#### **MUSIC 16N. Music, Myth, and Modernity: Wagner's Ring Cycle and Tolkien's Lord of the Rings**

(F,Sem) (Same as GERLIT 16N) Stanford Introductory Seminar. Preference to freshmen. Roots of Wagner's operatic cycle and Tolkien's epic trilogy in a common core of Norse, Germanic, and Anglo-Saxon mythology. The role of musical motive and characterization in Wagner's music dramas and the film version of Tol-

kien's trilogy. Music as a key element in the psychological, political, and cultural revision of ancient myth in modern opera and film. GER:DB-Hum, EC-GlobalCom

3 units, Spr (Grey, T)

#### **MUSIC 17N. The Operas of Mozart**

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Four of Mozart's mature operas, the earliest works in the operatic repertoire never to go out of fashion. What accounts for this extraordinary staying power? Focus on the history of their composition, performance, and reception, and their changing significance from Mozart's time to the present. GER:DB-Hum

3 units, Win (Berger, K)

#### **MUSIC 17Q. Perspectives in North American Taiko**

(S,Sem) Stanford Introductory Seminar. Preference to sophomores. Taiko, or Japanese drum, is a newcomer to the American music scene. Emergence of the first N. American taiko groups coincided with increased Japanese American activism, and to some it is symbolic of Japanese American identity. N. American taiko is associated with Japanese American Buddhism. Musical, cultural, historical, and political perspectives of taiko. Hands-on drumming. Japanese music and Japanese American history, and relations among performance, cultural expression, community, and identity. GER:DB-Hum, EC-AmerCul

4 units, Spr (Sano, S; Uyechi, L)

#### **MUSIC 38N. Singing Early Music**

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. 15th- and 16th-century musical repertoires and their contexts; performance practice. GER:DB-Hum

3 units, Aut (Rodin, J)

#### **MUSIC 39N. The Beatles**

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. The music of the Beatles and their contributions as musical innovators and experimentalists. Their artistic antecedents, subsequent musical influence, and cultural impact; the emergence of the supergroup identity and development of new modes of musical production and collaborative songwriting; notions of commoditization, uniqueness and originality, and the perceived boundary of art and pop; speculations on the exportation and appropriation of an African American cultural legacy. GER:DB-Hum

3 units, Win (Applebaum, M)

### **NEUROLOGY AND NEUROLOGICAL SCIENCES INTRODUCTORY COURSES**

#### **NENS 67N. Intracellular Trafficking and Neurodegeneration**

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Cell structures and functions, the intracellular trafficking system that maintains exchanges of materials and information inside cells, and clinical features and pathologies of neurodegenerative diseases. Techniques for examining cellular and subcellular structures, especially cytoskeletons; functional insights generated from structural explorations. Prerequisite: high school biology.

3 units, Spr (Yang, Y)

### **NEUROSURGERY INTRODUCTORY COURSES**

#### **NSUR 70Q. Experimental Stroke**

(F,Dial) Stanford Introductory Dialogue. Preference to sophomores. How stroke is studied in the laboratory; advances in stroke research over the last two decades; and future directions. Topics include: cellular and molecular mechanisms of neuronal death and survival in the brain after stroke, including necrosis, apoptosis, inflammation, and cell signaling pathways; experimental tools for stroke treatment, such as gene therapy, cell therapy, hypothermia, preconditioning, postconditioning, and other pharmacological treatments; the gap and barrier between laboratory research and clinical translation.

2 units, Spr (Staff)

## ORTHOPEDIC SURGERY INTRODUCTORY COURSES

### ORTHO 97Q. Sport, Exercise, and Health: Exploring Sports Medicine

(S,Sem) (Same as HUMBIO 97Q) Stanford Introductory Seminar. Preference to sophomores. Sports medicine is the practice of clinical medicine at the interface between health and performance, competition and well-being. While sports medicine had its origins in providing care to athletes, medical advances developed in care of athletes exerted a great effect on the nature and quality of care to the broader community. Topics include sports injuries, medical conditions associated with sport and exercise, ethics, coaching, women's issues, fitness and health, and sports science. Case studies.

3 units, Win (Matheson, G)

## PATHOLOGY INTRODUCTORY COURSES

### PATH 103Q. Lymphocyte Migration

(F,Dial) Stanford Introductory Dialogue. Preference to sophomores. How lymphocytes leave the blood stream and enter tissues to participate in immune surveillance and the development of inflammation. Known as lymphocyte migration, this process involves a complex series of adhesion, activation and diapedesis events. The cellular mechanisms involved in lymphocyte migration, including lymphocyte adhesion molecules that interact with their counter-receptors on endothelial cells, and molecules, including cytokines and chemokines, that attract or activate lymphocytes. The roles of these molecules in the development of human diseases such as asthma, type 1 diabetes, and multiple sclerosis.

1 unit, Aut (Michie, S)

### PATH 105Q. Final Analysis: The Autopsy as a Tool of Medical Inquiry

(S,Sem) Stanford Introductory Seminar. Preference to sophomores. Based on review of patient medical histories and examination of formalin-fixed and unfixed tissues from autopsy. Student-directed problem-solving; students develop learning objectives for each case, and present findings. The effect of disease on normal structure and function, ethics of patient care, allocation of medical resources, efficiency of therapy, and medical error. Prerequisite: hepatitis-B vaccination; free vaccinations during the winter for accepted students.

3 units, Spr (Regula, D)

## PHILOSOPHY INTRODUCTORY COURSES

### PHIL 11N. Skepticism

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Historical and contemporary philosophical perspectives on the limits of human knowledge of a mind-independent world and causal laws of nature. The nature and possibility of a priori knowledge. GER:DB-Hum

3 units, Win (De Pierris, G)

### PHIL 15N. Freedom, Community, and Morality

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Does the freedom of the individual conflict with the demands of human community and morality? Or, as some philosophers have maintained, does the freedom of the individual find its highest expression in a moral community of other human beings? Readings include Camus, Mill, Rousseau, and Kant. GER:DB-Hum, EC-EthicReas

3 units, Aut (Friedman, M)

## PHYSICS INTRODUCTORY COURSES

### PHYSICS 18N. Revolution in Concepts of the Cosmos

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. The evolution of concepts of the cosmos and its origin, from the Copernican heliocentric model to the current view based on Hubble's discovery of expansion of the Universe. Recent cosmological observations and the relevance of laboratory experiments in particle physics. One night of observations at the Stanford Observatory. GER: DB-NatSci

3 units, Win (Roodman, A)

### PHYSICS 41N. Mechanics: Insights, Applications, and Advances

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Additional topics for students in PHYSICS 41 such as tidal forces, gyroscopic effects, fractal dimensions, and chaos. Corequisite: 41 or advanced placement.

1 unit, Win (Abel, T)

### PHYSICS 43N. Understanding Electromagnetic Phenomena

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Expands on the material presented in 43; applications of concepts in electricity and magnetism to everyday phenomena and to topics in current physics research. Corequisite: 43 or advanced placement.

1 unit, Spr (Laughlin, R)

### PHYSICS 45N. Advanced Topics in Light and Heat

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Expands on the subject matter presented in 45 to include optics and thermodynamics in everyday life, and applications from modern physics and astrophysics. Corequisite: 45 or advanced placement.

1 unit, Aut (Romani, R)

### PHYSICS 80N. The Technical Aspects of Photography

(F,Sem) Stanford Introductory Seminar. Preference to freshmen and sophomores with some background in photography. How cameras record photographic images on film and electronically. Technical photographic processes to use cameras effectively. Camera types and their advantages, how lenses work and their limitations, camera shutters, light meters and the proper exposure of film, film types, depth of focus, control of the focal plane and perspective, and special strategies for macro and night photography. View cameras and range finder technical cameras. Students take photographs around campus. Prerequisite: high school physics.

3 units, Spr (Osheroff, D)

### PHYSICS 83N. Physics in the 21st Century

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Current topics at the frontier of modern physics. Topics include subatomic particles and the standard model, symmetries in nature, extra dimensions of space, string theory, supersymmetry, the big bang theory of the origin of the universe, black holes, dark matter, and dark energy of the universe. Why the sun shines. Cosmology and inflation. GER: DB-NatSci

3 units, Aut (Kallosh, R)

### PHYSICS 87N. The Physics of One: Nanoscale Science and Technology

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Contemporary interdisciplinary research in nanoscience and nanotechnology; the manipulation of nature's fundamental building blocks. Accomplishments and questions engendered by knowledge at the discrete limit of matter. Prerequisite: high school physics. GER: DB-NatSci

3 units, Win (Manoharan, H)

## POLITICAL SCIENCE INTRODUCTORY COURSES

### POLISCI 16N. Politics of Economic Development

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Why are some countries rich and others poor? What explains the policies that governments adopt, and how do those policies affect economic performance? Readings from political science and economics about Latin America and other regions. GER:DB-SocSci

5 units, Spr (Tomz, M)

### POLISCI 22N. Inequality and American Democracy

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. For thirty years or more, inequality has grown in American society as the distance between the richest and poorest segments of the population have grown substantially. What effect does this inequality have on American society? Can democracy be sustained under such circumstances? Focus is on the lives of the poorest Americans, the relationship of resources to political activity and power, and how American politics has been shaped by these forces.

5 units, Aut (Segura, G)

### POLISCI 24Q. Law and Order

(F,Dial) Stanford Introductory Dialogue. Preference to sophomores. The role of law in promoting social order. What is the rule of law? How does it differ from the rule of men? What institutions

best support the rule of law? Is a state needed to ensure that laws are enforced? Should victims be allowed to avenge wrongs? What is the relationship between justice and mercy?

3 units, Aut (Rutten, A)

#### **POLISCI 36N. Lotteries**

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. The advantages and disadvantages that lotteries offer when used as part of decision making. The relationships, pro and con, between lotteries and distributive justice. How the resulting arguments for and against lotteries play out in real public policy debates in areas relating to education, housing, medical care, and political office. Class research project focusing on Stanford's housing draw.

3-4 units, Win (Stone, P)

#### **POLISCI 48N. Muslim Integration into France**

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. The specter of Islamized societies haunts Europe. Fears of a fifth column of terrorism and a challenge by a population of religious fanatics to a largely secularized continent are recurrent in political dialogue from Spain to Austria. Are these worries a result of everyday xenophobia common to situations of foreign immigration or whether certain immigrants from the Middle East, Turkey, South Asia and Africa face special challenges due to their Islamic heritage? Sources include survey and experimental data from France, claims made about this immigrant population, readings in French political discourse and the European political context. Final paper that compares analysis of the data and claims in the literature.

5 units, Spr (Laitin, D)

### **PORTUGUESE LANGUAGE INTRODUCTORY COURSES**

#### **PORTLANG 193Q. Spaces and Voices of Brazil through Film**

(S,Sem) Stanford Introductory Seminar. The manners in which a country is perceived and defines itself is a result of many complex forces, and involves the reproduction of social relations and complex social constructions both on the part of those who live there and those who see it from a distance. The perceptions of what Brazil is and what defines the country has changed throughout times, but has conserved some clear pervasive defining traits. This course is an introduction to the history, culture, politics and artistic production of Brazil as seen through feature films, documentaries and some complementary readings. Movies include, among others, *Banana is my Business*, *Black Orpheus*, *Olga*, *They Don't Use Black-Tie*, *City of God*, *Central Station*, *Gaijin*, and *Four Days in September*. In English. GER:DB-Hum, EC-GlobalCom

3-4 units, Aut (Wiedemann, L)

### **PSYCHOLOGY INTRODUCTORY COURSES**

#### **PSYCH 7Q. Language Understanding by Children and Adults**

(S,Sem) Stanford Introductory Seminar. How do we first learn to find meaning in strings of speech sounds? Understanding spoken language requires the rapid integration of acoustic information with linguistic knowledge and with conceptual knowledge based on experience with how things happen in the world. Topics include research on early development of language understanding and laboratory methods of how young children make sense of speech. Observations of preschool children and visits to Stanford laboratories.

3 units, Aut (Fernald, A)

#### **PSYCH 12N. Self Theories**

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. The impact of people's belief in a growing versus fixed self on their motivation and performance in school, business, sports, and relationships. How such theories develop and can be changed. GER:DB-SocSci

3 units, Aut (Dweck, C)

#### **PSYCH 14N. Race and Crime**

(F,Sem) Stanford Introductory Seminar. Topics in race, crime, and punishment in the United States. Readings and discussion focus on theoretical and empirical research on policing, sentencing, and incarceration. Readings will be drawn from psychology, sociology, criminology, economics, and legal studies.

3 units, Win (Eberhardt, J)

#### **PSYCH 17N. Language and Society: How Languages Shape Lives**

(F,Sem) Stanford Introductory Seminar. Do people who speak different languages think differently? What role does language play in politics, law, and religion? The role of language in individual cognition and in society. Breaking news about language and society; the scientific basis for thinking about these broad issues. GER:DB-SocSci

3 units, Spr (Boroditsky, L)

#### **PSYCH 23N. Aping: Imitation, Control, and the Development of the Human Mind**

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. The idea that a childhood that prolongs a state of stimulus-bound helplessness beyond that of animals is the price human beings pay for the benefits of shared cognitive structures. How such structures enable social collaboration, language, and the transmission and sharing of knowledge. Sources include psychological data from animals and humans, and recent discoveries in neuroscience.

3 units, Spr (Ramscar, M)

#### **PSYCH 25N. Psychology, Inequality, and the American Dream**

(F,Sem) Stanford Introductory Seminar. Despite legal prohibitions against discrimination and the fact that many people endorse egalitarian values, inequality persists in America. What role do psychological factors play in perpetuating inequality? How can psychologically "wise" reforms promote equal opportunity? Topics include prejudice and discrimination, school achievement, social class, and race/ethnicity.

3 units, Aut (Walton, G)

#### **PSYCH 26N. Language Acquisition: Exploring the Minds of Children**

(F,Sem) Stanford Introductory Seminar. Language is an extraordinary competence distinguishing humans from other species, yet there is debate about the role of biology in guiding language acquisition. Does language development follow an innate 'bioprogram' or does it build on more general cognitive abilities, influenced by early experience? Topics include biological and experiential influences on the emergence of linguistic ability as children learn a first language. Discussions of theory and research, visits to Stanford laboratories and observations of very young language learners.

3 units, Aut (Fernald, A)

#### **PSYCH 27N. The Psychology of Prejudice**

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Social psychological theories and research on stereotypes, prejudice, discrimination, and racism. Psychological perspectives include those emphasizing personologic, cognitive, motivational, and sociocultural contributions to prejudice. Emphasis is on applying each approach to understanding real-world contexts such as educational and occupational contexts, and to the implications of this research for efforts to reduce prejudice and discrimination.

3 units, Win (Brown, J)

### **RADIOLOGY INTRODUCTORY COURSES**

#### **RAD 72Q. Fluorescence Imaging in Living Cells**

(S,Sem) Stanford Introductory Seminar. Preference to sophomores. Basic principles of fluorescent probes and their applications for live-cell imaging. Topics include: general classes of fluorescent probes together with their fluorescence mechanisms; strategies and methods for live cell labeling and imaging of specific proteins. Examples of applications of fluorescence imaging are presented. Provides students first-hand experience in fluorescence imaging research, and exploration of cutting edge techniques. Readings include current reviews and key original articles.

2 units, Win (Staff)

### **RELIGIOUS STUDIES INTRODUCTORY COURSES**

#### **RELIGST 10N. The Problem of God: Aquinas to the New Atheism**

(F,Sem) Stanford Introductory Seminar. Critical inquiry the meaning and credibility of theistic belief through exemplary classic formulations, modern critics, and contemporary defenders. What has the idea of God meant to serious minds in the past? And in the modern or postmodern world?

4 units, Spr (Sockness, B)

**RELIGST 15N. The History of Immortality**

(F,Sem) Stanford Introductory Seminar. If there are limits to the imagination, death is not one of them. How the afterlife has been imagined over the centuries by important religious thinkers and writers from antiquity to the present day. Confront one of the most difficult aspects of life - fear of death and oblivion- but the ultimate goal is to explore the power of thought and literature to move beyond the limits of mortality. GER:DB-Hum

4 units, Win (Weitzman, S)

**RELIGST 16N. The Story of Human Virtues**

(F,Sem) Stanford Introductory Seminar. Bravery, Temperance, Generosity, Justice, Wisdom, and Friendship. Plato and Aristotle on human virtues, and select Muslim, Jewish, Christian, and secular appropriations and transformations of that Greek heritage. GER:DB-Hum

4 units, Aut (Sadeghi, B)

**SCIENCE, TECHNOLOGY, AND SOCIETY INTRODUCTORY COURSES****STS 101Q. Technology in Contemporary Society**

(S,Sem) Stanford Introductory Seminar. Preference to sophomores. Introduction to the STS field. The natures of science and technology and their relationship, what is most distinctive about these forces today, and how they have transformed and been affected by contemporary society. Social, cultural, and ethical issues raised by recent scientific and technological developments. Case studies from areas such as information technology and biotechnology, with emphasis on the contemporary U.S. Unexpected influences of science and technology on contemporary society and how social forces shape scientific and technological enterprises and their products. Enrollment limited to 12. GER:DB-SocSci

4 units, Aut (McGinn, R)

**SLAVIC GENERAL INTRODUCTORY COURSES****SLAVGEN 13N. Russia and the Russian Experience**

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. The political and cultural history of Russia and the Russians: prominent persons, prominent events, and how they shape current attitudes and society. Short works by Russian authors. GER:DB-Hum

3-4 units, Win (Schupbach, R)

**SLAVGEN 77Q. Russia's Weird Classic: Nikolai Gogol**

(S,Sem) Stanford Introductory Seminar. Preference to sophomores. The work and life of Nikolai Gogol, the eccentric founder of Fantastic Realism. The relationship between romanticism and realism in Russian literature, and between popular Ukrainian culture and high Russian and W. European traditions in Gogol's oeuvre. The impact of his work on 20th-century modernist literature, music, and art, including Nabokov, literature of the absurd, Shostakovich, Meyerhold, and Chagall. GER:DB-Hum

3-4 units, Aut (Fleishman, L)

**SOCIOLOGY INTRODUCTORY COURSES****SOC 45Q. Understanding Race and Ethnicity in American Society**

(S,Sem) Stanford Introductory Seminar. Preference to sophomores. A brief historical overview of race in America, race and violence, race and socioeconomic wellbeing, and the future of race relations in America. Enrollment limited to 16. GER:DB-SocSci

5 units, Aut (Snipp, C)

**SOC 46N. Race, Ethnic, and National Identities: Imagined Communities**

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. How new identities are created and legitimated. What does it mean to try on a different identity? National groups and ethnic groups are so large that one individual can know only an infinitesimal fraction of other group members. What explains the seeming coherence of groups? If identities are a product of the imagination, why are people willing to fight and die for them? Enrollment limited to 16. GER:DB-SocSci

3 units, Aut (Rosenfeld, M)

**SPECIAL LANGUAGE PROGRAM INTRODUCTORY COURSES****SPECLANG 198Q. Modern Greece in Film and Literature**

(S,Sem) Stanford Introductory Seminar. Preference to sophomores. Cultural and literary highlights. Filmmakers include Kakoyannis, Dassen, Boulmetis, Angelopoulos, and Scorsese; readings from Eugenides, Gage, Kavafis, Kazantzakis, Samarakis, Seferis, and Elytis. GER:DB-Hum, DB-Hum, EC-GlobalCom

3-5 units, Aut (Prionas, E)

**STATISTICS INTRODUCTORY COURSES****STATS 47N. Breaking the Code?**

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Cryptography and its counterpart, cryptanalysis or code breaking. How the earliest cryptanalysts used statistical tools to decrypt messages by uncovering recurring patterns. How such frequency-analysis tools have been used to analyze biblical texts to produce a Bible code, and to detect genes in the human genome. Overview of codes and ciphers. Statistical tools useful for code breaking. Students use simple computer programs to apply these tools to break codes and explore applications to various kinds of data. GER:DB-Math

3 units, Aut (Holmes, S)

**SURGERY INTRODUCTORY COURSES****SURG 68Q. Current Concepts in Transplantation**

(S,Sem) Stanford Introductory Seminar. Preference to sophomores. Biological aspects of cell and organ transplantation, including issues that arise in the media. Diseases for which transplantation is a treatment, the state of the art in human transplantation, transplantation of animal tissue into humans (xenotransplantation), development of new tissue and organs in the laboratory (tissue engineering and cloning), and development of drugs and biological strategies to promote long-term survival of the tissue or organ (tolerance). How to write a scientific abstract, critique scientific literature, and research and present topics in contemporary transplantation.

3 units, Spr (Martinez, O; Krams, S)

**SURG 69Q. It's All in the Head: Understanding Diversity, Development, and Deformities of the Face**

(S,Sem) Stanford Introductory Seminar. Preference to sophomores. How the face conveys moods and emotions, and elicits reactions when disease or genetic disorders leave behind disfigurement. New work by evolutionary and molecular biologists concerning how variations in facial form are elicited; how tissues and molecules interact to form the face. How differences in facial anatomy affect an individual's self-perception and their acceptance in our beauty-conscious society.

3-4 units, Win (Helms, J; Brugmann, S)

**SURG 70Q. Surgical Anatomy of the Hand: From Rodin to Reconstruction**

(F,Dial) Stanford Introductory Dialogue. The surgical anatomy of the hand is extremely complex in terms of structure and function. Exploration of the anatomy of the hand in different contexts: its representation in art forms, the historical development of the study of hand anatomy, current operative techniques for reconstruction, advances in tissue engineering, and the future of hand transplantation.

2 units, Win (Chang, J)

**ITALIAN LANGUAGE (ITALLANG)****UNDERGRADUATE COURSES IN ITALIAN LANGUAGE****ITALLANG 1. First-Year Italian, First Quarter**

All-in-Italian communicative and interactive approach. Emphasis is on the development of a appropriate discourse in contemporary cultural contexts. Interpretation of authentic materials, written and oral presentations, and plenty of conversational practice. Language lab, multimedia, and online activities. requirement.

5 units, Aut (Alberti, G), Win (Tempesta, G), Spr (McCarty, A)

**ITALLANG 1A. Accelerated First-Year Italian, Part A**

Accelerated sequence that completes first-year Italian in two rather than three quarters. For students with previous knowledge of Italian or with a strong background in another Romance language. 2A fulfills the University language requirement. Prerequisite: advanced-level proficiency in another Romance language.

5 units, Aut (Baldocchi, M), Win (McCarty, A)

**ITALLANG 2. First-Year Italian, Second Quarter**

Continuation of 1. Prerequisite: 2 or equivalent.

5 units, Aut (McCarty, A), Win (Alberti, G), Spr (Tempesta, G)

**ITALLANG 2A. Accelerated First-Year Italian, Part B**

Continuation of 1A. Prerequisite: 1A or equivalent. Fulfills the University language requirement.

5 units, Win (Baldocchi, M), Spr (McCarty, A)

**ITALLANG 3. First-Year Italian, Third Quarter**

Continuation of 2. Prerequisite: 2 or equivalent. Fulfills the University language requirement.

5 units, Aut (Tempesta, G), Win (McCarty, A), Spr (Alberti, G)

**ITALLANG 5A. Intensive First-Year Italian, Part A**

Same as ITALLANG 1.

5 units, Sum (McCarty, A)

**ITALLANG 5B. Intensive First-Year Italian, Part B**

Same as ITALLANG 2. Prerequisite: 1 or 5A.

5 units, Sum (Coggeshall, E)

**ITALLANG 5C. Intensive First-Year Italian, Part C**

Same as ITALLANG 3. Prerequisite: 2 or 5B. Fulfills the University language requirement.

5 units, Sum (Staff)

**ITALLANG 15S. Intermediate Italian Oral Conversation**

May be repeated once for credit.

3 units, Sum (Gelmetti, S; Tempesta, G)

**ITALLANG 20. Intermediate Oral Communication: Italy Today**

Second-year conversational and presentational skills developed through exposure to based on movie clips, slide shows, and other authentic multimedia materials. Guest lectures on Italian culture including opera, pop music, wine, and food culture. Preview of the Florentine experience with Florence returnees sharing their experiences in Italy. Prerequisite: completion of first-year Italian or equivalent.

3 units, Aut (Tempesta, G), Win (Tempesta, G), Spr (Tempesta, G), Sum (Staff)

**ITALLANG 21. Second Year Italian, First Quarter**

Sequence integrating culture and language in the development of socioculturally appropriate discourse. Authentic materials include news and film clips, video and audio files, and short stories. Reading, writing, listening, and speaking competence based on cross-cultural understanding. Prerequisite: first-year Italian or equivalent.

4 units, Aut (Tennen, D)

**ITALLANG 21A. Accelerated Second-Year Italian, Part A**

For students going to Florence. Completes second-year sequence in two rather than three quarters. Prerequisite: first-year Italian or equivalent.

4-5 units, Aut (McCarty, A), Win (Cellinese, A), Spr (Baldocchi, M)

**ITALLANG 22. Second-Year Italian, Second Quarter**

Continuation of 21. Prerequisite: 21 or equivalent.

4-5 units, Win (Pansa, K)

**ITALLANG 22A. Accelerated Second-Year Italian, Part B**

Continuation of 21A or 21F (for Florence returnees). Satisfies the foreign language requirement for International Relations majors. Prerequisite: 21A or 21F.

4-5 units, Aut (Baldocchi, M), Win (McCarty, A), Spr (Cellinese, A)

**ITALLANG 23. Second-Year Italian, Third Quarter**

Continuation of 22. Prerequisite: 22 or equivalent. Satisfies the foreign language requirement for International Relations majors.

4-5 units, Spr (Ferrando, S)

**ITALLANG 99. Language Specials**

Prerequisite: consent of instructor.

1-5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**ITALLANG 101. Advanced Oral Communication: Italian Opera**

For Florence returnees or those who have completed second-year Italian. Use of opera excerpts by Leoncavallo, Puccini, Rossini, and Verdi to improve communication skills and review language functions. Emphasis is on presentation, conversation, and debate. Prerequisites: second-year Italian or equivalent. Instructor.

3 units, Aut (Cellinese, A)

**ITALLANG 102. Advanced Oral Communication: Modern Cinema**

For Florence returnees or those who have completed second-year Italian. Use of movie sequences by Italian film directors such as Benigni, Moretti, Salvatores, Soldini, and Tornatore to improve communication skills and review language functions. Emphasis is on presentation, conversation, and debate. Prerequisite: second-year Italian or equivalent.

3 units, not given this year

**ITALLANG 103. Advanced Oral Communication: Italian Classic Cinema**

For Florence returnees or those who have completed second-year Italian. Use of classical movie sequences by Italian film directors such as Antonioni, De Sica, Fellini, Rossellini, and Visconti to improve communication skills and review language functions. Emphasis is on presentation, conversation, and debate. Prerequisites: second-year Italian or equivalent.

3 units, Spr (Cellinese, A)

**ITALLANG 113. Italian Cultural Studies**

Literary texts, news reports, comic books, film reviews, music lyrics, and sociological surveys used to examine Italy's language, culture, and society today. Advanced grammatical analysis and reading comprehension. Prerequisite: second-year Italian or equivalent.

3-4 units, not given this year

**ITALLANG 114. Advanced Stylistics and Composition**

Goal is advanced proficiency in written Italian. Textual and grammatical analysis of literary and non-literary texts, oral reports, translations, and writing assignments. Prerequisite: second-year Italian or equivalent.

3-4 units, Win (Baldocchi, M)

**ITALLANG 115. Academic and Creative Writing**

Continuation of 114. Academic prose: formal structures and academic terminology. Creative prose: short stories, expressive language, and when and how to break the rules for effect. Prerequisite: second-year Italian or equivalent. WIM

3-4 units, Spr (Baldocchi, M)

**ITALLANG 126. Italy and Italians Today**

May be repeated for credit.

2 units, Aut (Coggeshall, E), Win (Coggeshall, E), Spr (Coggeshall, E)

**GRADUATE COURSES IN ITALIAN LANGUAGE****ITALLANG 50. Reading Italian**

For seniors or graduate students seeking to meet the University reading requirement for advanced degrees. Reading strategies for comprehension of secondary literature for academic research. Fulfills the University foreign language requirement for advanced degrees if student earns a grade of 'B.' Prerequisite: one year of Italian or reading proficiency in another Romance language.

3 units, Spr (Staff)

**ITALLANG 205A. Intensive First-Year Italian**

For Stanford graduate students restricted to 9 units. Accelerated. Covers 1-3 quarters of Italian. Emphasis is on the development of authentic discourse. Online activities, conversational practice, and interpretation and production of oral and written materials.

3-5 units, not given this year

**ITALLANG 205C. Intensive First-Year Italian**

For Stanford graduate students restricted to 9 units. Accelerated. Covers 1-3 quarters of Italian. Emphasis is on the development of authentic discourse. Online activities, conversational practice, and interpretation and production of oral and written materials.

3-5 units, not given this year

**ITALLANG 394. Graduate Studies in Italian Conversation**

Prerequisite: consent of instructor. (Staff)

1-3 units, Aut (Staff), Win (Staff), Spr (Staff)

**ITALLANG 395. Graduate Studies in Italian**

Prerequisite: consent of instructor. (Staff)

2-5 units, Aut (Staff), Win (Staff), Spr (Staff)

**ITALIAN LITERATURE (ITALLIT)****UNDERGRADUATE COURSES IN ITALIAN LITERATURE****ITALLIT 127. Inventing Italian Literature: Dante, Boccaccio, Petrarca**

The origins of Italian literature. Poetry such as 13th-century love lyrics, Dante's *Vita Nuova*, and Petrarca's *Canzoniere*; prose such as stories from Boccaccio's *Decameron*. Prerequisite: ITALLANG 22A or equivalent. GER:DB-Hum, WIM

4 units, Aut (Coggeshall, E)

**ITALLIT 128. The Italian Renaissance and the Path to Modernity**

The literature, art, and history of the Renaissance and beyond. Readings from the 15th through 18th centuries include Moderata Fonte, Machiavelli, Ariosto, Tasso, Galileo, and Goldoni. Prerequisite: ITALLANG 22A or equivalent. GER:DB-Hum, WIM

4 units, Win (Springer, C)

**ITALLIT 129. Modern Italian History and Literature**

The history of the Italian nation and national literary identity in the 19th and 20th centuries. The relationship between literary texts and their historical context from the Risorgimento to the Resistance. Focus is on the romantic lyric, futurism, fascism, and the changing status of women. Authors include Foscolo, Leopardi, D'Annunzio, Aleramo, Marinetti, Pirandello, Ungaretti, and Montale. Prerequisite: ITALLANG 22A or equivalent. GER:DB-Hum, WIM

4 units, Spr (Springer, C)

**ITALLIT 189A. Honors Research**

Senior honors students enroll for 5 units in Winter while writing the honors thesis, and may enroll in 189B for 2 units in Spring while revising the thesis. Prerequisite: DLCL 189.

5 units, Win (Staff)

**ITALLIT 189B. Honors Research**

Open to juniors with consent of adviser while drafting honors proposal. Open to senior honors students while revising honors thesis. Prerequisites for seniors: 189A, DLCL 189.

2 units, Spr (Staff)

**ITALLIT 199. Individual Work**

1-12 units, Aut (Staff), Win (Staff), Spr (Staff)

**GRADUATE COURSES IN ITALIAN LITERATURE****ITALLIT 239. Renaissance Foundations of Modernity**

Focusing on the concepts of tradition, singularity, event, and future, the phenomenology of the new in: Alberti, *On Painting*; Machiavelli, *The Prince*; Bruno, *Cena delle Ceneri*; Vico, *New Science*; Manzoni, *I Promessi Sposi*.

3 units, Win (Staff)

**ITALLIT 249. Love and Death in the Decameron**

The Black Death as the greatest natural disaster in European history, killing more than a quarter of Europe's population in four years. How the plague occasioned one of the masterpieces of western literature, Boccaccio's *Decameron*, which explores a parallel universe ruled not by death, but by love, a physical, sensual force that subverted the idealized conventions of medieval courtly love.

4 units, Spr (Springer, C)

**ITALLIT 258. Italo Calvino**

Italo Calvino and the *Ars combinatori*: his experiments in writing and his models, from popular fairy tales to the *Oulipo*.

3-5 units, Win (Staff)

**ITALLIT 283. Modern Italian Poetry**

An exploration of the main themes and movements in 20th-century

Italian poetry, including avant-garde experimentation, war poetry, existential and religious quests, political activism, and feminism. Poets such as Govoni, Palazzeschi, Ungaretti, Montale, Sereni, Rosselli, Pasolini, Merini, Zanzotto. In Italian.

3-5 units, Aut (Wittman, L)

**ITALLIT 299. Individual Work**

1-12 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**ITALLIT 399. Individual Work**

For graduate students working on a special project or predissertation research. May be repeated for credit.

1-15 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**JAPANESE GENERAL (JAPANGEN)****UNDERGRADUATE COURSES IN JAPANESE GENERAL****JAPANGEN 51. Japanese Business Culture**

(Same as JAPANGEN 251) Japanese group dynamics in industrial and corporate structures, negotiating styles, decision making, and crisis management. Strategies for managing intercultural differences.

3-5 units, Win (Dasher, R)

**JAPANGEN 60. Asian Art and Culture**

(Same as ARTHIST 2) The religious and philosophical ideas and social attitudes of India, China, and Japan and how they are expressed in architecture, painting, woodblock prints, sculpture, and in such forms as garden design and urban planning. GER:DB-Hum, EC-GlobalCom

5 units, Win (Vinograd, R)

**JAPANGEN 75N. Around the World in Seventeen Syllables:****Haiku in Japan, the U.S., and the Digital World**

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Origins of the haiku form in Japan, its place in the discourse of Orientalism during the 19th and early 20th centuries in the West, its appropriation by U.S. devotees of Zen and the beat poets after WW II, and its current transformation into a global form through the Internet. GER:DB-Hum

3-4 units, Aut (Carter, S)

**JAPANGEN 84. Aristocrats, Warriors, Sex Workers, and Barbarians: Lived Life in Early Modern Japanese Painting**

Changes marking the transition from medieval to early modern Japanese society that generated a revolution in visual culture, as exemplified in subjects deemed fit for representation; how commoners joined elites in pictorializing their world, catalyzed by interactions with the Dutch. GER:DB-Hum

4 units, not given this year

**JAPANGEN 87. Arts of War and Peace: Late Medieval and Early Modern Japan, 1500-1868**

(Same as ARTHIST 187, ARTHIST 387) Narratives of conflict, pacification, orthodoxy, nostalgia, and novelty through visual culture during the change of episteme from late medieval to early modern, 16th through early 19th centuries. The rhetorical messages of castles, teahouses, gardens, ceramics, paintings, and prints; the influence of Dutch and Chinese visuality; transformation in the roles of art and artist; tensions between the old and the new leading to the modernization of Japan. GER:DB-Hum, EC-GlobalCom

4 units, not given this year

**JAPANGEN 92. Traditional East Asian Culture: Japan**

Required for Chinese and Japanese majors. Introduction to Japanese culture in historical context. Previous topics include: shifting paradigms of gender relations and performance, ancient mythology, court poetry and romance, medieval war tales, and the theaters of Noh, Bunraku, and Kabuki. GER:DB-Hum, EC-GlobalCom

5 units, Win (Takeuchi, M)

**JAPANGEN 121. Translating Japan, Translating the West**

(Same as JAPANGEN 221) Translation lies at the heart of all intercultural exchange. This course introduces students to the specific ways in which translation has shaped the image of Japan in the West, the image of the West in Japan, and Japan's self-image in the modern period. What texts and concepts were translated by each side, how, and to what effect? No prior knowledge of Japa-

nese language necessary. GER:DB-Hum

2-5 units, Aut (Levy, I)

**JAPANGEN 138. Survey of Modern Japanese Literature in Translation**

(Same as JAPANGEN 238) Required for Japanese majors. Japanese literature since 1868. Authors include Futabatei Shimei, Higuchi Ichiyo, Natsume Soseki, and Yoshimoto Banana. WIM

2-4 units, Spr (Reichert, J)

**JAPANGEN 149. Screening Japan: Issues in Crosscultural Interpretation**

(Same as JAPANGEN 249) Is the cinematic language of moving images universal? How have cultural differences, political interests, and genre expectations affected the ways in which Japanese cinema makes meaning across national borders? Sources include the works of major Japanese directors and seminal works of Japanese film criticism, theory, and scholarship in English. No Japanese language skills required. GER:DB-Hum

3-4 units, Win (Levy, I)

**JAPANGEN 187. Romance, Desire, and Sexuality in Modern Japanese Literature**

(Same as JAPANGEN 287) Constructions of romance, desire, and sexuality such as sexual connoisseurship, love suicide, and nan-shoku in Edo Japan. How these paradigms are reconfigured by modern writers. Readings: Saikaku, Chikamatsu, Ichiyo, Soseki, Tanizaki, and Mishima. GER:DB-Hum, EC-GlobalCom

4 units, Spr (Reichert, J)

**JAPANGEN 198. Senior Colloquium in Japanese Studies**

Research, write, and present capstone essay or honors thesis.

1 unit, Spr (Takeuchi, M)

**GRADUATE COURSES IN JAPANESE GENERAL**

**JAPANGEN 200. Directed Reading in Asian Languages**

For Japanese literature. Prerequisite: consent of instructor. (Staff)

1-12 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**JAPANGEN 201. Teaching Japanese Humanities**

Prepares graduate students to teach humanities at the undergraduate level. Topics include syllabus development and course design, techniques for generating discussion, effective grading practices, and issues particular to the subject matter.

1 unit, Aut (Reichert, J)

**JAPANGEN 220. The Situation of the Artist in Traditional Japan**

(Same as ARTHIST 485) Topics may include: workshop production such as that of the Kano and Tosa families; the meaning of the signature on objects including ceramics and tea wares; the folk arts movement; craft guilds; ghost painters in China; individualism versus product standardization; and the role of lineage. How works of art were commissioned; institutions supporting artists; how makers purveyed their goods; how artists were recognized by society; the relationship between patrons' desires and artists' modes of production.

5 units, not given this year

**JAPANGEN 221. Translating Japan, Translating the West**

(Same as JAPANGEN 121) Translation lies at the heart of all intercultural exchange. This course introduces students to the specific ways in which translation has shaped the image of Japan in the West, the image of the West in Japan, and Japan's self-image in the modern period. What texts and concepts were translated by each side, how, and to what effect? No prior knowledge of Japanese language necessary.

2-5 units, Aut (Levy, I)

**JAPANGEN 238. Survey of Modern Japanese Literature in Translation**

(Same as JAPANGEN 138) Required for Japanese majors. Japanese literature since 1868. Authors include Futabatei Shimei, Higuchi Ichiyo, Natsume Soseki, and Yoshimoto Banana.

2-4 units, Spr (Reichert, J)

**JAPANGEN 249. Screening Japan: Issues in Crosscultural Interpretation**

(Same as JAPANGEN 149) Is the cinematic language of moving images universal? How have cultural differences, political inter-

ests, and genre expectations affected the ways in which Japanese cinema makes meaning across national borders? Sources include the works of major Japanese directors and seminal works of Japanese film criticism, theory, and scholarship in English. No Japanese language skills required.

3-4 units, Win (Levy, I)

**JAPANGEN 251. Japanese Business Culture**

(Same as JAPANGEN 51) Japanese group dynamics in industrial and corporate structures, negotiating styles, decision making, crisis management. Strategies for managing intercultural differences.

3-5 units, Win (Dasher, R)

**JAPANGEN 287. Romance, Desire, and Sexuality in Modern Japanese Literature**

(Same as JAPANGEN 187) Constructions of romance, desire, and sexuality such as sexual connoisseurship, love suicide, and nan-shoku in Edo Japan. How these paradigms are reconfigured by modern writers. Readings: Saikaku, Chikamatsu, Ichiyo, Soseki, Tanizaki, and Mishima.

4 units, Spr (Reichert, J)

**JAPANGEN 287A. The Japanese Tea Ceremony: The History, Aesthetics, and Politics Behind a National Pastime**

(Same as ARTHIST 287A) The tea ceremony, a premodern multimedia phenomenon, integrates architecture, garden design, ceramics, painting, calligraphy, and treasured objects into a choreographed ritual wherein host, objects, and guests perform roles on a tiny stage. Aesthetic, philosophical, and political dimensions. The evolution of tea taste including its inception in Zen monasteries, use for social control during the 16th century, the development of a class of tea connoisseurs, and 20th-century manipulation by the emerging industrialist class.

3-5 units, Spr (Takeuchi, M)

**JAPANESE LANGUAGE (JAPANLNG)**

**UNDERGRADUATE COURSES IN JAPANESE LANGUAGE**

**JAPANLNG 1. First-Year Modern Japanese, First Quarter**

Foundation in grammar, reading, and composition. 150 Kanji characters introduced.

5 units, Aut (Busbin, K)

**JAPANLNG 2. First-Year Modern Japanese, Second Quarter**

Continuation of 1

5 units, Win (Busbin, K)

**JAPANLNG 3. First-Year Modern Japanese, Third Quarter**

Continuation of 2.

5 units, Spr (Busbin, K)

**JAPANLNG 4A. First-Year Japanese Language Essentials, First Quarter**

(Formerly JAPANLNG 7A.) For students who want to build communication skills in limited time. Online listening exercises, audiovisual materials, kanji tutorials. See <http://www.stanford.edu/group/japanese/jlcca3unit.htm>.

3 units, Aut (Yasumoto Magnani, E)

**JAPANLNG 4B. First-Year Japanese Language Essentials, Second Quarter**

(Formerly JAPANLNG 8A.) Continuation of 4A. See <http://www.stanford.edu/group/japanese/jlcca3unit.htm>.

3 units, Win (Yasumoto Magnani, E)

**JAPANLNG 4C. First-Year Japanese Language Essentials, Third Quarter**

(Formerly JAPANLNG 9A.) Continuation of 4B. See <http://www.stanford.edu/group/japanese/jlcca3unit.htm>.

3 units, Spr (Yasumoto Magnani, E)

**JAPANLNG 5. Intensive First-Year Japanese Language**

Equivalent to 7B, 8B, and 9B combined. See <http://www.stanford.edu/group/japanese/summer>.

7-8 units, Sum (Tomiyama, Y)

**JAPANLNG 7. First-Year Japanese Language, Culture, and**

**Communication B, First Quarter**

(Formerly JAPANLNG 7B.) First-year sequence enables students to converse, write, and read essays on topics such as personal history, experiences, familiar people. 300 kanji characters. See <http://www.stanford.edu/group/japanese/1stBjlcc.htm>.

5 units, Aut (Lipton, H)

**JAPANLNG 8. First-Year Japanese Language, Culture, and Communication B, Second Quarter**

(Formerly JAPANLNG 8B.) Continuation of 7. <http://www.stanford.edu/group/japanese/1stBjlcc.htm>.

5 units, Win (Lipton, H)

**JAPANLNG 9. First-Year Japanese Language, Culture, and Communication B, Third Quarter**

(Formerly JAPANLNG 9B.) Continuation of 8. See <http://www.stanford.edu/group/japanese/1stBjlcc.htm>.

5 units, Spr (Lipton, H)

**JAPANLNG 11A. Intermediate Japanese Conversation, First Quarter**

(Formerly JAPANLNG 27.) Develops oral proficiency through simple sentence patterns, audio tapes, and oral presentations. For the practical use of Japanese. Prerequisite: 3, 9, or consent of instructor.

2 units, Aut (Busbin, K)

**JAPANLNG 11B. Intermediate Japanese Conversation, Second Quarter**

(Formerly JAPANLNG 28.) Continuation of 11A. Prerequisite 11A.

2 units, Win (Busbin, K)

**JAPANLNG 11C. Intermediate Japanese Conversation, Third Quarter**

(Formerly JAPANLNG 29.) Continuation of 11B. Prerequisite 11B or consent of instructor.

2 units, Spr (Busbin, K)

**JAPANLNG 14A. Second-Year Japanese Language Essentials, First Quarter**

(Formerly JAPANLNG 17A.) Continuation of 4C. For students who want to build communication skills in limited time. Prerequisite: 4C or equivalent.

3 units, Aut (Nakamura, K)

**JAPANLNG 14B. Second-Year Japanese Language Essentials, Second Quarter**

(Formerly JAPANLNG 18A.) Continuation of 14A. <http://www.stanford.edu/group/japanese/3unit.htm>. Prerequisite: 14A or equivalent.

3 units, Win (Yasumoto Magnani, E)

**JAPANLNG 14C. Second-Year Japanese Language Essentials, Third Quarter**

(Formerly JAPANLNG 19A.) Continuation of 14C. See <http://www.stanford.edu/group/japanese/3unit.htm>. Prerequisite: 14C or equivalent.

3 units, Spr (Yasumoto Magnani, E)

**JAPANLNG 17. Second-Year Japanese Language, Culture, and Communication B, First Quarter**

(Formerly JAPANLNG 17B.) Our goal is to express further develop and enhance spoken and written Japanese in order to handle advanced concepts such as the comparison and contrasts of the two cultures, descriptions of incidents, and social issues. 800 kanji, 1,400 new words, and higher-level grammatical constructions. Readings include authentic materials such as newspaper articles, and essays. Prerequisite: 9 or equivalent. See <http://www.stanford.edu/group/japanese/2ndB22ndjlcc.htm>.

5 units, Aut (Lowdermilk, M; Nakamura, K)

**JAPANLNG 18. Second-Year Japanese Language, Culture, and Communication B, Second Quarter**

(Formerly JAPANLNG 18B.) Prerequisite: 17 or equivalent. See <http://www.stanford.edu/group/japanese/2ndB22ndjlcc.htm>.

5 units, Win (Lowdermilk, M; Nakamura, K)

**JAPANLNG 19. Second-Year Japanese Language, Culture, and Communication B, Third Quarter**

(Formerly JAPANLNG 19B.) Prerequisite 18 or equivalent. <http://www.stanford.edu/group/japanese/2ndB22ndjlcc.htm>

5 units, Spr (Lowdermilk, M; Nakamura, K)

**JAPANLNG 20. Intensive Second-Year Japanese**

(Same as JAPANLNG 20G) Equivalent to 17,18,19 combined. Prerequisite 9 or equivalent. See <http://www.stanford.edu/group/japanese/summer>.

7-8 units, Sum (Lipton, H)

**JAPANLNG 31A. Intermediate to Advanced Japanese Conversation, First Quarter**

(Formerly JAPANLNG 51.) Oral proficiency through role play, oral presentations, and discussion. Recommended for those who have participated in Kyoto SCTI program May be able to take concurrently with 17, 18, and 19. Prerequisite: 9K, or consent of instructor.

2 units, Aut (Lowdermilk, M)

**JAPANLNG 31B. Intermediate to Advanced Japanese Conversation, Second Quarter**

(Formerly JAPANLNG 52.) Continuation of 31A. Prerequisite: 31A or consent of instructor.

2 units, Win (Lowdermilk, M)

**JAPANLNG 31C. Intermediate to Advanced Japanese Conversation, Third Quarter**

(Formerly JAPANLNG 53.) Continuation of 31B. Prerequisite: 31B or consent of instructor.

2 units, Spr (Lowdermilk, M)

**JAPANLNG 99. Language Specials**

Prerequisite: consent of instructor. (Staff)

1-5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**JAPANLNG 111. Business Japanese, First Quarter**

Topics include cultural attitudes and approaches, work ethic, the stock market, import-export trade. Business letters, job interviews, and resume writing. May be repeated for credit. In Japanese. Prerequisite: 23, 29, or 19B, or consent of instructor.

3 units, not given this year

**JAPANLNG 111A. Advanced Japanese Conversation, First Quarter**

(Formerly JAPANLNG 121.) Focus is on improving speaking skills to narrate and describe things in detail. Audiovisual material and oral presentations. Prerequisite: 19K, 31C, or consent of instructor.

2 units, Aut (Lipton, H)

**JAPANLNG 111B. Advanced Japanese Conversation, Second Quarter**

(Formerly JAPANLNG 122.) Continuation of 111A. Prerequisite: 111A or consent of instructor.

2 units, Win (Lipton, H)

**JAPANLNG 111C. Advanced Japanese Conversation, Third Quarter**

(Formerly JAPANLNG 123.) Continuation of 111B. Prerequisite: 111B, or consent of instructor

2 units, Spr (Lipton, H)

**JAPANLNG 112. Business Japanese, Second Quarter**

Topics include cultural attitudes and approaches, work ethic, the stock market, import-export trade. Business letters, job interviews, and resume writing. May be repeated for credit. In Japanese. Prerequisite: 23, 29, or 19B, or consent of instructor.

**JAPANLNG 113. Business Japanese, Third Quarter**

Topics include cultural attitudes and approaches, work ethic, the stock market, import-export trade. Business letters, job interviews, and resume writing. May be repeated for credit. In Japanese. Prerequisite: 23, 29, or 19B, or consent of instructor.

3 units, not given this year

**JAPANLNG 114. Japanese for Bilingual Students**

For students with advanced-level comprehension and speaking skills who in need of supplemental study. Emphasis is on reading, writing Chinese (kanji) characters, and formal Japanese.

3 units, not given this year

**JAPANLNG 115. Japanese for Bilingual Students**

For students with advanced-level comprehension and speaking skills who in need of supplemental study. Emphasis is on reading, writing Chinese (kanji) characters, and formal Japanese.

3 units, not given this year

### **JAPANLNG 116. Japanese for Bilingual Students**

For students with advanced-level comprehension and speaking skills who in need of supplemental study. Emphasis is on reading, writing Chinese (kanji) characters, and formal Japanese.

*3 units, not given this year*

### **JAPANLNG 117. Third-Year Japanese Language, Culture, and Communication B, First Quarter**

(Formerly JAPANLNG 127B.) Goal is to express thoughts and opinions in paragraph length in spoken and written forms. Materials include current Japanese media and literature for native speakers of Japanese. Cultural and social topics related to Japan and its people. See <http://www.stanford.edu/group/japanese/3rdjlcc>.

*5 units, Aut (Tomiyama, Y)*

### **JAPANLNG 118. Third-Year Japanese Language, Culture, and Communication B, Second Quarter**

(Formerly JAPANLNG 128B.) Continuation of 117. Prerequisite 117. See <http://www.stanford.edu/group/japanese/3rdjlcc>.

*5 units, Win (Tomiyama, Y)*

### **JAPANLNG 119. Third-Year Japanese Language, Culture, and Communication B, Third Quarter**

(Formerly JAPANLNG 129B.) continuation of 118 <http://www.stanford.edu/group/japanese/3rdjlcc>. Prerequisite: 118.

*5 units, Spr (Tomiyama, Y)*

### **JAPANLNG 130. Intensive Third-Year Japanese**

Equivalent to 127B,128B,129B combined. Prerequisite: 19B or equivalent. See <http://www.stanford.edu/group/japanese/summer>.

*7-8 units, not given this year*

## **GRADUATE COURSES IN JAPANESE LANGUAGE**

### **JAPANLNG 20G. Intensive Second-Year Japanese**

(Same as JAPANLNG 20) Equivalent to 17,18,19 combined. Prerequisite 9 or equivalent. See <http://www.stanford.edu/group/japanese/summer>.

*7-8 units, Sum (Lipton, H)*

### **JAPANLNG 32G. Accelerated Beginning Business Japanese II**

For GSB students only. Limited enrollment.

*4 units, not given this year*

### **JAPANLNG 33G. Accelerated Beginning Business Japanese III**

For GSB students only. Limited enrollment.

*4 units, not given this year*

### **JAPANLNG 200. Directed Reading**

Prerequisite: 213 and consent of instructor.

*1-5 units, Aut (Staff), Win (Staff), Spr (Staff)*

### **JAPANLNG 211. Advanced Japanese, First Quarter**

Structure of Japanese, writings in different genres and styles, using such knowledge in writing, and expressing opinions on a variety of topics. Original writings, including fiction, essays, newspaper, and journal articles. Recommended taken in sequence. Prerequisite: 119 or equivalent.

*3-5 units, Aut (Nakamura, K)*

### **JAPANLNG 212. Advanced Japanese, Second Quarter**

Continuation of 211 Prerequisite: 211 or equivalent.

*3-5 units, Win (Nakamura, K)*

### **JAPANLNG 213. Advanced Japanese, Third Quarter**

Prerequisite: 212 or equivalent.

*3-5 units, Spr (Nakamura, K)*

### **JAPANLNG 394. Graduate Studies in Japanese Conversation**

Prerequisite: consent of instructor. (Staff)

*1-3 units, Aut (Staff), Win (Staff), Spr (Staff)*

### **JAPANLNG 395. Graduate Studies in Japanese**

Prerequisite: consent of instructor. (Staff)

*2-5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

## **JAPANESE LITERATURE (JAPANLIT)**

### **UNDERGRADUATE COURSES IN JAPANESE LITERATURE**

#### **JAPANLIT 146. Introduction to Premodern Japanese**

(Same as JAPANLIT 246) Readings from Heian, Kamakura, Muromachi, and early Edo periods with focus on grammar and reading comprehension. Prerequisite: JAPANLNG 129B or 103, or equivalent.

*3-5 units, given next year*

#### **JAPANLIT 157. Points in Japanese Grammar**

(Same as JAPANLIT 257) Meaning and grammatical differences of similar expressions, and distinctions that may not be salient in English. Prerequisite: JAPANLNG 18B or 22, or equivalent. GER:DB-SocSci

*4 units, not given this year*

#### **JAPANLIT 170. The Tale of Genji and Its Historical Reception**

(Same as JAPANLIT 270) Approaches to the tale including 12th-century allegorical and modern feminist readings. Influence upon other works including poetry, Noh plays, short stories, modern novels, and comic book (manga) retellings. Prerequisite for graduate students: JAPANLNG 129B or 103, or equivalent. GER:DB-Hum

*4 units, Aut (Carter, S)*

#### **JAPANLIT 189A. Honors Research**

Students accepted into the honors program enroll for 2-5 units in spring/autumn while researching thesis.

*2-5 units, Aut (Staff), Spr (Staff)*

#### **JAPANLIT 189B. Honors Research**

Open to senior honors students to write thesis.

*5 units, Win (Staff)*

#### **JAPANLIT 199. Individual Reading in Japanese**

Asian Languages majors only. May be repeated for credit. Prerequisites: JAPANLNG 129B or 103, and consent of instructor.

*1-4 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

## **GRADUATE COURSES IN JAPANESE LITERATURE**

#### **JAPANLIT 200. Directed Reading in Japanese**

*1-12 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

#### **JAPANLIT 201. Proseminar: Introduction to Graduate Study in Japanese**

Bibliographical and research methods; major trends in literary and cultural theory and critical practice. May be repeated once for credit. Prerequisite: JAPANLNG 103 or 129B, or consent of instructor.

*2-5 units, Aut (Levy, I)*

#### **JAPANLIT 202. Bibliographic and Research Methods in Japanese**

The use of library and online resources for the study of Japanese literature, language, and culture. Prerequisite: JAPANLNG 103 or 129B, or consent of instructor.

*5 units, not given this year*

#### **JAPANLIT 246. Introduction to Premodern Japanese**

(Same as JAPANLIT 146) Readings from Heian, Kamakura, Muromachi, and early Edo periods with focus on grammar and reading comprehension. Prerequisite: JAPANLNG 129B or 103, or equivalent.

*3-5 units, given next year*

#### **JAPANLIT 247. Readings in Premodern Japanese**

Edo and Meiji periods with focus on grammar and reading comprehension. May be repeated for credit. Prerequisite: 246 or equivalent.

*2-5 units, given next year*

#### **JAPANLIT 257. Points in Japanese Grammar**

(Same as JAPANLIT 157) Meaning and grammatical differences of similar expressions, and distinctions that may not be salient in

English. Prerequisite: JAPANLNG 18B or 22, or equivalent.

*4 units, not given this year*

**JAPANLIT 260. Japanese Poetry and Poetics**

Heian through Meiji periods with emphasis on relationships between the social and aesthetic. Works vary each year. Prerequisites: 246, 247, or equivalent.

*2-4 units, Win (Carter, S)*

**JAPANLIT 270. The Tale of Genji and Its Historical Reception**

(Same as JAPANLIT 170) Approaches to the tale including 12th-century allegorical and modern feminist readings. Influence upon other works including poetry, Noh plays, short stories, modern novels, and comic book (manga) retellings. Prerequisite for graduate students: JAPANLNG 129B or 103, or equivalent.

*4 units, Aut (Carter, S)*

**JAPANLIT 281. Japanese Pragmatics**

Sociocultural and discourse factors reflected in the choice of linguistic forms, and their theoretical implications. Prerequisites: one year of Japanese and a course in linguistics, or two years of Japanese, or consent of instructor.

*4 units, Spr (Matsumoto, Y)*

**JAPANLIT 287. Pictures of the Floating World: Images from Japanese Popular Culture**

(Same as ARTHIST 287) Printed objects produced during the Edo period (1600-1868), including the Ukiyo-e (pictures of the floating world) and lesser-studied genres such as printed books (ehon) and popular broadsheets (kawaraban). How a society constructs itself through images. The borders of the acceptable and censorship; theatricality, spectacle, and slippage; the construction of play, set in conflict against the dominant neo-Confucian ideology of fixed social roles. Prerequisites: 2, 186, 187, 188.

*5 units, not given this year*

**JAPANLIT 296. Readings in Modern Japanese Literature**

Works and topics vary each year. May be repeated for credit. Prerequisite: fourth-year Japanese or consent of instructor.

*2-4 units, Aut (Reichert, J)*

**JAPANLIT 299. Master's Thesis or Translation**

A total of 5 units, taken in one or more quarters. (Staff)

*1-5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

**JAPANLIT 350. Japanese Historical Fiction**

Authors include Mori Ogai, Akutagawa Ryunosuke, Tanizaki Jun'ichiro, Enchi Fumiko, Shiba Ryotaro, Fujisawa Shuhei, and Hiraiwa Yumie. Genre theory, and historical and cultural context. Works vary each year. May be repeated for credit.

*3-5 units, Spr (Carter, S)*

**JAPANLIT 377. Seminar: Structure of Japanese**

Linguistic constructions in Japanese. Topics vary annually. In 2009-10, focus is on noun-modifying constructions in Japanese from multiple perspectives including syntax, semantics, pragmatics, and acquisition. Contrasts with similar constructions in other languages. Typological implications. Prerequisites: courses in Japanese linguistics, consent of instructor.

*2-4 units, Win (Matsumoto, Y)*

**JAPANLIT 381. Topics in Pragmatics and Discourse Analysis**

Naturally occurring discourse (conversational, narrative, or written) and theoretical implications. Discourse of different age groups, expressions of identity and persona, and individual styles. May be repeated for credit.

*2-4 units, not given this year*

**JAPANLIT 395. Early Modern Japanese Literature**

May be repeated for credit. Prerequisite: 247.

*2-4 units, Win (Reichert, J)*

**JAPANLIT 396. Modern Japanese Literature**

May be repeated for credit. Prerequisite: JAPANLNG 213.

*3-5 units, Spr (Levy, I)*

**JAPANLIT 399. Dissertation Research**

For doctoral students in Japanese working on dissertations. (Staff)

*1-12 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

**JAPANLIT 400. Advanced Language Training**

For students at the Yokohama Center. For more information, see the program description under the "Inter-University Center for Japanese Studies in Yokohama" section in the Stanford Bulletin.

*1-15 units, Aut (Staff), Win (Staff), Spr (Staff)*

## JEWISH STUDIES (JEWISHST)

### GRADUATE COURSES IN JEWISH STUDIES

**JEWISHST 299A. Directed Reading in Yiddish, First Quarter**

Directed Reading in Yiddish, First Quarter

*1-5 units, Aut (Staff)*

## KOREAN LANGUAGE (KORLANG)

### UNDERGRADUATE COURSES IN KOREAN LANGUAGE

**KORLANG 1. First-Year Korean, First Quarter**

Communication skills, vocabulary, and grammar patterns. Culturally appropriate conduct relevant to contexts such as greetings, gestures, and body language.

*4-5 units, Aut (Kim, H)*

**KORLANG 2. First-Year Korean, Second Quarter**

Communication skills, vocabulary, and grammar patterns. Culturally appropriate conduct relevant to contexts such as greetings, gestures, and body language.

*4-5 units, Win (Kim, H)*

**KORLANG 3. First-Year Korean, Third Quarter**

Continuation of 2. Prerequisite 2. Fulfills the University language requirement.

*4-5 units, Spr (Kim, H)*

**KORLANG 21. Second-Year Korean, First Quarter**

More complex sentences and grammatical patterns. Conversation in daily situations such as making a polite request or suggestion, reading simple texts, and Korean culture. Prerequisite: 3 or consent of instructor.

*3-5 units, Aut (Staff)*

**KORLANG 22. Second-Year Korean, Second Quarter**

Continuation of 21. Prerequisite 21.

*3-5 units, Win (Staff)*

**KORLANG 23. Second-Year Korean, Third Quarter**

Continuation of 22. Prerequisite: 22 or consent of instructor.

*3-5 units, Spr (Staff)*

**KORLANG 101. Third-Year Korean, First Quarter**

Materials about Korean culture and society. Proficiency in interpersonal, interpretive, and presentational communication. Vocabulary, reading, and aural/oral skills. Prerequisite: 23 or consent of instructor.

*2-3 units, Aut (Staff)*

**KORLANG 102. Third-Year Korean, Second Quarter**

Continuation of 101. Prerequisite: 101 or consent of instructor.

*2-3 units, Win (Staff)*

**KORLANG 103. Third-Year Korean, Third Quarter**

Continuation of 102. Prerequisite: 102 or consent of instructor.

*2-3 units, Spr (Staff)*

**KORLANG 130. Reading Korean**

Contemporary literature and academic texts. Prerequisite: 103 or consent of instructor.

*2-3 units, Aut (Kim, H)*

**KORLANG 141. Business Korean**

Business-related vocabulary and cultural etiquette. Business letters, mock interviews, and resumes. May be repeated for credit. Prerequisite: 103 or consent of instructor.

*2-3 units, Spr (Kim, H)*

**KORLANG 160K. Korean Drama**

Korean culture and society through contemporary Korean drama and films. Advanced vocabulary, grammar, and idiomatic expressions. Prerequisite: 103 or consent of instructor.

*2-3 units, Win (Kim, H)*

## GRADUATE COURSES IN KOREAN LANGUAGE

### KORLANG 200. Directed Reading in Korean

Prerequisite: consent of instructor. (Staff)

1-5 units, Aut (Staff), Win (Staff), Spr (Staff, 1), Sum (Staff)

### KORLANG 395. Graduate Studies in Korean

Prerequisite: consent of instructor.

1-5 units, Aut (Staff), Win (Staff), Spr (Staff, 1)

## LATIN AMERICAN STUDIES (LATINAM)

### UNDERGRADUATE COURSES IN LATIN AMERICAN STUDIES

#### LATINAM 197. Directed Individual Research

For students engaged in interdisciplinary work that cannot be arranged by department. May be repeated for credit. Prerequisite: consent of instructor.

1-10 units, Aut (Staff), Win (Staff), Spr (Staff)

#### LATINAM 198. Honors Thesis

Restricted to those writing an honors thesis in Latin American Studies.

1-10 units, Aut (Staff), Win (Staff), Spr (Staff)

#### LATINAM 200. Seminar on Contemporary Issues in Latin American Studies

Guest scholars present analyses of major Latin American themes.

1 unit, Aut (Klein, H), Win (Klein, H), Spr (Klein, H)

#### LATINAM 201. Social Change in Latin America Since 1900

(Same as HISTORY 275F, HISTORY 375F, LATINAM 301) Changes in the social and demographic characteristics of Latin American populations since 1900 and the response of national governments in terms of the evolution of social welfare, health, and educational systems. Fulfills requirement for Latin American Studies honors seminar. Required core course for Latin American Studies master's students. GER:DB-SocSci

4-5 units, Spr (Klein, H)

#### LATINAM 202. Human Ecology of the Amazon

(Same as ANTHRO 161B, ANTHRO 261B, LATINAM 302) The ecosystems of the Amazon and their human inhabitants. The biotic and abiotic factors shaping human adaptation to the region. Ethnographic literature used to explore subsistence patterns and the resource use of native Amazonians. Current changes in these economies and lifeways due to acculturation and market forces, and the implications for conservation.

5 units, Aut (Irvine, D)

### GRADUATE COURSES IN LATIN AMERICAN STUDIES

#### LATINAM 301. Social Change in Latin America Since 1900

(Same as HISTORY 275F, HISTORY 375F, LATINAM 201) Changes in the social and demographic characteristics of Latin American populations since 1900 and the response of national governments in terms of the evolution of social welfare, health, and educational systems. Fulfills requirement for Latin American Studies honors seminar. Required core course for Latin American Studies master's students.

4-5 units, Spr (Klein, H)

#### LATINAM 302. Human Ecology of the Amazon

(Same as ANTHRO 161B, ANTHRO 261B, LATINAM 202) The ecosystems of the Amazon and their human inhabitants. The biotic and abiotic factors shaping human adaptation to the region. Ethnographic literature used to explore subsistence patterns and the resource use of native Amazonians. Current changes in these economies and lifeways due to acculturation and market forces, and the implications for conservation.

5 units, Aut (Irvine, D)

#### LATINAM 398. Master's Thesis

Restricted to students writing a master's thesis in Latin American Studies. May be repeated for credit.

1-10 units, Aut (Staff), Win (Staff), Spr (Staff)

## LAW (LAW)

Primarily for Law students; others require consent of instructor. For detailed information on courses offered at Stanford Law School during the 2009-10 academic year, see the Law School Registrar's web site at <http://lawreg.stanford.edu>.

#### LAW 201. Civil Procedure I

4 units, Aut (Kramer, L, Martinez, J; Spaulding, N)

#### LAW 203. Constitutional Law I: Structure

3 units, Win (Casper, G; Karlan, P; Sullivan, K)

#### LAW 205. Contracts

4 units, Aut (Asimow, M; Cole, G; Craswell, R; Morantz, A)

#### LAW 207. Criminal Law

4 units, Aut (Kelman, M; Lanni, A; Marshall, L; Mills, D; Weisberg, R)

#### LAW 212. Introduction to Social Entrepreneurship

3 units, Spr (McKechnie, S)

#### LAW 217. Property

4 units, Win (Kelman, M; Thompson, B; Wara, M)

#### LAW 218. JSD Research Colloquium

0 units, Aut (Stacy, H), Win (Stacy, H), Spr (Stacy, H)

#### LAW 219. Legal Research and Writing

2 units, Aut (Merino, J; Pollman, E; Rosenbaum, B; Roth, A; Sinnar, S; Varadarajan, D), Win (Staff), Spr (Staff)

#### LAW 220. Regulated Industries

4 units, Win (Wolak, F)

#### LAW 221. Intellectual Property: Commercial Law

3 units, Win (Cole, G; Handler, B)

#### LAW 222. Advanced Legal Research

3 units, Aut (Lomio, J; Wayne, E; Wilson, G), Spr (Lomio, J; Wayne, E)

#### LAW 223. Torts

4 units, Aut (Engstrom, N; Sykes, A; Zittrain, J)

#### LAW 225A. Immigrants' Rights Clinic: Clinical Practice

4 units, Win (Srikantiah, J), Spr (Srikantiah, J)

#### LAW 225B. Immigrants' Rights Clinic: Clinical Methods

4 units, Win (Srikantiah, J), Spr (Srikantiah, J)

#### LAW 225C. Immigrants' Rights Clinic: Clinical Coursework

4 units, Win (Srikantiah, J), Spr (Srikantiah, J)

#### LAW 226. Accounting

2 units, Win (Beyer, A)

#### LAW 229. Race and the Law

3 units, Win (Banks, R)

#### LAW 230. Creation of the Constitution

4 units, Spr (McConnell, M)

#### LAW 233. Antitrust

3 units, Spr (Koob, C)

#### LAW 236. Art and the Law

3 units, Win (Merryman, J)

#### LAW 238. Administrative Law

4 units, Win (Ho, D), Spr (Engstrom, D)

#### LAW 239. Law and Creativity: Fiction and Nonfiction

3 units, Spr (Canales, V; Horack, B)

#### LAW 240. Bankruptcy

3 units, Aut (Triantis, G)

#### LAW 242. Corporations

4 units, Aut (Daines, R), Spr (Daines, R)

#### LAW 243. Bayesian Statistics and Econometrics

1-6 units, Aut (Strnad, J)

#### LAW 244. The Civil Jury

3 units, Win (Alexander, J)

- LAW 245. Chinese Law and Business**  
3 units, Aut (Gechlik, M)
- LAW 248. Corporate Reorganization**  
3 units, Aut (Ray, S)
- LAW 255. Constitutional Law II: The Fourteenth Amendment**  
3 units, Spr (Banks, R; Schacter, J)
- LAW 257. Corporate Governance Seminar**  
2 units, Spr (Daines, R)
- LAW 259. State-Building and the Rule of Law Workshop**  
3 units, Aut (Jensen, E)
- LAW 262. Corporate Finance I**  
3 units, Aut (Ishii, J)
- LAW 269. Foreign Affairs and the Constitution**  
3 units, Aut (Martinez, J)
- LAW 272A. Organizations and Transactions Clinic: Clinical Practice**  
4 units, Win (Mitchell, J), Spr (Mitchell, J)
- LAW 272B. Organizations and Transactions Clinic: Clinical Methods**  
4 units, Win (Mitchell, J), Spr (Mitchell, J)
- LAW 272C. Organizations and Transactions Clinic: Clinical Coursework**  
4 units, Win (Mitchell, J), Spr (Mitchell, J)
- LAW 273. Deals I**  
3 units, Aut (Klausner, M)
- LAW 274. Advanced Immigrants' Rights Clinic**  
2-7 units
- LAW 275. Deals II**  
2 units, Win (Klausner, M)
- LAW 276. Employee Benefits Law**  
3 units, Spr (Frueh, E)
- LAW 277. Economic Analysis of Law**  
4 units, Win (Polinsky, M)
- LAW 283. Federal Courts**  
5 units, Aut (Alexander, J)
- LAW 283. Federal Courts**  
4 units, Win (Spaulding, N)
- LAW 288. Governance and Ethics: Anti-Corruption Law, Compliance, and Enforcement**  
3 units, Aut (Abramov, I)
- LAW 290. Evidence**  
5 units, Aut (Fisher, G)
- LAW 290. Evidence**  
4 units, Spr (Romero, L)
- LAW 292. Estate Planning**  
3 units, Spr (Pearson, H)
- LAW 293. Family Law**  
3 units, Spr (Banks, R)
- LAW 297. Entertainment Law**  
3 units, Spr (Eskenazi, B; Fields, B)
- LAW 299. Over-the-Counter Derivatives**  
2 units, Aut (Summe, K)
- LAW 300. Securities Litigation**  
3 units, Spr (Gilson, R; Roper, A)
- LAW 301. Labor Law**  
3 units, Win (Gould, W)
- LAW 304. Law and the Rhetorical Tradition**  
3 units, Win (Sassoubre, T)
- LAW 306. Law, Economics and Politics of International Trade**  
3 units, Win (Bagwell, K; Goldstein, J; Sykes, A)
- LAW 308. Cultural Heritage Law and Policy**  
3 units, not given this year
- LAW 312. Criminal Procedure: Investigation**  
3 units, Aut (Weisberg, R)
- LAW 313. Health Law & Policy**  
3 units, Aut (Greely, H)
- LAW 315. Criminal Procedure: Adjudication**  
3 units, Spr (Weisberg, R)
- LAW 318. History of American Law**  
3 units, Spr (Friedman, L)
- LAW 319. Legislation**  
3 units, Aut (Schacter, J)
- LAW 324. Intellectual Property: Copyright**  
3 units, Aut (Goldstein, P)
- LAW 326. Intellectual Property: Patents**  
3 units, Aut (Lemley, M)

**LAW 664. Advanced Legal Writing: Drafting Business Transactions**

3 units, Aut (Bautista, M), Win (Bautista, M), Spr (Bautista, M)

**LAW 665. Advanced Legal Writing: Legislative Drafting and Analysis**

2 units, Spr (Bautista, M)

**LAW 670. White Collar Crime**

3 units, Win (Mills, D)

**LAW 671. Critical Theory**

2 units, Win (Ford, R)

**LAW 701. SPILS Law and Society Seminar**

3 units, Aut (Friedman, L; Perez-Perdomo, R)

**LAW 703. Corporate Governance and Practice Seminar**

2 units, Aut (Crawford, J), Win (Crawford, J), Spr (Crawford, J)

**LAW 704. Law, Science, and Technology Colloquium**

2 units, Aut (Simon, B), Win (Simon, B), Spr (Simon, B)

**LAW 705. SPILS Masters Thesis**

6 units, Spr (Staff)

**LAW 707. SPILS Research Methods Workshop**

3 units, Aut (Paz, M)

**LAW 708. Advanced Legal Writing for American Practice**

2 units, Aut (McLellan, B), Win (McLellan, B)

**LAW 709. Introduction to American Law**

2 units, Aut (McLellan, B)

**LAW 710. SPILS Thesis Writing Workshop**

3 units, Win (Paz, M)

## LAW, NONPROFESSIONAL (LAWGEN)

### UNDERGRADUATE COURSES IN LAW, NONPROFESSIONAL

**LAWGEN 106. Introduction to American Law**

(Same as AMSTUD 179, POLISCI 122) For undergraduates. The structure of the American legal system including the courts; American legal culture; the legal profession and its social role; the scope and reach of the legal system; the background and impact of legal regulation; criminal justice; civil rights and civil liberties; and the relationship between the American legal system and American society in general.

3-5 units, Win (Friedman, L)

**LAWGEN 110Q. Criminal Justice and the Criminal Courts**

(S,Sem) Stanford Introductory Seminar. Preference to sophomores. Introduction to the American criminal justice system, through the lens of the criminal courts. Focus is on the structures and theories at play in the criminal court system, emphasizing court procedures, structures, constitutional guarantees, and the trial process. The roles of individual agents, including police, prosecutors, defense attorneys, judges, probation officers, and corrections officials.

3 units, Aut (Dansky, K)

### GRADUATE COURSES IN LAW, NONPROFESSIONAL

**LAWGEN 206Q. Thinking Like a Lawyer**

(Same as GSBGEN 382.) Open to all graduate students. An analytical framework for understanding the core concepts of the law; how lawyers analyze and structure their work. Foundational principles of law. Topics such as contracts, litigation, intellectual property, securities, and employment law.

3-4 units, Win (Kelman, M; Kramer, L)

**LAWGEN 209Q. Stanford Community Police Academy**

Open to all students. Practical experience. The duties, responsibilities, decisions, and constraints that face law enforcement officers. Prerequisites: minimum 18 years of age; valid driver's license; background check.

1 unit, Win (Dubois, M; Wilson, L)

## LINGUISTICS (LINGUIST)

### UNDERGRADUATE COURSES IN LINGUISTICS

**LINGUIST 1. Introduction to Linguistics**

The cognitive organization of linguistic structure and the social nature of language use. Why language learning is difficult. Why computers have trouble understanding human languages. How languages differ from one another. How and why speakers of the same language speak differently. How language is used strategically. GER:DB-SocSci

4 units, Aut (Potts, K), Spr (Fong, V)

**LINGUIST 5N. What's Your Accent? Investigations in Acoustic Phonetics**

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Phonetic variation across accents of English; experimental design; practical experience examining accents of seminar participants; acoustic analysis of speech using Praat. GER:DB-SocSci

3 units, Aut (Sumner, M)

**LINGUIST 65. African American Vernacular English**

(Same as LINGUIST 265) The English vernacular spoken by African Americans in big city settings, and its relation to Creole English dialects spoken on the S. Carolina Sea Islands (Gullah), in the Caribbean, and in W. Africa. The history of expressive uses of African American English (in 'sounidin' and rappin'), and its educational implications. GER:DB-SocSci, EC-AmerCul

3-5 units, Win (Staff)

**LINGUIST 66. Vernacular English and Reading**

(Same as LINGUIST 266) Discusses some of the literature on the relation between use of vernacular English varieties (e.g. African American Vernacular English, Chicano English) and the development of literacy (especially in Standard English). But our primary focus is on improving the reading skills of African American and Latino students in local schools through the Reading Road program developed at the University of Pennsylvania. Students must commit to tutoring one or more elementary students weekly, using the program. L65 AAVE recommended, but not required.

4-5 units, Spr (Rickford, J)

**LINGUIST 83N. Translation**

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. What is a translation? The increased need for translations in the modern world due to factors such as tourism and terrorism, localization and globalization, diplomacy and treaties, law and religion, and literature and science. How to meet this need; different kinds of translation for different purposes; what makes one translation better than another; why some texts are more difficult to translate than others. Can some of this work be done by machines? Are there things that cannot be said in some languages? GER:DB-SocSci

3 units, Aut (Kay, M)

**LINGUIST 90. Teaching Spoken English**

Practical approach to teaching English to non-native speakers. Teaching principles and the features of English which present difficulties. Preparation of lessons, practice teaching in class, and tutoring of non-native speaker.

3-4 units, Spr (Romeo, K)

**LINGUIST 105. Phonetics**

(Same as LINGUIST 205A) The study of speech sounds: how to produce them, how to perceive them, and their acoustic properties. The influence of production and perception systems on sound change and phonological patterns. Acoustic analysis and experimental techniques. Lab exercises. Prerequisite: 110 or equivalent, or consent of instructor. GER:DB-SocSci

4 units, Win (Sumner, M)

**LINGUIST 110. Introduction to Phonetics and Phonology**

Differences in the sounds of the world's languages and how these sounds are made by the human vocal tract. Theories that account for cross-linguistic similarities in the face of differences. GER:DB-SocSci

4 units, Win (Sumner, M)

**LINGUIST 112. Seminar in Phonology**

(Same as LINGUIST 212A) Topics vary each year. Previous topics include variation in the phonology of words according to their contexts within larger expressions and the place of these phenomena in a theory of grammar. May be repeated for credit.

2-4 units, not given this year

**LINGUIST 116. Morphology**

A survey of words including their structures, pronunciations, meanings, and syntactic possibilities in a wide sampling of languages to provide a laboratory for investigating the nature of morphology.

4 units, Spr (Staff)

**LINGUIST 119. Choosing a Variant**

(Same as LINGUIST 219) Assortment of cases (lexical and morphosyntactic) where two or more English expressions serve as alternatives, apparently differing only in stylistic value or sociolinguistic status; explores the semantic, discourse function, syntactic, prosodic, and processing factors that favor the choice of one variant over the other; and evaluates claims about the stylistic values and sociolinguistic status of the variants

2-4 units, Win (Zwicky, A)

**LINGUIST 120. Introduction to Syntax**

Grammatical constructions, primarily English, and their consequences for a general theory of language. Practical experience in forming and testing linguistic hypotheses, reading, and constructing rules. GER:DB-SocSci

4 units, Aut (Wasow, T)

**LINGUIST 124A. Introduction to Formal Universal Grammar**

(Same as LINGUIST 224A) A formal model of universal grammar designed to explain crosslinguistic variation in syntactic structure: nonconfigurationality in Australian aboriginal languages, incorporation in native American languages and the Bantu languages of Africa, scrambling and head movement in European languages. Issues such as universal grammar design, and analytic problems from a variety of natural languages. Prerequisites: introduction to syntax and familiarity with logic or other symbolic systems, or consent of instructor. GER:DB-SocSci

4 units, not given this year

**LINGUIST 130A. Introduction to Linguistic Meaning**

Linguistic meaning and its role in communication. Topics include ambiguity, vagueness, presupposition, intonational meaning, and Grice's theory of conversational implicature. Applications to issues in politics, the law, philosophy, advertising, and natural language processing. Those who have not taken logic, such as PHIL 150 or 151, should also enroll in 130C. Pre- or corequisite: 120, or consent of instructor. GER:DB-SocSci

4 units, Spr (Potts, C)

**LINGUIST 130B. Introduction to Lexical Semantics**

Issues in the study of word meaning. Focus is on the core semantic properties and internal organization of the four major word categories in natural languages: nouns, verbs, adjectives, and prepositions. GER:DB-SocSci

4 units, not given this year

**LINGUIST 130C. Logic Laboratory**

Typically taken in conjunction with 130A/230A.

1 unit, Spr (Staff)

**LINGUIST 133. Introduction to Formal Pragmatics**

(Same as LINGUIST 233) (Graduate students register for 233.) Mechanism underlying language use and felicity intuitions. Formal models of discourse that incorporate many aspects of pragmatics such as presuppositions, speech acts, implicatures, relevance, optimality, and utility. Discussion of common ground, illocutionary acts, Gricean maxims and Neo-Gricean analysis, game and decision theory.

3-4 units, not given this year

**LINGUIST 140. Language Acquisition I**

(Same as LINGUIST 240) Processes of language acquisition in early childhood; stages in development; theoretical issues and research questions. Practical experience in data collection. GER:DB-SocSci

4 units, Aut (Clark, E)

**LINGUIST 142. Bilingualism, Language Attrition, and Heritage Languages**

Linguistic and sociolinguistic aspects of first language loss among emigrants; consequences for language teaching. GER:DB-SocSci

3-4 units, not given this year

**LINGUIST 144. Introduction to Cognitive and Information Sciences**

(Same as PHIL 190, PSYCH 132, SYMSYS 100) The history, foundations, and accomplishments of the cognitive sciences, including presentations by leading Stanford researchers in artificial intelligence, linguistics, philosophy, and psychology. Overview of the issues addressed in the Symbolic Systems major. GER:DB-SocSci

4 units, Spr (Wasow, T; McClelland, J)

**LINGUIST 150. Language in Society**

How language and society affect each other. Class, age, ethnic, and gender differences in speech. Prestige and stigma associated with different ways of speaking and the politics of language. The strategic use of language. Stylistic practice; how speakers use language to construct styles and adapt their language to different audiences and social contexts. GER:DB-SocSci, WIM

4 units, Win (Staff)

**LINGUIST 152. Sociolinguistics and Pidgin Creole Studies**

(Same as LINGUIST 252) Introduction to pidgins and creoles, organized around the main stages in the pidgin-creole life cycle: pidginization, creolization, and decreolization. Focus is on transformations in the English language as it was transported from Britain to Africa, Asia, the Caribbean, and the Pacific. Resultant pidginized and creolized varieties such as Nigerian Pidgin English, Chinese Pidgin English, New Guinea Tok Pisin, Suriname Sranan, and the creole continua of Guyana, Jamaica, and Hawaii. Also French, Dutch, Portuguese, Chinook, Motu, and Sango.

2-4 units, not given this year

**LINGUIST 153. Language, Power & Politics**

The integral role language plays in politics; how power operates in linguistic practices and political interaction. Critical examination of how language is used to articulate, maintain and subvert relations of power in society, emphasizing language in the media, the political rhetoric associated with war, and the construction of 'truth' in politics. The role of ethnographic analysis in aiding sociolinguistic understandings of how social actors use and (re)interpret political language.

3-4 units, Aut (Staff)

**LINGUIST 154. Sociolinguistics of Language Contact**

(Same as LINGUIST 254) The role of contact between speakers of different languages in processes of language borrowing, convergence, and shift. Attending both to linguistic aspects and social contexts, examine: second-language acquisition, bilingualism, code-switching, lexical and grammatical borrowing, first language attrition, language death, and the creation of new contact varieties such as jargons, mixed languages, pidgins, and creoles. Prerequisite: background in linguistics.

2-4 units, Spr (Rickford, J; Roberts, S)

**LINGUIST 156. Language and Gender**

The role of language in the construction of gender, the maintenance of the gender order, and social change. Field projects explore hypotheses about the interaction of language and gender. No knowledge of linguistics required. GER:DB-SocSci, EC-Gender

4 units, Win (Roberts, S)

**LINGUIST 160. Introduction to Language Change**

(Same as ANTHRO 120) Principles of historical linguistics; the nature of language change. Kinds and causes of change, variation and diffusion of changes through populations, differentiation of dialects and languages, determination and classification of historical relationships among languages, rates of change, the reconstruction of ancestral languages and intermediate changes, parallels with cultural and genetic evolutionary theory, and implications of variation and change for the description and explanation of language in general. Prerequisite: introductory course in linguistics or evolutionary theory. GER:DB-SocSci

4-5 units, Spr (Staff)

**LINGUIST 167. Languages of the World**

The diversity of human languages, their sound systems, vocabularies, and grammars. Tracing historical relationships between lan-

guages and language families. Parallels with genetic evolutionary theory. Language policy, endangered languages and heritage languages. Classification of sign languages. GER:DB-SocSci

3-4 units, Win (Pereltsvaig, A)

#### **LINGUIST 170. The Arabic Language and Culture**

(Same as AMELANG 36, LINGUIST 270) Arabic language from historical, social, strategic, and linguistic perspectives. History of the Arabic language and the stability of classical Arabic over the last 15 centuries. Why the functionality of classical Arabic has not changed as Latin, Old English, and Middle English have. Social aspects of the Arabic language, Ferguson's notion of diglossia. The main varieties of Arabic, differences among them, and when and where they are spoken. Role of Arabic and culture in current world politics, culture, and economy. Linguistic properties of Arabic such as root-based morphology, lexical ambiguity, and syntactic structure relating it to current linguistic theories.

3 units, not given this year

#### **LINGUIST 173. The Structure of Russian**

(Same as LINGUIST 273) A synchronic overview of contemporary standard Russian, including its sound system, word formation and grammatical structure. Emphasis is on problems presented by Russian for current linguistic theory. The acquisition of Russian as a first language.

2-4 units, not given this year

#### **LINGUIST 174. Linguistic Field Methods**

(Same as ANTHRO 30, LINGUIST 274A) Practical training in the collection and analysis of linguistic data from native speakers of a language largely unknown to the investigator. Documentation of endangered languages. Research goals, field trip preparation, ethics (including human subjects, cooperation with local investigators, and governmental permits), working in the community, technical equipment, and analytical strategies. Emphasis is on the use of recording devices and computers in collection and analysis. Prerequisite: introductory course in linguistics.

3-5 units, not given this year

#### **LINGUIST 180. From Languages to Information**

(Same as CS 124) Automated processing of less structured information: human language text and speech, web pages, social networks, genome sequences, with goal of automatically extracting meaning and structure. Methods include: string algorithms, automata and transducers, hidden Markov models, graph algorithms, XML processing. Applications such as information retrieval, text classification, social network models, machine translation, genomic sequence alignment, word meaning extraction, and speech recognition. Prerequisite: CS103, CS107, CS109.

3-4 units, Win (Jurafsky, D)

#### **LINGUIST 181. Grammar Engineering**

(Same as LINGUIST 281) Hands-on techniques for implementation of linguistic grammars, drawing on grammatical theory and engineering skills. The implementation of constraints in morphology, syntax, and semantics, working within a unification-based lexicalist framework. Focus is on developing small grammars for English and at least one other language. Prerequisite: basic syntactic theory or 120. No programming skills required.

1-4 units, Aut (Flickinger, D)

#### **LINGUIST 182. Computational Theories of Syntax**

(Same as LINGUIST 282) Salient features of modern syntactic theories, including HPSG, LFG, and TAG, motivated by computational concerns. Impact of work within these frameworks on the design of algorithms in computational linguistics, and its influence in both linguistics and computer science. Topics include: notions of unification; unification algorithms and their relation to linguistic theory; agenda-driven chart processing for analysis and synthesis; the interface with morphology, the lexicon, and semantics; and applications, notably machine translation.

3-4 units, Win (Kay, M)

#### **LINGUIST 185. Writing Systems in a Digital World**

(Same as LINGUIST 284A) Writing systems and their behaviors. Classification of scripts as alphabetic, syllabic, and ideographic; what features typically belong to each group. What can be considered an ideal script. Topics include: why Japanese writing is considered a complex system; the influence of Indian writing on other syllabic scripts; how writing systems extend their reach to new languages; linguistic insights by studying this process; the Unicode

standard; and font technology. Recommended: basic phonetics.

2-3 units, not given this year

#### **LINGUIST 188. Natural Language Understanding**

(Same as CS 224U, LINGUIST 288) Machine understanding of human language. Computational semantics (determination of word sense and synonymy, event structure and thematic roles, time, aspect, causation, compositional semantics, scopal operators), and computational pragmatics and discourse (coherence, coreference resolution, information packaging, dialogue structure). Theoretical issues, online resources, and relevance to applications including question answering and summarization. Prerequisites: one of LINGUIST 180 / CS 124 / CS 224N,S; and logic such as LINGUIST 130A or B, CS 157, or PHIL150).

3-4 units, Win (Jurafsky, D; MacCartney, W)

#### **LINGUIST 191. Linguistics and the Teaching of English as a Second/Foreign Language**

(Same as LINGUIST 291) Methodology and techniques for teaching languages, using concepts from linguistics and second language acquisition theory and research. Focus is on teaching English, but most principles and techniques applicable to any language. Optional 1-unit seminar in computer-assisted language learning. GER:DB-SocSci

4-5 units, Win (Hubbard, P; Rylance, C)

#### **LINGUIST 197. Undergraduate Research Seminar**

Research goals and methods in linguistics and related disciplines. Students work on a small project to define a focus for their linguistic studies and prepare for honors research. Presentations; final paper.

2 units, Win (Staff)

#### **LINGUIST 198. Honors Research**

1-15 units, Win (Staff), Spr (Staff)

#### **LINGUIST 199. Independent Study**

1-15 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

## **GRADUATE COURSES IN LINGUISTICS**

#### **LINGUIST 200. Foundations of Linguistic Theory**

Theories that have shaped contemporary linguistics; recurrent themes and descriptive practice.

4 units, not given this year

#### **LINGUIST 201. Advanced Introduction to Linguistics**

Primarily for graduate students. The leading ideas of linguistic description and argumentation. Fundamental representational notions in phonology, syntax, and semantics, and the place of these notions in wider linguistic analysis.

4 units, not given this year

#### **LINGUIST 205A. Phonetics**

(Same as LINGUIST 105) The study of speech sounds: how to produce them, how to perceive them, and their acoustic properties. The influence of production and perception systems on sound change and phonological patterns. Acoustic analysis and experimental techniques. Lab exercises. Prerequisite: 110 or equivalent, or consent of instructor.

4 units, Win (Sumner, M)

#### **LINGUIST 205B. Advanced Phonetics**

Prerequisite: LINGUIST 205A.

2-4 units, Aut (Sumner, M)

#### **LINGUIST 207. Seminar in Phonetics**

Topics vary. Previous topics include how variation is accommodated in current models of speech perception, and how perceptual models need to be altered to accommodate phonetic variation encountered by listeners. May be repeated for credit.

2-4 units, not given this year

#### **LINGUIST 210A. Phonology**

Introduction to phonological theory and analysis based on cross-linguistic evidence. Topics: phonological representations including features, syllables, metrical structure; phonological processes including assimilation and dissimilation; and phonological typology and universals; optimality theory.

4 units, Aut (Anttila, A)

#### **LINGUIST 210B. Advanced Phonology**

The phonological organization of the lexicon. Topics include lexical phonology, phonological subregularities, gradient phonotactics,

and lexical frequency effects.

*4 units, Win (Anttila, A)*

**LINGUIST 211. Metrics**

Principles of versification from a linguistic point of view. Traditional and optimality-theoretic approaches. The canonical system of English metrics, and its varieties and offshoots. The typology of metrical systems and its linguistic basis. The ideology of normative prosodic discourse in relation to changing poetic practice.

*1-4 units, Aut (Kiparsky, P)*

**LINGUIST 212A. Seminar in Phonology**

(Same as LINGUIST 112) Topics vary each year. Previous topics include variation in the phonology of words according to their contexts within larger expressions and the place of these phenomena in a theory of grammar. May be repeated for credit.

*2-4 units, not given this year*

**LINGUIST 212B. Seminar in Phonology**

May be repeated for credit.

*1-4 units, not given this year*

**LINGUIST 214. Phonology Workshop**

May be repeated for credit.

*1-2 units, not given this year*

**LINGUIST 215. Empirical Approaches to Morphosyntax**

Introduction into quantitative and statistical methodology of morphological and syntactic research. Overview of analytical techniques developed for language research in the statistical software package R. Theoretical discussions will be supplemented by examples from corpus-based and experimental studies in morphosyntax as well as by hands-on practical sessions

*2-4 units, Win (Kuperman, V)*

**LINGUIST 216. Morphology**

How morphology fits into the lexicon and how the lexicon fits into grammar. Inflection and word-formation: blocking, productivity, analogy. Morphological categories. The interaction of morphology with phonology within the lexicon: level-ordering, prosodic morphology. Review of English morphology and analysis of representative material from languages with richer morphologies.

*2-4 units, Spr (Anttila, A)*

**LINGUIST 217. Morphosyntax**

The role of morphology in grammar: how word structure serves syntax in the expression of meaning. Universal properties and typology of morphological categories; proposals towards their principled explanation in a restrictive theory of language.

*2-4 units, not given this year*

**LINGUIST 218. Seminar in Morphosyntax**

May be repeated for credit.

*2-4 units, not given this year*

**LINGUIST 219. Choosing a Variant**

(Same as LINGUIST 119) Assortment of cases (lexical and morphosyntactic) where two or more English expressions serve as alternatives, apparently differing only in stylistic value or sociolinguistic status; explores the semantic, discourse function, syntactic, prosodic, and processing factors that favor the choice of one variant over the other; and evaluates claims about the stylistic values and sociolinguistic status of the variants

*2-4 units, Win (Zwicky, A)*

**LINGUIST 221A. Foundations of English Grammar**

A systematic introduction to the formal analysis of English grammar using the framework of head-driven phrase structure grammar (HPSG). Topics: feature structure modeling, lexical and phrasal organization in terms of type hierarchies and constraint inheritance, clausal types, patterns of complementation, the auxiliary system, extraction dependencies, wh-constructions, and the syntax-semantics interface.

*1-4 units, not given this year*

**LINGUIST 221B. Studies in Universal Grammar**

Focus is on grammatical analysis of individual languages. Builds directly on the theoretical foundations presented in 221A. Topics vary each year.

*1-4 units, not given this year*

**LINGUIST 222A. Foundations of Syntactic Theory I**

The roles of the verb and the lexicon in the determination of sentence syntax and their treatment in modern grammatical theories.

Empirical underpinnings of core phenomena, including the argument/adjunct distinction, argument structure and argument realization, control and raising, operations on argument structure and grammatical function changing rules. Motivations for a lexicalist approach rooted in principles of lexical expression and subcategorization satisfaction. Prerequisite: 120 or permission of instructor.

*2-4 units, Aut (Levin, B)*

**LINGUIST 222B. Foundations of Syntactic Theory II**

The nature of unbounded dependency constructions and their treatment in modern grammatical theories. Filler-gap dependencies, island constraints, and the relation between grammar and processing. Prerequisite: 222A.

*2-4 units, Win (Wasow, T)*

**LINGUIST 223. Introduction to Minimalist Syntax**

Focus is on phrase structure, movement, functional categories, features, the nature of economy conditions, and parametric differences. More general issues of the architecture of the grammar and the nature of crosslinguistic variation.

*2-4 units, not given this year*

**LINGUIST 224A. Introduction to Formal Universal Grammar**

(Same as LINGUIST 124A) A formal model of universal grammar designed to explain crosslinguistic variation in syntactic structure: nonconfigurationality in Australian aboriginal languages, incorporation in native American languages and the Bantu languages of Africa, scrambling and head movement in European languages. Issues such as universal grammar design, and analytic problems from a variety of natural languages. Prerequisites: introduction to syntax and familiarity with logic or other symbolic systems, or consent of instructor.

*4 units, not given this year*

**LINGUIST 224B. Advanced Topics in Lexical Functional Grammar**

May be repeated for credit.

*1-4 units, not given this year*

**LINGUIST 225A. Seminar in Syntax**

*1-2 units, Spr (Sag, I)*

**LINGUIST 227C. Projects in Syntax**

Group research projects using quantitative syntactic data from texts, recordings, experiments, or historical records. Skills in extracting, graphically exploring, and analyzing naturalistic syntactic data, and in presenting results. May be repeated for credit. Prerequisite: 229A, B, or D, or equivalent.

*2-4 units, not given this year*

**LINGUIST 229A. Laboratory Syntax I**

Critiques of the empirical foundations of syntax. The roles of introspective, usage-based, experimental, and typological evidence. Modern methods of data collection and analysis used in syntax. Practical work with data sets. May be repeated for credit.

*1-4 units, not given this year*

**LINGUIST 229B. Laboratory Syntax II**

Hands-on use of methods for handling syntactic data, including corpus work on ecologically natural data and controlled experimental paradigms. Explanatory models of syntactic processing and their relation to theories of grammar. May be repeated for credit.

*1-4 units, not given this year*

**LINGUIST 229C. Laboratory Syntax III**

Hands-on use of methods for handling syntactic data, including corpus work on ecologically natural data and controlled experimental paradigms. Explanatory models of syntactic processing and their relation to theories of grammar. May be repeated for credit.

*1-4 units, not given this year*

**LINGUIST 229D. Empirical Syntax Research Seminar**

Recent work in syntax that employs data-rich methods like corpora and laboratory studies, emphasizing research by seminar participants. May be repeated for credit.

*1-2 units, not given this year*

**LINGUIST 230A. Introduction to Semantics and Pragmatics**

Conventional meaning and pragmatic enrichment, with special emphasis on the foundations of semantics and pragmatics, the central problems of the theory, the role of logic and model theory in semantic analysis, and interconnections with other aspects of language and communication.

*2-4 units, Win (Potts, C)*

**LINGUIST 230B. Semantics and Pragmatics**

Expands on 230A. Standard approaches to formal semantics (Montague grammar, DRT, and basic dynamic semantics). Analyses of semantic phenomena in these frameworks. Prerequisites: 230A; or combination of 130A and PHIL 150 and 160.

2-4 units, not given this year

**LINGUIST 232A. Lexical Semantics**

Introduction to issues in word meaning, focused primarily around verbs. Overview of the core semantic properties of verbs and the organization of the verb lexicon. Approaches to lexical semantic representation, including semantic role lists, proto-roles, and causal and aspectual theories of event conceptualization.

2-4 units, Spr (Levin, B)

**LINGUIST 232B. Seminar in Lexical Semantics: The Lexical Semantics of Nouns**

Exploration of those facets of meaning which affect the naming of entities and the grammatical properties of nouns. Topics covered include artifacts vs. natural kinds, the mass/count noun distinction, individuals vs. collectives, and Roschian categorization. Readings will provide theoretical, typological, psycholinguistic, and anthropological perspectives. May be repeated for credit with different content.

1-4 units, Win (Levin, B)

**LINGUIST 233. Introduction to Formal Pragmatics**

(Same as LINGUIST 133) (Graduate students register for 233.) Mechanism underlying language use and felicity intuitions. Formal models of discourse that incorporate many aspects of pragmatics such as presuppositions, speech acts, implicatures, relevance, optimality, and utility. Discussion of common ground, illocutionary acts, Gricean maxims and Neo-Gricean analysis, game and decision theory.

3-4 units, not given this year

**LINGUIST 234. Discourse Analysis**

The organization of language above the sentence level, and the manifestation of language in context. Practical experience in working with discourse data.

4 units, not given this year

**LINGUIST 235. Semantic Fieldwork**

Techniques for evidence from less well-studied languages within formal semantic theory. Semantic phenomena, and techniques for investigating them, including scope, quantifiers, pronouns, focus, tense, aspect, mood, evidentiality, and information structure. Practical work on a language.

2-4 units, not given this year

**LINGUIST 236. Seminar in Semantics: Lexical and Constructional Pragmatics**

Case studies in how reliable pragmatic meanings arise from the interactions between conventionalized content, speaker intentions, hearer expectations, and general pragmatic pressures. Emphasis on corpus and psycholinguistic methods. Potential topics: exclamatives, affective demonstratives, discourse particles, appositives, scalar terms, negation; progression of topics to be decided largely by the participants. May be repeated for credit.

1-4 units, Aut (Staff)

**LINGUIST 237. Seminar in Semantics: Semantics of Questions and Commands**

Semantics of interrogatives and imperatives; propositional semantics of declaratives. Research emphasizing the meaning of questions. May be repeated for credit.

1-4 units, not given this year

**LINGUIST 239. Semantics Research Seminar**

Presentation of ongoing research in semantics. May be repeated for credit.

1-2 units, Aut (Levin, B), Win (Levin, B), Spr (Staff)

**LINGUIST 240. Language Acquisition I**

(Same as LINGUIST 140) Processes of language acquisition in early childhood; stages in development; theoretical issues and research questions. Practical experience in data collection.

4 units, Aut (Clark, E)

**LINGUIST 241. Language Acquisition II**

Constructions and the lexicon. May be repeated for credit.

1-4 units, Spr (Clark, E)

**LINGUIST 242. Methods for Research in Language Acquisition**

Research methods in developmental psycholinguistics

4 units, not given this year

**LINGUIST 245. Experimental Design for Linguistics**

Hypothesis formation, confound avoidance, power, general methods, and analysis of results. Students complete a pilot experiment; write-up; peer review; presentation.

4 units, not given this year

**LINGUIST 247. Seminar in Psycholinguistics: Information-Theoretic Models of Language and Cognition**

(Same as PSYCH 227) Information theory and its relation to learning and to reference, meaning, and information encoding. Information-theoretic models of linguistic structure at the phonological, morphological, and syntactic levels, and the links between information theory and information structure/clause packaging. The role of uncertainty and uniform information density in sentence processing. May be repeated for credit.

3-4 units, Aut (Ramscar, M; Jurafsky, D)

**LINGUIST 250. Sociolinguistic Theory and Analysis**

Methods of modeling the patterned variation of language in society. Emphasis is on variation, its relation to social structure and practice, and its role in linguistic change. Intersection between quantitative and qualitative analysis, combining insights of sociology and linguistic anthropology with quantitative linguistic data. Prerequisite: graduate standing in Linguistics or consent of instructor.

4 units, Aut (Rickford, J)

**LINGUIST 251. Sociolinguistic Field Methods**

Strengths and weaknesses of the principal methods of data collection in sociolinguistics.

4 units, not given this year

**LINGUIST 252. Sociolinguistics and Pidgin Creole Studies**

(Same as LINGUIST 152) Introduction to pidgins and creoles, organized around the main stages in the pidgin-creole life cycle: pidginization, creolization, and decreolization. Focus is on transformations in the English language as it was transported from Britain to Africa, Asia, the Caribbean, and the Pacific. Resultant pidginized and creolized varieties such as Nigerian Pidgin English, Chinese Pidgin English, New Guinea Tok Pisin, Suriname Sranan, and the creole continua of Guyana, Jamaica, and Hawaii. Also French, Dutch, Portuguese, Chinook, Motu, and Sango.

2-4 units, not given this year

**LINGUIST 254. Sociolinguistics of Language Contact**

(Same as LINGUIST 154) The role of contact between speakers of different languages in processes of language borrowing, convergence, and shift. Attending both to linguistic aspects and social contexts, examine: second-language acquisition, bilingualism, code-switching, lexical and grammatical borrowing, first language attrition, language death, and the creation of new contact varieties such as jargons, mixed languages, pidgins, and creoles. Prerequisite: background in linguistics.

2-4 units, Spr (Rickford, J; Roberts, S)

**LINGUIST 255. Seminar in Sociolinguistics: Contact Linguistics**

Classical and recent works in contact linguistics including Weinreich, Tudgill, Winford. May be repeated for credit.

3-5 units, Win (Rickford, J)

**LINGUIST 257. Seminar in Sociolinguistics: Community Studies of Variation**

May be repeated for credit.

1-4 units, not given this year

**LINGUIST 258. Analysis of Variation**

The quantitative study of linguistic variability in time, space, and society emphasizing social constraints in variation. Hands-on work with variable data. Prerequisites: 105/205 and 250, or consent of instructor.

1-4 units, Spr (Eckert, P)

**LINGUIST 260A. Historical Morphology and Phonology**

Sound change and analogical change in the perspective of linguistic theory. Internal and comparative reconstruction.

4 units, not given this year

**LINGUIST 260B. Historical Morphosyntax**

Morphological and syntactic variation and change. Reanalysis, grammaticalization. The use of corpora and quantitative evidence.

2-4 units, Win (Kiparsky, P)

**LINGUIST 265. African American Vernacular English**

(Same as LINGUIST 65) The English vernacular spoken by African Americans in big city settings, and its relation to Creole English dialects spoken on the S. Carolina Sea Islands (Gullah), in the Caribbean, and in W. Africa. The history of expressive uses of African American English (in soundin' and rappin'), and its educational implications.

3-5 units, Win (Staff)

**LINGUIST 266. Vernacular English and Reading**

(Same as LINGUIST 66) Discusses some of the literature on the relation between use of vernacular English varieties (e.g. African American Vernacular English, Chicano English) and the development of literacy (especially in Standard English). But our primary focus is on improving the reading skills of African American and Latino students in local schools through the Reading Road program developed at the University of Pennsylvania. Students must commit to tutoring one or more elementary students weekly, using the program. L65 AAVE recommended, but not required.

4-5 units, Spr (Rickford, J)

**LINGUIST 270. The Arabic Language and Culture**

(Same as AMELANG 36, LINGUIST 170) Arabic language from historical, social, strategic, and linguistic perspectives. History of the Arabic language and the stability of classical Arabic over the last 15 centuries. Why the functionality of classical Arabic has not changed as Latin, Old English, and Middle English have. Social aspects of the Arabic language, Ferguson's notion of diglossia. The main varieties of Arabic, differences among them, and when and where they are spoken. Role of Arabic and culture in current world politics, culture, and economy. Linguistic properties of Arabic such as root-based morphology, lexical ambiguity, and syntactic structure relating it to current linguistic theories.

3 units, not given this year

**LINGUIST 272. Structure of Finnish**

Central topics in Finnish phonology/morphology and syntax/semantics and how they bear on current theoretical debates. Topics: stress; vowel harmony; clause structure; case; aspect; word order.

2-4 units, Win (Anttila, A; Kiparsky, P; Karttunen, L)

**LINGUIST 273. The Structure of Russian**

(Same as LINGUIST 173) A synchronic overview of contemporary standard Russian, including its sound system, word formation and grammatical structure. Emphasis is on problems presented by Russian for current linguistic theory. The acquisition of Russian as a first language.

2-4 units, not given this year

**LINGUIST 274A. Linguistic Field Methods**

(Same as ANTHRO 30, LINGUIST 174) Practical training in the collection and analysis of linguistic data from native speakers of a language largely unknown to the investigator. Documentation of endangered languages. Research goals, field trip preparation, ethics (including human subjects, cooperation with local investigators, and governmental permits), working in the community, technical equipment, and analytical strategies. Emphasis is on the use of recording devices and computers in collection and analysis. Prerequisite: introductory course in linguistics.

3-5 units, not given this year

**LINGUIST 274B. Field Methods II**

Continuation of 274A, with a focus on phonetic topics in a targeted language. Prerequisite: 274A or consent of instructor.

2-4 units, not given this year

**LINGUIST 277. Laboratory Methods in Psycholinguistics**

Issues that commonly arise in the design and implementation of linguistic experiments and in the statistical analysis of empirical results. Topics in experimental design include selection of stimuli, blocking, and power analysis and sample size calculation. How to fit and interpret statistical models using the multilevel regression and Bayesian inference, as implemented in software packages R and Bugs. Topics include interpretation of model coefficients for fixed and random effects, collinearity, model criticism, as well as comparison and reporting of models. Theoretical issues worked out

at lab sessions using examples from experiments and corpus studies, including those provided by students.

2-4 units, not given this year

**LINGUIST 278. Programming for Linguists**

Computer programming techniques for collecting and analyzing data in linguistic research. Introduction to the UNIX, regular expressions, and Python scripting. Hands-on experience gathering, formatting, and manipulating corpus, field, and experimental data, combining data from multiple sources, and working with existing tools. Knowledge of computer programming not required.

1-4 units, Aut (Potts, C)

**LINGUIST 280. Natural Language Processing**

(Same as CS 224N) Methods for processing human language information and the underlying computational properties of natural languages. Syntactic and semantic processing from linguistic and algorithmic perspectives. Focus is on modern quantitative techniques in NLP: using large corpora, statistical models for acquisition, translation, and interpretation; and representative systems. Prerequisites: CS124 or CS121/221.

3-4 units, Spr (Manning, C)

**LINGUIST 281. Grammar Engineering**

(Same as LINGUIST 181) Hands-on techniques for implementation of linguistic grammars, drawing on grammatical theory and engineering skills. The implementation of constraints in morphology, syntax, and semantics, working within a unification-based lexicalist framework. Focus is on developing small grammars for English and at least one other language. Prerequisite: basic syntactic theory or 120. No programming skills required.

1-4 units, Aut (Flickinger, D)

**LINGUIST 282. Computational Theories of Syntax**

(Same as LINGUIST 182) Salient features of modern syntactic theories, including HPSG, LFG, and TAG, motivated by computational concerns. Impact of work within these frameworks on the design of algorithms in computational linguistics, and its influence in both linguistics and computer science. Topics include: notions of unification; unification algorithms and their relation to linguistic theory; agenda-driven chart processing for analysis and synthesis; the interface with morphology, the lexicon, and semantics; and applications, notably machine translation.

3-4 units, Win (Kay, M)

**LINGUIST 284A. Writing Systems in a Digital World**

(Same as LINGUIST 185) Writing systems and their behaviors. Classification of scripts as alphabetic, syllabic, and ideographic; what features typically belong to each group. What can be considered an ideal script. Topics include: why Japanese writing is considered a complex system; the influence of Indian writing on other syllabic scripts; how writing systems extend their reach to new languages; linguistic insights by studying this process; the Unicode standard; and font technology. Recommended: basic phonetics.

2-3 units, not given this year

**LINGUIST 285. Speech Recognition and Synthesis**

(Same as CS 224S) Automatic speech recognition, speech synthesis, and dialogue systems. Focus is on key algorithms including noisy channel model, hidden Markov models (HMMs), Viterbi decoding, N-gram language modeling, unit selection synthesis, and roles of linguistic knowledge. Prerequisite: programming experience. Recommended: CS 221 or 229.

2-4 units, not given this year

**LINGUIST 286. Information Retrieval and Web Search**

(Same as CS 276) Text information retrieval systems; efficient text indexing; Boolean, vector space, and probabilistic retrieval models; ranking and rank aggregation; evaluating IR systems. Text clustering and classification: classification algorithms, latent semantic indexing, taxonomy induction; Web search engines including crawling and indexing, link-based algorithms, and web metadata. Prerequisites: CS 107, CS 109, CS 161.

3 units, Aut (Manning, C; Raghavan, P)

**LINGUIST 288. Natural Language Understanding**

(Same as CS 224U, LINGUIST 188) Machine understanding of human language. Computational semantics (determination of word sense and synonymy, event structure and thematic roles, time, aspect, causation, compositional semantics, scopal operators), and computational pragmatics and discourse (coherence, coreference resolution, information packaging, dialogue structure). Theoretical

issues, online resources, and relevance to applications including question answering and summarization. Prerequisites: one of LINGUIST 180 / CS 124 / CS 224N,S; and logic such as LINGUIST 130A or B, CS 157, or PHIL150).

3-4 units, Win (Jurafsky, D; MacCartney, W)

### **LINGUIST 289. Quantitative, Probabilistic, and Optimization-Based Explanation in Linguistics**

Capturing the soft constraints inherent in linguistic systems, based on quantitative evidence obtained from linguistic corpora. Computer tools for collecting and modeling data. Emphasis is on syntax.

3-4 units, not given this year

### **LINGUIST 291. Linguistics and the Teaching of English as a Second/Foreign Language**

(Same as LINGUIST 191) Methodology and techniques for teaching languages, using concepts from linguistics and second language acquisition theory and research. Focus is on teaching English, but most principles and techniques applicable to any language. Optional 1-unit seminar in computer-assisted language learning.

4-5 units, Win (Hubbard, P; Rylance, C)

### **LINGUIST 293. Research Seminar in Applied Linguistics**

(Same as EDUC 435X) For graduate students in the schools of Education and Humanities and Sciences who are engaged in research pertaining to applied linguistic topics in original research. Topics: language policies and planning, language and gender, writing and critical thinking, foreign language education, and social applications of linguistic science. (SSPEP)

1-4 units, not given this year

### **LINGUIST 294. Linguistic Research Discussion Group**

Restricted to first-year Linguistics Ph.D. students.

1 unit, Aut (Wasow, T)

### **LINGUIST 390. M.A. Project**

1-3 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

### **LINGUIST 394. TA Training Workshop**

For second-year graduate students in Linguistics

1 unit, Aut (Levin, B)

### **LINGUIST 395. Research Workshop**

Restricted to students in the doctoral program. Student presentations of research toward qualifying papers.

1-2 units, Spr (Wasow, T)

### **LINGUIST 395C. Research Workshop III**

Restricted to students in the doctoral program. Student presentations of research toward qualifying papers.

1-2 units, Sum (Staff)

### **LINGUIST 396. Research Projects in Linguistics**

Mentored research project for first-year graduate students in linguistics.

2-3 units, Win (Staff)

### **LINGUIST 397. Directed Reading**

1-15 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

### **LINGUIST 398. Directed Research**

1-15 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

### **LINGUIST 399. Dissertation Research**

1-15 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

## MANAGEMENT SCIENCE AND ENGINEERING (MS&E)

### UNDERGRADUATE COURSES IN MANAGEMENT SCIENCE AND ENGINEERING

#### **MS&E 22Q. The Flaw of Averages**

(S,Sem) Stanford Introductory Seminar. Uncertain assumptions in business and public policy are often replaced with single 'best guess' or average numbers. This leads to a fallacy as fundamental as the belief that the earth is flat, which I call the Flaw of Averages. It states, in effect, that: plans based on average assumptions

are wrong on average. This class will discuss mitigations of the flaw of averages using simulation and other methods from probability management.

3 units, Aut (Savage, S)

#### **MS&E 41. Financial Literacy**

Practical knowledge about personal finance and money management including budgeting, pay checks, credit cards, banking, insurance, taxes, and saving. Class especially appropriate for those soon to be self-supporting. Limited enrollment.

1 unit, Win (Morrison, M), Spr (Morrison, M)

#### **MS&E 52. Introduction to Decision Making in Organizations**

Experienced management consultants share lessons and war stories. Case studies, disguised examples from real engagements, and movie clips illustrate theories and concepts of decision analysis. Student teams critique decisions made in actual organizations. Topics include what makes a good decision, how decisions can be made better, framing and structuring techniques, modeling and analysis tools, biases and probability assessment, evaluation and appraisal methods, decision psychology, creativity and organizational leadership, and effective presentation styles. Not intended for MS&E majors.

3 units, Sum (Holtzman, S; Robinson, B)

#### **MS&E 92Q. International Environmental Policy**

(S,Sem) Stanford Introductory Seminar. Preference to sophomores. Science, economics, and politics of international environmental policy. Current negotiations on global climate change, including actors and potential solutions. Sources include briefing materials used in international negotiations and the U.S. Congress.

4 units, Win (Weyant, J)

#### **MS&E 93Q. Nuclear Weapons, Energy, Proliferation, and Terrorism**

(S,Sem) Stanford Introductory Seminar. Preference to sophomores. What are nuclear weapons; what do they do? How are they different from other weapons? What drives proliferation of nuclear weapons? Why do countries want them? Can they be eliminated? What about Iran and North Korea? What role does nuclear energy play? Can it help combat global climate change? What are the risks of nuclear terrorism? Recommended: a course in international relations, engineering, or physical science. GER:DB-EngrAppSci, DB-EngrAppSci

3 units, Spr (Hecker, S)

#### **MS&E 101. Undergraduate Directed Study**

Subject of mutual interest to student and faculty member. Prerequisite: faculty sponsor.

1-15 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

#### **MS&E 107. Interactive Management Science**

(Same as MS&E 207) Analytical techniques such as linear and integer programming, Monte Carlo simulation, forecasting, decision analysis, and Markov chains in the environment of the spreadsheet. Probability management. Materials include spreadsheet add-ins for implementing these and other techniques. Emphasis is on building intuition through interactive modeling, and extending the applicability of this type of analysis through integration with existing business data structures. GER:DB-EngrAppSci

3 units, Aut (Savage, S)

#### **MS&E 108. Senior Project**

Restricted to MS&E majors in their senior year. Students carry out a major project in groups of four, applying techniques and concepts learned in the major. Project work includes problem identification and definition, data collection and synthesis, modeling, development of feasible solutions, and presentation of results.

5 units, Win (Barley, S; Carlson, R; Katila, R; Shachter, R)

#### **MS&E 111. Introduction to Optimization**

(Same as ENGR 62) Formulation and analysis of linear optimization problems. Solution using Excel solver. Polyhedral geometry and duality theory. Applications to contingent claims analysis, production scheduling, pattern recognition, two-player zero-sum games, and network flows. Prerequisite: MATH 51. GER:DB-EngrAppSci

4 units, Spr (Van Roy, B)

#### **MS&E 112. Mathematical Programming and Combinatorial Optimization**

(Same as MS&E 212) Combinatorial and mathematical program-

ming (integer and non-linear) techniques for optimization. Topics: linear program duality and LP solvers; integer programming; combinatorial optimization problems on networks including minimum spanning trees, shortest paths, and network flows; matching and assignment problems; dynamic programming; linear approximations to convex programs; NP-completeness. Hands-on exercises. Prerequisites: CS 106A or X; ENGR 62 or MATH 103. GER:DB-EngrAppSci

3 units, given next year

#### **MS&E 120. Probabilistic Analysis**

Concepts and tools for the analysis of problems under uncertainty, focusing on model building and communication: structuring, processing, and presentation of probabilistic information. Examples from legal, social, medical, and physical problems. Spreadsheets illustrate and solve problems as a complement to analytical closed-form solutions. Topics: axioms of probability, probability trees, random variables, distributions, conditioning, expectation, change of variables, and limit theorems. Prerequisite: MATH 51. Recommended: knowledge of spreadsheets. GER:DB-EngrAppSci

5 units, Aut (Shachter, R)

#### **MS&E 121. Introduction to Stochastic Modeling**

Stochastic processes and models in operations research. Discrete and continuous time parameter Markov chains. Queuing theory, inventory theory, simulation. Prerequisite: 120 or Statistics 116. GER:DB-EngrAppSci

4 units, Win (Glynn, P)

#### **MS&E 130. Information Networks and Services**

Architecture of the Internet and performance engineering of computer systems and networks. Switching, routing and shortest path algorithms. Congestion management and queueing networks. Peer-to-peer networking. Wireless and mobile networking. Information service engineering and management. Search engines and recommendation systems. Reputation systems and social networking technologies. Security and trust. Information markets. Select special topics and case studies. Prerequisites: 111, 120, and CS 106A. GER:DB-EngrAppSci

3 units, Spr (Bambos, N)

#### **MS&E 134. Organizations and Information Systems**

(Same as MS&E 234) How information systems impact organizations and how organizations take control of information technology (IT) to gain a competitive edge. Topics include: IT components, architecture, and transformation; the effect of IT on competition; real-time enterprise; leadership; and outsourcing. Student teams perform field studies based on situations in which information technology is creating a significant management problem or business opportunity. Enrollment limited. Prerequisites: CS 106A, 180, or equivalents.

4 units, Win (Tabrizi, B)

#### **MS&E 140. Accounting for Managers and Entrepreneurs**

(Same as MS&E 240) Non-majors and minors who have taken or are taking elementary accounting should not enroll. Introduction to accounting concepts and the operating characteristics of accounting systems. The principles of financial and cost accounting, design of accounting systems, techniques of analysis, and cost control. Interpretation and use of accounting information for decision making. Designed for the user of accounting information and not as an introduction to a professional accounting career.

3-4 units, Win (Stanton, F), Spr (Stanton, F), Sum (Stanton, F)

#### **MS&E 142. Investment Science**

(Undergraduates register for 142.) Theory and application of modern quantitative investment analysis from an engineering perspective. How investment concepts are used to evaluate and manage opportunities, portfolios, and investment products including stocks, bonds, mortgages, and annuities. Topics: deterministic cash flows (term structure of interest rates, bond portfolio immunization, project optimization); mean-variance theory (Markowitz model, capital asset pricing); and arbitrage pricing theory. Group project. Limited enrollment. Prerequisites: 120, ENGR 60, MATH 51, or equivalents. Recommended: 140, ENGR 62, knowledge of spreadsheets.

3 units, Aut (Primbs, J)

#### **MS&E 152. Introduction to Decision Analysis**

(Same as MS&E 152W) How to make good decisions in a complex, dynamic, and uncertain world. People often make decisions

that on close examination they regard as wrong. Decision analysis uses a structured conversation based on actional thought to obtain clarity of action in a wide variety of domains. Topics: distinctions, possibilities and probabilities, relevance, value of information and experimentation, relevance and decision diagrams, risk attitude. Students seeking to fulfill the Writing in the Major requirement should register for MS&E 152W. GER:DB-EngrAppSci

3-4 units, Spr (Shachter, R)

#### **MS&E 152W. Introduction to Decision Analysis**

(Same as MS&E 152) How to make good decisions in a complex, dynamic, and uncertain world. People often make decisions that on close examination they regard as wrong. Decision analysis uses a structured conversation based on actional thought to obtain clarity of action in a wide variety of domains. Topics: distinctions, possibilities and probabilities, relevance, value of information and experimentation, relevance and decision diagrams, risk attitude. Students seeking to fulfill the Writing in the Major requirement should register for MS&E 152W. GER:DB-EngrAppSci, WIM

3-4 units, Spr (Shachter, R)

#### **MS&E 175. Innovation, Creativity, and Change**

Problem solving in organizations; creativity and innovation skills; thinking tools; creative organizations, teams, individuals, and communities. (Katila)

3-4 units, given next year

#### **MS&E 179. Innovation, Entrepreneurship, and Strategy**

Classic and contemporary views of core issues within technology-based firms and entrepreneurial economies.

4 units, Spr (Eesley, C)

#### **MS&E 180. Organizations: Theory and Management**

For undergraduates only; preference to MS&E majors. Classical and contemporary organization theory; the behavior of individuals, groups, and organizations. Limited enrollment. Students must attend first session.

4 units, Aut (Eisenhardt, K), Spr (Hinds, P)

#### **MS&E 181. Issues in Technology and Work for a Postindustrial Economy**

How changes in technology and organization are altering work and lives. Approaches to studying and designing work. How understanding work and work practices can assist engineers in designing better technologies and organizations. Topics include job design, distributed and virtual organizations, the blurring of boundaries between work and family life, computer supported cooperative work, trends in skill requirements and occupational structures, monitoring and surveillance in the workplace, downsizing and its effects on work systems, project work and project-based lifestyles, the growth of contingent employment, telecommuting, electronic commerce, and the changing nature of labor relations.

3 units, Spr (Barley, S)

#### **MS&E 184. Technology and Work**

Interplay between technology and work, emphasizing technological change and its impact on workers at all levels. Technologies include the assembly line, computer and information systems, cardiac surgery techniques, and advanced computational software. Motivations for and consequences of change, including rationalization, deskilling, reskilling, offshoring, and increasing abstraction of work.

3 units, not given this year

#### **MS&E 185. Global Work**

Issues, challenges, and opportunities facing workers, teams, and organizations working across national boundaries. Topics include geographic distance, time zones, language and cultural differences, technologies to support distant collaboration, team dynamics, and corporate strategy.

4 units, Spr (Siino, R)

#### **MS&E 189. Social Networks - Theory, Methods, and Applications**

Introduces students to the theoretical, substantive, and methodological foundations of social networks. The social network paradigm seeks to explain how social relations facilitate and constrain an actor's opportunities, behaviors, and cognitions. Topics include: network concepts and principles; network data collection, measurement, and analysis; and applications in management, engineering, and related disciplines.

3-4 units, Aut (Staff)

**MS&E 190. Methods and Models for Policy and Strategy Analysis**

Guest lectures by departmental practitioners. Emphasis is on links among theory, application, and observation. Environmental, national security, and health policy; marketing, new technology, and new business strategy analyses. Comparisons between domains and methods.

*3 units, Spr (Brandeau, M)*

**MS&E 193. Technology and National Security**

(Same as MS&E 193W, MS&E 293) The interaction of technology and national security policy from the perspective of history to implications for the new security imperative, homeland defense. Key technologies in nuclear and biological weapons, military platforms, and intelligence gathering. Policy issues from the point of view of U.S. and other nations. The impact of terrorist threat. Guest lecturers include key participants in the development of technology and/or policy. Students seeking to fulfill the WIM requirement should register for 193W.

*3 units, Aut (Perry, W; Hecker, S)*

**MS&E 193W. Technology and National Security**

(Same as MS&E 193, MS&E 293) The interaction of technology and national security policy from the perspective of history to implications for the new security imperative, homeland defense. Key technologies in nuclear and biological weapons, military platforms, and intelligence gathering. Policy issues from the point of view of U.S. and other nations. The impact of terrorist threat. Guest lecturers include key participants in the development of technology and/or policy. Students seeking to fulfill the WIM requirement should register for 193W. WIM

*3 units, Aut (Perry, W; Hecker, S)*

**MS&E 197. Ethics and Public Policy**

(Same as PUBLPOL 103B, STS 110) Ethical issues in science- and technology-related public policy conflicts. Focus is on complex, value-laden policy disputes. Topics: the nature of ethics and morality; rationales for liberty, justice, and human rights; and the use and abuse of these concepts in policy disputes. Case studies from biomedicine, environmental affairs, technical professions, communications, and international relations. GER:DB-Hum, EC-EthicReas, WIM

*5 units, Win (McGinn, R)*

**MS&E 198. Applied Modeling of Energy and Environmental Markets**

Economic principles in models of energy and environmental markets. Spreadsheet examples for developing insights and communicating with decision makers. Market-clearing conditions, controlling emissions through fees, diffusion of new technologies, resource depletion, cartel behavior, and model evaluation. Prerequisites: ECON 50 and spreadsheets, or consent of instructor.

*1 unit, Aut (Huntington, H)*

**GRADUATE COURSES IN MANAGEMENT SCIENCE AND ENGINEERING****MS&E 201. Dynamic Systems**

Goal is to think dynamically in decision making, and recognize and analyze dynamic phenomena in diverse situations. Concepts: formulation and analysis; state-space formulation; solutions of linear dynamic systems, equilibria, dynamic diagrams; eigenvalues and eigenvectors of linear systems, the concept of feedback; nonlinear dynamics, phase plane analysis, linearized analysis, Liapunov functions, catastrophe theory. Examples: grabber-holder dynamics, technology innovation dynamics, creation of new game dynamics in business competition, ecosystem dynamics, social dynamics, and stochastic exchange dynamics. Prerequisite: MATH 103 or equivalent.

*3-4 units, Spr (Tse, E)*

**MS&E 206. Art of Mathematical Modeling**

Practicum. Students build mathematical models of real-life, ill-framed problems. Emphasis is on framing the issues, articulating modeling components logically (drawing from student's mathematical background), and analyzing the resulting model. Hands-on modeling. Project work in small groups. Prerequisites: basic analysis, calculus and algebra, and probability theory. Recommended: decision analysis, optimization and dynamic systems.

*3-4 units, Spr (Kieffel, H)*

**MS&E 207. Interactive Management Science**

(Same as MS&E 107) Analytical techniques such as linear and integer programming, Monte Carlo simulation, forecasting, decision analysis, and Markov chains in the environment of the spreadsheet. Probability management. Materials include spreadsheet add-ins for implementing these and other techniques. Emphasis is on building intuition through interactive modeling, and extending the applicability of this type of analysis through integration with existing business data structures.

*3 units, Aut (Savage, S)*

**MS&E 208A. Practical Training**

MS&E students obtain employment in a relevant industrial or research activity to enhance professional experience, consistent with the degree program they are pursuing. Students submit a one-page statement showing relevance to degree program along with offer letter before the start of the quarter, and a 2-3 page final report documenting the work done and relevance to degree program at the conclusion of the quarter. Master's students are limited to one quarter of practical training. B.S. and Ph.D. students may take each of A, B, and C once.

*1 unit, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

**MS&E 208B. Practical Training**

MS&E students obtain employment in a relevant industrial or research activity to enhance professional experience, consistent with the degree program they are pursuing. Students submit a one-page statement showing relevance to degree program along with offer letter before the start of the quarter, and a 2-3 page final report documenting the work done and relevance to degree program at the conclusion of the quarter. Master's students are limited to one quarter of practical training. B.S. and Ph.D. students may take each of A, B, and C once.

*1 unit, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

**MS&E 208C. Practical Training**

MS&E students obtain employment in a relevant industrial or research activity to enhance professional experience, consistent with the degree program they are pursuing. Students submit a one-page statement showing relevance to degree program along with offer letter before the start of the quarter, and a 2-3 page final report documenting the work done and relevance to degree program at the conclusion of the quarter. Master's students are limited to one quarter of practical training. B.S. and Ph.D. students may take each of A, B, and C once.

*1 unit, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

**MS&E 211. Linear and Nonlinear Optimization**

Optimization theory and modeling. The role of prices, duality, optimality conditions, and algorithms in finding and recognizing solutions. Perspectives: problem formulation, analytical theory, computational methods, and recent applications in engineering, finance, and economics. Theories: finite dimensional derivatives, convexity, optimality, duality, and sensitivity. Methods: simplex and interior-point, gradient, Newton, and barrier. Prerequisite: MATH 51.

*3-4 units, Aut (Ye, Y)*

**MS&E 212. Mathematical Programming and Combinatorial Optimization**

(Same as MS&E 112) Combinatorial and mathematical programming (integer and non-linear) techniques for optimization. Topics: linear program duality and LP solvers; integer programming; combinatorial optimization problems on networks including minimum spanning trees, shortest paths, and network flows; matching and assignment problems; dynamic programming; linear approximations to convex programs; NP-completeness. Hands-on exercises. Prerequisites: CS 106A or X; ENGR 62 or MATH 103.

*3 units, given next year*

**MS&E 220. Probabilistic Analysis**

Concepts and tools for the analysis of problems under uncertainty, focusing on model building and communication: the structuring, processing, and presentation of probabilistic information. Examples from legal, social, medical, and physical problems. Spreadsheets illustrate and solve problems as a complement to analytical closed-form solutions. Topics: axioms of probability, probability trees, random variables, distributions, conditioning, expectation, change of variables, and limit theorems. Prerequisite: MATH 51. Recommended: knowledge of spreadsheets.

*3-4 units, Aut (Chiu, S)*

**MS&E 221. Stochastic Modeling**

Focus is on time-dependent random phenomena. Topics: discrete and continuous time Markov chains, renewal processes, queueing theory, and applications. Emphasis is on building a framework to formulate and analyze probabilistic systems. Prerequisite: 220 or consent of instructor.

3 units, Win (Johari, R)

**MS&E 223. Simulation**

Discrete-event systems, generation of uniform and non-uniform random numbers, Monte Carlo methods, programming techniques for simulation, statistical analysis of simulation output, efficiency-improvement techniques, decision making using simulation, applications to systems in computer science, engineering, finance, and operations research. Prerequisites: working knowledge of a programming language such as C, C++, Java, or FORTRAN; probability; and statistical methods.

3 units, Spr (Haas, P)

**MS&E 234. Organizations and Information Systems**

(Same as MS&E 134) How information systems impact organizations and how organizations take control of information technology (IT) to gain a competitive edge. Topics include: IT components, architecture, and transformation; the effect of IT on competition; real-time enterprise; leadership; and outsourcing. Student teams perform field studies based on situations in which information technology is creating a significant management problem or business opportunity. Enrollment limited. Prerequisites: CS 106A, 180, or equivalents.

4 units, Win (Tabrizi, B)

**MS&E 235. Internet Commerce**

The technology, mathematics, and economics of Internet commerce. Topics include: models of Internet commerce; online advertising; product recommendation systems and personalized marketing; pricing and delivery of digital media; web tools; piracy, copyright, and peer-to-peer networks; rating and reviewing of online businesses; and co-evolution of Internet technology and commerce. Hands-on exercises; group project. Prerequisites: 111 or 211, and CS 106B or X.

3 units, alternate years, not given this year

**MS&E 237. The Social Data Revolution: Data Mining and Electronic Business**

Hands-on exploration of current and emergent data sources and their impact on individuals, business and society; recommendation engines, reputation systems, social network analysis, and engagement metrics. Guest speakers, homework assignments and group projects (e.g., Twitter and Facebook apps) combine data strategy, machine learning, modern and traditional marketing, behavioral economics, and incentive design. Cases include Amazon.com, BestBuy, MySpace, Lufthansa, and startups. Prerequisites: intellectual curiosity, entrepreneurial spirit, some programming experience (details at [weigend.com/teaching](http://weigend.com/teaching)), and willingness to implement in the real world.

3 units, Spr (Staff)

**MS&E 238. Network Structures and Analysis**

The role of networks in social, technological, and economic systems. The impact of network structures on systems such as social networks including LinkedIn and Facebook; web pages and hyperlinks; buyers and sellers connected through a market; and towns connected by roads or airplane routes. Topics: graph and network analysis; epidemics on networks, the spread of fads, and tipping points; six degrees of separation and the small world phenomenon; power laws and their emergence; and network effects and externalities. Prerequisites: 220 and MATH 51.

3 units, alternate years, not given this year

**MS&E 239. Computational Advertising**

Computational, economic, and optimization issues in online advertising, in contexts including web search, social networks, web surfing, and online multimedia. Overview of scientific and engineering issues arising in building online advertising platforms for Internet advertising formats, as well as ad pricing, ad auctions, and ad optimization. Research frontiers of this young discipline. Limited enrollment. Prerequisites: elementary probability and linear algebra.

3 units, Aut (Staff)

**MS&E 240. Accounting for Managers and Entrepreneurs**

(Same as MS&E 140) Non-majors and minors who have taken or are taking elementary accounting should not enroll. Introduction to accounting concepts and the operating characteristics of accounting systems. The principles of financial and cost accounting, design of accounting systems, techniques of analysis, and cost control. Interpretation and use of accounting information for decision making. Designed for the user of accounting information and not as an introduction to a professional accounting career.

3-4 units, Win (Stanton, F), Spr (Stanton, F), Sum (Stanton, F)

**MS&E 241. Economic Analysis**

Principal methods of economic analysis of the production activities of firms, including production technologies, cost and profit, and perfect and imperfect competition; individual choice, including preferences and demand; and the market-based system, including price formation, efficiency, and welfare. Practical applications of the methods presented. See 341 for continuation of 241. Recommended: 211, ECON 50.

3-4 units, Win (Weber, T)

**MS&E 242. Investment Science**

Theory and application of modern quantitative investment analysis from an engineering perspective. How investment concepts are used to evaluate and manage opportunities, portfolios, and investment products including stocks, bonds, mortgages, and annuities. Topics: deterministic cash flows (term structure of interest rates, bond portfolio immunization, project optimization); mean-variance theory (Markowitz model, capital asset pricing); and arbitrage pricing theory. Group project. Prerequisites: 120, ENGR 60, MATH 51, or equivalents. Recommended: 140, ENGR 62, knowledge of spreadsheets. Limited enrollment.

3 units, Aut (Primbs, J)

**MS&E 242H. Investment Science Honors**

Concepts of modern quantitative finance and investments. Basic concepts under certainty including arbitrage, term structure of interest rates, and bond portfolio immunization. A situation of uncertainty in one period. Topics: arbitrage; theorems of asset pricing; pricing measures; derivative securities; applications and estimating of financial risk measures; mean-variance portfolio analysis; and equilibrium and the capital asset pricing model. Group projects involving financial market data. Enrollment limited. Prerequisites: basic probability, statistics, and economics such as MS&E 120, 121, MATH 51, ENGR 60, or equivalents. No prior knowledge of finance required.

3 units, Aut (Giesecke, K)

**MS&E 242S. Investment Science**

Emphasis is on a cash flow approach. Topics include deterministic cash flow analysis (time value of money, present value, internal rate of return, taxes, inflation), fixed income securities, duration and bond portfolio immunization, term structure of interest rates (spot rates, discount factors, forward rates), Fisher-Weill duration and immunization, capital budgeting, dynamic optimization problems, investments under uncertainty, mean-variance portfolio theory, capital asset pricing, and basic options theory. Goal is to create a link between engineering analysis and business decision making.

3 units, Sum (Feinstein, C)

**MS&E 243. Energy and Environmental Policy Analysis**

(Same as IPER 243) Concepts, methods, and applications. Energy/environmental policy issues such as automobile fuel economy regulation, global climate change, research and development policy, and environmental benefit assessment. Group project. Prerequisite: MS&E 241 or ECON 50, 51.

3 units, Spr (Sweeney, J)

**MS&E 245G. Finance for Non-MBAs**

(Same as ECON 135) For graduate students and advanced undergraduates. The foundations of finance; applications in corporate finance and investment management. Financial decisions made by corporate managers and investors with focus on process valuation. Topics include criteria for investment decisions, valuation of financial assets and liabilities, relationships between risk and return, market efficiency, and the valuation of derivative securities. Corporate financial instruments including debt, equity, and convertible securities. Equivalent to core MBA finance course, FINANCE 220. Prerequisites: ECON 51, or ENGR 60, or equivalent; ability

to use spreadsheets, and basic probability and statistics concepts including random variables, expected value, variance, covariance, and simple estimation and regression.

3-5 units, Aut (Admati, A)

#### MS&E 246. Game Theory with Engineering Applications

Strategic interactions among multiple decision makers emphasizing applications to engineering systems. Topics: efficiency and fairness; collective decision making and cooperative games; static and dynamic noncooperative games; and complete and incomplete information models. Competition: Bertrand, Cournot, and Stackelberg models. Mechanism design: auctions, contracts. Examples from engineering problems. Prerequisites: MATH 51 and exposure to probability such as 120 or EE 178. Recommended: 211, concurrent enrollment in 241 or ECON 202.

3 units, Win (Erhun Oguz, F)

#### MS&E 247S. International Investments

International financial markets, their comparative behavior and interrelations. Focus is on assets traded in liquid markets: currencies, equities, bonds, swaps, and derivatives. Topics: institutional arrangements, taxation and regulation, international arbitrage and parity conditions, valuation of target firms for cross-border acquisitions, direct foreign investment, international diversification and portfolio management, derivative instruments and dynamic investment strategies, international performance analysis, international capital flows and financial crises, and topics of current relevance and importance.

3 units, Sum (Fu, Y)

#### MS&E 248. Economics of Natural Resources

Intertemporal economic analysis of natural resource use, particularly energy, and including air, water, and other depletable mineral and biological resources. Emphasis is on an integrating theory for depletable and renewable resources. Stock-flow relationships; optimal choices over time; short- and long-run equilibrium conditions; depletion/extinction conditions; market failure mechanisms (common-property, public goods, discount rate distortions, rule-of-capture); policy options. Prerequisite: 241 or ECON 51.

3-4 units, Aut (Sweeney, J)

#### MS&E 249. Economic Growth and Development

What generates economic growth. Emphasis is on theory accompanied by intuition, illustrated with country cases. Topics: the equation of motion of an economy; optimal growth theory; calculus of variations and optimal control approaches; deriving the Euler and Pontryaguine equations from economic reasoning. Applications: former planned economies in Russia and E. Europe; the financial crises in E. Asia and Argentina; a comparative study of India and China. The links between economic growth and civilization; the causes of the rise and decline of civilizations; lessons for the future.

3 units, Sum (De La Grandville, O)

#### MS&E 250A. Engineering Risk Analysis

The techniques of analysis of engineering systems for risk management decisions involving trade-offs (technical, human, environmental aspects). Elements of decision analysis; probabilistic risk analysis (fault trees, event trees, systems dynamics); economic analysis of failure consequences (human safety and long-term economic discounting); and case studies such as space systems, nuclear power plants, and medical systems. Public and private sectors. Prerequisites: ENGR 60 or equivalent, probability, and decision analysis.

3 units, Win (Pate-Cornell, E)

#### MS&E 250B. Project Course in Engineering Risk Analysis

Students, individually or in groups, choose, define, formulate, and resolve a real risk management problem, preferably from a local firm or institution. Oral presentation and report required. Scope of the project is adapted to the number of students involved. Three phases: risk assessment, communication, and management. Emphasis is on the use of probability for the treatment of uncertainties and sensitivity to problem boundaries. Limited enrollment. Prerequisites: MS&E 250A and consent of instructor.

3 units, Spr (Pate-Cornell, E)

#### MS&E 251. Stochastic Decision Models

Efficient formulation and computational solution of sequential decision problems under uncertainty. Markov decision chains and stochastic programming. Maximum expected present value and

rate of return. Optimality of simple policies: myopic, linear, index, acceptance limit, and (s,S). Optimal stationary and periodic infinite-horizon policies. Applications to investment, options, overbooking, inventory, production, purchasing, selling, quality, repair, sequencing, queues, capacity, transportation. MATLAB is used. Prerequisites: probability, linear programming.

3 units, not given this year

#### MS&E 252. Decision Analysis I: Foundations of Decision Analysis

Coherent approach to decision making, using the metaphor of developing a structured conversation having desirable properties, and producing actional thought that leads to clarity of action. Socratic instruction; computational problem sessions. Emphasis is on creation of distinctions, representation of uncertainty by probability, development of alternatives, specification of preference, and the role of these elements in creating a normative approach to decisions. Information gathering opportunities in terms of a value measure. Relevance and decision diagrams to represent inference and decision. Principles are applied to decisions in business, technology, law, and medicine. See 352 for continuation.

3-4 units, Aut (Howard, R)

#### MS&E 254. The Ethical Analyst

The ethical responsibility for consequences of professional analysts who use technical knowledge in support of any individual, organization, or government. The means to form ethical judgments; questioning the desirability of physical coercion and deception as a means to reach any end. Human action and relations in society in the light of previous thought, and research on the desired form of social interactions. Attitudes toward ethical dilemmas through an explicit personal code.

1-3 units, Spr (Howard, R)

#### MS&E 255A. Decision Systems I

(Formerly MS&E 451.) Professional tools and techniques for designing decision systems that help when facing decisions such as buying a car, bidding on the Internet, hiring NFL players, making charitable donations, or choosing medical treatment. Demonstrations; small project. Topics: automatic decision diagram formulation, decision-class analysis, and dynamic sensitivity analysis. No programming required. Recommended: 252 or equivalent.

2-3 units, Win (Holtzman, S)

#### MS&E 255B. Decision Systems II

(Formerly MS&E 452.) Students design a system to help business, consumer, medical, or other decision makers. Previous student teams have designed systems for auction bidding, cancer treatment, sailing tactics, automobile purchasing, network design, Mars exploration, flu treatment, platoon tactics, high-tech manufacturing, and oil-and-gas exploration. No programming required. Satisfies MS&E project course requirement. Prerequisite: 252 or equivalent. Recommended: 255A.

3 units, not given this year

#### MS&E 256. Technology Assessment and Regulation of Medical Devices

(Formerly 475.) Regulatory approval and reimbursement for new medical technologies as a key component of product commercialization. The regulatory and payer environment in the U.S. and abroad, and common methods of health technology assessment. Framework to identify factors relevant to adoption of new medical devices, and the management of those factors in the design and development phases. Case studies; guest speakers from government (FDA) and industry.

1-3 units, Spr (Pietzsch, J)

#### MS&E 260. Introduction to Operations Management

Operations management focuses on the effective planning, scheduling, and control of manufacturing and service entities. This course introduces students to a broad range of key issues in operations management. Topics include determination of optimal facility location, production planning, optimal timing and sizing of capacity expansion, and inventory control. Prerequisites: basic probability and optimization.

3-4 units, Aut (Erhun Oguz, F), Sum (Staff)

#### MS&E 261. Inventory Control and Production Systems

Topics in the planning and control of manufacturing systems. The functions of inventory, determination of order quantities and safety stocks, alternative inventory replenishment systems, item forecast-

ing, production-inventory systems, materials requirements planning (MRP), just-in-time systems, master and operations scheduling, supply chain management, and service operations. Limited enrollment. Prerequisite: 120, or STATS 116, or equivalent.

3 units, Win (Hausman, W)

#### **MS&E 262. Supply Chain Management**

Definition of a supply chain; coordination difficulties; pitfalls and opportunities in supply chain management; inventory/service tradeoffs; performance measurement and incentives. Global supply chain management; mass customization; supplier management. Design and redesign of products and processes for supply chain management; tools for analysis; industrial applications; current industry initiatives. Enrollment limited to 50. Prerequisite: 260 or 261.

3 units, Spr (Hausman, W)

#### **MS&E 264. Sustainable Product Development and Manufacturing**

Strategies and techniques for development of sustainable products and manufacturing processes. Topics: strategic decisions in new product development when environmental and resource externalities are accounted for; effect of regulatory requirements on ability of a firm to achieve its business objectives; contributions of sustainable products/processes to the firm's competitive advantage and operational efficiency and to enabling entrepreneurial opportunities; industrial ecology and life cycle analysis techniques in integrating traditional product development requirements with those of the environment and society. Maybe repeatable for credit once.

3 units, Aut (Rafinejad, D)

#### **MS&E 265. Supply Chain Logistics**

Student teams redesign the manufacturing and distribution system of a medium-sized manufacturer. Focus is on the transportation system, inventory policies for a regional warehouse, design of a national distribution system, improvements of work flow, and layout of the manufacturing plant. The redesign is at a detailed operational level consistent with a strategy of integrating the functions of manufacturing and distribution. Analytical and game software is used. Knowledge of inventory theory, linear/integer programming, economic analysis, and applied probability is required. Emphasis is on group learning. Limited enrollment. Prerequisites: senior or graduate standing, 160, ENGR 60 and 62, or consent of instructor.

4 units, alternate years, not given this year

#### **MS&E 266. Management of New Product Development**

Techniques of managing or leading the process of new product development that have been found effective. Emphasis is placed on how much control is desirable and how that control can be exercised in a setting where creativity has traditionally played a larger role than discipline. Topics: design for manufacturability, assessing the market, imposing discipline on the new product development process, selecting the appropriate portfolio of new product development projects, disruptive technology, product development at internet speed, uncertainty in product development, role of experimentation in new product development, creating an effective development organization, and developing products to hit cost targets.

3 units, Win (Carlson, R)

#### **MS&E 267. Supply Chain Risk and Flexibility Management**

Methods and analytic tools for quantifying and managing the impact of uncertainty in supply and demand on the operating and financial performance of firms and networks of firms. Design and delivery of products and services to provide competitive differentiation by enabling cost, value, risk and flexibility to be balanced and managed across supply networks. Case study applications by leading companies to procurement, manufacturing, outsourcing, and sales relationships. Tools, processes, and internal crossfunctional coordination required to operationalize approaches in core planning and execution systems and processes. Prerequisite: 262.

3 units, Spr (Johnson, B)

#### **MS&E 268. Operations Strategy**

The development and implementation of the operations functional strategy. The integration of operations strategy with business and corporate strategies of a manufacturing-based firm. Topics: types and characteristics of manufacturing technologies, quality man-

agement, capacity planning and facilities choice, organization and control of operations, and operations' role in corporate strategy. Prerequisites: 260 or 261, or equivalent experience.

3 units, Spr (Carlson, R)

#### **MS&E 270. Strategy in Technology-Based Companies**

For graduate students only. Introduction to the basic concepts of strategy, with emphasis on high technology firms. Topics: competitive positioning, resource-based perspectives, co-opetition and standards setting, and complexity/evolutionary perspectives. Limited enrollment.

3-4 units, Aut (Eisenhardt, K), Win (Katila, R)

#### **MS&E 271. Global Entrepreneurial Marketing**

Skills needed to market new technology-based products to customers around the world. Case method discussions. Cases include startups and global high tech firms. Course themes: marketing toolkit, targeting markets and customers, product marketing and management, partners and distribution, sales and negotiation, and outbound marketing. Team-based take-home final exam. Limited enrollment.

4 units, Win (Kosnik, T; Novitsky, D; Ramfelt, L; Smith, L), Spr (Kosnik, T; Novitsky, D; Ramfelt, L; Smith, L)

#### **MS&E 273. Technology Venture Formation**

Open to graduate students interested in high-technology entrepreneurship. The process of starting venture scale high-tech businesses. Assessing opportunities, sizing markets, evaluating sales channels, developing R&D and operations plans, raising venture capital, managing legal issues, and building a team. Teaching team includes entrepreneurs, venture capitalists, and guest speakers. Student teams write a business plan and make a formal presentation to a group of first tier venture capitalists. Enrollment limited. Recommended: 140, 270, 271, 272, or equivalent.

3-4 units, Aut (Lyons, M; MacLean, A)

#### **MS&E 274. Dynamic Entrepreneurial Strategy**

Primarily for graduate students. How entrepreneurial strategy focuses on creating structural change or responding to change induced externally. Grabber-holder dynamics as an analytical framework for developing entrepreneurial strategy to increase success in creating and shaping the diffusion of new technology or product innovation dynamics. Topics: First mover versus follower advantage in an emerging market; latecomer advantage and strategy in a mature market; strategy to break through stagnation; and strategy to turn danger into opportunity. Modeling, case studies, and term project.

3 units, Win (Tse, E)

#### **MS&E 276. Entrepreneurial Management**

For graduate students only with a preference for engineering and science majors. Emphasis on managing high-growth ventures, especially those based on technology products and services. Students develop a set of skills and approaches to becoming effective entrepreneurial managers. Topics include turning opportunities into reality, raising capital and financial management, venture operations and organizational administration, handling growth and adversity. Limited enrollment. Prerequisites: MS&E 140 and ENGR 60, or equivalents.

3 units, Spr (Byers, T; Lin, P)

#### **MS&E 277. Creativity and Innovation**

Factors that promote and inhibit creativity of individuals, teams, and organizations. Creativity tools, assessment metrics, and exercises; workshops, field trips, and case studies. Each student completes an individual creativity portfolio and participates in a long-term team project. Enrollment limited to 32. See <http://creativity.stanford.edu>.

4 units, Spr (Seelig, T)

#### **MS&E 278. The Spirit of Entrepreneurship**

Students meet before and after MS&E 472 to prepare for and debrief after the sessions.

3 units, Aut (Blank, S), Win (Blank, S)

#### **MS&E 279. Social Capital and Entrepreneurship**

Creation and use of social capital in organizations with emphasis on entrepreneurial firms. Social relations, networks, and institutions provide firms with access to important resources and are often critical for new ventures' growth and survival. The mechanisms through which social capital affects performance; the benefits and detriments of social capital; and strategies to effectively devel-

op and maintain social capital.

3-4 units, Win (Staff)

**MS&E 280. Organizational Behavior: Evidence in Action**

Organization theory; concepts and functions of management; behavior of the individual, work group, and organization. Emphasis is on cases and related discussion. Enrollment limited; priority to MS&E students.

3-4 units, Win (Sutton, R)

**MS&E 282. Innovation and Implementation in Complex Organizations**

The difficulty of moving new ideas through large organizations. Executives from large companies describe cases; student teams analyze the cases and provide recommendations. Final project. Enrollment limited to 12. Prerequisites: master's standing and consent of instructors.

3 units, not given this year

**MS&E 285. Negotiation**

(Same as CEE 151, CEE 251, ME 207) Negotiation styles and processes to help students conduct and review negotiations. Workshop format integrating intellectual and experiential learning. Exercises, presentations, live and field examples, and individual and small group reviews. Application required before first day of class; see Coursework.

3 units, Aut (Christensen, S), Spr (Christensen, S)

**MS&E 287. Treating Business Practices as Prototypes**

Multidisciplinary. Students work in teams to apply the design process to practices such as talent management, organizational design, or communication with external stakeholders in organizations that may include a software firm, a professional services firm, and an airline, and treat the targeted practices as prototypes. Experience in collaboration and design. Limited enrollment.

3-4 units, Win (Sutton, R; Dunn, D)

**MS&E 288. Creating Infectious Action**

Offered by the d.school. Teams of master's students from disciplines including engineering, design, business, behavioral sciences, and education attempt to spread positive behavior through projects that include spreading the adoption of the Firefox web browser, applying methods from hip hop to fuel the spread of fads, and spreading financially responsible individual behavior. Industry experts and academics provide guidance.

3-4 units, not given this year

**MS&E 289. Designing for Sustainable Abundance**

Achieving material abundance while reducing material extraction and waste. Increasing recycling and material re-use. Designing for more emotionally durable connections between products and owners. Product and systems considerations of sustainability.

3-4 units, Spr (Dunn, D; Waisberg, N)

**MS&E 292. Health Policy Modeling**

Primarily for master's students; also open to undergraduates and doctoral students. The application of mathematical, statistical, economic, and systems models to problems in health policy. Areas include: disease screening, prevention, and treatment; assessment of new technologies; bioterrorism response; and drug control policies.

3 units, Win (Brandeau, M)

**MS&E 293. Technology and National Security**

(Same as MS&E 193, MS&E 193W) The interaction of technology and national security policy from the perspective of history to implications for the new security imperative, homeland defense. Key technologies in nuclear and biological weapons, military platforms, and intelligence gathering. Policy issues from the point of view of U.S. and other nations. The impact of terrorist threat. Guest lecturers include key participants in the development of technology and/or policy. Students seeking to fulfill the WIM requirement should register for 193W.

3 units, Aut (Perry, W; Hecker, S)

**MS&E 294. Climate Policy Analysis**

Design and application of formal analytical methods in climate policy development. Issues include instrument design, technology development, resource management, multiparty negotiation, and dealing with complexity and uncertainty. Links among art, theory, and practice. Emphasis is on integrated use of modeling tools from diverse methodologies and requirements for policy making appli-

cation. Recommended: background in economics, optimization, and decision analysis.

3 units, Win (Weyant, J), alternate years, not given next year

**MS&E 295. Energy Policy Analysis**

Design and application of formal analytical methods for policy and technology assessments of energy efficiency and renewable energy options. Emphasis is on integrated use of modeling tools from diverse methodologies and requirements for policy and corporate strategy development. Recommended: background in economics, optimization, and decision analysis.

3 units, alternate years, not given this year

**MS&E 296. Sustainable Mobility: Improving Energy Efficiency and Reducing CO2 Emissions from Transport**

Issues of sustainable mobility, vehicles, fuels, air pollution, and CO2 emissions from transport. Primarily focused on the U.S. passenger transport system; some attention to freight transport, and to Europe and key developing countries. Tools of analysis primarily spreadsheets, but applications using econometrics encouraged for the class project. Problem sets; project.

3 units, Spr (Schipper, L)

**MS&E 299. Designing A Free Society**

Ethical theory, feasibility, and desirability of a social order in which coercion by individuals and government is minimized and people pursue ends on a voluntary basis. Topics: efficacy and ethics; use rights for property; contracts and torts; spontaneous order and free markets; crime and punishment based on restitution; guardian-ward theory for dealing with incompetents; the effects of state action-hypothesis of reverse results; applications to help the needy, armed intervention, victimless crimes, and environmental protection; transition strategies to a voluntary society.

1-3 units, Win (Howard, R)

**MS&E 300. Ph.D. Qualifying Tutorial or Paper**

Restricted to Ph.D. students assigned tutorials as part of the MS&E Ph.D. qualifying process. Enrollment optional.

1-3 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**MS&E 301. Dissertation Research**

Prerequisite: doctoral candidacy.

1-15 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**MS&E 310. Linear Programming**

Formulation of standard linear programming models. Theory of polyhedral convex sets, linear inequalities, alternative theorems, and duality. Variants of the simplex method and the state of art interior-point algorithms. Sensitivity analyses, economic interpretations, and primal-dual methods. Relaxations of harder optimization problems and recent convex conic linear programs. Applications include game equilibrium facility location. Prerequisite: MATH 113 or consent of instructor.

3 units, Aut (Ye, Y)

**MS&E 311. Optimization**

Applications, theories, and algorithms for finite-dimensional linear and nonlinear optimization problems with continuous variables. Elements of convex analysis, first- and second-order optimality conditions, sensitivity and duality. Algorithms for unconstrained optimization, and linearly and nonlinearly constrained problems. Modern applications in communication, game theory, auction, and economics. Prerequisites: MATH 113, 115, or equivalent.

3 units, Win (Ye, Y)

**MS&E 312. Advanced Methods in Numerical Optimization**

(Same as CME 334) Topics include interior-point methods, relaxation methods for nonlinear discrete optimization, sequential quadratic programming methods, optimal control and decomposition methods. Topic chosen in first class; different topics for individuals or groups possible. Individual or team projects. May be repeated for credit.

3 units, not given this year

**MS&E 313. Vector Space Optimization**

Optimization theory from the unified framework of vector space theory: treating together problems of mathematical programming, calculus of variations, optimal control, estimation, and other optimization problems. Emphasis is on geometric interpretation. Duality theory. Topics: vector spaces including function spaces; Hilbert space and the projection theorem; dual spaces and the separating hyperplane theorem; linear operators and adjoints; optimization of

functionals, including theory of necessary conditions in general spaces, and convex optimization theory; constrained optimization including Fenchel duality theory. Prerequisite: MATH 115.

*3 units, alternate years, not given this year*

**MS&E 314. Linear and Conic Optimization with Applications** (Same as CME 336) Linear, semidefinite, conic, and convex non-linear optimization problems as generalizations of classical linear programming. Algorithms include the interior-point, barrier function, and cutting plane methods. Related convex analysis, including the separating hyperplane theorem, Farkas lemma, dual cones, optimality conditions, and conic inequalities. Complexity and/or computation efficiency analysis. Applications to combinatorial optimization, sensor network localization, support vector machine, and graph realization. Prerequisite: MS&E 211 or equivalent.

*3 units, alternate years, not given this year*

**MS&E 315. Numerical Optimization**

(Same as CME 304) Solution of nonlinear equations; unconstrained optimization; linear programming; quadratic programming; global optimization; general linearly and nonlinearly constrained optimization. Theory and algorithms to solve these problems. Prerequisite: background in analysis and numerical linear algebra.

*3 units, Win (Murray, W)*

**MS&E 316. Discrete Mathematics and Algorithms**

(Same as CME 305) Topics: enumeration such as Cayley's theorem and Prufer codes, SDR, flows and cuts (deterministic and randomized algorithms), probabilistic methods and random graphs, asymptotics (NP-hardness and approximation algorithms). Topics illustrated with EE, CS, and bioinformatics applications. Prerequisites: MATH 51 or 103 or equivalents.

*3 units, Win (Saber, A)*

**MS&E 318. Large-Scale Numerical Optimization**

(Same as CME 338) The main algorithms and software for constrained optimization emphasizing the sparse-matrix methods needed for their implementation. Iterative methods for linear equations and least squares. Interior methods. The simplex method. Factorization and updates. The reduced-gradient, augmented Lagrangian, and SQP methods. Recommended: MS&E 310, 311, 312, 314, or 315; CME 108 or 302.

*3 units, Spr (Saunders, M)*

**MS&E 319. Approximation Algorithms**

Combinatorial and mathematical programming techniques to derive approximation algorithms for NP-hard optimization problems. Possible topics include: greedy algorithms for vertex/set cover; rounding LP relaxations of integer programs; primal-dual algorithms; semidefinite relaxations. May be repeated for credit. Prerequisites: 112 or CS 161.

*3 units, alternate years, not given this year*

**MS&E 321. Stochastic Systems**

Topics in stochastic processes, emphasizing applications. Markov chains in discrete and continuous time; Markov processes in general state space; Lyapunov functions; regenerative process theory; renewal theory; martingales, Brownian motion, and diffusion processes. Application to queueing theory, storage theory, reliability, and finance. Prerequisites: 221 or STATS 217; MATH 113, 115. (Glynn)

*3 units, Win (Glynn, P)*

**MS&E 322. Stochastic Calculus and Control**

Ito integral, existence and uniqueness of solutions of stochastic differential equations (SDEs), diffusion approximations, numerical solutions of SDEs, controlled diffusions and the Hamilton-Jacobi-Bellman equation, and statistical inference of SDEs. Applications to finance and queueing theory. Prerequisites: 221 or STATS 217; MATH 113, 115.

*3 units, Aut (Glynn, P), alternate years, not given next year*

**MS&E 323. Stochastic Simulation**

Emphasis is on the theoretical foundations of simulation methodology. Generation of uniform and non-uniform random variables. Discrete-event simulation and generalized semi-Markov processes. Output analysis (autoregressive, regenerative, spectral, and stationary times series methods). Variance reduction techniques (anti-thetic variables, common random numbers, control variables, discrete-time, conversion, importance sampling). Stochastic optimization (likelihood ratio method, perturbation analysis, stochastic

approximation). Simulation in a parallel environment. Prerequisite: MS&E 221 or equivalent.

*3 units, alternate years, not given this year*

**MS&E 325. Topics in Stochastic Optimization**

Algorithms for optimization problems with inputs from a known probability distribution or a known class of probability distributions. Topics: Markov decision processes; optimization with sparse priors; multi-armed bandit problems and the Gittins' index; regret bounds for multi-armed bandit problems; stochastic knapsack and the adaptivity gap; budgeted learning; adversarial queueing theory; stochastic scheduling and routing; stochastic inventory problems; multi-stage and multi-objective stochastic optimization. Prerequisites: MS&E 221 or equivalent; and MS&E 212 or CS 261 or equivalent.

*3 units, alternate years, not given this year*

**MS&E 332. Security and Risk in Computer Networks**

Risk management of large scale computing and networking systems with respect to security, data integrity, performance collapse, and service disruption. Qualitative and analytical basis for assessment, modeling, control, and mitigation of network risks. Stochastic risk models. Contact process. Random fields on networks. Virus and worm propagation dynamics and containment. Denial of service attacks. Intruder detection technologies. Distributed network attacks and countermeasures. Disaster recovery networks. Network protection services and resource placement. Autonomic self-defending networks. Economics of risk management. Emphasis is on analytics and quantitative methods.

*3 units, not given this year*

**MS&E 334. Computation of Equilibria**

Topics: Sperner's lemma, fixed point theorems, and existence of Nash and Market equilibria. Alternate convex and linear complementarity program formulations. Combinatorial algorithms. Complexity classes related to fixed points theorems and reductions to equilibrium problems. Similar solutions in cooperative game theory and fair division.

*3 units, not given this year*

**MS&E 335. Queuing Systems and Processing Networks**

Advanced stochastic modeling and control of systems involving queueing and scheduling operations. Stability analysis of queueing systems. Key results on single queues and queueing networks. Controlled queueing systems. Dynamic routing and scheduling in processing networks. Applications to modeling, analysis and performance engineering of computing systems, communication networks, flexible manufacturing, and service systems. Prerequisite: 221 or equivalent.

*3 units, Aut (Bambos, N)*

**MS&E 336. Topics in Game Theory with Engineering Applications**

Seminar. Recent research applying economic methods to engineering problems. Recent topics include: incentives in networked systems; mechanism design in engineered systems; and dynamics and learning in games. Prerequisites: mathematics at the level of MATH 115; game theory at the level of 246 or ECON 203; probability at the level of 220; optimization at the level of 211. May be repeated for credit.

*3 units, Spr (Johari, R)*

**MS&E 337. Information Networks**

(Same as CME 337) Network structure of the Internet and the web. Modeling, scale-free graphs, small-world phenomenon. Algorithmic implications in searching and inter-domain routing; the effect of structure on performance. Game theoretic issues, routing games, and network creation games. Security issues, vulnerability, and robustness. Prerequisite: basic probability and graph theory.

*3 units, Spr (Saber, A), alternate years, not given next year*

**MS&E 338. Advanced Topics in Information Science and Technology**

Advanced material in this area is sometimes taught for the first time as a topics course. Prerequisite: consent of instructor.

*3 units, not given this year*

**MS&E 339. Approximate Dynamic Programming**

Approximation algorithms for large-scale dynamic programming. Real-time dynamic programming and reinforcement learning algorithms. Generalizations of value iteration, policy iteration, and linear programming approaches. Recent research topics. Prerequisite:

site: 251, 351, CS 221, CS 228, or CS 229.

3 units, Aut (Van Roy, B)

### **MS&E 341. Advanced Economic Analysis**

Builds on 241 concepts. Market structure and industrial organization (oligopoly, strategic behavior of firms, game theoretic models); economics of uncertainty; general equilibrium theory and economic efficiency (formulation, Walras' Law, existence, uniqueness, duality between efficiency and general equilibrium; trade); intertemporal equilibrium and asset markets; public goods, externalities. Background for advanced economics. Prerequisite: 241.

3 units, Spr (Weber, T), alternate years, not given next year

### **MS&E 342. Advanced Investment Science**

Topics: forwards and futures contracts, continuous and discrete time models of stock price behavior, geometric Brownian motion, Ito's lemma, basic options theory, Black-Scholes equation, advanced options techniques, models and applications of stochastic interest rate processes, and optimal portfolio growth. Computational issues and general theory. Teams work on independent projects. Prerequisite: 242.

3 units, Win (Luenberger, D)

### **MS&E 343. Optimal Control Theory with Applications in Economics**

Classical and nonclassical optimal control applications in economics. Necessary and sufficient optimality conditions: maximum principle and HJB equation. Applications: single-person decision problems such as dynamic pricing, investment, marketing, and harvesting of renewable resources; multi-agent games such as dynamic oligopolies with open and closed-loop equilibria, capital accumulation, and dynamic pricing; and design of economic mechanisms such as screening contracts, regulation, and auctions. Prerequisites: course in dynamic systems and multivariable calculus.

3 units, not given this year

### **MS&E 344. Applied Information Economics**

The strategic acquisition, pricing, transfer, and use of information. Theoretical findings applied to real-world settings. Topics: optimal risk bearing, adverse selection, signaling, screening, nonlinear and state-contingent pricing, design of contests, incentives and organizations, strategic information transmission, long-run relationships, negative information value, research and invention, leakage and espionage, imperfect competition, information sharing, search and advertising, learning, and real-option exercise games. Prerequisites: 211, 220, 241. Recommended: 341.

3 units, not given this year

### **MS&E 345. Advanced Topics in Financial Engineering**

Derivative pricing theory from an engineering perspective. Underlying principles that apply to all derivative securities; general frameworks to model and price derivative securities on equities, interest rates, and credit. Topics in hedging and risk management. Prerequisites: derivative pricing and stochastic differential equations; and 220, 221, 242, 342, or consent of instructor. Recommended: Matlab. (Primbs)

3 units, Win (Primbs, J)

### **MS&E 347. Credit Risk: Modeling and Management**

Credit risk modeling, valuation, and hedging emphasizing underlying economic, probabilistic, and statistical concepts. Point processes and their compensators. Structural, incomplete information and reduced form approaches. Single name products: corporate bonds, equity, equity options, credit and equity default swaps, forwards and swaptions. Multiname modeling: index and tranche swaps and options, collateralized debt obligations. Implementation, calibration and testing of models. Industry and market practice. Data and implementation driven group projects that focus on problems in the financial industry. Prerequisites: stochastic processes at the level of MSE 321, 322 or equivalent, and financial engineering at the level of MSE 342, MATH 180, MATH 240, FINANCE 622 or equivalent

3 units, Spr (Giesecke, K)

### **MS&E 348. Optimization of Uncertainty and Applications in Finance**

How to make optimal decisions in the presence of uncertainty, solution techniques for large-scale systems resulting from decision problems under uncertainty, and applications in finance. Decision

trees, utility, two-stage and multi-stage decision problems, approaches to stochastic programming, model formulation; large-scale systems, Benders and Dantzig-Wolfe decomposition, Monte Carlo sampling and variance reduction techniques, risk management, portfolio optimization, asset-liability management, mortgage finance. Projects involving the practical application of optimization under uncertainty to financial planning.

3 units, Win (Infanger, G)

### **MS&E 349. Capital Deployment**

Methods for efficiently allocating capital among alternatives, constructing business plans, determining the value of risky projects, and creating alternatives that enhance value. Prerequisites: 242, 342.

3 units, Spr (Luenberger, D), alternate years, not given next year

### **MS&E 351. Dynamic Programming and Stochastic Control**

Markov population decision chains in discrete and continuous time. Risk posture. Present value and Cesaro overtaking optimality. Optimal stopping. Successive approximation, policy improvement, and linear programming methods. Team decisions and stochastic programs; quadratic costs and certainty equivalents. Maximum principle. Controlled diffusions. Examples from inventory, overbooking, options, investment, queues, reliability, quality, capacity, transportation. MATLAB. Prerequisites: MATH 113, 115; Markov chains; linear programming.

3 units, not given this year

### **MS&E 352. Decision Analysis II: Professional Decision Analysis**

How to organize the decision conversation, the role of the decision analysis cycle and the model sequence, assessing the quality of decisions, framing decisions, the decision hierarchy, strategy tables for alternative development, creating spare and effective decision diagrams, biases in assessment, knowledge maps, uncertainty about probability. Sensitivity analysis, approximations, value of revelation, joint information, options, flexibility, bidding, assessing and using corporate risk attitude, risk sharing and scaling, and decisions involving health and safety. See 353 for continuation. Prerequisite: 252.

3-4 units, Win (Howard, R)

### **MS&E 353. Decision Analysis III: Frontiers of Decision Analysis**

The concept of decision composite; probabilistic insurance and other challenges to the normative approach; the relationship of decision analysis to classical inference and data analysis procedures; the likelihood and exchangeability principles; inference, decision, and experimentation using conjugate distributions; developing a risk attitude based on general properties; alternative decision aiding practices such as analytic hierarchy and fuzzy approaches. Student presentations on current research. Goal is to prepare doctoral students for research. Prerequisite: 352.

3 units, Spr (Howard, R)

### **MS&E 355. Influence Diagrams and Probabilistic Networks**

Network representations for reasoning under uncertainty: influence diagrams, belief networks, and Markov networks. Structuring and assessment of decision problems under uncertainty. Learning from evidence. Conditional independence and requisite information. Node reductions. Belief propagation and revision. Simulation. Linear-quadratic-Gaussian decision models and Kalman filters. Dynamic processes. Bayesian meta-analysis. Prerequisites: 220, 252, or equivalents, or consent of instructor.

3 units, Win (Shachter, R), alternate years, not given next year

### **MS&E 361. Supply Chain Optimization**

Characterization and computation of optimal and nearly optimal multiperiod supply chain policies with known or uncertain demands using dynamic, lattice, network, and convex and concave programming. Cooperation: sharing benefits of alliances. Competition. Leontief-substitution and network-flow models. Lattice programming: comparison of optima; existence and comparison of equilibria of non-cooperative games. Stochastic comparison. Invariant properties of optimal flows: graphical optimization of supply chains. Optimality of myopic policies. Prerequisites: MATH 115, optimization theory, probability.

3 units, not given this year

**MS&E 362. Advanced Models in Production and Operations**

The design and operation of production-inventory systems. Topics include production scheduling, capacity planning, sequencing, assembly-line balancing, dynamic scheduling, and multigoal optimizations. Readings primarily from journal articles. Prerequisite: 260.

*3 units, alternate years, not given this year*

**MS&E 364. Multi-echelon Inventory Models**

Theoretical treatment of control problems arising in inventory management, production, and distribution systems. Inventory control for single and multi-location systems. Emphasis is on operating characteristics, performance measures, and optimal operating and control policies. Dynamic programming and applications in inventory control. Prerequisite: STATS 217 or equivalent, linear programming.

*3 units, Spr (Hausman, W), alternate years, not given next year*

**MS&E 365. Advanced Models in Operations Management**

Primarily for doctoral students. Content varies. Topics based on recent literature and working papers. May be repeated for credit. Prerequisite: MS&E 246.

*3 units, Win (Erhun Oguz, F)*

**MS&E 371. Innovation and Strategic Change**

Doctoral research seminar, limited to Ph.D. students. Current research on innovation strategy. Topics: scientific discovery, innovation search, organizational learning, evolutionary approaches, and incremental and radical change. Topics change yearly. Recommended: course in statistics or research methods.

*2-3 units, Win (Katila, R)*

**MS&E 372. Entrepreneurship Doctoral Research Seminar**

Classic and current research on entrepreneurship. Limited enrollment, restricted to PhD students. Prerequisites: SOC 363 or equivalent, and permission of instructor.

*3 units, Spr (Eesley, C)*

**MS&E 374. Dynamic Corporate Strategy**

Restricted to Ph.D. students. Research on the creation and shaping of disruptive industry dynamics and how companies can formulate and implement strategies to excel in such changing environments. Dynamic system model approach; case studies. Prerequisites: 201 or equivalent, 274.

*3 units, not given this year*

**MS&E 376. Strategy Doctoral Research Seminar**

Classic and current research on business and corporate strategy. Limited enrollment, restricted to PhD students. Prerequisites: SOC 363 or equivalent, and permission of instructor.

*3 units, Aut (Eisenhardt, K)*

**MS&E 380. Doctoral Research Seminar in Organizations**

Limited to Ph.D. students. Topics from current published literature and working papers. Content varies. Prerequisite: consent of instructor.

*3 units, not given this year*

**MS&E 381A. Doctoral Research Seminar in Work, Technology, and Organization: Theoretical Underpinnings**

Enrollment limited to Ph.D. students. Topics from current published literature and working papers. Content varies. Prerequisite: consent of instructor.

*2-3 units, Win (Barley, S)*

**MS&E 381B. Doctoral Research Seminar in Work, Technology, and Organization: The Study of Work**

Enrollment limited to Ph.D. students. Topics from current published literature and working papers. Prerequisite: consent of instructor.

*2-3 units, not given this year*

**MS&E 381C. Doctoral Research Seminar in Work, Technology, and Organization: The Study of Technology**

Enrollment limited to Ph.D. students. Topics from current literature and working papers. Prerequisite: consent of instructor.

*2-3 units, not given this year*

**MS&E 383. Doctoral Seminar on Ethnographic Research**

For graduate students; upper-level undergraduates with consent of instructor. Ethnosemantic interviewing and participant observation. Techniques for taking, managing, and analyzing field notes and other qualitative data. 15 hours per week outside class collecting

and analyzing own data. Methods texts and ethnographies offer examples of how to analyze and communicate ethnographic data.

Prerequisite: consent of instructor. (Barley)

*3 units, not given this year*

**MS&E 384. Groups and Teams**

Research on groups and teams in organizations from the perspective of organizational behavior and social psychology. Topics include group effectiveness, norms, group composition, diversity, conflict, group dynamics, temporal issues in groups, geographical-distributed teams, and intergroup relations.

*3 units, Win (Hinds, P)*

**MS&E 389. Seminar on Organizational Theory**

(Same as EDUC 375A, SOC 363A) The social science literature on organizations assessed through consideration of the major theoretical traditions and lines of research predominant in the field.

*5 units, Aut (Powell, W)*

**MS&E 390. Doctoral Research Seminar in Health Systems Modeling**

Restricted to PhD students, or by consent of instructor. Doctoral research seminar covering current topics in health policy, health systems modeling, and health innovation. May be repeated for credit.

*1-3 units, Aut (Brandeau, M), Win (Brandeau, M), Spr (Brandeau, M)*

**MS&E 406. Mathematical Modeling Seminar**

Mathematical modeling issues in participants' current research. Topics such as modularity, variable endogenization, parameter estimation, and orders of effect. Students share their models for discussion. Limited enrollment. Recommended: 206.

*1 unit, alternate years, not given this year*

**MS&E 408. Directed Reading and Research**

Directed study and research on a subject of mutual interest to student and faculty member. Prerequisite: faculty sponsor. (Staff)

*1-15 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

**MS&E 444. Investment Practice**

Theory of real options, soft derivatives, and related ideas. Problems from financial engineering and risk management. Examples from industry. Small group projects formulate and design solutions to actual industry problems. Enrollment limited to 30.

*3-4 units, Spr (Giesecke, K)*

**MS&E 445. Projects in Wealth Management**

Recent theory and standard practice in portfolio design for institutions, individuals, and funds. Student projects and case studies derived from the financial industry.

*3-4 units, Spr (Woehrmann, P)*

**MS&E 446. Policy and Economics Research Roundtable (PERR)**

Research in progress or contemplated in policy and economics areas. Emphasis depends on research interests of participants, but is likely to include energy, environment, transportation, or technology policy and analysis. May be repeated for credit.

*1 unit, Aut (Sweeney, J), Win (Sweeney, J), Spr (Sweeney, J)*

**MS&E 450. Lessons in Decision Making**

Entrepreneurs, senior management consultants, and executives from Fortune 500 companies share real-world stories and insights from their experience in decision making.

*1 unit, Spr (Howard, R)*

**MS&E 452. Decision Analysis Projects: Helping Real Leaders Make Real Decisions**

A virtual consulting firm directed by professional decision analysts who offer advice and guidance as student teams help local organizations make a current business strategy or public policy decision. Projects for businesses, governments, or other institutions typically include start-up venture funding, R&D portfolio planning, new product or market entry, acquisition or partnering, cost reduction, program design, or regulatory policy decisions. Emphasis is on developing clarity of action and delivering insights to clients. Satisfies MS&E project course requirement. Prerequisite: 252. Recommended: 352.

*3 units, Spr (Robinson, B)*

**MS&E 453. Decision Analysis Applications: Business Strategy and Public Policy**

How decision analysis is used to make decisions in organizations. Who applies these methods to what decisions, and when, where, and why. Case studies: entrepreneurial ventures, consulting projects, litigation, chip manufacturing, consumer electronics, Corvette design, blockbuster movies, R&D priorities, real estate portfolios, HIV/HCV drug trial design, cancer diagnostics, Mars contamination, oil E&P, economics and energy pricing, nuclear waste, climate change, marine resources, bioterrorism preparedness, nuclear weapons control, effective interactions, and ethics. Corequisite: MS&E 252 recommended.

2-3 units, Aut (Robinson, B)

**MS&E 454. Decision Analysis Seminar**

Current research and related topics presented by doctoral students and invited speakers. May be repeated for credit. Prerequisite: 252.

1 unit, Aut (Howard, R), Win (Howard, R), Spr (Howard, R)

**MS&E 464. Global Project Coordination**

Students engage in projects that are global in nature, and related to the planning, design, and operations of supply chains, marketing, manufacturing, and product development. Project teams from Stanford and an overseas university work on common projects using telephones, faxes, email, Internet, video conferences, and face-to-face meetings. As part of the project, students travel to Hong Kong. Applications due in November. See <http://www.stanford.edu/class/msande464/>.

3-4 units, Win (Chiu, S)

**MS&E 472. Entrepreneurial Thought Leaders' Seminar**

Entrepreneurial leaders share lessons from real-world experiences across entrepreneurial settings. ETL speakers include entrepreneurs, leaders from global technology companies, venture capitalists, and best-selling authors. Half-hour talks followed by half hour of class interaction. Required web discussion. May be repeated for credit.

1 unit, Aut (Byers, T; Seelig, T), Win (Byers, T; Seelig, T; Kosnik, T), Spr (Byers, T; Seelig, T; Kosnik, T)

**MS&E 485A. Introduction to Crosscultural Design**

Preparation for 485B. Workshop and initial project work in teams.

1-2 units, Win (Hinds, P; Barry, M)

**MS&E 485B. Crosscultural Design**

The design of products and services for a global world. How to design products or services to be used across cultures; how to design for a culture other than one's own; and how the process of design is approached in different cultures. Prerequisite: 485A.

3-4 units, Spr (Hinds, P; Barry, M)

**MS&E 491. Real-World Clean Energy Project Development**

Student teams prepare and present a development plan for a clean energy project of their choice, specifying the resource, technology, market, end-use, and policy and regulatory factors. Management plan and financial and economic evaluation. Readings and presentations on topics in clean energy. Guest speakers involved in project development.

3 units, Spr (Borison, A; Hamm, G)

**MASTER OF LIBERAL ARTS (MLA)**

Exclusively for students in the MLA program.

**MLA 9. European Thought and Culture in the 19th Century**

Major European thinkers and writers and their intellectual significance from the Enlightenment to modernism. Works by Voltaire, Austen, Wordsworth, Marx, Nietzsche, and Freud.

4 units, not given this year

**MLA 96. Ethics, Science and Technology: Issues and Controversies**

4 units, not given this year

**MLA 97. The Individual in a Globalized World: Identity and Ethics for the 21st Century**

4 units

**MLA 100E. MLA Natural Science Elective**

1-2 units, Aut (Paulson, L), Win (Staff), Spr (Paulson, L), Sum (Paulson, L)

**MLA 100N. MLA Science Elective**

1-2 units, Sum (Staff)

**MLA 101A. Foundations I**

Required of and limited to first-year MLA students. First of three quarter foundation course. Introduction to the main political, philosophical, literary, and artistic trends that inform the liberal arts vision of the world and that underlie the MLA curriculum.

4 units, Aut (Steidle, E)

**MLA 101B. Foundations II: the Middle Ages and Renaissance.**

Required of and limited to first-year MLA students. Second of three quarter foundation course. Introduction to the main political, philosophical, literary, and artistic trends that inform the liberal arts vision of the world and that underlie the MLA curriculum.

4 units, Win (Steidle, E)

**MLA 101C. Foundations III: the Enlightenment through Modernism**

Required of and limited to first-year MLA students. First of three quarter foundation course. Introduction to the main political, philosophical, literary, and artistic trends that inform the liberal arts vision of the world and that underlie the MLA curriculum.

4 units, Spr (Junkerman, C)

**MLA 102. The Plague: An Introduction to Interdisciplinary Graduate Study**

Limited to and required of second-year MLA students. The historical, literary, artistic, medical, and theological issues raised by the plague in history and the present. Focus is on skills and information needed to pursue MLA graduate work at Stanford: writing a critical, argumentative graduate paper; conducting library research; expectations of seminar participation. Readings include Homer, Thucydides, Camus, Mann, Kushner, and sacred, scientific, and historical writings.

4 units, Aut (Paulson, L)

**MLA 262. The Economics of Life and Death**

4 units, Spr (Bhattacharya, J)

**MLA 267. Wicked Witches of the West**

Workshop-style seminar. How powerful women are depicted in classical Greek tragedy and Shakespeare. Comparisons of plays. Thematic, textual, and historical issues; theatrical practice. Sources include films if available. Scene and direction work.

4 units, Aut (Friedlander, L)

**MLA 269. The Meaning of Life: Moral and Spiritual Inquiry through Literature**

4 units, Aut (McLennan, W)

**MLA 398. MLA Thesis in Progress**

Group meetings provide peer critiques, motivations, and advice under the direction of the Associate Dean.

0 units, Aut (Paulson, L), Win (Paulson, L), Spr (Paulson, L), Sum (Paulson, L)

**MLA 399. MLA Thesis Final Quarter**

Students write a 75-100 page thesis that evolves out of work they pursued during their MLA studies.

4 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Paulson, L)

**MATERIALS SCIENCE AND ENGINEERING (MATSCI)****UNDERGRADUATE COURSES IN MATERIALS SCIENCE AND ENGINEERING****ATSCI 70N. Building the Future: Invention and Innovation with Engineering Materials**

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. The technological importance of materials in human civilization is captured in historical names such as the Stone, Bronze, and Iron Ages. The present Information Age could rightly be called the Silicon Age. The pivotal roles of materials in the development of new technologies. Quantitative problem sets, field trips, and formal presentations of small-group projects. GER:DB-EngrAppSci

5 units, Spr (Bravman, J)

**MATSCI 100. Undergraduate Independent Study**

Independent study in materials science under supervision of a faculty member.

1-3 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**MATSCI 150. Undergraduate Research**

Participation in a research project.

3-6 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**MATSCI 151. Microstructure and Mechanical Properties**

(Same as MATSCI 251) Primarily for students without a materials background. Mechanical properties and their dependence on microstructure in a range of engineering materials. Elementary deformation and fracture concepts, strengthening and toughening strategies in metals and ceramics. Topics: dislocation theory, mechanisms of hardening and toughening, fracture, fatigue, and high-temperature creep. Prerequisite: ENGR 50 or equivalent. GER:DB-EngrAppSci

3-4 units, Aut (Dauskardt, R)

**MATSCI 152. Electronic Materials Engineering**

Materials science and engineering for electronic device applications. Kinetic molecular theory and thermally activated processes; band structure and electrical conductivity of metals and semiconductors; intrinsic and extrinsic semiconductors; diffusion; elementary p-n junction theory; operating principles of metal-oxide-semiconductor field effect transistors. Semiconductor processing including crystal growth, oxidation kinetics, ion implantation, thin film deposition, etching, and photolithography. Prerequisite: ENGR 50 or equivalent. GER:DB-EngrAppSci

4 units, Spr (Staff)

**MATSCI 153. Nanostructure and Characterization**

The structure of materials at the nanoscale is in most cases the same crystalline form as the natural phase. Structures of materials such as semiconductors, ceramics, metals, and nanotubes; classification of these materials according to the principles of crystallography. Primary methods of structural characterization, X-ray diffraction, and electron microscopy; their applications to study such nanostructures. GER:DB-EngrAppSci

4 units, Win (Sinclair, R)

**MATSCI 154. Solid State Thermodynamics**

The principles of thermodynamics and relationships between thermodynamic variables. Equilibrium in thermodynamic systems. Thermodynamics of multicomponent systems. GER:DB-EngrAppSci

4 units, Aut (Barnett, D)

**MATSCI 155. Nanomaterials Synthesis**

The science of synthesis of nanometer scale materials. Examples including solution phase synthesis of nanoparticles, the vapor-liquid-solid approach to growing nanowires, formation of mesoporous materials from block-copolymer solutions, and formation of photonic crystals. Relationship of the synthesis phenomena to the materials science driving forces and kinetic mechanisms. Materials science concepts including capillarity, Gibbs free energy, phase diagrams, and driving forces. GER:DB-EngrAppSci

4 units, Spr (Clemens, B)

**MATSCI 156. Solar Cells, Fuel Cells, and Batteries: Materials for the Energy Solution**

(Same as MATSCI 256) Operating principles and applications of emerging technological solutions to the energy demands of the world. The scale of global energy usage and requirements for possible solutions. Basic physics and chemistry of solar cells, fuel cells, and batteries. Performance issues, including economics, from the ideal device to the installed system. The promise of materials research for providing next generation solutions. GER:DB-EngrAppSci

3-4 units, Aut (Clemens, B)

**MATSCI 157. Quantum Mechanics of Nanoscale Materials**

Introduction to quantum mechanics and its application to the properties of materials. The Schrödinger equation, uncertainty principle, bound states and periodic potentials, angular momentum, quantum statistics, and perturbation theory. Applications to electronic band structure in semiconductors, metals, and nanostructures; vibrational properties of solids; light/matter interaction and lasers; bonding; magnetic materials; nanotechnology. Prerequisites: working knowledge of calculus and high school physics. GER:DB-EngrAppSci

4 units, Win (Lindenberg, A)

**MATSCI 159Q. Japanese Companies and Japanese Society**

(S,Sem) (Same as ENGR 159Q) Stanford Introductory Seminar. Preference to sophomores. The structure of a Japanese company from the point of view of Japanese society. Visiting researchers from Japanese companies give presentations on their research enterprise. The Japanese research ethic. The home campus equivalent of a Kyoto SCTI course. GER:DB-SocSci

3 units, Spr (Sinclair, R)

**MATSCI 160. Nanomaterials Laboratory**

Preference to sophomores and juniors. Hands-on approach to synthesis and characterization of nanoscale materials. How to make, pattern, and analyze the latest nanotech materials, including nanoparticles, nanowires, and self-assembled monolayers. Techniques such as soft lithography, self-assembly, and surface functionalization. The VLS mechanism of nanowire growth, nanoparticle size control, self-assembly mechanisms, and surface energy considerations. Laboratory projects. Enrollment limited to 24. GER:DB-EngrAppSci

4 units, Spr (Melosh, N)

**MATSCI 161. Nanocharacterization Laboratory**

(Same as MATSCI 171) The development of standard lab procedures for materials scientists emphasizing microscopy, metallography, and technical writing. Techniques: optical, scanning-electron, atomic-force microscopy; and metallographic specimen preparation. The relationships among microscopic observation, material properties, and processing. Prerequisite: ENGR 50 or equivalent. GER:DB-EngrAppSci, WIM

3-4 units, Spr (McGehee, M)

**MATSCI 162. X-Ray Diffraction Laboratory**

(Same as MATSCI 172) Experimental x-ray diffraction techniques for microstructural analysis of materials, emphasizing powder and single-crystal techniques. Diffraction from epitaxial and polycrystalline thin films, multilayers, and amorphous materials using medium and high resolution configurations. Determination of phase purity, crystallinity, relaxation, stress, and texture in the materials. Advanced experimental x-ray diffraction techniques: reciprocal lattice mapping, reflectivity, and grazing incidence diffraction. Enrollment limited to 20. GER:DB-EngrAppSci

3-4 units, Win (Vailionis, A)

**MATSCI 163. Mechanical Behavior Laboratory**

(Same as MATSCI 173) Experimental techniques for the study of the mechanical behavior of engineering materials in bulk and thin film form, including tension testing, nanoindentation, and wafer curvature stress analysis. Metallic and polymeric systems. Prerequisite: ENGR 50. GER:DB-EngrAppSci

3-4 units, Aut (Han, S)

**MATSCI 164. Electronic and Photonic Materials and Devices Laboratory**

Lab course. Current electronic and photonic materials and devices. Device physics and micro-fabrication techniques. Students design, fabricate, and perform physical characterization on the devices they have fabricated. Established techniques and materials such as photolithography, metal evaporation, and Si technology; and novel ones such as soft lithography and organic semiconductors. Prerequisite: 152 or 199 or consent of instructor. GER:DB-EngrAppSci, WIM

4 units, Aut (Salleo, A)

**MATSCI 190. Organic and Biological Materials**

(Same as MATSCI 210) Unique physical and chemical properties of organic materials and their uses. The relationship between structure and physical properties, and techniques to determine chemical structure and molecular ordering. Examples include liquid crystals, dendrimers, carbon nanotubes, hydrogels, and biopolymers such as lipids, protein, and DNA. Prerequisite: Thermodynamics and ENGR 50 or equivalent. GER:DB-EngrAppSci

3-4 units, Spr (Heilshorn, S)

**MATSCI 192. Materials Chemistry**

(Same as MATSCI 202) Chemical principles of materials: atomic and molecular bonding; acid and base chemistry; redox and electrochemistry; colloidal and surface chemistry; materials synthesis; and nanoscale chemistry. GER:DB-EngrAppSci

3-4 units, Aut (Cui, Y)

**MATSCI 193. Atomic Arrangements in Solids**

(Same as MATSCI 203) Atomic arrangements in perfect and im-

perfect solids, especially important metals, ceramics, and semiconductors. Elements of formal crystallography, including development of point groups and space groups. GER:DB-EngrAppSci  
3-4 units, Aut (Sinclair, R)

#### **MATSCI 194. Thermodynamics and Phase Equilibria**

(Same as MATSCI 204) The principles of heterogeneous equilibria and their application to phase diagrams. Thermodynamics of solutions; chemical reactions; non-stoichiometry in compounds; first order phase transitions and metastability; thermodynamics of surfaces, elastic solids, dielectrics, and magnetic solids. GER:DB-EngrAppSci

3-4 units, Win (Salleo, A)

#### **MATSCI 195. Waves and Diffraction in Solids**

(Same as MATSCI 205) The elementary principals of x-ray, vibrational, and electron waves in solids. Basic wave behavior including Fourier analysis, interference, diffraction, and polarization. Examples of wave systems, including electromagnetic waves from Maxwell's equations. Diffracted intensity in reciprocal space and experimental techniques such as electron and x-ray diffraction. Lattice vibrations in solids, including vibrational modes, dispersion relationship, density of states, and thermal properties. Free electron model. Basic quantum mechanics and statistical mechanics including Fermi-Dirac and Bose-Einstein statistics. Prerequisite: 193/203 or consent of instructor. GER:DB-EngrAppSci

3-4 units, Win (Clemens, B)

#### **MATSCI 196. Imperfections in Crystalline Solids**

(Same as MATSCI 206) The relation of lattice defects to the physical and mechanical properties of crystalline solids. Introduction to point imperfections and their relationship to transport properties in metallic, covalent, and ionic crystals. Geometric, crystallographic, elastic, and energetic properties of dislocations. Relations between dislocations and the mechanical properties of crystals. The structure and properties of interfaces in solids. Prerequisite: 193/203. GER:DB-EngrAppSci

3-4 units, Spr (Staff)

#### **MATSCI 197. Rate Processes in Materials**

(Same as MATSCI 207) Diffusion and phase transformations in solids. Diffusion topics: Fick's laws, atomic theory of diffusion, and diffusion in alloys. Phase transformation topics: nucleation, growth, diffusional transformations, spinodal decomposition, and interface phenomena. Material builds on the mathematical, thermodynamic, and statistical mechanical foundations in the prerequisites. Prerequisites: 194/204. GER:DB-EngrAppSci

3-4 units, Spr (McIntyre, P)

#### **MATSCI 198. Mechanical Properties of Materials**

(Same as MATSCI 208) Introduction to the mechanical behavior of solids, emphasizing the relationships between microstructure and mechanical properties. Elastic, anelastic, and plastic properties of materials. The relations between stress, strain, strain rate, and temperature for plastically deformable solids. Application of dislocation theory to strengthening mechanisms in crystalline solids. The phenomena of creep, fracture, and fatigue and their controlling mechanisms. Prerequisites: 193/203. GER:DB-EngrAppSci

3-4 units, Win (Dauskardt, R)

#### **MATSCI 199. Electronic and Optical Properties of Solids**

(Same as MATSCI 209) The concepts of electronic energy bands and transports applied to metals, semiconductors, and insulators. The behavior of electronic and optical devices including p-n junctions, MOS-capacitors, MOSFETs, optical waveguides, quantum-well lasers, light amplifiers, and metallo-dielectric light guides. Emphasis is on relationships between structure and physical properties. Elementary quantum and statistical mechanics concepts are used. Prerequisite: 195/205 or equivalent. GER:DB-EngrAppSci

3-4 units, Spr (Brongersma, M)

## **GRADUATE COURSES IN MATERIALS SCIENCE AND ENGINEERING**

#### **MATSCI 171. Nanocharacterization Laboratory**

(Same as MATSCI 161) The development of standard lab procedures for materials scientists emphasizing microscopy, metallography, and technical writing. Techniques: optical, scanning-electron, atomic-force microscopy; and metallographic specimen preparation. The relationships among microscopic observation, material

properties, and processing. Prerequisite: ENGR 50 or equivalent.

3-4 units, Spr (McGehee, M)

#### **MATSCI 172. X-Ray Diffraction Laboratory**

(Same as MATSCI 162) Experimental x-ray diffraction techniques for microstructural analysis of materials, emphasizing powder and single-crystal techniques. Diffraction from epitaxial and polycrystalline thin films, multilayers, and amorphorous materials using medium and high resolution configurations. Determination of phase purity, crystallinity, relaxation, stress, and texture in the materials. Advanced experimental x-ray diffraction techniques: reciprocal lattice mapping, reflectivity, and grazing incidence diffraction. Enrollment limited to 20.

3-4 units, Win (Vailionis, A)

#### **MATSCI 173. Mechanical Behavior Laboratory**

(Same as MATSCI 163) Experimental techniques for the study of the mechanical behavior of engineering materials in bulk and thin film form, including tension testing, nanoindentation, and wafer curvature stress analysis. Metallic and polymeric systems. Prerequisite: ENGR 50.

3-4 units, Aut (Han, S)

#### **MATSCI 200. Master's Research**

Participation in a research project.

1-15 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

#### **MATSCI 202. Materials Chemistry**

(Same as MATSCI 192) Chemical principles of materials: atomic and molecular bonding; acid and base chemistry; redox and electrochemistry; colloidal and surface chemistry; materials synthesis; and nanoscale chemistry.

3-4 units, Aut (Cui, Y)

#### **MATSCI 203. Atomic Arrangements in Solids**

(Same as MATSCI 193) Atomic arrangements in perfect and imperfect solids, especially important metals, ceramics, and semiconductors. Elements of formal crystallography, including development of point groups and space groups.

3-4 units, Aut (Sinclair, R)

#### **MATSCI 204. Thermodynamics and Phase Equilibria**

(Same as MATSCI 194) The principles of heterogeneous equilibria and their application to phase diagrams. Thermodynamics of solutions; chemical reactions; non-stoichiometry in compounds; first order phase transitions and metastability; thermodynamics of surfaces, elastic solids, dielectrics, and magnetic solids.

3-4 units, Win (Salleo, A)

#### **MATSCI 205. Waves and Diffraction in Solids**

(Same as MATSCI 195) The elementary principals of x-ray, vibrational, and electron waves in solids. Basic wave behavior including Fourier analysis, interference, diffraction, and polarization. Examples of wave systems, including electromagnetic waves from Maxwell's equations. Diffracted intensity in reciprocal space and experimental techniques such as electron and x-ray diffraction. Lattice vibrations in solids, including vibrational modes, dispersion relationship, density of states, and thermal properties. Free electron model. Basic quantum mechanics and statistical mechanics including Fermi-Dirac and Bose-Einstein statistics. Prerequisite: 193/203 or consent of instructor.

3-4 units, Win (Clemens, B)

#### **MATSCI 206. Imperfections in Crystalline Solids**

(Same as MATSCI 196) The relation of lattice defects to the physical and mechanical properties of crystalline solids. Introduction to point imperfections and their relationship to transport properties in metallic, covalent, and ionic crystals. Geometric, crystallographic, elastic, and energetic properties of dislocations. Relations between dislocations and the mechanical properties of crystals. The structure and properties of interfaces in solids. Prerequisite: 193/203.

3-4 units, Spr (Staff)

#### **MATSCI 207. Rate Processes in Materials**

(Same as MATSCI 197) Diffusion and phase transformations in solids. Diffusion topics: Fick's laws, atomic theory of diffusion, and diffusion in alloys. Phase transformation topics: nucleation, growth, diffusional transformations, spinodal decomposition, and interface phenomena. Material builds on the mathematical, thermodynamic, and statistical mechanical foundations in the prerequisites. Prerequisites: 194/204.

3-4 units, Spr (McIntyre, P)

**MATSCI 208. Mechanical Properties of Materials**

(Same as MATSCI 198) Introduction to the mechanical behavior of solids, emphasizing the relationships between microstructure and mechanical properties. Elastic, anelastic, and plastic properties of materials. The relations between stress, strain, strain rate, and temperature for plastically deformable solids. Application of dislocation theory to strengthening mechanisms in crystalline solids. The phenomena of creep, fracture, and fatigue and their controlling mechanisms. Prerequisites: 193/203.

3-4 units, Win (Dauskardt, R)

**MATSCI 209. Electronic and Optical Properties of Solids**

(Same as MATSCI 199) The concepts of electronic energy bands and transports applied to metals, semiconductors, and insulators. The behavior of electronic and optical devices including p-n junctions, MOS-capacitors, MOSFETs, optical waveguides, quantum-well lasers, light amplifiers, and metallo-dielectric light guides. Emphasis is on relationships between structure and physical properties. Elementary quantum and statistical mechanics concepts are used. Prerequisite: 195/205 or equivalent.

3-4 units, Spr (Brongersma, M)

**MATSCI 210. Organic and Biological Materials**

(Same as MATSCI 190) Unique physical and chemical properties of organic materials and their uses. The relationship between structure and physical properties, and techniques to determine chemical structure and molecular ordering. Examples include liquid crystals, dendrimers, carbon nanotubes, hydrogels, and biopolymers such as lipids, protein, and DNA. Prerequisite: Thermodynamics and ENGR 50 or equivalent.

3-4 units, Spr (Heilshorn, S)

**MATSCI 230. Materials Science Colloquium**

May be repeated for credit.

1 unit, Aut (Brongersma, M; Cui, Y), Win (Sinclair, R; Salleo, A), Spr (Dauskardt, R; Heilshorn, S)

**MATSCI 251. Microstructure and Mechanical Properties**

(Same as MATSCI 151) Primarily for students without a materials background. Mechanical properties and their dependence on microstructure in a range of engineering materials. Elementary deformation and fracture concepts, strengthening and toughening strategies in metals and ceramics. Topics: dislocation theory, mechanisms of hardening and toughening, fracture, fatigue, and high-temperature creep. Prerequisite: ENGR 50 or equivalent.

3-4 units, Aut (Dauskardt, R)

**MATSCI 256. Solar Cells, Fuel Cells, and Batteries: Materials for the Energy Solution**

(Same as MATSCI 156) Operating principles and applications of emerging technological solutions to the energy demands of the world. The scale of global energy usage and requirements for possible solutions. Basic physics and chemistry of solar cells, fuel cells, and batteries. Performance issues, including economics, from the ideal device to the installed system. The promise of materials research for providing next generation solutions.

3-4 units, Aut (Clemens, B)

**MATSCI 299. Practical Training**

Educational opportunities in high-technology research and development labs in industry. Qualified graduate students engage in internship work and integrate that work into their academic program. Following the internship, students complete a research report outlining their work activity, problems investigated, key results, and any follow-on projects they expect to perform. Student is responsible for arranging own employment. See department student services manager before enrolling.

3 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**MATSCI 300. Ph.D. Research**

Participation in a research project.

1-15 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**MATSCI 302. Solar Cells**

Theory of conventional p-n junction and excitonic solar cells. Design, fabrication, and characterization of crystalline silicon, amorphous silicon, CdTe, CIGS, and tandem and organic solar cells. Emerging solar cell concepts such as intermediate band gap and bioinspired solar cells. Emphasis is on the materials science aspects of solar cells research. Module design and economic hurdles that must be overcome for solar cell technology to generate a significant fraction of the world's electricity. Group project to

explore one solar cell approach in depth. SCPD offering.

3 units, Aut (McGehee, M)

**MATSCI 311. Lasers in Materials Processing**

Principles of laser operation. Optically and electrically pumped lasers. Materials for solid-state lasers. Fundamentals of laser/materials interactions. Applications in thin film technology and microfabrication; laser annealing of defects and crystallization of amorphous films. Laser-induced shock waves. Extreme non-equilibrium laser processing; ultra-fast (femtosecond) lasers and their novel uses; micro- and nanofabrication of fluidic and photonic devices; intracellular nano-surgery.

3 units, not given this year

**MATSCI 312. New Methods in Thin Film Synthesis**

Materials base for engineering new classes of coatings and devices. Techniques to grow thin films at atomic scale and to fabricate multilayers/superlattices at nanoscale. Vacuum growth techniques including evaporation, molecular beam epitaxy (MBE), sputtering, ion beam assisted deposition, laser ablation, chemical vapor deposition (CVD), and electroplating. Future direction of material synthesis such as nanocluster deposition and nanoparticles self-assembly. Relationships between deposition parameters and film properties. Applications of thin film synthesis in microelectronics, nanotechnology, and biology. SCPD offering.

3 units, Aut (Wang, S)

**MATSCI 316. Nanoscale Science, Engineering, and Technology**

Sample application areas: renewable energy including nanoscaled photovoltaic cells, hydrogen storage, fuel cells, and nanoelectronics. Nanofabrication techniques including: self-assembly of amphiphilic molecules, block copolymers, organic-inorganic mesostructures, colloidal crystals, organic monolayers, proteins, DNA and abalone shells; biologically inspired growth of materials; photolithography, electron beam lithography, and scanning probe lithography; and synthesis of carbon nanotubes, nanowire, and nanocrystals. Other nanotechnology topics may be explored through a group project. SCPD offering.

3 units, Spr (Cui, Y)

**MATSCI 320. Nanocharacterization of Materials**

Current methods of directly examining the microstructure of materials. Topics: optical microscopy, scanning electron and focused ion beam microscopy, field ion microscopy, transmission electron microscopy, scanning probe microscopy, and microanalytical surface science methods. Emphasis is on the electron-optical techniques. Recommended: 193/203.

3 units, Win (Sinclair, R), alternate years, not given next year

**MATSCI 321. Transmission Electron Microscopy**

Image formation and interpretation. The contrast phenomena associated with perfect and imperfect crystals from a physical point of view and from a formal treatment of electron diffraction theory. The importance of electron diffraction to systematic analysis and recent imaging developments. Recommended: 193/203, 195/205, or equivalent.

3 units, Win (Staff), alternate years, not given this year

**MATSCI 322. Transmission Electron Microscopy Laboratory**

Experimental application of electron microscopy to typical materials science studies. Topics include microscope operation and alignment, diffraction modes and analysis, bright-field/dark-field analysis of defects, high resolution imaging, and analytical techniques for compositional analysis (EDAX). Enrollment limited to 12. Prerequisites: 321, consent of instructor.

3 units, Aut (Marshall, A)

**MATSCI 323. Thin Film and Interface Microanalysis**

The science and technology of microanalytical techniques, including Auger electron spectroscopy (AES), Rutherford backscattering spectroscopy (RBS), secondary ion mass spectroscopy (SIMS), ion scattering spectroscopy (ISS), and x-ray photoelectron spectroscopy (XPS or ESCA). Generic processes such as sputtering and high-vacuum generation. Prerequisite: some prior exposure to atomic and electronic structure of solids. SCPD offering.

3 units, Aut (Evans, C)

**MATSCI 325. X-Ray Diffraction**

Diffraction theory and its relationship to structural determination in solids. Focus is on applications of x-rays; concepts can be applied to neutron and electron diffraction. Topics: Fourier analysis,

kinematic theory, Patterson functions, diffraction from layered and amorphous materials, single crystal diffraction, dynamic theory, defect determination, surface diffraction, techniques for data analysis, and determination of particle size and strain. Prerequisites: 193/203, 195/205.

3 units, not given this year

**MATSCI 326. X-Ray Science and Techniques**

X-ray interaction with matter; diffraction from ordered and disordered materials; x-ray absorption, photoemission, and coherent scattering; x-ray microscopy. Sources including synchrotrons, high harmonic generation, x-ray lasers. Time-resolved techniques and detector technology.

3 units, Aut (Lindenberg, A)

**MATSCI 343. Organic Semiconductors for Electronics and Photonics**

The science of organic semiconductors and their use in electronic and photonic devices. Topics: methods for fabricating thin films and devices; relationship between chemical structure and molecular packing on properties such as band gap, charge carrier mobility and luminescence efficiency; doping; field-effect transistors; light-emitting diodes; lasers; biosensors; photodetectors and photovoltaic cells. SCPD offering.

3 units, Spr (Salleo, A; Peumans, P)

**MATSCI 346. Nanophotonics**

(Same as EE 336) Recent developments in micro- and nanophotonic materials and devices. Basic concepts of photonic crystals. Integrated photonic circuits. Photonic crystal fibers. Superprism effects. Optical properties of metallic nanostructures. Sub-wavelength phenomena and plasmonic excitations. Meta-materials. Prerequisite: electromagnetism theory at the level of 242.

3 units, Win (Fan, S; Brongersma, M)

**MATSCI 347. Introduction to Magnetism and Magnetic Nanostructures**

Atomic origins of magnetic moments, magnetic exchange and ferromagnetism, types of magnetic order, magnetic anisotropy, domains, domain walls, hysteresis loops, hard and soft magnetic materials, demagnetization factors, and applications of magnetic materials, especially magnetic nanostructures and nanotechnology. Tools include finite-element and micromagnetic modeling. Design topics include electromagnet and permanent magnet, electronic article surveillance, magnetic inductors, bio-magnetic sensors, and magnetic drug delivery. Design projects, team work, and computer-aided design. Prerequisites: PHYSICS 29 and 43, or college-level electricity and magnetism.

3 units, Spr (Wang, S; White, R)

**MATSCI 351. Failure Analysis for Emerging Technologies**

Introduction to root cause failure analysis investigation of emerging technologies such as high tech electronic and medical devices. Real case studies illustration of design errors, manufacturing defects, misuse and environmental degradation that resulted in fracture, fatigue, cracking or corrosion. Understanding material degradation modes and mechanisms. Examples on analytical characterization techniques such as scanning electron microscopy (SEM), X-ray photoelectron spectroscopy (XPS), Fourier transform infrared spectroscopy (FTIR), time of flight secondary ion mass spectroscopy (TOF-SIMS), mechanical testing, finite element analysis (FEA) and electrochemical testing.

3 units, Aut (Staff)

**MATSCI 353. Mechanical Properties of Thin Films**

The mechanical properties of thin films on substrates. The mechanics of thin films and of the atomic processes which cause stresses to develop during thin film growth. Experimental techniques for studying stresses in and mechanical properties of thin films. Elastic, plastic, and diffusional deformation of thin films on substrates as a function of temperature and microstructure. Effects of deformation and fracture on the processing of thin film materials. Prerequisite: 198/208.

3 units, Win (Nix, W)

**MATSCI 358. Fracture and Fatigue of Materials and Thin Film Structures**

Linear-elastic and elastic-plastic fracture mechanics from a materials science perspective, emphasizing microstructure and the micromechanisms of fracture. Plane strain fracture toughness and resistance curve behavior. Mechanisms of failure associated with

cohesion and adhesion in bulk materials, composites, and thin film structures. Fracture mechanics approaches to toughening and subcritical crack-growth processes, with examples and applications involving cyclic fatigue and environmentally assisted subcritical crack growth. Prerequisite: 151/251, 198/208, or equivalent. SCPD offering.

3 units, Spr (Dauskardt, R)

**MATSCI 359. Crystalline Anisotropy**

(Same as ME 336) Matrix and tensor analysis with applications to the effects of crystal symmetry on elastic deformation, thermal expansion, diffusion, piezoelectricity, magnetism, thermodynamics, and optical properties of solids, on the level of J. F. Nye's Physical Properties of Crystals. Homework sets use Mathematica.

3 units, not given this year

**MATSCI 380. Nano-Biotechnology**

Literature based. Principles that make nanoscale materials unique, applications to biology, and how biological systems can create nanomaterials. Molecular sensing, drug delivery, bio-inspired synthesis, self-assembling systems, and nanomaterial based therapies. Interactions at the nanoscale. Applications and opportunities for new technology.

3 units, alternate years, not given this year

**MATSCI 381. Biomaterials in Regenerative Medicine**

(Same as BIOE 361) Materials design and engineering for regenerative medicine. How materials interact with cells through their micro- and nanostructure, mechanical properties, degradation characteristics, surface chemistry, and biochemistry. Examples include novel materials for drug and gene delivery, materials for stem cell proliferation and differentiation, and tissue engineering scaffolds. Prerequisites: undergraduate chemistry, and cell/molecular biology or biochemistry.

3 units, Win (Heilshorn, S; Cochran, J), alternate years, not given next year

**MATSCI 399. Graduate Independent Study**

Under supervision of a faculty member.

1-10 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**MATSCI 400. Participation in Materials Science Teaching**

May be repeated for credit.

1-3 units, Aut (Staff), Win (Staff), Spr (Staff)

## MATHEMATICAL AND COMPUTATIONAL SCIENCE (MCS)

### UNDERGRADUATE COURSES IN MATHEMATICAL AND COMPUTATIONAL SCIENCE

**MCS 100. Mathematics of Sports**

(Same as STATS 50) The use of mathematics, statistics, and probability in the analysis of sports performance, sports records, and strategy. Topics include mathematical analysis of the physics of sports and the determinations of optimal strategies. New diagnostic statistics and strategies for each sport. Corequisite: STATS 116. GER:DB-Math

3 units, Aut (Cover, T)

## MATHEMATICS (MATH)

### UNDERGRADUATE COURSES IN MATHEMATICS

**MATH 15. Overview of Mathematics**

GER:DB-Math

3 units, not given this year

**MATH 19. Calculus**

The content of MATH 19, 20, 21 is the same as the sequence MATH 41, 42 described below, but covered in three quarters, rather than two. GER:DB-Math

3 units, Aut (Staff), Win (Cohn, Z), Sum (Staff)

**MATH 20. Calculus**

Continuation of 19. Prerequisite: 19. GER:DB-Math  
3 units, Win (Butscher, A), Spr (Schoenfeld, E)

**MATH 21. Calculus**

Continuation of 20. Prerequisite: 20. GER:DB-Math  
4 units, Spr (Butscher, A; Cohn, Z)

**MATH 41. Calculus**

Introduction to differential and integral calculus of functions of one variable. Topics: review of elementary functions including exponentials and logarithms, rates of change, and the derivative. Introduction to the definite integral and integration. Prerequisites: algebra, trigonometry. GER:DB-Math  
5 units, Aut (Lucianovic, M)

**MATH 41A. Calculus ACE**

Students attend MATH 41 lectures with different recitation sessions, four hours instead of two, emphasizing engineering applications. Prerequisite: application; see <http://soe.stanford.edu/edp/programs/ace.html>. GER:DB-Math  
6 units, Aut (Lucianovic, M)

**MATH 42. Calculus**

Continuation of 41. Methods of symbolic and numerical integration, applications of the definite integral, introduction to differential equations. Infinite series. Prerequisite: 41 or equivalent. GER:DB-Math  
5 units, Aut (Lisi, S), Win (Lucianovic, M)

**MATH 42A. Calculus ACE**

Students attend MATH 41 lectures with different recitation sessions, four hours instead of two, emphasizing engineering applications. Prerequisite: application; see <http://soe.stanford.edu/edp/programs/ace.html>. GER:DB-Math  
6 units, Aut (Lisi, S), Win (Lucianovic, M)

**MATH 51. Linear Algebra and Differential Calculus of Several Variables**

Geometry and algebra of vectors, systems of linear equations, matrices, vector valued functions and functions of several variables, partial derivatives, gradients, chain rule in several variables, vector fields, optimization. Prerequisite: 21, 42, or a score of 4 on the BC Advanced Placement exam or 5 on the AB Advanced Placement exam, or consent of instructor. GER:DB-Math  
5 units, Aut (Wise, J), Win (Han, F), Spr (Trotabas, D; Rojas Esponda, T; Mathews, D), Sum (Staff)

**MATH 51A. Linear Algebra and Differential Calculus of Several Variables, ACE**

Students attend MATH 51 lectures with different recitation sessions: four hours per week instead of two, emphasizing engineering applications. Prerequisite: application; see <http://soe.stanford.edu/edp/programs/ace.html>. GER:DB-Math  
6 units, Aut (White, B; Genauer, J; Penev, N), Win (Han, F; Tzeng, Y), Spr (Wieczorek, W; Weiner, I)

**MATH 51H. Honors Multivariable Mathematics**

For prospective Mathematics majors in the honors program and students from other areas of science or engineering who have a strong mathematics background. Three quarter sequence covers the material of 51, 52, 53, and additional advanced calculus and ordinary and partial differential equations. Unified treatment of multivariable calculus, linear algebra, and differential equations with a different order of topics and emphasis from standard courses. Students should know one-variable calculus and have an interest in a theoretical approach to the subject. Prerequisite: score of 5 on BC Advanced Placement exam, or consent of instructor. GER:DB-Math

5 units, Aut (Simon, L)

**MATH 51M. Introduction to MATLAB for Multivariable Mathematics**

Corequisite: MATH 51.  
1 unit, Aut (Hall, J)

**MATH 52. Integral Calculus of Several Variables**

Iterated integrals, line and surface integrals, vector analysis with applications to vector potentials and conservative vector fields, physical interpretations. Divergence theorem and the theorems of Green, Gauss, and Stokes. Prerequisite: 51. GER:DB-Math  
5 units, Aut (Brumfiel, G), Win (Ionel, E), Spr (Li, J)

**MATH 52H. Honors Multivariable Mathematics**

Continuation of 51H. Prerequisite: 51H. GER:DB-Math  
5 units, Win (Eliashberg, Y)

**MATH 53. Ordinary Differential Equations with Linear Algebra**

Linear ordinary differential equations, applications to oscillations, matrix methods including determinants, eigenvalues and eigenvectors, matrix exponentials, systems of linear differential equations with constant coefficients, stability of non-linear systems and phase plane analysis, numerical methods, Laplace transforms. Integrated with topics from linear algebra (103). Prerequisite: 51. GER:DB-Math  
5 units, Aut (Licata, A), Win (Brendle, S), Spr (Romon, P), Sum (Staff)

**MATH 53H. Honors Multivariable Mathematics**

Continuation of 52H. Prerequisite: 52H. GER:DB-Math  
5 units, Spr (Cohen, R)

**MATH 70SI. The Game of Go: Strategy, Theory, and History**

Strategy and mathematical theories of the game of Go, with guest appearance by a professional Go player.  
1 unit, Spr (Staff)

**MATH 78SI. Speedcubing: HHistory, Theory, and Practice**

History of the Rubik's cube; the current cubing community; basic mathematical theory; concepts to improve speed solving skill. Prior ability to solve cube not required.  
1 unit, Aut (Staff)

**MATH 88Q. The Mathematics of the Rubik's Cube**

(S,Sem) Stanford Introductory Seminar. Preference to sophomores. Group theory through topics that can be illustrated with the Rubik's cube: subgroups, homomorphisms and quotient groups, the symmetric and alternating groups, conjugation, commutators, and Sylow subgroups.  
3 units, Spr (Kahle, M)

**MATH 100. Mathematics for Elementary School Teachers**

Mathematics and pedagogical strategies. Core mathematical content in grades K-6, classroom presentation, how to handle student errors, and mathematical issues that come up during instruction.  
4 units, not given this year

**MATH 104. Applied Matrix Theory**

Linear algebra for applications in science and engineering: orthogonality, projections, the four fundamental subspaces of a matrix, spectral theory for symmetric matrices, the singular value decomposition, the QR decomposition, least-squares, the condition number of a matrix, algorithms for solving linear systems. Prerequisites: MATH 51 and MATH 52 or 53. GER:DB-Math  
3 units, Aut (Staff), Win (Nedelec, L), Sum (Staff)

**MATH 106. Functions of a Complex Variable**

Complex numbers, analytic functions, Cauchy-Riemann equations, complex integration, Cauchy integral formula, residues, elementary conformal mappings. Prerequisite: 52. GER:DB-Math  
3 units, Aut (Nedelec, L), Sum (Brumfiel, G)

**MATH 108. Introduction to Combinatorics and Its Applications**

Topics: graphs, trees (Cayley's Theorem, application to phylogony), eigenvalues, basic enumeration (permutations, Stirling and Bell numbers), recurrences, generating functions, basic asymptotics. Prerequisites: 51 or 103 or equivalent. GER:DB-Math  
3 units, Aut (Diaconis, P)

**MATH 109. Applied Group Theory**

Applications of the theory of groups. Topics: elements of group theory, groups of symmetries, matrix groups, group actions, and applications to combinatorics and computing. Applications: rotational symmetry groups, the study of the Platonic solids, crystallographic groups and their applications in chemistry and physics. GER:DB-Math  
3 units, Win (Licata, J)

**MATH 110. Applied Number Theory and Field Theory**

Number theory and its applications to modern cryptography. Topics: congruences, finite fields, primality testing and factorization, public key cryptography, error correcting codes, and elliptic curves, emphasizing algorithms. GER:DB-Math  
3 units, Spr (Kahle, M)

**MATH 111. Computational Commutative Algebra**

Theory of commutative rings, ideals, and modules. Systems of polynomial equations in variables from the algorithmic viewpoint. Groebner bases, Buchberger's algorithm, elimination theory. Applications to algebraic geometry and to geometric problems. GER:DB-Math

3 units, not given this year

**MATH 113. Linear Algebra and Matrix Theory**

Algebraic properties of matrices and their interpretation in geometric terms. The relationship between the algebraic and geometric points of view and matters fundamental to the study and solution of linear equations. Topics: linear equations, vector spaces, linear dependence, bases and coordinate systems; linear transformations and matrices; similarity; eigenvectors and eigenvalues; diagonalization. GER:DB-Math

3 units, Win (Licata, J), Spr (Ryzhik, L)

**MATH 115. Functions of a Real Variable**

The development of real analysis in Euclidean space: sequences and series, limits, continuous functions, derivatives, integrals. Basic point set topology. Honors math majors and students who intend to do graduate work in mathematics should take 171. Prerequisite: 51. GER:DB-Math

3 units, Aut (Katznelson, Y), Win (Nedelec, L), Sum (Brumfiel, G)

**MATH 116. Complex Analysis**

Analytic functions, Cauchy integral formula, power series and Laurent series, calculus of residues and applications, conformal mapping, analytic continuation, introduction to Riemann surfaces, Fourier series and integrals. Prerequisites: 52, and 115 or 171. GER:DB-Math

3 units, Win (Katznelson, Y)

**MATH 120. Modern Algebra**

Groups acting on sets, examples of 'nite groups, Sylow theorems, solvable and simple groups. Fields, rings, and ideals; polynomial rings over a 'eld; PID and non-PID. Unique factorization domains. GER:DB-Math, WIM

3 units, Aut (Vakil, R), Spr (Kahle, M)

**MATH 121. Modern Algebra II**

Continuation of 120. Field of fractions, 'eld theory and Galois theory. Modules over a PID, quotient modules, non-free modules. Canonical forms, generalized eigenspaces, quotients and duality for vector spaces. Prerequisite: Math 120. GER:DB-Math

3 units, Win (Venkatesh, A)

**MATH 122. GROUP REPRESENTATIONS**

Group representations and group rings, tensor algebra, character theory. Bilinear and quadratic forms, semisimplicity. Induced representations. Classification of representations, applications. Prerequisite: Math 120, and either Math 121 or permission of instructor.

3 units, Spr (Venkatesh, A)

**MATH 131P. Partial Differential Equations I**

An introduction to PDE; particularly suitable for non-Math majors. Topics include physical examples of PDE's, method of characteristics, D'Alembert's formula, maximum principles, heat kernel, Duhamel's principle, separation of variables, Fourier series, Harmonic functions, Bessel functions, spherical harmonics. Students who have taken MATH 171 should consider taking MATH 173 rather than 131p. Prerequisite: 53. GER:DB-Math

3 units, Aut (Staff), Win (Liu, T)

**MATH 132. Partial Differential Equations II**

Laplace's equation and properties of harmonic functions. Green's functions. Distributions and Fourier transforms. Eigenvalue problems and generalized Fourier series. Numerical solutions. Prerequisite: 131P. GER:DB-Math

3 units, Spr (Staff)

**MATH 136. Stochastic Processes**

(Same as STATS 219) Introduction to measure theory, Lp spaces and Hilbert spaces. Random variables, expectation, conditional expectation, conditional distribution. Uniform integrability, almost sure and Lp convergence. Stochastic processes: definition, stationarity, sample path continuity. Examples: random walk, Markov chains, Gaussian processes, Poisson processes, Martingales. Construction and basic properties of Brownian motion. Prerequisite: STATS 116 or MATH 151 or equivalent. Recommended: MATH 115 or equivalent. GER:DB-Math

3 units, Aut (Staff)

**MATH 137. Mathematical Methods of Classical Mechanics**

Newtonian mechanics. Lagrangian formalism. E. Noether's theorem. Oscillations. Rigid bodies. Introduction to symplectic geometry. Hamiltonian formalism. Legendre transform. Variational principles. Geometric optics. Introduction to the theory of integrable systems. Prerequisites: 51, 52, 53, or 51H, 52H, 53H. GER:DB-Math

3 units, not given this year

**MATH 138. Celestial Mechanics**

Mathematically rigorous introduction to the classical N-body problem: the motion of N particles evolving according to Newton's law. Topics include: the Kepler problem and its symmetries; other central force problems; conservation theorems; variational methods; Hamilton-Jacobi theory; the role of equilibrium points and stability; and symplectic methods. Prerequisites: 53, and 115 or 171. GER:DB-Math

3 units, not given this year

**MATH 143. Differential Geometry**

Geometry of curves and surfaces in three-space and higher dimensional manifolds. Parallel transport, curvature, and geodesics. Surfaces with constant curvature. Minimal surfaces. GER:DB-Math

3 units, Win (Staff)

**MATH 145. Algebraic Geometry**

Real algebraic curves, Hilbert's nullstellensatz, complex affine and projective curves, Bezout's theorem, the degree/genus formula, Riemann surfaces, Riemann-Roch theorem. Prerequisites: 106 or 116, and 109 or 120. Recommended: familiarity with surfaces equivalent to 143, 146, 147, or 148. GER:DB-Math

3 units, Aut (Mirzakhani, M)

**MATH 146. Analysis on Manifolds**

Differentiable manifolds, tangent space, submanifolds, implicit function theorem, differential forms, vector and tensor fields. Frobenius' theorem, DeRham theory. Prerequisite: 52 or 52H. GER:DB-Math

3 units, alternate years, not given this year

**MATH 147. Differential Topology**

Smooth manifolds, transversality, Sard's theorem, embeddings, degree of a map, Borsuk-Ulam theorem, Hopf degree theorem, Jordan curve theorem. Prerequisite: 115 or 171. GER:DB-Math

3 units, Aut (Kerckhoff, S)

**MATH 148. Algebraic Topology**

Fundamental group, covering spaces, Euler characteristic, homology, classification of surfaces, knots. Prerequisite: 109 or 120. GER:DB-Math

3 units, alternate years, not given this year

**MATH 151. Introduction to Probability Theory**

Counting; axioms of probability; conditioning and independence; expectation and variance; discrete and continuous random variables and distributions; joint distributions and dependence; central limit theorem and laws of large numbers. Prerequisite: 52 or consent of instructor. GER:DB-Math

3 units, Win (Kargin, V)

**MATH 152. Elementary Theory of Numbers**

Euclid's algorithm, fundamental theorems on divisibility; prime numbers; congruence of numbers; theorems of Fermat, Euler, Wilson; congruences of first and higher degrees; quadratic residues; introduction to the theory of binary quadratic forms; quadratic reciprocity; partitions. GER:DB-Math

3 units, Aut (Bump, D)

**MATH 154. Algebraic Number Theory**

Properties of number fields and Dedekind domains, quadratic and cyclotomic fields, applications to some classical Diophantine equations; introduction to elliptic curves. Prerequisites: 120, 121. GER:DB-Math

3 units, alternate years, not given this year

**MATH 155. Analytic Number Theory**

Topics in analytic number theory such as the distribution of prime numbers, the prime number theorem, twin primes and Goldbach's conjecture, the theory of quadratic forms, Dirichlet's class number formula, Dirichlet's theorem on primes in arithmetic progressions, and the fifteen theorem. Prerequisite: 152, or familiarity with the Euclidean algorithm, congruences, residue classes and reduced residue classes, primitive roots, and quadratic reciprocity.

GER:DB-Math

3 units, Win (*Soundararajan, K*), alternate years, not given next year

### MATH 159. Discrete Probabilistic Methods

Modern discrete probabilistic methods suitable for analyzing discrete structures of the type arising in number theory, graph theory, combinatorics, computer science, information theory and molecular sequence analysis. Prerequisite: STATS 116/MATH 151 or equivalent.

3 units, Aut (*Dembo, A*)

### MATH 161. Set Theory

Informal and axiomatic set theory: sets, relations, functions, and set-theoretical operations. The Zermelo-Fraenkel axiom system and the special role of the axiom of choice and its various equivalents. Well-orderings and ordinal numbers; transfinite induction and transfinite recursion. Equinumerosity and cardinal numbers; Cantor's Alephs and cardinal arithmetic. Open problems in set theory. GER:DB-Math

3 units, Spr (*Bump, D*)

### MATH 162. Philosophy of Mathematics

(Same as PHIL 162, PHIL 262) (Graduate students register for PHIL 262.) 20th-century approaches to the foundations and philosophy of mathematics. The background in mathematics, set theory, and logic. Schools and programs of logicism, predicativism, platonism, formalism, and constructivism. Readings from leading thinkers. Prerequisite: PHIL151 or consent of instructor. GER:DB-Math

4 units, Spr (*Mumma, J*)

### MATH 171. Fundamental Concepts of Analysis

Recommended for Mathematics majors and required of honors Mathematics majors. Similar to 115 but altered content and more theoretical orientation. Properties of Riemann integrals, continuous functions and convergence in metric spaces; compact metric spaces, basic point set topology. Prerequisites: 51 and 52, or 51H and 52H. WIM GER:DB-Math, WIM

3 units, Aut (*Trotabas, D*), Spr (*Soundararajan, K*)

### MATH 172. Lebesgue Integration and Fourier Analysis

Similar to 205A, but for undergraduate Math majors and graduate students in other disciplines. Topics include Lebesgue measure on Euclidean space, Lebesgue integration,  $L^p$  spaces, the Fourier transform, the Hardy-Littlewood maximal function and Lebesgue differentiation. Prerequisite: 171 or consent of instructor. GER:DB-Math

3 units, Spr (*Ryzhik, L*)

### MATH 173. Theory of Partial Differential Equations

A rigorous introduction to PDE accessible to advanced undergraduates. Elliptic, parabolic, and hyperbolic equations in many space dimensions including basic properties of solutions such as maximum principles, causality, and conservation laws. Methods include the Fourier transform as well as more classical methods. The Lebesgue integral will be used throughout, but a summary of its properties will be provided to make the course accessible to students who have not had 172 or 205A. Prerequisite: 171 or equivalent.

3 units, Win (*Mazzeo, R*)

### MATH 174. Calculus of Variations

An introductory course emphasizing the historical development of the theory, its connections to physics and mechanics, its independent mathematical interest, and its contacts with daily life experience. Applications to minimal surfaces and to capillary surface interfaces. Prerequisites: Math 171 or equivalent.

3 units, Win (*Finn, R*)

### MATH 174A. Topics in Analysis and Differential Equations with Applications

For students planning graduate work in mathematics or physics, and for honors math majors and other students at ease with rigorous proofs and qualitative discussion. Topics may include: geometric theory of ODE's with applications to dynamics; mathematical foundations of classical mechanics including variational principles, Lagrangian and Hamiltonian formalisms, theory of integrable systems; theorems of existence and uniqueness; Sturm-Liouville theory. Prerequisite: 53H or 171, or consent of instructor. GER:DB-Math

3 units, not given this year

### MATH 174B. Honors Analysis

Continuation of 174A. Topics may include: introduction to PDEs including transport equations, Laplace, wave, and heat equations; techniques of solution including separation of variables and Green's functions; Fourier series and integrals; introduction to the theory of distributions; mathematical foundations of quantum mechanics. Prerequisite: 174A. GER:DB-Math

3 units, not given this year

### MATH 175. Elementary Functional Analysis

Linear operators on Hilbert space. Spectral theory of compact operators; applications to integral equations. Elements of Banach space theory. Prerequisite: 115 or 171. GER:DB-Math

3 units, Spr (*Kargin, V*)

### MATH 180. Introduction to Financial Mathematics

Financial derivatives: contracts and options. Hedging and risk management. Arbitrage, interest rate, and discounted value. Geometric random walk and Brownian motion as models of risky assets. Initial boundary value problems for the heat and related partial differential equations. Self-financing replicating portfolio. Black-Scholes pricing of European options. Dividends. Implied volatility. Optimal stopping and American options. Prerequisite: 53. Corequisites: 131, 151 or STATS 116. GER:DB-Math

3 units, Aut (*Toussaint, A*)

### MATH 193. Polya Problem Solving Seminar

Topics in mathematics and problem solving strategies with an eye towards the Putnam Competition. Topics may include parity, the pigeonhole principle, number theory, recurrence, generating functions, and probability. Students present solutions to the class. Open to anyone with an interest in mathematics.

1 unit, Aut (*Kahle, M*)

### MATH 196. Undergraduate Colloquium

Weekly lectures by different experts on topics in pure and applied mathematics that go beyond the standard curriculum. May be repeated for credit for up to 3 units. Does not count toward the math major or minor.

1 unit, Aut (*Staff*), Win (*Staff*), Spr (*Staff*)

### MATH 197. Senior Honors Thesis

1-6 units, Aut (*Staff*), Win (*Staff*), Spr (*Staff*)

### MATH 199. Independent Work

Undergraduates pursue a reading program; topics limited to those not in regular department course offerings. Credit can fulfill the elective requirement for math majors. Approval of Undergraduate Affairs Committee is required to use credit for honors majors area requirement.

1-3 units, Aut (*Staff*), Win (*Staff*), Spr (*Staff*)

## GRADUATE COURSES IN MATHEMATICS

### MATH 205A. Real Analysis

Basic measure theory and the theory of Lebesgue integration. Prerequisite: 171 or equivalent.

3 units, Aut (*White, B*)

### MATH 205B. Real Analysis

Point set topology, basic functional analysis, Fourier series, and Fourier transform. Prerequisites: 171 and 205A or equivalent.

3 units, Win (*Vasy, A*)

### MATH 210A. Modern Algebra

Basic commutative ring and module theory, tensor algebra, homological constructions, linear and multilinear algebra, introduction to representation theory. Prerequisite: 121 or equivalent.

3 units, Aut (*Conrad, B*)

### MATH 210B. Modern Algebra

Continuation of 210A. Topics in group theory, Galois theory, commutative algebra, introductions to algebraic number theory and algebraic geometry.

3 units, Win (*Brumfiel, G*)

### MATH 210C. Modern Algebra

Continuation of 210B. Semisimple rings and modules, representation theory, Lie algebras, Lie groups and their representations.

3 units, Spr (*Venkatesh, A*)

### MATH 215A. Complex Analysis, Geometry, and Topology

Analytic functions, complex integration, Cauchy's theorem, residue theorem, argument principle, conformal mappings, Riemann

mapping theorem, Picard's theorem, elliptic functions, analytic continuation and Riemann surfaces.

3 units, Aut (Staff)

**MATH 215B. Complex Analysis, Geometry, and Topology**

Topics: fundamental group and covering spaces, homology, cohomology, products, basic homotopy theory, and applications. Prerequisites: 113, 120, and 171, or equivalent; 215A is not a prerequisite for 215B.

3 units, Win (Kerckhoff, S)

**MATH 215C. Complex Analysis, Geometry, and Topology**

Differentiable manifolds, transversality, degree of a mapping, vector fields, intersection theory, and Poincaré duality. Differential forms and the DeRham theorem. Prerequisite: 215B or equivalent.

3 units, Spr (Mirzakhani, M)

**MATH 216A. Introduction to Algebraic Geometry**

Algebraic curves, algebraic varieties, sheaves, cohomology, Riemann-Roch theorem. Classification of algebraic surfaces, moduli spaces, deformation theory and obstruction theory, the notion of schemes. May be repeated for credit. Prerequisites: 210ABC or equivalent.

3 units, Aut (Vakil, R)

**MATH 216B. Introduction to Algebraic Geometry**

Continuation of 216A. May be repeated for credit.

3 units, Win (Vakil, R)

**MATH 216C. Introduction to Algebraic Geometry**

Continuation of 216B. May be repeated for credit.

3 units, Spr (Vakil, R)

**MATH 217A. Differential Geometry**

Smooth manifolds and submanifolds, tensors and forms, Lie and exterior derivative, DeRham cohomology, distributions and the Frobenius theorem, vector bundles, connection theory, parallel transport and curvature, affine connections, geodesics and the exponential map, connections on the principal frame bundle. Prerequisite: 215C or equivalent.

3 units, Spr (Schoen, R)

**MATH 217B. Differential Geometry**

Riemannian manifolds, Levi-Civita connection, Riemann curvature tensor, Riemannian exponential map and geodesic normal coordinates, Jacobi fields, completeness, spaces of constant curvature, bi-invariant metrics on compact Lie groups, symmetric and locally symmetric spaces, equations for Riemannian submanifolds and Riemannian submersions. Prerequisite: 217A.

3 units, not given this year

**MATH 220. Partial Differential Equations of Applied Mathematics**

(Same as CME 303) First-order partial differential equations; method of characteristics; weak solutions; elliptic, parabolic, and hyperbolic equations; Fourier transform; Fourier series; and eigenvalue problems. Prerequisite: foundation in multivariable calculus and ordinary differential equations.

3 units, Aut (Vasy, A)

**MATH 221. Mathematical Methods of Imaging**

Mathematical methods of imaging: array imaging using Kirchhoff migration and beamforming, resolution theory for broad and narrow band array imaging in homogeneous media, topics in high-frequency, variable background imaging with velocity estimation, interferometric imaging methods, the role of noise and inhomogeneities, and variational problems that arise in optimizing the performance of imaging algorithms and the deblurring of images. Prerequisite: 220.

3 units, Spr (Papanicolaou, G)

**MATH 222. Computational Methods for Fronts, Interfaces, and Waves**

High-order methods for multidimensional systems of conservation laws and Hamilton-Jacobi equations (central schemes, discontinuous Galerkin methods, relaxation methods). Level set methods and fast marching methods. Computation of multi-valued solutions. Multi-scale analysis, including wavelet-based methods. Boundary schemes (perfectly matched layers). Examples from (but not limited to) geometrical optics, transport equations, reaction-diffusion equations, imaging, and signal processing.

3 units, not given this year

**MATH 224. Topics in Mathematical Biology**

Mathematical models for biological processes based on ordinary and partial differential equations. Topics: population and infectious diseases dynamics, biological oscillators, reaction diffusion models, biological waves, and pattern formation. Prerequisites: 53 and 131, or equivalents.

3 units, not given this year

**MATH 226. Numerical Solution of Partial Differential Equations**

(Same as CME 306) Hyperbolic partial differential equations: stability, convergence and qualitative properties; nonlinear hyperbolic equations and systems; combined solution methods for elliptic, parabolic, and hyperbolic problems. Examples include: Burger's equation, Euler equations for compressible flow, Navier-Stokes equations for incompressible flow. Prerequisites: MATH 220A or CME 302.

3 units, Spr (Staff)

**MATH 227. Partial Differential Equations and Diffusion Processes**

Parabolic and elliptic partial differential equations and their relation to diffusion processes. First order equations and optimal control. Emphasis is on applications to mathematical finance. Prerequisites: MATH 131 and MATH 136/STATS 219, or equivalents.

3 units, Win (Ryzhik, L)

**MATH 228. Stochastic Methods in Engineering**

(Same as CME 308) Review of basic probability; Monte Carlo simulation; state space models and time series; parameter estimation, prediction, and filtering; Markov chains and processes; stochastic control; and stochastic differential equations. Examples from various engineering disciplines. Prerequisites: exposure to probability; background in real variables and analysis.

3 units, Spr (Papanicolaou, G)

**MATH 230A. Theory of Probability**

(Same as STATS 310A) Mathematical tools: asymptotics, metric spaces; measure and integration;  $L_p$  spaces; some Hilbert spaces theory. Probability: independence, Borel-Cantelli lemmas, almost sure and  $L_p$  convergence, weak and strong laws of large numbers. Weak convergence and characteristic functions; central limit theorems; local limit theorems; Poisson convergence. Prerequisites: 116, MATH 171.

2-4 units, Aut (Montanari, A)

**MATH 230B. Theory of Probability**

(Same as STATS 310B) Stopping times, 0-1 laws, Kolmogorov consistency theorem. Uniform integrability. Radon-Nikodym theorem, branching processes, conditional expectation, discrete time martingales. Exchangeability. Large deviations. Laws of the iterated logarithm. Birkhoff's and Kingman's ergodic theorems. Recurrence, entropy. Prerequisite: 310A or MATH 230A.

2-4 units, Win (Siegmund, D)

**MATH 230C. Theory of Probability**

(Same as STATS 310C) Infinitely divisible laws. Continuous time martingales, random walks and Brownian motion. Invariance principle. Markov and strong Markov property. Processes with stationary independent increments. Prerequisite: 310B or MATH 230B.

2-4 units, Spr (Dembo, A)

**MATH 231A. An Introduction to Random Matrix Theory**

(Same as STATS 351A) Patterns in the eigenvalue distribution of typical large matrices, which also show up in physics (energy distribution in scattering experiments), combinatorics (length of longest increasing subsequence), first passage percolation and number theory (zeros of the zeta function). Classical compact ensembles (random orthogonal matrices). The tools of determinantal point processes.

3 units, Aut (Staff)

**MATH 231B. The Spectrum of Large Random Matrices**

Asymptotics of eigenvalues of large random matrices, focusing on Wigner matrices and the Gaussian unitary ensemble: the combinatorics of non-crossing partitions and word graphs, concentration inequalities, Cauchy-Stieltjes transform, Hermite polynomials, Fredholm determinants, Laplace asymptotic method, special functions (Airy, Painlevé), and stochastic calculus. Prerequisites: STATS 310A or MATH 205A.

3 units, not given this year

**MATH 231C. Free Probability**

Background from operator theory, addition and multiplication theorems for operators, spectral properties of infinite-dimensional operators, the free additive and multiplicative convolutions of probability measures and their classical counterparts, asymptotic freeness of large random matrices, and free entropy and free dimension. Prerequisite: STATS 310B or equivalent.

3 units, not given this year

**MATH 232. Topics in Probability: Malliavin Calculus, Fractional Brownian Motion and Applications**

Malliavin calculus: derivative and divergence operators, Skorohod integral. Fractional Brownian motion: relevance for financial mathematics, Ito and Tanaka formula, driving force for the heat equation. Ito formula for irregular Gaussian processes and other applications of Malliavin calculus. May be repeated for credit. Prerequisites: MATH 236, STATS 310C or equivalent.

3 units, not given this year

**MATH 233. Probabilistic Methods in Analysis**

Proofs and constructions in analysis obtained from basic results in Probability Theory and a 'probabilistic way of thinking.' Topics: Rademacher functions, Gaussian processes, entropy.

3 units, not given this year

**MATH 236. Introduction to Stochastic Differential Equations**

Brownian motion, stochastic integrals, and diffusions as solutions of stochastic differential equations. Functionals of diffusions and their connection with partial differential equations. Random walk approximation of diffusions. Prerequisite: 136 or equivalent and differential equations.

3 units, Win (Papanicolaou, G)

**MATH 238. Mathematical Finance**

(Same as STATS 250) Stochastic models of financial markets. Forward and futures contracts. European options and equivalent martingale measures. Hedging strategies and management of risk. Term structure models and interest rate derivatives. Optimal stopping and American options. Corequisites: MATH 236 and 227 or equivalent.

3 units, Win (Papanicolaou, G)

**MATH 239. Computation and Simulation in Finance**

Monte Carlo, finite difference, tree, and transform methods for the numerical solution of partial differential equations in finance. Emphasis is on derivative security pricing. Prerequisite: 238 or equivalent.

3 units, Spr (Toussaint, A)

**MATH 240. Topics in Financial Mathematics: Fixed Income Models**

Introduction to continuous time models for arbitrage-free pricing of interest rate derivatives. Bonds, yields, and the construction of yield curves. Caps, floors, swaps, swaptions, and bond options. Short rate models. Yield curve models. Forward measures. Forward and futures. LIBOR and swap market models. Prerequisite: MATH 238.

3 units, Spr (Toussaint, A)

**MATH 244. Riemann Surfaces**

Compact Riemann surfaces and algebraic curves; cohomology of sheaves; Serre duality; Riemann-Roch theorem and application; Jacobians; Abel's theorem. May be repeated for credit.

3 units, not given this year

**MATH 245A. Topics in Algebraic Geometry: Moduli Theory**

Intersection theory on the moduli spaces of stable curves, stable maps, and stable vector bundles. May be repeated for credit.

3 units, not given this year

**MATH 245B. Topics in Algebraic Geometry: Dessin d'Enfants**

Grothendieck's theory of dessin d'enfants, a study of graphs on surfaces and their connection with the absolute Galois group of the rational numbers. Belyi's theorem, representations of the absolute Galois group as automorphisms of profinite groups, Grothendieck-Teichmüller theory, quadratic differentials, and the combinatorics of moduli spaces of surfaces. May be repeated for credit.

3 units, not given this year

**MATH 247. Topics in Group Theory**

Topics include the Burnside basis theorem, classification of  $p$ -groups, regular and powerful groups, Sylow theorems, the Frattini argument, nilpotent groups, solvable groups, theorems of P. Hall,

group cohomology, and the Schur-Zassenhaus theorem. The classical groups and introduction to the classification of finite simple groups and its applications. May be repeated for credit.

3 units, not given this year

**MATH 248. Algebraic Number Theory**

Harmonic analysis on number fields; Tate's Thesis; locally compact groups; adèles; Hecke Grossencharakteren. Applications may include Sato-Tate for CM elliptic curves, nonvanishing theorems, and extensions to larger groups. Prerequisite: basic knowledge of number theory and  $p$ -adic fields. May be repeated for credit.

3 units, Aut (Trotabas, D)

**MATH 248A. Algebraic Number Theory**

Structure theory and Galois theory of local and global fields, finiteness theorems for class numbers and units, adelic techniques. Prerequisites: MATH 210A,B.

3 units, not given this year

**MATH 249A. Arithmetic of abelian varieties**

Analytic theory over complex numbers, algebraic theory over general fields, dual abelian variety, endomorphism rings, and Galois representations. Theory over arithmetically interesting fields: finite fields, local fields, and global fields. Some discussion of moduli spaces or deformation theory if time permits. Prerequisites: familiarity with local and global fields, and 216A,B,C or permission of instructor.

3 units, Aut (Conrad, B)

**MATH 249B. Topics in Number Theory: Class Field Theory**

Classification of abelian extensions of local and global fields; classical, adelic, and cohomological formulations; applications to  $L$ -functions. May be repeated for credit.

3 units, not given this year

**MATH 249C. Topics in Number Theory: Class Field Theory and the Langlands Conjectures**

3 units, Spr (Soundararajan, K)

**MATH 250. Topics in Algebra**

3 units, Win (Licata, A)

**MATH 254. Geometric Methods in the Theory of Ordinary Differential Equations**

Topics may include: structural stability and perturbation theory of dynamical systems; hyperbolic theory; first order PDE; normal forms, bifurcation theory; Hamiltonian systems, their geometry and applications. May be repeated for credit.

3 units, not given this year

**MATH 256A. Partial Differential Equations**

The theory of linear and nonlinear partial differential equations, beginning with linear theory involving use of Fourier transform and Sobolev spaces. Topics: Schauder and  $L_2$  estimates for elliptic and parabolic equations; De Giorgi-Nash-Moser theory for elliptic equations; nonlinear equations such as the minimal surface equation, geometric flow problems, and nonlinear hyperbolic equations.

3 units, Spr (Staff)

**MATH 256B. Partial Differential Equations**

3 units, not given this year

**MATH 257A. Symplectic Geometry and Topology**

Linear symplectic geometry and linear Hamiltonian systems. Symplectic manifolds and their Lagrangian submanifolds, local properties. Symplectic geometry and mechanics. Contact geometry and contact manifolds. Relations between symplectic and contact manifolds. Hamiltonian systems with symmetries. Momentum map and its properties. May be repeated for credit.

3 units, not given this year

**MATH 257B. Symplectic Geometry and Topology**

Continuation of 257A. May be repeated for credit.

3 units, not given this year

**MATH 258. Topics in Geometric Analysis**

May be repeated for credit.

3 units, Aut (Brendle, S)

**MATH 261A. Functional Analysis**

Geometry of linear topological spaces. Linear operators and functionals. Spectral theory. Calculus for vector-valued functions. Operational calculus. Banach algebras. Special topics in functional analysis. May be repeated for credit.

3 units, not given this year

**MATH 263A. Lie Groups and Lie Algebras**

Definitions, examples, properties. Semi-simple Lie algebras, their structure and classification. Cartan decomposition: real Lie algebras. Representation theory: Cartan-Stiefel diagram, weights. Weyl character formula. Orthogonal and symplectic representations. May be repeated for credit. Prerequisite: 210 or equivalent.

3 units, Win (Conrad, B)

**MATH 263B. Lie Groups and Lie Algebras**

Continuation of 263A. May be repeated for credit.

3 units, Spr (Bump, D)

**MATH 264. Infinite Dimensional Lie Algebra**

3 units, Spr (Staff)

**MATH 266. Computational Signal Processing and Wavelets**

Theoretical and computational aspects of signal processing. Topics: time-frequency transforms; wavelet bases and wavelet packets; linear and nonlinear multiresolution approximations; estimation and restoration of signals; signal compression. May be repeated for credit.

3 units, not given this year

**MATH 269. Topics in symplectic geometry**

May be repeated for credit.

3 units, Win (Eliashberg, Y)

**MATH 270. Geometry and Topology of Complex Manifolds**

Complex manifolds, Kahler manifolds, curvature, Hodge theory, Lefschetz theorem, Kahler-Einstein equation, Hermitian-Einstein equations, deformation of complex structures. May be repeated for credit.

3 units, not given this year

**MATH 271. The H-Principle**

The language of jets. Thom transversality theorem. Holonomic approximation theorem. Applications: immersion theory and its generalizations. Differential relations and Gromov's h-principle for open manifolds. Applications to symplectic geometry. Microflexibility. Mappings with simple singularities and their applications. Method of convex integration. Nash-Kuiper  $C^1$ -isometric embedding theorem.

3 units, not given this year

**MATH 272. Topics in Partial Differential Equations**

3 units, Win (Liu, T)

**MATH 282A. Low Dimensional Topology**

The theory of surfaces and 3-manifolds. Curves on surfaces, the classification of diffeomorphisms of surfaces, and Teichmuller space. The mapping class group and the braid group. Knot theory, including knot invariants. Decomposition of 3-manifolds: triangulations, Heegaard splittings, Dehn surgery. Loop theorem, sphere theorem, incompressible surfaces. Geometric structures, particularly hyperbolic structures on surfaces and 3-manifolds.

3 units, Aut (Kerckhoff, S)

**MATH 282B. Homotopy Theory**

Homotopy groups, fibrations, spectral sequences, simplicial methods, Dold-Thom theorem, models for loop spaces, homotopy limits and colimits, stable homotopy theory.

3 units, Win (Galatius, S)

**MATH 282C. Fiber Bundles and Cobordism**

Possible topics: principal bundles, vector bundles, classifying spaces. Connections on bundles, curvature. Topology of gauge groups and gauge equivalence classes of connections. Characteristic classes and K-theory, including Bott periodicity, algebraic K-theory, and indices of elliptic operators. Spectral sequences of Atiyah-Hirzebruch, Serre, and Adams. Cobordism theory, Pontryagin-Thom theorem, calculation of unoriented and complex cobordism. May be repeated for credit.

3 units, Spr (Brumfiel, G)

**MATH 284A. Geometry and Topology in Dimension 3**

The Poincare conjecture and the uniformization of 3-manifolds. May be repeated for credit.

3 units, not given this year

**MATH 284B. Geometry and Topology in Dimension 3**

The Poincare conjecture and the uniformization of 3-manifolds. May be repeated for credit.

3 units, not given this year

**MATH 286. Topics in Differential Geometry**

May be repeated for credit.

3 units, Spr (Schoen, R)

**MATH 290B. Finite Model Theory**

(Same as PHIL 350B) Classical model theory deals with the relationship between formal languages and their interpretation in finite or infinite structures; its applications to mathematics using first-order languages. The recent development of the model theory of finite structures in connection with complexity classes as measures of computational difficulty; how these classes are defined within certain languages that go beyond first-order logic in expressiveness, such as fragments of higher order or infinitary languages, rather than in terms of models of computation.

3 units, Win (Mints, G)

**MATH 292A. Set Theory**

(Same as PHIL 352A) The basics of axiomatic set theory; the systems of Zermelo-Fraenkel and Bernays-Gödel. Topics: cardinal and ordinal numbers, the cumulative hierarchy and the role of the axiom of choice. Models of set theory, including the constructible sets and models constructed by the method of forcing. Consistency and independence results for the axiom of choice, the continuum hypothesis, and other unsettled mathematical and set-theoretical problems. Prerequisites: PHIL160A,B, and MATH 161, or equivalents.

3 units, not given this year

**MATH 292B. Set Theory**

(Same as PHIL 352B) The basics of axiomatic set theory; the systems of Zermelo-Fraenkel and Bernays-Gödel. Topics: cardinal and ordinal numbers, the cumulative hierarchy and the role of the axiom of choice. Models of set theory, including the constructible sets and models constructed by the method of forcing. Consistency and independence results for the axiom of choice, the continuum hypothesis, and other unsettled mathematical and set-theoretical problems. Prerequisites: PHIL160A,B, and MATH 161, or equivalents.

3 units, not given this year

**MATH 293A. Proof Theory**

(Same as PHIL 353A) Gentzen's natural deduction and sequential calculi for first-order propositional and predicate logics. Normalization and cut-elimination procedures. Relationships with computational lambda calculi and automated deduction. Prerequisites: 151, 152, and 161, or equivalents.

3 units, Aut (Mints, G; Inocencio Ferreira, F)

**MATH 295. Computation and Algorithms in Mathematics**

Use of computer and algorithmic techniques in various areas of mathematics. Computational experiments. Topics may include polynomial manipulation, Groebner bases, computational geometry, and randomness. May be repeated for credit.

3 units, not given this year

**MATH 355. Graduate Teaching Seminar**

Required of and limited to first-year Mathematics graduate students.

1 unit, Spr (Staff)

**MATH 360. Advanced Reading and Research**

(Staff)

1-9 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**MATH 361. Research Seminar Participation**

Participation in a faculty-led seminar which has no specific course number. (Staff)

1-3 units, Aut (Staff), Win (White, B), Spr (Kerckhoff, S), Sum (Staff)

**MATH 380. Seminar in Applied Mathematics**

Guest speakers on recent advances in applied mathematics. May be repeated for credit.

1 unit, Aut (Staff), Win (Staff), Spr (Staff)

**MATH 381. Seminar in Analysis**

1-3 units, by arrangement

**MATH 384. Seminar in Geometry**

1 unit, by arrangement

**MATH 385. Seminar in Topology**

1-3 units, by arrangement

**MATH 386. Mathematics Colloquium**

Guest speakers on recent advances in mathematics. May be repeated for credit.

1 unit, Aut (Staff), Win (Staff), Spr (Staff)

**MATH 387. Seminar in Number Theory**

May be repeated for credit.

1 unit, Aut (Staff), Win (Staff), Spr (Staff)

**MATH 388. Seminar in Probability and Stochastic Processes**

1-3 units, by arrangement

**MATH 389. Seminar in Mathematical Biology**

1-3 units, by arrangement

**MATH 391. Research Seminar in Logic and the Foundations of Mathematics**

(Same as PHIL 391) Contemporary work. May be repeated a total of three times for credit.

1-3 units, Aut (Mints, G; Feferman, S), Win (Mints, G; Feferman, S), Spr (Mints, G; Feferman, S)

**MATH 395. Classics in Geometry and Topology**

Original papers in geometry and in algebraic and geometric topology. May be repeated for credit.

3 units, Win (Kerckhoff, S)

**MATH 396. Graduate Progress**

Results and current research of graduate and postdoctoral students. May be repeated for credit.

1 unit, Aut (Staff), Win (Staff), Spr (Staff)

## MECHANICAL ENGINEERING (ME)

### UNDERGRADUATE COURSES IN MECHANICAL ENGINEERING

**ME 10AX. Design Thinking and the Art of Innovation**

The fundamentals of design. Skills-based, experiential exploration in design. Topics include improvisation, needfinding, visualization, prototyping, radical collaboration, design communication, and storytelling.

2 units, Aut (Crandall, R; Geehr, C; Kembel, G)

**ME 12N. The Jet Engine**

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. How a jet engine works; the technologies and analytical techniques required to understand them. Dynamics, thermodynamics, turbomachinery, combustion, advanced materials, cooling technologies, and control systems. Visits to research laboratories, examination of a partially disassembled engine, and probable operation of a small jet engine. Prerequisites: high school physics. GER:DB-EngrAppSci

3 units, Aut (Eaton, J)

**ME 14N. How Stuff Is Made**

(F,Sem) Stanford Introductory Seminar. The design and engineering of products and processes. Machined, fabric, food, and electrical goods. Tradeoffs in choice of serial, continuous, and batch fabrication. Final project: students research and create a web site about the engineering aspects of a product and its processes. Field trips to manufacturing facilities.

3 units, Spr (Staff)

**ME 18Q. Teamology: Creative Teams and Individual Development**

(S,Sem) Stanford Introductory Seminar. Preference to sophomores. Roles on a problem solving team that best suit individual creative characteristics. Two teams are formed for teaching experientially how to develop less conscious abilities from teammates creative in those roles. Reinforcement teams have members with similar personalities; problem solving teams are composed of people with maximally different personalities.

3 units, Aut (Wilde, D)

**ME 25N. Global Warming and Climate Change: Fact or Fiction**

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Scientific arguments concerning debates between the view that anthropogenic activities are not causing global warming versus the view that these activities are responsible for a global warming that results in significant climate change. Consequences of increased

demand for energy. Prerequisites: high school physics, chemistry, and biology.

3 units, Win (Bowman, C)

**ME 26N. Think Like a Designer**

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Techniques designers use to create innovative solutions across domains. Project-based. Emphasis is on approaches to problem identification and problem solving. Topics include need finding, structured brainstorming, synthesis, rapid prototyping, and visual communication. Field trips to a local design firm, a robotics lab, and a machining lab. The pleasures of creative design and hands-on development of tangible solutions.

3 units, Aut (Burnett, W)

**ME 70. Introductory Fluids Engineering**

Elements of fluid mechanics as applied to engineering problems. Equations of motion for incompressible ideal flow. Hydrostatics. Control volume laws for mass, momentum, and energy. Bernoulli equation. Dimensional analysis and similarity. Flow in ducts. Boundary layer flows. Lift and drag. Lab experiment demonstrations. Prerequisites: ENGR 14 and 30. GER:DB-EngrAppSci

4 units, Win (Iaccarino, G), Spr (Cappelli, M)

**ME 80. Mechanics of Deformable Bodies**

Mechanics of materials and deformation of structural members. Topics include stress and deformation analysis under axial loading, torsion and bending, column buckling and pressure vessels. Introduction to stress transformation and multiaxial loading. Prerequisite: ENGR 14. GER:DB-EngrAppSci

4 units, Aut (Cai, W), Spr (Levenston, M)

**ME 101. Visual Thinking**

Lecture/lab. Visual thinking and language skills are developed and exercised in the context of solving design problems. Exercises for the mind's eye. Rapid visualization and prototyping with emphasis on fluent and flexible idea production. The relationship between visual thinking and the creative process. Enrollment limited to 60. GER:DB-EngrAppSci

3 units, Aut (Northway, D; Klaubert, H), Win (Meissner, S; Gleason, P), Spr (Northway, D; Klaubert, H)

**ME 103D. Engineering Drawing and Design**

Designed to accompany 203. The fundamentals of engineering drawing including orthographic projection, dimensioning, sectioning, exploded and auxiliary views, and assembly drawings. Homework drawings are of parts fabricated by the student in the lab. Assignments in 203 supported by material in 103D and sequenced on the assumption that the student is enrolled in both courses simultaneously.

1 unit, Aut (Milroy, J), Win (Milroy, J)

**ME 104. The Designer's Voice**

How to develop a point of view about a design career in order to articulate a design vision, inspire a design studio, or infect a business with a culture of design thinking. Focus is on the integration of work and worldview, professional values, design language, and the development of the designer's voice. Role play, guest speakers, individual mentoring and coaching, student journals. Restricted to undergraduate Product Design seniors.

1 unit, Aut (Evans, D; Burnett, W)

**ME 110. Design Sketching**

Freehand sketching, rendering, and design development. Students develop a design sketching portfolio for review by program faculty. May be repeated for credit.

1 unit, Aut (Li, W; Scott, W), Win (Li, W; Scott, W), Spr (Li, W; Scott, W)

**ME 112. Mechanical Systems Design**

Lecture/lab. Characteristics of machine elements including gears, bearings, and shafts. Design for fatigue life. Electric motor fundamentals. Transmission design for maximizing output power or efficiency. Mechanism types, linkage analysis and kinematic synthesis. Team-based design projects emphasizing the balance of physical with virtual prototyping based on engineering analysis. Lab for dissection of mechanical systems and project design reviews. Prerequisites: 80, 101. Recommended: 203, ENGR 15. GER:DB-EngrAppSci

4 units, Win (Cutkosky, M)

**ME 113. Mechanical Engineering Design**

Goal is to create designs and models of new mechanical devices.

Design is experienced by students as they work on a team design project obtained from industry or other organizations. Prerequisites: 80, 101, 112. GER:DB-EngrAppSci

4 units, Spr (Nelson, D)

### ME 115A. Introduction to Human ValueS in Design

Lecture/lab. . Introduces the central philosophy of the product design program, emphasizing the relation between technical and human values, the innovation process, and design methodology. Lab exercises include development of simple product concepts visualized in rapidly executed three-dimensional mockups. Prerequisite: 101.

3 units, Aut (Thomsen, D)

### ME 115B. Product Design Methods

Problem-finding, problem-solving, intermediate creativity methods and effective techniques for researching and presenting product concepts. Individual- and team-based design projects emphasizing advanced visual thinking and prototyping skills. Prerequisite: ME115A GER:DB-EngrAppSci

3 units, Win (Chia, B)

### ME 116. Advanced Product Design: Formgiving

Small- and medium-scale design projects are carried to a high degree of aesthetic refinement. Emphasis is on form development, design process, and model making. Prerequisites: ME 115B, ARTSTUDI 160. GER:DB-EngrAppSci

4 units, Aut (Staff)

### ME 120. History and Philosophy of Design

Major schools of 19th- and 20th-century design (Arts-and-Crafts movement, Bauhaus, Industrial Design, and postmodernism) are analyzed in terms of their continuing cultural relevance. The relation of design to art, technology, and politics; readings from principal theorists, practitioners, and critics; recent controversies in industrial and graphic design, architecture, and urbanism. Enrollment limited to 40. GER:DB-EngrAppSci

3-4 units, Spr (Katz, B)

### ME 131A. Heat Transfer

The principles of heat transfer by conduction, convection, and radiation with examples from the engineering of practical devices and systems. Topics include transient and steady conduction, conduction by extended surfaces, boundary layer theory for forced and natural convection, boiling, heat exchangers, and graybody radiative exchange. Prerequisites: 70, ENGR 30. Recommended: intermediate calculus, ordinary differential equations. GER:DB-EngrAppSci

3-4 units, Aut (Goodson, K)

### ME 131B. Fluid Mechanics: Compressible Flow and Turbomachinery

Engineering applications involving compressible flow: aircraft and rocket propulsion, power generation; application of mass, momentum, energy and entropy balance to compressible flows; variable area isentropic flow, normal shock waves, adiabatic flow with friction, flow with heat addition. Operation of flow systems: the propulsion system. Turbomachinery: pumps, compressors, turbines. Angular momentum analysis of turbomachine performance, centrifugal and axial flow machines, effect of blade geometry, dimensionless performance of turbomachines; hydraulic turbines; steam turbines; wind turbines. Compressible flow turbomachinery: the aircraft engine. Prerequisites: 70, ENGR 30. GER:DB-EngrAppSci

4 units, Win (Lele, S)

### ME 140. Advanced Thermal Systems

Capstone course. Thermal analysis and engineering emphasizing integrating heat transfer, fluid mechanics, and thermodynamics into a unified approach to treating complex systems. Mixtures, humidity, chemical and phase equilibrium, and availability. Labs apply principles through hands-on experience with a turbojet engine, PEM fuel cell, and hybrid solid/oxygen rocket motor. Use of MATLAB as a computational tool. Prerequisites: ENGR 30, ME 70, and 131A,B. GER:DB-EngrAppSci

5 units, Spr (Mitchell, R)

### ME 150. Internal Combustion Engines

Internal combustion engines including conventional and turbo-charged spark ignition, and diesel engines. Lectures: basic engine cycles, engine components, methods of analysis of engine performance, pollutant emissions, and methods of engine testing. Lab

involves hands-on experience with engines and test hardware. Limited enrollment. Prerequisites: 140. GER:DB-EngrAppSci

3 units, Aut (Edwards, C)

### ME 161. Dynamic Systems, Vibrations and Control

(Same as ME 261) (Graduate students only enroll in 261.) Modeling, analysis, and measurement of mechanical and electromechanical systems. Numerical and closed form solutions of ordinary differential equations governing the behavior of single and multiple degree of freedom systems. Stability, resonance, amplification and attenuation, and control system design. Prerequisite: background in dynamics and calculus such as ENGR 15 and MATH 43. Recommended: CME 102, and familiarity with differential equations, linear algebra, and basic electronics. GER:DB-EngrAppSci

3-4 units, Aut (Mitiguy, P)

### ME 190. Ethical Issues in Mechanical Engineering

Moral rights and responsibilities of engineers in relation to society, employers, colleagues, and clients; cost-benefit-risk analysis, safety, and informed consent; whistle blowing; engineers as expert witnesses, consultants, and managers; ethical issues in engineering design, manufacturing, and operations, and engineering work in foreign countries; and ethical implications of the social and environmental contexts of contemporary engineering. Case studies and field research. Enrollment limited to 25 Mechanical Engineering majors.

4 units, not given this year

### ME 191. Engineering Problems and Experimental Investigation

Directed study and research for undergraduates on a subject of mutual interest to student and staff member. Student must find faculty sponsor and have approval of adviser.

1-5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

### ME 191H. Honors Research

Student must find faculty honors adviser and apply for admission to the honors program. (Staff)

1-5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

### ME 196. Design and Manufacturing Forum

(Same as ME 396) Guest speakers address issues of interest to design and manufacturing engineers. Sponsored by Stanford Engineering Club for Automation and Manufacturing (SECAM). May be repeated for credit

1 unit, Win (Reis, R), Spr (Reis, R)

### ME 203X. Prototyping and Process Capture

Adjunct to ME 203 to offer greater depth in prototyping strategy, technique, and resultant insights. Concepts and methods for low resolution prototyping as an integral activity in engineering design process. Presentations by faculty and design oriented exercises by students. Enrollment limited to 6. Corequisite: ME 203.

1 unit, Aut (Beach, D; Geehr, C), Win (Geehr, C; Beach, D)

### ME 239. Mechanics of the Cell

Kinematical description of basic structural elements used to model parts of the cell: rods, ropes, membranes, and shells. Formulation of constitutive equations: nonlinear elasticity and entropic contributions. Elasticity of polymeric networks. Applications to model basic filaments of the cytoskeleton: actin, microtubules, intermediate filaments, and complete networks. Applications to biological membranes. (Jacobs)

3 units, Spr (Kuhl, E)

### ME 281. Biomechanics of Movement

(Same as BIOE 281) Experimental techniques to study human and animal movement including motion capture systems, EMG, force plates, medical imaging, and animation. The mechanical properties of muscle and tendon, and quantitative analysis of musculoskeletal geometry. Projects and demonstrations emphasize applications of mechanics in sports, orthopedics, and rehabilitation. GER:DB-EngrAppSci

3 units, Win (Delp, S)

### ME 338B. Continuum Mechanics

Constitutive theory; equilibrium constitutive relations; material frame indifference and material symmetry; finite elasticity; formulation of the boundary value problem; linearization and well-posedness; symmetries and configurational forces; numerical considerations.

3 units, alternate years, not given this year

## GRADUATE COURSES IN MECHANICAL ENGINEERING

### ME 115C. Design and Business Factors

Introduction to business concepts critical to determining the success of new products and services. Students will learn to estimate cost of R&D and capital investment for new product development. Risk analysis, ROI, and using tollgates to reduce development risk will be explored using case studies and simulations. Students will develop a bill of materials and a supply chain analysis for their product concepts, as well as write a business proposal for a proposed new product company.

3 units, Spr (Staff)

### ME 201. Dim Sum of Mechanical Engineering

Introduction to research in mechanical engineering for M.S. students and upper-division undergraduates. Weekly presentations by current ME Ph.D. and second-year fellowship students to show research opportunities across the department. Strategies for getting involved in a research project. (Sheppard)

1 unit, Aut (Kuhl, E; Gardella, I)

### ME 203. Design and Manufacturing

Prototype development techniques as an intrinsic part of the design process. Machining, welding, and casting. Manufacturing processes. Design aspects developed in an individual term project chosen, designed, and fabricated by students. Labs, field trips. Undergraduates majoring in Mechanical Engineering or Product Design must take course for 4 units. Limited enrollment with consent of instructor. Corequisite: 103D or CAD experience. Corequisite for WIM for Mechanical Engineering and Product Design majors: ENGR 102M. Recommended: 101.

4 units, Aut (Beach, D), Win (Beach, D)

### ME 204. Bicycle Design and Frame-Building

Lecture/lab. The engineering and artistic execution of designing and building a bicycle frame. Fundamentals of bicycle dynamics, handling, and sizing. Manufacturing processes. Films, guest lecturers, field trips. Each student designs and fabricates a custom bicycle frame. Limited enrollment. Prerequisite: 203 or equivalent.

3 units, Spr (Connolly, R)

### ME 206A. Entrepreneurial Design for Extreme Affordability

Project course jointly offered by School of Engineering and Graduate School of Business. Students apply engineering and business skills to design product prototypes, distribution systems, and business plans for entrepreneurial ventures in developing countries for a specified challenge faced by the world's poor. Topics include user empathy, appropriate technology design, rapid prototype engineering and testing, social technology entrepreneurship, business modeling, and project management. Weekly design reviews; final course presentation. Industry and adviser interaction. Limited enrollment via application; see <http://www.stanford.edu/class/me206>.

4 units, Win (Beach, D; Patell, J)

### ME 206B. Entrepreneurial Design for Extreme Affordability

Project course jointly offered by School of Engineering and Graduate School of Business. Students apply engineering and business skills to design product prototypes, distribution systems, and business plans for entrepreneurial ventures in developing countries for a specified challenge faced by the world's poor. Topics include user empathy, appropriate technology design, rapid prototype engineering and testing, social technology entrepreneurship, business modeling, and project management. Weekly design reviews; final course presentation. Industry and adviser interaction. Limited enrollment via application; see <http://www.stanford.edu/class/me206>.

4 units, Spr (Patell, J; Beach, D)

### ME 207. Negotiation

(Same as CEE 151, CEE 251, MS&E 285) Negotiation styles and processes to help students conduct and review negotiations. Workshop format integrating intellectual and experiential learning. Exercises, presentations, live and field examples, and individual and small group reviews. Application required before first day of class; see Coursework.

3 units, Aut (Christensen, S), Spr (Christensen, S)

### ME 208. Patent Law and Strategy for Innovators and Entrepreneurs

How to build a patent portfolio and avoid patent infringement. How to conduct a patent search. How to file a provisional patent application.

2-3 units, Aut (Schox, J)

### ME 210. Introduction to Mechatronics

Technologies involved in mechatronics (intelligent electro-mechanical systems), and techniques to apply this technology to mechatronic system design. Topics include: electronics (A/D, D/A converters, op-amps, filters, power devices); software program design, event-driven programming; hardware and DC stepper motors, solenoids, and robust sensing. Large, open-ended team project. Limited enrollment. Prerequisites: ENGR 40, CS 106, or equivalents.

4 units, Win (Kenny, T; Ohline, R)

### ME 212. Calibrating the Instrument

For first-year graduate students in the Joint Program in Design. Means for calibrating the designer's mind/body instrument through tools including improvisation, brainstorming, creative imaging, educational kinesiology, and Brain Gym. Current design issues; guest speakers; shared stories; and goal setting.

1 unit, Aut (Edmark, J)

### ME 216A. Advanced Product Design: Needfinding

Human needs that lead to the conceptualization of future products, environments, systems, and services. Field work in public and private settings; appraisal of personal values; readings on social ethnographic issues; and needfinding for a corporate client. Emphasis is on developing the flexible thinking skills that enable the designer to navigate the future. Prerequisites for undergraduates: 116 and 203, or consent of the instructor. Prerequisites for graduate students: 203 and 313, or consent of the instructor.

3-4 units, Win (Barry, M; Patnaik, D)

### ME 216B. Advanced Product Design: Implementation

Summary project using knowledge, methodology, and skills obtained in Product Design major. Students implement an original design concept and present it to a professional jury. Prerequisite: 216A.

3-4 units, Spr (Burnett, W)

### ME 218A. Smart Product Design Fundamentals

Lecture/lab. Team design project series on programmable electro-mechanical systems design. Topics: transistors as switches, digital and analog circuits, operational amplifiers, comparators, software design, programming in C. Lab fee. Limited enrollment.

4-5 units, Aut (Carryer, J)

### ME 218B. Smart Product Design Applications

Lecture/lab. Second in team design project series on programmable electromechanical systems design. Topics: user I/O, timer systems, interrupts, signal conditioning, software design for embedded systems, sensors, actuators, noise, and power supplies. Lab fee. Limited enrollment. Prerequisite: 218A or passing the smart product design fundamentals proficiency examination.

4-5 units, Win (Carryer, J)

### ME 218C. Smart Product Design Practice

Lecture/lab. Advanced level in series on programmable electromechanical systems design. Topics: inter-processor communication, system design with multiple microprocessors, architecture and assembly language programming for the PIC microcontroller, controlling the embedded software tool chain, A/D and D/A techniques, electronic manufacturing technology. Team project. Lab fee. Limited enrollment. Prerequisite: 218B.

4-5 units, Spr (Carryer, J)

### ME 218D. Smart Product Design: Projects

Lecture/lab. Industrially sponsored project is the culmination of the Smart Product Design sequence. Student teams take on an industrial project requiring application and extension of knowledge gained in the prior three quarters, including prototyping of a final solution with hardware, software, and professional documentation and presentation. Lectures on electronic and software design, and electronic manufacturing techniques. Topics: chip level design of microprocessor systems, real time operating systems, alternate microprocessor architectures, and PCB layout and fabrication.

4 units, Aut (Carryer, J)

**ME 219. The Magic of Materials and Manufacturing**

Lecture/lab. Methods for market-quantity manufacturing of parts and products from a product designer's point of view. Materials including metals, plastics, ceramics, fibers, and foams, and processes that manipulate, exploit, transform, and modify these materials. Visual descriptions of processes, product examples, relevant material details, cost information, and manufacturability rules-of-thumb. Imagining and creating new products. Manufacturing site visits; laboratory projects. Enrollment limited to 20.

3 units, Spr (Beach, D; Johnson, K)

**ME 220. Introduction to Sensors**

Sensors are widely used in scientific research and as an integral part of commercial products and automated systems. The basic principles for sensing displacement, force, pressure, acceleration, temperature, optical radiation, nuclear radiation, and other physical parameters. Performance, cost, and operating requirements of available sensors. Elementary electronic circuits which are typically used with sensors. Lecture demonstration of a representative sensor from each category elucidates operating principles and typical performance. Lab experiments with off-the-shelf devices.

3-4 units, Spr (Kenny, T)

**ME 221. Green Design Strategies and Metrics**

Foundation in sustainable product design principles, reinforced by conceptual design projects. What aspects of sustainability matter most for different products. Application of strategies to improve product sustainability. Frameworks, measurements, and decision making tools to navigate the complexities of designing greener products. Life-cycle analysis, materials, energy use, biomimicry, product-service systems, persuasive design, design for end-of-life, and systems thinking.

2 units, Win (Faludi, J)

**ME 222. Design for Sustainability**

Lecture/lab. Role of design in building a sustainable world. How to include sustainability in the design process considering environmental, cultural, and social impacts. Focus is on a proactive design approach, and the tools and techniques needed to translate theory into artifact.

2-3 units, Spr (Fleming, H; Carter, K)

**ME 227. Vehicle Dynamics and Control**

The application of dynamics, kinematics, and control theory to the analysis and design of ground vehicle behavior. Simplified models of ride, handling, and braking, their role in developing intuition, and limitations in engineering design. Suspension design fundamentals. Performance and safety enhancement through automatic control systems. In-car laboratory assignments for model validation and kinesthetic understanding of dynamics. Limited enrollment. Prerequisites: ENGR 105, consent of instructor.

3 units, Spr (Gerdes, C)

**ME 233. Making it Big: Crossing the Entrepreneur's Gap**

Students take novel designs into entrepreneurial production and prepare for market production. Education, resources, and community to help cross the gap, found ideas and make them real in volume. Topics include entrepreneurial production methods and initiation, vendor selection and engagement, cost, design transfer, quality and testing, and manufacturing planning and execution. Leadership roles in entrepreneurial and large production-oriented companies. Case studies, project reviews, final presentation, industry interaction.

3 units, Aut (Theeuwes, M)

**ME 238. Patent Prosecution**

(Same as LAW 321.) Stages of the patent application process: identifying, capturing, and evaluating inventions; performing a patentability investigation, analyzing the documents, and the scope of the patent protection; composing claims that broadly cover the invention; creating a specification that supports the claims; filing a patent application with the U.S. Patent and Trademark Office; and analyzing an office action and preparing an appropriate response. Current rules and case law. Strategic decisions within each stage, such as: how does a patent application advance the patent portfolio; and in what countries should a patent application be filed?

2-3 units, Win (Schox, J)

**ME 257. Turbine and Internal Combustion Engines**

(Same as ME 357) Principles of design analysis for aircraft gas turbines and automotive piston engines. Analysis for aircraft en-

gines performed for Airbus A380 type aircraft. Design parameters determined considering aircraft aerodynamics, gas turbine thermodynamics, compressible flow physics, and material limitations. Additional topics include characteristics of main engine components, off-design analysis, and component matching. Performance of automotive piston engines including novel engine concepts in terms of engine thermodynamics, intake and exhaust flows, and in-cylinder flow.

3 units, Win (Pitsch, H)

**ME 260. Fuel Cell Science and Technology**

Emphasis on proton exchange membrane (PEM) and solid oxide fuel cells (SOFC), and principles of electrochemical energy conversion. Topics in materials science, thermodynamics, and fluid mechanics. Prerequisites: MATH 43, PHYSICS 55, and ENGR 30 or ME 140, or equivalents.

3 units, Spr (Prinz, F; Shim, J)

**ME 261. Dynamic Systems, Vibrations and Control**

(Same as ME 161) (Graduate students only enroll in 261.) Modeling, analysis, and measurement of mechanical and electromechanical systems. Numerical and closed form solutions of ordinary differential equations governing the behavior of single and multiple degree of freedom systems. Stability, resonance, amplification and attenuation, and control system design. Prerequisite: background in dynamics and calculus such as ENGR 15 and MATH 43. Recommended: CME 102, and familiarity with differential equations, linear algebra, and basic electronics.

3-4 units, Aut (Mitiguy, P)

**ME 265. Technology Licencing and Commercialization**

How to profit from technology; processes and strategies to commercialize functional or artistic inventions and creations (not limited to mechanical engineering). Business and legal aspects of determining what can be owned and licensed, how to determine commercial value, and what agreements are necessary. Contract and intellectual property law; focus is on provisions of license agreements and their negotiation.

3 units, Spr (Hustein, J)

**ME 275. The Ecosystem of Design**

This course is offered in conjunction with a 10-week symposium that will explore the range of the professional practices that constitutes "The Ecosystem of Design" today. Each week a leading representative of one of the many faces of design will present. Presentations include the Independent Design Office, the Independent Studio, the Design Publisher, and the Design Curator. A hands-on workshop will be led by faculty from the Hasso Plattner Institute for Design.

1 unit, Aut (Katz, B)

**ME 280. Skeletal Development and Evolution**

(Same as BIOE 280, BIOE 280) The mechanobiology of skeletal growth, adaptation, regeneration, and aging is considered from developmental and evolutionary perspectives. Emphasis is on the interactions between mechanical and chemical factors in the regulation of connective tissue biology. Prerequisites: 80, or Human Biology core, or Biological Sciences core.

3 units, Spr (Carter, D)

**ME 284A. Cardiovascular Bioengineering**

(Same as BIOE 284A) Bioengineering principles applied to the cardiovascular system. Anatomy of human cardiovascular system, comparative anatomy, and allometric scaling principles. Cardiovascular molecular and cell biology. Overview of continuum mechanics. Form and function of blood, blood vessels, and the heart from an engineering perspective. Normal, diseased, and engineered replacement tissues.

3 units, Aut (Taylor, C)

**ME 284B. Cardiovascular Bioengineering**

(Same as BIOE 284B) Continuation of ME 284A. Integrative cardiovascular physiology, blood fluid mechanics, and transport in the microcirculation. Sensing, feedback, and control of the circulation. Overview of congenital and adult cardiovascular disease, diagnostic methods, and treatment strategies. Engineering principles to evaluate the performance of cardiovascular devices and the efficacy of treatment strategies.

3 units, Win (Taylor, C)

**ME 287. Soft Tissue Mechanics**

Structure/function relationships and mechanical properties of soft

tissues, including nonlinear elasticity, viscoelasticity, and poroelasticity. Undergraduates require consent of instructor.

3 units, Aut (Levenston, M)

#### **ME 289. Biomechanical Engineering Research Seminar**

BME research conducted at Stanford for incoming students. Graduate students and postdoctoral fellows present research emphasizing motivation of research questions, project design, methods, and preliminary results.

1 unit, not given this year

#### **ME 294. Medical Device Design**

In collaboration with the School of Medicine. Introduction to medical device design for undergraduate and graduate engineering students. Design and prototyping. Labs; medical device environments may include hands-on device testing; and field trips to operating rooms and local device companies. Limited enrollment. Prerequisite: 203.

3 units, Aut (Milroy, J)

#### **ME 297. Forecasting for Innovators: Technology, Tools & Social Change**

Goal is to develop a 25-year forecast of the future of engineering including the challenges engineers are likely to be asked to solve, and how engineers can be prepared to meet these challenges. Students prepare a long-range forecast of a specific science/engineering sector and a proposed initiative tying new engineering capabilities with global challenges.

1-3 units, Win (Saffo, P; Benjamin, C)

#### **ME 298. Silversmithing and Design**

Skills involved in working with precious metals at a small scale. Investment casting and fabrication techniques such as reticulation, granulations, filigree, and mokume gane.

3-4 units, Win (Shaughnessy, S; Knox Sather, A)

#### **ME 299A. Practical Training**

For master's students. Educational opportunities in high technology research and development labs in industry. Students engage in internship work and integrate that work into their academic program. Following internship work, students complete a research report outlining work activity, problems investigated, key results, and follow-up projects they expect to perform. Meets the requirements for curricular practical training for students on F-1 visas. Student is responsible for arranging own internship/employment and faculty sponsorship. Register under faculty sponsor's section number. All paperwork must be completed by student and faculty sponsor, as the Student Services Office does not sponsor CPT. Students are allowed only one quarter of CPT per degree program.

1 unit, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

#### **ME 299B. Practical Training**

For Ph.D. students. Educational opportunities in high technology research and development labs in industry. Students engage in internship work and integrate that work into their academic program. Following internship work, students complete a research report outlining work activity, problems investigated, key results, and follow-up projects they expect to perform. Meets the requirements for curricular practical training for students on F-1 visas. Student is responsible for arranging own internship/employment and faculty sponsorship. Register under faculty sponsor's section number. All paperwork must be completed by student and faculty sponsor, as the student services office does not sponsor CPT. Students are allowed only one quarter of CPT per degree program.

1 unit, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

#### **ME 300A. Linear Algebra with Application to Engineering Computations**

(Same as CME 200) Computer based solution of systems of algebraic equations obtained from engineering problems and eigen-system analysis, Gaussian elimination, effect of round-off error, operation counts, banded matrices arising from discretization of differential equations, ill-conditioned matrices, matrix theory, least square solution of unsolvable systems, solution of non-linear algebraic equations, eigenvalues and eigenvectors, similar matrices, unitary and Hermitian matrices, positive definiteness, Cayley-Hamilton theory and function of a matrix and iterative methods. Prerequisite: familiarity with computer programming, and MATH103, 130, or equivalent.

3 units, Aut (Moin, P)

#### **ME 300B. Partial Differential Equations in Engineering**

(Same as CME 204) Geometric interpretation of partial differential equation (PDE) characteristics; solution of first order PDEs and classification of second-order PDEs; self-similarity; separation of variables as applied to parabolic, hyperbolic, and elliptic PDEs; special functions; eigenfunction expansions; the method of characteristics. If time permits, Fourier integrals and transforms, Laplace transforms. Prerequisite: CME 200/ME 300A, equivalent, or consent of instructor.

3 units, Win (Staff)

#### **ME 300C. Introduction to Numerical Methods for Engineering**

(Same as CME 206) Numerical methods from a user's point of view. Lagrange interpolation, splines. Integration: trapezoid, Romberg, Gauss, adaptive quadrature; numerical solution of ordinary differential equations: explicit and implicit methods, multistep methods, Runge-Kutta and predictor-corrector methods, boundary value problems, eigenvalue problems; systems of differential equations, stiffness. Emphasis is on analysis of numerical methods for accuracy, stability, and convergence. Introduction to numerical solutions of partial differential equations; Von Neumann stability analysis; alternating direction implicit methods and nonlinear equations. Prerequisites: CME 200/ME 300A, CME 204/ME 300B.

3 units, Spr (Staff)

#### **ME 302. The Future of the Automobile**

(Same as CS 523) The concept of this course is to present, discuss, and envision the future of the automobile in terms of sustainability, safety, performance, and enjoyment. Invited speakers from academia and industry share their own visions, explain challenges, and present solutions regarding individual transportation. After each session the students research specific questions related to the lectures and present their findings in the following week. This course is offered by Stanford's Automotive Program with faculty involvement from mechanical engineering, computer science, and communications.

1 unit, Aut (Beiker, S; Gerdes, C; Thrun, S), Win., Spr (Staff)

#### **ME 304. The Designer's Voice**

How to develop a point of view about a design career in order to articulate a design vision, inspire a design studio, or infect a business with a culture of design thinking. Focus is on the integration of work and worldview, professional values, design language, and the development of the designer's voice. Role play, guest speakers, individual mentoring and coaching, student journals. Restricted to Joint Product in Design graduate students.

1 unit, Win (Evans, D; Burnett, W)

#### **ME 308. Spatial Motion**

The geometry of motion in Euclidean space. Fundamentals of theory of screws with applications to robotic mechanisms, constraint analysis, and vehicle dynamics. Methods for representing the positions of spatial systems of rigid bodies with their interrelationships; the formulation of Newton-Euler kinetics applied to serial chain systems such as industrial robotics.

3 units, alternate years, not given this year

#### **ME 309. Finite Element Analysis in Mechanical Design**

Basic concepts of finite elements, with applications to problems confronted by mechanical designers. Linear static, modal, and thermal formulations; nonlinear and dynamic formulations. Students implement simple element formulations. Application of a commercial finite element code in analyzing design problems. Issues: solution methods, modeling techniques, features of various commercial codes, basic problem definition. Individual projects focus on the interplay of analysis and testing in product design/development. Prerequisite: MATH 103, or equivalent. Recommended: 80, or equivalent in structural and/or solid mechanics; some exposure to principles of heat transfer.

3 units, Spr (Kuhl, E; Levenston, M; Sheppard, S)

#### **ME 310A. Project-Based Engineering Design, Innovation, and Development**

Three quarter sequence; for engineering graduate students intending to lead projects related to sustainability, automotive, biomedical devices, communication, and user interaction. Student teams collaborate with academic partners in Europe, Asia, and Latin America on product innovation challenges presented by global corporations to design requirements and construct functional prototypes for consumer testing and technical evaluation. Design loft

format such as found in Silicon Valley consultancies. Typically requires international travel. Prerequisites: undergraduate engineering design project; consent of instructor.

4 units, Aut (Leifer, L)

**ME 310B. Project-Based Engineering Design, Innovation, and Development**

(Same as ENGR 310B) Three quarter sequence; for engineering graduate students intending to lead projects related to sustainability, automotive, biomedical devices, communication, and user interaction. Student teams collaborate with academic partners in Europe, Asia, and Latin America on product innovation challenges presented by global corporations to design requirements and construct functional prototypes for consumer testing and technical evaluation. Design loft format such as found in Silicon Valley consultancies. Typically requires international travel. Prerequisites: undergraduate engineering design project; consent of instructor.

4 units, Win (Leifer, L)

**ME 310C. Project-Based Engineering Design, Innovation, and Development**

Three quarter sequence; for engineering graduate students intending to lead projects related to sustainability, automotive, biomedical devices, communication, and user interaction. Student teams collaborate with academic partners in Europe, Asia, and Latin America on product innovation challenges presented by global corporations to design requirements and construct functional prototypes for consumer testing and technical evaluation. Design loft format such as found in Silicon Valley consultancies. Typically requires international travel. Prerequisites: undergraduate engineering design project; consent of instructor.

4 units, Spr (Leifer, L)

**ME 311. Design Strategy & Leadership**

The class covers the topics of the business of design, design as strategy and design research. In addition, students will learn to lead brainstorming, needfinding, and design strategy workshops with peers and industry leaders. Prerequisite: ME313, ME312

3 units, Spr (Staff)

**ME 312. Advanced Product Design: Formgiving**

Lecture/lab. Small- and medium-scale design projects carried to a high degree of aesthetic refinement. Emphasis is on form development, design process, and model making. Prerequisites: 203, 313. Corequisite: ARTSTUDI 160.

3-4 units, Win (Burnett, W)

**ME 313. Human Values and Innovation in Design**

Introduction to the philosophy, spirit, and tradition of the product design program. Hands-on design projects used as vehicles for design thinking, visualization, and methodology. The relationships among technical, human, aesthetic, and business concerns. Drawing, prototyping, and design skills. Focus is on tenets of design philosophy: point of view, user-centered design, design methodology, and iterative design.

3 units, Aut (Banerjee, S)

**ME 314. Good Products, Bad Products**

The characteristics of industrial products that cause them to be successes or failures: the straightforward (performance, economy, reliability), the complicated (human and cultural fit, compatibility with the environment, craftsmanship, positive emotional response of the user), the esoteric (elegance, sophistication, symbolism). Engineers and business people must better understand these factors to produce more successful products. Projects, papers, guest speakers, field trips.

3-4 units, Win (Beach, D)

**ME 315. The Designer in Society**

For graduate students. Career objectives and psychological orientation compared with existing social values and conditions. Emphasis is on assisting individuals in assessing their roles in society. Readings on political, social, and humanistic thought are related to technology and design. Experiential, in-class exercises, and term project. Enrollment limited to 24.

3 units, Spr (Roth, B)

**ME 316A. Product Design Master's Project**

For graduate Product Design or Design (Art) majors only. Students create and present two master's theses under the supervision of engineering and art faculty. Theses involve the synthesis of aesthetics and technological concerns in the service of human need

and possibility. Product Design students register for 4 units; Art students for 2 units. Prerequisites: ME 216B, ME 365 Corequisite: ARTSTUDI 360.

2-4 units, Aut (Banerjee, S; Burnett, W)

**ME 316B. Product Design Master's Project**

Continuation of 316A.

2-4 units, Win (Banerjee, S; Burnett, W)

**ME 316C. Product Design Master's Project**

Continuation of 316B.

2-4 units, Spr (Banerjee, S; Burnett, W)

**ME 317A. Design for Manufacturability: Product Definition for Market Success**

Systematic methodologies to define, develop, and produce world-class products. Student team projects to identify opportunities for improvement and develop a comprehensive product definition. Topics include value engineering, quality function deployment, design for assembly and producibility, design for variety and supply chain, design for life-cycle quality, and concurrent engineering. Students must take 317B to complete the project and obtain a letter grade. On-campus enrollment limited to 20; SCPD class size limited to 50, and each site must have at least 3 students to form a project team.

4 units, Win (Beiter, K)

**ME 317B. Design for Manufacturability: Quality by Design for Customer Value**

Building on 317A, focus is on the implementation of competitive product design. Student groups apply structured methods to optimize the design of an improved product, and plan for its manufacture, testing, and service. The project deliverable is a comprehensive product and process specification. Topics: concept generation and selection (Pugh's Method), FMEA applied to the manufacturing process, design for robustness, Taguchi Method, SPC and six sigma process, tolerance analysis, flexible manufacturing, product testing, rapid prototyping. Enrollment limited to 40, not including SCPD students. Minimum enrollment of two per SCPD viewing site; single student site by prior consent of instructor. On-campus class limited to 20. For SCPD students, limit is 50 and each site must have a minimum of three students to form a project team and define a project on their own. Prerequisite: 317A.

4 units, Spr (Beiter, K)

**ME 318. Computer-Aided Product Creation**

Design course focusing on an integrated suite of computer tools: rapid prototyping, solid modeling, computer-aided machining, and computer numerical control manufacturing. Students choose, design, and manufacture individual products, emphasizing individual design process and computer design tools. Field trips demonstrate Stanford Product Realization Lab's relationship to the outside world. Structured lab experiences build a basic CAD/CAM/CNC proficiency. Limited enrollment. Prerequisite: consent of instructor.

4 units, Aut (Milroy, J), Win (Milroy, J), Spr (Milroy, J)

**ME 322. Kinematic Synthesis of Mechanisms**

The rational design of linkages. Techniques to determine linkage proportions to fulfill design requirements using analytical, graphical, and computer based methods.

3 units, not given this year

**ME 323. Modeling and Identification of Mechanical Systems for Control**

Lecture/Lab. The art and science behind developing mathematical models for control system design. Theoretical and practical system modeling and parameter identification. Frequency domain identification, parametric modeling, and black-box identification. Analytical work and laboratory experience with identification, controller implementation, and the implications of unmodeled dynamics and non-linearities. Prerequisites: linear algebra and system simulation with MATLAB/SIMULINK; ENGR 105.

3 units, not given this year

**ME 324. Precision Engineering**

Advances in engineering are often enabled by more accurate control of manufacturing and measuring tolerances. Concepts and technology enable precision such that the ratio of overall dimensions to uncertainty of measurement is large relative to normal engineering practice. Typical application areas: non-spherical optics, computer information storage devices, and manufacturing metrology systems. Application experience through design and

manufacture of a precision engineering project, emphasizing the principles of precision engineering. Structured labs; field trips. Prerequisite: consent of instructors.

4 units, Spr (Beach, D; DeBra, D)

### ME 325. Introduction to High Performance Computing

An introduction to the use of advanced computing resources with real-world examples of large-scale, multidisciplinary, simulation-based science as related to academic and applied research.

1 unit, Sum (Staff)

### ME 326. Telerobotics and Human-Robot Interactions

Focus is on dynamics and controls. Evaluation and implementation of required control systems. Topics include master-slave systems, kinematic and dynamic similarity; control architecture, force feedback, haptics, sensory substitutions; stability, passivity, sensor resolution, servo rates; time delays, prediction, wave variables. Hardware-based projects encouraged, which may complement ongoing research or inspire new developments. Limited enrollment. Prerequisites: ENGR 205, 320 or CS 223A, or consent of instructor. (Niemeyer)

3 units, not given this year

### ME 329. Physical Solid Mechanics

Quantum mechanics, statistical mechanics, and solid state physics for engineering students. The theory describes physical processes at nanoscale in solid materials. Atomic structures of solids and their electronic structures. Statistical mechanics provides a theoretical framework for thermodynamics to connect the nanoscale processes to macroscopic properties of solids.

3 units, alternate years, not given this year

### ME 330. Advanced Kinematics

Kinematics from mathematical viewpoints. Introduction to algebraic geometry of point, line, and plane elements. Emphasis is on basic theories which have potential application to mechanical linkages, computational geometry, and robotics.

3 units, Aut (Roth, B)

### ME 331A. Classical Dynamics

(Same as AA 242A) Accelerating and rotating reference frames. Kinematics of rigid body motion; Euler angles, direction cosines. D'Alembert's principle, equations of motion. Inertia properties of rigid bodies. Dynamics of coupled rigid bodies. Lagrange's equations and their use. Dynamic behavior, stability, and small departures from equilibrium. Prerequisite: ENGR 15 or equivalent.

3 units, Win (Staff)

### ME 333. Mechanics

Goal is a common basis for advanced mechanics courses. Formulation of the governing equations from a Lagrangian perspective. Examples include systems of particles and linear elastic solids. Waves in discrete and continuous media. Linear elasticity formulation in the static and dynamic cases, and elementary measures of stress and strain. Tensor and variational calculus. (Lew)

3 units, Aut (Lew, A)

### ME 335A. Finite Element Analysis

Fundamental concepts and techniques of primal finite element methods. Method of weighted residuals, Galerkin's method, and variational equations. Linear elliptic boundary value problems in one, two, and three space dimensions; applications in structural, solid, and fluid mechanics and heat transfer. Properties of standard element families and numerically integrated elements. Implementation of the finite element method. Active column equation solver, assembly of equations, and element routines. The mathematical theory of finite elements.

3 units, Aut (Pinsky, P)

### ME 335B. Finite Element Analysis

Finite element methods for linear dynamic analysis. Eigenvalue, parabolic, and hyperbolic problems. Mathematical properties of semi-discrete (t-continuous) Galerkin approximations. Modal decomposition and direct spectral truncation techniques. Stability, consistency, convergence, and accuracy of ordinary differential equation solvers. Asymptotic stability, over-shoot, and conservation laws for discrete algorithms. Mass reduction. Applications in heat conduction, structural vibrations, and elastic wave propagation. Computer implementation of finite element methods in linear dynamics. Implicit, explicit, and implicit-explicit algorithms and code architectures.

3 units, Win (Pinsky, P)

### ME 335C. Finite Element Analysis

Variational formulation of nonlinear elliptic, parabolic and hyperbolic problems. Newton's method for solving nonlinear algebraic systems; load-stepping, convergence, divergence and bifurcation. Enhancement of Newton's method including line-search, quasi-Newton and arc-length methods. Finite element approximation and consistent linearization; definition of the tangent operator and residual vector. Data structures for nonlinear finite element analysis. Examples drawn from nonlinear (rigid) heat conduction and nonlinear elasticity.

3 units, Spr (Pinsky, P)

### ME 336. Crystalline Anisotropy

(Same as MATSCI 359) Matrix and tensor analysis with applications to the effects of crystal symmetry on elastic deformation, thermal expansion, diffusion, piezoelectricity, magnetism, thermodynamics, and optical properties of solids, on the level of J. F. Nye's *Physical Properties of Crystals*.

3 units, not given this year

### ME 337. Mechanics of Growth

Introduction to continuum theory and numerical solutions or biomechanical problems. Kinematics of finite growth. Balance equations in open system thermodynamics. Constitutive equations for biological tissues. Enhanced finite element models in biomechanics. Analytical solutions for simple model problems. Numerical solutions for more advanced problems such as: bone remodeling; wound healing; muscle regeneration; tumor growth; atherosclerosis; in-stent restenosis; and tissue engineering.

3 units, not given this year

### ME 338A. Continuum Mechanics

Nonlinear continuum mechanics for solids and fluids. Kinematics of finite deformations. Measures of strain and stress. Finite rotations. Linearized kinematics and infinitesimal measures of deformations. Rates. Conservation laws for mass, momenta, and energy. Boundary value problem in continuum mechanics. Prerequisites: 333 and 300, or equivalent background with consent of instructor.

3 units, Win (Kuhl, E)

### ME 340A. Theory and Applications of Elasticity

Elasticity theory and application to material structures at micro-scale. Theories: stress, strain, and energy; equilibrium and compatibility conditions; boundary value problem. Solution methods: stress function, Green's function, Fourier transformation. Numerical exercises using Matlab. Applications to defects in solids, thin films, and biomembranes.

3 units, Spr (Cai, W)

### ME 340B. Elasticity in Microscopic Structures

Elasticity theory and applications to structures in micro devices, material defects, and biological systems. Theoretical basis: stress, strain, and energy; equilibrium and compatibility conditions; boundary value problem formulation. Solution methods: stress function, Green's function, and Fourier transformation; moderate numerical exercises using Matlab. Methods and solutions applied to the elastic behaviors of thin films and MEMS structures, cracks and dislocations, and cell filaments and membranes.

3 units, not given this year

### ME 341. Biomechanics of Hearing and Balance

Theory and practice of building mathematical models to understand physical phenomena; integration of imaging, physiology, and biomechanics. Journal club style discussions of research literature, examples from hearing science, speech production, and the vestibular system. Dualisms in modeling include: general principles versus detailed models; analytic versus computational models; forward versus inverse approaches; and the interplay between theory and experiments.

3 units, Spr (Puria, S)

### ME 342A. MEMS Laboratory

Practice and theory of MEMS device design and fabrication, orientation to fabrication facilities, and introduction to techniques for design and evaluation of MEMS devices in the context of designed projects. Emphasis on MEMS design (need finding, brainstorming, evaluation, and design methodology), characterization, and fabrication, including photolithography, etching, oxidation, diffusion, and ion implantation. Limited enrollment. Prerequisite: engineering or science background and consent of instructor.

3-4 units, not given this year

**ME 342D. MEMS Laboratory Assignments**

Prerequisite: consent of instructor.

*1-2 units, not given this year*

**ME 343. An Introduction to Waves in Elastic Solids**

One-dimensional motion of an elastic continuum, the linearized theory of elasticity and elastodynamic theory, elastic waves in an unbounded medium, plane harmonic waves in elastic half-spaces including reflection and refraction, slowness, energy velocity and anisotropic effects. Text is first five chapters of Achenbach's *Wave Propagation in Elastic Solids*. (Barnett)

*3 units, Win (Barnett, D)*

**ME 344A. Computational Nanotechnology**

Atomistic simulations as computational tools to design nanoscale materials and devices. Nanoparticles and nanowires introduced as main classes of nano building blocks. Computational modeling of carbon nanomaterials (fullerenes and nanotubes); nanoparticles and quantum dots; semiconductor and metal nanowires; and molecular wires. Atomistic modeling programs with graphical user interface used to gain hands-on experience of nanomaterials design.

*3 units, not given this year*

**ME 344B. Nanomaterials Modeling**

Atomistic and quantum mechanical simulation methods. Focus is quantum simulation of nanomaterials. Review of concepts and practical techniques of atomistic simulations; finite difference algorithms and practical computational issues for molecular dynamics and Monte Carlo simulations. Graphical user interface, designing nanomaterials through analysis and feedback processes, configuration optimization, dynamic mode analysis, and electronic structure analysis. Hands-on experience in computational design of nanomaterials, and fundamentals of simulations.

*3 units, not given this year*

**ME 345. Fatigue Design and Analysis**

The mechanism and occurrences of fatigue in service. Methods for predicting fatigue life and for protecting against premature fatigue failure. Use of elastic stress and inelastic strain analyses to predict crack initiation life. Use of linear elastic fracture mechanics to predict crack propagation life. Effects of stress concentrations, manufacturing processes, load sequence, irregular loading, multi-axial loading. Subject is treated from the viewpoints of the engineer seeking up-to-date methods of life prediction and the researcher interested in improving understanding of fatigue behavior. Prerequisite: undergraduate mechanics of materials.

*3 units, Win (Nelson, D)*

**ME 346A. Introduction to Statistical Mechanics**

Concepts and tools of classical statistical mechanics and applications to molecular systems. Thermodynamics and probability theory. Statistical ensembles. Information and entropy. Free energy and transition between metastable states. Brownian motion, Langevin dynamics, and Fokker-Planck equation. Non-equilibrium systems: correlation and response functions, fluctuation-dissipation theorem. Applications to self-assembly, thin film growth, and structural transformation.

*3 units, Win (Cai, W)*

**ME 346B. Introduction to Molecular Simulations**

Algorithms of molecular simulations and underlying theories. Molecular dynamics, time integrators, modeling thermodynamic ensembles (NPT, NVT), free energy, constraints. Monte Carlo simulations, parallel tempering. Stochastic equations, Langevin and Brownian dynamics. Applications in solids, liquids, and biomolecules (proteins). Programming in Matlab and C++. Prerequisites: ME 346A or equivalent, Matlab, and C++.

*3 units, Spr (Darve, E)*

**ME 346C. Advanced Techniques for Molecular Simulations**

Advanced methods for computer simulation of proteins. Symplectic time integrators, multiple-time stepping, energy conservation. Long-range force calculation, particle mesh Ewald, fast multipole method, multigrid. Free energy methods, umbrella sampling, acceptance ratio, thermodynamic integration, non equilibrium methods, adaptive biasing force. Prerequisites: ME 346A,B or equivalent, Matlab, and C++.

*3 units, alternate years, not given this year*

**ME 347. Mathematical Theory of Dislocations**

The mathematical theory of straight and curvilinear dislocations in

linear elastic solids. Stress fields, energies, and Peach-Koehler forces associated with these line imperfections. Anisotropic effects, Green's function methods, and the geometrical techniques of Brown and Indenborn-Orlov for computing dislocation fields and for studying dislocation interactions. Continuously distributed dislocations and cracks and inclusions.

*3 units, not given this year*

**ME 348. Experimental Stress Analysis**

Theory and applications of photoelasticity, strain gages, and holographic interferometry. Comparison of test results with theoretical predictions of stress and strain. Other methods of stress and strain determination (optical fiber strain sensors, thermoelasticity, Moire, residual stress determination).

*3 units, Spr (Nelson, D)*

**ME 349. Variational Methods in Elasticity and Plate Theory**

An introduction to variational calculus methods and their applications to the theories of elasticity and plates.

*3 units, Spr (Barnett, D)*

**ME 351A. Fluid Mechanics**

Exact and approximate analysis of fluid flow covering kinematics, global and differential equations of mass, momentum, and energy conservation. Forces and stresses in fluids. Euler's equations and the Bernoulli theorem applied to inviscid flows. Vorticity dynamics. Topics in irrotational flow: stream function and velocity potential for exact and approximate solutions; superposition of solutions; complex potential function; circulation and lift. Some boundary layer concepts.

*3 units, Aut (Iaccarino, G)*

**ME 351B. Fluid Mechanics**

Laminar viscous fluid flow. Governing equations, boundary conditions, and constitutive laws. Exact solutions for parallel flows. Creeping flow limit, lubrication theory, and boundary layer theory including free-shear layers and approximate methods of solution; boundary layer separation. Introduction to stability theory and transition to turbulence, and turbulent boundary layers. Prerequisite: 351A.

*3 units, Win (Eaton, J)*

**ME 352A. Radiative Heat Transfer**

The fundamentals of thermal radiation heat transfer; blackbody radiation laws; radiative properties of non-black surfaces; analysis of radiative exchange between surfaces and in enclosures; combined radiation, conduction, and convection; radiative transfer in absorbing, emitting, and scattering media. Advanced material for students with interests in heat transfer, as applied in high-temperature energy conversion systems. Take 352B,C for depth in heat transfer. Prerequisites: graduate standing and undergraduate course in heat transfer. Recommended: computer skills.

*3 units, not given this year*

**ME 352B. Fundamentals of Heat Conduction**

Physical description of heat conduction in solids, liquids, and gases. The heat diffusion equation and its solution using analytical and numerical techniques. Data and microscopic models for the thermal conductivity of solids, liquids, and gases, and for the thermal resistance at solid-solid and solid-liquid boundaries. Introduction to the kinetic theory of heat transport, focusing on applications for composite materials, semiconductor devices, micromachined sensors and actuators, and rarefied gases. Prerequisite: consent of instructor.

*3 units, Win (Goodson, K)*

**ME 352C. Convective Heat Transfer**

Prediction of heat and mass transfer rates based on analytical and numerical solutions of the governing partial differential equations. Heat transfer in fully developed pipe and channel flow, pipe entrance flow, laminar boundary layers, and turbulent boundary layers. Superposition methods for handling non-uniform wall boundary conditions. Approximate models for turbulent flows. Comparison of exact and approximate analyses to modern experimental results. General introduction to heat transfer in complex flows. Prerequisite: 351B or equivalent.

*3 units, Spr (Eaton, J)*

**ME 354. Experimental Methods in Fluid Mechanics**

Experimental methods associated with the interfacing of laboratory instruments, experimental control, sampling strategies, data analysis, and introductory image processing. Instrumentation including

point-wise anemometers and particle image tracking systems. Lab. Prerequisites: previous experience with computer programming and consent of instructor. Limited enrollment.

4 units, Aut (Santiago, J)

### ME 355. Compressible Flow

Topics include quasi-one-dimensional isentropic flow in variable area ducts, normal shock waves, oblique shock and expansion waves, flow in ducts with friction and heat transfer, unsteady one-dimensional flow, and steady two-dimensional supersonic flow.

3 units, Spr (Bowman, C)

### ME 357. Turbine and Internal Combustion Engines

(Same as ME 257) Principles of design analysis for aircraft gas turbines and automotive piston engines. Analysis for aircraft engines performed for Airbus A380 type aircraft. Design parameters determined considering aircraft aerodynamics, gas turbine thermodynamics, compressible flow physics, and material limitations. Additional topics include characteristics of main engine components, off-design analysis, and component matching. Performance of automotive piston engines including novel engine concepts in terms of engine thermodynamics, intake and exhaust flows, and in-cylinder flow.

3 units, Win (Pitsch, H)

### ME 358. Heat Transfer in Microdevices

Application-driven introduction to the thermal design of electronic circuits, sensors, and actuators that have dimensions comparable to or smaller than one micrometer. The impact of thin-layer boundaries on thermal conduction and radiation. Convection in microchannels and microscopic heat pipes. Thermal property measurements for microdevices. Emphasis is on Si and GaAs semiconductor devices and layers of unusual, technically-promising materials such as chemical-vapor-deposited (CVD) diamond. Final project based on student research interests. Prerequisite: consent of instructor.

3 units, Spr (Asheghi, M)

### ME 361. Turbulence

Governing equations. Averaging and correlations. Reynolds equations and Reynolds stresses. Free shear flows, turbulent jet, turbulent length and time scales, turbulent kinetic energy and kinetic energy dissipation, and kinetic energy budget. Kolmogorov's hypothesis and energy spectrum. Wall bounded flows, channel flow and boundary layer, viscous scales, and law of the wall. Turbulence modeling, gradient transport and eddy viscosity, mixing length model, two-equation models, Reynolds-stress model, and large-eddy simulation.

3 units, Spr (Staff)

### ME 362A. Physical Gas Dynamics

Concepts and techniques for description of high-temperature and chemically reacting gases from a molecular point of view. Introductory kinetic theory, chemical thermodynamics, and statistical mechanics as applied to properties of gases and gas mixtures. Transport and thermodynamic properties, law of mass action, and equilibrium chemical composition. Maxwellian and Boltzmann distributions of velocity and molecular energy. Examples and applications from areas of current interest such as combustion and materials processing.

3 units, Aut (Bowman, C)

### ME 362B. Nonequilibrium Processes in High-Temperature Gases

Chemical kinetics and energy transfer in high-temperature gases. Collision theory, transition state theory, and unimolecular reaction theory. Prerequisite: 362A or consent of instructor.

3 units, not given this year

### ME 363. Partially Ionized Plasmas and Gas Discharges

Introduction to partially ionized gases and the nature of gas discharges. Topics: the fundamentals of plasma physics emphasizing collisional and radiative processes, electron and ion transport, ohmic dissipation, oscillations and waves, interaction of electromagnetic waves with plasmas. Applications: plasma diagnostics, plasma propulsion and materials processing. Prerequisite: 362A or consent of instructor.

3 units, not given this year

### ME 364. Optical Diagnostics and Spectroscopy

The spectroscopy of gases and laser-based diagnostic techniques for measurements of species concentrations, temperature, density,

and other flow field properties. Topics: electronic, vibrational, and rotational transitions; spectral lineshapes and broadening mechanisms; absorption, fluorescence, Rayleigh and Raman scattering methods; collisional quenching. Prerequisite: 362A or equivalent.

3 units, Win (Hanson, R)

### ME 365. The Structure of Design Research

Restricted to second-year Joint Program in Design graduate students; prerequisite for ME 316A,B,C. How to shape individual research plans, identify tools for design research, and develop a vocabulary for research through design. Students present proposals for master's theses. Case studies.

1-3 units, Spr (Banerjee, S)

### ME 367. Optical Diagnostics and Spectroscopy Laboratory

Principles, procedures, and instrumentation associated with optical measurements in gases and plasmas. Absorption, fluorescence and emission, and light-scattering methods. Measurements of temperature, species concentration, and molecular properties. Lab. Enrollment limited to 16. Prerequisite: 362A or 364.

4 units, Spr (Hanson, R)

### ME 368A. Biodesign Innovation Core: Needs Finding and Concept Creation

(Same as BIOE 374A, MED 272A) Two quarter sequence. Inventing new medical devices and instrumentation, including: methods of validating medical needs; techniques for analyzing intellectual property; basics of regulatory (FDA) and reimbursement planning; brainstorming and early prototyping. Guest lecturers and practical demonstrations. May be taken alone (2 units) or in combination with the project component (4 units).

2-4 units, Win (Yock, P; Zenios, S; Milroy, J; Brinton, T)

### ME 368B. Biodesign Innovation Core: Concept Development and Implementation

(Same as BIOE 374B, MED 272B) Two quarter sequence. How to take a medical device invention forward from early concept to technology translation and development. Topics include prototyping; patent strategies; advanced planning for reimbursement and FDA approval; choosing translation route (licensing versus start-up); ethical issues including conflict of interest; fundraising approaches and cash requirements; essentials of writing a business or research plan; strategies for assembling a development team. May be taken alone (2 units) or in combination with the project component (4 units). Prerequisite: MED 272A, ME368A, or BIOE 374A.

2-4 units, Spr (Staff)

### ME 370A. Energy Systems I: Thermodynamics

Thermodynamic analysis of energy systems emphasizing systematic methodology for and application of basic principles to generate quantitative understanding. Availability, mixtures, reacting systems, phase equilibrium, chemical availability, and modern computational methods for analysis. Prerequisites: undergraduate engineering thermodynamics and computer skills such as Matlab.

3 units, Aut (Mitchell, R)

### ME 370B. Energy Systems II: Modeling and Advanced Concepts

Development of quantitative device models for complex energy systems, including fuel cells, reformers, combustion engines, and electrolyzers, using thermodynamic and transport analysis. Student groups work on energy systems to develop conceptual understanding, and high-level, quantitative and refined models. Advanced topics in thermodynamics and special topics associated with devices under study. Prerequisite: 370A.

4 units, Win (Edwards, C)

### ME 370C. Energy Systems III: Projects

Refinement and calibration of energy system models generated in ME 370B carrying the models to maturity and completion. Integration of device models into a larger model of energy systems. Prerequisites: 370A,B, consent of instructor.

3-5 units, Spr (Edwards, C)

### ME 371. Combustion Fundamentals

Heat of reaction, adiabatic flame temperature, and chemical composition of products of combustion; kinetics of combustion and pollutant formation reactions; conservation equations for multi-component reacting flows; propagation of laminar premixed flames and detonations. Prerequisite: 362A or 370A, or consent of instructor.

3 units, Win (Zheng, X)

**ME 372. Combustion Applications**

The role of chemical and physical processes in combustion; ignition, flammability, and quenching of combustible gas mixtures; premixed turbulent flames; laminar and turbulent diffusion flames; combustion of fuel droplets and sprays. Prerequisite: 371.

3 units, Spr (Zheng, X)

**ME 377. Design Thing Bootcamp: Experiences in Innovation and Design Thinking**

Lecture/lab. Immersive experiences in innovation and design thinking, blurring the boundaries among technology, business, and human values. Tenets of design thinking including being human-centered, prototype-driven, and mindful of process. Topics include design processes, innovation methodologies, need finding, human factors, visualization, rapid prototyping, team dynamics, storytelling, and project leadership. Hands-on projects, in-class exercises, and guest lectures. Students and faculty from areas including business, earth sciences, education, engineering, humanities and sciences, law, and medicine. Preparation for advanced d.school courses. Limited enrollment. Application required. See <http://dschool.stanford.edu/projects/classes/me377.html>.

3-4 units, Aut (Kembel, G; Baggeroer, D; Doorley, S)

**ME 378. Tell, Make, Engage: Action Stories for Entrepreneur-ing**

Guest discussion leaders with entrepreneuring experience give the course an evolving framework of evaluative methods, formed and reformed by collaborative development within the class. Stories attached to an idea or a discovery, are considered through practice exercises, artifacts, design challenges, short papers, and presentations.

1-3 units, Aut (Karanian, B)

**ME 381. Orthopaedic Bioengineering**

(Same as BIOE 381, BIOE 381) Engineering approaches applied to the musculoskeletal system in the context of surgical and medical care. Fundamental anatomy and physiology. Material and structural characteristics of hard and soft connective tissues and organ systems, and the role of mechanics in normal development and pathogenesis. Engineering methods used in the evaluation and planning of orthopaedic procedures, surgery, and devices.

3 units, Aut (Carter, D)

**ME 382A. Medical Device Design**

Real world problems and challenges of biomedical device design and evaluation. Students engage in industry sponsored projects resulting in new designs, physical prototypes, design analyses, computational models, and experimental tests, gaining experience in: the formation of design teams; interdisciplinary communication skills; regulatory issues; biological, anatomical, and physiological considerations; testing standards for medical devices; and intellectual property.

4 units, not given this year

**ME 382B. Medical Device Design**

Continuation of industry sponsored projects from 382A. With the assistance of faculty and expert consultants, students finalize product designs or complete detailed design evaluations of new medical products. Bioethics issues and strategies for funding new medical ventures.

4 units, not given this year

**ME 385. Tissue Engineering Lab**

Hands-on experience in the fabrication of living engineered tissues. Techniques include sterile technique, culture of mammalian cells, creation of cell-seeded scaffolds, and the effects of mechanical loading on the metabolism of living engineered tissues. Theory, background, and practical demonstration for each technique. Lab.

1-2 units, not given this year

**ME 386. Neuromuscular Biomechanics**

(Same as BIOE 386) The interplay between mechanics and neural control of movement. State of the art assessment through a review of classic and recent journal articles. Emphasis is on the application of dynamics and control to the design of assistive technology for persons with movement disorders.

3 units, not given this year

**ME 390. Thermosciences Research Project Seminar**

Review of work in a particular research program and presentations of other related work.

1 unit, not given this year

**ME 391. Engineering Problems**

Directed study for graduate engineering students on subjects of mutual interest to student and staff member. May be used to prepare for experimental research during a later quarter under 392. Faculty sponsor required.

1-10 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**ME 392. Experimental Investigation of Engineering Problems**

Graduate engineering students undertake experimental investigation under guidance of staff member. Previous work under 391 may be required to provide background for experimental program. Faculty sponsor required.

1-5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**ME 393. Topics in Biologically Inspired or Human Interactive Robotics**

Application of observations from human and animal physiology to robotic systems. Force control of motion including manipulation, haptics, and locomotion. Weekly literature review forum led by student. May be repeated for credit. (Cutkosky, Waldron, Niemeyer)

1 unit, Aut (Cutkosky, M), Spr (Cutkosky, M)

**ME 395. Seminar in Solid Mechanics**

Required of Ph.D. candidates in solid mechanics. Guest speakers present research topics related to mechanics theory, computational methods, and applications in science and engineering. May be repeated for credit. See <http://mc.stanford.edu>.

1 unit, Aut (Pinsky, P), Win (Pinsky, P), Spr (Pinsky, P)

**ME 396. Design and Manufacturing Forum**

(Same as ME 196) Guest speakers address issues of interest to design and manufacturing engineers. Sponsored by Stanford Engineering Club for Automation and Manufacturing (SECAM). May be repeated for credit.

1 unit, Win (Reis, R), Spr (Reis, R)

**ME 397. Design Theory and Methodology Seminar**

What do designers do when they do design? Do group connections happen naturally for a transformative academia/industry focus? Guests include design researchers, students, and industry participants. Theory/practice experiments for considering the evolution through the developmental stages of ideation, prototyping, and delivery. May be repeated for credit.

1-3 units, Aut (Leifer, L), Win (Leifer, L), Spr (Leifer, L)

**ME 398. Biomechanical Research Symposium**

Guest speakers present contemporary research on experimental and theoretical aspects of biomechanical engineering and bioengineering. May be repeated for credit.

1 unit, Aut (Staff), Win (Staff), Spr (Staff)

**ME 399. Fuel Cell Seminar**

Interdisciplinary research in engineering, chemistry, and physics. Talks on fundamentals of fuel cells by speakers from Stanford, other academic and research institutions, and industry. The potential to provide high efficiency and zero emissions energy conversion for transportation and electrical power generation.

1 unit, not given this year

**ME 400. Thesis (Engineer Degree)**

Investigation of some engineering problems. Required of Engineer degree candidates

2-15 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**ME 405. Asymptotic Methods and Applications**

Asymptotic versus convergent expansions, approximation of integrals, method of matched asymptotics, WKB method and turning points, method of multiple scales. Applications: viscous and potential flow, wave propagation, combustion, and electrostatics. Prerequisites: ME 300B, graduate-level fluid mechanics.

3 units, not given this year

**ME 406. Turbulence Physics and Modeling Using Numerical Simulation Data**

Prerequisite: consent of instructor.

2 units, Sum (Moin, P)

**ME 408. Spectral Methods in Computational Physics**

Data analysis, spectra and correlations, sampling theorem, non-periodic data, and windowing; spectral methods for numerical solution of ordinary and partial differential equations; accuracy and computational cost; fast Fourier transform, Galerkin, collocation,

and Tau methods; spectral and pseudospectral methods based on Fourier series and eigenfunctions of singular Sturm-Liouville problems; Chebyshev, Legendre, and Laguerre representations; convergence of eigenfunction expansions; discontinuities and Gibbs phenomenon; aliasing errors and control; efficient implementation of spectral methods; spectral methods for complicated domains; time differencing and numerical stability.

3 units, not given this year

#### ME 409. Advanced Topics in Computational Solid Mechanics

Use of computational simulation methods for analyzing and optimizing production processes and for developing new products. Based on real industrial applications in the metal forming industry. Brief review of linear and nonlinear continuum mechanics and the use of finite element methods to model solid mechanics problems. Covers constitutive relations for metals, coupled thermo-elasto-plastic (viscoplastic) problems, modeling metal production processes. Application examples include hot rolling of plates and the Mannesmann piercing processes. Modeling the service behavior of steel pipes. Prerequisites: ME338A, ME335A,B,C, unless approved by instructor

3 units, Win (Staff)

#### ME 410A. Foresight and Innovation

The art, science, and practice of design innovation. Tools such as critical foresight and anticipatory research design thinking that assist organizations in improving the quality and speed of research and design innovation programs. The path from idea to market. How to communicate a developing idea through scenarios, business pitches, and product prototypes. Prerequisite: consent of instructor.

1-5 units, Aut (Leifer, L; Cockayne, W)

#### ME 410B. Foresight and Innovation

The art, science, and practice of design innovation. Tools such as critical foresight and anticipatory research that assist organizations in improving the quality and speed of research and design innovation programs. The path from idea to market. How to communicate a developing idea through scenarios, business pitches, and product prototypes.

1-5 units, Win (Leifer, L)

#### ME 410C. Foresight and Innovation

The art, science, and practice of design innovation. Tools such as critical foresight and anticipatory research that assist organizations in improving the quality and speed of research and design innovation programs. The path from idea to market. How to communicate a developing idea through scenarios, business pitches, and product prototypes.

1-5 units, Spr (Leifer, L)

#### ME 410X. Foresight Project Experience with Corporate Partners

Participation in a global foresight research team with real-world industrial partners. Foresight and anticipatory research developed become part of the student's portfolio. May be repeated for credit. Limited enrollment. Prerequisite: consent of instructor.

1-5 units, Aut (Leifer, L; Cockayne, W), Win (Leifer, L; Cockayne, W), Spr (Leifer, L; Cockayne, W), Sum (Leifer, L; Cockayne, W)

#### ME 411. Advanced Topics in Computational Solid Mechanics

Discussion of the use of computational simulation methods for analyzing and optimizing production processes and for developing new products, based on real industrial applications in the metal forming industry. Brief review of linear and nonlinear continuum mechanics and the use of finite element methods to model solid mechanics problems, constitutive relations for metals, coupled thermo-elasto-plastic (viscoplastic) problems, modeling metal production processes: bulk metal forming processes using rigid/viscoplastic material models, application examples: hot rolling of plates and the Mannesmann piercing processes and modeling the service behavior of steel pipes. Prerequisites: ME 338A, ME 335A,B,C, or consent of instructor.

3 units, Win (Dvorkin, E)

#### ME 412. Engineering Functional Analysis and Finite Elements

(Same as CME 356) Concepts in functional analysis to understand models and methods used in simulation and design. Topology, measure, and integration theory to introduce Sobolev spaces. Convergence analysis of finite elements for the generalized Poisson

problem. Extensions to convection-diffusion-reaction equations and elasticity. Upwinding. Mixed methods and LBB conditions. Analysis of nonlinear and evolution problems. Prerequisites: 335A,B, CME 200, CME 204, or consent of instructor. Recommended: 333, MATH 171.

3 units, Win (Lew, A)

#### ME 413. Quantum Confinement Structures: Physics and Fabrication

Quantum mechanics principles and the thermodynamics of confinement structures. Focus is on potential applications such as solar cells and catalysis. Student presentations. Lab demonstrations. Prerequisite: background in quantum mechanics and statistical thermodynamics.

3 units, Spr (Prinz, F)

#### ME 414. Solid State Physics Issues for Mechanical Engineering Experiments

Principles of statistical mechanics, quantum mechanics, and solid-state physics. Provides graduate mechanical engineering students with understanding needed to work on devices or technologies which rely on solid-state physics.

3 units, Sum (Staff)

#### ME 417. Total Product Integration Engineering

For students aspiring to be product development executives and leaders in research and education. Advanced methods and tools beyond the material covered in 217: quality design across global supply chain, robust product architecture for market variety and technology advances, product development risk management. Small teams or individuals conduct a practical project that produces a case study or enhancement to produce development methods and tools. Enrollment limited to 12. Prerequisites: 317A,B.

4 units, Aut (Beiter, K)

#### ME 420. Applied Electrochemistry at Micro- and Nanoscale

Concepts of physical chemistry on which the fundamentals of electrochemistry are built. Theory of electrochemical methods for material analyses and material modifications with emphasis on scaling behaviors. Focus this year is on electrochemical energy generation/storage devices emphasizing batteries. Sources include journal articles on current problems and needs in energy conversion and storage.

3 units, Sum (Fasching, R)

#### ME 421. European Entrepreneurship and Innovation Thought Leaders Seminar

Lessons from real-world experiences and challenges in European startups, corporations, universities, non-profit research institutes and venture finance organizations. Speakers include entrepreneurs, leaders from global technology companies, university researchers, venture capitalists, legal experts, senior policy makers and other guests from selected European countries and regions. Geographic scope encompasses Ireland to Russia, and Scandinavia to the Mediterranean region. Enrollment open to undergraduates and graduates in any school or department at Stanford.

1 unit, Win (Leifer, L; Pate-Cornell, E; Lee, B)

#### ME 438. Computational Molecular Modeling Project

Project-based class. Topics for projects include parallel methods for molecular dynamics, multiple time stepping algorithms, free energy computation, molecular pathways analysis, long-time scale behavior of numerical integrators, and multigrid based fast electrostatic algorithms. Students can propose their own projects. Final report and oral presentation. May be repeated for credit.

3 units, not given this year

#### ME 450. Advances in Biotechnology

Guest academic and industrial speakers. Latest developments in fields such as bioenergy, green process technology, production of industrial chemicals from renewable resources, protein pharmaceutical production, industrial enzyme production, stem cell applications, medical diagnostics, and medical imaging. Biotechnology ethics, business and patenting issues, and entrepreneurship in biotechnology.

3 units, not given next year

#### ME 451A. Advanced Fluid Mechanics Multiphase Flows

Single particle and multi-particle fluid flow phenomena, mass, momentum and heat transfer, characteristic time and length scales, non-dimensional groups; collection of dispersed-phase elements: instantaneous and averaged descriptions for multiphase flow, Eule-

rian-Eulerian and Lagrangian-Eulerian statistical representations, mixture theories; models for drag, heat and mass transfer; dilute to dense two-phase flow, granular flows; computer simulation approaches for multiphase flows, emerging research topics. Prerequisites: graduate level fluid mechanics and engineering mathematics, and undergraduate engineering mechanics and thermodynamics.

3 units, Aut (Staff)

#### ME 451B. Advanced Fluid Mechanics

Waves in fluids: surface waves, internal waves, inertial and acoustic waves, dispersion and group velocity, wave trains, transport due to waves, propagation in slowly varying medium, wave steepening, solitons and solitary waves, shock waves. Instability of fluid motion: dynamical systems, bifurcations, Kelvin-Helmholtz instability, Rayleigh-Benard convection, energy method, global stability, linear stability of parallel flows, necessary and sufficient conditions for stability, viscosity as a destabilizing factor, convective and absolute instability. Focus is on flow instabilities. Prerequisites: graduate courses in compressible and viscous flow.

3 units, Spr (Shaqfeh, E)

#### ME 451C. Advanced Fluid Mechanics

Compressible flow: governing equations, Crocco-Vazsonyi's equations, creation and destruction of vorticity by compressibility effects, shock waves. Modal decomposition of compressible flow, linear and nonlinear modal interactions, interaction of turbulence with shock waves. Energetics of compressible turbulence, effects of compressibility on free-shear flows, turbulent boundary layers, Van Driest transformation, recovery temperature, and shock/boundary layer interaction. Strong Reynolds analogy, modeling compressible turbulent flows. Prerequisites: 355, 361A, or equivalents.

3 units, alternate years, not given this year

#### ME 451D. Microhydrodynamics

(Same as CHEMENG 310) Transport phenomena on small-length scales appropriate to applications in microfluidics, complex fluids, and biology. The basic equations of mass, momentum, and energy, derived for incompressible fluids and simplified to the slow-flow limit. Topics: solution techniques utilizing expansions of harmonic and Green's functions; singularity solutions; flows involving rigid particles and fluid droplets; applications to suspensions; lubrication theory for flows in confined geometries; slender body theory; and capillarity and wetting. Prerequisites: 120A,B, 300, or equivalents.

3 units, Aut (Shaqfeh, E)

#### ME 457. Fluid Flow in Microdevices

Physico-chemical hydrodynamics. Creeping flow, electric double layers, and electrochemical transport such as Nernst-Planck equation; hydrodynamics of solutions of charged and uncharged particles. Device applications include microsystems that perform capillary electrophoresis, drug dispensation, and hybridization assays. Emphasis is on bioanalytical applications where electrophoresis, electro-osmosis, and diffusion are important. Prerequisite: consent of instructor.

3 units, Win (Santiago, J)

#### ME 458. Advanced Topics in Electrokinetics

Electrokinetic theory and electrokinetic separation assays. Electro-neutrality approximation and weak electrolyte electrophoresis theory. Capillary zone electrophoresis, field amplified sample stacking, isoelectric focusing, and isotachopheresis. Introduction to general electrohydrodynamics (EHD) theory including the leaky dielectric concept, the Ohmic model formulation, and electrokinetic flow instabilities. Prerequisite: ME 457.

3-5 units, Spr (Santiago, J)

#### ME 461. Advanced Topics in Turbulence

Turbulence phenomenology; statistical description and the equations governing the mean flow; fluctuations and their energetics; turbulence closure problem, two-equation turbulence models, and second moment closures; non-local effect of pressure; rapid distortion analysis and effect of shear and compression on turbulence; effect of body forces on turbulent flows; buoyancy-generated turbulence; suppression of turbulence by stratification; turbulent flows of variable density; effect of rotation on homogeneous turbulence; turbulent flows with strong vortices. Prerequisites: 351B and 361A, or consent of instructor.

3 units, Aut (Lele, S)

**ME 463. Advanced Topics in Plasma Science and Engineering** Research areas such as plasma diagnostics, plasma transport, waves and instabilities, and engineering applications.

3 units, not given this year

#### ME 468. Experimental Research in Advanced User Interfaces

(Same as COMM 168, COMM 268, COMM 368) (Undergraduates register for 168; master's students for 268; doctoral students for 368.) Project-based course involves small groups designing and implementing an experiment concerning voice and agent user interfaces. Each group is involved in a different, publishable research project. May be repeated for credit. Prerequisite: consent of instructor.

1-5 units, Win (Nass, C), Spr (Nass, C)

#### ME 469A. Computational Methods in Fluid Mechanics

Finite volume methods on structured and unstructured grids. Advanced methods for the solution of systems of equations. ADI schemes, preconditioned conjugate gradient and generalized minimum residual algorithms, multigrid methods, and deferred-correction approaches. Projection, fractional step, and artificial compressibility methods. Turbulent flows: direct numerical simulation, large eddy simulation, and Reynolds-averaged Navier-Stokes methods. Prerequisite: ME 300C/CME 206 or equivalent.

3 units, not given this year

#### ME 469B. Computational Methods in Fluid Mechanics

Advanced CFD codes. Geometry modeling, CAD-CFD conversion. Structured and unstructured mesh generation. Solution methods for steady and unsteady incompressible Navier-Stokes equations. Turbulence modeling. Conjugate (solid/fluid) heat transfer problems. Development of customized physical models. Batch execution for parametric studies. Final project involving solution of a problem of student's choosing. Prerequisite: ME 300C/CME 206.

3 units, not given this year

#### ME 470. Uncertainty Quantification

Uncertainty analysis in computational science. Probabilistic data representation, propagation techniques and validation under uncertainty. Mathematical and statistical foundations of random variables and processes for uncertainty modeling. Focus is on state-of-the-art propagation schemes, sampling techniques, and stochastic Galerkin methods. The concept of model validation under uncertainty and the determination of confidence bounds estimates. Prerequisite: basic probability and statistics at the level of CME 106 or equivalent.

3 units, not given this year

#### ME 471. Turbulent Combustion

Basis of turbulent combustion models. Assumption of scale separation between turbulence and combustion, resulting in Reynolds number independence of combustion models. Level-set approach for premixed combustion. Different regimes of premixed turbulent combustion with either kinematic or diffusive flow/chemistry interaction leading to different scaling laws and unified expression for turbulent velocity in both regimes. Models for non-premixed turbulent combustion based on mixture fraction concept. Analytical predictions for flame length of turbulent jets and NO<sub>x</sub> formation. Partially premixed combustion. Analytical scaling for lift-off heights of lifted diffusion.

3 units, not given this year

#### ME 484. Computational Methods in Cardiovascular Bioengineering

(Same as BIOE 484) Lumped parameter, one-dimensional nonlinear and linear wave propagation, and three-dimensional modeling techniques applied to simulate blood flow in the cardiovascular system and evaluate the performance of cardiovascular devices. Construction of anatomic models and extraction of physiologic quantities from medical imaging data. Problems in blood flow within the context of disease research, device design, and surgical planning.

3 units, Spr (Figuerola Alvarez, C)

#### ME 485. Modeling and Simulation of Human Movement

(Same as BIOE 485) Direct experience with the computational tools used to create simulations of human movement. Lecture/labs on animation of movement; kinematic models of joints; forward dynamic simulation; computational models of muscles, tendons, and ligaments; creation of models from medical images; control of

dynamic simulations; collision detection and contact models. Prerequisite: 281, 331A,B, or equivalent.

3 units, not given this year

**ME 491. Ph.D. Teaching Experience**

Required of Ph.D. students. May be repeated for credit.

3 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**ME 500. Thesis (Ph.D.)**

1-15 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

## MEDICINE (MED)

### UNDERGRADUATE COURSES IN MEDICINE

**MED 1A. Leadership in Multicultural Health**

Year-long course. Models of instruction for undergraduates serving as Stanford Medical Youth Science Summer Residential Program (SMYSP) staff. Observation, participation, and evaluation of leadership development and multicultural health theories and practices; school and community engagement and advocacy. 1 unit: class attendance and oral presentation; 2 units: class attendance and project portfolio; 3 units: class attendance, poster and oral presentation; 4 units: class attendance and reflective term paper. Applications for this year-long course must be submitted during autumn quarter. Contact Judith Ned: jned@stanford.edu, 650-498-4514. Current or past SMYSP Summer Residential Program staff.

1-4 units, Win (Winkleby, M; Ned, J)

**MED 1B. Leadership in Multicultural Health**

Models of instruction for undergraduates serving as Stanford Medical Youth Science Summer Residential Program (SMYSP) staff. Application of leadership development skills, multicultural health theories and practices, and school and community engagement and advocacy to creating and implementing activities for low-income high school students participating in the Summer Residential Program. 1 unit: class attendance and oral presentation; 2 units: class attendance and project portfolio; 3 units: class attendance, poster and oral presentation; 4 units: class attendance and reflective term paper. Prerequisite: MED 1A.

1-4 units, Spr (Winkleby, M; Ned, J)

**MED 1C. Leadership in Multicultural Health**

Students submit a written reflective term paper based on their experience as staff for the SMYSP Summer Residential Program. Prerequisite: MED 1A/B.

1 unit, Aut (Winkleby, M; Ned, J)

**MED 70Q. Cancer and the Immune System**

(S,Sem) Stanford Introductory Seminar. Preference to sophomores. Myths and facts surrounding the idea that the immune system is capable of recognizing malignant cells. The biological basis and function of effector arms of the immune system; how these mechanisms may be used to investigate the biological basis and potential therapy of cancer. How the immune system functions.

3 units, Spr (Negrin, R)

**MED 83Q. Ethical, Legal, and Social Dimensions of Stem Cell Research**

(S,Sem) Stanford Introductory Seminar. Preference to sophomores. Ethical, legal, social, and economic dimensions of stem cell research such as the discovery of human embryonic stem cells and the international landscape of public policy. How stem cells work, their role in the upkeep of the human body, and current and future uses in medicine. Issues at the intersection of science and society such as human-animal hybrids, notions of justice in intellectual property law, distribution of health care, and the major ethical frameworks defining the debate.

3 units, Spr (Scott, C)

**MED 86Q. Seeing the Heart**

(F,Dial) Stanford Introductory Dialogue. Introduction to biomedical technology, science, clinical medicine, and public policy through cardiovascular imaging. Invasive and noninvasive techniques to detect early stage heart disease and to see inside the heart and blood vessels. Topics include: common forms of heart disease, how they develop, and why they affect so many people; imaging technologies such as ultrasound, CT, MRI, PET, and optical; a

cost-effective public screening program. Field trips to Stanford Medical Center imaging centers.

2 units, Win (McConnell, M)

**MED 87Q. Women and Aging**

(S,Sem) (Same as HUMBIO 87Q) Stanford Introductory Seminar. Preference to sophomores. Biology, clinical issues, social and health policies of aging; relationships, lifestyles, and sexuality; wise women and grandmothers. Sources include scientific articles, essays, poetry, art, and film. Service-learning experience with older women. GER:EC-Gender

5 units, Win (Winograd, C)

**MED 88Q. Dilemmas in Current Medical Practice**

(S,Sem) Stanford Introductory Seminar. Preference to sophomores. Social, political, scientific, and economic forces influencing medical practice. Spiraling costs, impaired access to health care, and disillusionment toward the health care system. Attempts by government and medical insurers to control costs through managed care and health maintenance organizations. Medical education and how it has affected the practice of medicine. Alternative health care, preventive medicine, and the doctor-patient relationship. The paradox of health in America: why do so many people who are healthy feel unhealthy? Mandatory observation of instructors in their medical practices.

3 units, Aut (Croke, J; Jones, H)

**MED 93Q. The AIDS Epidemic: Biology, Behavior, and Global Responses**

(S,Sem) Stanford Introductory Seminar. Preference to sophomores. How the discovery of the causative agent and the modes of transmission of HIV fueled a quest for prevention, treatments, and a vaccine. Discoveries in biology, biotechnology, epidemiology, and medicine during the last 20 years. Hypotheses about the origins of HIV as a human disease; the spread of AIDS and HIV; social, political, and economic consequences of the epidemic; and national and global responses.

3 units, Aut (Katzenstein, D)

**MED 108Q. Human Rights and Health**

(S,Sem) Stanford Introductory Seminar. Preference to sophomores. History of human-rights law. International conventions and treaties on human rights as background for social and political changes that could improve the health of groups and individuals. Topics such as: regional conflict and health, the health status of refugees and internally displaced persons; child labor; trafficking in women and children; HIV/AIDS; torture; poverty, the environment and health; access to clean water; domestic violence and sexual assault; and international availability of drugs. Possible optional opportunities to observe at community sites where human rights and health are issues. Guest speakers from national and international NGOs including Doctors Without Borders; McMaster University Institute for Peace Studies; UC Berkeley Human Rights Center; Kiva. Paper presentation on topic of choice required.

3 units, Win (Laws, A)

**MED 143. Patient Health Education in Community Clinics**

(Same as MED 243) (Open to undergraduate, graduate, and medical students) Principles of health education, theories of behavior change, methods for risk reduction. Presentations of health education modules, focusing on topics prevalent among underserved populations. Students apply theoretical frameworks to health education activities in the Cardinal Free Clinics.

2 units, Aut (Kao, P; Ho, E)

**MED 147. Methods in Community Assessment, Evaluation, and Research**

(Same as MED 247) Development of pragmatic skills for design, implementation, and analysis of structured interviews, focus groups, survey questionnaires, and field observations. Topics include: principles of community-based participatory research, including importance of dissemination; strengths and limitations of different study designs; validity and reliability; construction of interview and focus group questions; techniques for moderating focus groups; content analysis of qualitative data; survey questionnaire design; and interpretation of commonly-used statistical analyses.

3 units, Spr (Kiernan, M; Fortmann, S)

**MED 149. Medical Interpreting: Skills and Etiquette**

(Same as MED 249) Open to medical students, graduate and un-

dergraduate students. The skills and etiquette of medical interpreting from a cross-cultural perspective. Includes an overview of the U.S. healthcare system and guest lectures on humanistic medicine. Requires two volunteer shifts at the Arbor Free Clinic. Successful completion qualifies students to become volunteer interpreters at the Stanford University Medical Center and the Arbor Free Clinic. Prerequisite: Fluency in a language other than English.

2 units, Win (Osterberg, L; Chen, Y)

**MED 160. Physician Shadowing: Stanford Immersion in Medicine Series (SIMS)**

Undergraduates are paired with a physician mentor at Stanford Hospital and Clinics, Lucile Packard Children's Hospital, or the Veteran's Administration Hospital. May be repeated for credit. Prerequisite: Application and acceptance to the SIMS program.

1 unit, Aut (Gesundheit, N; Fox, E), Win (Gesundheit, N; Fox, E), Spr (Gesundheit, N; Lewis, P)

**MED 199. Undergraduate Research**

Students undertake investigations sponsored by individual faculty members. Prerequisite: consent of instructor.

1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**GRADUATE COURSES IN MEDICINE**

**MED 201. Introduction to Internal Medicine**

Introduction to the different roles internists play in health care. Weekly lectures augmented with opportunities for mentorship, shadowing, and clinical skills-building. Lecture topics include primary care, subspecialties, and non-clinical careers.

1 unit, Aut (Verghese, A)

**MED 207. History of Medicine**

Weekly lectures that trace the development of Western medical tradition from Babylonian, Egyptian, and Greek ancient cultures to the present.

1 unit, Win (Camargo, C)

**MED 217. Technological Frontiers in Digestive Diseases**

Focused on introducing engineering, bioengineering, and physical sciences students to technologies used in the clinical setting. Topics include: endoscopes to detect and remove cancer; minimally invasive surgery to treat obesity; measurements of propulsion through the intestine; and technologies to detect and stop internal bleeding. Observations in the clinical setting; visits to laboratories engaged in the development of new technologies.

2 units, Spr (Lowe, A; Milroy, J)

**MED 227. Bedside Ultrasound**

For pre-clinical or clinical medical students, and others with permission. Uses of ultrasound (US) at the bedside. Portable US machines (now the size of laptop computers) are used. How to identify the normal anatomy of the heart, abdomen, and pelvis using US. As proficiency increases, patients with abnormal physical findings are examined at the bedside, enabling students to compare the traditional physical examination with information obtained during US. The syllabus, Introduction to the Physical Examination with Diagnostic Ultrasound (2001), written by Drs. Wolfe and Thompson is used as the students' guide.

1 unit, Aut (Liang, D; Thompson, N), Win (Liang, D; Thompson, N), Spr (Liang, D; Thompson, N)

**MED 228. Physicians and Social Responsibility**

Social and political context of the roles of physicians and health professionals in social change; policy, advocacy, and shaping public attitudes. How physicians have influenced governmental policy on nuclear arms proliferation; environmental health concerns; physicians in government; activism through research; the effects of poverty on health; homelessness; and gun violence. Guest speakers from national and international NGOs.

1 unit, Aut (Laws, A)

**MED 230. Rethinking International Health**

Issues and players that shape international health today. How to develop a road map for thoughtful, responsible action. Topics include: the role of the physician and health care worker; health as a human right; successful interventions; children's and women's health; issues in immunization; economic development; and NGOs. Online interviews with influential leaders in international health.

2-3 units, Spr (Goldhaber-Fiebert, J)

**MED 236. Psychosocial and Behavioral Health Interventions**

For medical students, graduate students and undergraduates with senior standing in Human Biology or Psychology. Contemporary theory and conceptual frameworks for psychosocial and behavioral change interventions as applied in the context of contemporary models of community medicine. The trans-theoretical model of behavioral change, contemporary behavioral, cognitive behavioral, social cognitive and acceptance-based models of behavioral change. Current models of emotion regulation, goal setting and attainment, and the impact of personality and characterological features on behavior and behavioral change. Application of theory in practicum based community clinic settings. Prerequisite: Stanford HIPAA training.

1 unit, not given this year

**MED 240. Sex Differences in Human Physiology and Disease**

(Same as OBGYN 240, HUMBIO 140) Chromosomal and hormonal influences on cells, tissues, and organs that underlie the development of reproductive organs and sexual dimorphism of the neuroendocrine system. Consequences of sex hormones and environmental factors that differ between men and women in systems including the musculoskeletal, neurological, cardiovascular, and immunological. Guest lecturers. Prerequisite: Human Biology core or equivalent, or consent of instructor.

2-3 units, Win (Stefanick, M)

**MED 242. Physicians and Human Rights**

Weekly lectures on how human rights violations affect health. Topics include: regional conflict and health, the health status of refugees and internally displaced persons; child labor; trafficking in women and children; HIV/AIDS; torture; poverty, the environment and health; access to clean water; domestic violence and sexual assault; and international availability of drugs. Guest speakers from national and international NGOs including Doctors Without Borders; McMaster University Institute for Peace Studies; UC Berkeley Human Rights Center; Kiva.

1 unit, Win (Laws, A)

**MED 243. Patient Health Education in Community Clinics**

(Same as MED 143) (Open to undergraduate, graduate, and medical students) Principles of health education, theories of behavior change, methods for risk reduction. Presentations of health education modules, focusing on topics prevalent among underserved populations. Students apply theoretical frameworks to health education activities in the Cardinal Free Clinics.

2 units, Aut (Kao, P; Ho, E)

**MED 244. Health Screening in the Community**

Practicum in the basics of health care screening and counseling with minor lecture component. Includes, but is not limited to, blood pressure, diabetes, cholesterol, obesity, safe sex, tuberculosis, diet and smoking. Students organize and participate in one community health screening even each month during the quarter. Adjunct to Stanford free clinics courses (Arbor and Pacific), but with consent of instructor may be taken by students not volunteering at these clinics.

1 unit, Aut (Osterberg, L), Win (Osterberg, L), Spr (Staff), Sum (Osterberg, L)

**MED 247. Methods in Community Assessment, Evaluation, and Research**

(Same as MED 147) Development of pragmatic skills for design, implementation, and analysis of structured interviews, focus groups, survey questionnaires, and field observations. Topics include: principles of community-based participatory research, including importance of dissemination; strengths and limitations of different study designs; validity and reliability; construction of interview and focus group questions; techniques for moderating focus groups; content analysis of qualitative data; survey questionnaire design; and interpretation of commonly-used statistical analyses.

3 units, Spr (Kiernan, M; Fortmann, S)

**MED 248. Student Rounds**

Teams of preclinical students meet weekly with a clinical student to hear the history and physical of a recent case the clinical student encountered on the wards. Following the presentation, the preclinical students work together under the guidance of the clinical student to develop a problem list and plan, which are then compared with the problem list, plan, and orders made by the actual admit-

ting team. In the course of presenting the cases, the clinical student describes personal experiences and practical components of ward work and daily clinical routine.

*1 unit, Aut (Kenny, K), Win (Kenny, K), Spr (Kenny, K), Sum (Kenny, K)*

**MED 249. Medical Interpreting: Skills and Etiquette**

(Same as MED 149) Open to medical students, graduate and undergraduate students. The skills and etiquette of medical interpreting from a cross-cultural perspective. Includes an overview of the U.S. healthcare system and guest lectures on humanistic medicine. Requires two volunteer shifts at the Arbor Free Clinic. Successful completion qualifies students to become volunteer interpreters at the Stanford University Medical Center and the Arbor Free Clinic. Prerequisite: Fluency in a language other than English.

*2 units, Win (Osterberg, L; Chen, Y)*

**MED 250A. Medical Ethics I**

Required for Scholarly Concentration in Biomedical Ethics and Medical Humanities. The field of bioethics, including theoretical approaches to bioethical problems. Contemporary controversies and clinical cases. Values that arise in different situations and clinical encounters. Issues include: genetics and stem cell research, rationing, ethical issues in care at the end of life, organ transplantation issues.

*2 units, Win (Magnus, D)*

**MED 250B. Medical Ethics II**

The integration of ethical theory with applications of theory or conceptual issues in medicine, health care, and the life and social sciences. Topic varies by year. Possible topics include: ethical issues in stem cell research; death and dying; genetics and ethics; concepts of health and disease; the ethics of international research; and ethical implications of new reproductive technology.

*2 units, not given this year*

**MED 255. The Responsible Conduct of Research**

Forum. How to identify and approach ethical dilemmas that commonly arise in biomedical research. Issues in the practice of research such as in publication and interpretation of data, and issues raised by academic/industry ties. Contemporary debates at the interface of biomedical science and society regarding research on stem cells, bioweapons, genetic testing, human subjects, and vertebrate animals. Completion fulfills NIH/ADAMHA requirement for instruction in the ethical conduct of research. Recommended: research experience.

*1 unit, Aut (Karkazis, K), Win (Karkazis, K), Spr (Karkazis, K)*

**MED 255C. The Responsible Conduct of Research for Clinical Researchers**

Engages clinical researchers in discussions about ethical issues commonly encountered during their clinical research careers and addresses contemporary debates at the interface of biomedical science and society. Medical and graduate students required to take RCR who are or will be conducting clinical research are encouraged to enroll in this version of the course. Prerequisites: research experience recommended, instructor consent required.

*1 unit, Aut (Karkazis, K)*

**MED 256. Global HIV/AIDS**

(Same as HUMBIO 156) Public health, policy, and research issues. Resources at Stanford and institutions such as government, NGOs, and pharmaceutical, advocacy, and international organizations. Sources include biomedical, social, and behavioral sciences. Student projects. Guest lectures. Prerequisite: Human Biology core or equivalent, or consent of instructor.

*3 units, Spr (Katzenstein, D)*

**MED 257A. Patient Advocacy in Community Clinics**

Early clinical experience for pre-medical and medical students. Structured training and shadowing in preparation for a clinical role working with patients in community health clinics; the context of the work, populations served, and social role of physicians. Regular shifts at one of the course-affiliated clinic sites throughout the academic year. 1-2 units for students attending class meetings and performing clinic shifts. 3-4 units for a year-long, clinic-based project. Prerequisite: application.

*1-4 units, Aut (Garcia, G; Banchoff, A)*

**MED 257B. Patient Advocacy in Community Clinics**

Early clinical experience for pre-medical and medical students. Structured training and shadowing in preparation for a clinical role

working with patients in community health clinics; the context of the work, populations served, and social role of physicians. Regular shifts at one of the course-affiliated clinic sites throughout the academic year. 1-2 units for students attending class meetings and performing clinic shifts. 3-4 units for a year-long, clinic-based project. Prerequisite: MED 257A

*1-4 units, Win (Garcia, G; Banchoff, A)*

**MED 257C. Patient Advocacy in Community Clinics**

Early clinical experience for pre-medical and medical students. Structured training and shadowing in preparation for a clinical role working with patients in community health clinics; the context of the work, populations served, and social role of physicians. Regular shifts at one of the course-affiliated clinic sites throughout the academic year. 1-2 units for students attending class meetings and performing clinic shifts. 3-4 units for a year-long, clinic-based project. Prerequisite: 257A,B

*1-4 units, Spr (Garcia, G; Banchoff, A)*

**MED 258. Advanced Patient Advocacy in Community Clinics**

Continuation of 257A,B,C for second-year students in Patient Advocacy Program; open to students who have worked in a clinical capacity in a community clinic setting. Skills training in areas such as health education counseling and group facilitation. Regular shifts at partner clinics. Students partner with clinic staff in developing and carrying out a service-learning or research project designed to meet the clinic's needs. May be repeated for credit. Prerequisites: 257A,B,C or consent of instructor.

*1-3 units, alternate years, not given this year*

**MED 258A. Advanced Patient Advocacy in Community Clinics**

Continuation of 257A,B,C for second-year students in Patient Advocacy Program; open to students who have worked in a clinical capacity in a community clinic setting. Skills training in areas such as health education counseling and group facilitation. Regular shifts at partner clinics. Students partner with clinic staff in developing and carrying out a service-learning or research project designed to meet the clinic's needs. Prerequisites: 257A,B,C or consent of instructor.

*1-3 units, Aut (Garcia, G; Banchoff, A)*

**MED 258B. Advanced Patient Advocacy in Community Clinics**

Continuation of 258A for second-year students in Patient Advocacy Program; open to students who have worked in a clinical capacity in a community clinic setting. Skills training in areas such as health education counseling and group facilitation. Regular shifts at partner clinics. Students partner with clinic staff in developing and carrying out a service-learning or research project designed to meet the clinic's needs. Prerequisites: 257A,B,C and 258A, or consent of instructor.

*1-3 units, Win (Garcia, G; Banchoff, A)*

**MED 258C. Advanced Patient Advocacy in Community Clinics**

Continuation of 258A/B for second-year students in Patient Advocacy Program; open to students who have worked in a clinical capacity in a community clinic setting. Skills training in areas such as health education counseling and group facilitation. Regular shifts at partner clinics. Students partner with clinic staff in developing and carrying out a service-learning or research project designed to meet the clinic's needs. Prerequisites: 257A,B,C and 258A, B, or consent of instructor.

*1-3 units, Spr (Garcia, G; Banchoff, A)*

**MED 259. Oaxacan Health on Both Sides of the Border**

Required for students participating in the Community Health in Oaxaca summer program. Introduction to the health literacy and health-seeking behaviors of Oaxacan and other Mexican migrants; examines the health challenges these groups face. Through discussion and reflection, students prepare for clinical work and community engagement in Oaxaca, while also gaining knowledge and insight to make connections between their experiences in Mexico and their health-related work with Mexican immigrants in the Bay Area. Prerequisite: application and acceptance into the Community Health in Oaxaca Summer Program (<http://och.stanford.edu/oaxaca.html>).

*2 units, Spr (Garcia, G; Banchoff, A)*

**MED 262. Economics of Health Improvement in Developing Countries**

(Same as ECON 127) Application of economic paradigms and empirical methods to health improvement in developing countries.

Emphasis is on unifying analytic frameworks and evaluation of empirical evidence. How economic views differ from public health, medicine, and epidemiology; analytic paradigms for health and population change; the demand for health; the role of health in international development. Prerequisites: ECON 50 and 102B, and consent of instructor.

5 units, not given this year

**MED 272A. Biodesign Innovation Core: Needs Finding and Concept Creation**

(Same as BIOE 374A, ME 368A) Two quarter sequence. Inventing new medical devices and instrumentation, including: methods of validating medical needs; techniques for analyzing intellectual property; basics of regulatory (FDA) and reimbursement planning; brainstorming and early prototyping. Guest lecturers and practical demonstrations. May be taken alone (2 units) or in combination with the project component (4 units).

2-4 units, Win (Yock, P; Zenios, S; Milroy, J; Brinton, T)

**MED 272B. Biodesign Innovation Core: Concept Development and Implementation**

(Same as BIOE 374B, ME 368B) Two quarter sequence. How to take a medical device invention forward from early concept to technology translation and development. Topics include prototyping; patent strategies; advanced planning for reimbursement and FDA approval; choosing translation route (licensing versus start-up); ethical issues including conflict of interest; fundraising approaches and cash requirements; essentials of writing a business or research plan; strategies for assembling a development team. May be taken alone (2 units) or in combination with the project component (4 units). Prerequisite: MED 272A, ME368A, or BIOE 374A.

2-4 units, Spr (Staff)

**MED 275. Introduction Biopharmaceutical Innovation**

Open to all students. Biotechnology and the pharmaceutical industry. Topics include the biopharmaceutical industry, historical trends, and experiences; research and development; intellectual property; drug approval; regulatory issues and agencies; business development; marketing; manufacturing; capital structure and financing; careers in biopharmaceutical industry. 2-unit option, lectures and weekly assignments, MED or S/NC grading only. 3-unit option, including a group project and final presentation, may be taken for a letter grade. May be repeated for credit.

2-3 units, Win (Gardner, P; Seam, A)

**MED 276. Careers in Medical Technology**

Career tracks in biomedical technology for medical, life science, engineering, business, and law students of all levels. Industry professionals describe career tracks, current roles, and industry perspectives. 2-unit option, lectures and weekly assignments, MED or S/NC grading only. 3-unit option, including a group project and final presentation, may be taken for a letter grade. May be repeated for credit.

2-3 units, Spr (Gardner, P; Seam, A)

**MED 282. Early Clinical Experience at the Arbor Free Clinic**

Students provide health care in a student-run clinic for the homeless and uninsured. Student volunteers are guided in the practice of medical interviews, history-taking and physical examinations as appropriate. Clinical students and attending physicians provide support and guidance as the team arrives at a diagnosis and management plan. Two units of credit is intended for Steering Committee members or for students who work at the clinic every other Sunday.

1-2 units, Aut (Osterberg, L), Win (Osterberg, L), Spr (Osterberg, L), Sum (Osterberg, L)

**MED 283. Early Clinical Experience at Pacific Free Clinic**

Hands-on experience at a student-run free clinic targeting immigrants in the San Jose area. Opportunity to work with an interpreter and learn about unique health care issues faced by immigrants. Students are expected to conduct history and physicals, present to the attending physician, help arrive at a diagnosis and plan and participate in basic procedures. 1 unit for limited commitment. 2 units for volunteers in training and students who volunteer a minimum of once a month. 3 units for Steering Committee members and students who volunteer a minimum of twice a month.

1-3 units, Aut (Staff), Win (Kao, P; Martin, M), Spr (Kao, P)

**MED 289. Introduction to Bioengineering Research**

(Same as BIOE 390) Preference to medical and bioengineering

graduate students. Bioengineering is an interdisciplinary field that leverages the disciplines of biology, medicine, and engineering to understand living systems, and engineer biological systems and improve engineering designs and human and environmental health. Topics include: imaging; molecular, cell, and tissue engineering; biomechanics; biomedical computation; biochemical engineering; biosensors; and medical devices. Limited enrollment.

1-2 units, Aut (Taylor, C), Win (Taylor, C)

**MED 295. Advanced Cardiac Life Support**

(For clinical MD students only) Prepares students to manage the victim of a cardiac arrest. Knowledge and skills necessary for resuscitation of critically-ill patients. Clinical scenarios and small group discussions address cardiovascular pharmacology, arrhythmia recognition and therapy, acute coronary syndrome including myocardial infarction, ventricular dysrhythmias and defibrillation, and acute ischemic stroke. Requires pre-course preparation and an intensive two-day session on a Friday and Saturday. Students should get the approval of their Clerkship Coordinator before registering for the course. Recommended prerequisites: Medicine 300A, Pediatrics 300A, or Surgery 300A.

2 units, Aut (Giacomini, J), Win (Giacomini, J), Spr (Giacomini)

**MED 299. Directed Reading in Medicine**

Prerequisite: consent of instructor.

1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**MED 370. Medical Scholars Research**

Provides an opportunity for student and faculty interaction, as well as academic credit and financial support, to medical students who undertake original research. Enrollment is limited to students with approved projects.

4-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**MED 399. Graduate Research**

Students undertake investigations sponsored by individual faculty members. Prerequisite: consent of instructor.

1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**MEDICINE INTERDISCIPLINARY (INDE)**

**UNDERGRADUATE COURSES IN MEDICINE INTERDISCIPLINARY**

**INDE 183I. Early Clinical Experience in International Family and Community Medicine**

(Same as INDE 283I) (Graduate students register for 283I.) For preclinical medical students; undergraduates by special arrangement. Interactive early clinical experience with physicians, community leaders, health care workers, and patients in Mexico, India, China, or Tibet. Emphasis is on community health from local and global perspectives. Social, political, historical, and economic backgrounds of the country and local region. Non-western attitudes, beliefs and practices regarding health care, including herbal and other complementary medicine; local institutions and infrastructure including schools, social services, and the public health care system; and policies that impact health and the provision of care. Prerequisites: conversational Spanish for Mexico; for medical students, completion of first year; for undergraduates, junior standing or higher. Undergraduates apply through International Alliance in Service and Education (IASE) for Mexico; Volunteers in Asia (VIA) for Asian sites. Medical students a

6-12 units, Aut (LeBaron, S), Win (LeBaron, S), Spr (LeBaron, S), Sum (LeBaron, S)

**INDE 199. Undergraduate Directed Reading and Research in Family and Community Medicine**

Interested students should contact the Center for Education in Family and Community Medicine administration. Prerequisite: consent of instructor.

1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

## GRADUATE COURSES IN MEDICINE INTERDISCIPLINARY

### INDE 200. The Future of Academic Medicine

Required for first-year MSTP students; limited to MSTP. Presentations of research directions and opportunities by chairs of basic science, clinical departments, and PhD programs. Prerequisite: instructor consent.

1 unit, Aut (Kim, S)

### INDE 207A. Medical Mandarin I: Beginning

Develops essential medical vocabularies and conversational communication skills. Teaches the pinyin pronunciation system, which provides an accessible method of learning basic phrases. The foundations of taking a comprehensive patient history in Mandarin and doing medical interviews at individual hospital divisions, including making introductions, soliciting symptoms, explaining health concepts (e.g. diseases and prescriptions). Main goals are to improve rapport with Chinese patients through Mandarin fluency in the medical setting and to promote understanding of Chinese culture in the context of health care. Students participating in classroom instruction only register for 1 unit. Students registering for 2 units participate in field activities as well.

1-2 units, Aut (Wang, X; So, S)

### INDE 207B. Medical Mandarin II: Intermediate

For students who already have a basic command of spoken Chinese. Conversational communication skills practiced in a more advanced setting, including more sophisticated assessment of patient history and cultural components that influence diseases found in Chinese-speaking patients. Builds working vocabulary for organ system disease processes to conduct a full physical exam, and to describe treatment modalities for Chinese-speaking patients (diagnostic and therapeutic). Students participating in classroom instruction only register for 1 unit. Students registering for 2 units participate in field activities as well. Prerequisite: one semester of college-level Chinese or instructor assessment of fluency.

1-2 units, Aut (Wang, X; So, S)

### INDE 207C. Medical Mandarin III: Advanced

Access advanced professional medical vocabulary, conduct medical research, and engage in discussions in Chinese. Aims at a proficiency level of medical interpreting or doing other independent work in Chinese. Students are also assisted in doing a project or projects related to a specific field of medicine. Students participating in classroom instruction only register for 1 unit. Students registering for 2 units participate in project activities as well. Prerequisite: Completion of Medical Mandarin II, or advanced Chinese proficiency.

1-2 units, Aut (Wang, X; So, S)

### INDE 208C. Medical Mandarin III: Advanced

Access advanced professional medical vocabulary, conduct medical research, and engage in discussions in Chinese. Aims at a proficiency level of medical interpreting or doing other independent work in Chinese. Students are also assisted in doing a project or projects related to a specific field of medicine. Students participating in classroom instruction only register for 1 unit. Students registering for 2 units participate in project activities as well. Prerequisite: Completion of 207C, or advanced Chinese proficiency.

1-2 units, Win (Wang, X; So, S)

### INDE 209C. Medical Mandarin III: Advanced

Access advanced professional medical vocabulary, conduct medical research, and engage in discussions in Chinese. Aims at a proficiency level of medical interpreting or doing other independent work in Chinese. Students are also assisted in doing a project or projects related to a specific field of medicine. Students participating in classroom instruction only register for 1 unit. Students registering for 2 units participate in project activities as well. Prerequisite: Completion of 208C or advanced Chinese proficiency.

1-2 units, Spr (Wang, X; So, S)

### INDE 210. The Healer's Art

For pre-clinical and clinical medical students. Explores core dimensions of meaning, service and healing exemplified by the outstanding physician. Goals are to develop and preserve personal values such as service, harmlessness, compassion, altruism, self care, integrity, equality, justice, respect, and nurturing wholeness;

to develop the compassionate listening skill that is foundational for clinical practice and for finding personal meaning and satisfaction; and to clarify a commitment to medicine as one's life's work. Clinical faculty facilitate small group sessions and participate in the discovery model process on an equal footing with students. The Healer's Art was originally developed by Dr. Rachel Naomi Remen, Clinical Professor at UCSF.

1 unit, Aut (Feldstein, B; LeBaron, S)

### INDE 211. Creative Writing

For medical students - all levels of writing skill. Examines uses of creative writing, including understanding the experience of medical training.

1 unit, Win (Charlton, B; Shafer, A)

### INDE 212. The Human Condition: Medicine, Arts, and Humanities

The interdisciplinary field of medical humanities: the use of the arts and humanities to examine medicine in personal, social, and cultural contexts. Topics include the doctor/patient relationship, the patient perspective, the meaning of doctoring, and the meaning of illness. Sources include visual and performing arts, film, and literary genres such as poetry, fiction, and scholarly writing. Designed for medical students in the Biomedical Ethics and Medical Humanities Scholarly Concentration, but all students are welcome.

2 units, Spr (Zaroff, L; Shafer, A)

### INDE 213. Medical Tai Chi

Tai chi as a recognized form of complimentary and alternative medicine. Intended to promote student health and well-being and to decrease stress, depression, and anxiety through the practice of tai chi. Weekly practices under the instruction of world-renowned 20th generation tai chi expert, Master Shu Dong Li. Analysis of the literature regarding health benefits of tai chi.

2 units, Aut (Sundberg, M; LeBaron, S), Win (Andrews, J; LeBaron, S), Spr (Andrews, J; LeBaron, S)

### INDE 214. Stanford Medical Student Clinical Journal

Provides an opportunity for editors of all levels to cultivate their skills and assist in preparing pieces submitted by colleagues for publication in the Stanford Medical Student Clinical Journal (SMSCJ). Students enrolled in the course work closely with student authors as well as other editors. Editors examine multiple categories of writing, including opinion pieces, poetry, memoirs, book reviews, case reports and investigative reports. The SMSCJ is published two to three times per year and highlights the diverse talents of Stanford medical students in both scientific writing and the humanities.

1 unit, Aut (Shafer, A; Connolly, A), Win (Shafer, A; Cross, P), Spr (Shafer, A; Cross, P)

### INDE 216. Cells to Tissues

Focuses on the cell biology and structural organization of human tissues as self-renewing systems. Topics include identification and differentiation of stem cells, regulation of the cell cycle and apoptosis in normal and cancerous cells, cell adhesion and polarity in epithelial tissues, intracellular transport, and cell migration. Histology laboratory sessions examine normal and abnormal samples of blood, epithelia, skin, connective tissue, muscle, bone and cartilage. Patient presentations and small group discussions of current medical literature illustrate how cell biology influences medical practice.

3 units, Aut (Theriot, J; Connolly, A)

### INDE 219. Mind-Body Medicine

Exploration of the interconnections among human capacities such as thought, emotion, belief, attitudes, and physical health. Reviews literature relevant to mind-body medicine. Discusses and practices specific skills (including mindfulness exercises, meditation, imagery, visualization, body awareness, autogenics, and biofeedback) to enhance self-awareness, self-expression, and stress management. Anticipated benefits to class participants include discovering and mobilizing their capacity to participate in valuable and proven methods of stress reduction, while dealing with the frustrations and alienation that many students experience in medical school and beyond. Prerequisite: Interest in PsychoNeuroimmunology.

1 unit, not given this year

### INDE 220. Human Health and Disease I

Establishes the foundation for the Human Health and Disease block which spans Q3 (Spring quarter Year One) through Q5

(Winter quarter Year Two). The Human Health and Disease block presents organ system-based histology, pathology, physiology, pharmacology, and infectious disease in a sequence of interdisciplinary courses. Each organ-specific integrated course includes a review of the anatomy and related histology, normal function of that organ system, how the organ system is affected by and responds to disease including infection, and how diseases of that organ system are treated (therapeutics).

3 units, Win (Siegel, R; Whitlock, J; Regula, D)

**INDE 221. Human Health and Disease II**

Structure, function, disease, and therapeutics of the respiratory system and the cardiovascular system. See INDE 220 for a description of the Human Health and Disease block .

12 units, Spr (Regula, D; Kobilka, B; Kao, P; Cross, P; Whitlock, J)

**INDE 222. Human Health and Disease III**

Structure, function, disease, and therapeutics of the renal/genitourinary system, the gastrointestinal system, the endocrine system, male and female reproductive systems, and women's health. See INDE 220 for a description of the Human Health and Disease block .

15 units, Aut (Regula, D; Meyer, T; Lowe, A; Gesundheit, N; Hillard, P; Connolly, A; Siegel, R)

**INDE 223. Human Health and Disease IV**

Structure, function, disease, and therapeutics of the central nervous system, hematologic system and multi-systemic diseases. See INDE 220 for a description of the Human Health and Disease block.

11 units, Win (Regula, D; Cross, P; Siegel, R; Glader, B; Ferrell, J; Fisher, R)

**INDE 226. History of Medicine Online**

Via Internet. Topics include: ancient medicine, Egypt and Babylonia, ancient Greece and Rome, Europe in the Middle Ages and the Renaissance, 18th-century schools of thought, and technological medicine. Sources include Kleinman's core clinical functions, and text, pictures, hypertext links, and sound clips. For assistance accessing the course, email: cwpsupport@lists.stanford.edu.

1 unit, Aut (Shafer, A), Win (Shafer, A), Spr (Shafer, A)

**INDE 227. Careers in Medicine: Pathways in the Medical Sciences**

Open to medical students, graduate and undergraduate students. Interactive, seminar-style sessions expose students to diverse career opportunities and the challenges of developing work-life balance in medicine. Recognized experts in clinical medicine and biomedical research who have been innovators in their careers discuss their work, decision-points in their career pathways, and lifestyle aspects of their choices.

1 unit, Spr (Gesundheit, N)

**INDE 228. Career Transition Planning: Taking Action Today for a Successful Tomorrow**

Open to School of Medicine MD and graduate students; post-docs and clinical fellows may audit by consent of instructor. How to prioritize career goals and develop an effective job search campaign. Topics: translating scientific and clinical training into a variety of workplace environments, professional network development, professional interest assessment, recruiters' perspectives, credentials development, and creating a marketing plan. Guest speakers from myriad career fields. May be repeated for credit.

1 unit, Spr (Eberle, S)

**INDE 229. Managing Difficult Conversations**

(Same as GSBGEN 568) Dealing effectively with difficult interpersonal situations in medical contexts. Focus is on improving students' judgment as to how to prepare for and confront difficult discussions in medical situations. Relevant principles of professionalism, leadership, and psychology underlie the course pedagogy. Case-based; student-to-student and student-to-instructor role-playing in actual medical situations. Patient and physician-expert participation as class guests.

1 unit, Aut (Grousbeck, I; Prober, C)

**INDE 231. Future Faculty Seminar**

(Same as CTL 231) For graduate students from all disciplines who are considering faculty careers. Postdoctoral fellows, TGR students, and research/clinical trainees may audit by consent of instructor. Explores the broad spectrum of duties and opportunities

presented through faculty positions beyond the research-related aspects. Develops awareness of resources and skills that lead to faculty success; answers field-specific and related faculty job questions through discussions with representatives of a variety of academic institutions and fellow course participants. Topics include: finding and obtaining faculty positions, negotiating and navigating the first year, and working toward tenure. May be repeated for credit.

1 unit, Aut (Eberle, S; Wright-Dunbar, R)

**INDE 238. Current Concepts and Dilemmas in Genetic Testing**

(Same as GENE 238) For M.D., biomedical graduate, and genetic counseling students. Issues arising from the translational process from research to commercialization. Diagnostic inventions and applications, community implications, newborn screening, cancer genetics, and pharmacogenomics. Guest experts.

2 units, Spr (Tobin, S; Schrijver, I; Cowan, T; Magnus, D)

**INDE 241. Assistantship in Family and Community Medicine**

Limited to MD students. In-depth experience with a family physician preceptor following the first or second year of the pre-clinical curriculum. Placements with family physicians' practices throughout California.

6-12 units, Aut (Grudzen, M; LeBaron, S), Sum (LeBaron, S; Grudzen, M)

**INDE 244. Ethnicity and Medicine**

Weekly lecture series introduces basic information about ethnic and cultural factors that impact patient care. Presents information about culturally sensitive health care services and addresses contemporary research issues involving minority and underserved populations. Topics include health care issues and indigenous medical practices of African Americans, Asians, Latinos, Native Americans, immigrants and refugees in both urban and rural settings. One unit for weekly lectures only; two units require additional discussions facilitated by course director; three units (non-medical graduate students and undergraduates) require weekly response papers and a research paper.

1-3 units, Spr (Garcia, R)

**INDE 245. Women and Health Care**

Lecture and seminar series. Topics of interest to women as health care consumers and providers. The historical role of women in health care; current and future changes.

1-2 units, Aut (Grudzen, M; LeBaron, S; Massion, C)

**INDE 253. Rural Health with a Global Perspective**

Health status of the population, availability of health services and institutions, personal and environmental factors affecting health and medical care, and present and future models for change. Three-day field trip to San Joaquin Valley and mountain sites.

3-5 units, not given this year

**INDE 262A. Providing and Evaluating Health Education for Underserved Children**

A service learning experience in community health. Students participate in developing health education materials for underserved middle school students based on principles of human biology and health science ; become knowledgeable about logic modes and other evaluation tools available for evaluating health education modules and community interventions; develop an implementation and evaluation plan. Prerequisite for undergraduates: Human Biology core or equivalent or consent of instructor.

3 units, Win (Staff), Spr (Staff)

**INDE 283I. Early Clinical Experience in International Family and Community Medicine**

(Same as INDE 183I) (Graduate students register for 283I.) For preclinical medical students; undergraduates by special arrangement. Interactive early clinical experience with physicians, community leaders, health care workers, and patients in Mexico, India, China, or Tibet. Emphasis is on community health from local and global perspectives. Social, political, historical, and economic backgrounds of the country and local region. Non-western attitudes, beliefs and practices regarding health care, including herbal and other complementary medicine; local institutions and infrastructure including schools, social services, and the public health care system; and policies that impact health and the provision of care. Prerequisites: conversational Spanish for Mexico; for medical students, completion of first year; for undergraduates, junior standing or higher. Undergraduates apply through International Alliance

in Service and Education (IASE) for Mexico; Volunteers in Asia (VIA) for Asian sites. Medical students  
*6-12 units, Aut (LeBaron, S), Win (LeBaron, S), Spr (LeBaron, S), Sum (LeBaron, S)*

## MICROBIOLOGY AND IMMUNOLOGY (MI)

### UNDERGRADUATE COURSES IN MICROBIOLOGY AND IMMUNOLOGY

#### MI 104. Innate Immunology

(Same as IMMUNOL 204, MI 204) Innate immune mechanisms as the only defenses used by the majority of multicellular organisms. Topics include Toll signaling, NK cells, complement, antimicrobial peptides, phagocytes, neuroimmunity, community responses to infection, and the role of native flora in immunity. How microbes induce and defeat innate immune reactions, including examples from vertebrates, invertebrates, and plants.

*3 units, Spr (Schneider, D)*

#### MI 115B. The Vaccine Revolution

(Same as HUMBIO 155B) Advanced seminar. Human aspects of viral disease, focusing on recent discoveries in vaccine development and emerging infections. Journal club format: students choose articles from primary scientific literature, write formal summaries, and synthesize them into a literature review. Emphasis is on analysis, experimental design, and interpretation of data. Oral presentations. Enrollment limited to 10. Prerequisites: HUMBIO 155H, MI 155V.

*6 units, alternate years, not given this year*

#### MI 115C. Human Virology Inquiry Project I

Intensive group tutorial in human virology including classification, clinical features, molecular virology, pathogenesis, immune response, epidemiology, prevention, drug development, and vaccinology. Pertinent examples from all human virus families. Student presentations and discussion in a small group setting. Research and writing intensive. First quarter of a two quarter sequence. Limited enrollment. Prerequisites: Consent of instructor and written application required for enrollment.

*6 units, Aut (Siegel, R)*

#### MI 115D. Human Virology Inquiry Project II

Intensive group tutorial in human virology including classification, clinical features, molecular virology, pathogenesis, immune response, epidemiology, prevention, drug development, and vaccinology. Pertinent examples from all human virus families. Student presentations and discussion in a small group setting. Research and writing intensive. Second quarter of a two quarter sequence. Limited enrollment. Prerequisites: MI 115C, consent of instructor and written application required for enrollment.

*6 units, Win (Siegel, R)*

#### MI 130. Medical Microbiology and Infectious Diseases

(Same as MI 230) For graduate students and undergraduates. Required of first-year graduate students in Microbiology and Immunology. Biological properties of microbes associated with diseases of humans; identification and laboratory diagnosis; principles of prevention and treatment; introduction to microbial genetics and evolution as it pertains to pathogenicity. Prerequisite: background in molecular biology.

*3 units, not given this year*

#### MI 155H. Humans and Viruses I

(Same as HUMBIO 155H) Introduction to human virology integrating epidemiology, molecular biology, clinical sciences, social sciences, history, and the arts. Emphasis is on host pathogen interactions and policy issues. Topics: polio and vaccination, smallpox and eradication, yellow fever and history, influenza and genomic diversity, rubella and childhood infections, adenovirus and viral morphology, ebola and emerging infection, lassa fever and immune response.

*6 units, not given this year*

#### MI 155V. Humans and Viruses II

Introduction to human virology integrating epidemiology, molecu-

lar biology, clinical sciences, social sciences, history, and the arts. Emphasis on host pathogen interactions and policy issues. Topics: measles and viral epidemiology, rotavirus and world health, rabies and infections of the brain, HPV and cancer-causing viruses, herpes simplex and viral latency, CMV and viral teratogenesis, retrovirology and endogenous viral sequences, HIV and viral treatment, viral hepatitis and chronic infections, prions and diseases of life style. Prerequisite: MI155H.

*6 units, not given this year*

#### MI 185. Topics in Microbiology

For advanced undergraduates. Topics include diversity, molecular regulation, growth, bioenergetics, and unique metabolic processes. Presentation of student papers on current topic selected with student input. Prerequisites: CHEM 31X, Biology core.

*3 units, not given this year*

#### MI 198. Directed Reading in Microbiology and Immunology

Fields of study are decided in consultation with sponsoring professor. Prerequisite: consent of instructor.

*1-15 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

#### MI 199. Undergraduate Research

Investigations sponsored by individual faculty members. Possible fields: microbial molecular biology and physiology, microbial pathogenicity, immunology, virology, and molecular parasitology. Prerequisite: consent of instructor.

*1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

### GRADUATE COURSES IN MICROBIOLOGY AND IMMUNOLOGY

#### MI 204. Innate Immunology

(Same as IMMUNOL 204, MI 104) Innate immune mechanisms as the only defenses used by the majority of multicellular organisms. Topics include Toll signaling, NK cells, complement, antimicrobial peptides, phagocytes, neuroimmunity, community responses to infection, and the role of native flora in immunity. How microbes induce and defeat innate immune reactions, including examples from vertebrates, invertebrates, and plants.

*3 units, Spr (Schneider, D)*

#### MI 209. Advanced Pathogenesis of Bacteria, Viruses, and Eukaryotic Parasites: Part I

For graduate students and advanced undergraduates; required of first-year graduate students in Microbiology and Immunology. Emphasis is on mechanisms to establish infection in the host and responses of the host to infection. Current literature. Prerequisite: background in biochemistry and molecular biology.

*4 units, not given this year*

#### MI 210. Advanced Pathogenesis of Bacteria, Viruses, and Eukaryotic Parasites

For graduate and medical students, and advanced undergraduates; required of first-year graduate students in Microbiology and Immunology. The molecular mechanisms by which microorganisms invade animal and human hosts, express their genomes, interact with macromolecular pathways in the infected host, and induce disease. Current literature.

*4 units, Win (Sarnow, P)*

#### MI 211. Advanced Immunology I

(Same as IMMUNOL 201) For graduate and medical students and advanced undergraduates. Molecules and cells of the innate and adaptive immune systems; genetics, structure, and function of immune molecules; lymphocyte differentiation and activation; regulation of immune responses; autoimmunity and other problems in immune system dysfunction. Prerequisites: undergraduate course in Immunology and familiarity with experimental approaches in biochemistry, molecular biology, and cell biology.

*3 units, Win (Chien, Y)*

#### MI 215. Principles of Biological Technologies

(Same as IMMUNOL 215) The principles underlying commonly utilized technical procedures in biological research. Lectures and primary literature critiques on gel electrophoresis, protein purification and stabilization, immunofluorescence microscopy, FACS. Prerequisites: biochemistry. Required of first-year graduate students in Microbiology and Immunology, and the Immunology program.

*3 units, Spr (Kirkegaard, K)*

### MI 230. Medical Microbiology and Infectious Diseases

(Same as MI 130) For graduate students and undergraduates. Required of first-year graduate students in Microbiology and Immunology. Biological properties of microbes associated with diseases of humans; identification and laboratory diagnosis; principles of prevention and treatment; introduction to microbial genetics and evolution as it pertains to pathogenicity. Prerequisite: background in molecular biology.

3 units, not given this year

### MI 233. The Biology of Small Modulatory RNAs

(Same as GENE 233, PATH 233) Open to graduate and medical students. How recent discoveries of miRNA, RNA interference, and short interfering RNAs reveal potentially widespread gene regulatory mechanisms mediated by small modulatory RNAs during animal and plant development. Required paper proposing novel research.

2 units, Aut (Fire, A; Chen, C), alternate years, not given this year

### MI 234. Fundamentals of RNA Biology

(Same as GENE 234, PATH 234) For graduate or medical students and (if space allows) to active participants from other segments of the Stanford Community (e.g., TGR students); undergraduates by instructor consent. Fundamental issues of RNA biology, with the goal of setting a foundation for students to explore the expanding world of RNA-based regulation. Each week a topic is covered by a faculty lecture and journal club presentations by students.

2 units, Aut (Chen, C; Fire, A; Sarnow, P)

### MI 240. Professional and Leadership Development

Foundational skills; how to communicate, resolve conflict, negotiate, and present. Workshop format integrating theory and practice. Application required; see <http://www.stanford.edu/class/immunol240>.

2 units, Spr (Radermacher, A; Finan, D; Allen, J)

### MI 250. Frontiers in Microbiology and Immunology

Required of first- and second-year students in Microbiology and Immunology. How to evaluate biological research. Held in conjunction with the Microbiology and Immunology Friday noon seminar series. Before the seminar, students and faculty discuss one or more papers from the speaker's primary research literature on a related topic. After the seminar, students meet informally with the speaker to discuss their research.

1 unit, Aut (Schneider, D), Win (Schneider, D), Spr (Schneider, D)

### MI 299. Directed Reading in Microbiology and Immunology

Prerequisite: consent of instructor.

1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

### MI 370. Medical Scholars Research

Provides an opportunity for student and faculty interaction, as well as academic credit and financial support, to medical students who undertake original research. Enrollment is limited to students with approved projects.

4-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

### MI 399. Graduate Research

Students who have completed the necessary foundation courses undertake investigations in general bacteriology, bacterial physiology and ecology, bacterial genetics, microbial pathogenicity, immunology, parasitology, or virology sponsored by individual faculty members. Prerequisite: consent of instructor.

1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

## MODERN THOUGHT AND LITERATURE (MTL)

### GRADUATE COURSES IN MODERN THOUGHT AND LITERATURE

#### MTL 299. Edgework: New Directions in the Study of Culture

Workshop. Required of first-year students in the doctoral program. Methodologies of different disciplines, the possibility and difficulty of interdisciplinary work within these disciplines, and their connection with the individual projects of students in Modern Thought

and Literature. May be repeated for credit.

1-3 units, Spr (Staff)

### MTL 334A. Concepts of Modernity 1: Philosophical Foundations

(Same as ENGLISH 334A) Preference to first-year graduate students in Modern Thought and Literature and English. Kant's 18th-century development of the critique of reason; how it set the stage for the themes and problems that have preoccupied Western thinkers. Focus is on texts that extend and problematize the critique of reason. Writers include Kant, Hegel, Marx, Nietzsche, Weber, Freud, Lukács, and Heidegger.

5 units, Aut (Moya, P)

### MTL 334B. Concepts of Modernity 2: The Study of Culture in the Age of Globalization

(Same as ENGLISH 334B) 20th-century theory with focus on the concept of culture and methods of studying it from diverse disciplines including sociology, anthropology, history, literary and cultural studies. Modernization, postmodernization, and globalization in their relations to culture broadly understood, cultures in their regional, national, and diasporic manifestations, and cultures as internally differentiated such as high and low culture, subcultures, and media cultures. Readings include Gramsci, Adorno, Horkheimer, Williams, Hall, Gilroy, Hebdige, Jameson, García Canclini, Foucault, Bourdieu, Geertz, Clifford, Saïd, Appadurai, and Appiah.

5 units, Win (Heise, U)

### MTL 390. Qualifying Paper

Preparation and writing of the qualifying paper for the Ph.D. in Modern Thought and Literature. (Staff)

1-5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

### MTL 395. Ad Hoc Graduate Seminar

Graduate students (three or more) who wish to study a subject or an area not covered by regular courses and seminars may plan an informal seminar and approach a member of the faculty to supervise it. May be repeated for

1-5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

### MTL 398. Research

Students pursue a special subject of investigation under supervision of a member of the committee or another faculty member. May be repeated for credit.

1-15 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

### MTL 399. Reading for Orals

Reading in preparation for the University Oral Examination. May be repeated for credit.

1-15 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

## MOLECULAR AND CELLULAR PHYSIOLOGY (MCP)

### UNDERGRADUATE COURSES IN MOLECULAR AND CELLULAR PHYSIOLOGY

#### MCP 100Q. The Hippocampus as a Window to the Mind

Preference to sophomores. Electrical physiology of the brain using the hippocampus as a model system. The seminar builds from basic anatomical and electrical principles of brain structure and function, through the electrical properties of individual neurons and simple neuronal circuits, to the nature of behaviors that emerge from these more basic properties. Also discusses other brain regions where the hippocampal model provides insight into specific neuronal functions. Culminates in a discussion of neuronal disorders such as epilepsy, drug addiction, and obsessive-compulsive disorder that can be better understood on a basis of knowledge of the hippocampal model.

3 units, not given this year

#### MCP 199. Undergraduate Research

Students undertake investigations sponsored by individual faculty members. Prerequisite: consent of instructor.

1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

## GRADUATE COURSES IN MOLECULAR AND CELLULAR PHYSIOLOGY

### MCP 200. Cardiovascular Physiology

Offered jointly with the Department of Medicine. Lectures, small group instruction, clinical presentations, and lab demonstrations of normal and disordered human cardiovascular physiology. Prerequisite: understanding of general biochemistry.

5 units, Spr (Kobilka, B)

### MCP 202. Advanced Immunology II

(Same as IMMUNOL 202) Immunological literature. Classic problems and emerging areas based on primary literature. Student and faculty presentations. Prerequisite: IMMUNOL 201/MI 211.

3 units, Spr (Garcia, K)

### MCP 216. Genetic Analysis of Behavior

(Same as NBIO 216) Advanced seminar. Findings and implications of behavioral genetics as applied to invertebrate and vertebrate model systems. Topics include biological clocks, and sensation and central pattern generators. Relevant genetic techniques and historical perspective. Student presentation.

4 units, alternate years, not given this year

### MCP 222. Imaging: Biological Light Microscopy

(Same as BIO 152) Survey of instruments which use light and other radiation for analysis of cells in biological and medical research. Topics: basic light microscopy through confocal fluorescence and video/digital image processing. Lectures on physical principles; involves partial assembly and extensive use of lab instruments. Lab. Prerequisites: some college physics, Biology core.

3 units, Spr (Smith, S), alternate years, not given next year

### MCP 232. Advanced Imaging Lab in Biophysics

(Same as APPPHYS 232, BIO 132, BIO 232, BIOPHYS 232) Laboratory and lectures. Advanced microscopy and imaging, emphasizing hands-on experience with state-of-the-art techniques. Students construct and operate working apparatus. Topics include microscope optics, Koehler illumination, contrast-generating mechanisms (bright/dark field, fluorescence, phase contrast, differential interference contrast), and resolution limits. Laboratory topics vary by year, but include single-molecule fluorescence, fluorescence resonance energy transfer, confocal microscopy, two-photon microscopy, and optical trapping. Limited enrollment. Recommended: basic physics, Biology core or equivalent, and consent of instructor.

4 units, Spr (Block, S; Schnitzer, M; Smith, S; Stearns, T)

### MCP 256. How Cells Work: Energetics, Compartments, and Coupling in Cell Biology

Open to graduate and medical students, and advanced undergraduates. Dynamic aspects of cell behavior and function, including cellular energetics, homeostasis, heterogeneity of membranes, structure and function of organelles, solute and water transport, signaling and motility. Emphasis is on the principles of how coupling of molecular processes gives rise to essential functions at the cellular level. Mathematical models of cell function. Student presentations.

4 units, Spr (Maduke, M; Lewis, R)

### MCP 258. Information and Signaling Mechanisms in Neurons and Circuits

(Same as NBIO 258) How synapses, cells, and neural circuits process information relevant to a behaving organism. How phenomena of information processing emerge at several levels of complexity in the nervous system, including sensory transduction in molecular cascades, information transmission through axons and synapses, plasticity and feedback in recurrent circuits, and encoding of sensory stimuli in neural circuits.

5 units, Aut (Baccus, S; Tsien, R)

### MCP 299. Directed Reading in Molecular and Cellular Physiology

Prerequisite: consent of instructor.

1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

### MCP 370. Medical Scholars Research

Provides an opportunity for student and faculty interaction, as well as academic credit and financial support, to medical students who undertake original research. Enrollment is limited to students with approved projects.

4-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

### MCP 399. Graduate Research

Students undertake investigations sponsored by individual faculty members. Research fields include endocrinology, neuroendocrinology, and topics in molecular and cellular physiology. Prerequisite: consent of instructor. (Staff)

1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

## MUSIC (MUSIC)

### UNDERGRADUATE COURSES IN MUSIC

#### MUSIC 1A. Music, Mind, and Human Behavior

An introductory exploration of the question of why music is a pervasive and fundamental aspect of human existence. The class will introduce aspects of music perception and cognition as well as anthropological and cultural considerations. GER:DB-Hum

3 units, Win (Berger, J)

#### MUSIC 5G. Introduction to Guzheng

Introduction to Chinese music through learning how to play guzheng, a 21-stringed traditional Chinese instrument. The cultural, social, and historical significance of guzheng. 15 guzheng techniques, how to read Chinese music and guzheng notation, and two simple classic guzheng pieces. May be repeated for credit a total of 14 times.

1 unit, Aut (You, H), Win (You, H), Spr (You, H)

#### MUSIC 6A. From Gamelan to Kabuki: Musical Traditions of Far East Asia

Introduction to the musical traditions of Far East Asia. Study of prominent examples from diverse regions with an emphasis on Indonesia, China and Japan. Exploration of ethnic, social, cultural, and global perspectives. Survey of instruments and ensembles in a wide range of performance contexts, from sacred rituals to secular dance and theater. Traditional genres and their impact on contemporary composers. No musical background required. Lectures, listening to live and recorded music, attendance of a concert, video screenings. GER:DB-Hum, EC-GlobalCom

3 units, Aut (Kapuscinski, J)

#### MUSIC 7A. World Music and Globalized Culture

The circulation of musicians, audiences, instruments and other musical technologies, songs, recordings, and musical genres. What happens when music moves from rural to urban contexts, across national boundaries, into new mediascapes and technological regimes? Emphasis is on recent developments. Topics include: Arabic, Chinese, and Hindustani classical music; hip hop's global reach; carnival in the Americas; Bollywood film; music, Islam, and the state; attempts at creating pan-Asian pop; the spread of the guitar and the brass band; ringtones and mobile music; YouTube. GER:DB-Hum, EC-GlobalCom

3 units, not given this year

#### MUSIC 8A. Rock, Sex, and Rebellion

Development of critical listening skills and musical parameters through genres in the history of rock music. Focus is on competing aesthetic tendencies and subcultural forces that shaped the music. Rock's significance in American culture, and the minority communities that have enriched rock's legacy as an expressively diverse form. Lectures, readings, listening, and video screenings. GER:DB-Hum, EC-AmerCul

3 units, alternate years, not given this year

#### MUSIC 10AX. The Sounds of Stanford

Computerized recording, editing, and presenting of sound and music. The potential of recording and transforming the sounds of the environment for the creation of new cultural and artistic expression. Technical aspects of sound processing and their practical use in cultural and artistic production using the social network platform web 2.0.

2 units, Aut (Kadis, J)

#### MUSIC 11N. A View from the Podium: The Art of Conducting

(F,Sem) Stanford Introductory Seminar. How a conductor interprets music, realizes a personal vision through the rehearsal process, and communicates with orchestra and audience. Conducting as based on human communication skills. How to apply these lessons to other fields of endeavor. GER:DB-Hum

3 units, Aut (Cai, J)

**MUSIC 12A. Introductory Piano Class**

(A=level 1; B=level 2; C=level 3)

*1 unit, Aut (Zerlang, T), Win (Zerlang, T), Spr (Zerlang, T), Sum (Zerlang, T)***MUSIC 12B. Introductory Piano Class**

(A=level 1; B=level 2; C=level 3)

*1 unit, Aut (Zerlang, T), Win (Zerlang, T), Spr (Zerlang, T), Sum (Zerlang, T)***MUSIC 12C. Introductory Piano Class**

(A=level 1; B=level 2; C=level 3.) May be repeated for credit a total of 14 times.

*1 unit, Aut (Zerlang, T), Win (Zerlang, T), Spr (Zerlang, T), Sum (Zerlang, T)***MUSIC 13Q. Classical Music and Politics: Western Music in Modern China**

(S,Sem) Stanford Introductory Seminar. Preference to sophomores. Social history, cultural studies, China studies, international relations, and music. From the Italian Jesuit, Matteo Ricci who presented a clavichord to the Chinese emperor to the emergence of a modern generation of Chinese musicians. GER:DB-Hum, EC-GlobalCom

*3 units, Spr (Cai, J)***MUSIC 16N. Music, Myth, and Modernity: Wagner's Ring Cycle and Tolkien's Lord of the Rings**

(F,Sem) (Same as GERLIT 16N) Stanford Introductory Seminar. Preference to freshmen. Roots of Wagner's operatic cycle and Tolkien's epic trilogy in a common core of Norse, Germanic, and Anglo-Saxon mythology. The role of musical motive and characterization in Wagner's music dramas and the film version of Tolkien's trilogy. Music as a key element in the psychological, political, and cultural revision of ancient myth in modern opera and film. GER:DB-Hum, EC-GlobalCom

*3 units, Spr (Grey, T)***MUSIC 17N. The Operas of Mozart**

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Four of Mozart's mature operas, the earliest works in the operatic repertoire never to go out of fashion. What accounts for this extraordinary staying power? Focus on the history of their composition, performance, and reception, and their changing significance from Mozart's time to the present. GER:DB-Hum

*3 units, Win (Berger, K)***MUSIC 17Q. Perspectives in North American Taiko**

(S,Sem) Stanford Introductory Seminar. Preference to sophomores. Taiko, or Japanese drum, is a newcomer to the American music scene. Emergence of the first N. American taiko groups coincided with increased Japanese American activism, and to some it is symbolic of Japanese American identity. N. American taiko is associated with Japanese American Buddhism. Musical, cultural, historical, and political perspectives of taiko. Hands-on drumming. Japanese music and Japanese American history, and relations among performance, cultural expression, community, and identity. GER:DB-Hum, EC-AmerCul

*4 units, Spr (Sano, S; Uyechi, L)***MUSIC 18A. Jazz History: Ragtime to Bebop, 1900-1940**

From the beginning of jazz to the war years. GER:DB-Hum, EC-AmerCul

*3 units, Win (Berry, F)***MUSIC 18B. Jazz History: Bebop to Present, 1940-Present**

Modern jazz styles from Bebop to the current scene. Emphasis is on the significant artists of each style. GER:DB-Hum, EC-AmerCul

*3 units, Spr (Berry, F)***MUSIC 19. Introduction to Music Theory**

For non-music majors and Music majors or minors unable to pass the proficiency test for entry to MUSIC 21. The fundamentals of music theory and notation, basic sight reading, sight singing, ear training, keyboard harmony; melodic, rhythmic, and harmonic dictation. Skill oriented, using piano and voice as basic tools to develop listening and reading skills. GER:DB-Hum

*3 units, Aut (Berger, T), Spr (Berger, T)***MUSIC 20A. Jazz Theory**

Introduces the language and sounds of jazz through listening, analysis, and compositional exercises. Students apply the fundamentals

of music theory to the study of jazz. Prerequisite: 19 or consent of instructor. GER:DB-Hum

*3 units, Aut (Nadel, J)***MUSIC 20B. Advanced Jazz Theory**

Approaches to improvisation through listening and transcribing, and developing familiarity with important contributors to this music. Topics: scale theory, altered dominants, and substitute harmony. Prerequisite: 20A or consent of instructor. GER:DB-Hum

*3 units, alternate years, not given this year***MUSIC 20C. Jazz Arranging and Composition**

Jazz arranging and composition for small ensembles. Foundation for writing for big band. Prerequisite: 20A or consent of instructor.

*3 units, Win (Nadel, J)***MUSIC 21. Elements of Music I**

Preference to majors. Introduction to tonal theory. Practice and analysis. Diatonic harmony focusing on melodic and harmonic organization, functional relationships, voice-leading, and tonal structures. Ear-training and keyboard-harmony skills; analytical methods and listening strategies. Enrollment limited to 40. Prerequisites: (1) Piano Proficiency Exam (must be passed within the first two weeks of the term) or MUSIC 12A (may be taken concurrently); (2) Passing grade on a basic musical skills proficiency examination on the first day of class or MUSIC 19. GER:DB-Hum

*4 units, Aut (Aquilanti, G), Win (Berger, T)***MUSIC 22. Elements of Music II**

Preference to majors. Introduction to chromatic harmony focusing on secondary functions, modulations, harmonic sequences, mode mixture, and the Neapolitan, and augmented sixth chords. Analysis of musical forms and harmonizations complemented by harmonic and melodic dictation, sight singing, and other practical skills. Prerequisites: (1) MUSIC 21; (2) Piano Proficiency Exam or MUSIC 12B (may be taken concurrently). GER:DB-Hum

*4 units, Win (Aquilanti, G), Spr (Berger, T)***MUSIC 23. Elements of Music III**

Preference to majors. Continuation of chromatic harmony, complex forms, and introduction to early 20th-century techniques. Satisfactory passage of ear-training proficiency exam, part of the course's final, is a requirement for course completion and for continuation in the major sequence. Prerequisites: (1) MUSIC 22; (2) Piano Proficiency Exam or MUSIC 12C (may be taken concurrently). GER:DB-Hum

*4 units, Aut (Berger, T), Spr (Ulman, E)***MUSIC 38N. Singing Early Music**

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. 15th- and 16th-century musical repertoires and their contexts; performance practice. GER:DB-Hum

*3 units, Aut (Rodin, J)***MUSIC 39N. The Beatles**

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. The music of the Beatles and their contributions as musical innovators and experimentalists. Their artistic antecedents, subsequent musical influence, and cultural impact; the emergence of the supergroup identity and development of new modes of musical production and collaborative songwriting; notions of commoditization, uniqueness and originality, and the perceived boundary of art and pop; speculations on the exportation and appropriation of an African American cultural legacy. GER:DB-Hum

*3 units, Win (Applebaum, M)***MUSIC 40. Music History to 1600**

Pre- or corequisite: 21. GER:DB-Hum

*4 units, Aut (Rodin, J)***MUSIC 41. Music History 1600-1830**

Pre- or corequisite: 22. GER:DB-Hum

*4 units, Win (Hadlock, H)***MUSIC 42. Music History Since 1830**

Pre- or corequisite: 23. GER:DB-Hum

*4 units, Spr (Kronengold, C)***MUSIC 65A. Voice Class I**

Group (7 students to a section) beginning voice for the non-major (A = level 1; B = level 2). May be repeated for credit.

*1 unit, Aut (Giovannetti, C), Win (Giovannetti, C), Spr (Giovannetti, C), Sum (Linduska, M)*

**MUSIC 65B. Voice Class II**

Group (7 students to a section) beginning voice for the non-major (A = level 1; B = level 2). May be repeated for credit.

*1 unit, Aut (Giovannetti, C), Win (Giovannetti, C), Spr (Giovannetti, C), Sum (Linduska, M)*

**MUSIC 72A. Intermediate Piano Class**

For intermediate students. May be repeated for credit a total of 14 times. Prerequisites: 12C or equivalent, audition.

*1 unit, Aut (Zerlang, T), Win (Zerlang, T), Spr (Zerlang, T), Sum (Zerlang, T)*

**MUSIC 72B. Organ Class**

For beginning organ students who have keyboard skills. May be repeated for credit a total of 14 times.

*1 unit, Aut (Morgan, R), Win (Morgan, R), Spr (Morgan, R)*

**MUSIC 72C. Harpsichord Class**

For beginning harpsichord students who have keyboard skills. May be repeated for credit a total of 14 times.

*1 unit, Aut (Thornburgh, E), Win (Thornburgh, E), Spr (Thornburgh, E)*

**MUSIC 72D. Jazz Piano Class**

By invitation only; priority to majors and jazz-ensemble participants. May be repeated for credit a total of 14 times.

*1 unit, Aut (Low, M), Win (Low, M), Spr (Low, M)*

**MUSIC 73. Intermediate Voice Class**

For intermediate students. Admission by audition. May be repeated for credit a total of 14 times.

*1 unit, Aut (Giovannetti, C), Win (Giovannetti, C), Spr (Giovannetti, C)*

**MUSIC 74C. Classical Guitar Class**

May be repeated for credit a total of 14 times.

*1 unit, Aut (Ferguson, C), Win (Ferguson, C), Spr (Ferguson, C)*

**MUSIC 74D. Harp Class**

May be repeated for credit a total of 14 times.

*1 unit, Aut (Chauvel, M), Win (Chauvel, M), Spr (Chauvel, M)*

**MUSIC 75B. Renaissance Wind Instruments Class**

May be repeated for credit.

*1 unit, Aut (Myers, H), Win (Myers, H), Spr (Myers, H)*

**MUSIC 76. Brass Instruments Class**

May be repeated for credit a total of 14 times.

*1 unit, Aut (Kenley, M), Win (Kenley, M), Spr (Kenley, M)*

**MUSIC 77. Percussion Class**

May be repeated for credit a total of 14 times.

*1 unit, Aut (Veregge, M), Win (Veregge, M), Spr (Veregge, M)*

**MUSIC 80. Music of Modern Israel**

The development of art and popular music in Israel, the complexity of national identity inherent in the study of immigrant and refugee societies, and the power struggle between the different forces involved in the process: the state and its institutions, the people, and the outside world. The course examines the musical history of Israel, from nationalism and "invented" folk music through the emergence of the Other ("Musiqat Mizrahit") and the arrival of rock and world music. GER:DB-Hum

*4 units, Spr (Staff)*

**MUSIC 80T. Jewish Music in the Lands of Islam**

The course examines the diverse and rich musical traditions of the Jews in North Africa and the Middle East. Based on the "Maqamat" system, the Arabic musical modes, Jewish music flourished under Islamic rule, encompassing the fields of sacred music, popular songs, and art music. Using musicological, historical, and anthropological tools, the course compares and contrasts these traditions from their original roots through their adaptation, appropriation, and re-synthesis in contemporary art music and popular songs. GER:DB-Hum

*4 units, Win (Staff)*

**MUSIC 121. Analysis of Tonal Music**

Complete movements, or entire shorter works of the 18th and 19th centuries, are analyzed in a variety of theoretical approaches. Prerequisites: 23 or consent of instructor; and pass the ear-training and piano-proficiency examinations. GER:DB-Hum

*4 units, Win (Barth, G)*

**MUSIC 122A. Renaissance and Baroque Counterpoint**

Analysis and composition of contrapuntal styles from the Renaissance and Baroque periods. Use of keyboard, ear training, and sight singing underlies all written work. Prerequisites: 23 and successful completion of the ear-training and piano-proficiency examinations. GER:DB-Hum

*4 units, Spr (Rodin, J)*

**MUSIC 122B. Harmonic Materials of 19th Century**

Analysis of 19th-century music, with compositional exercises based on 19th-century models. Prerequisites: 23 or consent of instructor; and pass the ear-training and piano-proficiency examinations. GER:DB-Hum

*4 units, Win (Ulman, E)*

**MUSIC 122C. Introduction to 20th-Century Composition**

Contemporary works, with emphasis on music since 1945. Projects in free composition based on 20th-century models. Prerequisites: 23 or consent of instructor; and pass the ear-training and piano-proficiency examinations. GER:DB-Hum

*4 units, Aut (Ferneyhough, B)*

**MUSIC 123. Undergraduate Seminar in Composition**

Current trends in composition. May be repeated for credit a total of 7 times. Prerequisites: Music major; 23 or consent of instructor. GER:DB-Hum

*3 units, Aut (Kapuscinski, J), Win (Ulman, E)*

**MUSIC 125. Individual Undergraduate Projects in Composition**

May be repeated for credit a total of 14 times. Prerequisites: music major, and one quarter of 123.

*1-3 units, Aut (Staff), Win (Staff), Spr (Staff)*

**MUSIC 126. Introduction to Thoroughbass**

The development of continuo techniques and skills for figured-bass realization. Performance and analysis of selected repertoire, using thoroughbass principles and exercises based on historical theoretical treatises. Prerequisite: 21.

*1-3 units, Win (Berger, T)*

**MUSIC 127. Instrumentation and Orchestration**

Individual instruments, instrumental groups within the orchestra, and combinations of groups. Arrangements from piano to orchestral music. Score analysis with respect to orchestration. Practical exercises using chamber ensembles and school orchestra. Prerequisite: 23. GER:DB-Hum

*3 units, Aut (Aquilanti, G)*

**MUSIC 128. Composition, Coding, and Performance with SLOrC**

(Same as CS 170) Classroom instantiation of the Stanford Laptop Orchestra (SLOrC) which includes public performances. An ensemble of more than 20 humans, laptops, controllers, and special speaker arrays designed to provide each computer-mediated instrument with its sonic identity and presence. Topics and activities include issues of composing for laptop orchestras, instrument design, sound synthesis, programming, and live performance. May be repeated four times for credit.

*1-5 units, Spr (Wang, G)*

**MUSIC 130A. Introduction to Conducting**

Baton techniques and rehearsal procedures. The development of coordination of the members of the body involved in conducting; fluency in beat patterns and meters; dynamics, tempi, cueing, and use of the left hand in conducting. Prerequisites: 121 and diagnostic musicianship exam given first day of class; preference to students who have completed 122B.

*3 units, alternate years, not given this year*

**MUSIC 130B. Elementary Orchestral Conducting**

Prerequisites: 127 or previous orchestral performance experience, 130A.

*3 units, alternate years, not given this year*

**MUSIC 130C. Elementary Choral Conducting**

Techniques specific to the conducting of choral ensembles: warm-ups, breathing, balance, blend, choral tone, isolation principles, recitative conducting, preparation, and conducting of choral/orchestral works. Prerequisite: 130A.

*3 units, alternate years, not given this year*

**MUSIC 140. Studies in Medieval Music**

(Same as MUSIC 240) Prerequisites: MUSIC 21, MUSIC 40.

(WIM at 4-unit level only.) GER:DB-Hum  
3-4 units, not given this year

**MUSIC 141. Studies in Renaissance Music**

(Same as MUSIC 241) Prerequisites: MUSIC 21, MUSIC 40.  
(WIM at 4-unit level only.) GER:DB-Hum  
3-4 units, not given this year

**MUSIC 142. Studies in Baroque Music**

(Same as MUSIC 242) Prerequisites: MUSIC 22, MUSIC 41.  
(WIM at 4-unit level only.) GER:DB-Hum  
3-4 units, not given this year

**MUSIC 143. Studies in Classic Music**

(Same as MUSIC 243) Prerequisites: MUSIC 22, MUSIC 41.  
(WIM at 4-unit level only.) GER:DB-Hum  
3-4 units, not given this year

**MUSIC 144. Studies in Romantic Music**

(Same as MUSIC 244) Prerequisites: MUSIC 23, MUSIC 42  
(WIM at 4-unit level only.) GER:DB-Hum  
3-4 units, Win (Berger, K)

**MUSIC 145. Studies in Modern Music**

(Same as MUSIC 245) Prerequisites: MUSIC 23, MUSIC 42.  
(WIM at 4-unit level only.) GER:DB-Hum  
3-4 units, Aut (Barth, G)

**MUSIC 146. Music and Urban Film**

(Same as MUSIC 246) How music and sound work in urban cinema. What happens when music's capacity to transform everyday reality combines with the realism of urban films? Provides an introduction to traditional theories of film music and film sound; considers how new technologies and practices have changed the roles of music in film. Readings discuss film music, realistic cinema, urban musical practices and urban culture. Viewing includes action/adventure, Hindi film, documentary, film noir, hip hop film, the musical, and borderline cases by Jean-Luc Godard, Spike Lee, Wong Kar-Wai and Tsai Ming-Liang. Pre- or corequisite (for music majors): MUSIC 22. (WIM at 4 unit level only.) GER:DB-Hum, EC-GlobalCom  
3-4 units, Spr (Kronengold, C)

**MUSIC 147. The Soul Tradition in African American Music**

(Same as MUSIC 247) The African American tradition of soul music from its origins in blues, gospel, and jazz to its influence on today's r&b, hip hop, and dance music. Style such as rhythm and blues, Motown, Southern soul, funk, Philadelphia soul, disco, Chicago house, Detroit techno, trip hop, and neo-soul. Soul's cultural influence and global reach; its interaction with politics, gender, place, technology, and the economy. Pre-/corequisite (for music majors): MUSIC 22. (WIM at 4 units only.) GER:DB-Hum, EC-AmerCul  
3-4 units, Aut (Kronengold, C)

**MUSIC 148. Musical Shakespeare: Theater, Song, Opera, and Film**

(Same as HUMNTIES 192G, MUSIC 248) The role of music in productions, adaptations, and interpretations of Shakespeare's plays as theater, opera, and film from the Elizabethan era through the present. Emphasis is on the role of songs, stage music, and music in operatic and film adaptations. Incidental music, orchestral tone poems, and art-song settings of lyrics from the plays. Plays include Romeo and Juliet, Othello, Macbeth, Hamlet, The Tempest, Midsummer Night's Dream, and Twelfth Night. Pre-/corequisite (for music majors): MUSIC 22. (WIM at 4- or 5-unit level only.) GER:DB-Hum  
3-5 units, not given this year

**MUSIC 149. Reactions to the Record: Early Recordings, Lost Styles, and Music's Future**

(Same as MUSIC 249) Seminar. The transformation of musical style, audience expectations, the composer-performer relationship, and the musical score from the late 1800s to the present. Sources include: recordings from Stanford's Archive of Recorded Sound; recordings of (Brahms, Debussy, Rachmaninoff, Saint-Saëns, Prokofiev, Bartók; concert programs; interviews; and reviews. Readings include Hamilton's After the Golden Age and Philip's Performing Music in the Age of Recording. Emphasis is on voice, strings, piano, chamber music, and orchestra. Guest residencies in conjunction with January 2009 symposium; see <http://music.stanford.edu/Events/StanfordMusicSymposium/>. May

be repeated for credit. Pre-/corequisite (for music majors): MUSIC 22. (WIM at 4-unit level only.) GER:DB-Hum  
3-4 units, not given this year

**MUSIC 150. Musical Acoustics**

The physics of vibrating systems, waves, and wave motion. Time- and frequency-domain analysis of sound. Room acoustics, reverberation, and spatialization. The acoustics of musical instruments: voice, strings, and winds. Emphasis is on the practical aspects of acoustics in making music. Hands-on and computer-based lab. See <http://ccrma.stanford.edu/courses/150/>. Prerequisites: music performance/composition experience, basic algebra, calculus, and physics. GER:DB-EngrAppSci  
3 units, Win (Rossing, T)

**MUSIC 150G. Wagnerian Echos: A Cultural History from Modernism to Popular Culture**

(Same as GERGEN 161, HUMNTIES 192T) The afterlives of mythological themes from the operas and music dramas of Richard Wagner (The Flying Dutchman, Tannhäuser, Lohengrin, Ring Cycle, Parsifal) in literature, modernist aesthetics, fascist politics, film, philosophy, and contemporary media. GER:DB-Hum  
3-5 units, Spr (Daub, A; Grey, T)

**MUSIC 154. Composition and Performance of Instrumental Music with Electronics**

Aesthetic and analytical issues of mixed instrumental and electronic works. Focus is on one or a few works leading to a public performance at the end of the quarter. Prerequisite: experience in analysis of contemporary music and in electronic music. May be repeated for credit once.  
1-5 units, Spr (Staff)

**MUSIC 155. INTERMEDIA WORKSHOP**

(Same as ARTSTUDI 139) Composers and visual artists collaborate to develop and produce intermedia works. Musical and visual approaches to the conceptualization and shaping of time-based art. Exploration of sound and image relationships. Study of a wide spectrum of audiovisual practices including experimental animation, video art, dance, performance, non-narrative forms, interactive art and installation art. Focus on works that use music/sound and image as equal partners. Limited enrollment. Prerequisites: consent of instructors, and one of FILMPROD 114, ARTSTUDI 131, 138, 167, 177, 179, or MUSIC 123, or equivalent.  
3-4 units, Win (Kapuscinski, J; Buckholtz, E)

**MUSIC 156. "sic": Improvisation Collective**

Small ensemble devoted to learning trans-idiomatic improvisation techniques and composing indeterminate pieces in a workshop setting. One major concert. Prerequisite: access to an instrument. Improvisational experience and conventional instrumental virtuosity not required. May be repeated for credit for a total of 3 times.  
1 unit, Win (Applebaum, M)

**MUSIC 157. Introduction to Mariachi Ensemble**

Introduction to the practice of mariachi music, tradition, and history. Focus is on learning traditional sones, rancheras, huapangos, and boleros. Requirements: ability to play and access to instruments (violin, trumpet, guitar, vihuela, and guitarron). May be repeated for credit.  
1 unit, Aut (Sano, S), Win (Staff), Spr (Staff)

**MUSIC 158. Soundwire Ensemble**

Stanford's Internet2-based Soundwire Ensemble rehearses with the East Coast Tintinnabulate Ensemble directed by Pauline Oliveros, Rensselaer Polytechnic Institute. Concerts, composition, and improvisation projects using resources available when connecting with remote musicians. State-of-the-art audio and video technology developed by ensemble participants. May be repeated for credit.  
2-3 units, not given this year

**MUSIC 159. Early Music Singers**

Small choir specializing in Medieval, Renaissance, and early Baroque vocal music. One major concert per quarter. May be repeated for credit for a total of 14 times.  
1 unit, Aut (Mahrt, W), Win (Mahrt, W), Spr (Mahrt, W)

**MUSIC 160. Stanford Symphony Orchestra**

70- to 100-member ensemble performing major orchestral works; minimum one concert per quarter. May be repeated for credit a total of 14 times.  
1 unit, Aut (Cai, J), Win (Cai, J), Spr (Cai, J)

**MUSIC 160A. Stanford Philharmonia Orchestra**

Prerequisite: audition, one year of 160, or consent of instructor. May be repeated for credit.

*1 unit, Aut (Cai, J), Win (Cai, J), Spr (Cai, J)*

**MUSIC 160B. Stanford New Ensemble**

Performing compositions of the 20th century, 21st century, and new works by Stanford faculty and student composers. Musicians collaborate with composers and artists visiting and performing at Stanford. One concert per quarter. May be repeated for credit.

*1 unit, Aut (Cai, J), Win (Cai, J), Spr (Cai, J)*

**MUSIC 161A. Stanford Wind Ensemble**

40- to 50-member ensemble performing transcriptions of symphonic music, brass band music, and repertoire composed specifically for symphonic band. One concert per quarter. May be repeated for credit a total of 14 times.

*1 unit, Aut (Aquilanti, G), Win (Aquilanti, G), Spr (Aquilanti, G)*

**MUSIC 161B. Jazz Orchestra**

Big band format. Repertoire drawn primarily from the contemporary jazz-ensemble literature. One formal concert per quarter. May be repeated for credit a total of 14 times.

*1 unit, Aut (Berry, F), Win (Berry, F), Spr (Berry, F)*

**MUSIC 161C. Red Vest Band**

A small ensemble of the Leland Stanford Junior University Marching Band open to members of the LSJUMB by audition and consent of instructor. Members perform at all men's and women's home basketball games and travel to some away and post-season games. Twice-weekly rehearsals focus on introduction of new student arrangements and the LSJUMB's repertoire of rock, funk, and traditional styles. May be repeated for credit a total of 7 times.

*1 unit, Win (Aquilanti, G)*

**MUSIC 161D. Stanford Brass Ensemble**

Performance of works for full brass choir and for smaller ensembles of brass instruments. Once weekly rehearsals. May be repeated for credit. Prerequisite: audition and consent of instructor.

*1 unit, Aut (Kenley, M), Win (Kenley, M), Spr (Kenley, M)*

**MUSIC 162. Symphonic Chorus**

100- to 150-voice ensemble, performing major choral masterworks with orchestra. One concert per quarter. May be repeated for credit a total of 14 times.

*1 unit, Aut (Sano, S), Win (Sano, S), Spr (Sano, S)*

**MUSIC 163. Memorial Church Choir**

Official choir of Memorial Church, furnishing music for Sunday services and special occasions in the church calendar. May be repeated for credit a total of 14 times.

*1 unit, Aut (Morgan, R), Win (Morgan, R), Spr (Morgan, R)*

**MUSIC 165. Chamber Chorale**

Select 24-voice chamber ensemble, specializing in virtuoso choral repertoire from all periods of Western art music. May be repeated for credit a total of 14 times.

*1 unit, Aut (Sano, S), Win (Sano, S), Spr (Sano, S)*

**MUSIC 167. University Singers**

Mixed-repertoire chorus, performing choral repertoire from all periods of Western art music and other world cultures. May be repeated for credit a total of 14 times.

*1 unit, Aut (Morgan, R), Win (Morgan, R), Spr (Morgan, R)*

**MUSIC 167S. Summer Chorus**

80-100 voice ensemble, performing major choral masterworks.

*1 unit, Sum (Hunn, A)*

**MUSIC 169. Stanford Taiko**

Select North American taiko ensemble, performing traditional and contemporary repertoire for Japanese drums. Multiple performances in Winter and Spring quarters, also touring; instrument construction and maintenance. Admission by audition in Autumn Quarter only. May be repeated for credit a total of 14 times.

*1 unit, Aut (Sano, S; Uyechi, L), Win (Sano, S; Uyechi, L), Spr (Sano, S; Uyechi, L)*

**MUSIC 170. Collaborative Piano**

Performance class in a workshop setting. Techniques of collaboration with vocalists and instrumentalists in repertoire ranging from songs and arias to sonatas and concertos. Prerequisite: private-lesson proficiency level in piano, or consent of instructor.

*1 unit, Aut (Dahl, L)*

**MUSIC 171. Chamber Music**

Audition required. Weekly one-hour coachings from Music department faculty. Classical string quartets and piano/string groups are supervised by the St. Lawrence String Quartet and require attendance at a weekly Wednesday 4:15 p.m. master class. May be repeated for credit.

*1 unit, Aut (Staff), Win (Staff), Spr (Staff)*

**MUSIC 172A. Piano**

Private lessons and group master class weekly. May be repeated for credit a total of 14 times.

*1-3 units, Aut (Barth, G), Win (Barth, G), Spr (Barth, G)*

**MUSIC 172B. Organ**

May be repeated for credit a total of 14 times.

*1-3 units, Aut (Morgan, R), Win (Morgan, R), Spr (Morgan, R)*

**MUSIC 172C. Harpsichord**

May be repeated for credit a total of 14 times.

*1-3 units, Aut (Thornburgh, E), Win (Thornburgh, E), Spr (Thornburgh, E)*

**MUSIC 172D. Jazz Piano**

By invitation only; priority to majors and jazz-ensemble participants. May be repeated for credit a total of 14 times.

*1-3 units, Aut (Low, M), Win (Low, M), Spr (Low, M)*

**MUSIC 172E. Fortepiano**

May be repeated for credit a total of 14 times.

*1-3 units, Aut (Barth, G), Win (Barth, G), Spr (Barth, G)*

**MUSIC 172F. Carillon**

May be repeated for credit a total of 14 times.

*1-3 units, Aut (Zerlang, T), Win (Zerlang, T), Spr (Zerlang, T)*

**MUSIC 173. Voice**

May be repeated for credit a total of 14 times.

*1-3 units, Aut (Giovannetti, C), Win (Giovannetti, C), Spr (Giovannetti, C)*

**MUSIC 174A. Violin**

May be repeated for credit a total of 14 times.

*1-3 units, Aut (Harms, D), Win (Harms, D), Spr (Harms, D)*

**MUSIC 174B. Viola**

May be repeated for credit a total of 14 times.

*1-3 units, Aut (Robertson, L), Win (Robertson, L), Spr (Robertson, L)*

**MUSIC 174C. Violoncello**

May be repeated for credit a total of 14 times.

*1-3 units, Aut (Harrison, S), Win (Harrison, S), Spr (Harrison, S)*

**MUSIC 174D. Contrabass**

May be repeated for credit a total of 14 times.

*1-3 units, Aut (Moyer, B), Win (Moyer, B), Spr (Moyer, B)*

**MUSIC 174E. Viola Da Gamba**

May be repeated for credit a total of 14 times.

*1-3 units, Aut (Dornenburg, J), Win (Dornenburg, J), Spr (Dornenburg, J)*

**MUSIC 174F. Classical Guitar**

May be repeated for credit a total of 14 times.

*1-3 units, Aut (Ferguson, C), Win (Ferguson, C), Spr (Ferguson, C)*

**MUSIC 174G. Harp**

May be repeated for credit a total of 14 times.

*1-3 units, Aut (Chauvel, M), Win (Chauvel, M), Spr (Chauvel, M)*

**MUSIC 174H. Baroque Violin**

May be repeated for credit a total of 14 times.

*1-3 units, Aut (Martin, A), Win (Martin, A), Spr (Martin, A)*

**MUSIC 174I. Early Plucked Strings**

(Staff)

*1-3 units, Aut (Staff), Win (Staff), Spr (Staff)*

**MUSIC 175A. Flute**

May be repeated for credit a total of 14 times.

*1-3 units, Aut (Hawley, A), Win (Hawley, A), Spr (Hawley, A)*

**MUSIC 175B. Oboe**

May be repeated for credit a total of 14 times.

*1-3 units, Aut (Hubbard, R), Win (Matheson, J), Spr (Matheson)*

**MUSIC 175C. Clarinet**

May be repeated for credit a total of 14 times.

1-3 units, Aut (Brandenburg, M), Win (Brandenburg, M), Spr (Brandenburg, M)

**MUSIC 175D. Bassoon**

May be repeated for credit a total of 14 times.

1-3 units, Aut (Olivier, R), Win (Olivier, R), Spr (Olivier, R)

**MUSIC 175E. Recorder/Renaissance Wind Instruments**

May be repeated for credit a total of 14 times.

1-3 units, Aut (Myers, H), Win (Myers, H), Spr (Myers, H)

**MUSIC 175F. Saxophone**

May be repeated for credit a total of 14 times.

1-3 units, Aut (McCarthy, C), Win (McCarthy, C), Spr (McCarthy, C)

**MUSIC 175G. Baroque Flute**

May be repeated for credit a total of 14 times.

1-3 units, Aut (Staff), Win (Staff), Spr (Staff)

**MUSIC 176A. French Horn**

May be repeated for credit a total of 14 times.

1-3 units, Aut (Ragent, L), Win (Ragent, L), Spr (Ragent, L)

**MUSIC 176B. Trumpet**

May be repeated for credit a total of 14 times.

1-3 units, Aut (Johnson-Hamilton, J), Win (Johnson-Hamilton, J), Spr (Johnson-Hamilton, J)

**MUSIC 176C. Trombone**

May be repeated for credit a total of 14 times.

1-3 units, Aut (Kenley, M), Win (Kenley, M), Spr (Kenley, M)

**MUSIC 176D. Tuba**

May be repeated for credit a total of 14 times.

1-3 units, Aut (Clements, A), Win (Clements, A), Spr (Clements, A)

**MUSIC 177. Percussion**

May be repeated for credit a total of 14 times.

1-3 units, Aut (Veregge, M), Win (Veregge, M), Spr (Veregge, M)

**MUSIC 182. Diction for Singers**

The international phonetic alphabet and its application to German, French, and Italian vocal literature. Open also to pianists interested in vocal coaching and choral conducting.

1 unit, Win (Dahl, L)

**MUSIC 183A. German Art Song Interpretation**

Including composers from Beethoven and Schubert to Wolf and Strauss. For advanced singers and pianists as partners. Performance class in a workshop setting. Prerequisite: consent of instructor. Recommended: 170 for pianists or 182 for singers. May be repeated for credit a total of 2 times.

1 unit, Spr (Dahl, L)

**MUSIC 183B. French Art Song Interpretation**

Composers include Fauré, Debussy, Ravel, and Poulenc. For advanced singers and pianists as partners. Performance class in a workshop setting. May be repeated for credit a total of 2 times. Prerequisite: consent of instructor. Recommended: 170 for pianists or 182 for singers.

1 unit, alternate years, not given this year

**MUSIC 190H. Sex, Sacrifice, and Civilization: Baroque Opera and Tragedy**

(Same as ENGLISH 185, HUMNTIES 185) The revival of ancient tragedy in the Baroque opera house. The central mysteries of tragedy: knowledge of suffering, necessity of sacrifice, pleasure of pathos. How tragic drama and opera used poetry, dance, and music to sway the passions and prompt reflection. Greek myths of Medea, Iphigenia, Alceste, Idomeneo. Plays by Euripides and Racine; operas by Mozart, Gluck, and Charpentier. GER:DB-Hum

4-5 units, Aut (Hoxby, B; Hadlock, H)

**MUSIC 192A. Foundations of Sound-Recording Technology**

For upper division undergraduates and graduate students; preference given to Music majors with MST specialization. Topics: elementary electronics; the physics of sound transduction and microphone operation, selection, and placement; mixing consoles; connectors and device interconnection; grounding and shielding; principles of analog magnetic recording; operation maintenance of

recording equipment; and principles of recording engineering. Enrollment limited. Prerequisites: 151; algebra, physics basics, and consent of instructor. GER:DB-EngrAppSci

3 units, Aut (Kadis, J)

**MUSIC 192B. Advanced Sound Recording Technology**

Topics: noise reduction techniques; dynamics and time-delay audio effects; the principles of digital audio; disk- and tape-based digital recorders; digital audio workstations and editing; advanced multi-track techniques; SMPTE and MIDI time code and device synchronization; MIDI sequencing and synchronization. See <http://ccrma.stanford.edu/courses/>. Prerequisite: 192A. GER:DB-EngrAppSci, DB-Hum

3 units, Win (Kadis, J)

**MUSIC 192C. Session Recording**

Independent engineering of recording sessions. May be repeated for credit a total of 14 times. Prerequisites: 192A,B.

1-2 units, Aut (Kadis, J), Win (Kadis, J), Spr (Kadis, J)

**MUSIC 197. Undergraduate Teaching Apprenticeship**

Work in an apprentice-like relationship with faculty teaching a student-initiated course. Prerequisite: consent of instructor. (Staff)

1-2 units, Aut (Staff), Win (Sano, S), Spr (Sano, S)

**MUSIC 198. Concentrations Project**

For concentration program participants only. Must be taken in senior year.

4 units, Aut (Staff), Win (Staff), Spr (Staff)

**MUSIC 199. Independent Study**

For advanced undergraduates and graduate students who wish to do work outside the regular curriculum. Before registering, student must present specific project and enlist a faculty sponsor. May be repeated for credit a total of 14 times.

1-5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**MUSIC 251. Psychophysics and Music Cognition**

Lecture, lab and experiment-based course in perception, psychoacoustics, cognition, and neuroscience of music. (WIM at 4 or 5 units only.) GER:DB-Hum, WIM

1-5 units, Win (Berger, J)

**GRADUATE COURSES IN MUSIC****MUSIC 200. Graduate Proseminar**

Required of first-year graduate students in music. Introduction to research in music, bibliographical materials, major issues in the field, philosophy, and methods in music history. Guest lecturers and individual research topics.

3-4 units, Aut (Berger, K; McBride, J)

**MUSIC 220A. Fundamentals of Computer-Generated Sound**

Techniques for digital sound synthesis, effects, and reverberation. Topics: summary of digital synthesis techniques (additive, subtractive, nonlinear, wavetable, spectral-modeling, and physical-modeling); digital effects algorithms (phasing, flanging, chorus, pitch-shifting, and vocoding); and techniques for digital reverberation. Majors (undergraduate or graduate) must take for 4 units. See <http://ccrma.stanford.edu/>.

2-4 units, Aut (Chafe, C)

**MUSIC 220B. Compositional Algorithms, Psychoacoustics, and Spatial Processing**

The use of high-level programming language as a compositional aid in creating musical structures. Advanced study of sound synthesis techniques. Simulation of a reverberant space and control of the position of sound within the space. See <http://ccrma.stanford.edu/>. Prerequisite: 220A.

2-4 units, Win (Wang, G)

**MUSIC 220C. Research Seminar in Computer-Generated Music**

Individual projects in composition, psychoacoustics, or signal processing. See <http://ccrma.stanford.edu/>. May be repeated for credit. Prerequisite: 220B.

2-4 units, Spr (Chafe, C)

**MUSIC 220D. Research in Computer-Generated Music**

Independent research projects in composition, psychoacoustics, or signal processing. See <http://ccrma.stanford.edu/>. May be repeated for credit. Prerequisite: 220C.

1-10 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**MUSIC 221. Topics in the History of Theory**

The intersection of music theory and compositional practice in different eras of Western music history. Primary sources in music theory and issues such as notation, rhythm, mode, dissonance treatment, counterpoint, tonality, form, rhetoric, affect and imitation, expression, linear analysis, 12-tone and set theory, in light of relevant repertoire and modern scholarship. May be repeated for credit a total of 5 times.

3-5 units, *Win* (Kronengold, C), *alternate years, not given next year*

**MUSIC 223. Composition for Electronic Musicians**

Composition for any combination of acoustic and electroacoustic instrumentation, computer-generated sound, invented instruments, sound-sculptures, and multi-disciplinary elements including theater and visual media. Project-based laboratory to advance original student works, supported by lectures on the fundamentals of composition. Concert performance of final works. Taught at CCRMA with a focus on engendering deliberate conversation on the enrichment of a cultural context for new media. Open to undergraduates and graduates.

1-4 units, *Spr* (Applebaum, M)

**MUSIC 230. Advanced Orchestral Conducting**

May be repeated for credit a total of 8 times. Prerequisite: 130B.

2-4 units, *Aut* (Cai, J), *Win* (Cai, J), *Spr* (Cai, J)

**MUSIC 231. Advanced Choral Conducting**

May be repeated for credit a total of 8 times. Prerequisite: 130C.

2-4 units, *Aut* (Sano, S), *Win* (Sano, S), *Spr* (Sano, S)

**MUSIC 240. Studies in Medieval Music**

(Same as MUSIC 140) Prerequisites: MUSIC 21, MUSIC 40. (WIM at 4-unit level only.)

3-4 units, *not given this year*

**MUSIC 241. Studies in Renaissance Music**

(Same as MUSIC 141) Prerequisites: MUSIC 21, MUSIC 40. (WIM at 4-unit level only.)

3-4 units, *not given this year*

**MUSIC 242. Studies in Baroque Music**

(Same as MUSIC 142) Prerequisites: MUSIC 22, MUSIC 41. (WIM at 4-unit level only.)

3-4 units, *not given this year*

**MUSIC 243. Studies in Classic Music**

(Same as MUSIC 143) Prerequisites: MUSIC 22, MUSIC 41. (WIM at 4-unit level only.)

3-4 units, *not given this year*

**MUSIC 244. Studies in Romantic Music**

(Same as MUSIC 144) Prerequisites: MUSIC 23, MUSIC 42 (WIM at 4-unit level only.)

3-4 units, *Win* (Berger, K)

**MUSIC 245. Studies in Modern Music**

(Same as MUSIC 145) Prerequisites: MUSIC 23, MUSIC 42. (WIM at 4-unit level only.)

3-4 units, *Aut* (Barth, G)

**MUSIC 246. Music and Urban Film**

(Same as MUSIC 146) How music and sound work in urban cinema. What happens when music's capacity to transform everyday reality combines with the realism of urban films? Provides an introduction to traditional theories of film music and film sound; considers how new technologies and practices have changed the roles of music in film. Readings discuss film music, realistic cinema, urban musical practices and urban culture. Viewing includes action/adventure, Hindi film, documentary, film noir, hip hop film, the musical, and borderline cases by Jean-Luc Godard, Spike Lee, Wong Kar-Wai and Tsai Ming-Liang. Pre- or corequisite (for music majors): MUSIC 22. (WIM at 4 unit level only.)

3-4 units, *Spr* (Kronengold, C)

**MUSIC 247. The Soul Tradition in African American Music**

(Same as MUSIC 147) The African American tradition of soul music from its origins in blues, gospel, and jazz to its influence on today's r&b, hip hop, and dance music. Style such as rhythm and blues, Motown, Southern soul, funk, Philadelphia soul, disco, Chicago house, Detroit techno, trip hop, and neo-soul. Soul's cultural influence and global reach; its interaction with politics, gender, place, technology, and the economy. Pre-/corequisite (for music majors): MUSIC 22. (WIM at 4 units only.)

3-4 units, *Aut* (Kronengold, C)

**MUSIC 248. Musical Shakespeare: Theater, Song, Opera, and Film**

(Same as HUMNTIES 192G, MUSIC 148) The role of music in productions, adaptations, and interpretations of Shakespeare's plays as theater, opera, and film from the Elizabethan era through the present. Emphasis is on the role of songs, stage music, and music in operatic and film adaptations. Incidental music, orchestral tone poems, and art-song settings of lyrics from the plays. Plays include *Romeo and Juliet*, *Othello*, *Macbeth*, *Hamlet*, *The Tempest*, *Midsummer Night's Dream*, and *Twelfth Night*. Pre-/corequisite (for music majors): MUSIC 22. (WIM at 4- or 5-unit level only.)

3-5 units, *not given this year*

**MUSIC 249. Reactions to the Record: Early Recordings, Lost Styles, and Music's Future**

(Same as MUSIC 149) Seminar. The transformation of musical style, audience expectations, the composer-performer relationship, and the musical score from the late 1800s to the present. Sources include: recordings from Stanford's Archive of Recorded Sound; recordings of (Brahms, Debussy, Rachmaninoff, Saint-Saëns, Prokofiev, Bartók; concert programs; interviews; and reviews. Readings include Hamilton's *After the Golden Age* and Philip's *Performing Music in the Age of Recording*. Emphasis is on voice, strings, piano, chamber music, and orchestra. Guest residencies in conjunction with January 2009 symposium; see <http://music.stanford.edu/Events/StanfordMusicSymposium/>. May be repeated for credit. Pre-/corequisite (for music majors): MUSIC 22. (WIM at 4-unit level only.)

3-4 units, *not given this year*

**MUSIC 250A. HCI Theory and Practice**

HCI issues as they relate to music applications in composition and performance. Project-oriented, examining issues from the technical and theoretical perspectives of computer science, haptics, and music theory. See <http://ccrma.stanford.edu/>.

3-4 units, *Aut* (Ju, W), *Win* (Staff)

**MUSIC 250B. HCI Performance Systems**

Continuation of 250A, concentrating on interactive computer-music performance systems. See <http://ccrma.stanford.edu/courses/250b/>. Prerequisite: 250A.

1-4 units, *Win* (Staff)

**MUSIC 253. Musical Information: An Introduction**

The kinds of musical information used in sound, graphical, and analytical applications. Emphasis is on independent concepts and principles in music representation and research objectives (repertory analysis, performance analysis, theoretical models, similarity, and stylistic simulation). Examples from Western art music. Prerequisites: one year of music theory or equivalent; methods courses in fields such as musical analysis, symbolic systems, information processing, sound engineering, or intellectual property issues.

1-4 units, *Win* (Selfridge-Field, E)

**MUSIC 254. Applications of Musical Information: Query, Analysis, and Style Simulation**

Participants explore the issues introduced in 253 in greater depth and take initiative for research projects related to a theoretical or methodological issue, a software project, or a significant analytical result. Prerequisite: 253 or consent of instructor.

1-4 units, *Spr* (Selfridge-Field, E)

**MUSIC 256A. Music, Computing, and Design I: Software Paradigms for Computer Music**

Software design and implementation for computer audio. Strategies, best practices, and tradeoffs in building audio software systems of various sizes (S, M, L, XL), with a focus on interactive (real-time) systems. Lectures examine high-level designs as well as dissect code in a hands-on manner. Course work includes small programming assignments and a final software project. This course is the prerequisite for MUSIC 256B. Prerequisite: experience in C/C++ and/or Java.

1-4 units, *Aut* (Wang, G)

**MUSIC 256B. Music, Computing, Design II: Mobile Music**

Aesthetic, design, and implementation of mobile music, centered around the modern super smartphones such as the iPhone). Similarities and intrinsic differences between mobile and traditional computing and design for music. Topics include mobile software design, social and cloud computing, mobile interface design, and

programming phones, in the service of music. Prerequisite: MUSIC 256A.

*1-4 units, Win (Wang, G)*

**MUSIC 269. Research in Performance Practices**

Directed reading and research. May be repeated for credit a total of 5 times.

*1-5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

**MUSIC 272A. Advanced Piano**

Private lessons and group masterclass weekly. May be repeated for credit a total of 14 times.

*1-3 units, Aut (Barth, G), Win (Barth, G), Spr (Barth, G)*

**MUSIC 272B. Advanced Organ**

May be repeated for credit a total of 14 times.

*1-3 units, Aut (Morgan, R), Win (Morgan, R), Spr (Morgan, R)*

**MUSIC 272C. Advanced Harpsichord**

May be repeated for credit a total of 14 times.

*1-3 units, Aut (Thornburgh, E), Win (Thornburgh, E), Spr (Thornburgh, E)*

**MUSIC 272D. Advanced Jazz Piano**

By invitation only; priority to majors and jazz-ensemble participants. May be repeated for credit a total of 14 times.

*1-3 units, Aut (Low, M), Win (Low, M), Spr (Low, M)*

**MUSIC 272E. Advanced Fortepiano**

May be repeated for credit a total of 14 times.

*1-3 units, Aut (Barth, G), Win (Barth, G), Spr (Barth, G)*

**MUSIC 272F. Advanced Carillon**

May be repeated for credit a total of 14 times.

*1-3 units, Aut (Zerlang, T), Win (Zerlang, T), Spr (Zerlang, T)*

**MUSIC 273. Advanced Voice**

May be repeated for credit.

*1-3 units, Aut (Giovannetti, C), Win (Giovannetti, C), Spr (Giovannetti, C)*

**MUSIC 274A. Advanced Violin**

May be repeated for credit a total of 14 times.

*1-3 units, Aut (Harms, D), Win (Harms, D), Spr (Harms, D)*

**MUSIC 274B. Advanced Viola**

May be repeated for credit a total of 14 times.

*1-3 units, Aut (Robertson, L), Win (Robertson, L), Spr (Robertson, L)*

**MUSIC 274C. Advanced Violoncello**

May be repeated for credit a total of 14 times.

*1-3 units, Aut (Harrison, S), Win (Harrison, S), Spr (Harrison, S)*

**MUSIC 274D. Advanced Contrabass**

May be repeated for credit a total of 14 times.

*1-3 units, Aut (Moyer, B), Win (Moyer, B), Spr (Moyer, B)*

**MUSIC 274E. Advanced Viola da Gamba**

May be repeated for credit a total of 14 times.

*1-3 units, Aut (Dornenburg, J), Win (Dornenburg, J), Spr (Dornenburg, J)*

**MUSIC 274F. Advanced Classical Guitar**

May be repeated for credit a total of 14 times.

*1-3 units, Aut (Ferguson, C), Win (Ferguson, C), Spr (Ferguson, C)*

**MUSIC 274G. Advanced Harp**

May be repeated for credit a total of 14 times.

*1-3 units, Aut (Chauvel, M), Win (Chauvel, M), Spr (Chauvel, M)*

**MUSIC 274H. Advanced Baroque Violin**

May be repeated for credit a total of 14 times.

*1-3 units, Aut (Martin, A), Win (Martin, A), Spr (Martin, A)*

**MUSIC 274I. Advanced Early Plucked Strings**

*3 units, Aut (Staff), Win (Staff), Spr (Staff)*

**MUSIC 275A. Advanced Flute**

May be repeated for credit a total of 14 times.

*1-3 units, Aut (Hawley, A), Win (Hawley, A), Spr (Hawley, A)*

**MUSIC 275B. Advanced Oboe**

May be repeated for credit a total of 14 times.

*1-3 units, Aut (Hubbard, R), Win (Matheson, J), Spr (Matheson, J)*

**MUSIC 275C. Advanced Clarinet**

May be repeated for credit a total of 14 times.

*1-3 units, Aut (Brandenburg, M), Win (Brandenburg, M), Spr (Brandenburg, M)*

**MUSIC 275D. Advanced Bassoon**

May be repeated for credit a total of 14 times.

*1-3 units, Aut (Olivier, R), Win (Olivier, R), Spr (Olivier, R)*

**MUSIC 275E. Advanced Recorder/Renaissance Wind Instruments**

May be repeated for credit a total of 14 times.

*1-3 units, Aut (Myers, H), Win (Myers, H), Spr (Myers, H)*

**MUSIC 275F. Advanced Saxophone**

May be repeated for credit a total of 14 times.

*1-3 units, Aut (McCarthy, C), Win (McCarthy, C), Spr (McCarthy, C)*

**MUSIC 275G. Advanced Baroque Flute**

May be repeated for credit a total of 14 times.

*1-3 units, Aut (Staff), Win (Staff), Spr (Staff)*

**MUSIC 276A. Advanced French Horn**

May be repeated for credit a total of 14 times.

*1-3 units, Aut (Ragent, L), Win (Ragent, L), Spr (Ragent, L)*

**MUSIC 276B. Advanced Trumpet**

May be repeated for credit a total of 14 times.

*1-3 units, Aut (Johnson-Hamilton, J), Win (Johnson-Hamilton, J), Spr (Johnson-Hamilton, J)*

**MUSIC 276C. Advanced Trombone**

May be repeated for credit a total of 14 times.

*1-3 units, Aut (Kenley, M), Win (Kenley, M), Spr (Kenley, M)*

**MUSIC 276D. Advanced Tuba**

May be repeated for credit a total of 14 times.

*1-3 units, Aut, Win, Spr (Clements, A)*

**MUSIC 277. Advanced Percussion**

May be repeated for credit a total of 14 times.

*1-3 units, Aut (Veregge, M), Win (Veregge, M), Spr (Veregge, M)*

**MUSIC 280. TA Training Course**

Required for doctoral students serving as teaching assistants. Orientation to resources at Stanford, guest presentations on the principles of common teaching activities, supervised teaching experience. Students who entered in the Autumn should take 280 in the Spring prior to the Autumn they begin teaching.

*1 unit, Spr (Ricciardi, E; Heel, K)*

**MUSIC 300A. Medieval Notation**

Western notation of the Middle Ages and Renaissance: principles, purposes, and transcription.

*4 units, alternate years, not given this year*

**MUSIC 300B. Renaissance Notation**

Western notation of the Middle Ages and Renaissance: principles, purposes, and transcription.

*4 units, Spr (Rodin, J), alternate years, not given next year*

**MUSIC 301A. Analysis of Music: Modal**

*4 units, Win (Mahrt, W)*

**MUSIC 301B. Analysis of Music: Tonal**

*4 units, Aut (Grey, T)*

**MUSIC 301C. Analysis of Music: Post-Tonal**

Current analytical trends, issues, and methods.

*4 units, Spr (Ferneyhough, B)*

**MUSIC 302. Research in Musicology**

Directed reading and research. May be repeated for credit a total of 7 times.

*1-5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

**MUSIC 310. Research Seminar in Musicology**

For graduate students. Topics vary each quarter. May be repeated for credit a total of 8 times.

*3-5 units, Aut (Hadlock, H), Win (Grey, T), Spr (Berger, K)*

**MUSIC 312A. Aesthetics and Criticism of Music, Ancients and Moderns: Plato to Nietzsche**

For graduate students. Primary texts focusing on the nature, purposes, and uses of music and other arts.

*4 units, alternate years, not given this year*

**MUSIC 312B. Aesthetics and Criticism of Music, Contemporaries: Heidegger to Today**

For graduate students. Primary texts focusing on the nature, purposes, and uses of music and other arts.

4 units, alternate years, not given this year

**MUSIC 318. Advanced Acoustics**

Current topics. May be repeated for credit.

1-5 units, Win (Rossing, T)

**MUSIC 319. Research Seminar on Computational Models of Sound Perception**

All aspects of auditory perception, often with emphasis on computational models. Topics: music perception, signal processing, auditory models, pitch perception, speech, binaural hearing, auditory scene analysis, basic psychoacoustics, and neurophysiology. See <http://ccrma.stanford.edu/courses/>. May be repeated for credit a total of 14 times.

1-3 units, Aut (Slaney, M), Win (Slaney, M), Spr (Slaney, M)

**MUSIC 320. Introduction to Digital Audio Signal Processing**

Digital signal processing for music and audio research. Topics: complex numbers, sinusoids, spectrum representation, sampling and aliasing, digital filters, frequency response, z transforms, transfer-function analysis, and associated Matlab software. See <http://ccrma.stanford.edu/courses/320/>.

3-4 units, Aut (Abel, J; Berners, D)

**MUSIC 321. Readings in Music Theory**

Directed reading and research. May be repeated for credit a total of 5 times.

1-5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**MUSIC 323. Doctoral Seminar in Composition**

Illustrated discussions of compositional issues and techniques. Presentation of relevant topics, including students' own compositional practice. May be repeated for credit a total of 14 times.

3-4 units, Aut (Applebaum, M), Win (Ferneyhough, B), Spr (Kapusinski, J)

**MUSIC 325. Individual Graduate Projects in Composition**

May be repeated for credit.

1-5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**MUSIC 341. Ph.D Dissertation**

May be repeated for credit a total of 5 times.

1-10 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**MUSIC 390. Practicum Internship**

On-the-job training under the guidance of experienced, on-site supervisors. Meets the requirements for curricular practical training for students on F-1 visas. Students submit a concise report detailing work activities, problems worked on, and key results. May be repeated for credit. Prerequisite: qualified offer of employment and consent of adviser.

1 unit, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**MUSIC 399. D.M.A. Final Project**

May be repeated for credit a total of 5 times.

1-10 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**MUSIC 420. Signal Processing Models in Musical Acoustics**

Computational methods in musical sound synthesis and digital audio effects based on acoustic physical models. Topics: acoustic simulation with delay lines, digital filters, and nonlinear elements; comb filters; allpass filters; artificial reverberation; delay-line interpolation and sampling-rate conversion; phasing, flanging, and chorus effects; efficient computational models of strings, woodwinds, brasses, and other musical instruments. See <http://ccrma.stanford.edu/courses/420/>. Prerequisites: 320 or equivalent; PHYSICS 21 or equivalent course applying Newton's laws of motion; and CS 106B or equivalent programming in C and C++.

3-4 units, Win (Smith, J)

**MUSIC 421. Audio Applications of the Fast Fourier Transform (FFT)**

Spectrum analysis and signal processing using the FFT with emphasis on audio applications. Topics: Fourier theorems; FFT windows; spectrum analysis; spectrograms; sinusoidal modeling; spectral modeling synthesis; FFT convolution; FIR filter design and system identification; overlap-add and filter-bank-summation methods for short-time Fourier analysis, modification, and resynthe-

sis. See <http://ccrma.stanford.edu/courses/421/>. Prerequisites: 420 or consent of instructor.

3-4 units, Spr (Smith, J)

**MUSIC 422. Perceptual Audio Coding**

History and basic principles: development of psychoacoustics-based data-compression techniques; perceptual-audio-coder applications (radio, television, film, multimedia/internet audio, DVD, EMD). In-class demonstrations: state-of-the-art audio coder implementations (such as AC-3, MPEG) at varying data rates; programming simple coders. Topics: audio signals representation; quantization; time to frequency mapping; introduction to psychoacoustics; bit allocation and basic building blocks of an audio codec; perceptual audio codecs evaluation; overview of MPEG-1, 2, 4 audio coding and other coding standards (such as AC-3). Prerequisites: knowledge of digital audio principles, familiarity with C programming. Recommended: 320, EE 261. See <http://ccrma.stanford.edu/>.

3 units, Win (Bosi-Goldberg, M)

**MUSIC 423. Signal Processing Research**

Graduate research seminar. Problems in music and/or audio signal processing. Presentation of research-in-progress by graduate students, visiting scholars, and CCRMA faculty. See <http://ccrma.stanford.edu/courses/423/>. May be repeated for credit a total of 11 times.

1-4 units, Aut (Abel, J; Berners, D), Win (Smith, J), Spr (Smith)

**MUSIC 424. Signal Processing Techniques for Digital Audio Effects**

Techniques for dynamic range compression, reverberation, equalization and filtering, panning and spatialization, digital emulation of analog processors, and implementation of time-varying effects. Single-band and multiband compressors, limiters, noise gates, de-essers, convolutional reverberators, parametric and linear-phase equalizers, wah-wah and envelope-following filters, and the Leslie. Students develop effects algorithms of their own design in labs. Prerequisites: digital signal processing, sampling theorem, digital filtering, and the Fourier transform at the level of 320 or EE 261; Matlab and modest C programming experience. Recommended: 420 or EE 264; audio effects in mixing and mastering at the level of 192.

3-4 units, Spr (Berners, D; Abel, J)

## NATIVE AMERICAN STUDIES (NATIVEAM)

### UNDERGRADUATE COURSES IN NATIVE AMERICAN STUDIES

**NATIVEAM 109B. Indian Country Economic Development**

(Same as CSRE 109B) The history of competing tribal and Western economic models, and the legal, political, social, and cultural implications for tribal economic development. Case studies include mineral resource extraction, gaming, and cultural tourism. 21st-century strategies for sustainable economic development and protection of political and cultural sovereignty.

5 units, Aut (Biestman, K)

**NATIVEAM 123. American Indians and the Cinema**

(Same as CSRE 123) Hollywood and the film industry have had a major influence on American society for nearly a century. Initially designed to provide entertainment, the cinema broadened its impact by creating images perceived as real and essentialist. Hollywood's Indians have been the main source of information about who American Indians are and Hollywood has helped shape inaccurate and stereotypical perceptions that continue to exist today. This course looks chronologically at cinematic interpretations and critically examines accurate portrayals of American Indians and of American history.

5 units, Aut (Shively, J)

**NATIVEAM 197. The Rite to Remember: Performance and Chicana Indigenous Thought**

(Same as CHICANST 197, CSRE 197, DRAMA 355M) Indigenous thought and aesthetics as they pertain to the performance and ceremonial practices of Chicana and other indigenous African

American women artists and spirit practitioners.  
3-5 units, Spr (Staff)

**NATIVEAM 200R. Directed Research**  
1-5 units, Aut (Staff), Win (Staff), Spr (Staff)

**NATIVEAM 200W. Directed Reading**  
1-5 units, Aut (Staff), Win (Staff), Spr (Staff)

## NEUROBIOLOGY (NBIO)

### UNDERGRADUATE COURSES IN NEUROBIOLOGY

**NBIO 101. Social and Ethical Issues in the Neurosciences**  
(Same as NBIO 201) Influences on public debate and policy of scientific advances in the study of the brain and behavior: theories of brain function; philosophical and scientific approaches; advances in the neurosciences, possible uses in medical therapy, and interventions involving genetic screening, genetic selection, enhancement of neurological functioning, and manipulation of behavior; questions related to medical therapy, social policy, and broader considerations of human nature such as consciousness, free will, personal identity, and moral responsibility. May be taken for 2 units without a research paper. Prerequisite: Neuroscience, Biology, or Symbolic Systems major; or Human Biology core; or consent of instructor.

2-4 units, Spr (Hurlbut, W; Newsome, W)

**NBIO 198. Directed Reading in Neurobiology**  
Prerequisite: consent of instructor. (Staff)

1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**NBIO 199. Undergraduate Research**  
Investigations sponsored by individual faculty members. Prerequisite: consent of instructor.

1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

### GRADUATE COURSES IN NEUROBIOLOGY

**NBIO 201. Social and Ethical Issues in the Neurosciences**  
(Same as NBIO 101) Influences on public debate and policy of scientific advances in the study of the brain and behavior: theories of brain function; philosophical and scientific approaches; advances in the neurosciences, possible uses in medical therapy, and interventions involving genetic screening, genetic selection, enhancement of neurological functioning, and manipulation of behavior; questions related to medical therapy, social policy, and broader considerations of human nature such as consciousness, free will, personal identity, and moral responsibility. May be taken for 2 units without a research paper. Prerequisite: Neuroscience, Biology, or Symbolic Systems major; or Human Biology core; or consent of instructor.

2-4 units, Spr (Hurlbut, W; Newsome, W)

**NBIO 206. The Nervous System**  
Structure and function, including neuroanatomy, neurophysiology, and systems neurobiology. Topics include the properties of neurons and the mechanisms and organization underlying higher functions. Framework for general work in neurology, neuropathology, clinical medicine, and for more advanced work in neurobiology. Lecture and lab components must be taken together.

7-8 units, Win (Dolmetsch, R)

**NBIO 216. Genetic Analysis of Behavior**  
(Same as MCP 216) Advanced seminar. Findings and implications of behavioral genetics as applied to invertebrate and vertebrate model systems. Topics include biological clocks, and sensation and central pattern generators. Relevant genetic techniques and historical perspective. Student presentation.

4 units, alternate years, not given this year

**NBIO 218. Neural Basis of Behavior**  
Advanced seminar. The principles of information processing in the nervous system and the relationship of functional properties of neural systems with perception, behavior, and learning. Original papers; student presentations. Prerequisite: NBIO 206 or consent of instructor.

4 units, Spr (Staff), alternate years, not given next year

**NBIO 220. Central Mechanisms in Vision-based Cognition**  
Contemporary visual neuroscience, emphasizing the neural mechanisms underlying primate vision and visually guided behavior. Seven foundational topics in visual neuroscience; current papers. Computer-based demonstration exercises.

2-4 units, alternate years, not given this year

**NBIO 221. Frontiers in Translational Medicine**  
Small group course for first year MSTP and Master's in Medicine students only. Focus is on pathways for combining science and medicine during graduate and postdoctoral training and in one's career, and practical aspects of translational medicine. Guest lecturers are physician-scientists who have advanced the frontiers of translational medicine. Previous lecturers have included Drs. Gilbert Chu, Jamie Topper, Irv Weissman, Beverly Mitchell, Geoff Duyk, William Mobley, Judy Shizuru, and David Cox. Prerequisite: consent of instructor.

1 unit, Spr (Barres, B)

**NBIO 227. Understanding Techniques in Neuroscience**  
Techniques commonly used in the field of neuroscience, including molecular/genetic, electrophysiological, and whole brain imaging. Presentations by senior graduate students and examples from the literature. Optional laboratory demonstrations.

2 units, Aut (Pradhan, S; Villeda, S; Clark, K; Newsome, W)

**NBIO 228. Mathematical Tools for Neuroscience**  
Student-instructed. For students with no math background beyond basic calculus, or as a review for more advanced students. Techniques useful for analysis of neural data including linear algebra, Fourier transforms, probability and statistics, signal detection, Bayesian inference, and information theory.

1-3 units, not given this year

**NBIO 254. Molecular and Cellular Neurobiology**  
(Same as BIO 154, BIO 254) For advanced undergraduates and graduate students. Cellular and molecular mechanisms in the organization and functions of the nervous system. Topics: wiring of the neuronal circuit, synapse structure and synaptic transmission, signal transduction in the nervous system, sensory systems, molecular basis of behavior including learning and memory, molecular pathogenesis of neurological diseases. Prerequisite for undergraduates: Biology core or equivalent, or consent of instructors.

4-5 units, alternate years, not given this year

**NBIO 258. Information and Signaling Mechanisms in Neurons and Circuits**  
(Same as MCP 258) How synapses, cells, and neural circuits process information relevant to a behaving organism. How phenomena of information processing emerge at several levels of complexity in the nervous system, including sensory transduction in molecular cascades, information transmission through axons and synapses, plasticity and feedback in recurrent circuits, and encoding of sensory stimuli in neural circuits.

5 units, Aut (Baccus, S; Tsien, R)

**NBIO 299. Directed Reading in Neurobiology**  
Prerequisite: consent of instructor.

1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**NBIO 300. Professional Development & Integrity in Neuroscience**  
Required of Neurosciences Ph.D. students every quarter. Develops professional skills in critical assessment and oral presentation of findings from current neuroscience literature in the visual presentation of quantitative data and writing research grants. The role of animals in lab research, fraud in science, the responsibility of authors and reviewers, science in a multicultural environment, and the relationship between student and mentor. Student and faculty presentations and discussions.

1-2 units, Aut (Moore, T), Win (Moore, T), Spr (Moore, T)

**NBIO 370. Medical Scholars Research**  
Provides an opportunity for student and faculty interaction, as well as academic credit and financial support, to medical students who undertake original research. Enrollment is limited to students with approved projects.

4-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**NBIO 399. Graduate Research**  
Investigations sponsored by individual faculty members. Prerequisite: consent of instructor.

1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

## NEUROLOGY AND NEUROLOGICAL SCIENCES (NENS)

### UNDERGRADUATE COURSES IN NEUROLOGY AND NEUROLOGICAL SCIENCES

**NENS 67N. Intracellular Trafficking and Neurodegeneration** (F,Sem) Stanford Introductory Seminar. Preference to freshmen. Cell structures and functions, the intracellular trafficking system that maintains exchanges of materials and information inside cells, and clinical features and pathologies of neurodegenerative diseases. Techniques for examining cellular and subcellular structures, especially cytoskeletons; functional insights generated from structural explorations. Prerequisite: high school biology.

3 units, Spr (Yang, Y)

**NENS 199. Undergraduate Research**

Students undertake research sponsored by an individual faculty member. Prerequisite: consent of instructor.

1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

### GRADUATE COURSES IN NEUROLOGY AND NEUROLOGICAL SCIENCES

**NENS 202. Longevity**

(Same as HUMBIO 149L, PSYCH 102) Interdisciplinary. Challenges to and solutions for the young from increased human life expectancy: health care, financial markets, families, work, and politics. Guest lectures from engineers, economists, geneticists, and physiologists.

4 units, Win (Carstensen, L; Rando, T)

**NENS 205. Neurobiology of Disease Seminar**

Case demonstrations of selected disorders, discussion of the pathophysiological basis of the disorder, presentation of the basic principles underlying modern diagnostic and therapeutic management, and a discussion of recent research advances for each disease entity. Prerequisite: Neurobiology 206 or consent of instructor.

2 units, Win (Yang, Y; Mobley, W; Reimer, R), alternate years, not given next year

**NENS 206. Introduction to Neurology Seminar**

Exploration of aspects of neurology, including subspecialties. Current issues, clinical cases, and opportunities in the field.

1 unit, Spr (Barreto-Chang, O; Reimer, R)

**NENS 220. Computational Neuroscience**

Computational approaches to neuroscience applied at levels ranging from neurons to networks. Addresses two central questions of neural computation: 1) How do neurons compute? and 2) How do networks of neurons encode/decode and store information? Focus on biophysical (Hodgkin-Huxley) models of neurons and circuits, with emphasis on application of commonly available modeling tools (NEURON, MATLAB) to issues of neuronal and network excitability. Addresses issues relevant to neural encoding & decoding, information theory, plasticity and learning. Lectures introduce fundamental concepts of neuronal computation; discussion groups focus on relevant literature examples of proper application of these techniques. Final project. Recommended for Neuroscience Program graduate students; open to graduate, medical, and advanced undergraduate students (with consent of instructor). Prerequisite: Neurobiology 206 and facility with linear algebra and calculus recommended.

4 units, Win (Huguenard, J)

**NENS 221. Current Issues in Aging**

(Same as DBIO 221, GENE 221) Current research literature on genetic mechanisms of aging in animals and human beings. Topics include: mitochondria mutations, insulin-like signaling, sirtuins, aging in flies and worms, stem cells, human progeria, and centenarian studies. Prerequisite: GENE 203.

2 units, Spr (Staff)

**NENS 267. Molecular Mechanisms of Neurodegenerative Disease**

(Same as BIO 267) The epidemic of neurodegenerative disorders

such as Alzheimer's and Parkinson's disease occasioned by an aging human population. Genetic, molecular, and cellular mechanisms. Clinical aspects through case presentations.

4 units, Win (Kopito, R; Wyss-Coray, A; Reimer, R), alternate years, not given next year

**NENS 299. Directed Reading in Neurology and Neurological Science**

Prerequisite: consent of instructor.

1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**NENS 370. Medical Scholars Research**

Provides an opportunity for student and faculty interaction, as well as academic credit and financial support, to medical students who undertake original research. Enrollment is limited to students with approved projects.

4-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**NENS 399. Graduate Research**

Students undertake research sponsored by individual faculty members. Includes laboratory work in neurophysiology and neurochemistry.

1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

## NEUROSCIENCES PROGRAM (NEPR)

### GRADUATE COURSES IN NEUROSCIENCES PROGRAM

**NEPR 299. Directed Reading in Neurosciences**

Prerequisite: consent of instructor.

1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**NEPR 399. Graduate Research**

Student investigations sponsored by individual faculty members. Prerequisite: consent of instructor.

1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

## NEUROSURGERY (NSUR)

### UNDERGRADUATE COURSES IN NEUROSURGERY

**NSUR 70Q. Experimental Stroke**

(F,Dial) Stanford Introductory Dialogue. Preference to sophomores. How stroke is studied in the laboratory; advances in stroke research over the last two decades; and future directions. Topics include: cellular and molecular mechanisms of neuronal death and survival in the brain after stroke, including necrosis, apoptosis, inflammation, and cell signaling pathways; experimental tools for stroke treatment, such as gene therapy, cell therapy, hypothermia, preconditioning, postconditioning, and other pharmacological treatments; the gap and barrier between laboratory research and clinical translation.

2 units, Spr (Staff)

**NSUR 199. Undergraduate Research**

Students undertake investigations sponsored by individual faculty members. Prerequisite: consent of instructor.

1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

### GRADUATE COURSES IN NEUROSURGERY

**NSUR 261. Principles and Practice of Stem Cell Engineering**

(Same as BIOE 261) Quantitative models used to characterize incorporation of new cells into existing tissues emphasizing pluripotent cells such as embryonic and neural stem cells. Molecular methods to control stem cell decisions to self-renew, differentiate, die, or become quiescent. Practical, industrial, and ethical aspects of stem cell technology application. Final projects: team-reviewed grants and business proposals.

3 units, alternate years, not given this year

### **NSUR 278A. From Science to Business: Innovation in Neurologic Disease Beyond Neurosurgery**

For medical, business, and engineering students. The process of innovation and company building in the medical field, emphasizing the neurosciences. Overview of neurological diseases; business and regulatory aspects of device and biotech product development. Guest speakers on healthcare entrepreneurship. Venture capital and entrepreneurial mentors guide interdisciplinary student teams in evaluating a solution to an unmet clinical need or a project within a biotech company. May be taken for 2 units without the team project.

*2-4 units, alternate years, not given this year*

### **NSUR 278B. Independent Study on Healthcare Innovation and Entrepreneurship**

Continuation of NSUR 278A for students wishing to work on actual strategy and implementation of their idea developed in 278A or, more generally, for students who wish to develop a strategic plan for a specific healthcare (drug or device) venture.

*2-4 units, Aut (Kallmeyer, V; Steinberg, G), Win (Kallmeyer, V; Steinberg, G), Spr (Staff), Sum (Kallmeyer, V)*

### **NSUR 279. Concepts in Drug Delivery and Drug Device Combinations**

Open to all graduate students. Issues relating to drug-device combination products, including review of recently approved products such as cardiac stent), and development, regulatory, and reimbursement issues. Emphasis is on market evaluation, product development, and regulatory strategies. Lecture only for 2 units; project for 4 units.

*2-4 units, Win (Kallmeyer, V), alternate years, not given next year*

### **NSUR 299. Directed Reading in Neurosurgery**

Prerequisite: consent of instructor.

*1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

### **NSUR 370. Medical Scholars Research**

Provides an opportunity for student and faculty interaction, as well as academic credit and financial support, to medical students who undertake original research. Enrollment is limited to students with approved projects.

*4-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

## **OBSTETRICS AND GYNECOLOGY (OBGYN)**

### **UNDERGRADUATE COURSES IN OBSTETRICS AND GYNECOLOGY**

#### **OBGYN 199. Undergraduate Research in Reproductive Biology**

Students undertake investigations sponsored by individual faculty members. Prerequisite: consent of instructor.

*1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

### **GRADUATE COURSES IN OBSTETRICS AND GYNECOLOGY**

#### **OBGYN 202. Assisted Reproductive Technologies**

(Same as DBIO 202) Primary and current literature in basic and clinical science aspects of assisted reproductive technologies (ART), and demonstrations of current ART techniques including in vitro fertilization and embryo culture, and micromanipulation procedures such as intracytoplasmic sperm injection and embryo biopsy and cryopreservation. Class only may be taken for 1 unit. 2 units includes papers and attendance at clinical demonstrations. 3 units includes a term paper. Recommended: DBIO 201, or consent of instructors.

*1-3 units, Win (Porzig, E; Behr, B)*

#### **OBGYN 240. Sex Differences in Human Physiology and Disease**

(Same as HUMBIO 140, MED 240) Chromosomal and hormonal influences on cells, tissues, and organs that underlie the development of reproductive organs and sexual dimorphism of the neuroendocrine system. Consequences of sex hormones and environmental factors that differ between men and women in systems

including the musculoskeletal, neurological, cardiovascular, and immunological. Guest lecturers. Prerequisite: Human Biology core or equivalent, or consent of instructor.

*2-3 units, Win (Stefanick, M)*

#### **OBGYN 256. Current Controversies in Women's Health**

(Same as HUMBIO 125) Interdisciplinary. Focus is on the U.S. Topics include: health research; bioethical, legal, and policy issues; scientific and cultural perspectives; social influences; environmental and lifestyle effects on health; and issues related to special populations. Guest lecturers; student debates. Prerequisite: Human Biology core or equivalent, or consent of instructor.

*3 units, Spr (Jacobson, M; Stefanick, M)*

#### **OBGYN 370. Medical Scholars Research**

Provides an opportunity for student and faculty interaction, as well as academic credit and financial support, to medical students who undertake original research. Enrollment is limited to students with approved projects.

*4-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

#### **OBGYN 399. Graduate Research in Reproductive Biology**

Students undertake investigations sponsored by individual faculty members. Prerequisite: consent of instructor.

*1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

## **OPHTHALMOLOGY (OPHT)**

### **UNDERGRADUATE COURSES IN OPHTHALMOLOGY**

#### **OPHT 199. Undergraduate Research**

Allows for qualified students to undertake investigations sponsored by individual faculty members. Prerequisite: consent of instructor.

*1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

### **GRADUATE COURSES IN OPHTHALMOLOGY**

#### **OPHT 201. Clinical Topics in Ophthalmology**

Introduction to the professional opportunities available to the ophthalmologist in the areas of clinical research, community health, biotech and pharmaceutical development, international blindness prevention, graduate and post-graduate education.

*1 unit, not given this year*

#### **OPHT 203. Introduction to Ophthalmology**

(Continuation of 202) Introduction to the practical skills used within the field of ophthalmology. Diagnostic tools and instruments; applications of these tools; practice using instruments under the guidance of faculty and residents; practice in microsurgical techniques with one-on-one guidance.

*1 unit, Spr (Staff)*

#### **OPHT 299. Directed Reading in Ophthalmology**

Prerequisite: consent of instructor.

*1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

#### **OPHT 370. Medical Scholars Research**

Provides an opportunity for student and faculty interaction, as well as academic credit and financial support, to medical students who undertake original research. Enrollment is limited to students with approved projects.

*4-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

#### **OPHT 399. Graduate Research**

Students to undertake investigations sponsored by individual faculty members. Opportunities are available at both predoctoral and postdoctoral levels. Prerequisite: consent of instructor.

*1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

## ORTHOPEDIC SURGERY (ORTHO)

### UNDERGRADUATE COURSES IN ORTHOPEDIC SURGERY

#### ORTHO 97Q. Sport, Exercise, and Health: Exploring Sports Medicine

(S,Sem) (Same as HUMBIO 97Q) Stanford Introductory Seminar. Preference to sophomores. Sports medicine is the practice of clinical medicine at the interface between health and performance, competition and well-being. While sports medicine had its origins in providing care to athletes, medical advances developed in care of athletes exerted a great effect on the nature and quality of care to the broader community. Topics include sports injuries, medical conditions associated with sport and exercise, ethics, coaching, women's issues, fitness and health, and sports science. Case studies.

3 units, Win (Matheson, G)

#### ORTHO 102. Orthopaedic Surgical Anatomy

(Same as ORTHO 202) Open to medical and undergraduate students. Opportunity to enhance knowledge of anatomy as it pertains to the practice of Orthopaedic Surgery and to improve dissection skills. Follows the operative anatomy syllabus used by the Stanford Orthopaedic Surgery Residency Program. Sessions led by Stanford Orthopaedic Surgery attendings and residents. Didactic sessions, prosection review, dissection.

2 units, Sum (Staff)

#### ORTHO 199. Undergraduate Research

Students undertake investigations sponsored by individual faculty members. Prerequisite: consent of instructor.

1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

### GRADUATE COURSES IN ORTHOPEDIC SURGERY

#### ORTHO 202. Orthopaedic Surgical Anatomy

(Same as ORTHO 102) Open to medical and undergraduate students. Opportunity to enhance knowledge of anatomy as it pertains to the practice of Orthopaedic Surgery and to improve dissection skills. Follows the operative anatomy syllabus used by the Stanford Orthopaedic Surgery Residency Program. Sessions led by Stanford Orthopaedic Surgery attendings and residents. Didactic sessions, prosection review, dissection.

2 units, Sum (Staff)

#### ORTHO 222. Anatomy of Movement

Perspectives include orthopedic surgery, neurology, mechanical engineering, computer science, anthropology, and art. Anatomy and pathology affecting the human locomotor system. Normal function and functional deficit from disease or injury. Engineering dilemmas that assist or emulate human movement, such as design of an artificial joint or simulation of tendon transfers for nerve palsy. The expression of human movement in art masterpieces and photography. The evolution of the hand as it became an instrument of purpose. Student team projects. Lecture only for 2 units; project for 4 units.

2-4 units, Win (Ladd, A; Rose, J)

#### ORTHO 260. Tissue Engineering

Biological principles underlying the use of engineering strategies and biocompatible materials for tissue repair and regeneration. Structure, physiology, and mechanics of articular cartilage, bone, and dense soft connective tissues. Current ideas, approaches, and applications being implemented as therapeutic regimens for arthritis, spinal deformities, and limb salvage. Multidisciplinary constraints on the design and creation of tissue constructs. Prerequisite: familiarity with basic cell and molecular mechanisms underlying tissue differentiation.

3 units, Win (Smith, R)

#### ORTHO 370. Medical Scholars Research

Provides an opportunity for student and faculty interaction, as well as academic credit and financial support, to medical students who

undertake original research. Enrollment is limited to students with approved projects.

4-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

## OVERSEAS SEMINARS (OSPGEN) COURSES

#### OSPGEN 40. Community Health in Oaxaca

Social, economic, and cultural factors impacting the health of Mexicans and Mexican immigrants to the United States. Broaden public health knowledge, increase linguistic competency in Spanish, and gain exposure to health care systems and clinical interactions in another culture. Close observation of clinicians at work in community health settings; service with local community health organizations. Structured reflection sessions support integration of studies with clinical observations and service work.

2 units, Aut (Garcia, G; Banchoff, A)

#### OSPGEN 41. Arts and Society in Contemporary China

Immersion in urban China's arts scene in Beijing and Shanghai with class meetings and discussions providing a deeper understanding of contemporary Chinese society. Emphasis on arts that are currently popular and influential rather than traditionally Chinese. Museum and gallery visits; performance and concert attendance; observation of old and new architectural monuments; meetings with artists, writers and critics.

2 units, Aut (Cai, J)

#### OSPGEN 42. How to Build a Habitable Planet: An Example from the European Alps

Feedback and links between global climate, mountain building, and biological evolution and landscape development of the European Alps. Long and short-term carbon cycle and the role of human perturbation; climate of Europe and influence of global connections on climate change; origin of the glaciers, global cooling and the migration of humans into Europe; policies and strategies employed by EU to mitigate effects of global warming. Students and faculty camp in three different locations. Location: Alps in Switzerland, northern Italy and France.

2 units, Aut (Chamberlain, P)

#### OSPGEN 43. Turkey at the Crossroads of Energy, Sustainability, and Geography

Current analysis of energy systems and sustainability in Turkey. Energy Resources Engineering analysis of sustainability and use of energy resources. Questions of resources, extraction, transportation, and environmental quality are considered in concert. Comparative study of conventional fossil fuel energy resources versus renewable geothermal and solar energy.

2 units, Aut (Kovscek, A)

#### OSPGEN 44. Devising Otherness in Uganda and America: Creating a Theatrical Performance Based on Identity

Working with students from Makerere University, Kampala Uganda, students create a performance based on the questions: what do Americans think about Africa and Africans; and what do Africans think about America and Americans? Students perform together at both the National Theatre in Kampala and Pigott Theater at Stanford.

2 units, Aut (Ramsaur, M)

#### OSPGEN 45. British Contributions to Computing

Leading role played by the British in addressing fundamental and intellectually challenging problems in computer science; scientific advances in the United Kingdom that made computing possible. Ideas behind automatic computing developed by Charles Babbage and collaborator Ada Lovelace including the idea of building a programmable machine. Theoretical groundwork for computer science developed by English mathematician Alan Turing.

2 units, Aut (Roberts, E)

#### OSPGEN 46. America and Vietnam: After Three Decades

Legacies of the American war in Vietnam (circa 1961-1973) and contemporary aspects of Vietnam's integration into the global economy; visits to Ho Chi Minh City and vicinity, the imperial capital at Hue, and the modern capital at Hanoi. Student presentations on relevant topics and sites; and visits and seminars with

officials, academics, students, and members of the business-industrial community.

2 units, Aut (Goldstein, J; Rakove, J)

#### **OSPGEN 70. Indigenous Australia**

Culture and ecology of desert Aboriginal people living in a remote region of W. Australia. Students live with their Martu hosts. Issues in greater Australian human prehistory; social, ecological, and political factors that shape contemporary relationships between rural Aborigines, their urban counterparts, and the broader Australian society. Location: Newman, Parnngurr Community, Western Australia.

2 units, Aut (Bird, R; Bird, D)

#### **OSPGEN 88. The Bloomsbury Group**

The 20th-century literary and intellectual concentration of individuals in Britain. Readings include Virginia Woolf and E.M. Forster. Students select a member of the group for individual concentration. Meetings in King's College, Cambridge, where the Bloomsbury Group originated, with visits to sites associated with the group in London and Sussex.

2 units, Aut (Stansky, P)

## OVERSEAS STUDIES: AUSTRALIA (OSPAUSTL) COURSES

### **OSPAUSTL 10. Coral Reef Ecosystems**

Key organisms and processes, and the complexity of coral reef ecosystems. Students explore the Great Barrier Reef from the southern end which demonstrates the physical factors that limit coral reefs, to the northern reef systems which demonstrate key aspects of these high biodiversity ecosystems. Human-related changes. Emphasis is on research experiences and development of analytical skills. Two units only counted for Biological Sciences major. GER:DB-EngrAppSci

3 units, Aut (Ward, S; Dove, S; Arrigo, K)

### **OSPAUSTL 20. Coastal Resource Management**

Problem solving, research, communication, teamwork, and social assessment skills in sustainable coastal zone management. Issues include: ecosystem functions and values at risk under the proposed development in case study; environmental outcomes most desirable for the local stakeholders and how those are defined; features of the human communities and their function as they relate to the management options; tools or mechanisms for a sustainable management outcome. Taught by multidisciplinary team that includes Australian and developing country experts. Two units only counted for Biological Sciences major. GER:DB-EngrAppSci

3 units, Aut (Johnstone, R)

### **OSPAUSTL 30. Coastal Forest Ecosystems**

Prehistory of Australian rainforest and how rainforest structure and biodiversity change with altitude, latitude, and geology. Tropical coastal marine wetlands, mangrove forests, and the relationship between land- and sea-based biota. Biology and ecology of marine plants, mangroves, and tropical salt marsh. Introduction to specialized fields of marine plant biology and ecology including biogeography and evolution, aquatic plant ecophysiology, water quality and bioindicator techniques, pollution and eutrophication, and environmental control of marine plant distribution and productivity. Two units only counted for Biological Sciences major. GER:DB-EngrAppSci

3 units, Aut (Hall, J; Duke, N)

### **OSPAUSTL 40. Australian Studies**

Introduction to Australian society, history, culture, politics, and identity. Social and cultural framework and working understanding of Australia in relationship to the focus on coastal environment in other program courses. Field trips. GER:DB-SocSci, EC-GlobalCom

3 units, Aut (Lilley, I)

### **OSPAUSTL 50. Targeted Research Project**

Prior to arriving in Australia, students establish a link with University of Queensland faculty to develop project ideas that combine personal interests and career goals with opportunities presented by the Australian Coastal Studies program, such as how mangrove

roots find sediment rich zones of the shore, or the dynamics of ecotourism in southern and northern coastal Queensland. Project report and presentation in Australia.

4 units, Aut (Staff)

## OVERSEAS STUDIES CONSORTIUM IN BARCELONA— CASB (OSPBARCL)

### **OSPBARCL 101. Language and Culture in Catalonia**

Preparation for students to function in the academic and social environment of Barcelona. Basic listening, reading and comprehension in Catalan; review of Spanish with focus on writing academic papers and listening to lectures. Introduction to Barcelona with emphasis on contemporary history, culture and politics. Bilingualism; multiculturalism; varieties of nationalism and globalization in context of Barcelona.

4 units, Aut (Staff)

### **OSPBARCL 110. Migration, Politics, and Identity in Modern Catalonia: Catalan Diasporas and Diasporas in Catalonia**

Catalan peculiarities of modern Spain and the contribution of supra-regional processes and realities in their formation. Catalan diaspora in the Spanish Caribbean *ultramar* in the 19th century. Spanish crisis, Atlantic emigration, and Catalan nationalism in the early 20th century following the collapse of Spanish *ultramar*. Experience of Catalans between the Spanish Civil War and WW II. Francoism, peninsular migrations, and political cultures in Catalonia, 50s-70s. Geopolitics of democratic Spain and return of transatlantic networks at the end of the 20th century.

5 units, Aut (Staff)

## OVERSEAS STUDIES: BEIJING (OSPBEIJ) COURSES

### **OSPBEIJ 3C. First-Year Modern Chinese**

5 units, Spr (Chen, L)

### **OSPBEIJ 9. Chinese Language Tutorial**

2 units, Aut (Staff, 1), Spr (Staff, 1)

### **OSPBEIJ 15. Selected Topics in Brain Development and Behavior**

Complementary to OSPBEIJ 18 for advanced students who want to learn more about neuroscience through primary literature. Read 1-2 key primary research papers per week and discuss in depth.

1 unit, Aut (Staff)

### **OSPBEIJ 18. Nature and Nurture in Brain Development and Behavior**

How the nervous system is organized, how nerve cells communicate information, and how the brain represents the sensory world serve as introduction for emphasis on how the brain is wired during development and modified by experience, how neural circuits in the brain direct animal behavior, and how Nature and Nurture, East and West culture, affect personal experiences and behavior. Draws on unique location in Beijing. GER: DB-NatSci

3 units, Aut (Luo, L)

### **OSPBEIJ 19. Population and Society in East Asia**

Current demographic situation, and country differences. Emphasis is on China; attention to Japan and S. Korea. Relationship between social change and demographic change in the past. Factors influencing and influenced by fertility, mortality, and migration. Fertility control, the aging process, old age care, and migration. GER:DB-SocSci, EC-GlobalCom

4 units, Spr (Zhou, Y)

### **OSPBEIJ 21C. Second-Year Modern Chinese**

5 units, Aut (Chen, L)

### **OSPBEIJ 23C. Second-Year Modern Chinese**

5 units, Spr (Zhu, X)

**OSPBEIJ 38. Issues and Approaches in Doing Fieldwork in China**

Introduction to theories and approaches in conducting fieldwork research in a foreign country; implementing independent research plans and setting realistic goals to accomplish in-country fieldwork studies; guidance through the research process; forum for sharing fieldwork learning experiences and findings. Research plans and approval of home campus advisor required by June.

4-5 units, Aut (Shen, X)

**OSPBEIJ 41. Chinese Society and Business Culture**

Key features of Chinese society and their applications to Chinese business culture from a sociological perspective. Structural differences between Chinese and U.S. societies and their social, economic, and cultural implications. Emerging patterns in areas such as retailing and consumer behaviors, work relations and management, and business negotiation and collaboration. GER:DB-SocSci, EC-GlobalCom

4 units, Spr (Li, B)

**OSPBEIJ 42. Chinese Media Studies**

Fundamental changes in Chinese Media. Issues such as: how Chinese Media emerge and evolve against the background of modern Chinese history; how they interact with government, sponsors, receivers, and other social institutions; and implications for Chinese social development. GER:DB-SocSci

4 units, Aut (Li, K)

**OSPBEIJ 46. Introduction to Chinese Economy**

Major aspects of Chinese economy and challenges it faces. Topics: historical background; transition to market economy; issues associated with the transition process. Cultural, political, and institutional environment from a historical perspective. Economic theory and empirical analysis applied to explain economic phenomena in China. GER:DB-SocSci, EC-GlobalCom

5 units, Aut (Chen, D)

**OSPBEIJ 55. Chinese Economy in Transition**

From planned regime to market economy: political economy and institutional aspects of China's economic transition and open-door policy. How can China achieve economic success given disadvantages in natural resources, human capital stock, and institutional arrangements? Theoretical economic analysis, empirical data, and case studies. Emergence of China as an economic superpower; major challenges ahead. GER:DB-SocSci, EC-GlobalCom

5 units, Spr (Zhou, L)

**OSPBEIJ 66. Essentials of China's Criminal Justice System**

Criminal laws and cases. Topics include criminal legal thinking, liability, prosecution and defense in criminal litigation, death penalty debates, evidence and compulsory measures, and the Chinese prison system. Comparisons with other systems. Human rights protection. GER:DB-SocSci, EC-GlobalCom

5 units, Aut (Wang, S)

**OSPBEIJ 72. Societal Changes from Chinese Natives' Points of View**

Social transformation in China from the perspective of natives in China. Chinese scholars invited to speak. Topics include: social inequality; health care; doing business in China; ethnic minorities in the Chinese society; migration and urbanization; role of NGOs in China's public policy; formation of policies on rural governance; old age support in China. Additional topics arranged in response to students' interests and special events in China.

2-5 units, Spr (Zhou, X)

**OSPBEIJ 73. Formal Organizations**

Dimensions and aspects of formal organizations and basic concepts and theoretical logics for analyzing them. Multidisciplinary approach to understand organizational phenomena, with special attention to complementary perspectives drawn from economics, psychology, and sociology. Organization research literature and specific cases, especially those in the Chinese context, illustrate applications of the analytic models and concepts in the real world of organizations. GER:DB-SocSci

5 units, Spr (Zhou, X)

**OSPBEIJ 101C. Third-Year Modern Chinese**

5 units, Aut (Zhu, X)

**OSPBEIJ 103C. Third-Year Modern Chinese**

5 units, Spr (Wang, Y)

**OSPBEIJ 211C. Fourth-Year Modern Chinese**

5 units, Aut (Wang, Y)

## OVERSEAS STUDIES: BERLIN (OSPBER) COURSES

**OSPBER 1Z. Accelerated German: First and Second Quarters**

A jump start to the German language, enabling students with no prior German to study at the Berlin Center. Covers GERLANG 1 and 2 in one quarter.

8 units, Aut (Wohlfeil, J), Win (Wohlfeil, J)

**OSPBER 2Z. Accelerated German, Second and Third Quarters**

Qualifies students for participation in an internship following the study quarter. Emphasis is on communicative patterns in everyday life and in the German work environment, including preparation for interviews.

8 units, Spr (Wohlfeil, J)

**OSPBER 15. Shifting Alliances? The European Union and the U.S.**

The development of European integration, a model for global security and peace, and a possible replacement for the U.S. position as unilateral superpower. Competing arguments about the state of transatlantic relations. GER:DB-SocSci, EC-GlobalCom

4-5 units, Win (Brueckner, U)

**OSPBER 17. Split Images: A Century of Cinema**

20th-century German culture through film. The silent era, Weimar, and the instrumentalization of film in the Third Reich. The postwar era: ideological and aesthetic codes of DEFA, new German cinema, and post-Wende filmmaking including *Run Lola Run* and *Goodbye Lenin*. Aesthetic aspects of the films including image composition, camera and editing techniques, and relation between sound and image. GER:DB-Hum, EC-GlobalCom

4 units, Win (Kramer, K)

**OSPBER 18. Independent Research on Work and Family**

Topics such as: male/female differences in education, labor force participation, type of job, and earnings; trends in marriage, divorce, and fertility; division of housework in families; public and private provision of child care and elder care; the legal environment for women's employment; company and government policies toward work and family. Concentrate on Germany alone or in comparison with one or two of its neighbors or with the U.S. Co-requisite: OSPBER 19.

3-5 units, Win (Staff)

**OSPBER 19. Work and Family**

Theoretical, empirical, and personal questions faced by highly educated women and men at the workplace and in combining work and family. Topics include: the determinants of happiness; why work and family conflict and what can be done to lessen the conflict; gender differences in education, occupation, labor force participation and earnings; family power dynamics and the gendered division of labor at home; gender differences in leadership and mentorship. Comparisons between U.S. and Germany. GER:DB-SocSci

4 units, Win (Strober, M)

**OSPBER 21B. InterMediate German**

Grammar review, vocabulary building, writing, and discussion of German culture, literature, and film. Corequisite: OSPBER 100B.

5 units, Aut (Kloetzer, S), Win (Kloetzer, S), Spr (Kloetzer, S)

**OSPBER 30. Berlin vor Ort: A Field Trip Module**

The cultures of Berlin as preserved in museums, monuments, and architecture. Berlin's cityscape as a narrative of its history from baroque palaces to vestiges of E. German communism, from 19th-century industrialism to grim edifices of the Sachsenhausen concentration camp.

1 unit, Aut (Pabsch, M), Win (Pabsch, M), Spr (Jander, M)

**OSPBER 31. Exploring the Berlin Theater by Viewing and Evaluating Performance Work**

Attend one to two performances each week; perhaps meet some of the theater artists involved; conduct extensive debates about the

plays viewed, the achievements of the director, the designer, the music employed (if applicable), and the performers.

3 units, Aut (Weber, C)

**OSPBER 32. The Stage in Dialogue with History: German Theater from the End of WWII to the End of the Cold War**

Practice and ideological positions of East and West German Theater from the end of World War II to the implosion of the Soviet empire. Work of major playwrights and practitioners who shaped the German theater between 1945 and 2000. The way plays and their staging responded to, and tried to influence, history during the second half of the 20th century. Staging and design practices and the drastic changes they experienced during the half century that also introduced television and artificial intelligence to quotidian life. GER:DB-Hum

3-5 units, Aut (Weber, C)

**OSPBER 40B. Introductory Electronics**

Electrical quantities and their measurement, including operation of the oscilloscope. Function of electronic components including resistor, capacitor, and inductor. Analog circuits including the operational amplifier and tuned circuits. Digital logic circuits and their functions. Lab assignments. Prerequisite: PHYSICS 43. GER:DB-EngrAppSci

5 units, Aut (Wong, S), Win (Wong, S), Spr (Howe, R)

**OSPBER 42. Echtzeitmusik: Improvised/Unconventionally Notated Art Music in Berlin**

Introduction to Berlin's international, experimental music scene through a combination of events and readings. Attend an experimental music event in Berlin each week in conjunction with class meeting to review and discuss writing by a relevant practitioner or scholar of experimental sound art such as Brian Eno, Derek Bailey, Cornelius Cardew, Karlheinz Stockhausen, Miles Davis, or Kurt Schwitters. Performance participation encouraged, but not required.

2 units, Win (Trevino, J)

**OSPBER 45. Computers, Ethics, and Social Responsibility**

Ethical and social issues related to the development and use of computer technology. Ethical theory, and social, political, and legal considerations. Scenarios in problem areas: privacy, reliability and risks of complex systems, and responsibility of professionals for applications and consequences of their work. Prerequisite: 106A or equivalent. GER:EC-EthicReas

3-4 units, Spr (Roberts, E)

**OSPBER 50B. Introductory Science of Materials**

GER:DB-EngrAppSci

4 units, Aut (Staff, 1), Win (Staff, 1), Spr (Staff, 1)

**OSPBER 58. Writing Poetry and/or Personal Essays in Response to Experience Abroad**

With readings as background, students keep notebook of written responses to encounters with the culture, art, and history of Berlin and then develop selected pieces into poems or literary essays. Feedback in small groups and individual tutorials. Readings include topics such as ekphrasis (poetry and prose that respond to works of visual art), nature writing, meditations on the narratives and artifacts of social history, and interior and dramatic monologues, as well as essays on writing.

5 units, Spr (Rusk, L)

**OSPBER 60. Cityscape as History: Architecture and Urban Design in Berlin**

Diversity of Berlin's architecture and urban design resulting from its historical background. Architect Ludwig Mies van der Rohe and his artistic ancestors. Role of the cultural exchange between Germany and the U.S. Changing nature of the city from the 19th century to the present. GER:DB-Hum

5 units, Aut (Pabsch, M)

**OSPBER 62. Shades of Green: Environmental Policy in Germany and the U.S. in Historical Perspective**

How political institutions, political culture, and economic structure influence domestic and foreign environmental policies across countries in areas such as climate change, urbanization, and management of finite resources. Impact on cooperative solutions between countries with focus on Germany and the U.S. GER:DB-SocSci

5 units, Spr (Tempel, S)

**OSPBER 70. The Long Way to the West: German History from the 18th Century to the Present**

Battles still current within Germany's collective memory. Sources include the narrative resources of museums, and experts on the German history in Berlin and Potsdam. Field trips. GER:DB-Hum, EC-GlobalCom

5 units, Win (Jander, M)

**OSPBER 75. History Through Monuments: Art in Historical Space**

National identity and political conflicts as reflected in historical sites and the political monuments erected during democracy and dictatorships in Germany; Weimar Republic, Third Reich, Federal Republic, GDR. Field trips to sites linked to readings and class discussions.

5 units, Spr (Saehrendt, C)

**OSPBER 100B. Berlin Heute**

Required for students enrolled in GERLANG 3B; open to students in other German language classes. Active use of German, including vocabulary from a variety of fields and disciplines, and discussion of current issues.

2 units, Aut (Friesel, D), Win (Friesel, D), Spr (Friesel, D)

**OSPBER 101A. Contemporary Theater**

Texts of plays supplemented by theoretical texts or reviews. Weekly theater visits, a tour of backstage facilities, and discussions with actors, directors, or other theater professionals. In German. GER:DB-Hum

5 units, Spr (Kramer, K)

**OSPBER 101B. Advanced German**

For intermediate and advanced students. Focus is on Berlin through film, literature, music, live performance, news media, and field trips. Essay writing, vocabulary building, and in-class presentations. Reading literature and news stories, essay writing, vocabulary building, and in-class presentations.

5 units, Aut (Biege, M), Win (Biege, M), Spr (Biege, M)

**OSPBER 115X. The German Economy: Past and Present**

The history of the German economy in the Wilhelmine Empire, the Weimar Republic, the Third Reich, the postwar real socialism of the GDR, and the free market economy of the FRG. The processes of economic transition since unification and current challenges faced by united Germany. GER:DB-SocSci, DB-SocSci, EC-GlobalCom

4-5 units, Aut (Klein, I)

**OSPBER 126X. A People's Union? Money, Markets, and Identity in the EU**

The institutional architecture of the EU and its current agenda. Weaknesses, strengths, and relations with partners and neighbors. Discussions with European students. Field trips; guest speakers. GER:DB-SocSci, DB-SocSci, EC-GlobalCom

4-5 units, Aut (Brueckner, U)

**OSPBER 161X. The German Economy in the Age of Globalization**

Germany's role in the world economy: trade, international financial markets, position within the European Union; economic relations with Eastern Europe, Russia, the Third World, and the U.S. International aspects of German economic and environmental policies. The globalization of the world's economy and Germany's competitiveness as a location for production, services, and R&D, focusing on the German car industry. GER:DB-SocSci, DB-SocSci, EC-GlobalCom

4-5 units, Win (Klein, I)

**OSPBER 174. Sports, Culture, and Gender in Comparative Perspective**

Theory and history of mass spectator sports and their role in modern societies. Comparisons with U.S., Britain, and France; the peculiarities of sports in German culture. Body and competition cultures, with emphasis on the entry of women into sports, the modification of body ideals, and the formation and negotiation of gender identities in and through sports. The relationship between sports and politics, including the 1936 Berlin Olympic Games. GER:DB-SocSci, EC-Gender

5 units, Spr (Junghanns, W)

**OSPBER 198D. Humboldt Universität: Humanities 2**

1-3 units, Aut (Staff), Win (Staff), Spr (Staff)

**OSPBBER 198F. Humboldt Universität: Social Sciences 2**  
1-3 units, Aut (Staff), Win (Staff), Spr (Staff)

**OSPBBER 198X. Potsdam Universität: Humanities 2**  
1-4 units, Aut (Staff), Win (Staff), Spr (Staff)

**OSPBBER 198Z. Potsdam Universität: Social Sciences 2**  
1-3 units, Aut (Staff), Win (Staff), Spr (Staff)

**OSPBBER 199D. Humboldt Universität: Humanities**  
1-3 units, Aut (Staff), Win (Staff), Spr (Staff)

**OSPBBER 199F. Humboldt Universität: Social Sciences**  
1-3 units, Aut (Staff), Win (Staff), Spr (Staff)

**OSPBBER 199G. Freie Universität: Social Sciences 1**  
1-3 units, Aut (Staff), Win (Staff), Spr (Staff)

**OSPBBER 199H. Freie Universität: Humanities 1**  
1-3 units, Aut (Staff), Win (Staff), Spr (Staff)

**OSPBBER 199J. Freie Universität: Natural Sciences 1**  
1-3 units, Aut (Staff), Win (Staff), Spr (Staff)

**OSPBBER 199K. Freie Universität: Social Sciences 2**  
1-3 units, Aut (Staff), Win (Staff), Spr (Staff)

**OSPBBER 199L. Freie Universität: Humanities 2**  
1-3 units, Aut (Staff), Win (Staff), Spr (Staff)

**OSPBBER 199M. Freie Universität: Natural Sciences 2**  
1-3 units, Aut (Staff), Win (Staff), Spr (Staff)

**OSPBBER 199P. Technische Universität: Social Sciences 1**  
1-3 units, Aut (Staff), Win (Staff), Spr (Staff)

**OSPBBER 199Q. Technische Universität: Humanities 1**  
1-3 units, Aut (Staff), Win (Staff), Spr (Staff)

**OSPBBER 199R. Technische Universität: Natural Sciences 1**  
1-3 units, Aut (Staff), Win (Staff), Spr (Staff)

**OSPBBER 199S. Technische Universität: Engineering 1**  
1-3 units, Aut (Staff), Win (Staff), Spr (Staff)

**OSPBBER 199T. Technische Universität: Social Sciences 2**

1-3 units, Aut (Staff), Win (Staff), Spr (Staff)

**OSPBBER 199Z. Potsdamer Universität: Social Sciences 1**  
1-4 units, Aut (Staff), Win (Staff), Spr (Staff)

## OVERSEAS STUDIES: CAPE TOWN (OSPCPTWN) COURSES

### OSPCPTWN 18. Xhosa Language and Culture

History of the Xhosa language; understanding Xhosa culture and way of life. Listening, speaking, reading and writing, combined with the social uses of the language in everyday conversations and interactions. Intercultural communication. Content drawn from the students' experiences in local communities through their service learning/volunteer activities to support the building of the relationships in these communities. How language shapes communication and interaction strategies.

2 units, Win (Tyam, N), Spr (Tyam, N)

### OSPCPTWN 20. Supervised Service-Learning

For students not enrolled in Cape Town course-based service-learning. Opportunities with Cape Town Centre's community partners: Western Cape NGOs, government agencies, or other community-based civic groups. Bi-weekly seminars for discussion, critical reflection, and integration of experiences with Cape Town studies and cultural discoveries.

3 units, Win (McMillan, J), Spr (McMillan, J)

### OSPCPTWN 22. Preparation for Community-Based Research in Community Health and Development

For students intending to engage in community-based research in South Africa in the summer following spring study quarter in Cape Town. Approaches and methods of collaborative, community-based research; qualitative data gathering and analysis methods in community-based research; effective collaboration with community partners and data sources; race and privilege in community-based research. Identifying research partners and sponsors; articulating potential research questions; and planning research projects.

3 units, Spr (Stanton, T)

### OSPCPTWN 23. History and Politics of South Africa in Transition

Key issues in contemporary South African politics including: South Africa's negotiated settlement; the sustainability of democracy in South Africa; the heterogeneity of South Africa; and questions of agency and subordination globally and locally. GER:EC-GlobalCom

4 units, Spr (Simons, M)

### OSPCPTWN 24. Targeted Research Project in Community Health and Development

Two-quarter sequence for students engaging in Cape Town-sponsored community based research. Students undertake substantive community health or development investigations in collaboration with the Stanford Centre's community partners: Western Cape NGOs or government agencies, or community-based organizations or groups. Projects designed to build knowledge and skills for students and to respond to needs of Centre partners in the community. Winter Quarter focus on research methods; Spring Quarter focus on implementation and research.

3-5 units, Win (Stanton, T), Spr (Stanton, T)

### OSPCPTWN 32. Adult Learning, Development, and Social Change: Service Learning in the South African Context

Adult learning and its role in community social action; development; service learning. Micro contexts of people's daily lives and experiences in the context of an emergent democracy; understanding possibilities of community action and mobilisation for social change. Service in a historically marginalised community near Cape Town to understand realities of everyday life in informal settlements, to engage with education in a developmental context, and to gain insight into sociopolitical factors that shape social action and learning.

4-5 units, Win (McMillan, J), Spr (McMillan, J)

### OSPCPTWN 34. The Effect of HIV/AIDS on the Fate of Vulnerable Populations in Sub-Saharan Africa

Current status of children made vulnerable by HIV/AIDS in sub-Saharan Africa. Scope and characteristics of the HIV pandemic, and how it impacts the larger society, communities, and the extended family. Fate of children with a mother diagnosed with HIV; issues around stigma of testing, and treatment. Statistics of epidemic in Sub-Saharan Africa; response of communities, governments, and NGOs; impact of programs designed to address needs of vulnerable populations. Consequences of grief and trauma, as well as malnutrition and starvation, on the well being of vulnerable children.

4 units, Spr (Solvason, H)

### OSPCPTWN 35. Political Economy of Aids

Introduction to AIDS epidemiology, pathogenesis and treatment; social and historical roots of AIDS in Africa; relationship between AIDS, sex and poverty; AIDS policy in South Africa (including AIDS denialism and the problem of stigma in rolling out antiretroviral treatment); demographic modeling of the AIDS epidemic (using publicly available modeling packages: EPP, Spectrum and ASSA2003lite); AIDS leadership at national and civil society level and financing the fight against AIDS. GER:DB-SocSci

5 units, Win (Natrass, N)

### OSPCPTWN 36. The Archaeology of Southern African Hunter Gatherers

Archaeology, history and ethnography of the aboriginal hunter gatherers of southern Africa, the San people. Formative development of early modern humans and prehistory of hunters in southern Africa before the advent of herding societies; rock paintings and engravings of the subcontinent as situated in this history. Spread of pastoralism throughout Africa. Problems facing the des-

endants of recent hunter gatherers and herders in southern Africa, the Khoisan people. GER:DB-SocSci

5 units, Spr (Parkington, J)

#### **OSPCPTWN 37. Independent Projects in Assessing Program Efficacy**

Enrollment in OSPCPTWN 34 or permission of instructor required. Evaluation research on programs in the Western Cape that serve vulnerable children. Assess data showing whether a program serves a specific need. Attempt to find data supporting the efficacy, or lack of impact, a particular program may have. Write a detailed description of the program itself, how it has been implemented, and identifying the strengths and challenges in making a particular program successful. Assessments include interviews with staff and observations at sites served by the program.

2-4 units, Spr (Staff)

#### **OSPCPTWN 38. Genocide: The African Experience**

Genocide as a major social and historical phenomenon, contextualized within African history. Time frame ranging from the extermination of indigenous Canary Islanders in the fourteenth and fifteenth centuries to more recent mass killings in Rwanda and Darfur. Emphasis on southern African case studies such as Cape San communities and the Herero people in Namibia. Themes include: roles of racism, colonialism and nationalism in the making of African genocides. Relevance of other social phenomena such as modernity, Social Darwinism, ethnicity, warfare and revolution. Comparative perspective to elucidate global dimensions. GER:DB-SocSci

3 units, Win (Adhikari, M)

#### **OSPCPTWN 40. Education in the Post-Apartheid City**

The changing schooling landscape in the post apartheid city. How the desire for quality schooling is constructed and understood in light of the lived practices that people establish in and across the city's geographies. How schools establish their identities in relation to the complex urban processes in the post-apartheid city. Role of culture, politics and economics in making the cultures of schools in the city. The lived spatial dimensions of schools and schooling processes and practices in the city and the institutional and individual subjectivities they spawn in the city's diverse spaces. GER:DB-SocSci

4 units, Spr (Fataar, A; Badroodien, A)

#### **OSPCPTWN 41. Race and the Division of Labor in South Africa: A Historical Perspective**

Process of industrialization in South Africa, how it simultaneously depended on and contributed to the racial division that characterized the pre-1994 era; consequences in the post-apartheid workplace. Transformation of the economic sector from agriculture to mining and manufacturing through the opening up of South Africa to the global economy. Role of the state and its relationship with labor and capital as molded by race and class.

4 units, Spr (Staff)

#### **OSPCPTWN 42. Race, Class, and Status: Cape Town in Comparative Perspective**

Economic and social stratification, focusing on Cape Town, in the context of other multi-racial or multi-cultural contexts in South Africa and elsewhere. Historical analyses from broadly Weberian and Marxist perspectives, concerned primarily with caste and class. Changing understandings of race, and the relationship between these and status. Quantitative and ethnographic data on contemporary, post-apartheid Cape Town; the ways in which race, class and status shape identities, interactions and other aspects of people's everyday lives. GER:DB-SocSci

5 units, Win (Seekings, J)

#### **OSPCPTWN 44. Negotiating Home, Citizenship and the South African City**

Material and socio-cultural dimensions of the multiple spaces making up South African cities. The gendered, placed, sexual, and racial character of homes, neighborhoods, and cities. Ways in which crises such as housing shortages and tenure insecurity are materially and socially embodied in economically impoverished families and communities' lives. Interplay of this body politic with economic and political contexts in which the meaning of citizenship is crafted. Urban fieldwork with the Valhalla Park United Civic Front, a community-based organization in Cape Town. GER:DB-SocSci

4 units, Win (Oldfield, S)

#### **OSPCPTWN 65. Western Cape Sites of Memory**

Relation between conventional histories and different kinds of individual and collective memory that are focused on places and spaces, testing the relation between grand narratives and more particularized pasts. Questions of cultural heritage, in particular its contestations among individual, familial, local, national, and international interests. GER:DB-Hum, EC-GlobalCom

3-5 units, Win (Parker, G)

#### **OSPCPTWN 66. Apartheid and Aftermath: Modern South African Fiction**

Overview of the English-language novel in South Africa since 1948, its sociology, and its relation to other genres (including verse, drama and the short story) and to literature in other languages. Authors include Paton, Rive, LaGuma, Serote, Mzamane, Brink, Coetzee and Gordimer. GER:DB-Hum, EC-GlobalCom

3-5 units, Win (Parker, G)

## OVERSEAS STUDIES: FLORENCE (OSPFLOR) COURSES

#### **OSPFLOR 13. The Art in Structural Engineering**

Principles for analysis of buildings and bridges. Structural forms, such as trusses, beams, arches, frames and cables examined as art forms and fundamental building components. The evolution of these principles through study of key structures in Florence and nearby cities. Recommended: basic calculus. GER:DB-EngrAppSci

3 units, Spr (Kiremidjian, A)

#### **OSPFLOR 16. Science, Mathematics and Engineering in Renaissance Italy**

Impact of Galileo's scientific and mathematical achievements. Design of Leonardo's machines. Key innovations and long-term impact of mathematical and scientific achievements in Renaissance Italy. Field trips to Da Vinci museum.

1-2 units, Spr (Kiremidjian, A)

#### **OSPFLOR 18. Language Activities**

Opportunities to improve Italian language skills through guided discussions and meetings with Italian students. Activities take place at a number of locations throughout the city of Florence. May be repeated for credit. (AU)

1 unit, Aut (Quercioli, F), Win (Quercioli, F), Spr (Quercioli, F)

#### **OSPFLOR 21F. Accelerated Second-Year Italian, Part A**

Review of grammatical structures; grammar in its communicative context. Listening, speaking, reading, and writing skills practiced and developed through authentic material such as songs, newspaper articles, video clips, and literature. Insight into the Italian culture and crosscultural understanding.

5 units, Aut (Quercioli, F), Win (Quercioli, F), Spr (Quercioli, F)

#### **OSPFLOR 22F. Accelerated Second-Year Italian Part B,**

Grammatical structures, listening, reading, writing, speaking skills, and insight into the Italian culture through authentic materials. Intermediate to advanced grammar. Content-based course, using songs, video, and literature, to provide cultural background for academic courses.

5 units, Aut (Staff), Win (Quercioli, F), Spr (Staff)

#### **OSPFLOR 26. Greeks and Etruscans in the Archaeology of Ancient Italy**

Focus on the two pre-Roman cultures with the widest cultural and political significance in the Mediterranean: the Etruscans and the Greeks. Archaeological case studies such as Cerveteri, Tarquinia, Volterra, Paestum, Metapontum and Locris used to interrogate major cultural features: urban and territorial organizations and economy; visions of the after-life as expressed in painted tombs and religious architecture; views of other ethnicities. How these cultures shaped Italian history and the persistence of regionalism beyond their encounter with Rome. GER:DB-Hum

3-5 units, Aut (Ceserani, G)

#### **OSPFLOR 27. Ancients and Moderns in the Making of the Italian Nation**

Interplay of past and present in the representations of Italian identi-

ty that crystalized in the course of the 19th century and became crucial to the unification of the country. Contributions of both foreigners and Italians. Travelers' writings and selections from Italian political, literary, and visual culture used to explore how visions of past continue to reverberate in contemporary heritage politics and tourism. In English or Italian with sources from both languages. GER:DB-Hum

3-5 units, Aut (Ceserani, G)

**OSPFLOR 31F. Advanced Oral Communication: Italian**

Refine language skills and develop insight into Italian culture using authentic materials. Group work and individual meetings with instructor. Minimum enrollment required. Prerequisite: ITAL-LANG 22A, 23 or placement.

3 units, Aut (Quercioli, F), Win (Quercioli, F), Spr (Quercioli)

**OSPFLOR 34. The Woman in Florentine Art**

Influence and position of women in the history of Florence as revealed in its art. Sculptural, pictorial, and architectural sources from a social, historical, and art historical point of view. Themes: the virgin mother (middle ages); the goddess of beauty (Botticelli to mannerism); the grand duchess (late Renaissance, Baroque); the lady, the woman (19th-20th centuries). GER:DB-Hum, EC-Gender

4 units, Aut (Verdon, T)

**OSPFLOR 35. European Economic and Monetary Integration**

Historical overview of economic and monetary integration process in Western Europe. European Union institutions: the Commission, the Parliament, the European Council, the Council of Ministers, and the Court of Justice. Microeconomic theory of inter-industry and intra-industry trade and the case of EU. Microeconomics of integration: the costs and benefits, also applicable to NAFTA. The Lisbon Strategy as a European response to the challenges of globalization. The euro, the dollar and the international monetary system. Monetary and fiscal policies in EMU: the European Central Bank and the Stability and Growth Pact. Prerequisites: ECON 51, 52 or equivalent. GER:DB-SocSci, EC-GlobalCom

5 units, Aut (Della Posta, P)

**OSPFLOR 41. The Contemporary Art Scene in Tuscany: Theory and Practice**

The ever-changing and multifaceted scene of contemporary art through visual and sensorial stimulation. How art is thought of and produced in Italy today. Hands-on experience. Sketching and exercises on-site at museums and exhibits, plus workshops on techniques. Limited enrollment.

3-5 units, Aut (Rossi, F)

**OSPFLOR 42. Academic Internship**

Mentored internships in banking, education, the fine arts, health, Media, not-for-profit organizations, publishing, and retail. May be repeated for credit.

1-5 units, Aut (Staff), Win (Campani, E), Spr (Campani, E)

**OSPFLOR 44. The Revolution in Science: Galileo and the Birth of Modern Scientific Thought**

Galileo's life and scientific progress starting from his student years at the University of Pisa. Departure from traditional natural philosophy leading to radical reformation of cosmology and physics, emphasizing the science of motion. His innovative use of observation and measurement instruments, emphasizing the telescope. Cultural and social context. GER:DB-Hum

5 units, Win (Galluzzi, P)

**OSPFLOR 48. Sharing Beauty: Florence and the Western Museum Tradition**

The city's art and theories of how art should be presented. The history and typology of world-class collections. Social, economic, political, and aesthetic issues in museum planning and management. Collections include the Medici, English and American collectors of the Victorian era, and modern corporate and public patrons. GER:DB-Hum

4 units, Win (Rossi, F; Verdon, T)

**OSPFLOR 49. The Cinema Goes to War: Fascism and World War II as Represented in Italian and European Cinema**

Structural and ideological attributes of narrative cinema, and theories of visual and cinematic representation. How film directors have translated history into stories, and war journals into visual images. Topics: the role of fascism in the development of Italian cinema and its phenomenology in film texts; cinema as a way of producing and reproducing constructions of history; film narratives

as fictive metaphors of Italian cultural identity; film image, ideology, and politics of style. GER:DB-Hum

5 units, Win (Campani, E)

**OSPFLOR 50F. Introductory Science of Materials**

GER:DB-EngrAppSci

4 units, Aut (Staff, 1), Win (Staff, 1), Spr (Staff, 1)

**OSPFLOR 54. High Renaissance and Maniera**

The development of 15th- and early 16th-century art in Florence and Rome. Epochal changes in the art of Michelangelo and Raphael in the service of Pope Julius II. The impact of Roman High Renaissance art on masters such as Fra' Bartolomeo and Andrea del Sarto. The tragic circumstances surrounding the early maniera: Pontorno and Rosso Fiorentino and the transformation of early Mannerism into the elegant style of the Medicean court. Contemporary developments in Venice. GER:DB-Hum

5 units, Spr (Verdon, T)

**OSPFLOR 55. Academy of Fine Arts: Studio Art**

Courses through the Accademia delle Belle Arti. Details upon arrival. Minimum Autumn and Winter Quarter enrollment required; 1-3 units in Autumn. May be repeated for credit.

1-5 units, Aut (Staff, 1), Win (Staff, 1), Spr (Staff, 1)

**OSPFLOR 56. University of Florence Courses**

1-5 units, Aut (Campani, E), Win (Campani, E), Spr (Campani, E)

**OSPFLOR 58. Space as History: Urban Change and Social Vision in Florence 1059-2008**

A thousand years of intentional change in Florence. Phases include programmatic enlargement of ecclesiastical structures begun in the 11th century; aggressive expansion of religious and civic space in the 13th and 14th centuries; aggrandizement of private and public buildings in the 15th century; transformation of Florence into a princely capital from the 16th through the 18th centuries; traumatic remaking of the city's historic core in the 19th century; and development of new residential areas on the outskirts and in neighboring towns in the 20th and 21st centuries. GER:DB-Hum

4 units, Spr (Rossi, F; Verdon, T)

**OSPFLOR 64. The Future of Mediterranean Marine Ecosystem: Human Impacts and Conservation**

Emerging environmental issues affecting the Mediterranean Sea and coastal regions. Loss of marine ecosystem functions and services critical to human well-being due to overexploitation of resources, degradation of coastal and benthic habitat from coastal development and destructive fishing practices, pollution, and climate warming. Current policies and legal frameworks to address threats, policies under consideration at local, regional, and EU levels. GER: DB-NatSci

3 units, Spr (Micheli, F)

**OSPFLOR 65. Historical Ecology of the Mediterranean Sea**

Alterations of Mediterranean ecosystems caused by use of marine resources over time. Historical changes in patterns of use of marine resources and their consequences as reported by natural scientists; changes that can be inferred from paintings, mosaics, museum collections, and architectural features. Linking ecology and marine biology to history and anthropology using recent publications and the scientific and artistic cataloging and representation of nature found in Florence and nearby.

2 units, Spr (Micheli, F)

**OSPFLOR 67. Women in Italian Cinema: Maternity, Sexuality, and the Image**

Film in the social construction of gender through the representation of the feminine, the female, and women. Female subjects, gaze, and identity through a historical, technical, and narrative frame. Emphasis is on gender, identity, and sexuality with references to feminist film theory from the early 70s to current methodologies based on semiotics, psychoanalysis, and cultural studies. Advantages and limitations of methods for textual analysis and the theories which inform them. Primarily in Italian. GER:DB-Hum, EC-Gender

4 units, Spr (Campani, E)

**OSPFLOR 69. The "You" No One Knows: Self Expression through Abstract Art**

Overview of the birth and evolution of abstract art with visual background necessary to produce works of art free of a realistic representation. Movements and trends in abstract art; experimenta-

tion with different Media and techniques.

4 units, Win (Rossi, F)

**OSPFLOR 71. Becoming an Artist in Florence: Contemporary Art in Tuscany and New Tendencies in the Visual Future**

Recent trends in art, current Italian artistic production, differences and the dialogue among visual arts. Events, schools, and movements of the 20th century. Theoretical background and practical training in various Media. Work at the Stanford Center and on site at museums, exhibits, and out in the city armed with a sketchbook and camera. Emphasis is on drawing as the key to the visual arts. Workshops to master the techniques introduced. Limited enrollment.

3-5 units, Spr (Rossi, F)

**OSPFLOR 78. An Extraordinary Experiment: Politics and Policies of the New European Union**

Institutional design of EU, forthcoming changes, and comparison of the old and new designs. Interactions between the EU, member states, organized interests, and public opinion. Major policies of the EU that affect economics such as competition or cohesion policies, market deregulation, and single currency. Consequences of the expansion eastwards. The role of institutions as a set of constraints and opportunities for the economic actors; relationships between political developments and economic change in the context of regional integration; lessons for other parts of the world. GER:DB-SocSci, EC-GlobalCom

5 units, Win (Morlino, L)

**OSPFLOR 79. Migrations and Migrants: The Sociology of a New Phenomenon**

Interdisciplinary approach to the study of immigration. Typology of forms of migration through politics put into action by the EU and within single nations. Related cultural and religious questions which elicit symbolic borders, territorialization of cultural identities, and the often spatial differentiation of immigrants and locals. The politics of integration and the instruments necessary to manage it. GER:DB-SocSci, EC-GlobalCom

5 units, Spr (Allam, K)

**OSPFLOR 81. Roman Literature: A Critical Introduction**

Key problems and issues in critical studies of Latin literature: reception, chronology, genres, sociology, intertextuality. Open to undergraduates with no prior knowledge of Latin; graduate students rehearse topics and methods of literary history and prepare papers and presentations based on Latin texts.

5 units, Win (Barchiesi, A)

**OSPFLOR 82. Classical Antiquity in Italy**

Introduction to the use of Classics in the Italian Renaissance, taking advantage of the location in Florence. Rediscovery of antiquity in a new context. Emphasis on the Media and context of cultural transmission; reading of texts by the Italian Humanists accompanied by visits to key monuments and locations; examples taken from the world of art and of manuscripts. GER:DB-Hum

5 units, Win (Barchiesi, A)

**OSPFLOR 106V. Italy: From Agrarian to Postindustrial Society**

Italian history from the Risorgimento to the present. Society, crises, evolution, values, and the relation to the political institution in different periods. The ideologies, political doctrines, and historical events which contributed to the formation of modern Italy's predominant subcultures: Catholic and Socialist. GER:DB-SocSci, DB-SocSci, EC-GlobalCom

5 units, Aut (Mammarella, G)

**OSPFLOR 111Y. From Giotto to Michelangelo: Introduction to the Renaissance in Florence**

Lectures, site visits, and readings reconstruct the circumstances that favored the flowering of architecture, sculpture, and painting in Florence and Italy, late 13th to early 16th century. Emphasis is on the classical roots; the particular relationship with nature; the commitment to human expressiveness; and rootedness in the real-world experience, translated in sculpture and painting as powerful plasticity, perspective space, and interest in movement and emotion. GER:DB-Hum

4 units, Win (Verdon, T)

**OSPFLOR 115Y. The Duomo and Palazzo della Signoria: Symbols of a Civilization**

The history, history of art, and symbolism of the two principal monuments of Florence: the cathedral and the town hall. Common meaning and ideological differences between the religious and civic symbols of Florence's history from the time of Giotto and the first Guelph republic to Bronzino and Giovanni da Bologna and the Grand Duchy. GER:DB-Hum

4 units, Aut (Verdon, T)

**OSPFLOR 134F. Modernist Italian Cinema**

As the embodiment of modernity, cinema develops in the wake of modernism proper, but can be understood as one of its technological and aesthetic expressions. Topics: cinema's archaeology in futurist texts and theories with their nationalistic political flavor and their iconoclastic, radical, and interdisciplinary rethinking of the language and form of all the arts (Marinetti, Pirandello, D'Annunzio). GER:DB-Hum

5 units, Aut (Campani, E)

## OVERSEAS STUDIES CONSORTIUM IN KYOTO—KCJS (OSPKYOCT) COURSES

**OSPKYOCT 103A. Third-Year Japanese I**

Preparation for function beyond basic level in a Japanese-speaking environment by developing and enhancing communicative competence through: review of basic grammar; new grammar; reading short essays and articles with help of dictionary; short writing and speaking assignments using formal style to describe, explain, and discuss sociocultural topics; enhancing listening comprehension.

12 units, Aut (Staff)

**OSPKYOCT 103B. Third-Year Japanese II**

Preparation for function beyond basic level in a Japanese-speaking environment by developing and enhancing communicative competence through: review of basic grammar; new grammar; reading short essays and articles with help of dictionary; short writing and speaking assignments using formal style to describe, explain, and discuss sociocultural topics; enhancing listening comprehension.

12 units, Win (Staff)

**OSPKYOCT 104A. Fourth-Year Japanese I**

Emphasis on applications of correct grammar and strengthening academic communication skills through: reading longer essays, articles, and novels with some dictionary work; reading and writing assignments in paragraph format using formal style to describe, explain and discuss sociocultural topics; developing listening comprehension.

12 units, Aut (Staff)

**OSPKYOCT 104B. Fourth-Year Japanese II**

Emphasis on applications of correct grammar and strengthening academic communication skills through: reading longer essays, articles, and novels with some dictionary work; reading and writing assignments in paragraph format using formal style to describe, explain and discuss sociocultural topics; developing listening comprehension.

12 units, Win (Staff)

**OSPKYOCT 105A. Fifth-Year Japanese I**

For students with advanced proficiency. Goals include advanced command of grammar, composition, and stylistics. Emphasis is on academic Japanese preparing students to audit classes at a Japanese university.

12 units, Aut (Staff)

**OSPKYOCT 105B. Fifth-Year Japanese II**

For students with advanced proficiency. Goals include advanced command of grammar, composition, and stylistics. Emphasis is on academic Japanese preparing students to audit classes at a Japanese university.

12 units, Win (Staff)

**OSPKYOCT 108. Lost in Translation**

The art and practice of translating literary texts from a variety of periods and genres. Strategies for translation and essays on transla-

tion by literary translators and theorists. Notable translations of Japanese literature in connection with the original texts. Students develop individual translation projects.

6 units, Spr (Staff)

**OSPKYOCT 126. Japanese-American Cultural Interchange in a Global Age**

Joint class with Japanese students from Doshisha University focusing on ways in which culture, particularly popular culture, carries from Japan to America and from American to Japan. Theories of cultural globalization; use of topics such as Hello Kitty, hip-hop, sushi and McDonald's as a lens to understand complex processes of cultural interactions. Topics include: changing boundaries of Japanese and American cultures, identity productions, nationalism, and creativity and play.

6 units, Aut (Staff)

**OSPKYOCT 132. Japanese Growth and Business Development**

History, structure, and operation of the Japanese economy and business. Emphasis is on structural and institutional factors in the maturity and decline of Japan's international competitiveness since the early 80s. Field trips and films complement lectures and student presentations.

6 units, Aut (Staff), Win (Staff)

**OSPKYOCT 145. Postwar Fiction and Film in Japan**

Topics include literary and cinematic representation of Japan's war experience and post-war reconstruction, negotiation with Japanese "tradition," exploration of alternative political ideologies, and changing norms of gender and sexuality. Cinematic adaptation of post-war fiction. Analysis of genres including film and film scripts, novels, short stories, and academic essays.

6 units, Aut (Staff)

**OSPKYOCT 150. Japanese Civilization**

From the stone age to the present, main features of Japanese civilization, contexts in which they developed, and their function in today's world. Contemporary Japanese people's views on their culture and tradition; important debates and controversies.

6 units, Aut (Staff), Win (Staff)

**OSPKYOCT 161. Kyoto: The Past in the Present**

Exploration and observation of the city of Kyoto as a means of understanding its long and complex history; changing connections between past and present. Topics include: nature in the city; Raku tea ceramics; Kyoto street plan; survival of Genji monogatari; Buddhist cemeteries; public baths; Biwako Canal.

6 units, Aut (Staff)

**OSPKYOCT 165. Kyoto Houses and the Japanese Lifestyle**

Built environment of Kyoto and the Kansai area with a focus on housing and its historical and cultural background. Overview of major periods of Japanese history from Heian to present as framework to study characteristics of Japanese architecture: asymmetry versus symmetry, relation of inside and outside, ambiguity of space, living with the seasons.

6 units, Aut (Staff)

**OSPKYOCT 167. Japanese Woodblock Print: Ukiyo-e into Hanga**

The woodblock print's perceived plebeian origins in realms such as entertainment and advertising to the adaptation of the medium to the Meiji period's publishing industry and its elevation as a medium of fine art. Artistic, social, economic, and global significance of prints from the Edo period to the present. Visits to local exhibitions featuring Edo, modern, and international prints.

6 units, Spr (Staff)

**OSPKYOCT 186. Japanese Theater**

Japanese theatrical tradition in historical and comparative contexts. Areas of theatrical experience: script, acting, stage design, costumes, music, audience. Field trips to both classical and contemporary theater performances.

6 units, Aut (Staff)

**OSPKYOCT 189. Japanese Religion in Context**

The emergence of modernity in Japan by tracing shifts in styles of religious, cultural, and social writings in and about Japan. Analysis of texts to interpret religious consciousness as found in Japan today. Readings from philosophical works; topics in art and architecture. Field trips to religious and cultural institutions in Kansai area.

6 units, Spr (Staff)

**OSPKYOCT 197. Independent Studies**

Focused research using the Japanese language and taking advantage of local Kyoto resources. Directed reading and research, weekly meetings with professor, and final research paper. For full-year students with language skills adequate for the proposed research.

6 units, Spr (Staff)

**OSPKYOCT 198. Women's Issues in Japan**

Women's issues as related to men's issues in Japan. The house system and the legalized prostitution system in modern Japan. Topics include marriage, gender division of labor, child bearing, contraception, and domestic violence. How the private sphere is influenced by the public sphere including politics, economy, and culture.

6 units, Spr (Staff)

## OVERSEAS STUDIES: KYOTO— SCTI (OSPKYOTO) COURSES

**OSPKYOTO 9K. First-Year Japanese Language, Culture, and Communication B**

5 units, Spr (Staff, 1)

**OSPKYOTO 17R. Religion and Japanese Culture**

Major religious traditions of Japan. Topics include: relation between religion and culture; ancient Japanese religion and Shinto; Buddhist schools of Heian Japan; Zen Buddhism as it flourished in the Kamakura period; Confucianism, as originally conceived in ancient China and as transmitted to Japan in the Edo period in its neo-Confucian form; characteristic modern practices. Field trips to religious centers to observe current religious practices. GER:DB-Hum, EC-GlobalCom

4-5 units, Spr (Ludvik, C)

**OSPKYOTO 19K. Second-Year Japanese Language, Culture, and Communication B**

5 units, Spr (Staff, 1)

**OSPKYOTO 21. Research Project**

Independent research projects on aspects of Japanese culture, society, or public policy. Students interested in developing the project as a web page should take a home campus class on creating web pages or have equivalent experience.

2-3 units, Spr (Staff)

**OSPKYOTO 33. Digital Systems II**

The design of processor-based digital systems. Instruction sets, addressing modes, data types. Assembly language programming, low-level data structures, introduction to operating systems and compilers. Processor microarchitecture, microprogramming, pipelining. Memory systems and caches. Input/output, interrupts, buses and DMA. System design implementation alternatives, software/hardware tradeoffs. Labs involve the design of processor subsystems and processor-based embedded systems. Prerequisite: 108A, CS 106B.

3-4 units, Spr (Kozyrakis, C)

**OSPKYOTO 40K. Introductory Electronics**

Electrical quantities and their measurement, including operation of the oscilloscope. Function of electronic components including resistor, capacitor, and inductor. Analog circuits including the operational amplifier and tuned circuits. Digital logic circuits and their functions. Lab assignments. Prerequisite: PHYSICS 43. GER:DB-EngrAppSci

5 units, Spr (Howe, R)

**OSPKYOTO 47. Introduction to Japanese Anthropology**

Topics include the cultural construction of the Japanese self, youth culture, gender, Japanese ethnic minorities, globalization, and biomedicine. Ethnographic research in Kyoto; reading of ethnographic descriptions of Japan and the Japanese. Hands-on experience of anthropological research including ethnographic methods, techniques, and writing.

5 units, Spr (Inoue, M)

**OSPKYOTO 48. City and Sounds in Kyoto**

City of Kyoto as a listening experience and the ways this experience conveys the physical sense of the City. How can sound

represent a particular place? How do people experience Kyoto through auditory channels, and how does and did sound mediate and constitute Kyoto as cultural space? Mini sound-ethnographic projects employing digital recording of everyday sound in a range of sites in Kyoto.

5 units, Spr (Inoue, M)

#### **OSPKYOTO 60. Japan in World War II: Experiences and Memory**

How various segments of Japanese society view the war in Asia, where fault lines lie, and what attempts have been made to achieve reconciliation. Topics include: origins of the Asia-Pacific War; foreign and domestic images of Japan's wartime actions; American Occupation policy and the Tokyo war crimes trial; impact of peace movements and the Cold War; the emergence of conflicting postwar narratives about the war; Asian perceptions of postwar Japan; the institutionalization of public memory; attempts and failures at reconciliation with Japan's neighbors; comparisons with Europe.

5 units, Spr (Duus, P; Horvat, A)

#### **OSPKYOTO 129K. Third-Year Japanese Language, Culture, and Communication B**

5 units, Spr (Staff, 1)

#### **OSPKYOTO 211K. Upper Advanced Japanese**

5 units, Spr (Staff, 1)

#### **OSPKYOTO 215X. The Political Economy of Japan**

Institutions and processes in the political organization of economic activity in modern Japan. The interaction of public and private sector institutions in the growth of Japan's postwar economy. The organization and workings of key economic ministries and agencies of the government, private sector business groupings, government interaction, and public policy making. The transformation of Japanese industrial policy from the rapid growth of heavy and chemical industries to the promotion of high technology and communications industries. The international, political, and economic ramifications of the structure and importance of Japanese capitalism. GER:DB-SocSci

4-5 units, Spr (Hayashi, T)

## OVERSEAS STUDIES: MADRID (OSPMADRD) COURSES

#### **OSPMADRD 12M. Accelerated Second-Year Spanish I**

Intensive sequence integrating language, culture, and geo/sociopolitics of Spain. Emphasis is on achieving advanced proficiency in oral and written discourse, including formal and informal situations, presentational language, and appropriate forms in academic and professional contexts. Prerequisite: one year of college Spanish or 11 or 21B more than two quarters (six months) prior to arriving in Madrid.

5 units, Aut (Cambor Portilla, M), Win (Cambor Portilla, M), Spr (Cambor Portilla, M)

#### **OSPMADRD 13M. Accelerated Second-Year Spanish II**

Intensive sequence integrating language, culture, and geo/sociopolitics of Spain. Emphasis is on achieving advanced proficiency in oral and written discourse, including formal and informal situations, presentational language, and appropriate forms in academic and professional contexts. Prerequisite: 11 or 21B within two quarters (six months) of arriving in Madrid or 12 or 22B.

5 units, Aut (Cambor Portilla, M), Win (Cambor Portilla, M), Spr (Cambor Portilla, M)

#### **OSPMADRD 14. Introduction to Spanish Culture**

Required for Madrid students. Spain's historical, physical, and sociocultural diversity. Includes a weekend study trip and other cultural encounters. Linguistic skills and cultural knowledge through museum visits, readings, and writing a paper in Spanish. Study trips: Autumn Quarter to Cantabria-León and Basque country; Winter Quarter to Andalusia and Extremadura; Spring Quarter to Catalonia and Galicia.

1 unit, Aut (Tejerina-Canal, S), Win (Tejerina-Canal, S), Spr (Tejerina-Canal, S)

#### **OSPMADRD 15. Flamenco Dance**

Practical instruction. The rhythms and styles of flamenco and the expression of feelings proper to this art form which synthesizes song, music, and dance. Zapateado (footwork), braceo (arm positions and movement technique), and choreographies, including Rumba flamenca and Sevillanas. Enrollment limited. May be repeated for credit.

1 unit, Aut (Murcia Cánovas, L), Win (Murcia Cánovas, L), Spr (Murcia Cánovas, L)

#### **OSPMADRD 18. Ecology of Spain**

Basics of ecology and evolutionary biology with field trips to examine some of the ecosystems of Spain. Impact of history and human activity on the ecology of Spain: similarities between the ecology of some parts of Spain and that of coastal California compared to differences in history of human use, including agriculture and the import of exotic species. GER: DB-NatSci

3 units, Spr (Gordon, D)

#### **OSPMADRD 19. Independent Study on Selected Topics in Ecology of Spain**

Possible topics include: urban animal behavior, e.g. pigeons, or squirrels, with observation, data collection and analysis; invasion ecology looking at the Argentine ant and differences in rate of spread in California vs Mediterranean coastline; history of ideas in Spanish literature or art regarding open space, wilderness and nature. Weekly meetings to review progress and discuss goals of the project.

2 units, Spr (Staff)

#### **OSPMADRD 20. Sustainability of the Natural, Built and Social Environments of Spain**

Historical and contemporary building in Spain from the perspectives of the triple bottom line of sustainability over time: equity, ecology and economy. Using field trip observations, personal considerations from theory, and structured interviews of local stakeholders, analyze functions and behaviors and assess the roles of natural and built elements on local and national communities. Discussions with local students.

2 units, Win (Kunz, J)

#### **OSPMADRD 21. Built Environmental History of Spain**

Built features of the environment in the context of the history, geography, and self-perceptions of the people and the place. Design and use of the built environment from the perspectives of geography, the evolving economy of the region and the country, the cultural heritage of the people, and changing national governance. Field trips include national economic centers and a small community outside Madrid. GER:DB-EngrAppSci

3 units, Win (Kunz, J)

#### **OSPMADRD 33. Spanish Language Tutorial**

May be repeated for credit. Prerequisite: three years of Spanish at Stanford or placement.

2 units, Aut (Cambor Portilla, M), Win (Cambor Portilla, M), Spr (Cambor Portilla, M)

#### **OSPMADRD 40. Introduction to Literary and Cultural Analysis in the Spanish World**

Technical and cultural vocabulary and methods to examine literary criticism in the literary genres, movements, and history of literature written in Spanish. Skills to consider Spanish texts critically. GER:DB-Hum

4-5 units, Aut (Tejerina-Canal, S)

#### **OSPMADRD 41. Dissidence and Continuity: Spanish Theater, 1907 to the Present**

Tradition, transformation, experimentation, rupture, renovation, and innovation in the theater in Spain as a reflection of the artistic, social and historical commotion that led to the Spanish Civil War, Franco, and the present democratic monarchy. Ortega y Gasset, Benavente, Grau, Valle-Inclán, García Lorca, Buero Vallejo, Sastre, Arrabal, Fernán Gómez, Paloma Pedrero, Yolanda Pallin or other playwrights who may be staged in Madrid theaters. GER:DB-Hum

4-5 units, Win (Tejerina-Canal, S)

#### **OSPMADRD 42. A European Model of Democracy: The Case of Spain**

Current Spanish political system, its main judicial and political institutions, outstanding actors' and the political process of the last

decade. Historic antecedents; immediate precedents; and the current political system and life. Relation between the elements that constitute a political system; results of the process of democratization; integration to the EU. GER:DB-SocSci

5 units, Win (*Bobillo de la Peña, F*)

**OSPMADR 43. The Jacobean Star Way and Europe: Society, Politics and Culture**

The Saint James' Way as a tool to understand historic dynamics from a global perspective. Its effect on the structures that form a political and institutional system, and its society, economy, and ideology. GER:DB-Hum

5 units, Spr (*Larrañaga Zulueta, M*)

**OSPMADR 45. Women in Art: Case Study in the Madrid Museums**

Viewing the collections at the Prado Museum through study and analysis of the representations of women. Contemporary literary texts and images that situate paintings in the historical, social, and political conditions that produced the works. GER:DB-Hum, EC-Gender

4 units, Win (*Doménech López, J*)

**OSPMADR 46. Drawing with Four Spanish Masters: Goya, Velázquez, Picasso and Dalí**

Approaches, techniques, and processes in drawing. Visits to Madrid museums to study paintings and drawings by Goya, Velázquez, Picasso, and Dalí and to explore the experience of drawing. Subject matter: the figure, still life, interiors, landscape, and non-representational drawing. No previous experience required. Enrollment limited.

3 units, Aut (*Sartarelli, S*)

**OSPMADR 50. Flirting with Spanish Metafiction: Cervantes, Velázquez, Fuentes, Amodovar**

Literary theory and critical analysis of peninsular and Latin American texts. Emphasis is on the origins and development of self-conscious fiction (metafiction). Works by Cervantes, Velázquez, Unamuno, Borges, Fuentes, Torrente Ballester, and Almodóvar. Attendance at music, art, cinema, and Spanish novelist events. In Spanish. GER:DB-Hum

4-5 units, Spr (*Tejerina-Canal, S*)

**OSPMADR 54. Contemporary Spanish Economy and the European Union**

Concepts and methods for analysis of a country's economy with focus on Spain and the EU. Spain's growth and structural change; evolution of Spain's production sectors, agriculture, industry, and services; institutional factors such as the labor market and public sector; Spain's economic international relations, in particular, development of the EU, institutional framework, economic and monetary union, policies related to the European economic integration process, and U.S.-EU relationship. GER:DB-SocSci

5 units, Aut (*Bunuel, M*)

**OSPMADR 57. Health Care: A Contrastive Analysis between Spain and the U.S.**

History of health care and evolution of the concept of universal health care based on need not wealth. Contrast with system in U.S. Is there a right to health care and if so, what does it encompass? The Spanish health care system; its major successes and shortcomings. Issues and challenges from an interdisciplinary perspective combining scientific facts with moral, political, and legal philosophy. GER:DB-SocSci

5 units, Spr (*de Lora del Toro, P*)

**OSPMADR 60. Integration into Spanish Society: Service Learning and Professional Opportunities**

Engagement with the real world of Madrid through public service work with NGOs and public service professions such as teaching. Depending on availability, topics relevant to present-day Spain may include: the national health plan, educational system, immigration, prostitution, refugees, youth, and fair trade. Fieldwork, lectures, and research paper. Limited enrollment. May be repeated for credit. Prerequisite: two years of college level Spanish or equivalent.

5 units, Aut (*Klaiber, S*), Win (*Klaiber, S*), Spr (*Klaiber, S*)

**OSPMADR 61. Society and Cultural Change: The Case of Spain**

Complexity of socio-cultural change in Spain during the last three

decades. Topics include: cultural diversity in Iberian world; social structure; family in Mediterranean cultures; ages and generations; political parties and ideologies; communication and consumption; religion; and leisure activities. GER:DB-SocSci

5 units, Aut (*Munoz Carrion, A*)

**OSPMADR 62. Spanish California: Historical Issues**

Spanish exploration and colonization of California from the 16th century to the end of the Spanish colonial period in 1821. Themes include: geographical explorations in the context of European colonial expansion; demographic evolution of Native American inhabitants and immigrant population; general social and economic development of the colony; controversies surrounding the mission system; role of the Pacific coasts of North America in the Spanish enlightenment and in strategies for imperial defense and development in the revolutionary era of the late 18th and early 19th centuries.

5 units, Spr (*Hilton, S*)

**OSPMADR 63. Spanish Society Through the Eye of the Camera**

Introduction to contemporary Spain through magazine and newspaper articles and writings of well known political historians or sociologists to understand economic development and social progress in Spain during the last two decades. Comparison with films of representative contemporary Spanish directors such as Pedro Almodóvar, Alejandro Amenabar, Iciar Bollain, Fernando Leon de Aranoa, Chus Gutiérrez, Achero Manas, Ines Paris, Helena Taberna, and Benito Zambrano as well as veteran film makers such as Montxo Armendariz and Imanol Uribe. Issues and challenges of contemporary Spanish society. GER:DB-Hum

3 units, Aut (*Haro, P*)

**OSPMADR 64. Selected Topics in Spanish Culture**

Independent study in one of the following areas: Contemporary Spanish Women Writers; Spanish Women Film-Directors; Immigration Laws of Spain vs. US Laws; The Law of Historical Memory. Weekly meetings to review progress and set goals.

2-4 units, Aut (*Staff*)

**OSPMADR 71. Sociology of Communication**

Understanding the sociocultural diversity of communication in Spain with the help of theoretical and practical tools. How communication happens through language and other means; significance of images in today's world; vision of the world produced by Media; problems of social communication from perspective of reception. Offered at the Universidad Complutense with an additional tutorial for Stanford students.

5 units, Spr (*Munoz Carrion, A*)

**OSPMADR 72. Issues in Bioethics Across Cultures**

Ethical dilemmas concerning the autonomy and dignity of human beings and other living creatures; principles of justice that rule different realms of private and public life. Interdisciplinary approach to assessing these challenges, combining scientific facts, health care issues, and moral philosophy. Sources include landmark bioethics papers.

5 units, Win (*de Lora del Toro, P*)

**OSPMADR 102M. Composition and Writing Workshop for Students in Madrid**

Advanced. Writing as craft and process, emphasizing brainstorming, planning, outlining, drafting, revising, style, diction, and editing. Students choose topics related to their studies. Prerequisite: 13, 23B, or equivalent placement.

3-5 units, Aut (*Cambolor Portilla, M*), Win (*Cambolor Portilla, M*), Spr (*Cambolor Portilla, M*)

## OVERSEAS STUDIES: MOSCOW (OSPMOSC) COURSES

**OSPMOSC 10M. Intensive First-Year Russian**

9 units, Aut (*Kurganova, L*)

**OSPMOSC 15. Academic Internship**

Placements in areas such as banking, finances, consulting, journalism, language teaching, and technology. Introduction to Russian society and work experience. Evaluation and analysis of experience.

rience in final academic paper.

2-3 units, Aut (Abashkin, A)

**OSPMOSC 31. Preparation for an Individual Social Research Project**

Developing interesting, worthwhile, and feasible social research projects focusing on Russia. Topic selection, literature review, research design, proposal writing. Group discussion of readings and of individual research project proposals.

1-4 units, Aut (Tuma, N)

**OSPMOSC 51M. Second-Year Russian**

5 units, Aut (Bolydyreva, T)

**OSPMOSC 57. Social Inequality in Socialist and Post-Socialist Societies**

Classical views of how societies are hierarchically organized in ways that perpetuate social inequality in power, wealth, income, and prestige. Extent to which various socialist/communist societies eliminated social classes and inequalities, the extent and nature of social inequalities in the Soviet era, and the social bases of those inequalities. Comparison of inequalities in power and material well-being in the USSR and Russia with inequalities in other socialist, post-socialist, and transitional societies, especially China. GER:EC-GlobalCom

3-5 units, Aut (Tuma, N)

**OSPMOSC 62. Economic Reform and Economic Policy in Modern Russia**

Russian economic history in the 20th century. Reasons and logic for economic transformation, major components of postcommunist economic transformation doctrine, and results of practical implementation. Mechanisms of economic policy decision making in modern Russia, and patterns of and alternatives in economic development. GER:DB-SocSci, EC-GlobalCom

5 units, Aut (Mau, V; Novikov, V)

**OSPMOSC 72. Space, Politics, and Modernity in Russia**

The idea of space as a key to understanding Russian politics and governance, economy, society, and culture. Phenomenology of Russian space: structure, topology, and features, including notions of enormity. Space in its relation to state power; how geography shaped Russian history and politics. Reification of space-state relationship on levels such as economy, politics and administration, security and social mobility, nationalism and imperialism, culture and language, and habits and ways. GER:DB-SocSci, EC-GlobalCom

5 units, Aut (Medvedev, S)

**OSPMOSC 74. Post-Soviet Eurasia and SCO: Society, Politics, Integration**

Analysis of the opportunities and challenges for political, economic, and military cooperation within the Shanghai Cooperation Organization (SCO). Likelihood of SCO's aspirations being realized and the potential of its becoming a political and military counterbalance to the West. Issues related to national security and security perceptions of post-Soviet states and China, their economic and energy ambitions and needs, and the role of external players in the region. GER:DB-SocSci, EC-GlobalCom

5 units, Aut (Bratersky, M; Kortunov, S)

**OSPMOSC 78. Russian-American Relations: from the War of Independence to the War on Terror**

Relations between Russia and the U.S. since the eighteenth century with an introduction covering the period prior to the American Revolution. GER:DB-SocSci

5 units, Aut (Ivanian, E)

**OSPMOSC 111M. Third-Year Russian**

5 units, Aut (Filatova, G)

**OSPMOSC 177M. Fourth-Year Russian**

5 units, Aut (Shishkina, I)

## OVERSEAS STUDIES: OXFORD (OSPOXFRD) COURSES

**OSPOXFRD 15. British Architecture and the Renaissance: 1500-1850**

The influence of classicism and the Renaissance. Insights into European art and architecture and the history of Britain from the Tudor era to the Industrial Revolution. Field trips; joint study trips to London and Florence. GER:DB-Hum

4-5 units, Aut (Tyack, G)

**OSPOXFRD 17. Novels of Sensation: Gothic, Detective Story, Prohibition, and Transgression in Victorian Fiction**

Literary and moral value of transgressive sub-genres of the novel; what they reveal about Victorian society's anxiety over prohibited elements in the domestic and public spheres. Sources include gothic and detective novels. GER:DB-Hum

4-5 units, Aut (Plaskitt, E)

**OSPOXFRD 18. Making Public Policy: An Introduction to Political Philosophy, Politics, and Economics**

UK and U.S. What should society look like? How should incomes be distributed? How should it be taxed? How much inequality is acceptable? The overlap of economics with practical politics through political philosophy behind the government decisions; how public policy ought to be formulated. Issues include poverty, environmental policy, trade and globalization, and transport. GER:DB-SocSci

4-5 units, Win (McMahon, R)

**OSPOXFRD 24. British and American Constitutional Systems in Comparative Perspective**

Introduction to the study of constitutions and constitutional systems of government. The workings of the British and American systems of government. Comparative study of the most important constitutional issues facing Britain and the U.S. such as how suspected terrorists should be treated in a time of war. How to think about fundamental constitutional questions. GER:DB-SocSci

4-5 units, Aut (McMahon, R)

**OSPOXFRD 26. Spirit, Mind, Brain: Evolving Understanding in Neurology/Neuroscience**

How thinking about the brain and the functions of thought and sensation evolved from ancient times to present. How scientific development was influenced by political and religious history, with a focus on the period of the 16th and 17th century when developments in Oxford played a central role in the birth of neurology as a field within medicine. Thomas Willis and natural philosophers with whom he interacted. Selected topics in modern neuroscience and role of new techniques in addressing questions in brain function.

3 units, Aut (Giffard, R)

**OSPOXFRD 27. Medical Ethics through Literature and Film**

Authors who have been or are physicians or with medical training, including John Keats, Anton Chekhov, Mikhail Bulgakov, William Carlos Williams, Atul Gawande, Sir Arthur Conan Doyle. Works about medicine or characters who have medical conditions affecting their lives and interactions with others. Practice of medicine and its effects on both physicians and patients, with attention to the ethical and moral issues intrinsic to health and disease. Topics: doctor patient relationship; infectious disease such as plague and TB; mental illness; death and dying; disability; surgery. GER:DB-Hum

4 units, Aut (Giffard, R)

**OSPOXFRD 35. Modern UK and European Government and Politics**

Background of main political systems in Europe and recent developments in European politics. Topics: Blair's constitutional reforms; the consequences of the German reunification; Berlusconi's rise to power in Italy; the extreme right in France and elsewhere; the single currency; the enlargement of the EU; and proposals for a constitution and their recent rejection by the French and Dutch electorates. GER:DB-SocSci

4-5 units, Spr (Cappocia, G)

**OSPOXFRD 40. Independent Study in Literature and Drama**  
Independent study projects in one of the following topics: British painting 1780 to present; representation of women in British theater; Renaissance drama; post-WW II existential drama (Beckett, Pinter, Bond); Shakespeare's late works; Shakespeare's tragic vision.

2-4 units, *Spr (Staff)*

**OSPOXFRD 47. The History of the Learned Book**

Key periods in the development of the learned book, including medieval manuscripts, the onset of printing and incunabula, the Bible, early modern scientific works, periodicals, and reference books. The author's economic and legal status, evolution of the book's form and structure, role of publishing technologies, economics of publishing, and the nature of the readership. Recent developments in digital access to related scholarly resources and the contribution that these networked and collaborative environments are making to developments in scholarship. GER:DB-Hum

3-4 units, *Win (Willinsky, J)*

**OSPOXFRD 48. Independent Studies in Book History**

3-4 units, *Win (Staff)*

**OSPOXFRD 53. Shakespeare and Friends: Adventures in English Theater**

Weekly attendance at theater productions combined with reading and discussion of texts and informal workshops in staging scenes. Shakespearean dramas as presented by the Globe and the Royal Shakespeare Company plus a selection of plays from musicals to new works in non-traditional theatrical venues. How scripts are turned into staged works; how to evaluate and discuss performance. Some scene work for insight into work of actors and designers, but no theatrical background required. GER:DB-Hum

5 units, *Spr (Friedlander, L)*

**OSPOXFRD 57. The Rise of the Woman Writer 1660-1860**

Emergence and rise of the professional woman writer from playwright and Royalist spy Aphra Behn (1640-89) to novelist and proto-feminist Charlotte Bronte (1816-55). How women writers dealt with criticism for writing publicly, placing each author and text in its historical and literary context. Range of poets, playwrights, and novelists including Eliza Haywood, Frances Burney, and Mary Elizabeth Braddon. Topics: gender roles and proto-feminism, the public versus the private sphere, sexuality, courtship and marriage. GER:DB-Hum

5 units, *Win (Plaskitt, E)*

**OSPOXFRD 66. Oxford: The Culture of the City**

History and culture of cities in Britain from Roman times to the present, with Oxford as a case study. Impact of social and economic change on Oxford's planning and architecture in relation to British urban history. Visits to central and suburban locations to examine physical and social structures of the city and to Roman and Georgian Bath to provide contrast to Oxford. GER:DB-Hum

3 units, *Aut (Chance, H)*

**OSPOXFRD 67. Art in Oxford**

Paintings and drawings in the collections of the University and colleges of Oxford and how they relate to key themes and critical approaches in the history of art. Themes include collecting and patronage, the impact of art historical scholarship on collections, drawing and its purposes, changing approaches to Renaissance art, symbolism and realism in 19th-century painting, and romantic and modern landscapes.

3 units, *Win (Chance, H)*

**OSPOXFRD 92. Britain and the Second World War**

Britain's economy, society, and culture after its participation throughout the whole length of the war, 1939-1945; subsequent relations with rest of the world. Chronological account and interpretation of participation; effect of the war on British people, especially civilians. Historical scholarship, contemporary writings, propaganda films and feature films, art and photography, and recent television documentaries with reminiscences of participants.

5 units, *Win (Tyack, G)*

**OSPOXFRD 98. Creative Writing Workshop**

Selection and combination; poetic language; metaphor and cohesion; setting and the pathetic fallacy; sentence variety; genres; dialogue; point of view; narrative positions; colors and senses; time management; plotting. Limited enrollment based on writing sample.

3 units, *Win (Kidd, H), Spr (Kidd, H)*

**OSPOXFRD 117W. Gender and Social Change in Modern Britain**

Changes in the social institutions, attitudes, and values in Britain over the past 20 years with specific reference to shifts in gender relations. Demographic, economic and social factors; review of theoretical ideas. Men's and women's shifting roles in a fast-moving society. GER:DB-SocSci, DB-SocSci

4-5 units, *Spr (Palmer, A)*

**OSPOXFRD 141V. European Imperialism and the Third World, 1870-1970**

European imperialism from its zenith in the late 19th century to the era of decolonization after WW II. The effects of Western imperialism in the Third World. The legacy of imperialism and decolonization to the modern world. GER:DB-SocSci, EC-GlobalCom

5 units, *Spr (Baker, A)*

**OSPOXFRD 163X. Shakespeare: Critical Commentary**

For English majors or minors only. Topics include the use of soliloquy, epilogues, alternation of prose and verse, rhetoric, meta-theatricality. Close reading technique. Taught jointly with students from St. Catherine's College. GER:DB-Hum

4-5 units, *Aut (Rowley, R)*

**OSPOXFRD 195A. Tutorial in Anthropology**

6-7 units, *Aut (Staff), Win (Staff), Spr (Staff)*

**OSPOXFRD 195B. Tutorial in Biology**

6-7 units, *Aut (Staff), Win (Staff), Spr (Staff)*

**OSPOXFRD 195C. Tutorial in Classics**

6-7 units, *Aut (Staff), Win (Staff), Spr (Staff)*

**OSPOXFRD 195D. Tutorial in Communication**

6-7 units, *Aut (Staff), Win (Staff), Spr (Staff)*

**OSPOXFRD 195E. Tutorial in Drama**

6-7 units, *Aut (Staff), Win (Staff), Spr (Staff)*

**OSPOXFRD 195F. Tutorial in Economics**

6-7 units, *Aut (Staff), Win (Staff), Spr (Staff)*

**OSPOXFRD 195G. Tutorial in Economic History**

6-7 units, *Aut (Staff), Win (Staff), Spr (Staff)*

**OSPOXFRD 195J. Tutorial in Jurisprudence**

6-7 units, *Aut (Staff), Win (Staff), Spr (Staff)*

**OSPOXFRD 195L. Tutorial in Health Care**

6-7 units, *Aut (Staff), Win (Staff), Spr (Staff)*

**OSPOXFRD 195M. Tutorial in History of Science**

6-7 units, *Aut (Staff), Win (Staff), Spr (Staff)*

**OSPOXFRD 195N. Tutorial in Human Biology**

6-7 units, *Aut (Staff), Win (Staff), Spr (Staff)*

**OSPOXFRD 195P. Tutorial: Interdisciplinary**

6-7 units, *Aut (Staff), Win (Staff), Spr (Staff)*

**OSPOXFRD 195R. Tutorial in International Relations**

6-7 units, *Aut (Staff), Win (Staff), Spr (Staff)*

**OSPOXFRD 195T. Tutorial in Literature**

6-7 units, *Aut (Staff), Win (Staff), Spr (Staff)*

**OSPOXFRD 195U. Tutorial in Music**

6-7 units, *Aut (Staff), Win (Staff), Spr (Staff)*

**OSPOXFRD 195V. Tutorial in Philosophy**

6-7 units, *Aut (Staff), Win (Staff), Spr (Staff)*

**OSPOXFRD 195Z. Tutorial in Political Science**

6-7 units, *Aut (Staff), Win (Staff), Spr (Staff)*

**OSPOXFRD 196A. Tutorial in Psychology**

6-7 units, *Aut (Staff), Win (Staff), Spr (Staff)*

**OSPOXFRD 196B. Tutorial in Religion**

6-7 units, *Aut (Staff), Win (Staff), Spr (Staff)*

**OSPOXFRD 196C. Tutorial in Sociology**

6-7 units, *Aut (Staff), Win (Staff), Spr (Staff)*

**OSPOXFRD 196E. Tutorial in History**

6-7 units, *Aut (Staff), Win (Staff), Spr (Staff)*

**OSPOXFRD 196F. Tutorial in History of Art**

6-7 units, *Aut (Staff), Win (Staff), Spr (Staff)*

**OSPOXFRD 196K. Tutorial in Zoology**

6-7 units, *Aut (Staff), Win (Staff), Spr (Staff)*

**OSPOXFRD 196M. Tutorial in Public Policy**

6-7 units, Aut (Staff), Win (Staff), Spr (Staff)

**OSPOXFRD 196N. Tutorial in Mathematics**

6-7 units, Aut (Staff), Win (Staff), Spr (Staff)

**OSPOXFRD 197A. Tutorial in Anthropology**

6-7 units, Aut (Staff), Win (Staff), Spr (Staff)

**OSPOXFRD 197B. Tutorial in Biology**

6-7 units, Aut (Staff), Win (Staff), Spr (Staff)

**OSPOXFRD 197C. Tutorial in Classics**

6-7 units, Aut (Staff), Win (Staff), Spr (Staff)

**OSPOXFRD 197E. Tutorial in Drama**

6-7 units, Aut (Staff), Win (Staff), Spr (Staff)

**OSPOXFRD 197F. Tutorial in Economics**

6-7 units, Aut (Staff), Win (Staff), Spr (Staff)

**OSPOXFRD 197J. Tutorial in Jurisprudence**

6-7 units, Aut (Staff), Win (Staff), Spr (Staff)

**OSPOXFRD 197L. Tutorial in Health Care**

6-7 units, Aut (Staff), Win (Staff), Spr (Staff)

**OSPOXFRD 197M. Tutorial in History of Science**

6-7 units, Aut (Staff), Win (Staff), Spr (Staff)

**OSPOXFRD 197N. Tutorial in Human Biology**

6-7 units, Aut (Staff), Win (Staff), Spr (Staff)

**OSPOXFRD 197P. Tutorial: Interdisciplinary**

6-7 units, Aut (Staff), Win (Staff), Spr (Staff)

**OSPOXFRD 197R. Tutorial in International Relations**

6-7 units, Aut (Staff), Win (Staff), Spr (Staff)

**OSPOXFRD 197T. Tutorial in English Literature**

6-7 units, Aut (Staff), Win (Staff), Spr (Staff)

**OSPOXFRD 197U. Tutorial in Music**

6-7 units, Aut (Staff), Win (Staff), Spr (Staff)

**OSPOXFRD 197V. Tutorial in Philosophy**

6-7 units, Aut (Staff), Win (Staff), Spr (Staff)

**OSPOXFRD 197Z. Tutorial in Political Science**

6-7 units, Aut (Staff), Win (Staff), Spr (Staff)

**OSPOXFRD 198A. Tutorial in Psychology**

6-7 units, Aut (Staff), Win (Staff), Spr (Staff)

**OSPOXFRD 198B. Tutorial in Religion**

6-7 units, Aut (Staff), Win (Staff), Spr (Staff)

**OSPOXFRD 221Y. Art and Society in Britain**

Themes in 18th-, 19th-, and 20th-century British art. Painting, sculpture, and design. Comparisons between the British experience and that of continental Europe and the U.S. Readings address questions related to the role of art in modern society. GER:DB-Hum

4-5 units, Spr (Tyack, G)

## OVERSEAS STUDIES: PARIS (OSPPARIS) COURSES

**OSPPARIS 10. Engineering Research Internship**

For Paris Program students with academic experience in electronics or micro-electronics. Under guidance of ISEP graduate researchers, work in fields of sub-32 nm CMOS SRAM cells, biometrics (iris and face signatures), or iris recognition with use of wavelet packets.

6 units, Aut (Staff), Win (Staff), Spr (Staff)

**OSPPARIS 14. Media Internship**

Case studies and independent research as groundwork for comparative analysis of Media on both sides of the Atlantic. Nature of Media in the U.S and in France. Media as a means for understanding culture.

3 units, Aut (Staff), Win (Staff), Spr (Staff)

**OSPPARIS 15. Hospital Internship**

Observation of medical services in Paris hospitals. How hospital teams work in France; how medical decisions are made; how patients are treated by nurses and doctors.

3 units, Aut (Staff), Win (Staff), Spr (Staff)

**OSPPARIS 18. French in the Working Environment**

Preparation for internships in Paris. Understanding cultural differences between the U.S. and France in the business world: formality/familiarity; written/spoken language; sense of time and space. Vocabulary and jargon specific to French business world. Résumé writing and interview preparation in French. Official letter writing in French.

1 unit, Aut (Ricci, M), Win (Staff)

**OSPPARIS 19. Arranged Internship**

Two-quarter stay required. Internships can be arranged in a number of areas including the arts, politics, engineering, marketing and PR, Media and journalism, health and psychological services, IT, NGO's, research, and hospitality administration.

5-6 units, Aut (Staff), Win (Staff), Spr (Staff)

**OSPPARIS 22P. InterMediate French I**

4 units, Aut (Reychman, P), Win (Mercier, F), Spr (Reychman, P)

**OSPPARIS 23P. InterMediate French II**

4 units, Aut (Mercier, F), Win (Molkou, E), Spr (Gourevitch, S)

**OSPPARIS 24. Introduction to French Society**

Required of Paris program participants. Engagement with French society through language immersion, volunteer work, projects with French students, encounters with prominent figures, and visits to French political and cultural institutions.

1 unit, Aut (Staff, 1), Win (Staff, 1), Spr (Staff, 1)

**OSPPARIS 28. Performing in French**

Students participate in every aspect of theater presentation, including study of texts, scene work, stage management, and acting. Possible end-of-quarter performance in a Parisian theater house. Objectives: explore French theater and texts through dramatic processes; improve French language skills and pronunciation; immersion in a collaborative and bicultural project with French students from other institutions in Paris. No experience required. In French.

3 units, Spr (Poirson, M)

**OSPPARIS 29. Colonization, Decolonization and Immigration: Overview of French Global History in the 20th Century**

Social and historical phenomena of colonization and decolonization in France during the 20th century, and their relation to the migratory movements that took shape after the Second World War. Case study of Algeria. Topics include: phenomenon of colonization in its administrative, judicial, social, economic and political context; conflicts leading to independence of colonized territories; migration of population before and after decolonization. GER:DB-SocSci, EC-GlobalCom

5 units, Spr (Hmed, C)

**OSPPARIS 30. The Avant-Garde in France through Literature, Art and Theater**

Multiple artistic trends, and esthetic theories, from Baudelaire to the Nouveau Roman, from the Surrealists to "Oulipo," from the Theater of cruelty to the Theater of the Absurd, from the Impressionists to Yves Klein. Interdisciplinary approach to reflect on the meaning of avant-garde and modernity in general, and on the fundamental question of why revolutionary artists in France remained in search of institutional recognition, nonetheless. GER:DB-Hum

4 units, Spr (Karsenti, T)

**OSPPARIS 31. American Writers in 20th Century Paris**

Paris as inspiration and refuge for writers and artists. From Gertrud Stein to Hemingway, Fitzgerald, Henry Miller, Anais Nin, James Baldwin and the Beat Poets, how leading figures of the expatriate community in Paris also shaped the identity of 20th century American literature, while reflecting upon America from afar. Role of cultural institutions such as the cafés and salons in the life and

creativity of the expatriate. Paris as a part of American culture, myth, longing, and source of inspiration and influence. GER:DB-Hum

5 units, Aut (Alduy, C)

**OSPPARIS 33. The Economics of Climate Change: Policies in Theory and Practice in the EU and the U.S.**

Economic tools for tackling climate change. Analytical bases of existing cap-and-trade schemes. The European greenhouse gas Emission Trading Scheme within the frame of the Kyoto Protocol, and emerging regulatory or voluntary markets in the U.S. Carbon-pricing mechanisms with focus on power and gas markets. Possibilities of linking carbon pricing mechanisms on both sides of the Atlantic and conditions for integrating these markets into an international post-Kyoto agreement. GER:DB-SocSci, EC-GlobalCom

5 units, Spr (de Perthuis, C; Leguet, B)

**OSPPARIS 37. Gesture**

Semiotics of conventional gestures in French and extension to gestural systems associated with other languages and with specific activities such as music, sports, traffic, management, and stock exchanges. Role of gesture in everyday conversation, and its role in teaching with iconic and demonstrating gestures. GER:DB-SocSci

3 units, Win (Clark, E)

**OSPPARIS 38. First Language Acquisition, with Emphasis on French**

Acquisition of a first language in young children with focus on children acquiring French. General stages that have been observed, typical errors on the way to mastery, and what these tell us about the process of acquisition; how French L1 differs from French L2. Readings drawn from studies in French of children at different ages and stages of acquisition.

4 units, Win (Clark, E)

**OSPPARIS 39. Jazz in Paris: A Cultural History from the 1920's to the Present**

Paris as a destination for jazz musicians and as a fertile ground for musical explorations. Development of jazz from the early days with Josephine Baker and Sidney Bechet through Louis Armstrong's arrival, soon followed by Duke Ellington, Coleman Hawkins, and France's own Django Reinhardt, to bebop icons Charlie Parker, Miles Davis, Dexter Gordon, Bud Powell.

2-3 units, Aut (Berman, K)

**OSPPARIS 40P. Introductory Electronics**

Electrical quantities and their measurement, including operation of the oscilloscope. Function of electronic components including resistor, capacitor, and inductor. Analog circuits including the operational amplifier and tuned circuits. Digital logic circuits and their functions. Lab assignments. Prerequisite: PHYSICS 43. GER:DB-EngrAppSci

5 units, Aut (Wong, S), Spr (Howe, R)

**OSPPARIS 41. EAP: Perspective, Interior Decorating, Volume, and Design**

May be repeated for credit.

2 units, Aut (Staff, 1), Win (Staff, 1), Spr (Staff, 1)

**OSPPARIS 42. EAP: Drawing with Live Models**

May be repeated for credit.

2 units, Aut (Staff, 1), Win (Staff, 1), Spr (Staff, 1)

**OSPPARIS 43. EAP: Painting and Use of Color**

May be repeated for credit.

2 units, Aut (Staff, 1), Win (Staff, 1), Spr (Staff, 1)

**OSPPARIS 44. EAP: Graphic Art**

May be repeated for credit.

2 units, Aut (Staff, 1), Win (Staff, 1), Spr (Staff, 1)

**OSPPARIS 47. Women in French Cinema**

Analysis of French films on and by women to understand contemporary French society in relation to questions of national identity, immigration, sexuality, gender relations, poverty and modernity. Three levels where cinema and French culture intersect: in the reception of the films; within the movies; in the artistic process. Screenings include: Et Dieu crea la femme; Cleo de 5 a 7; Feminin/Masculin; L'homme qui aimait les femmes; Une histoire de femmes; Chaos; La Vie Jerusalem. Readings include Simone de Beauvoir, Barthes, Marguerite Duras, Luce Irigaray, Laura Mulvey, Kathleen Murphy, Mary Ann Doane. GER:DB-Hum

4 units, Aut (Alduy, C)

**OSPPARIS 50P. Introductory Science of Materials**

GER:DB-EngrAppSci

4 units, Aut (Staff, 1), Win (Staff, 1), Spr (Staff, 1)

**OSPPARIS 56. Theater in Transition: Stage and Audience in France Today**

The static and silent spectator as first partner of the stage and sometimes co-creator of the theatrical event. Audience; new forms of performance; how space is reinvented; new light and sound effects; how texts are re-interpreted; and the changing role of the actor on the stage. GER:DB-Hum

4 units, Win (Mervant-Roux, M)

**OSPPARIS 59. Plagues of Europe: How Infections have Shaped Politics, Society and Biology in France and Beyond**

Historical intersections between infectious diseases and society: political and social turmoil from infectious disease outbreaks in France. Effects of plague in France; typhus outbreak in Napoleon's army; food-borne disease in a culture that values culinary arts. Can modern tools for dissemination of information and an understanding of history help to control future epidemics? GER:DB-SocSci

4 units, Spr (Parsonnet, J)

**OSPPARIS 81. France During the Second World War: Between History and Memory**

French politics and society from the causes of the collapse of the French Third Republic and the emergence of the French State at Vichy. The political and cultural measures of this regime in the shadow of Nazi Germany. Anti-Jewish laws and action; deportations by Vichy, the Germans, the French Fascists, and reactions to the fate of the Jews. Visions of the Resistance, the combat for liberation, and WW II in the collective memory of France. GER:DB-SocSci

5 units, Win (Virgili, F)

**OSPPARIS 91. Globalization and Its Effect on France and the European Union**

Economic and political impact of globalization on France and the EU and influence of France and the EU on the process of globalization. Issues of sovereignty and national identity for France; protection from versus integration into the network of globalization. GER:DB-SocSci, EC-GlobalCom

5 units, Win (Le Cacheux, J; Laurent, E)

**OSPPARIS 92. Building Paris: Its History, Architecture, and Urban Design**

The development of Parisian building and architecture from the 17th century to the present. Interaction of tradition and innovation in its transformation and its historical, political, and cultural underpinnings. Visits and case studies throughout Paris illustrate the formation of the city landscape and its culture. GER:DB-Hum

4 units, Spr (Halevi, E)

**OSPPARIS 103A. French Lecture Series 1**

1 unit, Aut (Staff), Win (Staff), Spr (Staff)

**OSPPARIS 104A. French Lecture Series 2**

1 unit, Aut (Halevi, E), Win (Halevi, E), Spr (Halevi, E)

**OSPPARIS 105A. French Lecture Series 3**

1 unit, Aut (Staff), Win (Staff), Spr (Staff)

**OSPPARIS 107Y. The Age of Cathedrals: Religious Art and Architecture in Medieval France**

The major artistic and cultural movements that changed the face of France from the period of Suger in the 12th century through the reign of St. Louis in the 13th century. Monastic spirituality progressively gave way to an urban culture focused on man and secular knowledge, which developed daring and sophisticated building techniques. The years 1150-1250 represented a period of architectural renaissance and l'Ile-de-France was its birthplace. GER:DB-Hum

4 units, Aut (Deremble, C; Deremble, J)

**OSPPARIS 120X. French Painting in the 19th Century: Between Tradition and Revolution**

Changes in artistic aims and the interaction between artist and society throughout the period. Weekly field trips to Paris museums holding paintings of David, Ingres, Delacroix, Courbet, Daumier, Manet, Renoir, Monet, Degas, and others. GER:DB-Hum, DB-Hum

4 units, Win (Halevi, E)

**OSPPARIS 122X. Challenges of Integration in the European Union**

European integration is now an economic, social, and political reality. This integration has a history of mutation and a transformation of its very foundation. Topics: the evolution of welfare states, elites, political parties, and systems in Europe; lobbies, trade unions, voluntary associations, social movements, popular protest, citizenship, democracy. GER:DB-SocSci  
4-5 units, Spr (*Strudel, S*)

**OSPPARIS 124P. Advanced French I**

4 units, Aut (*Guedon, P*)

**OSPPARIS 124X. Building the European Economy: Economic Policies and Challenges Ahead**

Issues and challenges of European economic construction. The European Economic Union at the end of the 50s; European industrial, agricultural, social, and monetary economic policies. Topics: wider definitions of Europe, its relations with industrial and developing countries, and its challenges in confronting global economic crises. GER:DB-SocSci

5 units, Aut (*Le Cacheux, J*)

**OSPPARIS 125P. Advanced French II**

4 units, Win (*Ricci, M*), Spr (*Molkou, E*)

**OSPPARIS 153X. Health Systems and Health Insurance: France and the U.S., a Comparison across Space and Time**

Should health systems be organized or left to the free market? What is the role of the state in the delivery of health care? The evolution of the health profession, health policy, and reform in France and the U.S.; measures restraining professional autonomy such as prescription guidelines in the French Medical Convention. Is the solution to the increase of health expenditures and reduced access to health care the end of autonomy for the medical profession? GER:DB-SocSci, EC-GlobalCom

4-5 units, Win (*Fessler, J*)

**OSPPARIS 186F. Contemporary African Literature in French**

Focus is on African writers and those of the diaspora, bound together by a common history of slave trade, bondage, colonization, and racism. Their works belong to the past, seeking to save an oral heritage of proverbs, story tales, and epics, but they are also contemporary. GER:DB-Hum, EC-GlobalCom

4 units, Win (*Rullier, F*)

**OSPPARIS 195C. Paris University: Health and Science 1**

1-6 units, Aut (*Staff*), Win (*Staff*), Spr (*Staff*)

**OSPPARIS 195D. Paris University: Health and Science 2**

1-6 units, Aut (*Staff*), Win (*Staff*), Spr (*Staff*)

**OSPPARIS 196C. Paris University: Humanities 1**

1-6 units, Aut (*Staff*), Win (*Staff*), Spr (*Staff*)

**OSPPARIS 196D. Paris University: Humanities 2**

1-6 units, Aut (*Staff*), Win (*Staff*), Spr (*Staff*)

**OSPPARIS 196E. Paris University: Humanities 3**

1-6 units, Aut (*Staff*), Win (*Staff*), Spr (*Staff*)

**OSPPARIS 197C. Paris University: Social Science 1**

1-6 units, Aut (*Staff*), Win (*Staff*), Spr (*Staff*)

**OSPPARIS 197D. Paris University: Social Science 2**

1-6 units, Aut (*Staff*), Win (*Staff*), Spr (*Staff*)

**OSPPARIS 198C. Paris University: Engineering 1**

1-6 units, Aut (*Staff*), Win (*Staff*), Spr (*Staff*)

**OSPPARIS 198D. Paris University: Engineering 2**

1-6 units, Aut (*Staff*), Win (*Staff*), Spr (*Staff*)

**OSPPARIS 211X. Political Attitudes and Behavior in Contemporary France**

The institutions of the Fifth Republic, the main political forces, and their evolution. Electoral behavior, taking into account other forms of political action such demonstrations and protests. Attitudes and values are linked to voting choice. GER:DB-SocSci, EC-GlobalCom

4-5 units, Aut (*Muxel, A*; *Strudel, S*)

## OVERSEAS STUDIES: SANTIAGO (OSPSANTG) COURSES

**OSPSANTG 10. Borges and Argentina**

His work and readings of other key figures of Argentine literature during the period. Close reading technique. Readings in the context of the main developments in Argentine history, and in relationship to the major literary and philosophical trends of the 20th century. Topics include Borges' rejection of the novel, storytelling as a reaction against romanticism, philosophical concerns, paradoxical plot devices, humor, and influence in Latin America. Readings include short stories such as *The Library of Babel* and *The Aleph*, poems and essays, and texts by key Argentine writers of the period including Arlt, Bioy Casares, Silvina Ocampo, and Cortázar. GER:DB-Hum

4-5 units, Win (*Missana, S*)

**OSPSANTG 12S. Accelerated Second-Year Spanish, Part I: Chilean Emphasis**

Intensive sequence integrating language, culture, and sociopolitics of Chile. Emphasis is on achieving advanced proficiency in oral and written discourse including formal and informal situations, presentational language, and appropriate forms in academic and professional contexts. Prerequisite: one year of college Spanish, or 11 or 21B if taken more than two quarters prior to arriving in Santiago.

5 units, Aut (*Abad, M*), Win (*Abad, M*), Spr (*Abad, M*)

**OSPSANTG 13S. Accelerated Second-Year Spanish, Part II: Chilean Emphasis**

Intensive sequence integrating language, culture, and sociopolitics of Chile. Emphasis is on achieving advanced proficiency in oral and written discourse including formal and informal situations, presentational language, and appropriate forms in academic and professional contexts. Prerequisite: 11 or 21B within two quarters of arriving in Santiago, or 12 or 22B.

5 units, Aut (*Abad, M*), Win (*Abad, M*), Spr (*Abad, M*)

**OSPSANTG 14. Women Writers of Latin America in the 20th Century**

Key figures in poetry, narrative fiction, theater, and testimonio, such as Mistral, Garro, Lispector, Poniatowska, Valenzuela, Eltit and Menchú. Close reading technique. Issues raised in literary texts that reflect the evolution of the condition of women in Latin America during the period. Topics include gender differences and relationships, tradition versus transgression, relationship between changes in the status of women and other egalitarian transformations, and women writers and the configuration of literary canons. GER:DB-Hum, EC-Gender

4-5 units, Aut (*Missana, S*), Spr (*Missana, S*)

**OSPSANTG 33. Spanish Language Tutorial**

Prerequisite: two years of college Spanish or equivalent placement.

2 units, Aut (*Abad, M*), Win (*Abad, M*), Spr (*Abad, M*)

**OSPSANTG 36. Darwin's South America**

Using Darwin's Voyage of the Beagle, follow the route of the HMS Beagle and create a detailed annotated analysis on all aspects of this work as it pertains to South America. Explications of factual information including ways in which Darwin's ideas proved to be insightful or incorrect. Through comparison of different editions of book, explore the evolution of Darwin's thinking. What about Darwin's approach made him such as astute observer and such a fertile and creative thinker?

3 units, Spr (*Siegel, R*)

**OSPSANTG 38. Research Topics: Indigenous Infections of South America**

Independent research with weekly meetings to review progress and discuss project goals. Students select from one of the following topics: hemorrhagic fevers of South America; Chagas disease; malaria. Additional topics with consent of instructor.

3 units, Spr (*Staff*)

**OSPSANTG 40. Academic Internship**

2-3 units, Aut (*Jaksic, I*), Win (*Jaksic, I*), Spr (*Jaksic, I*)

**OSPSANTG 58. Living Chile: A Land of Extremes**

Physical, ecological, and human geography of Chile. Perceptions of the Chilean territory and technologies of study. Flora, fauna, and human adaptations to regional environments. Guest lectures; field trips; workshops. GER:DB-EngrAppSci

5 units, Aut (Bustamante, M), Win (Bustamante, M)

**OSPSANTG 62. Topics in Chilean History**

Independent study topic concerning any aspect of Chilean history such as independence and nation building, social and economic development, ideas and culture, dictatorship and democracy. Research paper based on primary and secondary sources. GER:DB-Hum

4-5 units, Win (Staff)

**OSPSANTG 65. Economic History of the Southern Cone from Liberalism to Neoliberalism and Beyond**

Evolution of the economies of Argentina, Brazil, and Chile from the 1870s through the present day. Analysis of the concepts used to interpret the economy and make policy (comparative advantage, structuralism/Marxism, new institutionalism) and the use of time-series data concerning trends in economic structure and development. Debate concerning the effects of globalization on economic growth, national autonomy, and potential for social justice in the Southern Cone. GER:DB-SocSci

5 units, Aut (Frank, Z)

**OSPSANTG 68. The Emergence of Nations in Latin America**

Major themes of 19th-century Latin American history, including independence from Spain, the emergence of nation states, and the development of a new social, political, and economic order. GER:DB-SocSci

4-5 units, Aut (Jaksic, I), Spr (Jaksic, I)

**OSPSANTG 85. Marine Ecology of Chile and the South Pacific**

Relationships among physical processes in the ocean, biological productivity, and the exploitation of resources by high-trophic-level predators including human beings. Characterization of ecological patterns; identification of processes operating on marine systems. Open ocean ecosystems, intertidal and benthic regions of the world's oceans, and ecological research developed along coastal regions, focusing on Chile's 4,000 km coastline. GER:DB-NatSci

5 units, Spr (Palma, A)

**OSPSANTG 86. Global Issues, Local Politics, and American Foreign Policy**

Eight national security issues confronting decision makers in the U.S. and other countries. What is at stake, how those issues are viewed in Washington, and the implications of alternative approaches and policy options. How these issues and U.S. policies to address them are viewed by groups in Chile and other Latin American countries. Issues include those associated with transnational phenomena such as geopolitics of energy, food, and climate change; those centered on particular regions such as the Middle East; and those involving specific countries such as China or Venezuela.

4-5 units, Win (Fingar, T)

**OSPSANTG 87. How to Analyze National Security Issues**

Individual research projects on national security issues likely to confront U.S. policymakers. Guidance in framing the issue and identifying useful information, finding and evaluating information, exploring alternative hypotheses, and presenting information to policymakers. Modeled on approach taken by National Intelligence Council in preparing reports for U.S. Government officials.

2-4 units, Win (Fingar, T)

**OSPSANTG 102S. Composition and Writing Workshop for Students in Santiago**

Advanced. Writing as craft and process: brainstorming, planning, outlining, drafting, revising, style, diction, and editing. Non-Spanish majors or minors may choose topics related to their studies. Prerequisite: SPANLANG 13C, 13R, 13S, 23B, or equivalent.

3-5 units, Aut (Bobbert, A), Win (Staff, I), Spr (Bobbert, A)

**OSPSANTG 104X. Modernization and Culture in Latin America**

Intellectual and cultural expressions of Latin America against the background of modernization viewed as a constant tension be-

tween rationalization and subjectification, change and identity preservation, and the logic of development or economic expansion and the logic of the culture. Readings include Morande, *Cultura y modernización en América Latina* and Sarlo, *Una modernidad periférica*. GER:DB-SocSci, EC-GlobalCom

5 units, Aut (Subercaseaux, B)

**OSPSANTG 116X. Modernization and its Discontents: Chilean Politics at the Turn of the Century**

Chile's strides towards becoming a developed country have engendered high levels of alienation and disaffection among significant sectors of the population. The roots of this apparent paradox of modernization, focusing on newly emerging actors in the Chilean political scene: Mapuche organizations, women's groups, the environmental movement, and new features of the established ones like trade unions and human rights activists. GER:DB-SocSci

5 units, Spr (Correa, G)

**OSPSANTG 118X. Artistic Expression in Latin America**

Elite, mass-Media, and popular cultural changes in Chile under conditions of economic and political liberalization. The reception of cultural meanings from the center of the world social system (U.S., EU, and Japan), reformulation to respond to local conditions, and export in the shape of cultural artifacts. Innovative elements rooted in the regional and local culture. GER:DB-SocSci, EC-GlobalCom

5 units, Win (Albornoz, C)

**OSPSANTG 119X. The Chilean Economy: History, International Relations, and Development Strategies**

The Chilean economy in five stages, taking into account: the international economic position of Chile; internal economic structures closely related to the inherited historical conditions and to the changing international economic position of the country; and the economic strategies prevalent during the period and the concrete development policies conducted by government authorities. GER:DB-SocSci

5 units, Spr (Munoz, O)

**OSPSANTG 129X. Latin America in the International System**

Latin America's role in world politics, with emphasis on the history of and models for explaining U.S.-Latin American relations. Latin America's evolving relationship in the international system. GER:DB-SocSci

4-5 units, Win (Fuentes, C)

**OSPSANTG 130X. Latin American Economies in Transition**

Introduction to the main debates and approaches developed to understand and analyze the economies of Latin America. Recent processes of transition to market economies. Common characteristics among countries of the region; the differences and special traits of individual countries. Historical, analytical, and empirical perspectives on topics at the center of controversies and specific policy problems over several decades. Recommended: ECON 1, 51, and 52. GER:DB-SocSci

5 units, Aut (Briones, I)

**OSPSANTG 141X. Politics and Culture in Chile**

The relationship between politics and culture in Chile during the 20th century, reflecting on the effects of such relationships on esthetics and identity. The possibility that, in Chile, culture has been pulled by politics and social praxis, a condition that has created a deficit in cultural thickness. The oligarchic regime around 1920, the welfare state around 1940, projects of social transformation around 1970, dictatorship around 1980, women writers and Mapuche poetry in contemporary Chile. GER:DB-Hum, EC-GlobalCom

5 units, Spr (Subercaseaux, B)

**OSPSANTG 160X. Latin America in the International Economy**

The external economic relations of Latin American countries. Similarities and differences among countries, focusing on the last 15 years. Analytical and empirical elements for interpretation of policies, and the outcome. Trade, external debt, capital flows, and the inter-relationships between domestic economy and overall growth. Recommended: ECON 1, 51, and 52. GER:DB-SocSci

5 units, Win (Briones, I)

**OSPSANTG 221X. Political Transition and Democratic Consolidation: Chile in Comparative Perspective**

The dynamics of the Chilean transition. Topics: challenges faced

by democratic governments in the 90s framed by the legacy of military rule, 1973-90; political culture; institutional traditions of democracy; and the Chilean process within the broader context of Latin American political development. GER:DB-SocSci  
5 units, Aut (Micco, S)

## PATHOLOGY (PATH)

### UNDERGRADUATE COURSES IN PATHOLOGY

#### PATH 101. Cancer Biology

(Same as CBIO 101) Experimental approaches to understanding the origins, diagnosis, and treatment of cancer. Focus on key experiments and discoveries with emphasis on genetics, molecular biology, and cell biology. Topics include carcinogens, tumor virology, oncogenes, tumor suppressor genes, cell cycle regulation, angiogenesis, invasion and metastasis, cancer genomics, cancer epidemiology, and cancer therapies. Discussion sections based on primary research articles that describe key experiments in the field. Prerequisite: Biology or Human Biology core or equivalent, or consent of instructor.

4 units, Win (Staff)

#### PATH 103Q. Lymphocyte Migration

(F,Dial) Stanford Introductory Dialogue. Preference to sophomores. How lymphocytes leave the blood stream and enter tissues to participate in immune surveillance and the development of inflammation. Known as lymphocyte migration, this process involves a complex series of adhesion, activation and diapedesis events. The cellular mechanisms involved in lymphocyte migration, including lymphocyte adhesion molecules that interact with their counter-receptors on endothelial cells, and molecules, including cytokines and chemokines, that attract or activate lymphocytes. The roles of these molecules in the development of human diseases such as asthma, type 1 diabetes, and multiple sclerosis.

1 unit, Aut (Michie, S)

#### PATH 105Q. Final Analysis: The Autopsy as a Tool of Medical Inquiry

(S,Sem) Stanford Introductory Seminar. Preference to sophomores. Based on review of patient medical histories and examination of formalin-fixed and unfixed tissues from autopsy. Student-directed problem-solving; students develop learning objectives for each case, and present findings. The effect of disease on normal structure and function, ethics of patient care, allocation of medical resources, efficiency of therapy, and medical error. Prerequisite: hepatitis-B vaccination; free vaccinations during the winter for accepted students.

3 units, Spr (Regula, D)

#### PATH 199. Undergraduate Research

Students undertake investigations sponsored by individual faculty members. Prerequisite: consent of instructor.

1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

### GRADUATE COURSES IN PATHOLOGY

#### PATH 206. Epigenetics

(Same as GENE 206) For graduate students; undergraduates by consent of instructor. Mechanisms by which phenotypes not determined by the DNA sequence are stably inherited in successive cell divisions. From the discovery of position-effect variegation in *Drosophila* in the 1920s to present-day studies of covalent modifications of histones and DNA methylation. Topics include: position effect, gene silencing, heterochromatin, centromere identity, genomic imprinting, histone code, variant histones, and the role of epigenetics in cancer. Prerequisite: BIO41 and BIO42, or GENE 203, or consent of instructor.

2 units, Spr (Lipsick, J; Gozani, O), alternate years, not given next year

#### PATH 210. Stem Cells in Development and Disease

Molecular and cellular mechanisms underlying the basic self-renewal and differentiation properties of stem cells in multiple tissues and organisms. How abnormal stem cell behavior may contribute to diseases such as cancer. How to manipulate stem cell behavior in vitro or in vivo for therapeutic purposes. Classical

papers and recent literatures in the field of stem cell biology. Open to graduate, medical, and advanced undergraduate students. Prerequisite: consent of instructor.

1-2 units, Aut (Lu, B)

#### PATH 213. Gross Autopsy Pathology Laboratory

Examine/discuss unfixed dissected organs from current autopsies and correlate morphologic findings with the clinical history. Students view postmortem examinations and may participate (in a small group) in one postmortem examination with the assistance of residents and staff, and present the case to the class. Class scheduling is flexible. Additional unit for participation in a postmortem examination. Pre- or corequisite: HHD.

2-3 units, Aut (Regula, D), Win (Regula, D)

#### PATH 218. Computational Analysis of Biological Images

(Same as GENE 218) Physical and computational tools for acquisition, processing, interpretation, and archiving of biological images. Emphasis is on digital microscopy.

2 units, alternate years, not given this year

#### PATH 233. The Biology of Small Modulatory RNAs

(Same as GENE 233, MI 233) Open to graduate and medical students. How recent discoveries of miRNA, RNA interference, and short interfering RNAs reveal potentially widespread gene regulatory mechanisms mediated by small modulatory RNAs during animal and plant development. Required paper proposing novel research.

2 units, Aut (Fire, A; Chen, C), alternate years, not given this year

#### PATH 234. Fundamentals of RNA Biology

(Same as GENE 234, MI 234) For graduate or medical students and (if space allows) to active participants from other segments of the Stanford Community (e.g., TGR students); undergraduates by instructor consent. Fundamental issues of RNA biology, with the goal of setting a foundation for students to explore the expanding world of RNA-based regulation. Each week a topic is covered by a faculty lecture and journal club presentations by students.

2 units, Aut (Chen, C; Fire, A; Sarnow, P)

#### PATH 240. Clinical Studies in Pathology I

Broad exposure to the practice of pathology in an academic medical center. Students are assigned a faculty mentor and work closely with pathology residents, fellows and faculty. Two months are spent in surgical pathology where students help examine surgical resection specimens and biopsies and participate in making a final diagnosis. One month is spent in autopsy pathology where students perform autopsy prosections and formulate final anatomic diagnoses under the supervision of faculty. May be combined with Clinical Studies in Pathology II, and two additional quarters of PATH 399, Directed Research, to fulfill a 12 month Post-Sophomore year Fellowship in Pathology. Prerequisite: MD candidate; instructor consent.

3-9 units, Aut (Natkunam, Y; Higgins, J), Win (Natkunam, Y; Higgins, J), Spr (Higgins, J; Natkunam, Y), Sum (Natkunam, Y; Higgins, J)

#### PATH 241. Clinical Studies in Pathology II

In-depth exposure to the practice of pathology for students who have completed Clinical Studies in Pathology I. Students are assigned a faculty mentor and work closely with pathology residents, fellows and faculty. Two months are spent in surgical pathology where students help examine surgical resection specimens and biopsies and participate in making a final diagnosis. One month is spent in autopsy pathology where students perform autopsy prosections and formulate final anatomic diagnoses under the supervision of faculty. Additional time may be spent observing in subspecialty areas of pathology that include dermatopathology, neuropathology, renal pathology, lymph node pathology or cytology. May be combined with Clinical Studies in Pathology I and two additional quarters of PATH 399, Directed Research, to fulfill a 12-month Post-Sophomore year Fellowship in Pathology. Prerequisite: consent of instructor and successful completion of Clinical Studies in Pathology I (PATH 240).

3-9 units, Aut (Natkunam, Y; Higgins, J), Win (Natkunam, Y; Higgins, J), Spr (Staff), Sum (Higgins, J; Natkunam, Y)

#### PATH 296. Stem Cell Biology and Regenerative Medicine

(Same as DBIO 296) For graduate and medical students. Embryonic and adult stem cells, including origin, regulation, self-renewal,

differentiation, fate, and relationship to cancer; biological mechanisms and methods to translate findings to therapeutic applications. Medical students must enroll for 5 units; graduate students may choose to take only the basic science part for 3 units. Prerequisites: DBIO 201 and 210, or consent of instructor.

3-5 units, Win (Weissman, I; Nusse, R; Fuller, M)

**PATH 299. Directed Reading in Pathology**

Prerequisite: consent of instructor.

1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**PATH 370. Medical Scholars Research**

Provides an opportunity for student and faculty interaction, as well as academic credit and financial support, to medical students who undertake original research. Enrollment is limited to students with approved projects.

4-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**PATH 399. Graduate Research**

Students undertake investigations sponsored by individual faculty members. Opportunities at the molecular, cellular, and clinicopathologic levels. Prerequisite: consent of instructor.

1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

## PHILOSOPHY (PHIL)

### UNDERGRADUATE COURSES IN PHILOSOPHY

**PHIL 9N. Philosophical Classics of the 20th Century**

Last century's best and most influential philosophical writings. Topics include ethics (what is the nature of right and wrong?), language (how do meaning, reference, and truth arise in the natural world?), science (can science claim objectively accurate descriptions of reality?), existence (are there things that don't exist?), and the mind (could robots ever be conscious?). Authors include Bertrand Russell, Ludwig Wittgenstein, Rudolf Carnap, Willard Quine, Thomas Kuhn, John Rawls, and Saul Kripke. The lay of the land in contemporary philosophy. GER:DB-Hum

4 units, Spr (Crimmins, M)

**PHIL 10. God, Self, and World: An Introduction to Philosophy**

Traditional philosophical problems including the existence of God, how and what one can know about the world, how to understand the nature of the mind and its relation to the body, and whether people have free will. Paradoxes. Readings include classical and contemporary texts. GER:DB-Hum

5 units, Aut (Alonso, F), Win (Burgess, A)

**PHIL 11N. Skepticism**

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Historical and contemporary philosophical perspectives on the limits of human knowledge of a mind-independent world and causal laws of nature. The nature and possibility of a priori knowledge. GER:DB-Hum

3 units, Win (De Pierris, G)

**PHIL 15N. Freedom, Community, and Morality**

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Does the freedom of the individual conflict with the demands of human community and morality? Or, as some philosophers have maintained, does the freedom of the individual find its highest expression in a moral community of other human beings? Readings include Camus, Mill, Rousseau, and Kant. GER:DB-Hum, EC-EthicReas

3 units, Aut (Friedman, M)

**PHIL 20. Introduction to Moral Philosophy**

(Same as ETHICSOC 20) What is the basis of moral judgment? What makes right actions right and wrong actions wrong? What makes a state of affairs good or worth promoting? What is it to have a good or virtuous character? Answers to classic questions in ethics through the works of traditional and contemporary authors. GER:DB-Hum, EC-EthicReas

5 units, Win (Schapiro, T)

**PHIL 20S. Introduction to Moral Philosophy**

What is the basis of moral judgment? What makes right actions right and wrong actions wrong? What makes a state of affairs good or worth promoting? What is it to have a good or virtuous charac-

ter? Answers to classic questions in ethics through the works of traditional and contemporary authors.

3 units, Sum (McElroy, P)

**PHIL 30. Introduction to Political Philosophy**

(Same as ETHICSOC 30, POLISCI 3, PUBLPOL 103A) State authority, justice, liberty, and equality through major works in political philosophy. Topics include human nature and citizenship, the obligation to obey the law, democracy and economic inequality, equality of opportunity and affirmative action, religion, and politics. GER:DB-Hum, DB-Hum, EC-EthicReas

5 units, Spr (Hussain, N)

**PHIL 42. Philosophy through Theater: Choice and Chance**

Dramatic literature as a window into philosophical work on freedom of the will and indeterminism. Students participate in the production of original one-act plays. GER:DB-Hum

4 units, not given this year

**PHIL 43S. Happiness: Positive Psychology and Philosophy**

The connection between research in positive psychology to determine what happiness is and the conditions under which human beings are happy with issues in moral philosophy regarding whether we should aim at happiness or think of it as a good. The assumptions about happiness made by positive psychologists. The philosophical insight into the question of how people should live that is gained by looking at the empirical results provide by psychologists.

3 units, Sum (Papadopol, A)

**PHIL 50. Introductory Logic**

Propositional and predicate logic; emphasis is on translating English sentences into logical symbols and constructing derivations of valid arguments. GER:DB-Math

4 units, Aut (Hoshi, T), Spr (Hoshi, T)

**PHIL 50S. Introductory Logic**

Propositional and predicate logic. Themes include: translations of English sentences into logical symbols; semantics of and proof rules for propositional and predicate logic. Emphasis is on evaluating arguments with the syntax and semantics of contemporary logic. Special attention to the properties of the languages studied.

4 units, Sum (Angelides, A)

**PHIL 60. Introduction to Philosophy of Science**

(Same as HPS 60) 20th-century views on the nature of scientific knowledge. Logical positivism and Popper; the problem of induction; Kuhn, Feyerabend, and radical philosophies of science; subsequent attempts to rebuild moderate empiricist and realist positions. GER:DB-Hum

5 units, Aut (Ryckman, T)

**PHIL 61. Science, Religion, and the Birth of Modern Philosophy**

(Same as HPS 61) Galileo's defense of the Copernican world-system that initiated the scientific revolution of the 17th century, led to conflict between science and religion, and influenced the development of modern philosophy. Readings focus on Galileo and Descartes. GER:DB-Hum

5 units, not given this year

**PHIL 71H. Philosophy and the Real World**

Introduction to the humanities as an applied discipline; how literary and philosophical ideas illuminate and change how people live their lives as individuals and members of society. Focus is on short texts that illustrate how literary and philosophical ideas arise from social problems and attempt to confront those problems. Methods and approaches: how to read such texts; how to make arguments about them; how such texts shed light on contemporary situations.

2 units, not given this year

**PHIL 72. Contemporary Moral Problems**

(Same as ETHICSOC 185M) As individuals and as members of societies we make choices that can be evaluated from a moral point of view. Sometimes such evaluations are relatively easy but often it is unclear, or subject to fierce disagreement, what morality requires of us. For example, if we are relatively affluent, how far must we assist those who are poor? Are we behaving wrongly if we buy expensive sunglasses or MP3 players when the money could instead be given to Oxfam to help fight malnutrition in the developing world? This course will provide an introduction to several of these problems focusing, in particular, on obligations to the global poor, though it will also consider different perspectives

on over-population, human rights, foreign aid, and patents on life-saving medication. GER:EC-EthicReas

4 units, Aut (Staff)

**PHIL 76. Introduction to Global Justice**

(Same as ETHICSOC 136R, INTNLREL 136R, POLISCI 136R, POLISCI 336) Recent work in political theory on global justice. Topics include global poverty, human rights, fair trade, immigration, climate change. Do developed countries have a duty to aid developing countries? Do rich countries have the right to close their borders to economic immigrants? When is humanitarian intervention justified? Readings include Charles Beitz, Thomas Pogge, John Rawls.

5 units, Spr (McLeod, A)

**PHIL 78. Medical Ethics**

(Same as ETHICSOC 78) Introduction to moral reasoning and its application to problems in medicine: informed consent, the requirements and limits of respect for patients' autonomy, surrogate decision making, euthanasia and physician-assisted suicide, and abortion. GER:DB-Hum, DB-Hum, EC-EthicReas

4 units, not given this year

**PHIL 80. Mind, Matter, and Meaning**

Central topics in philosophy emphasizing development of analytical writing skills. What are human beings? Are human beings free? How do human minds and bodies interact? What does it all mean? Prerequisite: introductory philosophy course. GER:DB-Hum, WIM

5 units, Aut (Lawlor, K), Spr (Taylor, K)

**PHIL 81. Philosophy and Literature**

(Same as CLASSGEN 81, COMPLIT 181, ENGLISH 81, FREN-GEN 181, ITALGEN 181, GERGEN 181) Required gateway course for Philosophical and Literary Thought; crosslisted in departments sponsoring the Philosophy and Literature track: majors should register in their home department; non-majors may register in any sponsoring department. Introduction to major problems at the intersection of philosophy and literature. Issues may include authorship, selfhood, truth and fiction, the importance of literary form to philosophical works, and the ethical significance of literary works. Texts include philosophical analyses of literature, works of imaginative literature, and works of both philosophical and literary significance. Authors may include Plato, Montaigne, Nietzsche, Borges, Beckett, Barthes, Foucault, Nussbaum, Walton, Nehamas, Pavel, and Pippin. GER:DB-Hum

4-5 units, Win (Anderson, L; Landy, J)

**PHIL 100. Greek Philosophy**

Greek philosophical thought, covering Socrates, Plato, Aristotle, and the Hellenistic schools (the Epicureans, the Stoics, and the Skeptics). Topics: the nature of the soul, virtue and happiness, knowledge, and reality. (Bobonich) GER:DB-Hum

4 units, Spr (Papadopol, A)

**PHIL 101. Introduction to Medieval Philosophy**

(Same as PHIL 201) Classics of Western philosophy by Augustine, Boethius, Anselm, Abelard, Aquinas, and Ockham. Explore the puzzles facing someone seeking to lead a good life and to understand herself and her world. A theory of will and human motivation, a theory of ethics based on the agent's intention, and a theory of divine omniscience and omnipotence consistent with divine goodness and human freedom. Works include On Free Choice, The Consolation of Philosophy, Ethics, Summa theologiae, and the Connection of the Virtues. GER:DB-Hum

4 units, Win (Wood, R)

**PHIL 101A. Medieval Religious Philosophy**

(Same as RELIGST 167) (Same as PHIL 101A.) Focus is on God, world, and words. A persuasive assumption about the structure of the world, that it reflected the categories of God's mind and emerged from an act of divine speech, gave impetus to the interest in the nature of language and its relation to the world. Scripture served as one kind of divine communication to human beings, and The Book of the World as another. The problem of universals, the question of how words relate to God, epistemology, theories of reference, and semiotics. Reading from Augustine, Anselm, Aquinas, Scotus, Ockham.

4 units, not given this year

**PHIL 102. Modern Philosophy, Descartes to Kant**

Major figures in early modern philosophy in epistemology, metaphysics, and philosophy of mind. Writings by Descartes, Locke,

Leibniz, Berkeley, Hume, and Kant. GER:DB-Hum

4 units, Spr (De Pierris, G)

**PHIL 103. 19th-Century Philosophy**

Focus is on ethics and the philosophy of history. Works include Mill's Utilitarianism, Hegel's The Philosophy of World History, Marx's Economic and Philosophic Manuscripts, Kierkegaard's The Sickness Unto Death, and Nietzsche's On the Genealogy of Morals. GER:DB-Hum

4 units, Win (Wood, A)

**PHIL 106. Ancient Skepticism**

(Same as PHIL 206) The ancient Pyrrhonian skeptics who think that for any claim there is no more reason to assert it than deny it and that a life without any beliefs is the best route to happiness. Some ancient opponents of the Pyrrhonian skeptics and some relations between ancient and modern skepticism. GER:DB-Hum

4 units, Spr (Bobonich, C)

**PHIL 107. Plato's Early Dialogues**

(Same as PHIL 207) Some of the most important early or Socratic dialogues including the Charmides, the Gorgias and the Protagoras (as well as some others). Issues covered include weakness of will, the connection between knowledge and virtue and happiness and virtue and whether Socrates' method leads inevitably to ethical skepticism.

4 units, Aut (Bobonich, C)

**PHIL 110. Plato**

(Same as PHIL 210) Plato's Republic. GER:DB-Hum

4 units, not given this year

**PHIL 111. Aristotle and Contemporary Ethics**

(Same as PHIL 211) Aristotle's Nicomachean Ethics, focusing on virtue, happiness, pleasure, practical reasoning, and particularism. Sources include the Eudemian Ethics, contemporary philosophers who have taken many of these topics up again, and contemporary material such as that by Anscombe, Foot, Hursthouse, Korsgaard, and McDowell. GER:DB-Hum

4 units, not given this year

**PHIL 113. Hellenistic Philosophy**

(Same as PHIL 213) Epicureans, skeptics, and stoics on epistemology, ethics, metaphysics, and psychology. GER:DB-Hum

4 units, not given this year

**PHIL 115. Problems in Medieval Philosophy**

(Same as PHIL 215) Is a science of metaphysics possible? What is a Aristotelian science? How does science get started? How are the most basic principles of scientific thinking known? If the special sciences cover every particular subject, as chemistry deals with substantial change and meteorology with accidental change, then what is the subject of the general science of metaphysics? Can it be unified? Answers by Aristotle, Aquinas, Duns, Scotus, and Ockham. GER:DB-Hum

3-5 units, Spr (Wood, R)

**PHIL 117. Descartes**

(Same as PHIL 217) (Formerly 121/221.) Descartes's philosophical writings on rules for the direction of the mind, method, innate ideas and ideas of the senses, mind, God, eternal truths, and the material world. GER:DB-Hum

4 units, Win (De Pierris, G)

**PHIL 118. British Empiricism, 1660s-1730s**

(Same as PHIL 218) GER:DB-Hum

4 units, not given this year

**PHIL 119. Rationalists**

(Same as PHIL 219) (Formerly 143/243.) Developments in 17th-century continental philosophy. Descartes's views on mind, necessity, and knowledge. Spinoza and Leibniz emphasizing their own doctrines and their criticism of their predecessors. Prerequisite: 102. GER:DB-Hum

4 units, not given this year

**PHIL 122. Hume**

(Same as PHIL 222) (Formerly 120/220; graduate students enroll in 222.) Hume's theoretical philosophy, in particular, skepticism and naturalism, the theory of ideas and belief, space and time, causation and necessity, induction and laws of nature, miracles, a priori reasoning, the external world, and the identity of the self. GER:DB-Hum

4 units, not given this year

**PHIL 125. Kant's First Critique**

(Same as PHIL 225) (Graduate students register for 225.) The founding work of Kant's critical philosophy emphasizing his contributions to metaphysics and epistemology. His attempts to limit metaphysics to the objects of experience. Prerequisite: course dealing with systematic issues in metaphysics or epistemology, or with the history of modern philosophy. GER:DB-Hum

4 units, Aut (Anderson, L)

**PHIL 126B. Kant's Ethical Theory**

(Same as PHIL 226B) (Graduate students register for 226B.) Kant's moral philosophy based primarily on the Groundwork of Metaphysics of Morals, Critique of Practical Reason, and The Metaphysics of Morals. GER:DB-Hum

4 units, not given this year

**PHIL 127A. Kant's Value Theory**

(Same as PHIL 227A) (Graduate students register for 227A.) The role of autonomy, principled rational self-governance, in Kant's account of the norms to which human beings are answerable as moral agents, citizens, empirical inquirers, and religious believers. Relations between moral values (goodness, rightness) and aesthetic values (beauty, sublimity). GER:DB-Hum

4 units, not given this year

**PHIL 127B. Kant's Anthropology and Philosophy of History**

(Same as PHIL 227B) Kant's conception of anthropology or human nature, based on his philosophy of history, which influenced and anticipated 18th- and 19th-century philosophers of history such as Herder, Fichte, Hegel, and Marx. Texts include Idea for a Universal History, Conjectural Beginning of Human History, and Anthropology from a Pragmatic Point of View. Topics include: Kant's pragmatic approach to the study of human nature; the difficulty of human self knowledge; the role of regulative and teleological principles in studying human history; and Kant's theory of race.

4 units, not given this year

**PHIL 128. Fichte's Ethics**

(Same as PHIL 228) (Graduate students register for 228.) The founder of the German Idealist movement who adopted but revised Kant's project of transcendental philosophy basing it on the principle of awareness of free self-activity. The awareness of other selves and of ethical relations to them as a necessary condition for self-awareness. His writings from 1793-98 emphasizing the place of intersubjectivity in his theory of experience. GER:DB-Hum

4 units, Win (Wood, A)

**PHIL 130. Hegel**

(Same as PHIL 230) (Formerly 122/222; graduate students register for 230.) Introduction to Hegel's philosophy, emphasizing his moral and political philosophy, through study of his last major work (1821). May be repeated for credit. Prerequisite: course in the history of modern philosophy. GER:DB-Hum

4 units, Spr (Wood, A)

**PHIL 134. Phenomenology and Intersubjectivity**

(Same as PHIL 234) (Graduate students register for 234.) Readings from Husserl, Stein, Heidegger, Sartre, and Merleau-Ponty on subjects related to awareness of others. Topics include solipsism, collective experience, empathy, and objectification of the other. GER:DB-Hum

4 units, not given this year

**PHIL 135. Existentialism**

(Same as PHIL 235) (Formerly 132/232.) Focus is on the existentialist preoccupation with human freedom. What constitutes authentic individuality? What is one's relation to the divine? How can one live a meaningful life? What is the significance of death? A rethinking of the traditional problem of freedom and determinism in readings from Rousseau, Kierkegaard, and Nietzsche, and the extension of these ideas by Sartre, Beauvoir, and Camus, including their social and political consequences in light of 20th-century fascism and feminism. GER:DB-Hum

4 units, Spr (Anderson, L)

**PHIL 136. History of Analytic Philosophy**

(Same as PHIL 236) (Formerly 147/247; graduate students register for 236.) Theories of knowledge in Frege, Carnap, and Quine. Emphasis is on conceptions of analyticity and treatment of logic and mathematics. Prerequisite: 50 and one course numbered 150-165 or 181-90. GER:DB-Hum

4 units, not given this year

**PHIL 137. Wittgenstein**

(Same as PHIL 237) (Graduate students register for 237.) The main themes and claims in Wittgenstein's later work concentrating on his views about meaning, mind, knowledge, the nature of philosophical perplexity, and the nature of philosophical progress in his Philosophical Investigations. Emphasis is on the relationship between the novel arguments of the Investigations and its ways of writing up the results of philosophical questioning. GER:DB-Hum

4 units, not given this year

**PHIL 138. Recent European Philosophy: Between Nature and History**

(Same as PHIL 238) A critical introduction to the novel understandings of time, language, and cultural power developed by 20th-century continental thinkers, with close attention to work by Heidegger, Saussure, Benjamin, and Foucault. GER:DB-Hum

4 units, Aut (Hills, D)

**PHIL 143. Quine**

(Same as PHIL 243) (Formerly 183/283; graduate students register for 243.) The philosophy of Quine: meaning and communication; analyticity, modality, reference, and ontology; theory and evidence; naturalism; mind and the mental. GER:DB-Hum

4 units, not given this year

**PHIL 150. Basic Concepts in Mathematical Logic**

(Same as PHIL 250) (Formerly 159.) The concepts and techniques used in mathematical logic, primarily through the study of the language of first order logic. Topics: formalization, proof, propositional logic, quantifiers, sets, mathematical induction, and enumerability. GER:DB-Math

4 units, Aut (Barker-Plummer, D)

**PHIL 150X. Basic Concepts in Mathematical Logic**

Equivalent to the second half of 150. Students attend the first meeting of 150 and rejoin the class on October 30. Prerequisite: CS 103A or X, or PHIL 50.

2 units, Aut (Barker-Plummer, D)

**PHIL 151. First-Order Logic**

(Same as PHIL 251) (Formerly 160A.) The syntax and semantics of sentential and first-order logic. Concepts of model theory. Gödel's completeness theorem and its consequences: the Löwenheim-Skolem theorem and the compactness theorem. Prerequisite: 150 or consent of instructor. GER:DB-Math

4 units, Win (Mumma, J)

**PHIL 152. Computability and Logic**

(Same as PHIL 252) Approaches to effective computation: recursive functions, register machines, and programming styles. Proof of their equivalence, discussion of Church's thesis. Elementary recursion theory. These techniques used to prove Gödel's incompleteness theorem for arithmetic, whose technical and philosophical repercussions are surveyed. Prerequisite: 151. GER:DB-Math

4 units, Spr (Sommer, R)

**PHIL 153. Feminist Theories and Methods Across the Disciplines**

(Same as FEMST 103, FEMST 203, PHIL 253) The interdisciplinary foundations of feminist thought. The nature of disciplines and of interdisciplinary work. Challenges of feminism for scholarship and research. GER:EC-Gender

4-5 units, Win (Longino, H)

**PHIL 154. Modal Logic**

(Same as PHIL 254) (Graduate students register for 254.) Syntax and semantics of modal logic, and technical results like completeness and correspondence theory. Applications to philosophy and computer science. Prerequisite: 150 or preferably 151. GER:DB-Math

4 units, not given this year

**PHIL 155. General Interest Topics in Mathematical Logic**

Propositional calculus, Sudoku puzzles, problem P=NP. Possible worlds, modal logic. Incompleteness, provability logic. Logic of knowledge and belief. May be repeated for credit.

4 units, not given this year

**PHIL 157. Topics in Philosophy of Logic**

(Same as PHIL 257) (Graduate students register for 257.) Disputed foundational issues in logic; the question of what the subject matter and boundaries of logic are, such as whether what is called second-order logic should be counted as logic. What is the proper

notion of logical consequence? May be repeated for credit. Pre- or corequisite: 151, or consent of instructor.

3 units, not given this year

**PHIL 160A. Newtonian Revolution**

(Same as PHIL 260A) (Graduate students register for 260A.) 17th-century efforts in science including by Kepler, Galileo, Descartes, and Huygens, that formed the background for and posed the problems addressed in Newton's *Principia*. GER:DB-Hum

4 units, not given this year

**PHIL 160B. Newtonian Revolution**

(Same as PHIL 260B) (Graduate students register for 260B.) Newton's *Principia* in its historical context, emphasizing how it produced a revolution in the conduct of empirical research and in standards of evidence in science. GER:DB-Hum

4 units, not given this year

**PHIL 162. Philosophy of Mathematics**

(Same as MATH 162, PHIL 262) (Graduate students register for PHIL 262.) 20th-century approaches to the foundations and philosophy of mathematics. The background in mathematics, set theory, and logic. Schools and programs of logicism, predicativism, platonism, formalism, and constructivism. Readings from leading thinkers. Prerequisite: PHIL151 or consent of instructor. GER:DB-Math

4 units, Spr (Mumma, J)

**PHIL 163. Significant Figures in Philosophy of Science**

(Same as PHIL 263) (Graduate students register for 263.) Directed study of two or more thinkers, past or present, who have made a lasting impact on contemporary philosophy of science. Subjects last year were Henri Poincaré, Pierre Duhem, and Gaston Bachelard. GER:DB-Hum

4 units, not given this year

**PHIL 164. Central Topics in the Philosophy of Science: Theory and Evidence**

(Same as PHIL 264) (Graduate students register for 264.) The relation of theory to evidence and prediction, problems of induction, empirical under-determination of theory by evidence, and theory choice. Hypothetico-deductive, Bayesian, pragmatic, and inference to the best explanation models of explanation. The semantic approach to theories. GER:DB-Hum

4 units, Win (Ryckman, T)

**PHIL 164A. Central Topics in Philosophy of Science: Causation**

(Same as PHIL 264A) (Graduate Students register for 264A.) Establishing causes in science, engineering, and medicine versus establishing them in Anglo-American law, considered in the context of Hume and Mill on causation. May be repeated for credit.

4 units, not given this year

**PHIL 165. Philosophy of Physics**

(Same as PHIL 265) (Graduate students register for 265.) Central topic alternates annually between space-time theories and philosophical issues in quantum mechanics. Topics last year: absolute and relational theories of space, time, and motion. Newton's critique of Descartes and debate with Leibniz. The principle of relativity and space-time formulations of Aristotelian, Galilean, and relativity physics. Mach's principle and the theory of general relativity. Einstein's struggles with the principle of general covariance. Space-time substantivalism, and the meaning of background independence. May be repeated for credit if content is different. GER:DB-Hum

4 units, Aut (Ryckman, T)

**PHIL 166. Probability: Ten Great Ideas About Chance**

(Same as PHIL 266, STATS 167, STATS 267) Foundational approaches to thinking about chance in matters such as gambling, the law, and everyday affairs. Topics include: chance and decisions; the mathematics of chance; frequencies, symmetry, and chance; Bayes great idea; chance and psychology; misuses of chance; and harnessing chance. Emphasis is on the philosophical underpinnings and problems. Prerequisite: exposure to probability or a first course in statistics at the level of STATS 60 or 116. GER:DB-Math

4 units, Spr (Skyrms, B; Diaconis, P)

**PHIL 167A. Philosophy of Biology**

(Same as PHIL 267A) (Graduate students register for 267A.) Phi-

losophical questions raised by evolutionary biology. The concepts of fitness and adaptation. How are hypotheses about adaptation to be tested? How should organisms be classified? How can the history of the phylogenetic branching process be inferred? Are there laws in evolutionary biology? Are theories in biology reducible to theories in physics? What does evolutionary biology contribute to the understanding of human mind and culture? GER:DB-Hum

4 units, Win (Velasco, J)

**PHIL 167B. Philosophy, Biology, and Behavior**

(Same as PHIL 267B) (Graduate students register for 267B.) Continuation of 167A/267A. Further philosophical study of key theoretical ideas in biology, focusing on problems involving explanation of behavior. Topics: evolutionary versus proximate causal explanations of behavior; genetic and other determinisms; and classification and measurement of behavior. Prerequisites: 167A; or one PHIL course and either one BIOSCI course or Human Biology core; or equivalent with consent of instructor. GER:DB-Hum

4 units, Aut (Longino, H)

**PHIL 168. Theories of Truth**

(Same as PHIL 268) (Graduate students register for 268.) The correspondence, coherence, pragmatist and deflationary theories of truth. Tarski's semantic conception of truth and hierarchical truth definitions. The problems posed by the liar paradox for non-hierarchical theories. Formal theories of truth proposed since the 70s to deal with these problems.

4 units, not given this year

**PHIL 170. Ethical Theory**

(Same as ETHICSOC 170) Major strands in contemporary ethical theory. Readings include Bentham, Mill, Kant, and contemporary authors. GER:DB-Hum, EC-EthicReas

4 units, Spr (Kim, R)

**PHIL 171. Justice**

(Same as ETHICSOC 171, IPS 208, PHIL 271, POLISCI 136S, PUBLPOL 103C) Focus is on the ideal of a just society, and the place of liberty and equality in it, in light of contemporary theories of justice and political controversies. Topics include protecting religious liberty, financing schools and elections, regulating markets, assuring access to health care, and providing affirmative action and group rights. Issues of global justice including human rights and global inequality. GER:DB-Hum, EC-EthicReas

4-5 units, Aut (Cohen, J)

**PHIL 172. History of Modern Ethics**

(Same as PHIL 272) Major strands in the history of modern, pre-Kantian moral philosophy. Emphasis is on the dialogue between empiricists and rationalists on the subject of the relationship between the natural and the normative. Authors include Frances Hutcheson, David Hume, Adam Smith, Samuel Clarke, and Richard Price. GER:DB-Hum

4 units, Spr (Schapiro, T)

**PHIL 173A. Aesthetics: Metaphor across the Arts**

What if a metaphor is an instructively compact work of art, or if finding a metaphor apt is an instructively simple case of finding something aesthetically valuable? What does this reveal about the nature of art and language? Introduction to the philosophical study of art and aesthetic value, organized around metaphor. Contemporary accounts of metaphor as a verbal device. Arguments for the existence of nonverbal metaphor in nonliterary arts. The power and appeal of metaphors drawn from art, art criticism, theoretical inquiry, and everyday life. GER:DB-Hum

4 units, not given this year

**PHIL 173B. Metaethics**

(Same as PHIL 273B) (Graduate students register for 273B.) Can moral and ethical values be justified or is it just a matter of opinion? Is there a difference between facts and values? Are there any moral truths? Does it matter if there are not? Focus is not on which things or actions are valuable or morally right, but what is value or rightness itself. Contemporary metaethics. Prerequisites: 80, 181, and an ethics course. GER:DB-Hum

4 units, not given this year

**PHIL 174. Freedom and the Practical Standpoint**

(Same as PHIL 274) (Graduate students register for 274.) Confronted with the question of how to act, people think of themselves as freely determining their own conduct. Natural science poses a challenge to this by explaining all events, including human actions,

in terms of causal processes. Are people justified in thinking of themselves as free? Major philosophical approaches to this question: incompatibilism, compatibilism, and the two-standpoint view. GER:DB-Hum

*4 units, not given this year*

**PHIL 174A. Moral Limits of the Market**

(Same as ETHICSOC 174A, PHIL 274A) Morally controversial uses of markets and market reasoning in areas such as organ sales, procreation, education, and child labor. Would a market for organ donation make saving lives more efficient; if it did, would it thereby be justified? Should a nation be permitted to buy the right to pollute? Readings include Walzer, Arrow, Rawls, Sen, Frey, Titmuss, and empirical cases. GER:DB-Hum

*4 units, Win (Satz, D)*

**PHIL 175. Philosophy of Law**

Philosophical foundations of law and the legal system. The justifiability of patterns of assigning legal responsibility within criminal law. Prerequisite: PHIL 80 and one additional PHIL course. GER:DB-Hum

*4 units, not given this year*

**PHIL 175A. Ethics and Politics of Public Service**

(Same as ETHICSOC 133, PHIL 275A, POLISCI 133, PUBLPOL 103D) Ethical and political questions in public service work, including volunteering, service learning, humanitarian assistance, and public service professions such as medicine and teaching. Motives and outcomes in service work. Connections between service work and justice. Is mandatory service an oxymoron? History of public service in the U.S. Issues in crosscultural service work. Integration with the Haas Center for Public Service to connect service activities and public service aspirations with academic experiences at Stanford. GER:DB-SocSci

*5 units, Win (Reich, R)*

**PHIL 175M. Two Ethical Theories and Being a Person**

(Same as PHIL 275M) The distinction between the ethics of being a person and the ethics of rules as opposed to the distinction between Kantian ethics and utilitarianism or consequentialism. Comparison of these two types of ethics with respect to their relationship to agency and being a good person. Relations between Western ethics and those of other continents. GER:DB-Hum

*4 units, not given this year*

**PHIL 176. Political Philosophy: The Social Contract Tradition**

(Same as PHIL 276) (Graduate students register for 276.) Why and under what conditions do human beings need political institutions? What makes them legitimate or illegitimate? What is the nature, source, and extent of the obligation to obey the legitimate ones, and how should people alter or overthrow the others? Answers by political theorists of the early modern period: Hobbes, Locke, Rousseau, and Kant. GER:DB-Hum

*4 units, Spr (Hills, D)*

**PHIL 176A. Classical Seminar: Origins of Political Thought**

(Same as CLASSHIS 133, CLASSHIS 333, HUMNTIES 321, PHIL 276A, POLISCI 230A) Political philosophy in classical antiquity, focusing on canonical works of Thucydides, Plato, Aristotle, and Cicero. Historical background. Topics include: political obligation, citizenship, and leadership; origins and development of democracy; and law, civic strife, and constitutional change. GER:DB-Hum

*5 units, Win (Ober, J; Simonton, M)*

**PHIL 176B. The Economic Individual in the Behavioral Sciences**

(Same as PHIL 276B) (Graduate students register for 276B.)

*4 units, not given this year*

**PHIL 177. Philosophical Issues Concerning Race and Racism**

(Same as POLISCI 136) Concepts of race, race consciousness, and racism, and their connections. What is race and what is its role in racism? How should ethnic and racial identities be viewed to secure the conditions in which humanity can be seen as a single moral community whose members have equal respect? What laws, values, and institutions best embody the balance among competing goals of group loyalty, opposition to racism, and common humanity? Philosophical writings on freedom and equality, human rights, pluralism, and affirmative action. Historical accounts of group exclusion. GER:DB-Hum, EC-AmerCul

*4 units, not given this year*

**PHIL 178. Ethics in Society Honors Seminar**

(Same as ETHICSOC 190) For students planning honors in Ethics in Society. Methods of research. Students present issues of public and personal morality; topics chosen with advice of instructor.

*3 units, Win (Reich, R)*

**PHIL 179S. Moral Psychology, Reasons for Action, and Moral Theory**

(Same as PHIL 279S) What sorts of considerations does an ethical agent take to be good reasons for action? Work in moral psychology to illuminate the theory of practical reasons, and the theory of practical reasons to test the prospects for systematic moral theory. Can any systematic moral theory be reconciled with the moral psychology of ordinary, morally respectable agents? Reading include Bernard Williams, Rosalind Hursthouse, Peter Railton, T.M. Scanlon, and Barbara Herman.

*4 units, not given this year*

**PHIL 180. Metaphysics**

(Same as PHIL 280) Traditional philosophical riddles involving the notion of existence including: the ontological argument for the existence of God; the problem of intuitively true, negative existential statements; the sorites paradox; and the question of why there is anything at all. Conceptual tools philosophers use to address these questions, from nonexistent objects to possible worlds. Metaphysics. GER:DB-Hum

*4 units, Aut (Crimmins, M)*

**PHIL 180A. Realism, Anti-Realism, Irrationalism, Quasi-Realism**

(Same as PHIL 280A) Realism and its opponents as options across a variety of different domains: natural science, mathematics, ethics, and aesthetics. Clarify the various conceptions that fall under these terms and outline the reasons for and against adopting realism for the various domains. Highlight the general issues involved. Prerequisites: 80, 181 GER:DB-Hum

*4 units, Win (Burgess, A; Hussain, N)*

**PHIL 181. Philosophy of Language**

(Same as PHIL 281) The study of conceptual questions about language as a focus of contemporary philosophy for its inherent interest and because philosophers see questions about language as behind perennial questions in other areas of philosophy including epistemology, philosophy of science, metaphysics, and ethics. Key concepts and debates about the notions of meaning, truth, reference, and language use, with relations to psycholinguistics and formal semantics. Readings from philosophers such as Frege, Russell, Wittgenstein, Grice, and Kripke. Prerequisites: 80 and background in logic. GER:DB-Hum

*4 units, Spr (Crimmins, M)*

**PHIL 182. Truth**

(Same as PHIL 282) Philosophical debates about the place in human lives and the value to human beings of truth and its pursuit. The nature and significance of truth-involving virtues such as accuracy, sincerity, and candor. GER:DB-Hum

*4 units, Win (Hills, D)*

**PHIL 184. Theory of Knowledge**

(Same as PHIL 284) Competing theories of epistemic justification (foundationalism, coherentism, and externalism) against the background of radical scepticism. Readings from contemporary sources. Prerequisite: 80 or consent of instructor. GER:DB-Hum

*4 units, Spr (Alonso, F)*

**PHIL 184B. Philosophy of the Body**

How essential is the body to people's conception of themselves as individuals and as human beings? What role does embodiment play in shaping cognitive capacities? How much or what kind of somatic awareness is required for agency? Embodiment theories of cognition. Readings from Plato, Descartes, Nietzsche, Merleau-Ponty, Parfit, novelist Michel Houellebecq, and contemporary philosophy of mind and cognitive science. GER:DB-Hum

*4 units, not given this year*

**PHIL 184F. Feminist Theories of Knowledge**

(Same as FEMST 166, PHIL 284F) Feminist critique of traditional approaches in epistemology and alternative feminist approaches to such topics as reason and rationality, objectivity, experience, truth, the knowing subject, knowledge and values, knowledge and power. GER:DB-Hum, EC-Gender

*4 units, not given this year*

**PHIL 184P. Probability and Epistemology**

Confirmation theory and various ways of trying to understand the concept of evidence. Discuss a series of issues in epistemology including probabilism (the view that you should assign degrees of belief to various propositions), conditionalization, confirmational holism, reliabilism and justification, and disagreement. GER:DB-Hum

4 units, Spr (Velasco, J)

**PHIL 185. Memory**

Structure, content, functional role, and epistemic authority of human memories. Sources include philosophical and psychological literature from different schools and historical periods.

4 units, not given this year

**PHIL 186. Philosophy of Mind**

(Graduate students register for 286.) Debates concerning the nature of mental states, their relation to physical states of the human body, how they acquire their content, how people come to know about them in themselves and others, and the roles they play in the explanation of human conduct.

4 units, Win (Wishon, D)

**PHIL 187. Philosophy of Action**

(Same as PHIL 287) (Graduate students register for 287.) What is it to be an agent? Is there a philosophically defensible contrast between being an agent and being a locus of causal forces to which one is subject? What is it to act purposively? What is intention? What is it to act intentionally? What is it to act for a reason? Are the reasons for which one acts causes of one's action? What is it to act autonomously? Readings include Davidson and Frankfurt. Prerequisite: 80. GER:DB-Hum

4 units, Win (Bratman, M)

**PHIL 188. Personal Identity**

People seem to remain the same despite the changes they undergo during their lives. Why? The answer can influence one's beliefs about whether people are essentially bodies or minds, and whether one's own survival matters. Readings include John Locke, Thomas Reid, David Hume, Bernard Williams, and Derek Parfit. GER:DB-Hum

4 units, not given this year

**PHIL 189. Examples of Free Will**

(Same as PHIL 289) Examples drawn from three domains: choice, computation, and conflict of norms. Conceptually, a distinction is made between examples that are predictable and those that are not, but skepticism about making a sharp distinction between determinism and indeterminism is defended. GER:DB-Hum

4 units, Win (Suppes, P)

**PHIL 190. Introduction to Cognitive and Information Sciences**

(Same as LINGUIST 144, PSYCH 132, SYMSYS 100) The history, foundations, and accomplishments of the cognitive sciences, including presentations by leading Stanford researchers in artificial intelligence, linguistics, philosophy, and psychology. Overview of the issues addressed in the Symbolic Systems major. GER:DB-SocSci

4 units, Spr (Wasow, T; McClelland, J)

**PHIL 193H. The Art of the Movies: Story, Drama, and Image**

A philosophical study of how movies coordinate and transform elements they borrow from older arts of literary narrative, live theater, and graphic illustration. Examples from the career of Alfred Hitchcock. GER:DB-Hum

4 units, not given this year

**PHIL 193W. Nietzsche, Dostoevsky, and Sartre**

Literary works in which philosophical ideas and issues are put forward, such as prose poems, novels, and plays. Ideas and issues and the dramatic or narrative structures through which they are presented. Texts include: Nietzsche, Thus Spoke Zarathustra; Dostoevsky, The Brothers Karamazov; and Sartre, Nausea and No Exit. GER:DB-Hum

4 units, not given this year

**PHIL 194A. Empiricism and the Philosophy of Mind**

Priority to majors. 20th-century analytic and early modern philosophy of mind and epistemology. Main text is Wilfrid Sellars's Empiricism and the Philosophy of Mind; source materials and commentary. Enrollment limited to 12.

4 units, not given this year

**PHIL 194B. The Ethics of Belief**

Priority to majors. Are beliefs subject to moral evaluation? Can it be right or wrong to believe or disbelieve something? Are people morally required to believe only that for which there is sufficient evidence; or can the good consequences of believing something justify the belief, irrespective of the evidence? Contemporary and historical sources. Enrollment limited to 12.

4 units, not given this year

**PHIL 194C. Time and Free Will**

Classic and contemporary reading on free-will, with special attention to the Causation Argument for incompatibilism, and issues involving causation and time. GER:DB-Hum

4 units, Win (Perry, J)

**PHIL 194E. Beauty and Other Forms of Value**

The nature and importance of beauty and of our capacity to discern it and respond to it, as discussed by philosophers and artists from various traditions and historical periods. Attempts to think out the relations between beauty and ethical values (such as goodness) on the one hand and cognitive values (such as truth) on the other. GER:DB-Hum

4 units, Aut (Hills, D)

**PHIL 194P. Naming and Necessity**

Saul Kripke's lectures on reference, modal metaphysics, and the mind/body problem. GER:DB-Hum

4 units, Spr (Burgess, A)

**PHIL 194R. Epistemic Paradoxes**

Paradoxes that arise from concepts of knowledge and rational belief, such as the skeptical paradox, the preface paradox, and Moore's paradox. Can one lose knowledge without forgetting anything? Can one change one's mind in a reasonable way without gaining new evidence? GER:DB-Hum

4 units, not given this year

**PHIL 195A. Unity of Science**

Primarily for seniors.

4-5 units, not given this year

**PHIL 195B. Donor Seminar: Practical Reasoning**

Primarily for seniors. Relationships among action, deliberation, reasons, and rationality. On what basis do people decide what to do? What norms or rules structure reasoning? What constitutes rationality?

4 units, not given this year

**PHIL 196. Tutorial, Senior Year**

(Staff)

5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**PHIL 197. Individual Work, Undergraduate**

May be repeated for credit.

1-15 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**PHIL 198. The Dualist**

Weekly meeting of the editorial board of The Dualist, a national journal of undergraduate work in philosophy. Open to all undergraduates. May be taken 1-3 quarters. (Potochnik, Yap)

1 unit, Aut (Glezer, T), Win (Glezer, T), Spr (Staff)

**PHIL 199. Seminar for Prospective Honors Students**

Open to juniors intending to do honors in philosophy. Methods of research in philosophy. Topics and strategies for completing honors project. May be repeated for credit.

2 units, Spr (Miyake, T)

**PHIL 249. Evidence and Evolution**

(Same as PHIL 349) The logic behind the science. The concept of evidence and how it is used in science with regards to testing claims in evolutionary biology and using tools from probability theory, Bayesian, likelihoodist, and frequentist ideas. Questions about evidence that arise in connection with evolutionary theory. Creationism and intelligent design. Questions that arise in connection with testing hypotheses about adaptation and natural selection and hypotheses about phylogenetic relationships.

3-5 units, not given this year

**PHIL 278. The Ethics of Environmental Choices**

(Same as PHIL 378) Investigation of the institutional and individual dimensions of environmental choices. On the institutional side, examine externalities, the tragedy of the commons, sustainable development and environmental policy. On the individual side,

discuss individual responsibility, intrinsic value, and moral pluralism. Focus on decision-making including the role of risk analysis, the rate of discount for effects on future generations, cost-benefit analysis, and scientific epistemology. GER:DB-Hum  
4 units, Spr (Satz, D; Schneider, S)

## GRADUATE COURSES IN PHILOSOPHY

### PHIL 201. Introduction to Medieval Philosophy

(Same as PHIL 101) Classics of Western philosophy by Augustine, Boethius, Anselm, Abelard, Aquinas, and Ockham. Explore the puzzles facing someone seeking to lead a good life and to understand herself and her world. A theory of will and human motivation, a theory of ethics based on the agent's intention, and a theory of divine omniscience and omnipotence consistent with divine goodness and human freedom. Works include *On Free Choice*, *The Consolation of Philosophy*, *Ethics*, *Summa theologiae*, and *The Connection of the Virtues*.  
4 units, Win (Wood, R)

### PHIL 206. Ancient Skepticism

(Same as PHIL 106) The ancient Pyrrhonian skeptics who think that for any claim there is no more reason to assert it than deny it and that a life without any beliefs is the best route to happiness. Some ancient opponents of the Pyrrhonian skeptics and some relations between ancient and modern skepticism.  
4 units, Spr (Bobonich, C)

### PHIL 207. Plato's Early Dialogues

(Same as PHIL 107) Some of the most important early or Socratic dialogues including the *Charmides*, the *Gorgias* and the *Protagoras* (as well as some others). Issues covered include weakness of will, the connection between knowledge and virtue and happiness and virtue and whether Socrates' method leads inevitably to ethical skepticism.  
4 units, Aut (Bobonich, C)

### PHIL 210. Plato

(Same as PHIL 110) Plato's Republic.  
4 units, not given this year

### PHIL 211. Aristotle and Contemporary Ethics

(Same as PHIL 111) Aristotle's *Nicomachean Ethics*, focusing on virtue, happiness, pleasure, practical reasoning, and particularism. Sources include the *Eudemian Ethics*, contemporary philosophers who have taken many of these topics up again, and contemporary material such as that by Anscombe, Foot, Hursthouse, Korsgaard, and McDowell.  
4 units, not given this year

### PHIL 213. Hellenistic Philosophy

(Same as PHIL 113) Epicureans, skeptics, and stoics on epistemology, ethics, metaphysics, and psychology.  
4 units, not given this year

### PHIL 215. Problems in Medieval Philosophy

(Same as PHIL 115) Is a science of metaphysics possible? What is an Aristotelian science? How does science get started? How are the most basic principles of scientific thinking known? If the special sciences cover every particular subject, as chemistry deals with substantial change and meteorology with accidental change, then what is the subject of the general science of metaphysics? Can it be unified? Answers by Aristotle, Aquinas, Duns, Scotus, and Ockham.  
3-5 units, Spr (Wood, R)

### PHIL 217. Descartes

(Same as PHIL 117) (Formerly 121/221.) Descartes's philosophical writings on rules for the direction of the mind, method, innate ideas and ideas of the senses, mind, God, eternal truths, and the material world.  
4 units, Win (De Pierris, G)

### PHIL 218. British Empiricism, 1660s-1730s

(Same as PHIL 118)  
4 units, not given this year

### PHIL 219. Rationalists

(Same as PHIL 119) (Formerly 143/243.) Developments in 17th-century continental philosophy. Descartes's views on mind, necessity, and knowledge. Spinoza and Leibniz emphasizing their own doctrines and their criticism of their predecessors. Prerequisite: 102.  
4 units, not given this year

### PHIL 222. Hume

(Same as PHIL 122) (Formerly 120/220; graduate students enroll in 222.) Hume's theoretical philosophy, in particular, skepticism and naturalism, the theory of ideas and belief, space and time, causation and necessity, induction and laws of nature, miracles, a priori reasoning, the external world, and the identity of the self.  
4 units, not given this year

### PHIL 224. Kant's Philosophy of Physical Science

Kant's *Metaphysical Foundations of Natural Science* (1786), published between the first (1781) and second (1787) editions of the *Critique of Pure Reason*, in the scientific and philosophical context provided by Newtonian natural philosophy and the Leibnizean tradition. The place of this work in the development of Kant's thought. Prerequisite: acquaintance with either Kant's theoretical philosophy or the contemporaneous scientific context, principally Newton, Leibniz, and Euler.  
4 units, not given this year

### PHIL 224A. Mathematics in Kant's Philosophy

Recent work in Kant's philosophy of mathematics, examined with a view to the role of mathematics, both pure and applied, within Kant's philosophy more generally. Particular attention to the Schematism chapter of the *Critique of Pure Reason*. Prerequisite: prior acquaintance with Kant's theoretical philosophy and the *Critique of Pure Reason*.  
4 units, Aut (Friedman, M)

### PHIL 225. Kant's First Critique

(Same as PHIL 125) (Graduate students register for 225.) The founding work of Kant's critical philosophy emphasizing his contributions to metaphysics and epistemology. His attempts to limit metaphysics to the objects of experience. Prerequisite: course dealing with systematic issues in metaphysics or epistemology, or with the history of modern philosophy.  
4 units, Aut (Anderson, L)

### PHIL 226B. Kant's Ethical Theory

(Same as PHIL 126B) (Graduate students register for 226B.) Kant's moral philosophy based primarily on the *Groundwork of Metaphysics of Morals*, *Critique of Practical Reason*, and *The Metaphysics of Morals*.  
4 units, not given this year

### PHIL 227A. Kant's Value Theory

(Same as PHIL 127A) (Graduate students register for 227A.) The role of autonomy, principled rational self-governance, in Kant's account of the norms to which human beings are answerable as moral agents, citizens, empirical inquirers, and religious believers. Relations between moral values (goodness, rightness) and aesthetic values (beauty, sublimity).  
4 units, not given this year

### PHIL 227B. Kant's Anthropology and Philosophy of History

(Same as PHIL 127B) Kant's conception of anthropology or human nature, based on his philosophy of history, which influenced and anticipated 18th- and 19th-century philosophers of history such as Herder, Fichte, Hegel, and Marx. Texts include *Idea for a Universal History*, *Conjectural Beginning of Human History*, and *Anthropology from a Pragmatic Point of View*. Topics include: Kant's pragmatic approach to the study of human nature; the difficulty of human self-knowledge; the role of regulative and teleological principles in studying human history; and Kant's theory of race.  
4 units, not given this year

### PHIL 228. Fichte's Ethics

(Same as PHIL 128) (Graduate students register for 228.) The founder of the German Idealist movement who adopted but revised Kant's project of transcendental philosophy basing it on the principle of awareness of free self-activity. The awareness of other selves and of ethical relations to them as a necessary condition for self-awareness. His writings from 1793-98 emphasizing the place of intersubjectivity in his theory of experience.  
4 units, Win (Wood, A)

### PHIL 230. Hegel

(Same as PHIL 130) (Formerly 122/222; graduate students register for 230.) Introduction to Hegel's philosophy, emphasizing his moral and political philosophy, through study of his last major work (1821). May be repeated for credit. Prerequisite: course in the history of modern philosophy.  
4 units, Spr (Wood, A)

**PHIL 233. Husserl**

Husserl's phenomenology. Main themes in his philosophy and their interconnections, including consciousness, perception, intersubjectivity, lifeworld, ethics, mathematics and the sciences, and time and space. Works in English translation.

4 units, not given this year

**PHIL 234. Phenomenology and Intersubjectivity**

(Same as PHIL 134) (Graduate students register for 234.) Readings from Husserl, Stein, Heidegger, Sartre, and Merleau-Ponty on subjects related to awareness of others. Topics include solipsism, collective experience, empathy, and objectification of the other.

4 units, not given this year

**PHIL 235. Existentialism**

(Same as PHIL 135) (Formerly 132/232.) Focus is on the existentialist preoccupation with human freedom. What constitutes authentic individuality? What is one's relation to the divine? How can one live a meaningful life? What is the significance of death? A rethinking of the traditional problem of freedom and determinism in readings from Rousseau, Kierkegaard, and Nietzsche, and the extension of these ideas by Sartre, Beauvoir, and Camus, including their social and political consequences in light of 20th-century fascism and feminism.

4 units, Spr (Anderson, L)

**PHIL 236. History of Analytic Philosophy**

(Same as PHIL 136) (Formerly 147/247; graduate students register for 236.) Theories of knowledge in Frege, Carnap, and Quine. Emphasis is on conceptions of analyticity and treatment of logic and mathematics. Prerequisite: 50 and one course numbered 150-165 or 181-90.

4 units, not given this year

**PHIL 237. Wittgenstein**

(Same as PHIL 137) (Graduate students register for 237.) The main themes and claims in Wittgenstein's later work concentrating on his views about meaning, mind, knowledge, the nature of philosophical perplexity, and the nature of philosophical progress in his Philosophical Investigations. Emphasis is on the relationship between the novel arguments of the Investigations and its ways of writing up the results of philosophical questioning.

4 units, not given this year

**PHIL 238. Recent European Philosophy: Between Nature and History**

(Same as PHIL 138) A critical introduction to the novel understandings of time, language, and cultural power developed by 20th-century continental thinkers, with close attention to work by Heidegger, Saussure, Benjamin, and Foucault.

4 units, Aut (Hills, D)

**PHIL 239. Teaching Methods in Philosophy**

For Ph.D. students in their first or second year who are or are about to be teaching assistants for the department. May be repeated for credit.

1-4 units, Aut (Wolfson, B), Spr (Wolfson, B)

**PHIL 240. Individual Work for Graduate Students**

May be repeated for credit.

1-15 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**PHIL 241. Dissertation Development Seminar**

Required of second-year Philosophy Ph.D. students; restricted to Stanford Philosophy Ph.D. students. Prerequisite: consent of instructor.

2-3 units, Sum (Bobonich, C)

**PHIL 242. The Philosophical and Educational Thought of John Dewey**

(Same as EDUC 304) Dewey's pragmatic philosophy and educational thought; his debt to Darwin, Hegel, Peirce, and James; his educational writings including *Democracy and Education*; and his call for a revolution in philosophy in *Reconstruction in Philosophy*. (SSPEP)

4 units, not given this year

**PHIL 243. Quine**

(Same as PHIL 143) (Formerly 183/283; graduate students register for 243.) The philosophy of Quine: meaning and communication; analyticity, modality, reference, and ontology; theory and evidence; naturalism; mind and the mental.

4 units, not given this year

**PHIL 248. Medieval Latin Paleography**

The history of medieval scripts and medieval abbreviation. Dating and placing Latin European medieval manuscripts. Editing medieval texts in philosophy, psychology, physics, and theology. Class project: an anonymous commentary on Aristotle's *Ethics* preserved in a Florentine manuscript.

3-5 units, not given this year

**PHIL 250. Basic Concepts in Mathematical Logic**

(Same as PHIL 150) (Formerly 159.) The concepts and techniques used in mathematical logic, primarily through the study of the language of first order logic. Topics: formalization, proof, propositional logic, quantifiers, sets, mathematical induction, and enumerability.

4 units, Aut (Barker-Plummer, D)

**PHIL 251. First-Order Logic**

(Same as PHIL 151) (Formerly 160A.) The syntax and semantics of sentential and first-order logic. Concepts of model theory. Gödel's completeness theorem and its consequences: the Löwenheim-Skolem theorem and the compactness theorem. Prerequisite: 150 or consent of instructor.

4 units, Win (Mumma, J)

**PHIL 252. Computability and Logic**

(Same as PHIL 152) Approaches to effective computation: recursive functions, register machines, and programming styles. Proof of their equivalence, discussion of Church's thesis. Elementary recursion theory. These techniques used to prove Gödel's incompleteness theorem for arithmetic, whose technical and philosophical repercussions are surveyed. Prerequisite: 151.

4 units, Spr (Sommer, R)

**PHIL 253. Feminist Theories and Methods Across the Disciplines**

(Same as FEMST 103, FEMST 203, PHIL 153) The interdisciplinary foundations of feminist thought. The nature of disciplines and of interdisciplinary work. Challenges of feminism for scholarship and research.

4-5 units, Win (Longino, H)

**PHIL 254. Modal Logic**

(Same as PHIL 154) (Graduate students register for 254.) Syntax and semantics of modal logic, and technical results like completeness and correspondence theory. Applications to philosophy and computer science. Prerequisite: 150 or preferably 151.

4 units, not given this year

**PHIL 257. Topics in Philosophy of Logic**

(Same as PHIL 157) (Graduate students register for 257.) Disputed foundational issues in logic; the question of what the subject matter and boundaries of logic are, such as whether what is called second-order logic should be counted as logic. What is the proper notion of logical consequence? May be repeated for credit. Pre- or corequisite: 151, or consent of instructor.

3 units, not given this year

**PHIL 258. Minds and Machines**

Readings on arguments concerning mechanical models of the mind including Turing machine models to which Gödel's incompleteness theorems are relevant, and connectionist (neural net) models. Prerequisites: 151 (formerly 160A), 152, or equivalents. Recommended: 389. (Feferman)

4 units, not given this year

**PHIL 260A. Newtonian Revolution**

(Same as PHIL 160A) (Graduate students register for 260A.) 17th-century efforts in science including by Kepler, Galileo, Descartes, and Huygens, that formed the background for and posed the problems addressed in Newton's *Principia*.

4 units, not given this year

**PHIL 260B. Newtonian Revolution**

(Same as PHIL 160B) (Graduate students register for 260B.) Newton's *Principia* in its historical context, emphasizing how it produced a revolution in the conduct of empirical research and in standards of evidence in science.

4 units, not given this year

**PHIL 262. Philosophy of Mathematics**

(Same as MATH 162, PHIL 162) (Graduate students register for PHIL 262.) 20th-century approaches to the foundations and philosophy of mathematics. The background in mathematics, set

theory, and logic. Schools and programs of logicism, predicativism, platonism, formalism, and constructivism. Readings from leading thinkers. Prerequisite: PHIL151 or consent of instructor.

4 units, Spr (Mumma, J)

**PHIL 263. Significant Figures in Philosophy of Science**

(Same as PHIL 163) (Graduate students register for 263.) Directed study of two or more thinkers, past or present, who have made a lasting impact on contemporary philosophy of science. Subjects last year were Henri Poincaré, Pierre Duhem, and Gaston Bachelard.

4 units, not given this year

**PHIL 264. Central Topics in the Philosophy of Science: Theory and Evidence**

(Same as PHIL 164) (Graduate students register for 264.) The relation of theory to evidence and prediction, problems of induction, empirical under-determination of theory by evidence, and theory choice. Hypothetico-deductive, Bayesian, pragmatic, and inference to the best explanation models of explanation. The semantic approach to theories.

4 units, Win (Ryckman, T)

**PHIL 264A. Central Topics in Philosophy of Science: Causation**

(Same as PHIL 164A) (Graduate Students register for 264A.) Establishing causes in science, engineering, and medicine versus establishing them in Anglo-American law, considered in the context of Hume and Mill on causation. May be repeated for credit.

4 units, not given this year

**PHIL 265. Philosophy of Physics**

(Same as PHIL 165) (Graduate students register for 265.) Central topic alternates annually between space-time theories and philosophical issues in quantum mechanics. Topics last year: absolute and relational theories of space, time, and motion. Newton's critique of Descartes and debate with Leibniz. The principle of relativity and space-time formulations of Aristotelian, Galilean, and relativity physics. Mach's principle and the theory of general relativity. Einstein's struggles with the principle of general covariance. Space-time substantivalism, and the meaning of background independence. May be repeated for credit if content is different.

4 units, Aut (Ryckman, T)

**PHIL 266. Probability: Ten Great Ideas About Chance**

(Same as PHIL 166, STATS 167, STATS 267) Foundational approaches to thinking about chance in matters such as gambling, the law, and everyday affairs. Topics include: chance and decisions; the mathematics of chance; frequencies, symmetry, and chance; Bayes great idea; chance and psychology; misuses of chance; and harnessing chance. Emphasis is on the philosophical underpinnings and problems. Prerequisite: exposure to probability or a first course in statistics at the level of STATS 60 or 116.

4 units, Spr (Skrmys, B; Diaconis, P)

**PHIL 267A. Philosophy of Biology**

(Same as PHIL 167A) (Graduate students register for 267A.) Philosophical questions raised by evolutionary biology. The concepts of fitness and adaptation. How are hypotheses about adaptation to be tested? How should organisms be classified? How can the history of the phylogenetic branching process be inferred? Are there laws in evolutionary biology? Are theories in biology reducible to theories in physics? What does evolutionary biology contribute to the understanding of human mind and culture?

4 units, Win (Velasco, J)

**PHIL 267B. Philosophy, Biology, and Behavior**

(Same as PHIL 167B) (Graduate students register for 267B.) Continuation of 167A/267A. Further philosophical study of key theoretical ideas in biology, focusing on problems involving explanation of behavior. Topics: evolutionary versus proximate causal explanations of behavior; genetic and other determinisms; and classification and measurement of behavior. Prerequisites: 167A; or one PHIL course and either one BIOSCI course or Human Biology core; or equivalent with consent of instructor.

4 units, Aut (Longino, H)

**PHIL 268. Theories of Truth**

(Same as PHIL 168) (Graduate students register for 268.) The correspondence, coherence, pragmatist and deflationary theories of truth. Tarski's semantic conception of truth and hierarchical truth definitions. The problems posed by the liar paradox for non-

hierarchical theories. Formal theories of truth proposed since the 70s to deal with these problems.

4 units, not given this year

**PHIL 271. Justice**

(Same as ETHICSOC 171, IPS 208, PHIL 171, POLISCI 136S, PUBLPOL 103C) Focus is on the ideal of a just society, and the place of liberty and equality in it, in light of contemporary theories of justice and political controversies. Topics include protecting religious liberty, financing schools and elections, regulating markets, assuring access to health care, and providing affirmative action and group rights. Issues of global justice including human rights and global inequality.

4-5 units, Aut (Cohen, J)

**PHIL 272. History of Modern Ethics**

(Same as PHIL 172) Major strands in the history of modern, pre-Kantian moral philosophy. Emphasis is on the dialogue between empiricists and rationalists on the subject of the relationship between the natural and the normative. Authors include Frances Hutcheson, David Hume, Adam Smith, Samuel Clarke, and Richard Price.

4 units, Spr (Schapiro, T)

**PHIL 273B. Metaethics**

(Same as PHIL 173B) (Graduate students register for 273B.) Can moral and ethical values be justified or is it just a matter of opinion? Is there a difference between facts and values? Are there any moral truths? Does it matter if there are not? Focus is not on which things or actions are valuable or morally right, but what is value or rightness itself. Contemporary metaethics. Prerequisites: 80, 181, and an ethics course.

4 units, not given this year

**PHIL 274. Freedom and the Practical Standpoint**

(Same as PHIL 174) (Graduate students register for 274.) Confronted with the question of how to act, people think of themselves as freely determining their own conduct. Natural science poses a challenge to this by explaining all events, including human actions, in terms of causal processes. Are people justified in thinking of themselves as free? Major philosophical approaches to this question: incompatibilism, compatibilism, and the two-standpoint view.

4 units, not given this year

**PHIL 274A. Moral Limits of the Market**

(Same as ETHICSOC 174A, PHIL 174A) Morally controversial uses of markets and market reasoning in areas such as organ sales, procreation, education, and child labor. Would a market for organ donation make saving lives more efficient; if it did, would it thereby be justified? Should a nation be permitted to buy the right to pollute? Readings include Walzer, Arrow, Rawls, Sen, Frey, Titmuss, and empirical cases.

4 units, Win (Satz, D)

**PHIL 275A. Ethics and Politics of Public Service**

(Same as ETHICSOC 133, PHIL 175A, POLISCI 133, PUBLPOL 103D) Ethical and political questions in public service work, including volunteering, service learning, humanitarian assistance, and public service professions such as medicine and teaching. Motives and outcomes in service work. Connections between service work and justice. Is mandatory service an oxymoron? History of public service in the U.S. Issues in crosscultural service work. Integration with the Haas Center for Public Service to connect service activities and public service aspirations with academic experiences at Stanford.

5 units, Win (Reich, R)

**PHIL 275M. Two Ethical Theories and Being a Person**

(Same as PHIL 175M) The distinction between the ethics of being a person and the ethics of rules as opposed to the distinction between Kantian ethics and utilitarianism or consequentialism consequentialism. Comparison of these two types of ethics with respect to their relationship to agency and being a good person. Relations between Western ethics and those of other continents.

4 units, not given this year

**PHIL 276. Political Philosophy: The Social Contract Tradition**

(Same as PHIL 176) (Graduate students register for 276.) Why and under what conditions do human beings need political institutions? What makes them legitimate or illegitimate? What is the nature, source, and extent of the obligation to obey the legitimate ones, and how should people alter or overthrow the others? Answers by

political theorists of the early modern period: Hobbes, Locke, Rousseau, and Kant.

4 units, Spr (Hills, D)

**PHIL 276A. Classical Seminar: Origins of Political Thought**

(Same as CLASSHIS 133, CLASSHIS 333, HUMNTIES 321, PHIL 176A, POLISCI 230A) Political philosophy in classical antiquity, focusing on canonical works of Thucydides, Plato, Aristotle, and Cicero. Historical background. Topics include: political obligation, citizenship, and leadership; origins and development of democracy; and law, civic strife, and constitutional change.

5 units, Win (Ober, J; Simonton, M)

**PHIL 276B. The Economic Individual in the Behavioral Sciences**

(Same as PHIL 176B) (Graduate students register for 276B.)

4 units, not given this year

**PHIL 279. Collectivities**

(Same as POLISCI 336J) Issues about the nature of collective action, shared intention, and cooperation, the role of sociality in the nature of mind, problems of preference and judgment aggregation, and, quite generally, different ways of thinking about the relationship of I to we. Enrollment limited to 30.

4 units, Aut (Bratman, M; Cohen, J)

**PHIL 279S. Moral Psychology, Reasons for Action, and Moral Theory**

(Same as PHIL 179S) What considerations does an ethical agent take to be good reasons for action? Work in moral psychology to illuminate the theory of practical reasons, and the theory of practical reasons to test the prospects for systematic moral theory. Can any systematic moral theory be reconciled with the moral psychology of ordinary, morally respectable agents? Reading include Bernard Williams, Rosalind Hursthouse, Peter Railton, T.M. Scanlon, and Barbara Herman.

4 units, not given this year

**PHIL 280. Metaphysics**

(Same as PHIL 180) Traditional philosophical riddles involving the notion of existence including: the ontological argument for the existence of God; the problem of intuitively true, negative existential statements; the sorites paradox; and the question of why there is anything at all. Conceptual tools philosophers use to address these questions, from nonexistent objects to possible worlds. Metaphysics.

4 units, Aut (Crimmins, M)

**PHIL 280A. Realism, Anti-Realism, Irrealism, Quasi-Realism**

(Same as PHIL 180A) Realism and its opponents as options across a variety of different domains: natural science, mathematics, ethics, and aesthetics. Clarify the various conceptions that fall under these terms and outline the reasons for and against adopting realism for the various domains. Highlight the general issues involved. Prerequisites: 80, 181

4 units, Win (Burgess, A; Hussain, N)

**PHIL 281. Philosophy of Language**

(Same as PHIL 181) The study of conceptual questions about language as a focus of contemporary philosophy for its inherent interest and because philosophers see questions about language as behind perennial questions in other areas of philosophy including epistemology, philosophy of science, metaphysics, and ethics. Key concepts and debates about the notions of meaning, truth, reference, and language use, with relations to psycholinguistics and formal semantics. Readings from philosophers such as Frege, Russell, Wittgenstein, Grice, and Kripke. Prerequisites: 80 and background in logic.

4 units, Spr (Crimmins, M)

**PHIL 282. Truth**

(Same as PHIL 182) Philosophical debates about the place in human lives and the value to human beings of truth and its pursuit. The nature and significance of truth-involving virtues such as accuracy, sincerity, and candor.

4 units, Win (Hills, D)

**PHIL 284. Theory of Knowledge**

(Same as PHIL 184) Competing theories of epistemic justification (foundationalism, coherentism, and externalism) against the background of radical scepticism. Readings from contemporary sources. Prerequisite: 80 or consent of instructor.

4 units, Spr (Alonso, F)

**PHIL 284F. Feminist Theories of Knowledge**

(Same as FEMST 166, PHIL 184F) Feminist critique of traditional approaches in epistemology and alternative feminist approaches to such topics as reason and rationality, objectivity, experience, truth, the knowing subject, knowledge and values, knowledge and power.

4 units, not given this year

**PHIL 287. Philosophy of Action**

(Same as PHIL 187) (Graduate students register for 287.) What is it to be an agent? Is there a philosophically defensible contrast between being an agent and being a locus of causal forces to which one is subject? What is it to act purposively? What is intention? What is it to act intentionally? What is it to act for a reason? Are the reasons for which one acts causes of one's action? What is it to act autonomously? Readings include Davidson and Frankfurt. Prerequisite: 80.

4 units, Win (Bratman, M)

**PHIL 289. Examples of Free Will**

(Same as PHIL 189) Examples drawn from three domains: choice, computation, and conflict of norms. Conceptually, a distinction is made between examples that are predictable and those that are not, but skepticism about making a sharp distinction between determinism and indeterminism is defended.

4 units, Win (Suppes, P)

**PHIL 312. Aristotle's Psychology**

De Anima and parts of Parva Naturalia.

4 units, not given this year

**PHIL 314. Practical Reasoning in Plato and Aristotle**

It is often said that the greatest difference between Plato's ethics and those of Aristotle is that the latter thinks that practical and theoretical reason are distinct, but the former does not. We shall read some of both Plato and Aristotle and ask whether the above claim is true and then consider what the implications the differences between their views of practical reason have for the rest of their ethics.

4 units, Win (Bobonich, C)

**PHIL 318. Aristotle's Ethics**

Topics in Aristotle's ethical theory and related parts of his psychology.

4 units, not given this year

**PHIL 319. Aristotles Metaphysics**

Aristotle's views about substance and the nature and possibility of metaphysics. Focus is on Categories and Metaphysics Book Zeta.

3 units, not given this year

**PHIL 322. Hume**

Hume's theoretical philosophy emphasizing skepticism and naturalism, the theory of ideas and belief, space and time, causation and necessity, induction and laws of nature, miracles, a priori reasoning, the external world, and the identity of the self.

4 units, Spr (De Pierris, G)

**PHIL 323. Kant's Criticism of Metaphysics**

Motivations and strategies of Kant's criticisms of traditional metaphysics in the Critique of Pure Reason. Leibnizian and Wolffian versions of the concept containment theory of truth and the Wolffian ideal of a conceptual system of metaphysical knowledge. Kant's analytic/synthetic distinction, focusing on its place in the rejection of metaphysics and in arguments about the ideas of reason in the transcendental dialectic. Prerequisite: course on the first Critique, or consent of instructor.

4 units, not given this year

**PHIL 332. Nietzsche**

Preference to doctoral students. Nietzsche's later works emphasizing The Gay Science, Beyond Good and Evil, and On the Genealogy of Morals. The shape of Nietzsche's philosophical and literary projects, and his core doctrines such as eternal recurrence, will to power, and perspectivism. Problems such as the proper regulation of belief, and the roles of science, morality, art, and illusion in life.

4 units, Spr (Anderson, L)

**PHIL 334. Habermas**

Does Habermas have a distinctive account of normativity and normative judgements?

3-5 units, not given this year

**PHIL 335. Topics in Aesthetics**

May be repeated for credit.

4 units, not given this year

**PHIL 340. Time and Free Will**

Free will and the consequence argument of Peter van Inwagen and others. Focus is on the principle that one cannot change the past and the problem of backtracking conditionals, and less on the problem raised by determinism. Hypotheses less drastic than determinism support backtrackers; given the backtracker, would someone's not having done something require that he change the past? Issues related to time, change, the phenomenology of agency, and McTaggart's argument about the reality of time.

3-5 units, not given this year

**PHIL 349. Evidence and Evolution**

(Same as PHIL 249) The logic behind the science. The concept of evidence and how it is used in science with regards to testing claims in evolutionary biology and using tools from probability theory, Bayesian, likelihoodist, and frequentist ideas. Questions about evidence that arise in connection with evolutionary theory. Creationism and intelligent design. Questions that arise in connection with testing hypotheses about adaptation and natural selection and hypotheses about phylogenetic relationships.

3-5 units, not given this year

**PHIL 350A. Model Theory**

Language and models of the first order, predicate calculus, complete and decidable theories. Fraisse-Ehrenfeucht games. Preservation theorems. Prerequisites: 150, 151, or equivalent.

3 units, not given this year

**PHIL 350B. Finite Model Theory**

(Same as MATH 290B) Classical model theory deals with the relationship between formal languages and their interpretation in finite or infinite structures; its applications to mathematics using first-order languages. The recent development of the model theory of finite structures in connection with complexity classes as measures of computational difficulty; how these classes are defined within certain languages that go beyond first-order logic in expressiveness, such as fragments of higher order or infinitary languages, rather than in terms of models of computation.

3 units, Win (Mints, G)

**PHIL 351A. Recursion Theory**

Theory of recursive functions and recursively enumerable sets. Register machines, Turing machines, and alternative approaches. Gödel's incompleteness theorems. Recursively unsolvable problems in mathematics and logic. Introduction to higher recursion theory. The theory of combinators and the lambda calculus. Prerequisites: 151, 152, and 161, or equivalents.

3 units, not given this year

**PHIL 351B. Constructive Mathematics**

Effective and non-effective proofs. Background from constructive logic and computability. Elementary constructive analysis, recursive analysis. Constructive models. Foundational issues. May be repeated for credit. Prerequisites: 151, 152, or equivalents, and a calculus class.

3 units, not given this year

**PHIL 352A. Set Theory**

(Same as MATH 292A) The basics of axiomatic set theory; the systems of Zermelo-Fraenkel and Bernays-Gödel. Topics: cardinal and ordinal numbers, the cumulative hierarchy and the role of the axiom of choice. Models of set theory, including the constructible sets and models constructed by the method of forcing. Consistency and independence results for the axiom of choice, the continuum hypothesis, and other unsettled mathematical and set-theoretical problems. Prerequisites: PHIL 160A,B, and MATH 161, or equivalents.

3 units, not given this year

**PHIL 352B. Set Theory**

(Same as MATH 292B) The basics of axiomatic set theory; the systems of Zermelo-Fraenkel and Bernays-Gödel. Topics: cardinal and ordinal numbers, the cumulative hierarchy and the role of the axiom of choice. Models of set theory, including the constructible sets and models constructed by the method of forcing. Consistency and independence results for the axiom of choice, the continuum hypothesis, and other unsettled mathematical and set-theoretical problems. Prerequisites: PHIL 160A,B, and MATH 161, or equivalents.

3 units, not given this year

**PHIL 353A. Proof Theory**

(Same as MATH 293A) Gentzen's natural deduction and sequential calculi for first-order propositional and predicate logics. Normalization and cut-elimination procedures. Relationships with computational lambda calculi and automated deduction. Prerequisites: 151, 152, and 161, or equivalents.

3 units, Aut (Mints, G; Inocencio Ferreira, F)

**PHIL 353B. Higher-Order Logic**

Second-order and general higher-order logic. Expressive power and failure of classical theorems such as axiomatizability, compactness, and Loewenheim-Skolem. Different systems of higher-order logic, including type theory. Proof theory and completeness over general models. History of type theory as an alternative foundation of mathematics. Applications in computer science and linguistics. May be repeated for credit once. Prerequisite: 151. Recommended: 152.

3 units, not given this year

**PHIL 353C. Functional Interpretations**

Finite-type arithmetic. Gödel's functional interpretation and Kreisel's modified realizability. Systems based on classical logic. Spector's extension by bar-recursive functionals. Kohlenbach's monotone interpretation and the bounded functional interpretation. The elimination of weak König's lemma. Uniform boundedness. A look at Tao's hard/soft analysis distinction.

4 units, Aut (Inocencio Ferreira, F)

**PHIL 354. Topics in Logic**

Readings on uses of proof theory in analysis and number theory. Proof mining: extraction of bounds from non-effective proofs, uniformity results. May be repeated for credit. Prerequisites: 151, 152, or equivalents, and a 100-level MATH course.

1-3 units, Win (Mints, G)

**PHIL 355. Logic and Social Choice**

Topics in the intersection of social choice theory and formal logic. Voting paradoxes, impossibility theorems and strategic manipulation, logical modeling of voting procedures, preference versus judgment aggregation, role of language in social choice, and metatheory of social choice. May be repeated for credit. Prerequisite: 151 or consent of instructor.

4 units, not given this year

**PHIL 356. Applications of Modal Logic**

Applications of modal logic to knowledge and belief, and actions and norms. Models of belief revision to develop a dynamic doxastic logic. A workable modeling of events and actions to build a dynamic deontic logic on that foundation. (Staff)

3 units, not given this year

**PHIL 358. Rational Agency and Intelligent Interaction**

(Same as CS 222) For advanced undergraduates, and M.S. and beginning Ph.D. students. Logic-based methods for knowledge representation, information change, and games in artificial intelligence and philosophy. Topics: knowledge, certainty, and belief; time and action; belief dynamics; preference and social choice; games; and desire and intention. Prerequisite: propositional and first-order logic. Recommended: modal logic; game theory.

3 units, Spr (Shoham, Y)

**PHIL 359. Advanced Modal Logic**

Mathematical analysis of modal systems, including bisimulation and expressive power, correspondence theory, algebraic duality, completeness and incompleteness, and extended modal logics, up to guarded fragments of first-order logic, fixed-point logics, and second-order logic. Prerequisite: 151, 154/254, or equivalent background.

4 units, not given this year

**PHIL 360. Core Seminar in Philosophy of Science**

Limited to first- and second-year Philosophy Ph.D. students.

4 units, not given this year

**PHIL 365. Seminar in Philosophy of Science: Time**

4 units, not given this year

**PHIL 366. Evolution and Communication**

Topics include information bottlenecks, signaling networks, information processing, invention of new signals, teamwork, evolution of complex signals, teamwork. Sources include signaling games invented by David Lewis and generalizations thereof, using evolutionary and learning dynamics.

4 units, not given this year

**PHIL 370. Core Seminar in Ethics**

Limited to first- and second-year students in the Philosophy Ph.D. program.

4 units, Aut (Schapiro, T)

**PHIL 372. Topics in Kantian Ethics**

Selected topics in ethics, considering both Kant's texts and recent writings by Kant interpreters and moral philosophers in the Kantian tradition. Among the topics covered will be: Practical reason, personal relationships, duties to oneself, evil, right and politics, lying, constructivism in ethics.

4 units, Aut (Wood, A)

**PHIL 372D. Graduate Seminar: John Rawls's Political Philosophy**

(Same as POLISCI 332) Leading ideas in A Theory of Justice, Political Liberalism, and The Law of Peoples.

5 units, not given this year

**PHIL 372E. Graduate Seminar on Moral Psychology**

Recent philosophical works on desire, intention, the motivation of action, valuing, and reasons for action. Readings: Williams, Korsgaard, Smith, Blackburn, Velleman, Stampe, Frankfurt.

3-5 units, not given this year

**PHIL 372P. Practical Concepts in Practical Philosophy**

Some philosophers argue that practical thinking and practical philosophy require the use of distinctively practical concepts, concepts that in some way originate in the practical or "first-person" standpoint. Examine and assess various versions of this claim. Readings from Korsgaard, Bok, Gibbard, Nagel, and others.

4 units, Win (Schapiro, T)

**PHIL 373. Moral Psychology: The Concept of Inclination**

The weight placed by Kantian and rationalist moral theories on the distinction between inclination and reason. The concept of inclination as that which inclines but does not determine how people act. How are inclinations related to the people who hold them? Are they expressions of values, or more like internal weather? What is their nature? What does it mean to act from inclination? Are actions on inclination unchosen or just badly chosen? Historical and contemporary sources.

4 units, not given this year

**PHIL 374. Caring and Practical Reasoning**

What is it to care about something; how is caring related to desiring, emotions, and having policies; what is the relationship between caring and the will; why do people care about things; can attention to caring help explain the phenomenon of silencing reasons? Readings from contemporary literature, including Frankfurt, Watson, Bratman, Scanlon, Williams, Helm, and Kolodny. May be repeated for credit.

4 units, not given this year

**PHIL 376. Agency and Personal Identity**

How philosophical theories of agency interact with philosophical accounts of personal identity. Readings include Velleman and Frankfurt.

4 units, not given this year

**PHIL 378. The Ethics of Environmental Choices**

(Same as PHIL 278) Investigation of the institutional and individual dimensions of environmental choices. On the institutional side, examine externalities, the tragedy of the commons, sustainable development and environmental policy. On the individual side, discuss individual responsibility, intrinsic value, and moral pluralism. Focus on decision-making including the role of risk analysis, the rate of discount for effects on future generations, cost-benefit analysis, and scientific epistemology.

4 units, Spr (Satz, D; Schneider, S)

**PHIL 378. Problems in Medical Ethics**

Focus is on recent philosophical work concerning the moral status of non-paradigmatic human beings such as fetuses or Alzheimer's patients, and non-ideal conditions of decision making such as concretized emotions or exploitation. Prerequisite: 170 or equivalent.

4 units, not given this year

**PHIL 379. Graduate Seminar in Metaethics**

Theories about the meaning of ethical terms and the content of ethical judgements. Do these theories fit with best accounts of human agency and practical deliberation? Readings from recent literature. Prerequisites: 173B/273B, 181, 187/287 or equivalent.

4 units, Spr (Staff)

**PHIL 380. Core Seminar in Metaphysics and Epistemology**

Limited to first- and second-year students in the Philosophy Ph.D. program.

4 units, Win (Burgess, A; Lawlor, K)

**PHIL 381. Core Seminar in Philosophy of Language**

Limited to first- and second-year students in the Philosophy Ph.D. program.

4 units, not given this year

**PHIL 382. Seminar on Reference**

Philosophical issues concerning the relationship between linguistic expressions and the objects to which they refer. Is it possible to get one unified theory of reference for different kinds of referring expressions such as proper names, pronouns, demonstratives, and other kinds of indexicals? Unsolved problems and desiderata for a theory of reference?

4 units, not given this year

**PHIL 382A. Pragmatics and Reference**

Grice's theory of conversational implicatures, Relevance Theory and other contemporary pragmatic theories, focusing on issues involving singular reference, "pragmatic intrusion," and the semantics - pragmatics "interface." Throughout the seminar will be developing the approach Kapa Korta and Perry call "critical pragmatics."

4 units, Aut (Perry, J)

**PHIL 383. Philosophy of Mind Seminar**

May be repeated for credit.

2-4 units, not given this year

**PHIL 384. Seminar in Metaphysics and Epistemology**

May be repeated for credit.

4 units, not given this year

**PHIL 385. Philosophy of Language Seminar: Foundations of Non-Factualism**

How could a meaningful, declarative sentence fail to say anything true or false? Focus is on Huw Price's Facts and the Function of Truth.

4 units, not given this year

**PHIL 385B. Topics in Metaphysics and Epistemology: Vagueness**

Contemporary proposals for how and whether to explain and accommodate vagueness in reality and in representation. Theories of mental and linguistic representation that struggle to explain imprecise representation, and metaphysical theories of the ultimate structure of reality that are threatened with incoherence if worldly boundaries are vague. May be repeated for credit.

4 units, not given this year

**PHIL 385C. Topics in Philosophy of Language: The Frege-Russell Problems**

Explore various approaches to the difficulties for semantic theories raised by the behavior of propositional attitude sentences. How, if Superman and Clark are the same person, can Lois have different beliefs about them? "Classic" treatments of the issues including Frege, Russell, Quine, Davidson, and Kripke. Contemporary debates about the most promising approaches, including "naive Russellianism" and "unarticulated constituent" accounts.

4 units, Win (Crimmins, M)

**PHIL 386B. Husserl and Adam Smith**

Readings from Husserl and others in the phenomenological tradition, and recent work on intentionality and consciousness by philosophers and cognitive scientists.

4 units, not given this year

**PHIL 386C. Subjectivity**

Continuation of 386B.

4 units, not given this year

**PHIL 387. Practical Rationality**

Contemporary research on practical reason, practical rationality and reasons for action. May be repeated for credit

4 units, not given this year

**PHIL 387C. Consistency and Coherence**

Some philosophers think that attitudes like belief and intention are subject to consistency and coherence requirements. Are there such general purpose cogency requirements on attitudes? If so, what is their nature and strength? What grounds these requirements; for

instance, does the point or purpose of a belief or an intention ground consistency and coherence requirements on that attitude? How are such requirements on belief related to requirements on intention? How does the answer to such questions bear on understanding of the interrelations between theoretical and practical rationality?

4 units, *Spr* (Bratman, M; Lawlor, K)

**PHIL 387S. Practical Reasons and Practical Reasoning**

Attempts to develop alternatives to Humean, instrumentalist conceptions of practical reasoning, and alternatives to Humean, non-cognitivist views of practical reasons. Readings include Aurel Kolnai, Bernard Williams, David Wiggins, Joseph Raz, Michael Bratman, Elijah Millgram, and T.M. Scanlon.

4 units, *not given this year*

**PHIL 388. Normativity**

May be repeated for credit.

4 units, *Win* (Taylor, K)

**PHIL 389. Advanced Topics in Epistemology**

Skepticism and contextualism, epistemic closure, and problems generated by closure.

3-5 units, *not given this year*

**PHIL 391. Research Seminar in Logic and the Foundations of Mathematics**

(Same as MATH 391) Contemporary work. May be repeated a total of three times for credit.

1-3 units, *Aut* (Mints, G; Feferman, S), *Win* (Mints, G; Feferman, S), *Spr* (Mints, G; Feferman, S)

**PHIL 450. Thesis**

1-15 units, *Aut* (Staff), *Win* (Staff), *Spr* (Staff), *Sum* (Staff)

**PHIL 470. Proseminar in Moral Psychology**

Restricted to Philosophy doctoral students. May be repeated for credit.

4 units, *not given this year*

**PHIL 500. Advanced Ph.D. Proseminar**

Presentation of dissertation work in progress by seminar participants. May be repeated for credit.

1 unit, *Aut* (Lawlor, K), *Win* (Lawlor, K), *Spr* (Lawlor, K)

## PHYSICS (PHYSICS)

### UNDERGRADUATE COURSES IN PHYSICS

**PHYSICS 15. The Nature of the Universe**

The structure, origin, and evolution of the major components of the Universe: planets, stars, and galaxies. Emphasis is on the formation of the Sun and planets, the evolution of stars, and the structure and content of the Milky Way galaxy. Topics: cosmic enigmas (dark matter, black holes, pulsars, x-ray sources), star birth and death, and the origins of and search for life in the solar system and beyond. GER: DB-NatSci

3 units, *Aut* (Madejski, G), *Sum* (Staff)

**PHYSICS 16. Cosmic Horizons**

The origin and evolution of the universe and its contents: stars, galaxies, quasars. The overall structure of the cosmos and the physical laws that govern matter, space, and time. Topics include the evolution of the cosmos from the origin of the elements and the formation of stars and galaxies, exotic astronomical objects (black holes, quasars, supernovae, and gamma ray bursts), dark matter, inflationary cosmology, and the fate of the cosmos. GER: DB-NatSci

3 units, *Win* (Romani, R)

**PHYSICS 17. Black Holes**

Newton's and Einstein's theories of gravitation and their relationship to the predicted properties of black holes. Their formation and detection, and role in galaxies and high-energy jets. Hawking radiation and aspects of quantum gravity. GER: DB-NatSci

3 units, *Spr* (Abel, T)

**PHYSICS 18N. Revolution in Concepts of the Cosmos**

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. The evolution of concepts of the cosmos and its origin, from the Copernican heliocentric model to the current view based on Hub-

ble's discovery of expansion of the Universe. Recent cosmological observations and the relevance of laboratory experiments in particle physics. One night of observations at the Stanford Observatory. GER: DB-NatSci

3 units, *Win* (Roodman, A)

**PHYSICS 19. How Things Work: An Introduction to Physics**

The principles of physics through familiar objects and phenomena, including airplanes, engines, refrigerators, lightning, radio, TV, microwave ovens, and fluorescent lights. Estimates of real quantities from simple calculations. Prerequisite: high school algebra and trigonometry. GER: DB-NatSci

3 units, *Aut* (Manoharan, H)

**PHYSICS 21. Mechanics and Heat**

For biology, social science, and premedical students. Introduction to Newtonian mechanics, fluid mechanics, theory of heat. Prerequisite: high school algebra and trigonometry; calculus not required. GER: DB-NatSci

3 units, *Aut* (Susskind, L)

**PHYSICS 21S. Mechanics and Heat w/ laboratory**

Equivalent to 21 and 22. GER: DB-NatSci

4 units, *Sum* (Fisher, G)

**PHYSICS 22. Mechanics and Heat Laboratory**

Pre- or corequisite: 21.

1 unit, *Aut* (Susskind, L)

**PHYSICS 23. Electricity and Optics**

Electric charges and currents, magnetism, induced currents; wave motion, interference, diffraction, geometrical optics. Prerequisite: 21. GER: DB-NatSci

3 units, *Win* (Wojcicki, S)

**PHYSICS 24. Electricity and Optics Laboratory**

Focus is on electrodynamics circuits. Pre- or corequisite: 23.

1 unit, *Win* (Wojcicki, S)

**PHYSICS 25. Modern Physics**

Introduction to modern physics. Relativity, quantum mechanics, atomic theory, radioactivity, nuclear reactions, nuclear structure, high energy physics, elementary particles, astrophysics, stellar evolution, and the big bang. Prerequisite: 23 or consent of instructor. GER: DB-NatSci

3 units, *Spr* (Linde, A)

**PHYSICS 25S. Modern Physics with Laboratory**

Equivalent to 25 and 26. GER: DB-NatSci

4 units, *Sum* (Fisher, G)

**PHYSICS 26. Modern Physics Laboratory**

Pre- or corequisite: 25.

1 unit, *Spr* (Linde, A)

**PHYSICS 28. Mechanics, Heat, and Electricity**

For biology, social science, and premedical students. The sequence 28 and 29 fulfills, in ten weeks, the one-year college physics requirement with lab of most medical schools. Topics: Newtonian mechanics, fluid mechanics, theory of heat, electric charges, and currents. Calculus is used as a language and developed as needed. Prerequisite: high school algebra and trigonometry. GER: DB-NatSci

6 units, *Sum* (Fisher, G)

**PHYSICS 29. Electricity and Magnetism, Optics, Modern Physics**

Magnetism, induced currents; wave motion, optics; relativity, quantum mechanics, atomic theory, radioactivity, nuclear structure and reactions, elementary particles, astrophysics, and cosmology. Prerequisite: 28. GER: DB-NatSci

6 units, *Sum* (Fisher, G)

**PHYSICS 41. Mechanics**

Vectors, particle kinematics and dynamics, work, energy, momentum, angular momentum; conservation laws; rigid bodies; mechanical oscillations and waves. Discussions based on use of calculus. Corequisite: MATH 19 or 41, or consent of instructor. GER: DB-NatSci

4 units, *Win* (Church, S)

**PHYSICS 41N. Mechanics: Insights, Applications, and Advances**

(F,Sem) Stanford Introductory Seminar. Preference to freshman. Additional topics for students in PHYSICS 41 such as tidal forces,

gyroscopic effects, fractal dimensions, and chaos. Corequisite: 41 or advanced placement.

*1 unit, Win (Abel, T)*

#### **PHYSICS 43. Electricity and Magnetism**

Electrostatics, Coulomb's law, electric fields and fluxes, electric potential, properties of conductors, Gauss's law, capacitors and resistors, DC circuits; magnetic forces and fields, Biot-Savart law, Faraday's law, Ampere's law, inductors, transformers, AC circuits, motors and generators, electric power, Galilean transformation of electric and magnetic fields, Maxwell's equations; limited coverage of electromagnetic fields and special relativity. Prerequisites: 41 or equivalent, and MATH 19 or 41. Corequisite: MATH 20 or 42, or consent of instructor. GER: DB-NatSci

*4 units, Spr (Michelson, P)*

#### **PHYSICS 43N. Understanding Electromagnetic Phenomena**

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Expands on the material presented in 43; applications of concepts in electricity and magnetism to everyday phenomena and to topics in current physics research. Corequisite: 43 or advanced placement.

*1 unit, Spr (Laughlin, R)*

#### **PHYSICS 44. Electricity and Magnetism Lab**

Pre- or corequisite: 43.

*1 unit, Spr (Michelson, P)*

#### **PHYSICS 45. Light and Heat**

Reflection and refraction, lenses and lens systems; polarization, interference, and diffraction; temperature, properties of matter and thermodynamics, introduction to kinetic theory of matter. Prerequisites: 41 or equivalent, and MATH 19 or 41, or consent of instructor. GER: DB-NatSci

*4 units, Aut (Osheroff, D), Sum (Staff)*

#### **PHYSICS 45N. Advanced Topics in Light and Heat**

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Expands on the subject matter presented in 45 to include optics and thermodynamics in everyday life, and applications from modern physics and astrophysics. Corequisite: 45 or advanced placement.

*1 unit, Aut (Romani, R)*

#### **PHYSICS 46. Light and Heat Laboratory**

Pre- or corequisite: 45.

*1 unit, Aut (Osheroff, D), Sum (Staff)*

#### **PHYSICS 50. Astronomy Laboratory and Observational Astronomy**

Introduction to observational astronomy emphasizing the use of optical telescopes. Observations of stars, nebulae, and galaxies in laboratory sessions with 16- and 24-inch telescopes at the Stanford Observatory. No previous physics required. Limited enrollment. Lab. GER: DB-NatSci

*3 units, Aut (Funk, S), Sum (Staff)*

#### **PHYSICS 59. Current Research Topics**

Recommended for prospective Physics majors. Presentations of current research topics by faculty with research interests related to physics, often including tours of experimental laboratories where the research is conducted.

*1 unit, Aut (Allen, S)*

#### **PHYSICS 61. Mechanics and Special Relativity**

(First in a three-part series: 61,63,65.) Advanced freshman physics. For students with a strong high school mathematics and physics background contemplating a major in Physics or interested in a rigorous treatment of physics. The fundamental structure of classical physics including Newtonian mechanics, electricity and magnetism, waves, optics, thermodynamics. Foundations of modern physics including special relativity, atomic structure, quantization of light, matter waves and the Schrödinger equation. Prerequisites: high school physics and familiarity with calculus (differentiation and integration in one variable). Pre- or corequisite: MATH 51. GER: DB-NatSci

*4 units, Aut (Moler, K)*

#### **PHYSICS 63. Electricity, Magnetism, and Waves**

(Second in a three-part series: 61,63,65.) Advanced freshman physics. For students with a strong high school mathematics and physics background contemplating a major in Physics or interested in a rigorous treatment of physics. The fundamental structure of classical physics including Newtonian mechanics, electricity and

magnetism, waves, optics, thermodynamics. Foundations of modern physics including special relativity, atomic structure, quantization of light, matter waves and the Schrödinger equation. Prerequisites: high school physics and familiarity with calculus (differentiation and integration in one variable). Pre- or corequisite: MATH 52. GER: DB-NatSci

*4 units, Win (Gratta, G)*

#### **PHYSICS 64. Advanced Electromagnetism Laboratory**

Experimental work in mechanics, electricity and magnetism. Corequisite 63. (Staff)

*1 unit, Win (Gratta, G)*

#### **PHYSICS 65. Thermodynamics and Foundations of Modern Physics**

(Third in a three-part series: 61,63,65.) Advanced freshman physics. For students with a strong high school mathematics and physics background contemplating a major in Physics or interested in a rigorous treatment of physics. The fundamental structure of classical physics including Newtonian mechanics, electricity and magnetism, waves, optics, thermodynamics. Foundations of modern physics including special relativity, atomic structure, quantization of light, matter waves and the Schrödinger equation. Prerequisites: high school physics and familiarity with calculus (differentiation and integration in one variable). Pre- or corequisite: MATH 53. GER: DB-NatSci

*4 units, Spr (Romani, R)*

#### **PHYSICS 67. Introduction to Laboratory Physics**

Methods of experimental design, data collection and analysis, statistics, and curve fitting in a laboratory setting. Experiments drawn from electronics, optics, heat, and particle physics. Intended as preparation for PHYSICS 105, 107, 108. Lecture plus laboratory format. Required for 60 series Physics majors; recommended for 40 series students who intend to major in Physics. Corequisite: 65 or 43.

*2 units, Spr (Pam, R)*

#### **PHYSICS 70. Foundations of Modern Physics**

Required for Physics majors who completed the 40 series, or the PHYSICS 60 series prior to 2005-06. Special relativity, the experimental basis of quantum theory, atomic structure, quantization of light, matter waves, Schrödinger equation. Prerequisites: 41, 43. Corequisite: 45. Recommended: prior or concurrent registration in MATH 53. GER: DB-NatSci

*4 units, Aut (Kasevich, M)*

#### **PHYSICS 80N. The Technical Aspects of Photography**

(F,Sem) Stanford Introductory Seminar. Preference to freshmen and sophomores with some background in photography. How cameras record photographic images on film and electronically. Technical photographic processes to use cameras effectively. Camera types and their advantages, how lenses work and their limitations, camera shutters, light meters and the proper exposure of film, film types, depth of focus, control of the focal plane and perspective, and special strategies for macro and night photography. View cameras and range finder technical cameras. Students take photographs around campus. Prerequisite: high school physics.

*3 units, Spr (Osheroff, D)*

#### **PHYSICS 83N. Physics in the 21st Century**

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Current topics at the frontier of modern physics. Topics include subatomic particles and the standard model, symmetries in nature, extra dimensions of space, string theory, supersymmetry, the big bang theory of the origin of the universe, black holes, dark matter, and dark energy of the universe. Why the sun shines. Cosmology and inflation. GER: DB-NatSci

*3 units, Aut (Kallosh, R)*

#### **PHYSICS 87N. The Physics of One: Nanoscale Science and Technology**

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Contemporary interdisciplinary research in nanoscience and nanotechnology; the manipulation of nature's fundamental building blocks. Accomplishments and questions engendered by knowledge at the discrete limit of matter. Prerequisite: high school physics. GER: DB-NatSci

*3 units, Win (Manoharan, H)*

**PHYSICS 100. Introduction to Observational and Laboratory Astronomy**

For physical science or engineering students. Emphasis is on the quantitative measurement of astronomical parameters such as distance, temperature, mass, composition of stars, galaxies, and quasars. Observation using the 0.4m and 0.6m telescopes at the Stanford Observatory. Limited enrollment. Prerequisites: one year of college physics; prior or concurrent registration in 65, or 70; and consent of instructor. GER: DB-NatSci

4 units, Spr (Allen, S)

**PHYSICS 105. Intermediate Physics Laboratory I: Analog Electronics**

Analog electronics including Ohm's law, passive circuits and transistor and op amp circuits, emphasizing practical circuit design skills to prepare undergraduates for laboratory research. Short design project. Minimal use of math and physics, no electronics experience assumed beyond introductory physics. Prerequisite: PHYSICS 43 or 63.

3 units, Aut (Pam, R)

**PHYSICS 107. Intermediate Physics Laboratory II: Experimental Techniques and Data Analysis**

Experiments on lasers, Gaussian optics, and atom-light interaction, with emphasis on data and error analysis techniques. Students describe a subset of experiments in scientific paper format. Prerequisites: completion of 40 or 60 series, and 70 and 105. Recommended: 130, prior or concurrent enrollment in 120. WIM

4 units, Win (Kasevich, M)

**PHYSICS 108. Intermediate Physics Laboratory III: Project**

Small student groups plan, design, build, and carry out a single experimental project in low-temperature physics. Prerequisites 105, 107.

3 units, Win (Goldhaber-Gordon, D), Spr (Goldhaber-Gordon, D)

**PHYSICS 110. Intermediate Mechanics**

Lagrangian and Hamiltonian mechanics. Principle of least action, Galilean relativity, Lagrangian mechanical systems, Euler-Lagrange equations. Central potential, Kepler's problem, planetary motion. Scattering problems, disintegration, Rutherford scattering cross section. Harmonic motion in the presence of rapidly oscillating field. Poisson's brackets, canonical transformations, Liouville's theorem, Hamilton-Jacoby equation. Prerequisites: 41 or 61, and MATH 53

4 units, Spr (Kuo, C)

**PHYSICS 112. Mathematical Methods of Physics**

Theory of complex variables, complex functions, and complex analysis. Fourier series and Fourier transforms. Special functions such as Laguerre, Legendre, and Hermite polynomials, and Bessel functions. The uses of Green's functions. Covers material of MATH 106 and 132 most pertinent to Physics majors. Prerequisites: MATH 50 or 50H series, and MATH 131.

4 units, Win (Kallosh, R)

**PHYSICS 113. Computational Physics**

Numerical methods for solving problems in mechanics, electromagnetism, quantum mechanics, and statistical mechanics. Methods include numerical integration; solutions of ordinary and partial differential equations; solutions of the diffusion equation, Laplace's equation and Poisson's equation with relaxation methods; statistical methods including Monte Carlo techniques; matrix methods and eigenvalue problems. Short introduction to Matlab, used for class examples; class projects may be programmed in any language such as C. Prerequisites: MATH 53, prior or concurrent registration in 110, 121. Previous programming experience not required.

4 units, Spr (Cabreria, B)

**PHYSICS 120. Intermediate Electricity and Magnetism**

(First in a two-part series: 120,121.) Vector analysis, electrostatic fields, including multipole expansion. Dielectrics, static magnetic fields, magnetic materials. Maxwell's equation. Electromagnetic radiation. Special relativity and transformation between electric and magnetic fields. Plane wave problems (free space, conductors and dielectric materials, boundaries). Dipole and quadrupole radiation and their frequency and angular distributions. Scattering synchrotron and bremsstrahlung processes. Energy loss in water. Wave guides and cavities. Prerequisites: PHYSICS 43 or 63; concurrent or prior registration in MATH 52 and 53. Recommended:

concurrent or prior registration in PHYSICS 112.

4 units, Win (Cabreria, B)

**PHYSICS 121. Intermediate Electricity and Magnetism**

(Second in a two-part series: 120,121.) Vector analysis, electrostatic fields, including multipole expansion. Dielectrics, static magnetic fields, magnetic materials. Maxwell's equation. Electromagnetic radiation. Special relativity and transformation between electric and magnetic fields. Plane wave problems (free space, conductors and dielectric materials, boundaries). Dipole and quadrupole radiation and their frequency and angular distributions. Scattering synchrotron and bremsstrahlung processes. Energy loss in water. Wave guides and cavities. Prerequisites: PHYSICS 120; concurrent or prior registration in MATH 131. Recommended: PHYSICS 112.

4 units, Spr (Petrosian, V)

**PHYSICS 130. Quantum Mechanics**

(First in a two part series: 130,131.) The origins of quantum mechanics, wave mechanics, and the Schrödinger equation. Heisenberg's matrix formulation of quantum mechanics, solutions to one-dimensional systems, separation of variables and the solution to three-dimensional systems, the central field problem and angular momentum eigenstates, spin and the coupling of angular momentum, Fermi and Bose statistics, time-independent perturbation theory. Prerequisites: PHYSICS 70, 110. Pre- or corequisites: PHYSICS 120, 121, and MATH 131.

4 units, Aut (Burchat, P)

**PHYSICS 131. Quantum Mechanics**

(Second in a two-part series: 130,131.) The origins of quantum mechanics, wave mechanics, and the Schrödinger equation. Heisenberg's matrix formulation of quantum mechanics, solutions to one-dimensional systems, separation of variables and the solution to three-dimensional systems, the central field problem and angular momentum eigenstates, spin and the coupling of angular momentum, Fermi and Bose statistics, time-independent perturbation theory. Prerequisites: PHYSICS 70, 110. Pre- or corequisites: PHYSICS 120, 121, and MATH 131.

4 units, Win (Bucksbaum, P)

**PHYSICS 134. Advanced Topics in Quantum Mechanics**

Variational principle, time-dependent perturbation theory, WKB approximation. Scattering theory: partial wave expansion, Born approximation. Nature of quantum measurement: EPR paradox, Bell's inequality, and Schrödinger's cat paradox. Additional topics may include relativistic quantum mechanics or quantum information science. Prerequisites: 130, 131.

4 units, Spr (Kahn, S)

**PHYSICS 152A. Introduction to Particle Physics I**

(Same as PHYSICS 252A) Elementary particles and the fundamental forces. Quarks and leptons. The mediators of the electromagnetic, weak and strong interactions. Interaction of particles with matter; particle acceleration, and detection techniques. Symmetries and conservation laws. Bound states. Decay rates. Cross sections. Feynman diagrams. Introduction to Feynman integrals. The Dirac equation. Feynman rules for quantum electrodynamics and for chromodynamics. Prerequisite: 130. Pre- or corequisite: 131.

3 units, Win (Burchat, P)

**PHYSICS 152B. Introduction to Particle Physics II**

(Same as PHYSICS 252B) Discoveries and observations in experimental particle physics and relation to theoretical developments. Asymptotic freedom. Charged and neutral weak interactions. Electroweak unification. Weak isospin. Gauge theories, spontaneous symmetry breaking and the Higgs mechanism. Quark and lepton mixing. CP violation. Neutrino oscillations. Prerequisites: 152 or 152A, 130, 131.

3 units, Spr (Gratta, G)

**PHYSICS 160. Introduction to Stellar and Galactic Astrophysics**

Observed characteristics of stars and the Milky Way galaxy. Physical processes in stars and matter under extreme conditions. Structure and evolution of stars from birth to death. White dwarfs, planetary nebulae, supernovae, neutron stars, pulsars, binary stars, x-ray stars, and black holes. Galactic structure, interstellar medium, molecular clouds, HI and HII regions, star formation, and element abundances. Prerequisites: 40 or 60 series, and 70.

3 units, Win (Petrosian, V)

**PHYSICS 161. Introduction to Extragalactic Astrophysics and Cosmology**

Observations of the distances and compositions of objects on cosmic scales: galaxies, galaxy clusters, quasars, and diffuse matter at high red shift. Big bang cosmology, physical processes in the early universe, the origin of matter and the elements, inflation, and creation of structure in the Universe. Observational evidence for dark matter and dark energy. Future of the Universe. Prerequisites: calculus and college physics at the level of the 40 or 60 series, and 70.

3 units, Spr (Wechsler, R)

**PHYSICS 169A. Independent Study in Astrophysics and Honors Thesis: Selection of the Problem**

Description of the problem, its background, work planned in the subsequent two quarters, and development of the theoretical apparatus or initial interpretation of the problem.

1-9 units, Aut (Staff)

**PHYSICS 169B. Independent Study in Astrophysics and Honors Thesis: Continuation of Project**

Substantial completion of the required computations or data analysis for the research project selected.

1-9 units, Win (Staff)

**PHYSICS 169C. Independent Study in Astrophysics and Honors Thesis: Completion of Project**

Completion of research and writing of a paper presenting methods used and results.

1-9 units, Spr (Staff)

**PHYSICS 170. Thermodynamics, Kinetic Theory, and Statistical Mechanics**

(First in a two-part series: 170,171.) The derivation of laws of thermodynamics from basic postulates; the determination of the relationship between atomic substructure and macroscopic behavior of matter. Temperature; equations of state, heat, internal energy; entropy; reversibility; applications to various properties of matter; absolute zero and low temperature phenomena. Distribution functions, transport phenomena, fluctuations, equilibrium between phases, phase changes, the partition function for classical and quantum systems, Bose-Einstein condensation, and the electron gas. Cooperative phenomena including ferromagnetism, the Ising model, and lattice gas. Irreversible processes. Corequisite: 130.

4 units, Aut (Goldhaber-Gordon, D)

**PHYSICS 171. Thermodynamics, Kinetic Theory, and Statistical Mechanics**

(Second in a two-part series: 170,171.) The derivation of laws of thermodynamics from basic postulates; the determination of the relationship between atomic substructure and macroscopic behavior of matter. Temperature; equations of state, heat, internal energy; entropy; reversibility; applications to various properties of matter; absolute zero and low temperature phenomena. Distribution functions, transport phenomena, fluctuations, equilibrium between phases, phase changes, the partition function for classical and quantum systems, Bose-Einstein condensation, and the electron gas. Cooperative phenomena including ferromagnetism, the Ising model, and lattice gas. Irreversible processes. Corequisite: 131.

4 units, Win (Zhang, S)

**PHYSICS 172. Solid State Physics**

Crystal structures and bonding in solids. X-ray diffraction. Lattice dynamics and thermal properties. Electronic structure of solids; transport properties of metals; quantum oscillations; charge density waves. Properties and applications of semiconductors. Phenomenology and microscopic theory of superconductivity. Prerequisites: 170, 171.

3 units, Spr (Manoharan, H)

**PHYSICS 190. Independent Study**

Undergraduate research in experimental or theoretical physics under the supervision of a faculty member. Prerequisites: superior work as an undergraduate Physics major and consent of instructor.

1-9 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**PHYSICS 204A. Seminar in Theoretical Physics**

Topics of recent interest may include cosmology, black hole physics, and strong-weak coupling duality transformations. May be repeated for credit.

3 units, Aut (Laughlin, R)

**PHYSICS 204B. Seminar in Theoretical Physics**

Topics including quantum computing, Berry phase, and quantum Hall effect. May be repeated for credit.

3 units, Win (Doniach, S)

**PHYSICS 205. Undergraduate Honors Research**

Experimental or theoretical project and thesis in Physics under supervision of a faculty member. Planning of the thesis project should begin no later than middle of the junior year. Successful completion of an honors thesis leads to graduation with departmental honors. Prerequisites: superior work in Physics as an undergraduate major and approval of the honors adviser.

1-12 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**GRADUATE COURSES IN PHYSICS****PHYSICS 210. Advanced Particle Mechanics**

The Lagrangian and Hamiltonian dynamics of particles. Beyond small oscillations. Phase portraits, Hamilton-Jacobi theory, action-angle variables, adiabatic invariance. Nonlinear dynamical systems, continuous and discrete. Behavior near the fixed points, stability of solutions, attractors, chaotic motion. Transition to continuum mechanics. Prerequisite: 110 or equivalent.

3 units, Aut (Kahn, S)

**PHYSICS 211. Continuum Mechanics**

Elasticity, fluids, turbulence, waves, gas dynamics, shocks, and MHD plasmas. Examples from everyday phenomena, geophysics, and astrophysics.

3 units, Win (Peskin, M)

**PHYSICS 212. Statistical Mechanics**

Principles, ensembles, statistical equilibrium. Thermodynamic functions, ideal and near-ideal gases. Fluctuations. Mean-field description of phase-transitions and associated critical exponents. One-dimensional Ising model and other exact solutions. Renormalization and scaling relations. Prerequisites: 130, 131, 171, or equivalents.

3 units, Spr (Suskind, L)

**PHYSICS 216. Back of the Envelope Physics**

Techniques such as scaling and dimensional analysis, useful to make order-of-magnitude estimates of physical effects in different settings. Goals are to promote a synthesis of physics through solving problems, some not included in a standard curriculum. Applications include properties of materials, fluid mechanics, geophysics, astrophysics, and cosmology. Prerequisites: undergraduate mechanics, statistical mechanics, electricity and magnetism, and quantum mechanics.

3 units, Aut (Zhang, S)

**PHYSICS 220. Classical Electrodynamics**

(First in a two part series: 220, 221) Electrostatics and magnetostatics: conductors and dielectrics, magnetic media, electric and magnetic forces, and energy. Maxwell's equations: electromagnetic waves, Poynting's theorem, electromagnetic properties of matter, dispersion relations, wave guides and cavities, magnetohydrodynamics. Special relativity: Lorentz transformations, covariant, equations of electrodynamics and mechanics, Lagrangian formulation, Noether's theorem and conservation laws. Radiation: dipole and quadrupole radiation, electromagnetic scattering and diffraction, the optical theorem, Liénard-Wiechert potentials, relativistic Larmor's formula, frequency and angular distribution of radiation, synchrotron radiation. Energy losses in matter: Bohr's formula, Cherenkov radiation, bremsstrahlung and screening effects, transition radiation. Prerequisites: 121, 210, or equivalents; MATH 106 and 132.

3 units, Win (Kapitulnik, A)

**PHYSICS 221. Classical Electrodynamics**

(Second in a two part series: 220,221) Electrostatics and magnetostatics: conductors and dielectrics, magnetic media, electric and magnetic forces, and energy. Maxwell's equations: electromagnetic waves, Poynting's theorem, electromagnetic properties of matter, dispersion relations, wave guides and cavities, magnetohydrodynamics. Special relativity: Lorentz transformations, covariant, equations of electrodynamics and mechanics, Lagrangian formulation, Noether's theorem and conservation laws. Radiation: dipole and quadrupole radiation, electromagnetic scattering and diffraction, the optical theorem, Liénard-Wiechert potentials, relativistic

Larmor's formula, frequency and angular distribution of radiation, synchrotron radiation. Energy losses in matter: Bohr's formula, Cherenkov radiation, bremsstrahlung and screening effects, transition radiation. Prerequisite: PHYSICS 220 or equivalent.

3 units, Spr (Fetter, A)

### PHYSICS 230. Quantum Mechanics

Fundamental concepts. Introduction to Hilbert spaces and Dirac's notation. Postulates applied to simple systems, including those with periodic structure. Symmetry operations and gauge transformation. The path integral formulation of quantum statistical mechanics. Problems related to measurement theory. The quantum theory of angular momenta and central potential problems. Prerequisite: 131 or equivalent.

3 units, Aut (Shenker, S)

### PHYSICS 231. Quantum Mechanics

Basis for higher level courses on atomic solid state and particle physics. Wigner-Eckart theorem and addition of angular momenta. Approximation methods for time-independent and time-dependent perturbations. Semiclassical and quantum theory of radiation, second quantization of radiation and matter fields. Systems of identical particles and many electron atoms and molecules. Prerequisite: 230.

3 units, Win (Shenker, S)

### PHYSICS 232. Quantum Mechanics

Special topics. Elementary excitations in solids (the free electron gas, electronic band structure, phonons). Elementary scattering theory (Born approximation, partial wave analyses, resonance scattering). Relativistic single-particle equations. Dirac equation applied to central potentials, relativistic corrections, and nonrelativistic limits.

3 units, Spr (Shenker, S)

### PHYSICS 252A. Introduction to Particle Physics I

(Same as PHYSICS 152A) Elementary particles and the fundamental forces. Quarks and leptons. The mediators of the electromagnetic, weak and strong interactions. Interaction of particles with matter; particle acceleration, and detection techniques. Symmetries and conservation laws. Bound states. Decay rates. Cross sections. Feynman diagrams. Introduction to Feynman integrals. The Dirac equation. Feynman rules for quantum electrodynamics and for chromodynamics. Prerequisite: 130. Pre- or corequisite: 131.

3 units, Win (Burchat, P)

### PHYSICS 252B. Introduction to Particle Physics II

(Same as PHYSICS 152B) Discoveries and observations in experimental particle physics and relation to theoretical developments. Asymptotic freedom. Charged and neutral weak interactions. Electroweak unification. Weak isospin. Gauge theories, spontaneous symmetry breaking and the Higgs mechanism. Quark and lepton mixing. CP violation. Neutrino oscillations. Prerequisites: 152 or 152A, 130, 131.

3 units, Spr (Gratta, G)

### PHYSICS 260. Introduction to Astrophysics and Cosmology

The observed properties and theoretical models of stars, galaxies, and the universe. Physical processes for production of radiation from cosmic sources. Observations of cosmic microwave background radiation. Newtonian and general relativistic models of the universe. Physics of the early universe, nucleosynthesis, baryogenesis, nature of dark matter and dark energy and inflation. Prerequisites: 110, 121, and 171, or equivalents.

3 units, Aut (Petrosian, V)

### PHYSICS 262. Introduction to Gravitation

Introduction to general relativity. Curvature, energy-momentum tensor, Einstein field equations. Weak field limit of general relativity. Black holes, relativistic stars, gravitational waves, cosmology. Prerequisite: 121 or equivalent including special relativity.

3 units, Spr (Kallosh, R)

### PHYSICS 275. Electrons in Nanostructures

The behavior of electrons in metals or semiconductors at length scales below 1 micron, smaller than familiar macroscopic objects but larger than atoms. Ballistic transport, Coulomb blockade, localization, quantum mechanical interference, and persistent currents. Topics may include quantum Hall systems, graphen, spin transport, spin-orbit coupling in nanostructures, magnetic tunnel junctions, Kondo systems, and 1-dimensional systems. Readings focus on the

experimental research literature, and recent texts and reviews. Prerequisite: undergraduate quantum mechanics and solid state physics.

3 units, alternate years, not given this year

### PHYSICS 290. Research Activities at Stanford

Required of first-year Physics graduate students; suggested for junior or senior Physics majors for 1 unit. Review of research activities in the department and elsewhere at Stanford at a level suitable for entering graduate students.

1-3 units, Aut (Zhang, S)

### PHYSICS 291. Practical Training

Opportunity for practical training in industrial labs. Arranged by student with the research adviser's approval. A brief summary of activities is required, approved by the research adviser.

3 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

### PHYSICS 293. Literature of Physics

Study of the literature of any special topic. Preparation, presentation of reports. If taken under the supervision of a faculty member outside the department, approval of the Physics chair required. Prerequisites: 25 units of college physics, consent of instructor.

1-15 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

### PHYSICS 294. Teaching of Physics Seminar

Required of all first-year Physics graduate students, plus other Teaching Assistants who are teaching Physics courses for the first time. Weekly seminar/discussions. Techniques for teaching physics, especially through interactive engagement. Review of Physics Education Research results. Simulated teaching situations. In-class observations and practice teaching.

1 unit, Aut (Pam, R)

### PHYSICS 301. Astrophysics Laboratory

Seminar/lab. Astronomical observational techniques and physical models of astronomical objects. Observational component uses the 24-inch telescope at the Stanford Observatory and ancillary photometric and spectroscopic instrumentation. Emphasis is on spectroscopic and photometric observation of main sequence, post-main sequence, and variable stars. Term project developing observational equipment or software. Limited enrollment. Prerequisite: consent of instructor.

3 units, not given this year

### PHYSICS 321. Laser Spectroscopy

Theoretical concepts and experimental techniques. Absorption, dispersion, Kramers-Kronig relations, line-shapes. Classical and laser linear spectroscopy. Semiclassical theory of laser atom interaction: time-dependent perturbation theory, density matrix, optical Bloch equations, coherent pulse propagation, multiphoton transitions. High-resolution nonlinear laser spectroscopy: saturation spectroscopy, polarization spectroscopy, two-photon and multiphoton spectroscopy, optical Ramsey spectroscopy. Phase conjugation. Four-wave mixing, harmonic generation. Coherent Raman spectroscopy, quantum beats, ultra-sensitive detection. Prerequisite: 230. Recommended: 231.

3 units, alternate years, not given this year

### PHYSICS 323. Laser Cooling and Trapping

Principles of laser cooling and atom trapping. Optical forces on atoms, forms of laser cooling, atom optics and atom interferometry, ultra-cold collisions, and introduction to Bose condensation of dilute gases. Emphasis is on the development of the general formalisms that treat these topics. Applications of the cooling and trapping techniques: atomic clocks, internal sensors, measurements that address high-energy physics questions, many-body effects, polymer science, and biology. Prerequisite: 231 or equivalent.

3 units, Spr (Kasevich, M)

### PHYSICS 330. Quantum Field Theory

Quantization of scalar and Dirac fields. Introduction to supersymmetry. Feynman diagrams. Quantum electrodynamics. Elementary electrodynamic processes: Compton scattering; e<sup>+</sup>e<sup>-</sup> annihilation. Loop diagrams and electron (g-2). Prerequisites: 130, 131, or equivalents.

3 units, Aut (Devereaux, T)

### PHYSICS 331. Quantum Field Theory

Functional integral methods. Local gauge invariance and Yang-Mills fields. Asymptotic freedom. Spontaneous symmetry breaking and the Higgs mechanism. Unified models of weak and electro-

magnetic interactions. Prerequisite: 330.

3 units, Win (Brodsky, S)

### PHYSICS 332. Quantum Field Theory

Theory of renormalization. The renormalization group and applications to the theory of phase transitions. Renormalization of Yang-Mills theories. Applications of the renormalization group of quantum chromodynamics. Perturbation theory anomalies. Applications to particle phenomenology. Prerequisite: PHYSICS 330.

3 units, Spr (Wacker, J)

### PHYSICS 351. Standard Model of Particle Physics

Symmetries, group theory, gauge invariance, Lagrangian of the Standard Model, flavor group, flavor-changing neutral currents, CKM quark mixing matrix, GIM mechanism, rare processes, neutrino masses, seesaw mechanism, QCD confinement and chiral symmetry breaking, instantons, strong CP problem, QCD axion. Prerequisite: Physics 330; Physics 331 and 332 recommended.

3 units, Aut (Dimopoulos, S)

### PHYSICS 360. Physics of Astrophysics

Theoretical concepts and tools for modern astrophysics. Radiation transfer equations; emission, scattering, and absorption mechanisms: Compton, synchrotron and bremsstrahlung processes; photoionization and line emission. Equations of state of ideal, interacting, and degenerate gasses. Application to astrophysical sources such as HII regions, supernova remnants, cluster of galaxies, and compact sources such as accretion disks, X-ray, gamma-ray, and radio sources. Prerequisites: 121, 171 or equivalent.

3 units, not given next year

### PHYSICS 362. Advanced Extragalactic Astrophysics and Cosmology

Observational data on the content and activities of galaxies, the content of the Universe, cosmic microwave background radiation, gravitational lensing, and dark matter. Models of the origin, structure, and evolution of the Universe based on the theory of general relativity. Test of the models and the nature of dark matter and dark energy. Physics of the early Universe, inflation, baryosynthesis, nucleosynthesis, and galaxy formation. Prerequisites: PHYSICS 210, 211, and 260 or 360.

3 units, Win (Wechsler, R)

### PHYSICS 363. Solar and Solar-Terrestrial Physics

Structure, mechanisms, and properties of the Sun's interior and atmosphere. Tools for solar observations; magnetic fields and polarimetry. Solar oscillations and helioseismology. Differential rotation and turbulent convection. Solar MHD, Alfvén and magnetoacoustic waves. Solar cycle and dynamo. Magnetic energy release, reconnection, particle acceleration. Solar activity, sunspots, flares, coronal mass ejections; UV, X-ray, and high-energy particle emissions. The interaction of the solar wind with Earth's magnetosphere and its terrestrial effects; space weather. Prerequisite: 221 or equivalent.

3 units, not given this year

### PHYSICS 364. Advanced Gravitation

Early universe cosmology. Topics at the interface between cosmology and gravity, particle theory, and speculative theories of physics at the Planck scale such as string theory. Inflationary cosmology and generation of density perturbations, models of baryogenesis, big bang nucleosynthesis, and speculations about the Universe at the Planck scale. Experiments in the near future that may extend or revise current notions.

3 units, not given this year

### PHYSICS 370. Theory of Many-Particle Systems

Application of quantum field theory to the nonrelativistic, many-body problem, including methods of temperature-dependent Green's functions and canonical transformations. Theory of finite-temperature, interacting Bose and Fermi systems with applications to superfluidity, superconductivity, and electron gas. Prerequisite: 232.

3 units, not given this year

### PHYSICS 372. Condensed Matter Theory I

Fermi liquid theory, many-body perturbation theory, response function, functional integrals, interaction of electrons with impurities. Prerequisite: APPPHYS 273 or equivalent.

3 units, Aut (Kivelson, S)

### PHYSICS 373. Condensed Matter Theory II

Superfluidity and superconductivity. Quantum magnetism. Prerequisite: 372.

3 units, Win (Laughlin, R)

### PHYSICS 376. Superfluidity and Superconductivity

Introduction to superfluid He: two-fluid model, phonons, and rotons, Feynman description, vortices, Bogoliubov theory. Phenomenology of superconductors: London description, Ginzburg-Landau model, type-I vs. type-II materials, Josephson effects, thin films, Kosterlitz-Thouless behavior, electron-phonon coupling. BCS theory: bulk systems, tunneling, strong-coupling materials, dirty and gapless superconductivity, fluctuation effects, Ginzburg criterion. Recommended: APPPHYS 272, 273, or equivalents.

3 units, not given this year

### PHYSICS 450. Particle Physics at the Large Hadron Collider

General properties of proton-proton collisions at 14 TeV. Capabilities of the LHC experiments. QCD predictions for hard-scattering reactions: parton distributions, radiative corrections, jets, parton shower. Methods for computing multijet cross sections. Properties of W, Z, top quarks, and Higgs bosons at the LHC. Methods for discovering new heavy particles. May be repeated for credit. Prerequisite: PHYSICS 262, 330, 331, and 332.

3 units, not given this year

### PHYSICS 451. Physics Beyond the Standard Model I.

Electroweak anomalies, electroweak baryon number violation, grand unification, SU(5), SO(10), gauge coupling unification, b-tau unification, proton decay, naturalness and the hierarchy problem; technicolor and extended technicolor; the supersymmetric Standard Model, supersymmetric unification. Prerequisites: PHYSICS 330, 331, 332, 351

3 units, Win (Dimopoulos, S)

### PHYSICS 452. Physics Beyond the Standard Model II

SUSY dark matter, SUSY flavor problem, universality and proportionality, theories of SUSY breaking, gauge mediation, gravity mediation, moduli problem, large extra dimensions and TeV scale gravity; the cosmological constant problem, Weinberg's solution and the landscape, split supersymmetry, decaying dark matter, axiverse. Prerequisites: PHYSICS 330, 331, 332, 351, 451.

3 units, Spr (Dimopoulos, S)

### PHYSICS 463. Special Topics in Astrophysics: Theoretical Cosmology

The application of general relativity to physical phenomena associated with spinning black holes and neutron stars to provide illustrations and tests of the theory of strong field gravity. Topics include: stationary axisymmetric metrics and stellar structure, orbits and rays, accretion disks, stellar companions, electromagnetic effects, gravitational radiation. Emphasis is on developing practical calculational techniques. Prerequisite: PHYSICS 262 or equivalent.

3 units, Spr (Blandford, R)

### PHYSICS 490. Research

Open only to Physics graduate students, with consent of instructor. Work is in experimental or theoretical problems in research, as distinguished from independent study of a non-research character in 190 and 293.

1-15 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

## POLITICAL SCIENCE (POLISCI)

### UNDERGRADUATE COURSES IN POLITICAL SCIENCE

#### POLISCI 1. Introduction to International Relations

Approaches to the study of conflict and cooperation in world affairs. Applications to war, terrorism, trade policy, the environment, and world poverty. Debates about the ethics of war and the global distribution of wealth. GER:DB-SocSci

5 units, Aut (Krasner, S), Spr (Tomz, M)

#### POLISCI 2. Introduction to American National Government and Politics

The role and importance of the ideal of democracy in the evolution of the American political system. American political institutions (the Presidency, Congress, and the Court) and political processes

(the formation of political attitudes and voting) are examined against the backdrop of American culture and political history. The major areas of public policy in the current practice of the ideal of democracy. GER:DB-SocSci

5 units, Win (Fiorina, M; Frisby, T)

**POLISCI 3. Introduction to Political Philosophy**

(Same as ETHICSOC 30, PHIL 30, PUBLPOL 103A) State authority, justice, liberty, and equality through major works in political philosophy. Topics include human nature and citizenship, the obligation to obey the law, democracy and economic inequality, equality of opportunity and affirmative action, religion, and politics. GER:DB-Hum, DB-Hum, EC-EthicReas

5 units, Spr (Hussain, N)

**POLISCI 4. Introduction to Comparing Political Systems**

Politics in major regime types including democratic, authoritarian, and communist; how types of politics affect economic development and state/society relations. GER:DB-SocSci, EC-GlobalCom

5 units, Spr (Rodden, J)

**POLISCI 16N. Politics of Economic Development**

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Why are some countries rich and others poor? What explains the policies that governments adopt, and how do those policies affect economic performance? Readings from political science and economics about Latin America and other regions. GER:DB-SocSci

5 units, Spr (Tomz, M)

**POLISCI 22N. Inequality and American Democracy**

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. For thirty years or more, inequality has grown in American society as the distance between the richest and poorest segments of the population have grown substantially. What effect does this inequality have on American society? Can democracy be sustained under such circumstances? Focus is on the lives of the poorest Americans, the relationship of resources to political activity and power, and how American politics has been shaped by these forces.

5 units, Aut (Segura, G)

**POLISCI 24Q. Law and Order**

(F,Dial) Stanford Introductory Dialogue. Preference to sophomores. The role of law in promoting social order. What is the rule of law? How does it differ from the rule of men? What institutions best support the rule of law? Is a state needed to ensure that laws are enforced? Should victims be allowed to avenge wrongs? What is the relationship between justice and mercy?

3 units, Aut (Rutten, A)

**POLISCI 36N. Lotteries**

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. The advantages and disadvantages that lotteries offer when used as part of decision making. The relationships, pro and con, between lotteries and distributive justice. How the resulting arguments for and against lotteries play out in real public policy debates in areas relating to education, housing, medical care, and political office. Class research project focusing on Stanford's housing draw.

3-4 units, Win (Stone, P)

**POLISCI 37. The Obama Presidency: A Midterm Review**

Guest panelists and presentations on key policy and political trends with a focus on domestic and international justice issues. Topics include domestic and foreign policy, economic and legal issues in Washington DC, with attention to implications for the midterm elections in Autumn 2010.

1 unit, Spr (Reich, R; Steyer, J)

**POLISCI 48N. Muslim Integration into France**

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. The specter of Islamized societies haunts Europe. Fears of a fifth column of terrorism and a challenge by a population of religious fanatics to a largely secularized continent are recurrent in political dialogue from Spain to Austria. Are these worries a result of everyday xenophobia common to situations of foreign immigration or whether certain immigrants from the Middle East, Turkey, South Asia and Africa face special challenges due to their Islamic heritage? Sources include survey and experimental data from France, claims made about this immigrant population, readings in French political discourse and the European political context. Final paper that compares analysis of the data and claims in the literature.

5 units, Spr (Laitin, D)

**POLISCI 110A. Theory and Practice in International Relations**

Major approaches to understanding international politics including realism, liberalism, and constructivism, and their utility in explaining events and issues over the last century including the WWI and WWII, the Cold War, trade and globalization, and transnational terrorism. GER:DB-SocSci

5 units, not given this year

**POLISCI 110B. Strategy, War, and Politics**

Traditional and modern theories on the causes of war and sources of peace. Contrasting explanations for the origins of WW I and II; alternative theories of deterrence in the nuclear age; the causes of war in the Persian Gulf, ethnic conflicts, and terrorism in the post-Cold War era. GER:DB-SocSci

5 units, not given this year

**POLISCI 110C. America and the World Economy**

(Same as POLISCI 110X) (Students not taking this course for WIM, register for 110X.) American foreign economic policy. Issues: the evolution of American tariff and trade policy, the development of mechanisms for international monetary management, and American foreign investment policy reflected in the changing political goals pursued by American central decision makers. Prerequisite: 1 or equivalent. GER:DB-SocSci, WIM

5 units, Win (Goldstein, J)

**POLISCI 110D. War and Peace in American Foreign Policy**

(Same as POLISCI 110Y) (Students not taking this course for WIM, register for 110Y.) The causes of war in American foreign policy. Issues: international and domestic sources of war and peace; war and the American political system; war, intervention, and peace making in the post-Cold War period. GER:DB-SocSci, DB-SocSci, WIM

5 units, Spr (Schultz, K)

**POLISCI 110X. America and the World Economy**

(Same as POLISCI 110C) (Students not taking this course for WIM, register for 110X.) American foreign economic policy. Issues: the evolution of American tariff and trade policy, the development of mechanisms for international monetary management, and American foreign investment policy reflected in the changing political goals pursued by American central decision makers. Prerequisite: 1 or equivalent. GER:DB-SocSci

5 units, Win (Goldstein, J)

**POLISCI 110Y. War and Peace in American Foreign Policy**

(Same as POLISCI 110D) (Students not taking this course for WIM, register for 110Y.) The causes of war in American foreign policy. Issues: international and domestic sources of war and peace; war and the American political system; war, intervention, and peace making in the post-Cold War period. GER:DB-SocSci, DB-SocSci

5 units, Spr (Schultz, K)

**POLISCI 111. Peace Studies**

(Same as PSYCH 165) Interdisciplinary. The challenges of pursuing peace in a world with many conflicts and rising regional, ethnic, and religious antagonisms. Historical, social, psychological, and moral perspectives. Contributions of academic disciplines to the study of peace. Students explore a conflict and offer contributions to the building of peace. Limited enrollment. GER:DB-SocSci

5 units, not given this year

**POLISCI 113F. The United Nations and Global Governance**

The role of international institutions and organizations in the areas of health, environment, security, trade, development, and human rights. Evaluation, accountability, participation, legitimacy, and autonomy. GER:DB-SocSci

5 units, not given this year

**POLISCI 114D. Democracy, Development, and the Rule of Law**

(Same as IPS 230, INTNLREL 114D, POLISCI 314D) Links among the establishment of democracy, economic growth, and the rule of law. How democratic, economically developed states arise. How the rule of law can be established where it has been historically absent. Variations in how such systems function and the consequences of institutional forms and choices. How democratic systems have arisen in different parts of the world. Available policy instruments used in international democracy, rule of law, and

development promotion efforts. GER:DB-SocSci  
5 units, Aut (Diamond, L; Stoner-Weiss, K)

**POLISCI 114S. International Security in a Changing World**  
(Same as IPS 241) The major international and regional security problems in the modern world. Interdisciplinary faculty lecture on the political and technical issues involved in nuclear proliferation, terrorism and homeland security, civil wars and insurgencies, and future great power rivalries. GER:DB-SocSci  
5 units, Win (Blacker, C; Crenshaw, M)

**POLISCI 116. History of Nuclear Weapons**  
(Same as HISTORY 103E) The development of nuclear weapons and policies. How existing nuclear powers have managed their relations with each other. How nuclear war has been avoided so far and whether it can be avoided in the future. GER:DB-SocSci  
5 units, Spr (Holloway, D)

**POLISCI 118P. U.S. Relations in Iran**  
The evolution of relations between the U.S. and Iran. The years after WW II when the U.S. became more involved in Iran. Relations after the victory of the Islamic republic. The current state of affairs and the prospects for the future. Emphasis is on original documents of U.S. diplomacy (White House, State Department, and the U.S. Embassy in Iran). Research paper.  
5 units, Aut (Milani, A)

**POLISCI 120A. American Political Sociology and Public Opinion: Who We Are and What We Believe**  
First of team-taught, intermediate-level, three-part sequence designed to introduce students to topics in American politics and government. The sociology of the U.S. and the political beliefs and values of Americans. Students may enroll for one, two, or three quarters, but the course is cumulative so maximum benefit results from enrollment in the entire sequence. Recommended: 2. GER:DB-SocSci  
5 units, not given this year

**POLISCI 120C. American Political Institutions: Congress, the Executive Branch, and the Courts**  
How politicians, once elected, work together to govern America. The roles of the President, Congress, and Courts in making and enforcing laws. Focus is on the impact of constitutional rules on the incentives of each branch, and on how they influence law. WIM GER:DB-SocSci, DB-SocSci, WIM  
5 units, Spr (Rutten, A)

**POLISCI 121. Urban Politics**  
(Same as SOC 149X, SOC 249X, URBANST 111) The major actors, institutions, processes, and policies of sub-state government in the U.S., emphasizing city general-purpose governments through a comparative examination of historical and contemporary politics. Issues related to federalism, representation, voting, race, poverty, housing, and finances. Prerequisite: POLISCI 2 or consent of instructor. GER:DB-SocSci  
5 units, not given this year

**POLISCI 122. Introduction to American Law**  
(Same as AMSTUD 179, LAWGEN 106) For undergraduates. The structure of the American legal system including the courts; American legal culture; the legal profession and its social role; the scope and reach of the legal system; the background and impact of legal regulation; criminal justice; civil rights and civil liberties; and the relationship between the American legal system and American society in general. GER:DB-SocSci  
3-5 units, Win (Friedman, L)

**POLISCI 123. Politics and Public Policy**  
(Same as PUBLPOL 101, PUBLPOL 201) How policies come to be formed. How interests compete within public institutions to turn ideas into policies. Examples of this process from contemporary policy areas, including tax, social welfare, and environmental policy; results evaluated using equity and efficiency criteria. Prerequisite: POLISCI 2 (or equivalent for Public Policy majors). GER:DB-SocSci  
5 units, Spr (Frisby, T)

**POLISCI 124R. Judicial Politics and Constitutional Law: The Federal System**  
The impact of constitutional rules on policy making in the U.S. with a focus on structural issues such as separation of powers and federalism. Topics such as: the role of unelected judges in a de-

mocracy; the rule of law; and the constitutionality of the war in Iraq. Prerequisites: 2 or equivalent, and sophomore standing. WIM GER:DB-SocSci, DB-SocSci, WIM  
5 units, Aut (Rutten, A)

**POLISCI 124S. Judicial Politics and Constitutional Law: Civil Liberties**  
The role and participation of courts, primarily the U.S. Supreme Court, in public policy making and the political system. Judicial activity in civil liberty areas (religious liberty, free expression, race and sex discrimination, political participation, and rights of persons accused of crime). Prerequisites: 2 or equivalent, and sophomore standing. GER:DB-SocSci  
5 units, Win (Rutten, A)

**POLISCI 125S. Chicano/Latino Politics**  
The political position of Latinos and Latinas in the U.S. Focus is on Mexican Americans, with attention to Cuban Americans, Puerto Ricans, and other groups. The history of each group in the American polity; their political circumstances with respect to the electoral process, the policy process, and government; the extent to which the demographic category Latino is meaningful; and group identity and solidarity among Americans of Latin American ancestry. Topics include immigration, education, affirmative action, language policy, and environmental justice.  
5 units, Aut (Segura, G)

**POLISCI 128S. The Constitution: A Short History**  
(Same as HISTORY 57) A broad survey of the Constitution, from its Revolutionary origins to the contemporary disputes over interpretation. Topics include the invention of the written constitution and interpretative canons; the origins of judicial review; the Civil War and Reconstruction as constitutional crises; the era of substantive due process; the rights revolution; and the Constitution in wartime. GER:EC-AmerCul  
5 units, Win (Rakove, J)

**POLISCI 130B. History of Political Thought II: Early Modern Political Thought, 1500-1700**  
(Same as POLISCI 330B) The development of constitutionalism, Renaissance humanism and the Reformation, and changing relationships between church and states. Emphasis is on the relationships among political thought, institutional frameworks, and immediate political problems and conflicts. The usefulness of the history of political thought to political science. GER:DB-Hum  
5 units, not given this year

**POLISCI 130C. History of Political Thought III: Freedom, Reason, and Power**  
(Same as POLISCI 330C) Classic works in political theory since the American and French revolutions. Readings include Kant, Hegel, Marx, Nietzsche, and Dewey. GER:DB-Hum  
5 units, Spr (Stone, P)

**POLISCI 133. Ethics and Politics of Public Service**  
(Same as ETHICSOC 133, PHIL 175A, PHIL 275A, PUBLPOL 103D) Ethical and political questions in public service work, including volunteering, service learning, humanitarian assistance, and public service professions such as medicine and teaching. Motives and outcomes in service work. Connections between service work and justice. Is mandatory service an oxymoron? History of public service in the U.S. Issues in crosscultural service work. Integration with the Haas Center for Public Service to connect service activities and public service aspirations with academic experiences at Stanford. GER:DB-SocSci  
5 units, Win (Reich, R)

**POLISCI 134. Democracy and the Communication of Consent**  
(Same as COMM 136, COMM 236) (Graduate students register for COMM 236.) Focus is on competing theories of democracy and the forms of communication they presuppose, combining normative and empirical issues, and historical and contemporary sources. Topics include representation, public opinion, mass media, small group processes, direct democracy, the role of information, and the prospects for deliberative democracy. GER:DB-SocSci  
4-5 units, not given this year

**POLISCI 136. Philosophical Issues Concerning Race and Racism**  
(Same as PHIL 177) Concepts of race, race consciousness, and racism, and their connections. What is race and what is its role in

racism? How should ethnic and racial identities be viewed to secure the conditions in which humanity can be seen as a single moral community whose members have equal respect? What laws, values, and institutions best embody the balance among competing goals of group loyalty, opposition to racism, and common humanity? Philosophical writings on freedom and equality, human rights, pluralism, and affirmative action. Historical accounts of group exclusion. GER:DB-Hum, EC-AmerCul

4 units, not given this year

**POLISCI 136R. Introduction to Global Justice**

(Same as ETHICSOC 136R, INTNLREL 136R, PHIL 76, POLISCI 336) Recent work in political theory on global justice. Topics include global poverty, human rights, fair trade, immigration, climate change. Do developed countries have a duty to aid developing countries? Do rich countries have the right to close their borders to economic immigrants? When is humanitarian intervention justified? Readings include Charles Beitz, Thomas Pogge, John Rawls.

5 units, Spr (McLeod, A)

**POLISCI 136S. Justice**

(Same as ETHICSOC 171, IPS 208, PHIL 171, PHIL 271, PUBLPOL 103C) Focus is on the ideal of a just society, and the place of liberty and equality in it, in light of contemporary theories of justice and political controversies. Topics include protecting religious liberty, financing schools and elections, regulating markets, assuring access to health care, and providing affirmative action and group rights. Issues of global justice including human rights and global inequality. GER:DB-Hum, EC-EthicReas

4-5 units, Aut (Cohen, J)

**POLISCI 137R. Justice at Home and Abroad: Civil Rights in the 21st Century**

(Same as EDUC 261X, ETHICSOC 137R, POLISCI 337R) Focus is on theories of justice. How the core ideals of freedom, equality, and security animate theories which John Rawls considers the first virtue of social institutions. Topics include the U.S. Constitution as a legal framework for the operation of these ideals, civil rights legislation and litigation as the arena of tensions between those ideals, and how ideas of justice function both at home and abroad to impact civil liberties in today's war on terror.

5 units, not given this year

**POLISCI 140. Political Economy of Development**

Emphasis is on the interplay between political economic processes, and national and international factors from Latin America, Africa, and Asia. Do governments provide the foundations for economic development? The role of the state in solving problems of violence and capital accumulation. GER:DB-SocSci, EC-GlobalCom

5 units, not given this year

**POLISCI 140C. The Comparative Political Economy of Post-Communist Transitions**

Dominant theoretical perspectives of comparative democratization and marketization; focus is on the political economy of transition in Eastern Europe and Eurasia while comparing similar processes in Latin America and Asia. Topics include: meanings of democracy, synergy between democracies and markets, causes of the collapse of communism, paths to political liberalization and democracy, civil society, constitutions, parliaments, presidents, the rule of law, electoral systems, market requirements, strategies of reform, the Russian experience of market building, exporting democracy and the market, and foreign aid and assistance.

5 units, Spr (Stoner-Weiss, K)

**POLISCI 140L. China in World Politics**

The implications of the rise of China in contemporary world politics and for American foreign policy, including issues such as arms and nuclear proliferation, regional security arrangements, international trade and investment, human rights, environmental problems, and the Taiwan and Tibet questions. GER:DB-SocSci, EC-GlobalCom

5 units, Aut (Miller, L)

**POLISCI 141. The Global Politics of Human Rights**

The global development and changing nature of human rights and the rise of an international human rights movement. Conflicts between national sovereignty and rights, and among types of rights. Case studies include genocide in Rwanda, holding torturers accountable in Chile and El Salvador, factory workers versus Nike,

and the rights of women in S. Africa. GER:DB-SocSci

5 units, Win (Karl, T)

**POLISCI 142B. British Politics**

The impact on the world's oldest democracy of major changes in policies, politics, and the institution of government made over the last two decades by Margaret Thatcher and Tony Blair. GER:DB-SocSci, EC-GlobalCom

5 units, Spr (Dorfman, G)

**POLISCI 142Z. Politics in the Name of Identity**

How national, ethnic, religious, racial, tribal, and regional identities have been politicized. How identity is used as a motive, cause, or justification for peaceful or violent political actions. Issues such as suicide bombers, the U.S. immigration bill, and ethnic cleansing. Case studies. GER:DB-SocSci

5 units, not given this year

**POLISCI 143Z. Authoritarian Politics**

Nearly half of the countries in the world today lack democratic institutions such as competitive elections and a free media. Under these conditions, how do rulers stay in power? What does this mean for the citizens of these non- or partially-democratic countries? When do citizens press for greater freedom? The politics and policies of authoritarian systems; the conditions under which democratic transition may take place. Definitional issues, internal dynamics of authoritarian regimes, and cases of regime transition. Questions posed in the theoretical literature; problems posed within and by authoritarian regimes.

5 units, Sum (Lee, C)

**POLISCI 144T. Democracies and Dictatorships**

Social scientific findings and debates; cross-sectional approach. What accounts for the emergence of democracy; under what conditions are democracies stable; why are so many developing countries ruled by dictators; why do rulers who destroy their own societies survive for so long; and what accounts for the breakdown of autocratic regimes?

5 units, Aut (Magaloni, B)

**POLISCI 147. Comparative Democratic Development**

Social, cultural, political, economic, and international factors affecting the development and consolidation of democracy in historical and comparative perspective. Individual country experiences with democracy, democratization, and regime performance. Emphasis is on the third wave of democratization over the past three decades and contemporary possibilities for democratic change. (Diamond) GER:DB-SocSci, EC-GlobalCom

5 units, Win (Diamond, L)

**POLISCI 148. Chinese Politics: The Transformation and the Era of Reform**

(Same as POLISCI 348) (Graduate students register for 348.) For advanced undergraduates and beginning graduate students. The content, process, and consequences of reform in China from 1976 to the present. GER:DB-SocSci, EC-GlobalCom

5 units, Win (Oi, J)

**POLISCI 149S. Islam and the West**

Changes in relative power and vitality of each side. The relationship in the Middle Ages revolved around power and domination, and since the Renaissance around modernity. Focus is on Muslims of the Middle East. GER:DB-SocSci, EC-GlobalCom

5 units, Spr (Milani, A)

**POLISCI 150A. Political Methodology I**

(Same as POLISCI 350A) Introduction to probability and statistical inference, with applications to political science and public policy. Prerequisite: elementary calculus. GER:DB-Math

5 units, Aut (Wand, J)

**POLISCI 150B. Political Methodology II**

(Same as POLISCI 350B) Understanding and using the linear regression model in a social-science context: properties of the least squares estimator; inference and hypothesis testing; assessing model fit; presenting results for publication; consequences and diagnosis of departures from model assumptions; outliers and influential observations, graphical techniques for model fitting and checking; interactions among exploratory variables; pooling data; extensions for binary responses. GER:DB-Math

5 units, Win (Jackman, S)

**POLISCI 150C. Political Methodology III**

(Same as POLISCI 350C) Models for discrete outcomes, time series, measurement error, and simultaneity. Introduction to nonlinear estimation, large sample theory. Prerequisite: 150B/350B.

3-5 units, Spr (Wand, J)

**POLISCI 151B. Data Analysis for Political Science**

Operationalization of concepts, measurement, scale construction, finding and pooling/merging data, cross-tabulations, tests of association, comparison of means, correlation, scatterplots, and regression models. How to present the results of data analysis in research reports, essays, and theses. Emphasis is on getting and using data with appropriate statistical software. Prior mathematics not required. GER:DB-Math

5 units, not given this year

**POLISCI 152. Introduction to Game Theoretic Methods in Political Science**

(Same as POLISCI 352) Concepts and tools of non-cooperative game theory developed using political science questions and applications. Formal treatment of Hobbes' theory of the state and major criticisms of it; examples from international politics. Primarily for graduate students; undergraduates admitted with consent of instructor.

3-5 units, Win (Fearon, J)

**POLISCI 157. Sampling and Surveys**

(Same as POLISCI 357) The importance of sample surveys as a source of social science data including public opinion, voting, welfare programs, health, employment, and consumer behavior. Survey design, sampling theory, and estimation. Nonresponse, self-selection, measurement error, and web survey methods. Prerequisite: 150B or equivalent.

5 units, Win (Rivers, D)

**POLISCI 210C. Globalization and Its Discontents**

Whose interests are served by the liberalization of trade and finance? What impact can multilateral organizations like the World Bank, International Monetary Fund and World Trade Organization have on the economic policies of member states and the functioning of the global economy? What determines the policies or rules promoted by these organizations? What motivates foreign aid policies? What is globalization? How can its impacts on different countries and populations be assessed? Policy-oriented questions that emerge from these topics. Should government offset the welfare costs of globalization, and if so, how? Which priorities should be protected despite free trade liberalization? Is free trade fair trade? How should the World Bank and IMF be reformed to meet the needs of the international political economy in the 21st century? How should the international community address the current financial crisis? What is the appropriate balance between government regulation and market

5 units, Spr (Gould, E)

**POLISCI 210R. International Conflict: Management and Resolution**

(Same as IPS 250, POLISCI 310R, PSYCH 383) (Same as LAW 656) Interdisciplinary. Theoretical insights and practical experience in resolving inter-group and international conflicts. Sources include social psychology, political science, game theory, and international law. Personal, strategic, and structural barriers to solutions. How to develop a vision of a mutually bearable shared future, trust in the enemy, and acceptance of loss that a negotiated settlement may produce. Spoilers who seek to sabotage agreements. Advantages and disadvantages of unilateral versus reciprocal measures. Themes from the Stanford Center of International Conflict and Negotiation (SCICN). Prerequisite for undergraduates: consent of instructor.

3-5 units, Win (Holloway, D)

**POLISCI 213R. Political Economy of Financial Crisis**

(Same as POLISCI 313R) Political responses to domestic and international financial crises. Monetary and fiscal policy. The role of interest groups. International cooperation and the role of the IMF.

5 units, Spr (Lipsy, P)

**POLISCI 216. Law, Economics and Politics of International Trade**

(Same as ECON 164) Taught by an economist, a lawyer and a political scientist. Examines aspects of the WTO system from legal, economic and political perspectives. Integrates a careful ex-

amination of topical legal issues with theoretical and empirical research in economics and political science to develop both positive and normative themes regarding the WTO as an international institution. Overview of the economics and politics of international cooperation on trade, and an introduction to the WTO as an institution and its core obligations. Topics may include: the dispute resolution system; the choice between multilateral and regional or bilateral trade agreements; the role of developing countries in the WTO; and the relationship between WTO law, domestic regulation and national sovereignty. Prerequisite: Econ 51 or equivalent undergraduate microeconomics.

2-5 units, Win (Goldstein, J; Sykes, A)

**POLISCI 216E. International History and International Relations Theory**

(Same as HISTORY 202, HISTORY 306E, POLISCI 316) The relationship between history and political science as disciplines. Sources include studies by historians and political scientists on topics such as the origins of WW I, the role of nuclear weapons in international politics, the end of the Cold War, nongovernmental organizations in international relations, and change and continuity in the international system. GER:DB-SocSci

5 units, Win (Staff)

**POLISCI 219. Directed Reading and Research in International Relations**

May be repeated for credit.

1-10 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**POLISCI 220P. The President in the Policy Process**

Focus on how U.S. presidents wield power and lead in government. How to generate research descriptions from factual descriptions of real world events. Students test their conjectures using secondary research materials, such as Gallup polls and primary research sources.

5 units, Spr (Staff)

**POLISCI 221. Democratic Theory: An Empirical Approach**

The value of tolerance and its implications for the principles and practices of democracy. Tolerance as understood by political philosophers and citizens. Readings include: John Stuart Mill's On Liberty, Isaiah Berlin's Two Concepts of Liberty, and modern studies of public opinion. Topics include: ideas and liberty; value pluralism; the interplay of authority and obedience; the role of political elites and mass publics in democratic societies; multiculturalism. Principal forms of value conflict in contemporary liberal democracies. GER:DB-Hum

5 units, Win (Sniderman, P)

**POLISCI 221F. Race and American Politics**

How the issue of race has helped define the modern era of American politics. Major theories of political cleavage over public policies dealing with race.

5 units, not given this year

**POLISCI 221P. Data Analysis of Elections**

5 units, Win (Sniderman, P)

**POLISCI 222P. Creating the American Republic**

(Same as HISTORY 251) Concepts and developments in the late 18th-century invention of American constitutionalism; the politics of constitution making and ratifying; emergence of theories of constitutional interpretation including originalism; early notions of judicial review. Primary and secondary sources.

5 units, Win (Rakove, J)

**POLISCI 222R. Culture, Identity, and Diversity**

The interplay of liberalism, pluralism, and diversity. GER:DB-SocSci

5 units, Aut (Sniderman, P)

**POLISCI 223S. The Default Power: American Foreign Policy in a Unipolar World**

How the collapse of the Soviet Union liberated the U.S. from the constraints of bipolarity. How current policy fits into earlier traditions such as Wilsonianism or realism. Normative questions; what is America's proper role in the world? Prerequisite: senior standing. GER:DB-SocSci

5 units, Aut (Joffe, J)

**POLISCI 225E. The Laws of Politics: Term Limits, Campaign Finance, Blanket Primaries, and Redistricting**

The intersection of election law, politics, and academia. Major poli-

cy changes that affect the way that politics works, the legal decisions that govern them, and the academic research aimed at influencing policymakers and judges. Topics include campaign finance, redistricting, blanket primaries, and term limits. Students make presentations summarizing cases and research, prepare legal briefs of their own, and argue their cases before a mock Supreme Court.

5 units, Win (Staff)

**POLISCI 225S. Public Leadership in Theory and Practice**

(Same as PUBLPOL 112) Models from Aristotle to the Harvard School of Business concerning what leaders are supposed to do. Students develop expectations of what interactions between national political leaders would be like under each of these theories and a reasonably large (n=300-800) database of actual interactions between presidents and other leaders in business, unions, congress, and administration, using recorded conversations from Kennedy through Nixon. Students assess their expectations and reach conclusions about the usefulness of these theories of leadership and how leadership in public policy making might differ substantially from leadership in enterprise.

5 units, Spr (Staff)

**POLISCI 226U. Approaches to American Legal History**

(Same as HISTORY 253D) Legal history, once primarily devoted to exploring legal doctrines and key judicial opinions and thus of interest mainly to legal scholars and lawyers, now resembles historical writing more generally; the study of legal ideas and practices is increasingly integrated with social, intellectual, cultural, and political history. Recent writings in American legal history; how the field reflects developments in historical writing; and how the use of legal materials affects understanding of American history.

5 units, Aut (Rakove, J)

**POLISCI 227R. Polarized Politics and Special Interest Groups**

The influence of special interest groups on electoral competition and policy outcomes in the U.S., and the increasing partisan polarization among elites. How money spent by special interest groups affects the types of candidates who are elected, the agendas of the parties, and the votes of Congressmen. GER:DB-SocSci

5 units, Spr (Wand, J)

**POLISCI 229. Directed Reading and Research in American Politics**

1-10 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**POLISCI 230A. Classical Seminar: Origins of Political Thought**

(Same as CLASSHIS 133, CLASSHIS 333, HUMNTIES 321, PHIL 176A, PHIL 276A) Political philosophy in classical antiquity, focusing on canonical works of Thucydides, Plato, Aristotle, and Cicero. Historical background. Topics include: political obligation, citizenship, and leadership; origins and development of democracy; and law, civic strife, and constitutional change. GER:DB-Hum

5 units, Win (Ober, J; Simonton, M)

**POLISCI 231. High-Stakes Politics: Case Studies in Political Philosophy, Institutions, and Interests**

(Same as CLASSHIS 332, POLISCI 331) Normative political theory combined with positive political theory to better explain how major texts may have responded to and influenced changes in formal and informal institutions. Emphasis is on historical periods in which catastrophic institutional failure was a recent memory or a realistic possibility. Case studies include Greek city-states in the classical period and the northern Atlantic community of the 17th and 18th centuries including upheavals in England and the American Revolutionary era.

4-5 units, Spr (Ober, J; Weingast, B)

**POLISCI 231S. Contemporary Theories of Justice**

Social and political justice and contemporary debates in political theory. Recent works that develop the principles of justice, and the political arrangements that best satisfy their requirements. Limited enrollment. WIM GER:DB-Hum, DB-SocSci, EC-EthicReas

5 units, not given this year

**POLISCI 236. Theories of Civil Society, Philanthropy, and the Nonprofit Sector**

The historical development and modern structure of civil society emphasizing philanthropy and the nonprofit sector. What is the basis of private action for the public good? How are charitable dollars distributed and what role do nonprofit organizations and

philanthropic dollars play in a modern democracy? How do non-governmental organizations operate domestically and globally? Readings in political philosophy, political sociology, and public policy.

5 units, Spr (Sievers, B)

**POLISCI 237. Models of Democracy**

(Same as COMM 212, COMM 312, POLISCI 337) Ancient and modern varieties of democracy; debates about their normative and practical strengths and the pathologies to which each is subject. Focus is on participation, deliberation, representation, and elite competition, as values and political processes. Formal institutions, political rhetoric, technological change, and philosophical critique. Models tested by reference to long-term historical natural experiments such as Athens and Rome, recent large-scale political experiments such as the British Columbia Citizens' Assembly, and controlled experiments.

3-5 units, Spr (Fishkin, J)

**POLISCI 239. Directed Reading and Research in Political Theory**

May be repeated for credit.

1-10 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**POLISCI 240T. American Efforts at Promoting Democracy Abroad: Theory and Reality**

Theoretical and intellectual debates about democracy promotion with focus on realism versus liberalism. The evolution of these debates with attention to the Cold War, the 90s, and American foreign policy after 9/11. Tools for and bureaucratic struggles over how to promote democracy. Contemporary case studies.

5 units, not given this year

**POLISCI 242D. Political Economy of Property Rights**

(Same as HISTORY 278A) This course seeks to understand how property rights systems influence economic growth and the stewardship of resources. We are also interested in explaining the political process by which societies create property systems. In order to answer these questions we will read and discuss the work of political scientists, economists, and historians.

5 units, Win (Haber, S)

**POLISCI 243R. Research Seminar in Democratization and Human Rights**

Goal is to produce a minimum 30-page paper based on field research abroad. Students prepare research problem statement, meet individually with the professor, and circulate drafts for class comment. Graduate students should register for directed reading under the professor's name. GER:DB-SocSci

5 units, Win (Karl, T)

**POLISCI 245P. Politics and Society in Israel**

Focus is on Israel's political system and social makeup, from the pre-state period (Yishuv) to the 2009 elections. The ideological roots of Zionism; the core issues which comprise the Arab-Israeli conflict. Key aspects of the Israeli political system, including election methods, parties, and the constitutional status. The religious, ethnic, and national cleavages that manifest in Israeli public life and politics.

5 units, Spr (Lev-On, A)

**POLISCI 245R. Politics in Modern Iran**

Modern Iran has been a smithy for political movements, ideologies, and types of states. Movements include nationalism, constitutionalism, Marxism, Islamic fundamentalism, social democracy, Islamic liberalism, and fascism. Forms of government include Oriental despotism, authoritarianism, Islamic theocracy, and liberal democracy. These varieties have appeared in Iran in an iteration shaped by history, geography, proximity to oil and the Soviet Union, and the hegemony of Islamic culture. GER:DB-SocSci, EC-GlobalCom

5 units, Win (Milani, A)

**POLISCI 246. African Politics**

Key issues in African political economy: the nature and legacy of colonial rule; the African state; voting, elections, and Africa's democratic transitions; the sources of Africa's poor economic performance; ethnicity in political and social life; violence, social conflict, and civil war. Emphasis is on mastering the literature on African politics and developing intuitions and skills to permit students to become producers of high quality research in the area.

5 units, Aut (Staff)

**POLISCI 248S. Latin American Politics**

Fundamental transformations in Latin America in the last two decades: why most governments are now democratic or semidemocratic; and economic transformation as countries abandoned import substitution industrialization policies led by state intervention for neoliberal economic policies. The nature of this dual transformation. GER:DB-SocSci

5 units, Win (Magaloni, B)

**POLISCI 249. Directed Reading and Research in Comparative Politics**

May be repeated for credit.

1-10 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**POLISCI 259. Directed Reading and Research in Political Methodology**

May be repeated for credit.

1-10 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**POLISCI 299A. Senior Project**

Students conduct independent research work towards a senior honors thesis. See "Honors Program" above. (Staff)

1-5 units, Aut (Staff)

**POLISCI 299B. Senior Project**

Students conduct independent research work towards a senior honors thesis. See "Honors Program" above. (Staff)

1-5 units, Win (Staff)

**POLISCI 299C. Senior Project**

Students conduct independent research work towards a senior honors thesis. See "Honors Program" above. (Staff)

1-5 units, Spr (Staff)

**POLISCI 299Q. Junior Research Seminar**

Required of students interested in writing a senior honors thesis. Focus is on finding a manageable topic and an adviser.

2 units, Spr (Rutten, A)

**GRADUATE COURSES IN POLITICAL SCIENCE****POLISCI 310A. International Relations Theory, Part I**

First of a three-part graduate sequence. History of international relations, current debates, and applications to problems of international security and political economy.

5 units, Aut (Fearon, J; Sagan, S)

**POLISCI 310B. International Relations Theory, Part II**

Second of a three-part graduate sequence. History of international relations theory, current debates, and applications to problems of international security and political economy. Prerequisite: 310A.

5 units, Win (Tomz, M; Lipsy, P)

**POLISCI 310C. Research in International Relations**

Third of a three-part graduate sequence. Focus is on developing research papers begun in 310A or B, and exploring active areas of research in the field. Prerequisite: 310B.

5 units, Spr (Goldstein, J)

**POLISCI 310R. International Conflict: Management and Resolution**

(Same as IPS 250, POLISCI 210R, PSYCH 383) (Same as LAW 656) Interdisciplinary. Theoretical insights and practical experience in resolving inter-group and international conflicts. Sources include social psychology, political science, game theory, and international law. Personal, strategic, and structural barriers to solutions. How to develop a vision of a mutually bearable shared future, trust in the enemy, and acceptance of loss that a negotiated settlement may produce. Spoilers who seek to sabotage agreements. Advantages and disadvantages of unilateral versus reciprocal measures. Themes from the Stanford Center of International Conflict and Negotiation (SCICN). Prerequisite for undergraduates: consent of instructor.

3-5 units, Win (Holloway, D)

**POLISCI 311A. Workshop in International Relations**

For graduate students. Contemporary work. Organized around presentation of research by students and outside scholars. May be repeated for credit.

1-5 units, Aut (Goldstein, J; Schultz, K)

**POLISCI 311B. Workshop in International Relations**

For graduate students. Contemporary work. Organized around presentation of research by students and outside scholars. May be repeated for credit.

1-5 units, Win (Schultz, K; Fearon, J)

**POLISCI 311C. Workshop in International Relations**

Organized around presentation of research by students and outside scholars. May be repeated for credit.

1-5 units, not given this year

**POLISCI 312S. Managing Global Complexity**

(Same as IPS 201) The value of major theories and concepts in international relations for understanding and addressing global policy issues. Country case study with policy challenges such as development, democracy promotion, proliferation, and terrorism; the challenge of creating coherent policies that do not run at cross purposes. Case study of a policy challenge that cuts across academic disciplines and policy specializations to provide the opportunity to bring together skills and policy perspectives.

3 units, Spr (Krasner, S; Stedman, S)

**POLISCI 313R. Political Economy of Financial Crisis**

(Same as POLISCI 213R) Political responses to domestic and international financial crises. Monetary and fiscal policy. The role of interest groups. International cooperation and the role of the IMF.

5 units, Spr (Lipsy, P)

**POLISCI 314D. Democracy, Development, and the Rule of Law**

(Same as IPS 230, INTNLREL 114D, POLISCI 114D) Links among the establishment of democracy, economic growth, and the rule of law. How democratic, economically developed states arise. How the rule of law can be established where it has been historically absent. Variations in how such systems function and the consequences of institutional forms and choices. How democratic systems have arisen in different parts of the world. Available policy instruments used in international democracy, rule of law, and development promotion efforts.

5 units, Aut (Diamond, L; Stoner-Weiss, K)

**POLISCI 314S. Decision Making in U.S. Foreign Policy**

(Same as IPS 314S) Priority to IPS students. Formal and informal processes involved in U.S. foreign policy decision making. The formation, conduct, and implementation of policy, emphasizing the role of the President and executive branch agencies. Theoretical and analytical perspectives; case studies.

5 units, Spr (Staff)

**POLISCI 316. International History and International Relations Theory**

(Same as HISTORY 202, HISTORY 306E, POLISCI 216E) The relationship between history and political science as disciplines. Sources include studies by historians and political scientists on topics such as the origins of WW I, the role of nuclear weapons in international politics, the end of the Cold War, nongovernmental organizations in international relations, and change and continuity in the international system.

5 units, Win (Staff)

**POLISCI 319. Directed Reading in International Relations**

May be repeated for credit.

1-10 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**POLISCI 323R. The Press and the Political Process**

(Same as COMM 160, COMM 260) (Graduate students register for COMM 260.) The role of mass media and other channels of communication in political and electoral processes.

4-5 units, Spr (Iyengar, S)

**POLISCI 323S. Analysis of Political Campaigns**

(Same as COMM 162, COMM 262) (Graduate students register for COMM 262.) Seminar. The evolution of American political campaigns, and the replacement of the political party by the mass media as intermediary between candidates and voters. Academic literature on media strategies, the relationship between candidates and the press, the effects of campaigns on voter behavior, and inconsistencies between media campaigns and democratic norms. Do media-based campaigns enable voters to live up to their civic responsibility? Has the need for well-financed campaigns increased the influence of elites over nominations? Have citizens become disengaged?

4-5 units, Aut (Iyengar, S)

**POLISCI 324. Graduate Seminar in Political Psychology**

(Same as COMM 308) For students interested in research in political science, psychology, or communication. Methodological techniques for studying political attitudes and behaviors. May be repeated for credit.

1-3 units, Aut (Krosnick, J), Win (Krosnick, J), Spr (Krosnick, J)

**POLISCI 326V. Class, Region, and Religion in American Politics**

The intersection of important forces and recent trends in American politics. Focus is on the role of religion in recent decades, particularly the religious right, and how religion and social class are simultaneously conflicting and reinforcing the views of the electorate. How the issue of class plays out in elitist versus populist appeals, the place of anti-intellectualism as a political tactic, and regional distributions in U.S. elections related to these trends.

5 units, Win (Segura, G)

**POLISCI 329. Directed Reading and Research in American Politics**

May be repeated for credit.

1-10 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**POLISCI 330A. Classical Seminar: Origins of Political Thought**

(Same as CLASSHIS 133, CLASSHIS 333, HUMNTIES 321, PHIL 176A, PHIL 276A, POLISCI 230A) Political philosophy in classical antiquity, focusing on canonical works of Thucydides, Plato, Aristotle, and Cicero. Historical background. Topics include: political obligation, citizenship, and leadership; origins and development of democracy; and law, civic strife, and constitutional change. GER:DB-Hum

5 units, Win (Ober, J; Simonton, M)

**POLISCI 330B. History of Political Thought II: Early Modern Political Thought, 1500-1700**

(Same as POLISCI 130B) The development of constitutionalism, Renaissance humanism and the Reformation, and changing relationships between church and states. Emphasis is on the relationships among political thought, institutional frameworks, and immediate political problems and conflicts. The usefulness of the history of political thought to political science.

5 units, not given this year

**POLISCI 330C. History of Political Thought III: Freedom, Reason, and Power**

(Same as POLISCI 130C) Classic works in political theory since the American and French revolutions. Readings include Kant, Hegel, Marx, Nietzsche, and Dewey.

5 units, Spr (Stone, P)

**POLISCI 331. High-Stakes Politics: Case Studies in Political Philosophy, Institutions, and Interests**

(Same as CLASSHIS 332, POLISCI 231) Normative political theory combined with positive political theory to better explain how major texts may have responded to and influenced changes in formal and informal institutions. Emphasis is on historical periods in which catastrophic institutional failure was a recent memory or a realistic possibility. Case studies include Greek city-states in the classical period and the northern Atlantic community of the 17th and 18th centuries including upheavals in England and the American Revolutionary era.

4-5 units, Spr (Ober, J; Weingast, B)

**POLISCI 331S. Politics and Collective Action**

(Same as IPS 206A, PUBLPOL 304A) Classic theories for why collective action problems occur and how they can be solved. Politics of aggregating individual decisions into collective action, including voting, social protest, and competing goals and tactics of officials, bureaucrats, interest groups, and other stakeholders. Economic, distributive, and moral frameworks for evaluating collective action processes and outcomes. Applications to real-world policy problems involving collective action.

4 units, Spr (Stone, P)

**POLISCI 332. Graduate Seminar: John Rawls's Political Philosophy**

(Same as PHIL 372D) Leading ideas in A Theory of Justice, Political Liberalism, and The Law of Peoples.

5 units, not given this year

**POLISCI 334. Philanthropy and Civil Society**

(Same as EDUC 374, SOC 374) Associated with the Center for Philanthropy and Civil Society (PACS). Year-long workshop for doctoral students and advanced undergraduates writing senior theses on the nature of civil society or philanthropy. Focus is on pursuit of progressive research and writing contributing to the current scholarly knowledge of the nonprofit sector and philanthropy. Accomplished in a large part through peer review. Readings include recent scholarship in aforementioned fields. May be repeated for credit for a maximum of 9 units.

1-3 units, Aut (Powell, W; Reich, R), Win (Powell, W; Reich, R), Spr (Powell, W; Reich, R)

**POLISCI 336. Introduction to Global Justice**

(Same as ETHICSOC 136R, INTNLREL 136R, PHIL 76, POLISCI 136R) Recent work in political theory on global justice. Topics include global poverty, human rights, fair trade, immigration, climate change. Do developed countries have a duty to aid developing countries? Do rich countries have the right to close their borders to economic immigrants? When is humanitarian intervention justified? Readings include Charles Beitz, Thomas Pogge, John Rawls.

5 units, Spr (McLeod, A)

**POLISCI 336J. Collectivities**

(Same as PHIL 279) Issues about the nature of collective action, shared intention, and cooperation, the role of sociality in the nature of mind, problems of preference and judgment aggregation, and, quite generally, different ways of thinking about the relationship of I to we. Enrollment limited to 30.

4 units, Aut (Bratman, M; Cohen, J)

**POLISCI 337. Models of Democracy**

(Same as COMM 212, COMM 312, POLISCI 237) Ancient and modern varieties of democracy; debates about their normative and practical strengths and the pathologies to which each is subject. Focus is on participation, deliberation, representation, and elite competition, as values and political processes. Formal institutions, political rhetoric, technological change, and philosophical critique. Models tested by reference to long-term historical natural experiments such as Athens and Rome, recent large-scale political experiments such as the British Columbia Citizens' Assembly, and controlled experiments.

3-5 units, Spr (Fishkin, J)

**POLISCI 337R. Justice at Home and Abroad: Civil Rights in the 21st Century**

(Same as EDUC 261X, ETHICSOC 137R, POLISCI 137R) Focus is on theories of justice. How the core ideals of freedom, equality, and security animate theories which John Rawls considers the first virtue of social institutions. Topics include the U.S. Constitution as a legal framework for the operation of these ideals, civil rights legislation and litigation as the arena of tensions between those ideals, and how ideas of justice function both at home and abroad to impact civil liberties in today's war on terror.

5 units, not given this year

**POLISCI 337S. Seminar on Liberation Technologies**

(Same as CS 546)

1 unit, Aut (Winograd, T; Cohen, J; Diamond, L)

**POLISCI 337T. Designing Liberation Technology**

(Same as CS 379L) Small project teams work with NGOs to design new technologies for promoting development and democracy. Students conduct observations to identify needs, generate concepts, create prototypes, and test their appropriateness. Some projects may continue past the quarter towards full-scale implementation. Taught through the Hasso Plattner Institute of Design at Stanford (<http://dschool.stanford.edu>). Enrollment limited. Prerequisites: consent of instructors; application.

3 units, Spr (Cohen, J; Winograd, T)

**POLISCI 338E. The Problem of Evil in Literature, Film, and Philosophy**

(Same as FRENGEN 265) Conceptions of evil and its nature and source, distinctions between natural and moral evil, and what belongs to God versus to the human race have undergone transformations reflected in literature and film. Sources include Rousseau's response to the 1755 Lisbon earthquake; Hannah Arendt's interpretation of Auschwitz; Günther Anders' reading of Hiroshima; and current reflections on looming climatic and nuclear disasters.

Readings from Rousseau, Kant, Dostoevsky, Arendt, Anders, Jonas, Camus, Ricoeur, Houellebeck, Girard. Films by Lang, Bergman, Losey, Hitchcock.

3-5 units, Win (Dupuy, J)

**POLISCI 339. Directed Reading and Research in Political Theory**

May be repeated for credit.

1-5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**POLISCI 344. Politics and Geography**

The role of geography in topics in political economy, including development, political representation, voting, redistribution, regional autonomy movements, fiscal competition, and federalism.

3-5 units, Spr (Rodden, J; Jusko, K)

**POLISCI 344U. Political Culture**

An approach to culture emphasizing equilibrium attributes through relationships among culture, choice, coordination, and common knowledge. Implications for the study of political processes and institutions.

5 units, Spr (Staff)

**POLISCI 346S. The Logic of Authoritarian Government, Ancient and Modern**

(Same as HISTORY 378A) If authoritarianism is less economically efficient than democracy, and if authoritarianism is a less stable form of political organization than democracy, then why are there more authoritarian governments than democracies? To address this paradox, focus is on theoretical and empirical literature on authoritarian governments, and related literatures on the microeconomic analysis of property rights and credible commitments.

5 units, not given this year

**POLISCI 348. Chinese Politics: The Transformation and the Era of Reform**

(Same as POLISCI 148) (Graduate students register for 348.) For advanced undergraduates and beginning graduate students. The content, process, and consequences of reform in China from 1976 to the present.

5 units, Win (Oi, J)

**POLISCI 348R. Workshop: China Social Science**

(Same as SOC 368W) For Ph.D. students in the social sciences and history. Research on contemporary society and politics in the People's Republic of China. May be repeated for credit. Prerequisite: consent of instructor.

1-2 units, Aut (Walder, A; Oi, J), Win (Walder, A; Chan, C; Oi, J), Spr (Walder, A; Zhou, X; Oi, J)

**POLISCI 349. Directed Reading and Research in Comparative Politics**

May be repeated for credit.

1-10 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**POLISCI 350A. Political Methodology I**

(Same as POLISCI 150A) Introduction to probability and statistical inference, with applications to political science and public policy. Prerequisite: elementary calculus.

5 units, Aut (Wand, J)

**POLISCI 350B. Political Methodology II**

(Same as POLISCI 150B) Understanding and using the linear regression model in a social-science context: properties of the least squares estimator; inference and hypothesis testing; assessing model fit; presenting results for publication; consequences and diagnosis of departures from model assumptions; outliers and influential observations, graphical techniques for model fitting and checking; interactions among exploratory variables; pooling data; extensions for binary responses.

5 units, Win (Jackman, S)

**POLISCI 350C. Political Methodology III**

(Same as POLISCI 150C) Models for discrete outcomes, time series, measurement error, and simultaneity. Introduction to nonlinear estimation, large sample theory. Prerequisite: 150B/350B.

3-5 units, Spr (Wand, J)

**POLISCI 351A. Foundations of Political Economy**

Introduction to political economy with an emphasis on formal models of collective choice, public institutions, and political competition. Topics include voting theory, social choice, institutional equilibria, agenda setting, interest group politics, bureaucratic

behavior, and electoral competition.

4 units, Aut (Hatfield, J)

**POLISCI 351B. Economic Analysis of Political Institutions**

Applying techniques such as information economics, games of incomplete information, sequential bargaining theory, repeated games, and rational expectations of microeconomic analysis and game theory to political behavior and institutions. Applications include agenda formation in legislatures, government formation in parliamentary systems, the implications of legislative structure, elections and information aggregation, lobbying, electoral competition and interest groups, the control of bureaucracies, interest group competition, and collective choice rules.

4 units, Win (Shotts, K)

**POLISCI 351C. Testing Models of Governmental Decision Making**

(Same as POLECON 682) Applications of formal models to several stages of decision making in the U.S. national government, with an emphasis on the legislative branch. Topics include strategies of committees, roll call voting, the budget process, policy formation, effects of special rules, congressional-presidential relations, and congressional-agency relations. Prerequisites: POLECON 680/POLISCI 351A and POLECON 681/POLISCI 351B.

4 units, Spr (Krehbiel, K)

**POLISCI 352. Introduction to Game Theoretic Methods in Political Science**

(Same as POLISCI 152) Concepts and tools of non-cooperative game theory developed using political science questions and applications. Formal treatment of Hobbes' theory of the state and major criticisms of it; examples from international politics. Primarily for graduate students; undergraduates admitted with consent of instructor.

3-5 units, Win (Fearon, J)

**POLISCI 353B. Workshop in Statistical Modeling**

Continuation of 353A. Prerequisite: 353A.

1-5 units, Win (Wand, J)

**POLISCI 353C. Workshop in Statistical Modeling**

Continuation of 353A. May be repeated for credit. Prerequisite: 353A.

1-2 units, Spr (Wand, J)

**POLISCI 357. Sampling and Surveys**

(Same as POLISCI 157) The importance of sample surveys as a source of social science data including public opinion, voting, welfare programs, health, employment, and consumer behavior. Survey design, sampling theory, and estimation. Nonresponse, self-selection, measurement error, and web survey methods. Prerequisite: 150B or equivalent.

5 units, Win (Rivers, D)

**POLISCI 359. Advanced Individual Study in Political Methodology**

May be repeated for credit.

1-10 units, Aut (Wand, J; Jackman, S; Fearon, J; Jusko, K), Win (Staff), Spr (Staff), Sum (Staff)

**POLISCI 362. New Economics of Organization**

Survey of economic approaches to organization, emphasizing theory and application, with attention to politics.

5 units, Spr (Weingast, B)

**POLISCI 364. Theories of Political Institutions**

(Same as POLECON 664) Organized activity as it reflects the organization of political life. Eclectic and interdisciplinary. Emphasis is on political institutions and formal organizations, and the norms, expectation, and routines characteristic of informal political structure.

4 units, Win (Moe, T)

**POLISCI 365. Organizational Decision Making**

Behavioral theories of organization. Emphasis is on the institutional applications of bounded rationality. Models of incrementalism; evolutionary models of change; organizational learning. The differences between predictions of theories of perfect rationality and those of imperfect rationality. Organizational responses (constructive and pathological) to constraints on information processing. Institutional contexts; public agencies and firms.

5 units, not given this year

**POLISCI 369. Directed Reading and Research in Political Organizations**

Advanced individual study in public administration. (Staff)  
1-10 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**POLISCI 400. Dissertation**

1-10 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**POLISCI 402. Methods of Analysis Program in the Social Sciences (MAPSS) Workshop**

(Same as COMM 310) Colloquium series. Creation and application of new methodological techniques for social science research. Presentations on methodologies of use for social scientists across departments at Stanford by guest speakers from Stanford and elsewhere. See <http://mapss.stanford.edu>. May be repeated for credit.

1 unit, Aut (Staff), Win (Jusko, K; Rodden, J), Spr (Jusko, K; Rodden, J)

**POLISCI 403. International Conflict Resolution Colloquium**

(Same as PSYCH 283) (Same as LAW 611.) Sponsored by the Stanford Center on International Conflict and Negotiation (SCICN). Conflict, negotiation, and dispute resolution with emphasis on conflicts and disputes with an international dimension, including conflicts involving states, peoples, and political factions such as the Middle East and Northern Ireland. Guest speakers. Issues including international law, psychology, and political science, economics, anthropology, and criminology.

2 units, Win (Weiner, A; Holloway, D; Ross, L)

**POLISCI 404. Dispute Resolution in International Economic Law**

(Same as LAW 356.) Topics include: theoretical work on international trade and investment disputes; empirical work on WTO dispute resolution and the efficacy of developing country participation; and legal analysis of current, prominent disputes in the WTO and under international investment treaties. Substantial paper required. May be repeated for credit.

1 unit, Win (Goldstein, J)

**POLISCI 420A. Approaches to the Study of American Politics**

Theories of American politics, focusing on Congress, the presidency, the bureaucracy, and the courts.

5 units, Aut (Wand, J)

**POLISCI 420B. Topics in American Political Behavior**

For graduate students with background in American politics embarking on their own research. Current research in American politics, emphasizing political behavior and public opinion. Possible topics: uncertainty and ambivalence in political attitudes, heterogeneity in public opinion, the structure of American political ideology, political learning, the media as a determinant of public opinion, and links between public opinion and public policy.

5 units, Win (Sniderman, P; Iyengar, S)

**POLISCI 420C. American Political Institutions**

Field seminar. Major theoretical perspectives, controversies, and literature on the substance of American politics, including Congress, the Presidency, federalism, bureaucracy, and the courts. Preparation for performing publishable research. Prerequisites: 420A,B.

5 units, Spr (Moe, T)

**POLISCI 422. Campaigns, Elections, and Public Opinion**

Research seminar. Frontiers in mass political behavior. Sources include data sets from the 2004 election cycle. Prerequisite: 420B or equivalent.

1-5 units, Aut (Segura, G; Jackman, S), Win (Segura, G; Jackman, S), Spr (Jackman, S; Segura, G)

**POLISCI 433. Workshop in Political Theory**

For graduate students. May be repeated for credit.

1-2 units, Aut (Cohen, J; Reich, R), Win (Cohen, J; Reich, R), Spr (Cohen, J; Reich, R)

**POLISCI 436. Rational Choice**

The scope and limits of rational choice theory. Possible topics: explanatory and normative uses of rational choice; self-interest versus altruism; the nature of social norms; incommensurable choices; and bounded rationality.

5 units, Win (Stone, P)

**POLISCI 440A. Theories in Comparative Politics**

Required of Political Science Ph.D. students with comparative

politics as first or second concentration; others by consent of instructor. Theories addressing major concerns in the comparative field including democracy, regime change, the state, revolutions, national heterogeneity, and economic performance.

5 units, Aut (Laitin, D)

**POLISCI 440B. Political Economy of Development**

(Same as HISTORY 378E) Required of Political Science Ph.D. students with comparative politics as a first or second concentration; others by consent of the instructor. The origins of political and economic institutions and their impact on long run outcomes for growth and democracy. Emphasis is on the analysis of causal models, hypothesis testing, and the quality of evidence.

5 units, Win (Haber, S)

**POLISCI 440C. Methods in Comparative Politics**

Required of Political Science Ph.D. candidates with comparative politics as a first or second concentration; others by consent of instructor. Current methodological standards in comparative politics. Students develop their own research design that meets these standards.

5 units, Spr (Jusko, K)

**POLISCI 440D. Workshop in Comparative Politics**

Faculty, guest speakers, and graduate students conducting research in comparative politics present work-in-progress. Graduate students may enroll for up to 5 total units apportioned by quarter. Auditors welcome. Graduate students whose major or minor field is comparative politics must make at least one presentation to the seminar.

1-2 units, Aut (Rodden, J; Jusko, K), Win (Rodden, J; Jusko, K), Spr (Rodden, J; Jusko, K)

**POLISCI 443S. Political Economy of Reform in China**

Content, process, and problems of China's post-Mao reforms. Changes in property rights, markets, credit, and the role of the state in economic development. Comparative insights about reform in the Chinese communist system that distinguishes it from the experience of regimes in E. Europe and the former Soviet Union.

5 units, Spr (Oi, J)

**POLISCI 444. Comparative Political Economy: Advanced Industrial Societies**

Political economy approaches to key policy outcomes including redistribution, the size of government, fiscal behavior, and pork-barrel politics. Theories related to institutions, interest groups, and geography, focusing on middle- and upper-income countries.

3-5 units, not given this year

## PORTUGUESE LANGUAGE (PORTLANG)

### UNDERGRADUATE COURSES IN PORTUGUESE LANGUAGE

**PORTLANG 1. First-Year Portuguese, First Quarter**

Emphasis is on oral comprehension and proficiency in speaking. Students learn the language as they contrast Brazilian culture with their own. Lab. Completion of 3 fulfills the University Foreign Language Requirement.

5 units, Aut (Staff)

**PORTLANG 1A. Accelerated First-Year Portuguese, Part 1**

For students with two years of college level study of a Romance language, preferably Spanish. Goal is to use socially and culturally appropriate forms in conversations, providing and obtaining information, and expressing feelings, emotions, and opinions. Students learn the language as they contrast Brazilian culture with their own. Lab. Completion of 2A fulfills the University's foreign language requirement.

3-5 units, Aut (Staff), Win (Santos, R), Spr (Santos, R)

**PORTLANG 2. First-Year Portuguese, 2nd Quarter**

Continuation of 1. Speaking and oral comprehension and reading and writing skills. Lab. Prerequisite: 1.

5 units, Win (Staff)

**PORTLANG 2A. Accelerated First-Year Portuguese, Part 2**  
Continuation of 1A. Completion of 2A fulfills the University's foreign language requirement.

3-5 units, Aut (Wiedemann, L), Win (Wiedemann, L), Spr (Wiedemann, L)

**PORTLANG 3. First-Year Portuguese**

Emphasizes speaking and oral comprehension proficiency and the development of reading and writing skills. Literary and journalistic readings, studying of Brazilian popular music, and viewing short documentaries are the basis for discussions on Brazilian culture and current events. Lab. Completion of 3 fulfills the University Foreign Language Requirement. Prerequisite: 2 or equivalent.

5 units, Spr (Staff)

**PORTLANG 11A. Accelerated Second-Year Portuguese, Part 1**

Goal is to use socially and culturally appropriate forms in narrations, descriptions, and expression of ideas and opinions. Prerequisite: first-year sequence, equivalent, or consent of instructor.

3-5 units, Aut (Wiedemann, L), Win (Santos, R), Spr (Santos, R)

**PORTLANG 12A. Accelerated Second-Year Portuguese, Part 2**

Continuation of 11A. Prerequisite: 11A, equivalent, or consent of instructor.

3-5 units, Aut (Wiedemann, L), Win (Wiedemann, L), Spr (Santos, R)

**PORTLANG 50. Reading in Portuguese**

Introductory class for students with superior reading proficiency in Spanish or another Romance language. Reading competence for research and courses in Luso-Brazilian studies. Literary, journalistic, and academic readings. Fulfills University reading requirement for advanced degrees. May be offered alternate years.

3-4 units, Spr (Staff)

**PORTLANG 99. Language Specials**

Prerequisite: consent of instructor. (Staff)

1-5 units, Aut (Staff), Win (Staff), Spr (Staff)

**PORTLANG 101. Reading Brazil**

For intermediate or advanced students. Short expository readings, guest lectures, discussions, compositions on Brazilian issues. Review of grammatical structures. Vocabulary building with emphasis on common idiomatic expressions and troublesome lexical distinctions. Prerequisite: 12A or equivalent, or consent of instructor.

3-4 units, Aut (Wiedemann, L)

**PORTLANG 103. Advanced Conversation: Brazil Today**

For intermediate and advanced students. Reading and discussions on issues from current newspapers and magazines, reading comprehension strategies with online news updates, and vocabulary building with emphasis on formal expository writing. Writing practice if desired. Students prepare short presentations and lead subsequent discussions. May be repeated once for credit. Prerequisite: 12A or consent of instructor.

3 units, Spr (Wiedemann, L)

**PORTLANG 193Q. Spaces and Voices of Brazil through Film**

(S,Sem) Stanford Introductory Seminar. Preference to sophomores. How a country is perceived and defines itself involves the reproduction of social relations and complex social constructions on the part of those who live there and those who see it from a distance. Changes and pervasive defining traits in how Brazil is perceived. Introduction to the history, culture, politics, and artistic production of Brazil through feature films, documentaries, and readings. Movies include *Banana is my Business*, *Black Orpheus*, *Olga*, *They Don't Use Black-Tie*, *City of God*, *Central Station*, *Gaijin*, and *Four Days in September*. In English. GER:DB-Hum, EC-GlobalCom

3-4 units, Aut (Wiedemann, L)

**GRADUATE COURSES IN PORTUGUESE LANGUAGE**

**PORTLANG 1G. Accelerated First-Year Portuguese, Part 1**

For GSB students with two years of formal study of a Romance language, preferably Spanish. Goal is to use socially and culturally appropriate forms in conversations, establishing relationships, providing and obtaining information, and expressing feelings, emotions, and opinions. Written and spoken language; social and

cultural influences; and how to present information, concepts, and ideas on academic topics. Limited enrollment.

4 units, Win (Staff)

**PORTLANG 2G. Accelerated First-Year Portuguese, Part 2**

Continuation of 1G. GSB students only. Limited enrollment.

4 units, Spr (Staff)

**PORTLANG 297. Directed Reading**

Prerequisite: consent of instructor. (Staff)

1-4 units, Aut (Staff), Win (Staff), Spr (Staff)

**PORTLANG 394. Graduate Studies in Portuguese Conversation**

Prerequisite: consent of instructor. (Staff)

1-3 units, Aut (Staff), Win (Staff), Spr (Staff)

**PORTLANG 395. Graduate Studies in Portuguese**

Prerequisite: consent of instructor. (Staff)

2-5 units, Aut (Staff), Win (Staff), Spr (Staff)

**PSYCHOLOGY (PSYCH)**

**UNDERGRADUATE COURSES IN PSYCHOLOGY**

**PSYCH 1. Introduction to Psychology**

Human behavior and mental processes including the nervous system, consciousness, learning, memory, development, emotion, psychopathology, interpersonal process, society, and culture. Current research. GER:DB-SocSci

5 units, Aut (Gross, J), Win (Knutson, B), Spr (Walton, G)

**PSYCH 7Q. Language Understanding by Children and Adults**

(S,Sem) Stanford Introductory Seminar. How do we first learn to find meaning in strings of speech sounds? Understanding spoken language requires the rapid integration of acoustic information with linguistic knowledge and with conceptual knowledge based on experience with how things happen in the world. Topics include research on early development of language understanding and laboratory methods of how young children make sense of speech. Observations of preschool children and visits to Stanford laboratories.

3 units, Aut (Fernald, A)

**PSYCH 8N. Life Span Development**

Preference to freshmen. People continue to change in systematic ways throughout life, but developmental psychology has focused mostly on childhood. Focus is on conceptual models that direct developmental research on adulthood and old age, and the empirical literature concerning developmental changes in cognition, motivation, and emotion. GER:DB-SocSci

3 units, not given this year

**PSYCH 10. Introduction to Statistical Methods: Precalculus**

(Same as STATS 60, STATS 160) Techniques for organizing data, computing, and interpreting measures of central tendency, variability, and association. Estimation, confidence intervals, tests of hypotheses, t-tests, correlation, and regression. Possible topics: analysis of variance and chi-square tests, computer statistical packages. GER:DB-Math

5 units, Aut (Switzer, P), Win (Thomas, E), Spr (Walther, G), Sum (Staff)

**PSYCH 12N. Self Theories**

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. The impact of people's belief in a growing versus fixed self on their motivation and performance in school, business, sports, and relationships. How such theories develop and can be changed. GER:DB-SocSci

3 units, Aut (Dweck, C)

**PSYCH 14N. Race and Crime**

(F,Sem) Stanford Introductory Seminar. Topics in race, crime, and punishment in the United States. Readings and discussion focus on theoretical and empirical research on policing, sentencing, and incarceration. Readings will be drawn from psychology, sociology, criminology, economics, and legal studies.

3 units, Win (Eberhardt, J)

**PSYCH 16N. Amines and Affect**

Preference to freshmen. How serotonin, dopamine, and norepinephrine influence people's emotional lives. GER:DB-SocSci  
3 units, not given this year

**PSYCH 17N. Language and Society: How Languages Shape Lives**

(F,Sem) Stanford Introductory Seminar. Do people who speak different languages think differently? What role does language play in politics, law, and religion? The role of language in individual cognition and in society. Breaking news about language and society; the scientific basis for thinking about these broad issues. GER:DB-SocSci  
3 units, Spr (Boroditsky, L)

**PSYCH 23N. Aping: Imitation, Control, and the Development of the Human Mind**

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. The idea that a childhood that prolongs a state of stimulus-bound helplessness beyond that of animals is the price human beings pay for the benefits of shared cognitive structures. How such structures enable social collaboration, language, and the transmission and sharing of knowledge. Sources include psychological data from animals and humans, and recent discoveries in neuroscience.  
3 units, Spr (Ramscar, M)

**PSYCH 25N. Psychology, Inequality, and the American Dream**

(F,Sem) Stanford Introductory Seminar. Despite legal prohibitions against discrimination and the fact that many people endorse egalitarian values, inequality persists in America. What role do psychological factors play in perpetuating inequality? How can psychologically wise reforms promote equal opportunity? Topics include prejudice and discrimination, school achievement, social class, and race/ethnicity.  
3 units, Aut (Walton, G)

**PSYCH 26N. Language Acquisition: Exploring the Minds of Children**

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Language is an extraordinary competence distinguishing humans from other species, yet there is debate about the role of biology in guiding language acquisition. Does language development follow an innate bioprogram or does it build on more general cognitive abilities, influenced by early experience? Topics include biological and experiential influences on the emergence of linguistic ability as children learn a first language. Discussions of theory and research, visits to Stanford laboratories, and observations of very young language learners.  
3 units, Aut (Fernald, A)

**PSYCH 27N. The Psychology of Prejudice**

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Social psychological theories and research on stereotypes, prejudice, discrimination, and racism. Psychological perspectives include those emphasizing personologic, cognitive, motivational, and sociocultural contributions to prejudice. Emphasis is on applying each approach to understanding real-world contexts such as educational and occupational contexts, and to the implications of this research for efforts to reduce prejudice and discrimination.  
3 units, Win (Brown, J)

**PSYCH 30. Introduction to Perception**

Behavioral and neural aspects of perception focusing on visual and auditory perception. Topics include: scientific methods for studying perception, anatomy and physiology of the visual and auditory systems, color vision, depth perception, motion perception, stereopsis, visual recognition, pitch and loudness perception, speech perception, and reorganization of the visual system in the blind. GER: DB-NatSci  
3 units, Aut (Grill-Spector, K)

**PSYCH 45. Introduction to Learning and Memory**

The literature on learning and memory including cognitive and neural organization of memory, mechanisms of remembering and forgetting, and why people sometimes falsely remember events that never happened. Cognitive theory and behavioral evidence integrated with data from patient studies and functional brain imaging. Recommended: 1.  
3 units, Spr (Wagner, A)

**PSYCH 50. Introduction to Cognitive Neuroscience**

Topics in human neuropsychology. The functional organization of

the human nervous system and of brain imaging techniques (MRI, PET). Hemispheric specialization and the brain basis of perception, memory, language, emotion, spatial cognition, and problem solving. Neuropsychological deficits in neurological disorders and their implications in understanding normal function. Recommended: 1 GER: DB-NatSci  
4 units, Aut (McClure, S)

**PSYCH 55. Introduction to Cognition and the Brain**

Major topics in cognitive psychology and neuroscience, including empirical approaches to perception, language, learning, memory, knowledge representation, problem solving, and reasoning.  
4 units, Win (Boroditsky, L)

**PSYCH 60. Introduction to Developmental Psychology**

Psychological development from birth to adulthood, emphasizing infancy and the early and middle childhood years. The nature of change during childhood and theories of development. Recommended: 1. GER:DB-SocSci  
3 units, Aut (Staff)

**PSYCH 60A. Introduction to Developmental Psychology Section**

Guided observation of children age 2-6 at Bing Nursery School. Corequisite: 60.  
2 units, Aut (Lomangino, A; Hartman, B)

**PSYCH 70. Introduction to Social Psychology**

Topics related to the influence of other people on individuals' thoughts, emotions, and behaviors. Factors that affect the way that we perceive ourselves and others; how people influence others; how persuasion happens; what causes us to like, love, help, or hurt others; and how social psychology helps to understand questions about law, business, and health. GER:DB-SocSci  
4 units, Spr (Tormala, T)

**PSYCH 75. Introduction to Cultural Psychology**

The cultural sources of diversity in thinking, emotion, motivation, self, personality, morality, development, and psychopathology. Recommended: 1. WIM GER:DB-SocSci, EC-GlobalCom  
5 units, not given this year

**PSYCH 80. Introduction to Personality Psychology**

Current empirical and theoretical approaches to personality. How and why do people differ? Does personality change over time? Can people change their personalities? What makes people happy? What are the physical, mental, and social consequences of personalities? Prerequisite: 1. GER:DB-SocSci  
3 units, Spr (Tsai, J)

**PSYCH 90. Introduction to Clinical Psychology**

History of clinical psychology, models and assessment of personality, behavior, cognition, psychopathology, and approaches to the treatment of abnormal behavior. Emphasis is on current theory, research, issues in, and the role of clinical psychology in contemporary society. Recommended: 1. GER:DB-SocSci  
3 units, Aut (Haas, A)

**PSYCH 95. Introduction to Abnormal Psychology**

Theories of and approaches to understanding the phenomenology, etiology, and treatment of psychological disorders among adults and children. Research findings and diagnostic issues. Recommended: PSYCH 1. GER:DB-SocSci, DB-SocSci  
3 units, not given this year

**PSYCH 101. Community Health Psychology**

(Same as HUMBIO 128) Social ecological perspective on health emphasizing how individual health behavior is shaped by social forces. Topics include: biobehavioral factors in health; health behavior change; community health promotion; and psychological aspects of illness, patient care, and chronic disease management. Prerequisites: HUMBIO 3B or PSYCH 1, or equivalent.  
4 units, Win (Heaney, C)

**PSYCH 102. Longevity**

(Same as HUMBIO 149L, NENS 202) Interdisciplinary. Challenges to and solutions for the young from increased human life expectancy: health care, financial markets, families, work, and politics. Guest lectures from engineers, economists, geneticists, and physiologists. GER:DB-SocSci  
4 units, Win (Carstensen, L; Rando, T)

**PSYCH 104. Uniquely Human**

Are humans the only species that displays altruism, experiences

uncertainty, and is capable of language and deception? Sources include empirical and theoretical papers in comparative psychology. Prerequisite: 1.

3 units, Win (Hard, B)

**PSYCH 110. Research Methods and Experimental Design**

Structured research exercises and design of an individual research project. Prerequisite: consent of instructor. GER:DB-SocSci

5 units, Win (Lepper, M)

**PSYCH 119. Psychology and Public Policy**

(Same as PUBLPOL 172) Applications of psychology to public and social policy. Factors that affect the influence of psychological research and individual psychology on the creation of policy, and the influence of policy on attitudes and behavior at the personal and societal levels. Topics include education, health care, and criminal justice.

5 units, Win (Tormala, T)

**PSYCH 120. Cellular Neuroscience: Cell Signaling and Behavior**

(Same as BIO 153) Neural interactions underlying behavior. Prerequisites: PSYCH 1 or basic biology. GER: DB-NatSci

4 units, Aut (Wine, J)

**PSYCH 121. Ion Transport and Intracellular Messengers**

(Same as PSYCH 228) (Graduate students register for 228.) Ion channels, carriers, ion pumps, and their regulation by intracellular messengers in a variety of cell types. Recommended: 120, introductory course in biology or human biology.

1-3 units, Spr (Wine, J)

**PSYCH 125. Beyond Stereotype Threat: Claiming a Rightful Place in an Academic Community**

(Same as CTL 130) Stereotype threat as mitigating the quality of a student's test performance; its impact on academic success at Stanford. How to reduce the impact of stereotype threat on Stanford students.

3 units, Win (Glickman, A)

**PSYCH 131. Language and Thought**

(Same as PSYCH 262) The psychology of language including: production and understanding in utterances; from speech sounds to speaker's meaning; children's acquisition of the first language; and the psychological basis for language systems. Language functions in natural contexts and their relation to the processes by which language is produced, understood, and acquired. Prerequisite: 1 or LINGUIST 1. GER:DB-SocSci

4 units, Aut (Clark, H)

**PSYCH 132. Introduction to Cognitive and Information Sciences**

(Same as LINGUIST 144, PHIL 190, SYMSYS 100) The history, foundations, and accomplishments of the cognitive sciences, including presentations by leading Stanford researchers in artificial intelligence, linguistics, philosophy, and psychology. Overview of the issues addressed in the Symbolic Systems major. GER:DB-SocSci

4 units, Spr (Wasow, T; McClelland, J)

**PSYCH 133. Human Cognitive Abilities**

(Same as EDUC 369) Psychological theory and research on human cognitive abilities; their nature, development, and measurement; and their importance in society. Persistent controversies and new areas of research, recent perspectives on the nature-nurture debate and the roles of genetics, health and education in shaping HCAs. Prerequisite: PSYCH 1 or equivalent. (PSE) GER:DB-SocSci, DB-SocSci

3 units, Win (Shavelson, R)

**PSYCH 134. Seminar on Language and Deception**

Deceptive, exploitative, and other noncooperative uses of language. How is language used to deceive or exploit? Where are these techniques practiced and why? What are the personal, ethical, and social consequences of these practices? Prerequisite: 131, LINGUIST 1, or PHIL 181. GER:DB-SocSci

3 units, Spr (Clark, H)

**PSYCH 137. Birds to Words: Cognition, Communication, and Language**

(Same as HUMBIO 145, PSYCH 239A) Although the communicative abilities of animals are determined by their genetic endowment, and human communicative skills dwarf those of other spe-

cies, the relation between language and genetics remains the subject of debate. Is human language genetically specified? Or are human communicative powers just one facet of human cognitive advantage? Focus is on the nature and origins of language, using evidence from studies of animals, children, and adults. GER:DB-SocSci

4 units, not given this year

**PSYCH 138. Wise Interventions**

(Same as PSYCH 238) Classic and contemporary psychological interventions; the role of psychological factors in social reforms for social problems involving healthcare, the workplace, education, intergroup, relations, and the law. Topics include theories of intervention, the role of laboratory research, evaluation, and social policy.

4 units, Win (Walton, G)

**PSYCH 141. Cognitive Development**

How children's thinking and mental abilities change from infancy on. The major theories and explanations of intellectual growth. Sources include classic findings and state-of-the-art research on cognitive development. Prerequisite: 1. GER:DB-SocSci

3 units, Aut (Markman, E)

**PSYCH 143. Developmental Anomalies**

For advanced students. Developmental disorders and impairments. What the sparing of mental abilities in otherwise devastating disorders (or vice versa) tells about the mind and its development in the normal case. Examples of disorders and impairments: autism, congenital blindness, deafness, mental retardation, attachment disorder, and Williams syndrome. Limited enrollment. Prerequisite: consent of instructor. GER:DB-SocSci

3 units, not given this year

**PSYCH 145. Seminar on Infant Development**

For students preparing honors research. Conceptual and methodological issues related to research on developmental psycholinguistics; training in experimental design; and collection, analysis, and interpretation of data.

1-2 units, Spr (Fernald, A)

**PSYCH 146. Observation of Children**

Learning about children through guided observations at Bing Nursery School, Psychology's lab for research and training in child development. Physical, emotional, social, cognitive, and language development. Recommended: 60. GER:DB-SocSci

3-5 units, Win (Lomangino, A; Hartman, B), Spr (Hartman, B; Lomangino, A)

**PSYCH 147. Development in Early Childhood**

Supervised experience with young children at Bing Nursery School. 3 units require 4 hours per week in Bing classrooms throughout the quarter; 4 units require 7 hours per week; 5 units require 10.5 hours per week. Seminar on developmental issues in the Bing teaching/learning environment. Recommended: 60 or 146, or consent of instructor.

3-5 units, Aut (Winters, J; Chandra, P), Win (Winters, J; Chandra, P), Spr (Winters, J; Chandra, P)

**PSYCH 149. The Infant Mind: Cognitive Development over the First Year**

How do babies learn so much in so little time? Emphasis is on cognitive and perceptual development, and the relationship between brain and behavior in infancy. Prerequisite: 1. Recommended: 60 or 141. GER:DB-SocSci

3 units, not given this year

**PSYCH 152. Mediation for Dispute Resolution**

(Same as EDUC 131) Mediation as more effective and less expensive than other forms of settling disputes such as violence, lawsuits, or arbitration. How mediation can be structured to maximize the chances for success. Simulated mediation sessions.

3 units, Aut (Krumboltz, J)

**PSYCH 154. Judgment and Decision-Making**

Survey of research on how we make assessments and decisions particularly in situations involving uncertainty. Emphasis will be on instances where behavior deviates from optimality. Overview of recent works examining the neural basis of judgment and decision-making.

3 units, Win (McClure, S)

**PSYCH 155. Introduction to Comparative Studies in Race and Ethnicity**

(Same as CSRE 196C, ENGLISH 172D, SOC 146) How different disciplines approach topics and issues central to the study of ethnic and race relations in the U.S. and elsewhere. Lectures by senior faculty affiliated with CSRE. Discussions led by CSRE teaching fellows. GER:DB-SocSci, EC-AmerCul

5 units, Spr (Moya, P; Markus, H)

**PSYCH 157. Social Foundations of Expertise and Intelligence**

Psychological conceptions of expertise, ability, and intelligence and the research methods used to study these attributes. Topics include: research on how expertise in a diverse set of disciplines is developed; the role of practice in nurturing expertise; whether intelligence predicts life outcomes; the genetic and environmental determinants of intelligence; whether genes or environment explain racial differences such as the Black-White performance gap and the East Asian achievement advantage; and the Flynn effect.

3 units, Spr (Brown, J)

**PSYCH 158. Emotions: History, Theories, and Research**

(Same as PSYCH 259) Graduate students register for 259. Theoretical and empirical issues in the domain of emotions. The history of emotion theories, current approaches, and the interaction between emotion and cognition.

1-3 units, not given this year

**PSYCH 159. Psychology of Attitude Change and Social Influence**

Review of classic and current research on attitudes, attitude change and persuasion. Increase appreciation for the ways that our thoughts, actions, and feelings are shaped and manipulated by social influences.

3 units, Spr (Brown, J)

**PSYCH 161. Emotion**

(Same as PSYCH 261) (Graduate students register for 261.) The scientific study of emotion. Topics: models of emotion, emotion antecedents, emotional responses (facial, subjective, and physiological), functions of emotion, emotion regulation, individual differences, and health implications. Focus is on experimentally tractable ideas. GER:DB-SocSci

3 units, Win (Gross, J)

**PSYCH 163. Interpersonal Basis of Abnormal Behavior**

The role of interpersonal problems and processes in producing forms of psychopathology including mild and severe disorders. Conventional empirical methods clarify the origin, nature, and treatment of emotional and personality disorders. Prerequisite: PSYCH 1. GER:DB-SocSci

3 units, Aut (Horowitz, L)

**PSYCH 165. Peace Studies**

(Same as POLISCI 111) Interdisciplinary. The challenges of pursuing peace in a world with many conflicts and rising regional, ethnic, and religious antagonisms. Historical, social, psychological, and moral perspectives. Contributions of academic disciplines to the study of peace. Students explore a conflict and offer contributions to the building of peace. Limited enrollment. GER:DB-SocSci

5 units, not given this year

**PSYCH 166. Seminar on Personal and Social Change**

Social cognitive approaches to personal and social change. Applications of sociocognitive theory to the modification of psychological dysfunctions in familial, educational, medical, and organizational settings. Ethical and value issues in behavior change.

3 units, Win (Bandura, A)

**PSYCH 167. Seminar on Aggression**

The causes and modification of individual and collective aggression. Major issues in aggression: social labeling of injurious conduct, social determinants of aggression, effects of the mass media, institutionally sanctioned violence, terrorism, psychological mechanisms of moral disengagement, modification of aggressive styles of behavior, and legal sanctions and deterrence doctrines.

3 units, not given this year

**PSYCH 168. Emotion Regulation**

(Same as PSYCH 268) (Graduate students register for 268.) The scientific study of emotion regulation. Topics: historical antecedents, conceptual foundations, autonomic and neural bases, indi-

vidual differences, developmental and cultural aspects, implications for psychological and physical health. Focus is on experimentally tractable ideas. GER:DB-SocSci

3 units, Spr (Gross, J)

**PSYCH 171. Research Seminar on Aging**

Two quarter practicum exposes students to multiple phases of research by participating in a laboratory focusing on social behavior in adulthood and old age. Review of current research; participation in ongoing data collection, analysis, and interpretation. Prerequisites: 1, research experience, and consent of instructor.

4 units, Aut (Carstensen, L), Win (Carstensen, L), Spr (Carstensen, L)

**PSYCH 179. The Psychology of Everyday Morality**

(Same as PSYCH 270) (Graduate students register for 270.) For graduate students, coterms, and senior Psychology majors. Traditional approaches focusing on how morality colors mundane human activities such as eating and on morality as defined by actors themselves rather than social scientists. Moral hypocrisy, food and disgust, taboo trade-offs, moral reproach, and prejudice with compunction. Limited enrollment. Prerequisite: 70 and consent of instructor.

4 units, not given this year

**PSYCH 180. Social Psychological Perspectives on Stereotyping and Prejudice**

Classic and contemporary social psychological approaches to prejudice and stereotyping. Emphasis is on how stereotypes are employed and maintained, and the influence of stereotyping and prejudice on behavior in domains including education, employment, politics, and law. Limited enrollment. GER:DB-SocSci

3 units, Win (Eberhardt, J)

**PSYCH 183. Mind, Culture, and Society Research Course**

Required of students in the mind, culture, and society specialization track. Research training on a variety of projects that explore how social identities such as race, class, gender, and culture affect psychological experiences across domains including education, law, business and health. Must participate for two consecutive quarters. Permission of instructor required.

2-3 units, Aut (Eberhardt, J; Markus, H), Win (Eberhardt, J; Markus, H), Spr (Eberhardt, J; Markus, H)

**PSYCH 186. The Psychology of Everyday Morality**

(Same as PSYCH 286) Recent literature on morality from a social psychological perspective. Topics include moral judgment, moral intuitions, moral hypocrisy, moral identity, moralization, moral reproach, shame and guilt, temptations, and self-regulation. Contemporary psychological research emphasizing descriptive approaches (what people actually do) rather than normative ones (what one should do).

3 units, not given this year

**PSYCH 189. Stanford Center on Longevity Practicum**

Student involvement in an interdisciplinary center aimed at changing the culture of human aging using science and technology.

3 units, Aut (Carstensen, L), Win (Carstensen, L), Spr (Carstensen, L), Sum (Carstensen, L)

**PSYCH 190. Special Research Projects**

May be repeated for credit. Prerequisite: consent of instructor.

1-6 units, Aut (Staff), Win (Staff), Spr (Staff)

**PSYCH 193. Special Laboratory Research**

May be repeated for credit. Prerequisites: 1, 10, and consent of instructor.

1-6 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**PSYCH 194. Reading and Special Work**

Independent study. May be repeated for credit. Prerequisite: consent of instructor.

1-3 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**PSYCH 195. Special Laboratory Projects**

Independent study. May be repeated for credit. Prerequisites: 1, 10, and consent of instructor.

1-6 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**PSYCH 196. Contemporary Psychology: Overview of Theory, Research, Applications**

Capstone experience for juniors and seniors that bridges course work with research opportunities. Lectures representing the department's areas: social, personality, developmental, neuroscience,

and cognitive psychology. Faculty present current research. Discussions led by advanced graduate students in the field represented by that week's guest. Students write research proposals. Small grants available to students to conduct a pilot study of their proposed research. Limited enrollment. Prerequisite: consent of instructor. GER:DB-SocSci

3 units, Aut (Clark, H)

#### **PSYCH 197. Advanced Research**

Limited to students in senior honors program. Weekly research seminar, independent research project under the supervision of an appropriate faculty member. A detailed proposal is submitted at the end of Autumn Quarter. Research continues during Winter and Spring quarters as 198. A report demonstrating sufficient progress is required at the end of Winter Quarter.

1-4 units, Aut (Wine, J)

#### **PSYCH 198. Senior Honors Research**

Limited to students in the senior honors program. Finishing the research and data analysis, written thesis, and presentation at the Senior Honors Convention. May be repeated for credit.

1-4 units, Win (Wine, J), Spr (Wine, J)

#### **PSYCH 199. Temptations and Self Control**

(Same as PSYCH 299) (Graduate students register for 299.) Why do people do things that that they come to regret? How can people minimize behavior such as exercise avoidance, angry words, overeating, unsafe sex, and dangerous driving? Sources include classical and current research from experimental psychology, neuroscience, behavioral economics, and neuroeconomics. Real-world applications.

2 units, not given this year

## **GRADUATE COURSES IN PSYCHOLOGY**

#### **PSYCH 192. Career and Personal Counseling**

(Same as EDUC 134, EDUC 234) Methods of integrating career and personal counseling with clients and counselors from differing backgrounds. Practice with assessment instruments. Case studies of bicultural role conflict. Informal experience in counseling. (PSE)

3 units, Spr (Krumboltz, J)

#### **PSYCH 201. Social Psychology Lecture Series**

Required of social psychology graduate students. Guest lecturers from Stanford and other institutions. May be repeated for credit. (Miller)

3 units, not given this year

#### **PSYCH 202. Cognitive Neuroscience**

Graduate core course. The anatomy and physiology of the brain. Methods: electrical stimulation of the brain, neuroimaging, neuropsychology, psychophysics, single-cell neurophysiology, theory and computation. Neuronal pathways and mechanisms of attention, consciousness, emotion, language, memory, motor control, and vision. Prerequisite: 207 or consent of instructor.

3 units, Spr (McClure, S)

#### **PSYCH 204A. Human Neuroimaging Methods**

This course introduces the student to human neuroimaging using magnetic resonance scanners. The course is a mixture of lectures and hands-on software tutorials. The course begins by introducing basic MR principles. Then various MR measurement modalities are described, including several types of structural and functional imaging methods. Finally algorithms for analyzing and visualizing the various types of neuroimaging data are explained, including anatomical images, functional data, diffusion imaging (e.g., DTI) and magnetization transfer. Emphasis is on explaining software methods used for interpreting these types of data.

1-3 units, Aut (Wandell, B)

#### **PSYCH 204B. Computational Neuroimaging: Analysis Methods**

Neuroimaging methods with focus on data analysis techniques. Basic MR physics and BOLD signals. Methods for neuroimaging data using real and simulated data sets. Topics include: linearity of the fmri signal; time versus space resolution tradeoffs; noise in neuroimaging; correlation analysis; visualization methods; cortical reconstruction, inflation, and flattening; reverse engineering; can cognitive states be predicted from brain activation? Prerequisite: consent of instructor.

1-3 units, Win (Grill-Spector, K)

#### **PSYCH 205. Foundations of Cognition**

Topics: attention, memory, language, similarity and analogy, categories and concepts, learning, reasoning, and decision making. Emphasis is on processes that underlie the capacity to think and how these are implemented in the brain and modeled computationally. The nature of mental representations, language and thought, modular versus general purpose design, learning versus nativism. Prerequisite: 207 or consent of instructor.

1-3 units, Win (Ramsar, M)

#### **PSYCH 206. Cortical Plasticity: Perception and Memory**

Seminar. Topics related to cortical plasticity in perceptual and memory systems including neural bases of implicit memory, recognition memory, visual priming, and perceptual learning. Emphasis is on recent research with an interdisciplinary scope, including theory, behavioral findings, neural mechanisms, and computational models. May be repeated for credit. Recommended: 30, 45.

1-3 units, not given this year

#### **PSYCH 207. Professional Seminar for First-Year Ph.D. Graduate Students**

Required of and limited to first-year Ph.D. students in Psychology. Major issues in contemporary psychology with historical backgrounds.

2-3 units, Aut (McClelland, J)

#### **PSYCH 208. Advanced Topics in Self-Defense**

Seminar. Threat to the self and how people deal with them. Readings from social psychological areas including social comparison, self-affirmation, self-completion, self-discrepancy, shame and guilt, terror management, dimensions of self-worth, self-regulation, self-presentation, psychophysiology, and moral identity. Enrollment limited to 15.

1-3 units, not given this year

#### **PSYCH 209. The Neural Basis of Cognition: A Parallel Distributed Processing Approach**

The neural basis of perception and attention; memory, learning, and semantic knowledge; language and reading; and action selection, planning, and problem solving. Findings from human behavioral experiments, neurophysiology, functional brain imaging, and the effects of brain disorders on performance; computational models that address these findings from the parallel distributed processing point of view which holds that brain representations are patterns of activity over widely dispersed populations of neurons, that mental processing involves coherent distributed engagement of neurons in these populations, and that learning occurs primarily through the adjustment of the strengths of the connections between the neurons. Corequisite: 209B.

3 units, not given this year

#### **PSYCH 209A. The Neural Basis of Cognition: A Parallel Distributed Processing Approach**

Models and data to support the notion that brain representations are patterns of activity over widely dispersed populations of neurons, that mental processing involves coherent distributed engagement of neurons in these populations, and that learning and development occur primarily through the adjustment of the strengths of the connections between the neurons. How models may be used to explain aspects of human cognition, development, and effects of brain damage on cognition. Prerequisites: linear algebra, differential equations, a programming course, and two courses in psychology or neuroscience.

3-4 units, Win (McClelland, J)

#### **PSYCH 209B. Applications of Parallel Distributed Processing Models to Cognition and Cognitive Neuroscience**

Research seminar. Builds on project proposal developed in 209A. Hands-on use of computational models to address phenomena in cognitive psychology and cognitive neuroscience. Classic and modern papers, and student presentations of their own projects. Final paper in the form of a journal article submission. Prerequisite: 209A.

4 units, Spr (McClelland, J)

#### **PSYCH 210. Foundations of Memory**

Memory and human cognition. Behavioral and neural data indicate that memory is not a unitary faculty but consists of multiple systems that support learning and remembering, each with its own processing characteristics and neurobiological substrates. What is known about memory emphasizing the cognitive and neural archi-

tures of working, declarative, and nondeclarative memory. Recommended: 45.

3 units, Aut (Wagner, A)

**PSYCH 211. Developmental Psychology**

Prerequisite: 207 or consent of instructor.

1-3 units, Win (Markman, E; Dweck, C)

**PSYCH 212. Social Psychology**

Classic studies in experimental social psychology. Group and group dynamics; compliance and social pressure; conformity, cooperation, conflict, and social dilemmas; attraction and preference; attitudes and attitude change; social comparison, emotion, and affiliation; dissonance, consistency, and self-justification; attribution and self-perception; judgment and decision making, motivation, automaticity, and culture. Prerequisite: 207 or consent of instructor.

1-3 units, Aut (Lepper, M; Ross, L)

**PSYCH 213. Personality and Psychopathology**

Historical trends, theoretical issues, and empirical approaches to the study of individual differences in personality and psychopathology. Topics include: trait approach for describing individual differences; its role in exploring such topics as the importance of the person by situation interaction; and psychometric themes and issues. Individual differences in motivation manifested in attachment styles in childhood and adulthood; stress, coping, health; self and self-regulation; and severe forms of psychopathology. Prerequisite: 207 or consent of instructor.

1-3 units, Win (Horowitz, L)

**PSYCH 215. Mind, Culture, and Society**

Social psychology from the context of society and culture. The interdependence of psychological and sociocultural processes: how sociocultural factors shape psychological processes, and how psychological systems shape sociocultural systems. Theoretical developments to understand social issues, problems, and polity. Works of Baldwin, Mead, Asch, Lewin, Burner, and contemporary theory and empirical work on the interdependence of psychology and social context as constituted by gender, ethnicity, race, religion, and region of the country and the world. Prerequisite: 207 or consent of instructor.

3 units, Win (Staff)

**PSYCH 216. Public Policy and Social Psychology: Implications and Applications**

(Same as IPS 207B, PUBLPOL 305B) Theories, insights, and concerns of social psychology relevant to how people perceive issues, events, and each other, and links between beliefs and individual and collective behavior. Topics include: situationist and subjectivist traditions of applied and theoretical social psychology; social comparison, dissonance, and attribution theories; social identity, stereotyping, racism, and sources of intergroup conflict and misunderstanding; challenges to universality assumptions regarding human motivation, emotion, and perception of self and others; the problem of producing individual and collective changes in norms and behavior.

4 units, Spr (Ross, L)

**PSYCH 217. Topics and Methods Related to Culture and Emotion**

Preference to graduate students. How cultural factors shape emotion and other feeling states. Empirical and ethnographic literature, theories, and research on culture and emotion. Applications to clinical, educational, and occupational settings. Research in psychology, anthropology, and sociology. May be repeated for credit.

1-3 units, not given this year

**PSYCH 218. Early Social Cognitive Development**

Current literature on social and cognitive development in infancy emphasizing the interface between the two domains. May be repeated for credit. Prerequisite: consent of instructor.

1-3 units, not given this year

**PSYCH 220. Special Topics in Cognitive Development**

For graduate students and advanced undergraduates. How research from cognitive development, decision making, and preference change can inform interventions on important social issues. May be repeated for credit.

1-3 units, not given this year

**PSYCH 221. Applied Vision and Image Systems**

The design and control of color imaging devices (display, printers, cameras, and scanners). Aspects of human vision relevant to software and hardware design. Topics: digital halftoning, color calibration, color metrics, flicker sensitivity, motion compensation, human spatial resolution, visual masking, JPEG principles, printer design, scanner design, and color software architecture. Lab.

1-3 units, Spr (Wandell, B)

**PSYCH 224. Research Topics in Emotion Regulation**

Current research findings and methods, ongoing student research, and presentations by visiting students and faculty. May be repeated for credit. Prerequisite: consent of instructor.

1 unit, not given this year

**PSYCH 226. Models and Mechanisms of Memory**

Current topics in memory as explored through computational models addressing experimental findings and physiological and behavioral investigations. Topics include: explicit and implicit learning; role of MTL structures in learning and memory; and single versus dual processes approaches to recognition. May be repeated for credit.

1-3 units, not given this year

**PSYCH 227. Seminar in Psycholinguistics: Information-Theoretic Models of Language and Cognition**

(Same as LINGUIST 247) Information theory and its relation to learning and to reference, meaning, and information encoding. Information-theoretic models of linguistic structure at the phonological, morphological, and syntactic levels, and the links between information theory and information structure/clause packaging. The role of uncertainty and uniform information density in sentence processing. May be repeated for credit.

3-4 units, Aut (Ramscar, M; Jurafsky, D)

**PSYCH 228. Ion Transport and Intracellular Messengers**

(Same as PSYCH 121) (Graduate students register for 228.) Ion channels, carriers, ion pumps, and their regulation by intracellular messengers in a variety of cell types. Recommended: 120, introductory course in biology or human biology.

1-3 units, Spr (Wine, J)

**PSYCH 232. Brain and Decision Making**

Neuroeconomics combines experimental techniques from neuroscience, psychology, and experimental economics, such as electrophysiology, fMRI, eye tracking, and behavioral studies, and models from computational neuroscience and economics. May be repeated for credit. Prerequisite: consent of instructor.

3 units, Spr (Knutson, B)

**PSYCH 233. MATLAB and Psychtoolbox for the Behavioral Sciences**

Topics such as experiment design, stimulus presentation, counterbalancing, response collection, data analysis, and plotting. Programming experiments. Final project programming a complete behavioral experiment relevant to student's research. Prerequisite: introductory programming such as CS 105 or 106, or consent of instructor.

1-3 units, not given this year

**PSYCH 234. Topics in Affective Disorders**

Current research topics including epidemiology and phenomenology of affective disorders, psychological theories of depression, gender differences in affective disorders, cognitive and social functioning of depressed persons, psychobiology of affective disorders, depression in children, postpartum depression, suicide issues in the treatment of depression, and cultural aspects of affective disorders. Prerequisite: graduate standing in Psychology or consent of instructor.

1-3 units, given next year

**PSYCH 236. The Social Self**

The psychological bases of complex social organization such as work teams and national and cultural identities. Topics include: the effect of social influence on perception, beliefs, attitudes, emotions, and behaviors; shared intentionality; and the relational bases of learning, motivation, and performance. Works of classic scholars (Asch, Lewin) and contemporary researchers in social, developmental, and comparative psychology. Prerequisite: graduate standing or consent of instructor.

3 units, not given this year

**PSYCH 238. Wise Interventions**

(Same as PSYCH 138) Classic and contemporary psychological interventions; the role of psychological factors in social reforms for social problems involving healthcare, the workplace, education, intergroup, relations, and the law. Topics include theories of intervention, the role of laboratory research, evaluation, and social policy.

4 units, Win (Walton, G)

**PSYCH 239A. Birds to Words: Cognition, Communication, and Language**

(Same as HUMBIO 145, PSYCH 137) Although the communicative abilities of animals are determined by their genetic endowment, and human communicative skills dwarf those of other species, the relation between language and genetics remains the subject of debate. Is human language genetically specified? Or are human communicative powers just one facet of human cognitive advantage? Focus is on the nature and origins of language, using evidence from studies of animals, children, and adults.

4 units, not given this year

**PSYCH 243. General Development Seminar**

May be repeated for credit. Prerequisite: consent of instructors.

1-2 units, Win (Markman, E; Fernald, A)

**PSYCH 244. Psychology of Aging**

Theory and research in gerontology. Normal and abnormal changes that occur in biological, cognitive, and psychological aging. Emphasis is on the environmental factors that influence the aging process. Prerequisite: graduate standing in Psychology or consent of instructor.

1-3 units, not given this year

**PSYCH 246. Cognitive and Neuroscience Friday Seminar**

Participant presentations. May be repeated for credit. Prerequisite: graduate standing in psychology or neuroscience program.

1 unit, Aut (Wagner, A), Win (Wagner, A), Spr (Wagner, A)

**PSYCH 247. Fundamentals of Neuroscience for Non-Life-Scientists**

Human behavior and the human brain and how it enables perception, learning, decision making, planning, and action with a focus on how neuroscience may be presented or used in law, business, or education contexts. Neurotechnology and experimental methods used to conduct research.

2 units, not given this year

**PSYCH 249. Human Motivation**

Current research and theory including questions concerning the nature of human motives, intrinsic motivation, self-regulation, the roles of affect and cognition, and lifespan and cultural influences on motivation. Prerequisite: 207 or consent of instructors.

1-3 units, Spr (Dweck, C; Lepper, M)

**PSYCH 250. High-level Vision: Object Perception**

This advanced level seminar is an interdisciplinary course focusing on understanding how computations in the brain enable rapid and efficient object perception. The course will cover topics from multiple perspectives drawing on recent research in psychology, neuroscience and computer science. Emphasis will be placed on covering, examining ongoing debates in the field, and discussion of recent empirical findings. Topics include: Theories of object and face recognition. How is invariant object recognition accomplished? What are the neural computations that underlie object and face perception? Are faces special? What is the role of experience in shaping object and face representations? Recommended: 30.

1-3 units, Spr (Grill-Spector, K)

**PSYCH 251. Affective Neuroscience**

Theory and research. Comparative and human research approaches map affective function to neuroanatomical and neurochemical substrates. Prerequisite: consent of instructor.

3 units, Spr (Knutson, B)

**PSYCH 252. Statistical Methods for Behavioral and Social Sciences**

(Same as GSBGEN 652) For students who seek experience and advanced training in empirical research. Analysis of data from experimental through factorial designs, randomized blocks, repeated measures; regression methods through multiple regression, model building, analysis of covariance; categorical data analysis through two-way tables. Integrated with the use of statistical com-

puting packages. Prerequisite: 10 or equivalent.

1-6 units, Aut (Thomas, E; Monin, B)

**PSYCH 253. Statistical Theory, Models, and Methodology**

Practical and theoretical advanced data analytic techniques such as loglinear models, signal detection, meta-analysis, logistic regression, reliability theory, and factor analysis. Prerequisite: 252 or EDUC 257.

3 units, Spr (Thomas, E)

**PSYCH 257. Individually Supervised Practicum**

Satisfies INS requirements for curricular practical training. Relevant experience for graduate students as part of their program of study. May be repeated for credit. Prerequisites: graduate standing in Psychology, consent of adviser. (Staff)

3-5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**PSYCH 258. Graduate Seminar in Social Psychology Research**

For students who are already or are planning to become involved in research on social construal and the role that it plays in a variety of phenomena, notably the origin and escalation of conflict.

1-3 units, Aut (Markus, H), Win (Markus, H), Spr (Markus, H)

**PSYCH 259. Emotions: History, Theories, and Research**

(Same as PSYCH 158) Graduate students register for 259. Theoretical and empirical issues in the domain of emotions. The history of emotion theories, current approaches, and the interaction between emotion and cognition.

1-3 units, not given this year

**PSYCH 260. Reinforcement Learning in the Brain**

Recent advances in neural and behavioral models of reinforcement learning. Reinforcement learning models. Key findings in applying models to brain activity and behavior.

2-3 units, not given this year

**PSYCH 261. Emotion**

(Same as PSYCH 161) (Graduate students register for 261.) The scientific study of emotion. Topics: models of emotion, emotion antecedents, emotional responses (facial, subjective, and physiological), functions of emotion, emotion regulation, individual differences, and health implications. Focus is on experimentally tractable ideas.

3 units, Win (Gross, J)

**PSYCH 261A. Learning and Cognition in Activity**

(Same as EDUC 295) Methods and results of research on learning, understanding, reasoning, problem solving, and remembering, as aspects of participation in social organized activity. Principles of coordination that support cognitive achievements and learning in activity settings in work and school environments.

3 units, not given this year

**PSYCH 262. Language and Thought**

(Same as PSYCH 131) The psychology of language including: production and understanding in utterances; from speech sounds to speaker's meaning; children's acquisition of the first language; and the psychological basis for language systems. Language functions in natural contexts and their relation to the processes by which language is produced, understood, and acquired. Prerequisite: 1 or LINGUIST 1.

4 units, Aut (Clark, H)

**PSYCH 266. Current Debates in Learning and Memory**

Memory is not a unitary faculty, but consists of multiple forms of learning and remembering. The cognitive and neural architectures of memory, focusing on the application of functional brain imaging (primarily fMRI and ERP). Recommended: 45

1-3 units, Win (Wagner, A)

**PSYCH 267. Human Memory: Facts, Fallacies, and Fragile Powers**

Seminar. Applications of memory concepts in everyday life and in social and clinical settings. Topics include personal identity, childhood amnesia, autobiographic memory, emotions and memory, memory distortions, illusions, self-serving biases, recovery of repressed memories, false memories, implicit memories, and unconscious influences on social behavior, with applications to psychopathology.

1-3 units, not given this year

**PSYCH 268. Emotion Regulation**

(Same as PSYCH 168) (Graduate students register for 268.) The scientific study of emotion regulation. Topics: historical antecede-

dents, conceptual foundations, autonomic and neural bases, individual differences, developmental and cultural aspects, implications for psychological and physical health. Focus is on experimentally tractable ideas.

3 units, Spr (Gross, J)

**PSYCH 269. Graduate Seminar in Personality Research**

May be repeated for credit. Prerequisite: graduate standing in Psychology. (Gotlib)

1 unit, Aut (Gotlib, I), Win (Gotlib, I), Spr (Gotlib, I)

**PSYCH 270. The Psychology of Everyday Morality**

(Same as PSYCH 179) (Graduate students register for 270.) For graduate students, coterminals, and senior Psychology majors. Traditional approaches focusing on how morality colors mundane human activities such as eating and on morality as defined by actors themselves rather than social scientists. Moral hypocrisy, food and disgust, taboo trade-offs, moral reproach, and prejudice with compunction. Limited enrollment. Prerequisite: 70 and consent of instructor.

4 units, not given this year

**PSYCH 272. Special Topics in Psycholinguistics**

May be repeated for credit. Prerequisite: consent of instructor.

1-3 units, Spr (Clark, H)

**PSYCH 273. Graduate Seminar on Language, Cognition, and Perception**

Current topics and debates. Readings from psychology, linguistics, neuroscience, ethology, anthropology, and philosophy. May be repeated for credit.

3 units, Spr (Boroditsky, L; Markman, E)

**PSYCH 275. Graduate Research**

Intermediate-level research undertaken with members of departmental faculty. Prerequisite: consent of instructor. (Staff)

1-15 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**PSYCH 279. Topics in Cognitive Control**

The processes that enable flexible behavior by biasing contextually relevant perceptual, mnemonic, and response representations or processing pathways. Cognitive control is central to volitional action, allowing work with memory, task/goal states, and overriding inappropriate responses. Current models of cognitive control, functional neuroimaging, and neuropsychological evidence. Recommended: 45.

1-3 units, not given this year

**PSYCH 281. Practicum in Teaching**

Enrollment limited to teaching assistants in selected Psychology courses. May be repeated for credit.

1-5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**PSYCH 282. Practicum in Teaching PSYCH 1**

Logistical TA training including: preparing for sections; creating, correcting exams; grading an iterative writing assignment; office hours; review sessions; developing audiovisual expertise; communicating via coursework. Review of student evaluations with instructor to set goals and strategies. Second quarter focuses on pedagogical improvement. Limited to current PSYCH 1 TAs. May be repeated for credit.

1-2 units, Aut (Gross, J), Win (Staff), Spr (Walton, G)

**PSYCH 283. International Conflict Resolution Colloquium**

(Same as POLISCI 403) (Same as LAW 611.) Sponsored by the Stanford Center on International Conflict and Negotiation (SCICN). Conflict, negotiation, and dispute resolution with emphasis on conflicts and disputes with an international dimension, including conflicts involving states, peoples, and political factions such as the Middle East and Northern Ireland. Guest speakers. Issues including international law, psychology, and political science, economics, anthropology, and criminology.

2 units, Win (Weiner, A; Holloway, D; Ross, L)

**PSYCH 286. The Psychology of Everyday Morality**

(Same as PSYCH 186) Recent literature on morality from a social psychological perspective. Topics include moral judgment, moral intuitions, moral hypocrisy, moral identity, moralization, moral reproach, shame and guilt, temptations, and self-regulation. Contemporary psychological research emphasizing descriptive approaches (what people actually do) rather than normative ones (what one should do).

3 units, not given this year

**PSYCH 288. Hierarchical Linear Modeling for Psychological Sciences**

HLM is a statistical theory and a computer program used to analyze multi-level data, such as trials within participants or students within classrooms. HLM allows researchers to analyze data at each level of analysis separately, to partition the total variance across different levels, to explain variance at each level separately using level-appropriate predictors, and to model cross-level interactions. How to use the HLM program and to model various types of multi-level data using it. May be repeated for credit.

1-3 units, not given this year

**PSYCH 290. Graduate Research Methods**

Primary tool use for psychologists: basics of experiment design; computer-based experiments; web-based experiments; data analysis packages and data presentation; exploratory statistics; eye-tracking methods; psychophysiology methods; survey construction; corpus and discourse analysis; and perhaps hypnosis. Prerequisite: Ph.D. student in Psychology.

2 units, not given this year

**PSYCH 291. Psychology Teaching Methods**

Open to graduate students and advanced undergraduates. Principles of good teaching. Students practice teaching skills.

1-2 units, not given this year

**PSYCH 297. Seminar for Coterminal Master of Arts**

Contemporary issues and student research. Student and faculty presentations.

1-2 units, Aut (Clark, H), Win (Clark, H), Spr (Clark, H)

**PSYCH 299. Temptations and Self Control**

(Same as PSYCH 199) (Graduate students register for 299.) Why do people do things that they come to regret? How can people minimize behavior such as exercise avoidance, angry words, overeating, unsafe sex, and dangerous driving? Sources include classical and current research from experimental psychology, neuroscience, behavioral economics, and neuroeconomics. Real-world applications.

2 units, not given this year

**PSYCH 373. Research Seminar: Mind, Brain, and Computation**

Faculty and student research presentations focusing on work linking cellular, systems, cognitive, behavioral, and computational neuroscience. May be repeated for credit.

1 unit, Aut (McClelland, J), Win (McClelland, J), Spr (McClelland, J; Shenoy, K)

**PSYCH 383. International Conflict: Management and Resolution**

(Same as IPS 250, POLISCI 210R, POLISCI 310R) (Same as LAW 656) Interdisciplinary. Theoretical insights and practical experience in resolving inter-group and international conflicts. Sources include social psychology, political science, game theory, and international law. Personal, strategic, and structural barriers to solutions. How to develop a vision of a mutually bearable shared future, trust in the enemy, and acceptance of loss that a negotiated settlement may produce. Spoilers who seek to sabotage agreements. Advantages and disadvantages of unilateral versus reciprocal measures. Themes from the Stanford Center of International Conflict and Negotiation (SCICN). Prerequisite for undergraduates: consent of instructor.

3-5 units, Win (Holloway, D)

**PSYCH 459. Frontiers in Interdisciplinary Biosciences**

(Same as BIO 459, BIOC 459, BIOE 459, CHEMENG 459, CHEM 459) Students register through their affiliated department; otherwise register for CHEMENG 459. For specialists and non-specialists. Sponsored by the Stanford BioX Program. Three seminars per quarter address scientific and technical themes related to interdisciplinary approaches in bioengineering, medicine, and the chemical, physical, and biological sciences. Leading investigators from Stanford and the world present breakthroughs and endeavors that cut across core disciplines. Pre-seminars introduce basic concepts and background for non-experts. Registered students attend all pre-seminars; others welcome. See <http://biox.stanford.edu/courses/459.html>. Recommended: basic mathematics, biology, chemistry, and physics.

1 unit, Aut (Robertson, C), Win (Robertson, C), Spr (Robertson)

# PUBLIC POLICY (PUBLPOL)

## UNDERGRADUATE COURSES IN PUBLIC POLICY

### **PUBLPOL 101. Politics and Public Policy**

(Same as POLISCI 123, PUBLPOL 201) How policies come to be formed. How interests compete within public institutions to turn ideas into policies. Examples of this process from contemporary policy areas, including tax, social welfare, and environmental policy; results evaluated using equity and efficiency criteria. Prerequisite: POLISCI 2 (or equivalent for Public Policy majors). GER:DB-SocSci

5 units, Spr (Frisby, T)

### **PUBLPOL 102. Organizations and Public Policy**

(Same as PUBLPOL 202) Analysis of organizational processes emphasizing organizations that operate in a non-market environment. Prerequisite: ECON 1A. GER:DB-SocSci

5 units, Spr (Bendor, J)

### **PUBLPOL 103A. Introduction to Political Philosophy**

(Same as ETHICSOC 30, PHIL 30, POLISCI 3) State authority, justice, liberty, and equality through major works in political philosophy. Topics include human nature and citizenship, the obligation to obey the law, democracy and economic inequality, equality of opportunity and affirmative action, religion, and politics. GER:DB-Hum, DB-Hum, EC-EthicReas

5 units, Spr (Hussain, N)

### **PUBLPOL 103B. Ethics and Public Policy**

(Same as MS&E 197, STS 110) Ethical issues in science- and technology-related public policy conflicts. Focus is on complex, value-laden policy disputes. Topics: the nature of ethics and morality; rationales for liberty, justice, and human rights; and the use and abuse of these concepts in policy disputes. Case studies from biomedicine, environmental affairs, technical professions, communications, and international relations. GER:DB-Hum, EC-EthicReas

5 units, Win (McGinn, R)

### **PUBLPOL 103C. Justice**

(Same as ETHICSOC 171, IPS 208, PHIL 171, PHIL 271, POLISCI 136S) Focus is on the ideal of a just society, and the place of liberty and equality in it, in light of contemporary theories of justice and political controversies. Topics include protecting religious liberty, financing schools and elections, regulating markets, assuring access to health care, and providing affirmative action and group rights. Issues of global justice including human rights and global inequality. GER:DB-Hum, EC-EthicReas

4-5 units, Aut (Cohen, J)

### **PUBLPOL 103D. Ethics and Politics of Public Service**

(Same as ETHICSOC 133, PHIL 175A, PHIL 275A, POLISCI 133) Ethical and political questions in public service work, including volunteering, service learning, humanitarian assistance, and public service professions such as medicine and teaching. Motives and outcomes in service work. Connections between service work and justice. Is mandatory service an oxymoron? History of public service in the U.S. Issues in crosscultural service work. Integration with the Haas Center for Public Service to connect service activities and public service aspirations with academic experiences at Stanford. GER:DB-SocSci

5 units, Win (Reich, R)

### **PUBLPOL 104. Economic Policy Analysis**

(Same as ECON 150, PUBLPOL 204) The relationship between microeconomic analysis and public policy making. How economic policy analysis is done and why political leaders regard it as useful but not definitive in making policy decisions. Economic rationales for policy interventions, methods of policy evaluation and the role of benefit-cost analysis, economic models of politics and their application to policy making, and the relationship of income distribution to policy choice. Theoretical foundations of policy making and analysis, and applications to program adoption and implementation. Prerequisite: ECON 50.

5 units, Win (Jones, A)

### **PUBLPOL 105. Quantitative Methods and Their Applications to Public Policy**

Reviews material covered in prerequisites with applications of qualitative independent variable techniques to labor market data. Maximum likelihood estimation and qualitative dependent variable models with an application to voting models. Final papers estimate influence of quantitative and qualitative independent variables on Congressional voting probabilities. Prerequisites: ECON 102A,B. GER:DB-SocSci

5 units, Spr (Rothwell, G)

### **PUBLPOL 106. Economics of Legal Rules and Institutions**

(Same as ECON 154, PUBLPOL 206) Design and consequences of laws, given alternative policy objectives. Welfareist approach to legal policy; deontological perspectives including Kant, Locke, Mill, and Rawls. Economic efficiency and agent rationality, law as mitigation of market and cognitive failures, effects of law on expectations and incentives, balancing costs of type I and type II legal errors. Empirical studies of law's effects. Applications: property, tort, contract, antitrust, discrimination, crime, legal procedure. Examples chiefly from U.S. law, but analytical tools of general applicability. Prerequisite: ECON 50. WIM

5 units, Aut (Owen, B)

### **PUBLPOL 107. Public Finance and Fiscal Policy**

(Same as ECON 141) What role should and does government play in the economy? What are the effects of government expenditure, borrowing, and taxation? Policy topics: budget surpluses/deficits; tax reform; social security, public goods, and externalities; fiscal federalism; public investment; and cost-benefit analysis. Prerequisites: 51, 52.

5 units, Spr (Boskin, M)

### **PUBLPOL 112. Public Leadership in Theory and Practice**

(Same as POLISCI 225S) Models from Aristotle to the Harvard School of Business concerning what leaders are supposed to do. Students develop expectations of what interactions between national political leaders would be like under each of these theories and a reasonably large (n=300-800) database of actual interactions between presidents and other leaders in business, unions, congress, and administration, using recorded conversations from Kennedy through Nixon. Students assess their expectations and reach conclusions about the usefulness of these theories of leadership and how leadership in public policy making might differ substantially from leadership in enterprise.

5 units, Spr (Staff)

### **PUBLPOL 119. Sociology of Terrorism**

(Same as SOC 109, SOC 209) Multidisciplinary, including psychology, sociology, political science, and economics. Comparison of terrorist organizations and movements across institutions, places, and times; their motives, tactics, financing, and organization. Guest lecturers. Sources include movies, novels, and research literature. GER:DB-SocSci

5 units, Spr (Meyersson Milgrom, E)

### **PUBLPOL 121. Policy and Climate Change**

Science and economics, including recent findings. History and evolution of local, state, regional, national, and international policy. California's recent landmark climate change bill. Future policy prospects, emphasizing national and international levels.

5 units, Aut (Nation, J)

### **PUBLPOL 125. Law and Public Policy**

How lawyers argue and judges decide cases versus other forms of rhetoric and decision making. Legal reasoning and dispute resolution within Anglo-American common law and in comparative perspective across diverse societies. The relationship between law and public policy on current issues related to culture, technology, race, education, sexuality, abortion, gun control, civil liberties, national security and the environment. Sources include judicial opinions, interdisciplinary legal scholarship, ethnography, literature, and film. GER:DB-SocSci

5 units, Spr (Greenberg, J)

### **PUBLPOL 130. Path Dependence in Private Action and Public Policy: Decision Making in the Shadow of History**

(Same as ECON 151) The historically contingent development of economic, social, and political behaviors at micro and macro levels. History's role in individual and organizational decision making. When can extraneous events have persisting effects upon pub-

lic institutions, private organizations, and government agencies? Science and technology policy making; precedent-based judicial and administrative proceedings; and institutional reforms and regulatory initiatives illustrate positive feedback dynamics; self-organization and emergent properties in complex systems; conditions of lock-in to and escapes from sub-optimal equilibria in economic and social arrangements. Prerequisite: ECON 50, 51. Recommended: Completion of at least one upper level economics course.

3-5 units, Win (David, P)

**PUBLPOL 135. Regional Politics and Decision Making in Silicon Valley**

Dynamics of regional leadership and decision making in Silicon Valley, a complex region composed of 40 cities and four counties without any overarching framework for governance. Formal and informal institutions shaping outcomes in the region. Case studies include transportation, workforce development, housing and land use, and climate change.

3 units, Spr (Benest, F; Hancock, R)

**PUBLPOL 154. Politics and Policy in California**

State politics and policy making, including the role of the legislature, legislative leadership, the governor, special interests, campaign finance, the public, ballot initiatives, the state constitution, the media, and the role of research organizations. Case studies include pension reform, health care, term limits and other political reform measures, open primaries, infrastructure improvements, and the budget. Changes in constitutional and in state statutes that can improve policy making in California.

5 units, Win (Nation, J)

**PUBLPOL 168. Global Organizations: Managing Diversity**

Analytical tools derived from the social sciences to analyze global organizations and projects, and applied to the tradeoffs between different designs of teams and organizations. Focus is on tribal mentality and how to design effective organizations and projects for policy implementation within and across institutional settings. Recommended: 102, MS&E 180, or SOC 160. GER:DB-SocSci

5 units, Win (Meyersson Milgrom, E)

**PUBLPOL 172. Psychology and Public Policy**

(Same as PSYCH 119) Applications of psychology to public and social policy. Factors that affect the influence of psychological research and individual psychology on the creation of policy, and the influence of policy on attitudes and behavior at the personal and societal levels. Topics include education, health care, and criminal justice.

5 units, Win (Tormala, T)

**PUBLPOL 183. Philanthropy and Social Innovation**

Philanthropy's role in modern society and the translation of its vision and capital into social action. Topics: individual giving; philanthropic landscape and models; foundation mission and infrastructure; philanthropic strategy and grantmaking; accountability and knowledge management; global and corporate philanthropy; and public policy engagement. Readings: business school cases and industry articles. Guest speakers include individual donors and foundation presidents. Discussion Seminar- attendance mandatory. Enrollment limited to 15. GER:DB-Hum

2 units, Spr (Arrillaga, L)

**PUBLPOL 184. Poverty and Policies in Developing Economies**

Economic models of growth and poverty, differences in growth rates among countries, and the persistence of poverty. Models of physical and human capital accumulation, and recent theories of the importance of institutions, social capital, and political factors. The effectiveness of social policies in developing countries, emphasizing India, in the light of theories of growth and poverty, and in terms of immediate goals and long-term consequences. Policies include schooling and health, anti-poverty, banking, and political decentralization. Prerequisites: ECON 1A,B. GER:DB-SocSci

5 units, Spr (Kochar, A)

**PUBLPOL 194. Technology Policy**

How the U.S. federal government promotes, uses, and regulates new technologies; how it decides technology policies; and debates over how to use technology to advance national goals. Topics: American attitudes towards technology; technologies for defense, homeland security, energy, health, and economic competitiveness; and when and how to regulate nanotechnology, stem-cell research,

government surveillance, and digital copyright. Recommended: POLISCI 2.

5 units, Win (Windham, P)

**PUBLPOL 197. Junior Honors Seminar**

(Same as ECON 198) Primarily for students who expect to write an honors thesis. Weekly sessions discuss writing an honors thesis proposal (prospectus), submitting grant applications, and completing the honors thesis. Readings focus on writing skills and research design. Students select an adviser, outline a program of study for their senior year, and complete a prospectus by the end of the quarter. Enrollment limited to 25.

5 units, Win (Rothwell, G), Spr (Rothwell, G)

**PUBLPOL 198. Directed Readings in Public Policy**

1-5 units, Aut (Staff), Win (Staff), Spr (Staff)

**PUBLPOL 199. Senior Research**

May be repeated for credit.

1-15 units, Aut (Staff), Win (Staff), Spr (Staff)

**PUBLPOL 200A. Senior Seminar**

Students conduct original research for oral presentations and a paper on a policy-related topic. Topic and methods of analysis determined by student in consultation with instructor. Goal is to improve analytical, research, writing, and communication skills. Prerequisites: core courses in Public Policy or consent of instructor.

3 units, Aut (Goda, G)

**PUBLPOL 200B. Senior Seminar: Conducting Policy Analysis for Local Agencies**

Students conduct original research for oral presentations and a paper on a policy-related topic. Topic and methods of analysis determined by student in consultation with instructor. Goal is to improve analytical, research, writing, and communication skills. Prerequisites: core courses in Public Policy or consent of instructor. GER:DB-SocSci

5 units, Win (Sprague, M)

**PUBLPOL 200C. Senior Seminar**

Students conduct original research for oral presentations and a paper on a policy-related topic. Topic and methods of analysis determined by student in consultation with instructor. Goal is to improve analytical, research, writing, and communication skills. Prerequisites: core courses in Public Policy or consent of instructor.

3 units, Spr (Sprague, M)

**PUBLPOL 307. Justice**

(Same as ETHICSOC 171, IPS 208, PHIL 171, PHIL 271, POLISCI 136S, PUBLPOL 103C) Focus is on the ideal of a just society, and the place of liberty and equality in it, in light of contemporary theories of justice and political controversies. Topics include protecting religious liberty, financing schools and elections, regulating markets, assuring access to health care, and providing affirmative action and group rights. Issues of global justice including human rights and global inequality. GER:DB-Hum, EC-EthicReas

4-5 units, Aut (Cohen, J)

**GRADUATE COURSES IN PUBLIC POLICY**

**PUBLPOL 201. Politics and Public Policy**

(Same as POLISCI 123, PUBLPOL 101) How policies come to be formed. How interests compete within public institutions to turn ideas into policies. Examples of this process from contemporary policy areas, including tax, social welfare, and environmental policy; results evaluated using equity and efficiency criteria. Prerequisite: POLISCI 2 (or equivalent for Public Policy majors).

5 units, Spr (Frisby, T)

**PUBLPOL 202. Organizations and Public Policy**

(Same as PUBLPOL 102) Analysis of organizational processes emphasizing organizations that operate in a non-market environment. Prerequisite: ECON 1A.

5 units, Spr (Bendor, J)

**PUBLPOL 204. Economic Policy Analysis**

(Same as ECON 150, PUBLPOL 104) The relationship between microeconomic analysis and public policy making. How economic policy analysis is done and why political leaders regard it as useful

but not definitive in making policy decisions. Economic rationales for policy interventions, methods of policy evaluation and the role of benefit-cost analysis, economic models of politics and their application to policy making, and the relationship of income distribution to policy choice. Theoretical foundations of policy making and analysis, and applications to program adoption and implementation. Prerequisite: ECON 50.

5 units, Win (Jones, A)

**PUBLPOL 206. Economics of Legal Rules and Institutions**

(Same as ECON 154, PUBLPOL 106) Design and consequences of laws, given alternative policy objectives. Welfarist approach to legal policy; deontological perspectives including Kant, Locke, Mill, and Rawls. Economic efficiency and agent rationality, law as mitigation of market and cognitive failures, effects of law on expectations and incentives, balancing costs of type I and type II legal errors. Empirical studies of law's effects. Applications: property, tort, contract, antitrust, discrimination, crime, legal procedure. Examples chiefly from U.S. law, but analytical tools of general applicability. Prerequisite: ECON 50.

5 units, Aut (Owen, B)

**PUBLPOL 231. Health Care Regulation, Finance and Policy**

(Same as HRP 391) (SAME AS LAW 348) Provides the legal, institutional, and economic background necessary to understand the financing and production of health services in the U.S. Potential topics include: health reform, health insurance (Medicare and Medicaid, employer-sponsored insurance, the uninsured), medical malpractice and quality regulation, pharmaceuticals, the corporate practice of medicine, regulation of fraud and abuse, and international comparisons.

3 units, Win (Kessler, D)

**PUBLPOL 301A. Microeconomics**

(Same as IPS 204A) Microeconomic concepts relevant to decision making. Topics include: competitive market clearing, price discrimination; general equilibrium; risk aversion and sharing, capital market theory, Nash equilibrium; welfare analysis; public choice; externalities and public goods; hidden information and market signaling; moral hazard and incentives; auction theory; game theory; oligopoly; reputation and credibility.

4 units, Aut (Bulow, J)

**PUBLPOL 301B. Cost-Benefit Analysis and Evaluation**

(Same as IPS 204B) Ex ante and ex post evaluation of projects and policies, value of life calculations, and welfare evaluation of public and private decisions. Welfare measures; tradeoffs between efficiency and equity. Second best. Statistical decision theory. Use of incentives in implementing policies. Relationship between microeconomic analysis and public policy making. Economic rationales for policy interventions. Economic models of politics and application to policy making. Relationship of income distribution to policy choice.

4 units, Spr (Lim, C)

**PUBLPOL 302A. Introduction to Law**

Differences between common and civil law systems; judge-made law and judicial process; courts and litigation; legislation and its interpretation; administrative law and regulation. Separation of powers and federalism; constitutional law and civil liberties; criminal justice; empirical studies of the legal profession and legal behavior; social change and its impact on the legal order; law and economic development.

2 units, Aut (Friedman, L)

**PUBLPOL 302B. Economic Analysis of Law**

(Same as LAW 277.) How legal rules and institutions can correct market failures. The economic function of contracts; role of legal remedies to resolve disputes when contracts fail. The choice between relying on private parties, through litigation, and governmental agents, through regulation, to correct externalities. Economics of litigation; how private incentives to bring lawsuits differ from the social value of litigation. Economic motives to commit crimes; optimal governmental response to crime. Specific topics include: the Coase Theorem; the tradeoff between the certainty and severity of punishment; the choice between ex ante and ex post sanctions; negligence versus strict liability; property rules; remedies for breach of contract; and the American rule versus the English rule for allocating litigation costs. Prerequisites: intermediate-level microeconomics; some calculus.

4 units, Win (Polinsky, M)

**PUBLPOL 303A. Foundations Of Statistical Inference**

(Same as IPS 205A) (Same as LAW 362.) Statistical background and introduction to regression. Topics include hypothesis testing, linear regression, nearest-neighbors regression, and other statistical concepts. Hands-on empirical analysis using popular statistical packages. Goal is to analyze empirical studies, conduct empirical research, and to crossexamine or work with statistical experts.

4 units, Aut (Strnad, J)

**PUBLPOL 303B. Econometrics**

(Same as IPS 205B) (Same as LAW 366.) Descriptive statistics. Regression analysis. Hypothesis testing. Analysis of variance. Heteroskedasticity, serial correlation, errors in variables, simultaneous equations. The construction and use of models for analyzing economic and social phenomena. Bayesian analysis. Univariate and bivariate analysis. Simple regression model. Multiple regression model. Inference and heteroskedasticity. Linear probability model. Instrumental variables. Maximum likelihood methods. Measurement of social and political attitudes and ideologies. Statistical analysis of large data sets.

4 units, Win (Strnad, J)

**PUBLPOL 303C. Bayesian Statistics and Econometrics**

(Same as LAW 243.) Linear and nonlinear regression, covariance structures, panel data, qualitative variable models, nonparametric and semiparametric methods, time series, Bayesian model averaging and variable selection. Bayesian methodology including Markov chain Monte Carlo methods, hierarchical models, model checking, mixture models, empirical Bayes approaches, approximations, and computational issues and foundations. Prerequisite: graduate-level econometrics or equivalent.

5 units, Aut (Strnad, J)

**PUBLPOL 304A. Politics and Collective Action**

(Same as IPS 206A, POLISCI 331S) Classic theories for why collective action problems occur and how they can be solved. Politics of aggregating individual decisions into collective action, including voting, social protest, and competing goals and tactics of officials, bureaucrats, interest groups, and other stakeholders. Economic, distributive, and moral frameworks for evaluating collective action processes and outcomes. Applications to real-world policy problems involving collective action.

4 units, Spr (Stone, P)

**PUBLPOL 304B. Organizations**

(Same as IPS 206B) Policy reform and organizational resistance. Organizations include government and other bureaucracies such as not-for-profit schools, universities, hospitals, international organizations, political parties, and agencies. Hubris and policy making, including pathologies of decision making and planning, abuse of intelligence, biased information, overselling to publics, lack of knowledge about context, and unintended consequences.

4 units, Spr (Stedman, S; Eden, L)

**PUBLPOL 305A. Judgment and Decision Making**

(Same as IPS 207A) (Same as LAW 333.) Theories and research on heuristics and biases in human inference, judgment, and decision making. Experimental and theoretical work in prospect theory emphasizing loss and risk aversion. Challenges that psychology offers to the rationalist expected utility model; attempts to meet this challenge through integration with modern behavioral economics. Decision making biases and phenomena of special relevance to public policy such as group polarization, group think, and collective action.

4 units, Win (Brest, P)

**PUBLPOL 305B. Public Policy and Social Psychology: Implications and Applications**

(Same as IPS 207B, PSYCH 216) Theories, insights, and concerns of social psychology relevant to how people perceive issues, events, and each other, and links between beliefs and individual and collective behavior. Topics include: situationist and subjectivist traditions of applied and theoretical social psychology; social comparison, dissonance, and attribution theories; social identity, stereotyping, racism, and sources of intergroup conflict and misunderstanding; challenges to universality assumptions regarding human motivation, emotion, and perception of self and others; the problem of producing individual and collective changes in norms and behavior.

4 units, Spr (Ross, L)

**PUBLPOL 306. Writing and Rhetoric for Policy Audiences**

Techniques of effective writing and argument for addressing decision makers, interest groups, and the public. The importance of apparent simplicity; uses and misuses of history and historical analogies; and incentives, cognitive limits, and biases of audiences. Why some arguments become traditional. Sources include historical briefing papers and oral arguments. Students write briefing papers and make oral arguments, individually and in teams. Enrollment limited. Prerequisite: consent of instructor.

4 units, Win (Owen, B; Rosston, G)

**PUBLPOL 309. Practicum**

(Same as IPS 209) Applied policy exercises in various fields. Multidisciplinary student teams apply skills to a contemporary problem in a major policy exercise with a public sector client such as a government agency. Problem analysis, interaction with the client and experts, and presentations. Emphasis is on effective written and oral communication to lay audiences of recommendations based on policy analysis.

1-10 units, Aut (Nation, J), Win (Nation, J)

**PUBLPOL 310. Master of Arts Thesis**

Restricted to students writing a master's thesis in Public Policy. May be repeated for credit.

1-5 units, Aut (Staff), Win (Staff), Spr (Staff)

**PUBLPOL 311. Public Policy Colloquium**

Weekly colloquia speaker series required for M.P.P. and M.A. in Public Policy students. Themes vary each quarter.

1 unit, Aut (Owen, B; Rosston, G), Win (Owen, B; Rosston, G), Spr (Owen, B; Stedman, S)

## RADIATION ONCOLOGY (RADO)

---

### UNDERGRADUATE COURSES IN RADIATION ONCOLOGY

**RADO 101. Readings in Radiation Biology**

1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**RADO 199. Undergraduate Research**

Students undertake investigations sponsored by individual faculty members. Prerequisite: consent of instructor.

1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

### GRADUATE COURSES IN RADIATION ONCOLOGY

**RADO 299. Directed Reading in Radiation Oncology**

Prerequisite: consent of instructor.

1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**RADO 370. Medical Scholars Research**

Provides an opportunity for student and faculty interaction, as well as academic credit and financial support, to medical students who undertake original research. Enrollment is limited to students with approved projects.

4-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**RADO 399. Graduate Research**

Students undertake investigations sponsored by individual faculty members. Prerequisite: consent of instructor.

1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

## RADIOLOGY (RAD)

---

### UNDERGRADUATE COURSES IN RADIOLOGY

**RAD 72Q. Fluorescence Imaging in Living Cells**

(S,Sem) Stanford Introductory Seminar. Preference to sophomores. Basic principles of fluorescent probes and their applications for live-cell imaging. Topics include: general classes of fluorescent probes together with their fluorescence mechanisms; strategies and methods for live cell labeling and imaging of specific proteins. Examples of applications of fluorescence imaging are presented. Provides students first-hand experience in fluorescence imaging

research, and exploration of cutting edge techniques. Readings include current reviews and key original articles.

2 units, Win (Staff)

**RAD 101. Readings in Radiology Research**

Prerequisite: consent of instructor.

1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**RAD 199. Undergraduate Research**

Students undertake investigations sponsored by individual faculty members. Prerequisite: consent of instructor.

1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

## GRADUATE COURSES IN RADIOLOGY

**RAD 200. Imaging Anatomy and Pathology**

Supplements traditional dissection anatomy with modern cross-sectional imaging, and traditional examination of the cadaver with study of live subjects. Chest-abdominal and pelvic anatomy; congenital, traumatic, and neoplastic processes that affect these structures. Preparation for encounters with imaging tests in clinical medicine and surgery. Also open to graduate students in fields related to imaging sciences.

2 units, Win (Staff), Spr (Federle, M; Penner, R)

**RAD 203. Introduction to Interventional Radiology**

Designed to expose pre-clinical and clinical MD students to minimally-invasive procedures using image guidance through a combination of didactics, simulation, and cathlab observation. Weekly organ-based and/or disease-based lectures are followed by simulation and faculty shadowing. Daily case-based presentations by faculty, technical demonstrations, and informal discussions reinforce the learning experience.

1 unit, Aut (Kothary, N; Hwang, G; Louie, J), Spr (Hwang, G; Louie, J; Kothary, N)

**RAD 220. Imaging Anatomy**

(Same as BIOE 220) The physics of medical imaging and human anatomy through medical images. Emphasis is on normal anatomy, contrast mechanisms, and the relative strengths of each imaging modality. Labs reinforce imaging techniques and anatomy. Prerequisites: basic biology, physics.

3 units, Win (Pauly, K; Gold, G)

**RAD 222A. Multimodality Molecular Imaging in Living Subjects**

(Same as BIOE 222A) Focuses on instruments and chemistries for imaging of cellular and molecular processes in vivo. Basics of instrumentation physics, chemistry of molecular imaging probes, and an introduction to preclinical and clinical molecular imaging modalities.

4 units, Aut (Contag, C; Xing, L; Rao, J)

**RAD 222B. Chemistry of Molecular Probes for Imaging in Living Subjects**

(Same as BIOE 222B) Focuses on molecular probes that target specific disease mechanisms. The ideal characteristics of molecular probes; how to optimize their design for use as effective imaging reagents that target specific steps in biological pathways and reveal the nature of disease through noninvasive assays.

4 units, Win (Contag, C; Rao, J; Xing, L)

**RAD 222C. Topics in Multimodality Imaging in Living Subjects**

(Same as BIOE 222C) Focuses on emerging chemistries and instruments that address unmet needs for improved diagnosis and disease management in cancer, neurological disease, cardiovascular medicine and musculoskeletal disorders. Objective is to identify problems or controversies in the field, and to resolve them through understanding the relevant primary literature.

4 units, Spr (Contag, C; Xing, L; Rao, J)

**RAD 226. In Vivo Magnetic Resonance Spectroscopy and Imaging**

Collections of identical independent nuclear spins are described by the classical vector model of magnetic resonance imaging (MRI); however, interactions among spins, as occur in many in vivo processes, require a more complete description. Physics and engineering principles of these in vivo magnetic resonance phenomena with emphasis on current research questions and clinical applications. Topics: quantum mechanical description of magnetic resonance, density matrix theory, product operator formalism, relaxation

theory and contrast mechanisms, spectroscopic imaging, spectral editing, and multinuclear studies. Prerequisites: EE 369B or familiarity with magnetic resonance, working knowledge of linear algebra.

3 units, Win (Spielman, D)

#### **RAD 227. Functional MRI Methods**

(Same as BIOPHYS 227) Basics of functional magnetic resonance neuroimaging, including data acquisition, analysis, and experimental design. Journal club sections. Cognitive neuroscience and clinical applications. Prerequisites: basic physics, mathematics; neuroscience recommended.

3 units, Aut (Glover, G)

#### **RAD 228. Magnetic Resonance Imaging Programming Topics**

Primarily for students working on research projects involving MRI pulse sequence programming. Introductory and student-initiated topics in seminars and hands-on labs. Image contrast mechanisms achieved by pulse sequences that control radiofrequency and gradient magnetic fields in real time, while acquiring data in an organized manner for image reconstruction. Prerequisites: EE 369B and consent of instructor.

3 units, Sum (Staff)

#### **RAD 299. Directed Reading in Radiology**

Prerequisite: consent of instructor.

1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

#### **RAD 370. Medical Scholars Research**

Provides an opportunity for student and faculty interaction, as well as academic credit and financial support, to medical students who undertake original research. Enrollment is limited to students with approved projects.

4-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

#### **RAD 399. Graduate Research**

Students undertake investigations sponsored by individual faculty members. Prerequisite: consent of instructor.

1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

## RELIGIOUS STUDIES (RELIGST)

### UNDERGRADUATE COURSES IN RELIGIOUS STUDIES

#### **RELIGST 10N. The Problem of God: Aquinas to the New Atheism**

(F,Sem) Stanford Introductory Seminar. Critical inquiry the meaning and credibility of theistic belief through exemplary classic formulations, modern critics, and contemporary defenders. What has the idea of God meant to serious minds in the past? And in the modern or postmodern world?

4 units, Spr (Sockness, B)

#### **RELIGST 12. Introduction to Hinduism**

Historical study from earliest period to the present, including religious poetry, narrative, performance, concepts of self and liberation, yoga, ritual, God and gods, views of religion through history, region, class, caste, and gender. GER:DB-Hum, EC-GlobalCom

4 units, not given this year

#### **RELIGST 14. Exploring Buddhism**

From its beginnings to the 21st century. Principal teachings and practices, institutional and social forms, and artistic and iconographical expressions. GER:DB-Hum, EC-GlobalCom

4 units, Win (Harrison, P)

#### **RELIGST 15N. The History of Immortality**

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. If there are limits to the imagination, death is not one of them. How the afterlife has been imagined by religious thinkers and writers from antiquity to the present day. One of the most difficult aspects of life, fear of death and oblivion. Goal is to explore the power of thought and literature to move beyond the limits of mortality. GER:DB-Hum

4 units, Win (Weitzman, S)

#### **RELIGST 16N. The Story of Human Virtues**

(F,Sem) Stanford Introductory Seminar. Bravery, temperance, generosity, justice, wisdom, and friendship. Plato and Aristotle on human virtues; Muslim, Jewish, Christian, and secular appropria-

tions and transformations of that Greek heritage. GER:DB-Hum

4 units, Aut (Sadeghi, B)

#### **RELIGST 18. Zen Buddhism**

Classical Zen thought in China, and its background, origins, and development. GER:DB-Hum, EC-GlobalCom

4 units, Spr (Bielefeldt, C)

#### **RELIGST 19S. Angels in America: Western Religion and Contemporary Culture**

How religion is presented in the media. Cultural representations that shape and disrupt this image of the relationship between being religious and being modern. How believers and doubters in Islam, Judaism, and Christianity are portrayed in popular culture. Sources include the music of Dar Williams and M.I.A., the plays of Tony Kushner, and the Canadian sitcom Little Mosque on the Prairie. How gay believers, agnostic leaders, terrorists, and born-again children of secular parents complicate the notion of religious belief in today's world.

3 units, Sum (Rosenberg, J)

#### **RELIGST 20. Introduction to the Zoroastrian Religion**

The origins of Zoroastrianism, its role in the Iranian empires, and its relation to Judaism, Christianity, Manichaeism, and Islam, and its later forms and function in Iran, India, and its diaspora. The impact of the religion on European literati such as Voltaire, Mozart, the romantic poets, and Nietzsche. GER:DB-Hum

3 units, not given this year

#### **RELIGST 23. Exploring Judaism**

Introduction to the varied beliefs, ritual practices, and sacred stories of Judaism, moving from foundational texts like the Bible and the Talmud to recent changes in Jewish religious life that have arisen in response to secular and feminist critiques, the Holocaust, and the emergence of the State of Israel. GER:DB-Hum

4 units, Spr (Weitzman, S)

#### **RELIGST 24. Exploring Christianity**

The historical development of Christian religious thought and practice from Jesus to the present. Emphasis is on the formation of Christianity's major teachings and their transformation and diverse expressions in the medieval, reformation, and modern periods. Readings focus on primary texts. GER:DB-Hum

4 units, Win (Pitkin, B)

#### **RELIGST 27. Exploring Islam**

Introduction to Islam through focusing on the life of Mohammed, Sunni-Shi'i differences, absorption of Greek philosophical knowledge, Islamization in parts of Asia and Africa, debates on gender, modernism, nationalism, and Islamism in recent decades. The question of unity and diversity in the historical development of Islamic ideas and practices. GER:DB-Hum, EC-GlobalCom

4 units, Win (Bashir, S)

#### **RELIGST 35. Introduction to Chinese Religions**

(Formerly 55.) Confucianism, Daoism, Buddhism, and the interchange among these belief systems and institutions. Set against the background of Chinese history, society, and culture, with attention to elite and popular religious forms. GER:DB-Hum, EC-GlobalCom

4 units, not given this year

#### **RELIGST 37. Introduction to Japanese Religions**

Major themes in Japanese religious culture, including gods, religious sites, and specialist and popular practices. Films and readings from literary, ethnographic, and historical sources in translation. GER:DB-Hum

4 units, not given this year

#### **RELIGST 46. Introduction to Daoism**

(Formerly 56.) Historical survey from origins to the present. Main schools, notions, communal rites, and individual practices, and the relation of Daoism to facets of Chinese culture. GER:DB-Hum

4 units, not given this year

#### **RELIGST 54. The Roots of Right and Wrong in Christianity, Judaism, and Islam**

What Christian, Jewish, and premodern Muslim thinkers have to say about these questions: what makes an act right or wrong; can a basis for right and wrong be identified independently of revealed religion; is observing commands and prohibitions sufficient to lead a life of virtue and refinement? GER:DB-Hum

4 units, not given this year

**RELIGST 57. Millennium, Messiahs, and Mayhem**

How the apocalypse has captured the imaginations and influenced the behaviors of many Jews and Christians who predict the end of the world during their lifetimes, whether facilitated by the arrival of a human or divine emissary, preceded by a cataclysm, or announced by a renunciation of normative morals. Examples include the Book of Revelations, the Dead Sea Scrolls, the Brotherhood of the Free Spirit, Shabtai Tzvi, Jacob Frank, the Mormons, and Chabad Chasidism.

4 units, not given this year

**RELIGST 60. Nation, Diaspora & the Gods of African American Religion**

(Same as AFRICAAM 60) The histories of religion and faith cultures among communities of the African diaspora. The religious traditions and historical experiences of black communities across the 19th and 20th century U.S. and a comparative view of South American, Caribbean and African histories. Close readings of music, film, literature and visual arts and the overlapping religious affiliations of nation and diaspora. GER:DB-Hum

4 units, Spr (Hughes, B)

**RELIGST 62. Philosophy of Religion**

Classic and modern questions in the philosophy of religion traced through Western and Eastern traditions: the coherence of theism, relativism, verification and ethics of belief, and mystical experience. Readings from traditional and modern texts. GER:DB-Hum

4 units, not given this year

**RELIGST 84. Mystics, Pilgrims, Monks, and Scholars: Religious Devotion in Medieval Christianity**

The variety and vitality of religious expression in medieval Christian Europe. How Christians sought God through mystical encounter, the structure of monastic life, visits to shrines, devotion to the saints, and the study of scripture and ancient Christian wisdom. Readings focus on primary texts. GER:DB-Hum

4 units, not given this year

**RELIGST 90. Buddhism and Gender**

In the Buddhist tradition there are contradictory approaches to gender: in some cases, gender is described as an illusion; in others, the female body is an impediment to enlightenment. How do Buddhists - men and women, lay and monastic - interpret these divergent views? Different Buddhist approaches to the category of gender. Values associated with masculinity and femininity in Buddhist philosophy, the gendered symbolism surrounding buddhahood, images of the masculine and feminine in Buddhist texts, and the experiences of lay and monastic men and women.

4 units, Spr (Bryson, M)

**RELIGST 95. How to Read the Bible**

What does the Bible mean? Address this question not by surveying the contents of the Bible but by exploring the various ways in which selected texts like the Garden of Eden story and the Exodus narrative have been read over the last two thousand years. How modern scholars explain the origins and significance of the Bible, but also explores other kinds of readings--from ancient rabbinic and Christian exegesis to modern political and artistic interpretation--in order to deepen understanding not just of the Bible itself and of the art and power of reading. GER:DB-Hum

4 units, Aut (Weitzman, S)

**RELIGST 101. Who is Allah?**

Introduction to classical Islamic theology. How did notions about God's nature define theological communities? What made some ideas more likely than others to function as markers of group identity? Were the different sects distinguished by different methods of reading scriptures? Did differences in the interpretation of the Qur'an generate the communal divisions, or did differing communal identities generate different interpretations of the Qur'an? God's power (free will versus predestination) the age of the Universe (pre-eternal world vs coming into being at some point) roots of ethics (what makes an act right or wrong.) Readings of the greatest philosophers and theologians in classical Islam. GER:DB-Hum

3 units, Win (Sadeghi, B)

**RELIGST 102. Modern Islam**

How Muslims have engaged in diverse ways with the Modern World and with new ethical, social and global challenges? How Muslim thinkers have shaped or been shaped by current trends and

events and met challenges of identity, secularization and the nation-state? GER:DB-Hum

5 units, Aut (Nanji, A)

**RELIGST 103. Religion and Global Conflict**

A weekly lecture series - drawing upon experts in various disciplines, departments, and centers on campus and beyond - which seeks to understand and explain religion's renewed, and often violent, public and political relevance for global affairs at the beginning of the 21st century.

2 units, Spr (Sackness, B)

**RELIGST 104. Views of the Human Body in Daoism**

The human body as seen in Daoist traditions and related areas, particularly cosmology and medicine. Major sources including images and charts, and the views of the human being that they reflect. GER:DB-Hum, EC-GlobalCom

4 units, not given this year

**RELIGST 105. Race, Faith, and Migration**

(Same as AFRICAAM 105R) A weekly lecture series - drawing upon experts in various disciplines, departments, and centers on campus and beyond - which seeks to understand and explain Race, Faith, and Migration. GER:DB-Hum, EC-GlobalCom

2 units, Win (Hughes, B)

**RELIGST 107. Hindus and Muslims in South Asia**

The history of Hindus and Muslims living together in S. Asia for over 1,000 years. Peace and conflict, composite cultures, and interdependent social worlds. Partition in 1947 and the creation of separate nations. Religion, arts, society, and politics. GER:DB-Hum, EC-GlobalCom

4 units, Spr (Hess, L)

**RELIGST 108. The Mahabharata**

How the Sanskrit epic and its versions in other languages are interwoven with the history of Hinduism and S. Asian arts, philosophy, and social and political thought. How the text is interpreted through performance, including village ritual dramas, classical dance, and mass market television. GER:DB-Hum

4 units, not given this year

**RELIGST 108A. Religious Epics of India: The Ramayana**

The Ramayana story from the ancient Sanskrit epic poem of Valmiki to other avatars through the ages including vernacular and Sanskrit poetry, theater, the television serial of the late 80s, classic comics, animated film. Religion, politics, cultural ideals, gender, media. Recent battles over Ram's birthplace in Ayodhya and their effects on Hindu-Muslim relations and political power. GER:DB-Hum

4 units, Win (Hess, L)

**RELIGST 111. Religions of Mexico**

Key issues in the study of religion and religions of Mexico. Sacred cities of the Aztec and Maya, the encounter between Christianity and indigenous religions and contemporary religious performances in Mexico and among Mexican Americans. Theoretical frames of Mircea Eliade, Emile Durkheim, and Victor Turner. Emphasis is on the recently recovered indigenous codex known as the Mapa de Cuauhtinchan #2. GER:DB-Hum

4 units, not given this year

**RELIGST 112. Handmaids and Harlots: Biblical Women in Jewish and Christian Traditions**

Miraculous births, wandering in the wilderness, encounters with angels: stories of Hagar, Sarah, Hannah, and Mary, and how their tales are read and re-told by later Jews and Christians. Sources include the Hebrew Bible and New Testament, Jewish and Christian commentary, and religious iconography. GER:DB-Hum, EC-Gender

4 units, not given this year

**RELIGST 113B. Japanese Religion Through Film**

Themes in premodern and modern Japanese religion through animations, movies and documentaries GER:DB-Hum

4 units, Spr (Lin, I)

**RELIGST 115. Hope and Prophetic Politics: Abraham Joshua Heschel and Martin Luther King, Jr.**

The biblically informed prophetic tradition that has long shaped the history of American religious and political thought and that has often clashed with an impulse towards empire and the desire to accumulate power. Focus is on Abraham Joshua Heschel and Mar-

tin Luther King, Jr., 20th-century religious intellectuals whose lives and works draw on this tradition to raise and address questions basic to the role of religion in public life. GER:DB-Hum

*4 units, not given this year*

**RELIGST 118. Gandhi, King, and Nonviolence**

(Same as HISTORY 105) Lives, times, theory, and practice of Mohandas Gandhi and Martin Luther King, Jr.; their significance to issues of violence and nonviolence today. GER:DB-Hum

*4 units, not given this year*

**RELIGST 124. Sufi Islam**

The complex of Islamic intellectual and social perspectives subsumed under the term Sufism. Sufi mystical philosophies and historical and social evolution. Major examples include: Qushayrī, Rābī'ā, Junayd, Hallāj, Sulamī, Ibn al-'Arabī, Rūmī, Nizām al-Dīn Awliyā'. Social and political roles of Sufi saints and communities. Readings include original prose and poetry in translation, secondary discussions, and ethnography. GER:DB-Hum

*4 units, not given this year*

**RELIGST 126. Protestant Reformation**

16th-century evangelical reformers (Luther, Calvin, Zwingli) and reform movements (Lutheran, Reformed, Anabaptist) in their medieval context. GER:DB-Hum

*4 units, not given this year*

**RELIGST 127A. Kabbalah: The Mystical Teachings of Judaism**

Jewish mystical literature, especially the Zohar. Mystical concepts of the divine: masculine and feminine aspects of the Godhead, divine sonship; eroticism and sexuality; cosmogony and apocalypse; mystical secrecy and popularization, including the contemporary Kabbalah movement in the U.S. and figures such as Madonna and Roseanne. Guest lectures by scholars of Kabbalah including Moshe Idel from Jerusalem and Daniel Matt, the American translator of the Zohar.

*2 units, not given this year*

**RELIGST 129. Modern Jewish Thought**

From the early Enlightenment to the present. Universalism, subjectivity, and redemption within Judaism's encounter with modernity as reflected on by Jewish intellectuals within the Western philosophical tradition; how modern Jewish intellectuals have shaped and been shaped by current debates. Challenges to religious identity by secularism, capitalism, and the nation state. Messianism, mysticism, reactionary romanticism, critical theory, post-Holocaust philosophy, spirituality, and feminism. Thinkers include Spinoza, Marx, Freud, Buber, Strauss, the Frankfurt school, Benjamin, Arendt, and Levinas.

*4 units, not given this year*

**RELIGST 132. Jesus the Christ**

How did Jesus of Nazareth, who never claimed to be Christ or divine, become the son of God after his death? Sources include the history of first-century Judaism and Christianity.

*4 units, not given this year*

**RELIGST 132C. Jesus the Jew in First Century Christianity**

Contemporary historical-critical methods in investigating how one might study Jewish and Christian texts of the 1st century CE. Social contexts including economic realities and elite ideological views. What can be known historically about 1st-century Judaism and Jesus' part in it. How Jewish apocalyptic messianism shaped the birth of Christianity and its trajectory through the 1st century. GER:DB-Hum

*4 units, Spr (Miller, R; Sheehan, T)*

**RELIGST 133. Inventing Christianity in Late Antiquity**

The transformation of an apocalyptic sect into an imperial religion from 200 to 600 C.E. Shifts in structures of authority, worship, and belief mapped against shifts in politics, economics and religion in the larger Roman empire. Cultural visions of this history including Edward Gibbon's Decline and Fall of the Roman Empire, Dan Brown's conspiracy theory in The Da Vinci Code, and Elaine Pagels' *The Secret Gospel of Thomas*. GER:DB-Hum

*4 units, not given this year*

**RELIGST 136. Buddhist Yoga**

Buddhist models of spiritual practice emphasizing issues in the interpretation of the contemplative path. GER:DB-Hum, EC-GlobalCom

*4 units, not given this year*

**RELIGST 144. John Calvin and Christian Faith**

Close reading and analysis of Calvin's Institutes of the Christian Religion as a classic expression of Christian belief. GER:DB-Hum

*4 units, Aut (Pitkin, B)*

**RELIGST 148. From Jesus to Paul**

Jesus considered himself God's definitive prophet, but he did not think he was God, and had no intention of founding a new religion. How did this Jewish prophet become the gentile God and the founder of Christianity? The role of Paul. GER:DB-Hum

*4 units, not given this year*

**RELIGST 148A. St. Paul and the Politics of Religion**

The major letters written by Paul, the Apostle, and his biography, Acts of the Apostles. Historical context in first century Jewish cultural politics. Origins of Christianity, and the split into Judaism and Christianity. The relationship between Jews and non-Jews. The juxtaposition of law and faith. Origins of cultural universalism. Paul as Jewish radical versus Paul, the first Christian thinker and theologian. Recent philosophical readings of Paul (Taubes, Badiou, and Agamben). GER:DB-Hum

*4 units, Win (Fonrobert, C)*

**RELIGST 150. The Lotus Sutra: History of a Buddhist Book**

The Lotus school of Mahayana, and its Indian sources, Chinese formulation, and Japanese developments. GER:DB-Hum, DB-Hum, EC-GlobalCom

*4 units, not given this year*

**RELIGST 151A. Buddhist Art in a Cosmopolitan Environment**

The Buddhist art of Gandhara, historical Northwest India, was the product of a complex interplay of different cultures, religions and societies in the region. Gandharan art from the historic circumstances that led to its development in the first century AD to its gradual disappearance in its homeland around 500 AD. GER:DB-Hum

*4 units, Win (Luczanits, C)*

**RELIGST 154. Buddhism Today: Responses to New Global Challenges**

How do the traditions of Buddhism cope with new social, ethical, and global challenges? Case studies from Sri Lanka, Japan, and the West. The historical position of Buddhist social thought. Buddhism's ascetic and meditative legacy: friend or foe of social engagement? GER:DB-Hum, EC-GlobalCom

*4 units, not given this year*

**RELIGST 156. Goddesses and Gender in Hinduism**

India's tradition of worshipping female forms of the divine, including Kali, Durga, Lakshmi, Saraswati, Radha, Sita, and local deities. The stories, histories, iconographies, theologies, arts, and practices associated with these goddesses. How the worship of goddesses impacts the lives of women. Readings include *Is the Goddess a Feminist?* GER:DB-Hum, EC-Gender

*4 units, Aut (Hess, L)*

**RELIGST 159. Music and Religion in South Asia**

Music and religion have been closely related for millennia in the India subcontinent. Topics include theories of sound, mantra, music as yoga, guru-disciple relationship, devotional singing, gods and their relation to music, aesthetic theory, classical and folk forms, and Hindu and Muslim traditions. Practical instruction in music. GER:DB-Hum, EC-GlobalCom

*4-5 units, not given this year*

**RELIGST 159A. Religion and Performance**

(Same as RELIGST 359A) What happens when religion is viewed through the lens of performance? Texts become dramas, songs, recitations, oral commentaries, dances, movies, and political appropriations. Beliefs become embodied enactments; doctrine puts on a costume and indulges in role play. Approaches to performance theory through religious enactments such as ritual, prayer, festival, drama, music, and film. Most examples from S. Asian religions; students may undertake research projects into other cultures and traditions. GER:DB-Hum

*4 units, not given this year*

**RELIGST 167. Medieval Religious Philosophy**

(Same as PHIL 101A) (Same as PHIL 101A.) Focus is on God, world, and words. A persuasive assumption about the structure of the world, that it reflected the categories of God's mind and

emerged from an act of divine speech, gave impetus to the interest in the nature of language and its relation to the world. Scripture served as one kind of divine communication to human beings, and The Book of the World as another. The problem of universals, the question of how words relate to God, epistemology, theories of reference, and semiotics. Reading from Augustine, Anselm, Aquinas, Scotus, Ockham.

*4 units, not given this year*

**RELIGST 170C. Reading in Biblical Hebrew**

Third of a three quarter sequence. Readings and translation of biblical narratives emphasizing grammar and literary techniques. Prerequisite: AMELANG 170B.

*4 units, not given this year*

**RELIGST 172. Sex, Body, and Gender in Medieval Religion**

Anxiety about sex and the body increased markedly during the early years of Christianity, while the doctrine of the Incarnation put the human body at the center of religious concern. Ideals of virginity, chastity, ascetic self-denial of necessities like food, sleep, and freedom from pain were central to lay and clerical piety. The religious theory and practice associated with questions about sex, body, and gender in the Middle Ages as constructed in literature, mythology, ritual, mystic, and monastic texts. GER:DB-Hum, EC-Gender

*4 units, not given this year*

**RELIGST 174. Martyrdom in the Ancient World**

(Same as CLASSGEN 174) Jewish, pagan and Christian groups under Roman rule all told tales of persecution and resistance. How did they use these stories, and the historical experiences behind them, to form group identity? Emphasis is on ancient documents in translation, and modern scholarly interpretations, to examine the competing agendas of parties involved, group dynamics, individual motivation, symbolic violence, and the body as a locus of power and control. GER:DB-Hum

*4 units, Aut (Gleason, M)*

**RELIGST 174E. Kierkegaard: Existentialism and Religion**

Kierkegaard is rightly called one of the founders of existentialism. Like Socrates, the one philosopher in the western tradition to whom he felt consciously in debt, Kierkegaard sought to return philosophy to the work of thinking through the human condition in all its uncertainty and finitude. Although 20th century existentialists like Sartre and Camus were self-consciously atheist, Kierkegaard's existentialism has religious origins. Through readings of Kierkegaard's philosophical and religious texts, explore the possibility of an existentialist interpretation of the human condition that is religious in nature. Kierkegaard's development of a 'philosophy of existence' as a response to major trends in modern European thought, particularly in response to the philosophies of German idealism (Kant, Hegel) and romanticism. GER:DB-Hum

*4 units, Aut (Kangas, D)*

**RELIGST 176. Religious Diversity: Theoretical and Practical Issues**

What does it mean for a religion to be true? If one religion is true, what about the truth of other religious possibilities? How, and why, should religious traditions be compared? Readings address tolerance and pluralism, relativism, comparative theory, and new religious virtues. GER:DB-Hum

*4 units, not given this year*

**RELIGST 183. The Death of God: Between Hegel and Marx**

The radical transformations in Western notions of God between the death of Hegel and the birth of historical materialism, arguing that questions about theism and atheism, humanism, and history formulated in the period 1831-50 are still pertinent today. Texts from Hegel, the young Hegelians, Feuerbach, and Marx on issues of God, history, and the social dimensions of human nature. GER:DB-Hum

*4 units, not given this year*

**RELIGST 185. Prophetic Voices of Social Critique**

Judges, Samuel, Amos, and Isaiah depict and question power, strong leaders who inevitably fail, the societal inequities and corruption inevitable in prosperity, and the interplay between prophet as representative of God and the human king. How these texts succeed in their scrutiny of human power and societal arrangements through attention to narrative artistry and poetic force, and condemnation of injustice. Includes service-learning component in

conjunction with the Haas Center. GER:DB-Hum

*4 units, not given this year*

**RELIGST 199. Individual Work**

Prerequisite: consent of instructor and department. May be repeated for credit.

*1-15 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

**RELIGST 201. Classical Islamic Law**

(Same as RELIGST 301) Emphasis is on methods of textual interpretation. History of premodern Islamic law, including origins, formation of schools of law, and social and political contexts. Laws of sale, marriage, divorce, and the obligation to forbid wrong. GER:DB-Hum

*3-5 units, Aut (Sadeghi, B)*

**RELIGST 203. Myth, Place, and Ritual in the Study of Religion**

(Same as RELIGST 303) Sources include: ethnographic texts and theoretical writings; the approaches of Charles Long, Jonathan Z. Smith, Victor Turner, Michael D. Jackson, and Wendy Doniger; and lived experiences as recounted in Judith Sherman's Say the Name: A Survivor's Tale in Prose and Poetry, Jackson's At Home in the World, Marie Cardinal's The Words to Say It, and John Phillip Santos' Places Left Unfinished at the Time of Creation. GER:DB-Hum

*3-5 units, not given this year*

**RELIGST 210. Translating the Daode Jing**

One of the most frequently translated works in world literature. Challenges faced by translators, support from commentaries and related sources, and assumptions underlying translations into Western languages. Recommended: classical Chinese. GER:DB-Hum

*4 units, not given this year*

**RELIGST 212. Chuang Tzu**

The Chuang Tzu (Zhuangzi) in its original setting and as understood by its spiritual progeny. Limited enrollment. GER:DB-Hum

*5 units, Win (Yearley, L)*

**RELIGST 216. Japanese Buddhism**

Recent scholarship. GER:DB-Hum

*4 units, not given this year*

**RELIGST 217. Japanese Studies of Religion in China**

(Same as RELIGST 317) (Graduate students register for 317.) Readings in Japanese secondary sources on Chinese religions.

*3 units, not given this year*

**RELIGST 220. Modern Muslim Thought: Philosophy, Politics, Society**

Focus is on major challenges of the modern period. Historicity and plurality. Questions concerning governance, law, development, and political and social order in majority and minority Muslim contexts. Readings include original works in English and in translation. GER:DB-Hum

*5 units, not given this year*

**RELIGST 221. The Talmud**

(Same as RELIGST 321) Strategies of interpretation, debate, and law making. Historical contexts. Prerequisite: Hebrew. GER:DB-Hum

*4 units, not given this year*

**RELIGST 221A. Philology of Rabbinic Literature**

(Same as RELIGST 321A) The genesis of rabbinic texts as texts. Evolution from oral stage to manuscript to printed text. Questions of redaction versus edition. Focus on Palestinian and Babylonian Talmud, with excursions into midrashic texts. Prerequisite: strong background in Hebrew. Knowledge of Aramaic preferred.

*3-5 units, Aut (Fonrobert, C; Balberg, M)*

**RELIGST 221B. The Talmud as Literature**

(Same as RELIGST 321B) In what sense can Talmud be studied as literature? Which voices can be identified? Concepts of author, editor, or redactor. The basic textual units of Talmud: sugya, chapter, and tractate. The sugya as literary genre. The aesthetic of talmudic dialectics. Prerequisite: Strong Hebrew, Aramaic preferred. GER:DB-Hum

*3-5 units, Spr (Fonrobert, C)*

**RELIGST 222. Literature and Society in Medieval Islam**

The development of literary traditions, 600-1500. Major poetic and prose topoi through examples from Arabic, Persian, and Turkish

literature in translation. Literature's place in Islamic societies and biographies of significant authors. The religious value of literary forms. Literary canons as unifying agents in different parts of the medieval Muslim world. Comparison between high and folk literatures. The role of aesthetic paradigms in the formation of Islamic religious and cultural identities. GER:DB-Hum

*4 units, not given this year*

#### **RELIGST 222B. Sufism Seminar**

(Same as RELIGST 322B) Sufism through original texts and specialized scholarship. Prerequisite: ability to read at least one major language of Islamic religious literature (Arabic, Persian, Turkish, Urdu). GER:DB-Hum

*3-5 units, Aut (Bashir, S)*

#### **RELIGST 222C. Debauchery and asceticism**

(Same as RELIGST 322C) Arabic texts written by and about early Muslim figures famous either for their limitless self-indulgence or their rigorous self-denial. Language and style of these texts, their implied or explicit dialogue with religious values, and their possible relation to each other. Questions of representation, self-representation, and biographical fallacy. Intended for students with reading knowledge of Arabic.

*3-5 units, Win (Cooperson, M)*

#### **RELIGST 223. Studying Islam: History, Methods, Debates**

Islam as a subject of academic inquiry since the 19th century. Origins and critiques of major methodological perspectives in Islamic studies such as philology, religious studies, history, art history, and anthropology. Landmarks in the development of the field and the work of major scholars. Academic debates regarding unity versus diversity, orientalism, fundamentalism and Islamism, Sufism, and gender. Current trends in scholarship on medieval and modern Muslim societies. Prerequisite: course work in Islamic studies or methodology in religious studies. GER:DB-Hum

*4 units, not given this year*

#### **RELIGST 223A. The Arabic Qur'an**

(Same as RELIGST 323A) Early history, language, structure, style, chronology, motifs, themes, and interpretation. Knowledge of Arabic required. GER:DB-Hum

*3-5 units, Win (Sadeghi, B)*

#### **RELIGST 224. Classical Islamic Texts**

(Same as RELIGST 324) Premodern Islamic scholarship. Genre-specific historical research methods. The hadith literature, tafsir, biographical dictionaries, fiqh, tarikh, and geographical works. Prerequisite: reading knowledge of Arabic. GER:DB-Hum

*3-5 units, not given this year*

#### **RELIGST 224B. Unveiling the Sacred: Explorations in Islamic Religious Imagination**

(Same as RELIGST 324B) Poetry and prose in translation as well as historical studies. Islamic movements invested in the idea that the sensory world has a hidden or esoteric counterpart that can be understood or experienced through following particular religious programs. Various forms of Shi'ism and Sufism, millenarian and apocalyptic movements, the Nation of Islam and its offshoots. Philosophical propositions, historical contexts, and the role of ritual in the construction of religious systems. GER:DB-Hum

*3-5 units, Spr (Bashir, S)*

#### **RELIGST 226. Philosophy and Kabbalah in Jewish Society: Middle Ages and Early Modern Period**

(Same as RELIGST 326) Characteristics of religious philosophy from Saadia Gaon to Maimonides, Jewish opposition to and support of philosophy in the medieval Christian and Muslim world, texts from the early development of Kabbalah, the relationship between philosophy and Kabbalah, and conflicting views of Kabbalah from the 16th through 18th centuries.

*5 units, not given this year*

#### **RELIGST 226A. Judaism and Hellenism**

(Same as RELIGST 326A) interactions and conflicts between Jews and Greeks in the centuries following the conquests of Alexander the Great and the cultural/religious repercussions of their encounter. In what ways were Jews influenced by Greek culture? In what ways, and for what reasons, did they resist it? And how the interaction of these cultures shape the subsequent development of Judaism and Christianity? Jewish texts in the Greco-Roman period, including Jewish-Greek writers like Philo of Alexandria, the Apocrypha, the Dead Sea Scrolls, selected writings from the New Tes-

tament, and the Passover Haggadah. GER:DB-Hum

*3-5 units, Win (Weitzman, S)*

#### **RELIGST 227. The Qur'an**

(Same as RELIGST 327) Early history, themes, structure, chronology, and premodern interpretation. Relative chronology of passages. GER:DB-Hum

*5 units, not given this year*

#### **RELIGST 237. Jewish and Christian Rome, 1st to 6th Centuries**

To what extent are Judaism and Christianity products of the Roman Empire, and shaped by its politics? Literature concerning Jewish and Christian perceptions of power, and archaeological and artistic traces of both religions in the imperial city of Rome. What roles did strategies of resistance and accommodation play in the formation of these religious communities' emerging identities? Possible optional field trip to Rome over Spring break. GER:DB-Hum

*5 units, not given this year*

#### **RELIGST 238. Christian Neo-Platonism, East and West**

(Same as RELIGST 338) Christianity's shift to neo-Platonic Greek philosophical categories and its significance for contemporary spirituality. Readings from Plotinus, Proclus, Greek fathers such as Pseudo-Dionysus, and from Ambrose and Augustine. GER:DB-Hum

*3-5 units, not given this year*

#### **RELIGST 239. Luther and the Reform of Western Christianity**

(Same as RELIGST 339) Luther's theology, ethics, biblical interpretation, and social reforms and their significance for the remaking of Western Christianity. Readings include Luther's own writings and secondary sources about Luther and his world. GER:DB-Hum

*3-5 units, not given this year*

#### **RELIGST 247. Chinese Buddhist Texts**

(Same as RELIGST 347) From the Han Dynasty onwards, including sutra translations, prefaces, colophons, and biographies. Prerequisite: reading competence in Chinese. GER:DB-Hum

*3-5 units, Aut (Harrison, P)*

#### **RELIGST 248. Chinese Buddhism in World Historical Perspective**

(Same as RELIGST 348) Shared cosmologies, trade routes, and political systems. Prerequisite: background in Chinese or Japanese.

*3-5 units, not given this year*

#### **RELIGST 248A. Chinese Buddhism Beyond the Great Wall**

(Same as RELIGST 348A) The thought, practice, and cultural resonance of the sorts of originally Chinese Buddhism that flourished to the north and northwest of China proper during the two to three centuries following the fall of the Tang - i.e., under the Khitan Liao (907-1125) and the Tangut Xixia (1032-1227) dynasties - with special emphasis on the later fortunes of the Huayan, Chan, and Mijiao (Esoteric) traditions. Prerequisite: reading knowledge of Chinese. GER:DB-Hum

*3-5 units, Spr (Gimello, R)*

#### **RELIGST 250. Classics of Indian Buddhism**

Texts in English translation including discourses (sutras), philosophical treatises, commentaries, didactic epistles, hymns, biographies, and narratives. GER:DB-Hum

*4 units, not given this year*

#### **RELIGST 250B. Depictions of the Buddha**

(Same as RELIGST 350B) The image of the Buddha changes relatively little from its earliest conceptions. The role of the image and the notion of the Buddha do change fundamentally with time and place. South Asian depictions of the Buddha from the earliest symbolic representations to the wrathful and peaceful forms found in the esoteric Buddhism of India and the Himalayas, as well as the changing conceptions of the Buddha to which these depictions are related. GER:DB-Hum

*3-5 units, Win (Luczanits, C)*

#### **RELIGST 251. Readings in Indian Buddhist Texts**

(Same as RELIGST 351) (Graduate students register for 351.) Introduction to Buddhist literature through reading original texts in Sanskrit. Prerequisite: Sanskrit. GER:DB-Hum

*3-5 units, not given this year*

**RELIGST 251A. Buddhist Visions of Paradise**

(Same as RELIGST 351A) Textual and art-historical evidence for the early development in the greater Indian cultural area of the cult of the Buddhas of the present and their paradise worlds ("Pure Land Buddhism"). GER:DB-Hum

3-5 units, Win (Harrison, P)

**RELIGST 253. Mountains, Buddhist Practice, and Religious Studies**

(Same as RELIGST 353) The notion of the sacred mountain. Readings from ethnographic and theoretical works, and primary sources. GER:DB-Hum

3-5 units, not given this year

**RELIGST 254. Recent Contributions to Buddhist Studies**

May be repeated for credit.

4 units, not given this year

**RELIGST 257. Readings in Daoist Texts**

(Same as RELIGST 357) Readings from primary sources. Prerequisite: classical Chinese.

4 units, not given this year

**RELIGST 258. Japanese Buddhist Texts**

(Same as RELIGST 358) Readings in medieval Japanese Buddhist materials. May be repeated for credit. Prerequisite: background in Japanese or Chinese. GER:DB-Hum

3-5 units, Aut (Bielefeldt, C)

**RELIGST 263. Judaism and the Body**

Representations and discourses of the body in Jewish culture; theories of body and ritual. Case studies of circumcision, menstrual impurity, and intersexuality. Readings include classical texts in Jewish tradition and current discussions of these textual traditions. GER:DB-Hum, EC-Gender

4 units, not given this year

**RELIGST 271A. Dante's Spiritual Vision**

Mysticism, poetry, ethics, and theology in Dante's Divine Comedy. Supplementary readings from classical authors such as St. Augustine and St. Thomas, and from modern writers. Students may take 271A without B. GER:DB-Hum

4-5 units, not given this year

**RELIGST 271B. Dante's Spiritual Vision**

Mysticism, poetry, ethics and theology in Dante's Divine Comedy. Brief, supplementary readings from both classical authors, like St. Augustine and St. Thomas, and modern writers. Prerequisite: 271A. GER:DB-Hum

4-5 units, not given this year

**RELIGST 273. Historicism and Its Problems**

(Same as RELIGST 373) The emergence, varieties, and crises of historicism as a world view and approach to the study of religion in the 19th and 20th centuries. The implications of historical reason and historical consciousness for the philosophy of religion, ethics, and theology. GER:DB-Hum

3-5 units, not given this year

**RELIGST 274. From Kant to Kierkegaard**

(Same as RELIGST 374) (Graduate students register for 374.) The main currents of religious thought in Germany from Kant's critical philosophy to Kierkegaard's revolt against Hegelianism. Emphasis is on the theories of religion, the epistemological status of religious discourse, the role of history (especially the figure of Jesus), and the problem of alienation/reconciliation in seminal modern thinkers: Kant, Schleiermacher, Hegel, and Kierkegaard. GER:DB-Hum

3-5 units, not given this year

**RELIGST 275. Kierkegaard and Religious Existentialism**

(Same as RELIGST 375) (Graduate students register for 375.) Close reading of Kierkegaard's magnum opus, *Concluding Unscientific Postscript to Philosophical Fragments*, in its early 19th-century context. GER:DB-Hum

3-5 units, not given this year

**RELIGST 278. Heidegger: Confronting the Ultimate**

(Same as RELIGST 378) Heidegger's work on meaning, the self, and the sacred. Texts include *Being and Time*, courses and opuscula up to 1933, the *Letter on Humanism*, and *Contributions of Philosophy*. GER:DB-Hum

3-5 units, Win (Sheehan, T)

**RELIGST 279. Heidegger and the Holy**

(Same as RELIGST 379) Heidegger's philosophy as opening a new door onto the possibility of experiencing the sacred after the collapse of traditional metaphysical theology. A close reading of *Being and Time* as an introduction to the question of the holy.

4 units, not given this year

**RELIGST 280. Schleiermacher**

(Same as RELIGST 380) Idealist philosopher, Moravian pietist, early German Romantic, co-founder of the University of Berlin, head preacher at Trinity Church, translator of Plato's works, Hegel's opponent, pioneer in modern hermeneutics, father of modern theology. Schleiermacher's controversial reconception of religion and theology in its philosophical context. GER:DB-Hum

3-5 units, not given this year

**RELIGST 290. Majors Seminar**

Required of all majors and joint majors. The study of religion reflects upon itself. Representative modern and contemporary attempts to "theorize," and thereby understand, the phenomena of religion in anthropology, psychology, sociology, cultural studies, and philosophy. WIM. WIM

5 units, Win (Socksness, B)

**RELIGST 297. Senior Essay/Honors Essay Research**

Guided by faculty adviser. May be repeated for credit. Prerequisite: consent of instructor and department.

3-5 units, Aut (Staff), Win (Staff), Spr (Staff)

**RELIGST 298. Senior Colloquium**

For Religious Studies majors writing the senior essay or honors thesis. Students present work in progress, and read and respond to others. Approaches to research and writing in the humanities.

5 units, Spr (Pitkin, B)

**GRADUATE COURSES IN RELIGIOUS STUDIES****RELIGST 219. Buddhism and Death**

The role of pre and post mortem practices in ancient and modern Buddhist traditions; examples from India, China, and Japan. How the clergy and laity conceived of the process of dying, and how those beliefs were transformed into rituals.

4 units, not given this year

**RELIGST 301. Classical Islamic Law**

(Same as RELIGST 201) Emphasis is on methods of textual interpretation. History of premodern Islamic law, including origins, formation of schools of law, and social and political contexts. Laws of sale, marriage, divorce, and the obligation to forbid wrong.

3-5 units, Aut (Sadeghi, B)

**RELIGST 303. Myth, Place, and Ritual in the Study of Religion**

(Same as RELIGST 203) Sources include: ethnographic texts and theoretical writings; the approaches of Charles Long, Jonathan Z. Smith, Victor Turner, Michael D. Jackson, and Wendy Doniger; and lived experiences as recounted in Judith Sherman's *Say the Name: A Survivor's Tale in Prose and Poetry*, Jackson's *At Home in the World*, Marie Cardinal's *The Words to Say It*, and John Phillip Santos' *Places Left Unfinished at the Time of Creation*.

3-5 units, not given this year

**RELIGST 304A. Theories and Methods**

Required of graduate students in Religious Studies. Approaches to the study of religion. Prerequisite: consent of instructor.

4 units, Aut (Yearley, L)

**RELIGST 304B. Theories and Methods**

Required of graduate students in Religious Studies. Approaches to the study of religion. Prerequisite: consent of instructor.

4 units, not given this year

**RELIGST 308. Medieval Japanese Buddhism**

Japanese religion and culture, including Buddhism, Shinto, popular religion, and new religions, through the medium of film.

3-5 units, not given this year

**RELIGST 312. Buddhist Studies Proseminar**

Research methods and materials for the study of Buddhism. May be repeated for credit. Prerequisite: reading knowledge of Chinese or Japanese.

1-5 units, not given this year

**RELIGST 317. Japanese Studies of Religion in China**

(Same as RELIGST 217) (Graduate students register for 317.) Readings in Japanese secondary sources on Chinese religions.

3 units, not given this year

**RELIGST 321. The Talmud**

(Same as RELIGST 221) Strategies of interpretation, debate, and law making. Historical contexts. Prerequisite: Hebrew.

4 units, not given this year

**RELIGST 321A. Philology of Rabbinic Literature**

(Same as RELIGST 221A) The genesis of rabbinic texts as texts. Evolution from oral stage to manuscript to printed text. Questions of redaction versus edition. Focus on Palestinian and Babylonian Talmud, with excursions into midrashic texts. Prerequisite: strong background in Hebrew. Knowledge of Aramaic preferred.

3-5 units, Aut (Fonrobert, C; Balberg, M)

**RELIGST 321B. The Talmud as Literature**

(Same as RELIGST 221B) In what sense can Talmud be studied as literature? Which voices can be identified? Concepts of author, editor, or redactor. The basic textual units of Talmud: sugya, chapter, and tractate. The sugya as literary genre. The aesthetic of talmudic dialectics. Prerequisite: Strong Hebrew, Aramaic preferred.

3-5 units, Spr (Fonrobert, C)

**RELIGST 322B. Sufism Seminar**

(Same as RELIGST 222B) Sufism through original texts and specialized scholarship. Prerequisite: ability to read at least one major language of Islamic religious literature (Arabic, Persian, Turkish, Urdu).

3-5 units, Aut (Bashir, S)

**RELIGST 322C. Debauchery and asceticism**

(Same as RELIGST 222C) Arabic texts written by and about early Muslim figures famous either for their limitless self-indulgence or their rigorous self-denial. Language and style of these texts, their implied or explicit dialogue with religious values, and their possible relation to each other. Questions of representation, self-representation, and biographical fallacy. Intended for students with reading knowledge of Arabic.

3-5 units, Win (Cooperson, M)

**RELIGST 323A. The Arabic Qur'an**

(Same as RELIGST 223A) Early history, language, structure, style, chronology, motifs, themes, and interpretation. Knowledge of Arabic required.

3-5 units, Win (Sadeghi, B)

**RELIGST 324. Classical Islamic Texts**

(Same as RELIGST 224) Premodern Islamic scholarship. Genre-specific historical research methods. The hadith literature, tafsir, biographical dictionaries, fiqh, tarikh, and geographical works. Prerequisite: reading knowledge of Arabic.

3-5 units, not given this year

**RELIGST 324B. Unveiling the Sacred: Explorations in Islamic Religious Imagination**

(Same as RELIGST 224B) Poetry and prose in translation as well as historical studies. Islamic movements invested in the idea that the sensory world has a hidden or esoteric counterpart that can be understood or experienced through following particular religious programs. Various forms of Shi'ism and Sufism, millenarian and apocalyptic movements, the Nation of Islam and its offshoots. Philosophical propositions, historical contexts, and the role of ritual in the construction of religious systems.

3-5 units, Spr (Bashir, S)

**RELIGST 326. Philosophy and Kabbalah in Jewish Society: Middle Ages and Early Modern Period**

(Same as RELIGST 226) Characteristics of religious philosophy from Saadia Gaon to Maimonides, Jewish opposition to and support of philosophy in the medieval Christian and Muslim world, texts from the early development of Kabbalah, the relationship between philosophy and Kabbalah, and conflicting views of Kabbalah from the 16th through 18th centuries.

5 units, not given this year

**RELIGST 326A. Judaism and Hellenism**

(Same as RELIGST 226A) interactions and conflicts between Jews and Greeks in the centuries following the conquests of Alexander the Great and the cultural/religious repercussions of their encounter. In what ways were Jews influenced by Greek culture? In what

ways, and for what reasons, did they resist it? And how the interaction of these cultures shape the subsequent development of Judaism and Christianity? Jewish texts in the Greco-Roman period, including Jewish-Greek writers like Philo of Alexandria, the Apocrypha, the Dead Sea Scrolls, selected writings from the New Testament, and the Passover Haggadah.

3-5 units, Win (Weitzman, S)

**RELIGST 327. The Qur'an**

(Same as RELIGST 227) Early history, themes, structure, chronology, and premodern interpretation. Relative chronology of passages.

5 units, not given this year

**RELIGST 328S. The Study of the Midrash**

Two-week block seminar; four sessions. Talmudic philology; development and transmission of the Talmudic text and manuscripts. Relationship between Midrash and Mishnah and between Mishnah and Tosefta; development of talmudic sugiot; relationship between the Babylonian and Palestinian Talmud.

1-2 units, offered occasionally

**RELIGST 338. Christian Neo-Platonism, East and West**

(Same as RELIGST 238) Christianity's shift to neo-Platonic Greek philosophical categories and its significance for contemporary spirituality. Readings from Plotinus, Proclus, Greek fathers such as Pseudo-Dionysus, and from Ambrose and Augustine.

3-5 units, not given this year

**RELIGST 339. Luther and the Reform of Western Christianity**

(Same as RELIGST 239) Luther's theology, ethics, biblical interpretation, and social reforms and their significance for the remaking of Western Christianity. Readings include Luther's own writings and secondary sources about Luther and his world.

3-5 units, not given this year

**RELIGST 347. Chinese Buddhist Texts**

(Same as RELIGST 247) From the Han Dynasty onwards, including sutra translations, prefaces, colophons, and biographies. Prerequisite: reading competence in Chinese.

3-5 units, Aut (Harrison, P)

**RELIGST 348. Chinese Buddhism in World Historical Perspective**

(Same as RELIGST 248) Shared cosmologies, trade routes, and political systems. Prerequisite: background in Chinese or Japanese.

3-5 units, not given this year

**RELIGST 348A. Chinese Buddhism Beyond the Great Wall**

(Same as RELIGST 248A) The thought, practice, and cultural resonance of the sorts of originally Chinese Buddhism that flourished to the north and northwest of China proper during the two to three centuries following the fall of the Tang - i.e., under the Khitan Liao (907-1125) and the Tangut Xixia (1032-1227) dynasties - with special emphasis on the later fortunes of the Huayan, Chan, and Mijiao (Esoteric) traditions. Prerequisite: reading knowledge of Chinese.

3-5 units, Spr (Gimello, R)

**RELIGST 349. Meditation and Mythology in Chinese Buddhism**

Readings in Chinese texts and English scholarly literature on issues such as specific techniques and hagiographical imagery in Chinese Buddhist traditions of self-cultivation. Prerequisite: background in Chinese or Japanese.

3-5 units, not given this year

**RELIGST 350. Modern Western Religious Thought Proseminar**

Selected topics in recent and contemporary religious thought. May be repeated for credit.

1-5 units, Win (Sockness, B)

**RELIGST 350B. Depictions of the Buddha**

(Same as RELIGST 250B) The image of the Buddha changes relatively little from its earliest conceptions. The role of the image and the notion of the Buddha do change fundamentally with time and place. South Asian depictions of the Buddha from the earliest symbolic representations to the wrathful and peaceful forms found in the esoteric Buddhism of India and the Himalayas, as well as the changing conceptions of the Buddha to which these depictions are related.

3-5 units, Win (Luczanits, C)

**RELIGST 351. Readings in Indian Buddhist Texts**

(Same as RELIGST 251) (Graduate students register for 351.) Introduction to Buddhist literature through reading original texts in Sanskrit. Prerequisite: Sanskrit.

3-5 units, not given this year

**RELIGST 351A. Buddhist Visions of Paradise**

(Same as RELIGST 251A) Textual and art-historical evidence for the early development in the greater Indian cultural area of the cult of the Buddhas of the present and their paradise worlds ("Pure Land Buddhism").

3-5 units, Win (Harrison, P)

**RELIGST 353. Mountains, Buddhist Practice, and Religious Studies**

(Same as RELIGST 253) The notion of the sacred mountain. Readings from ethnographic and theoretical works, and primary sources.

3-5 units, not given this year

**RELIGST 357. Readings in Daoist Texts**

(Same as RELIGST 257) Readings from primary sources. Prerequisite: classical Chinese.

4 units, not given this year

**RELIGST 358. Japanese Buddhist Texts**

(Same as RELIGST 258) Readings in medieval Japanese Buddhist materials. May be repeated for credit. Prerequisite: background in Japanese or Chinese.

3-5 units, Aut (Bielefeldt, C)

**RELIGST 359A. Religion and Performance**

(Same as RELIGST 159A) What happens when religion is viewed through the lens of performance? Texts become dramas, songs, recitations, oral commentaries, dances, movies, and political appropriations. Beliefs become embodied enactments; doctrine puts on a costume and indulges in role play. Approaches to performance theory through religious enactments such as ritual, prayer, festival, drama, music, and film. Most examples from S. Asian religions; students may undertake research projects into other cultures and traditions.

4 units, not given this year

**RELIGST 370. Comparative Religious Ethics**

The difference that the word religious makes in religious ethics and how it affects issues of genre. Theoretical analyses with examples from W. and E. Asia. Prerequisite: consent of instructor.

4 units, Win (Yearley, L)

**RELIGST 373. Historicism and Its Problems**

(Same as RELIGST 273) The emergence, varieties, and crises of historicism as a world view and approach to the study of religion in the 19th and 20th centuries. The implications of historical reason and historical consciousness for the philosophy of religion, ethics, and theology.

3-5 units, not given this year

**RELIGST 374. From Kant to Kierkegaard**

(Same as RELIGST 274) (Graduate students register for 374.) The main currents of religious thought in Germany from Kant's critical philosophy to Kierkegaard's revolt against Hegelianism. Emphasis is on the theories of religion, the epistemological status of religious discourse, the role of history (especially the figure of Jesus), and the problem of alienation/reconciliation in seminal modern thinkers: Kant, Schleiermacher, Hegel, and Kierkegaard.

3-5 units, not given this year

**RELIGST 375. Kierkegaard and Religious Existentialism**

(Same as RELIGST 275) (Graduate students register for 375.) Close reading of Kierkegaard's magnum opus, *Concluding Unscientific Postscript to Philosophical Fragments*, in its early 19th-century context.

3-5 units, not given this year

**RELIGST 378. Heidegger: Confronting the Ultimate**

(Same as RELIGST 278) Heidegger's work on meaning, the self, and the sacred. Texts include *Being and Time*, courses and opuscula up to 1933, the *Letter on Humanism*, and *Contributions to Philosophy*.

3-5 units, Win (Sheehan, T)

**RELIGST 379. Heidegger and the Holy**

(Same as RELIGST 279) Heidegger's philosophy as opening a new door onto the possibility of experiencing the sacred after the

collapse of traditional metaphysical theology. A close reading of *Being and Time* as an introduction to the question of the holy.

4 units, not given this year

**RELIGST 380. Schleiermacher**

(Same as RELIGST 280) Idealist philosopher, Moravian pietist, early German Romantic, co-founder of the University of Berlin, head preacher at Trinity Church, translator of Plato's works, Hegel's opponent, pioneer in modern hermeneutics, father of modern theology. Schleiermacher's controversial reconception of religion and theology in its philosophical context.

3-5 units, not given this year

**RELIGST 389. Individual Work for Graduate Students**

May be repeated for credit. Prerequisite: consent of instructor.

1-15 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**RELIGST 390. Teaching in Religious Studies**

Required supervised internship for PhDs.

3-5 units, Aut (Staff), Win (Staff), Spr (Staff)

**RELIGST 391. Pedagogy**

Required of Ph.D. students. May be repeated for credit.

1 unit, Aut (Rosenberg, J)

**RELIGST 392. Candidacy Essay**

Prerequisite: consent of graduate director. May be repeated for credit.

1-15 units, Aut (Staff), Win (Staff), Spr (Staff)

**RELIGST 395. Master of Arts Thesis**

2-9 units, Aut (Staff), Win (Staff), Spr (Staff)

**RELIGST 399. Recent Works in Religious Studies**

Readings in secondary literature for Religious Studies doctoral students. May be repeated for credit.

1-2 units, Spr (Fonrobert, C)

## RUSSIAN, EAST EUROPEAN, AND EURASIAN STUDIES (REES)

### UNDERGRADUATE COURSES IN RUSSIAN, EAST EUROPEAN, AND EURASIAN STUDIES

**REES 35. Documentary Films of Central Asia: Two Epochs and National Identity Formation**

Films with English subtitles from Tajikistan, Uzbekistan, Kazakhstan, Kyrgyzstan, and Turkmenistan. May be repeated once for credit.

1-2 units, Win (Kunanbaeva, A), Spr (Staff)

**REES 105. Central and East European Politics**

(Same as REES 205) Focus is on how the states of Central and East Europe, including the Baltic states, have moved from communism and the Soviet Bloc to democracy, NATO and the EU. Topics include the communist legacy, transitions and their legacies, ethnic issues, and the evolution of economic and social policies, and the comparison of democratization processes in these countries to democracies in other regions, such as Latin America and southern Europe. GER:DB-SocSci

5 units, not given this year

**REES 130. With God in Russia: Orthodox Christianity in the 19th and 20th Centuries**

(Same as REES 330) The experience of religion, particularly Orthodoxy, under tsars and commissars. Religion as a lived experience; practice and belief in the provinces and villages, intertwining of religion and folk customs (the so-called double faith); condition of the Church before and after the Revolutions of 1917; religion under Soviet control; and liberation of the Church since the collapse of the Soviet Union.

4-5 units, not given this year

## GRADUATE COURSES IN RUSSIAN, EAST EUROPEAN, AND EURASIAN STUDIES

### REES 200. Current Issues in Russian, East European, and Eurasian Studies

Enrollment limited to REES students. Scholars present analyses of methodologies, challenges, and current issues in the study of Russia, E. Europe, and Eurasia.

1 unit, Aut (Kollmann, J), Win (Kollmann, J), Spr (Kollmann, J)

### REES 205. Central and East European Politics

(Same as REES 105) Focus is on how the states of Central and East Europe, including the Baltic states, have moved from communism and the Soviet Bloc to democracy, NATO and the EU. Topics include the communist legacy, transitions and their legacies, ethnic issues, and the evolution of economic and social policies, and the comparison of democratization processes in these countries to democracies in other regions, such as Latin America and southern Europe.

5 units, not given this year

### REES 299. Directed Reading

1-12 units, Aut (Safra, G), Win (Staff), Spr (Staff)

### REES 320. State and Nation Building in Central Asia

Issues of identity, development, and security following the dissolution of the Soviet Union and the emergence of independent states in Central Asia and the Southern Caucasus. Topics include the impact of 9/11, the spread of radical Islamist movements in the region, its growing role as a transit route for drugs, weapons, and possibly nuclear materials, the impact of the Soviet legacy, the nature of political and economic transformations, relations with neighboring countries, security challenges, and options facing U.S. policy makers.

3-5 units, Win (Lapidus, G)

### REES 330. With God in Russia: Orthodox Christianity in the 19th and 20th Centuries

(Same as REES 130) The experience of religion, particularly Orthodoxy, under tsars and commissars. Religion as a lived experience; practice and belief in the provinces and villages, intertwining of religion and folk customs (the so-called double faith); condition of the Church before and after the Revolutions of 1917; religion under Soviet control; and liberation of the Church since the collapse of the Soviet Union.

4-5 units, not given this year

## SCIENCE, TECHNOLOGY, AND SOCIETY (STS)

### UNDERGRADUATE COURSES IN SCIENCE, TECHNOLOGY, AND SOCIETY

#### STS 101. Science, Technology, and Contemporary Society

(Same as ENGR 130, STS 201) Key social, cultural, and values issues raised by contemporary scientific and technological developments; distinctive features of science and engineering as socio-technical activities; major influences of scientific and technological developments on 20th-century society, including transformations and problems of work, leisure, human values, the fine arts, and international relations; ethical conflicts in scientific and engineering practice; and the social shaping and management of contemporary science and technology. GER:DB-SocSci

4-5 units, Aut (McGinn, R)

#### STS 101Q. Technology in Contemporary Society

(S,Sem) Stanford Introductory Seminar. Preference to sophomores. Introduction to the STS field. The natures of science and technology and their relationship, what is most distinctive about these forces today, and how they have transformed and been affected by contemporary society. Social, cultural, and ethical issues raised by recent scientific and technological developments. Case studies from areas such as information technology and biotechnology, with emphasis on the contemporary U.S. Unexpected influences of science and technology on contemporary society and how social forces shape scientific and technological enterprises and their

products. Enrollment limited to 12. GER:DB-SocSci

4 units, Aut (McGinn, R)

#### STS 110. Ethics and Public Policy

(Same as MS&E 197, PUBLPOL 103B) Ethical issues in science- and technology-related public policy conflicts. Focus is on complex, value-laden policy disputes. Topics: the nature of ethics and morality; rationales for liberty, justice, and human rights; and the use and abuse of these concepts in policy disputes. Case studies from biomedicine, environmental affairs, technical professions, communications, and international relations. GER:DB-Hum, EC-EthicReas, WIM

5 units, Win (McGinn, R)

#### STS 112. Ten Things: An Archaeology of Design

(Same as CLASSART 113, CLASSART 213) Connections among science, technology, society and culture by examining the design of a prehistoric hand axe, Egyptian pyramid, ancient Greek perfume jar, medieval castle, Wedgwood teapot, Edison's electric light bulb, computer mouse, Sony Walkman, supersonic aircraft, and BMW Mini. Interdisciplinary perspectives include archaeology, cultural anthropology, science studies, history and sociology of technology, cognitive science, and evolutionary psychology. GER:DB-SocSci

3-5 units, Win (Shanks, M)

#### STS 115. Ethical Issues in Engineering

(Same as ENGR 131) Moral rights and responsibilities of engineers in relation to society, employers, colleagues, and clients; cost-benefit-risk analysis, safety, and informed consent; the ethics of whistle blowing; ethical conflicts of engineers as expert witnesses, consultants, and managers; ethical issues in engineering design, manufacturing, and operations; ethical issues arising from engineering work in foreign countries; and ethical implications of the social and environmental contexts of contemporary engineering. Case studies, guest practitioners, and field research. Limited enrollment. GER:DB-Hum

4 units, alternate years, not given this year

#### STS 144. Game Studies: Issues in Design, Technology, and Player Creativity

What can be learned about innovation from digital games? Digital game technologies, communities, and cultures. Topics include game design, open source ideas and modding, technology studies, player/consumer-driven innovation, fan culture, transgressive play, and collaborative co-creation drawn from virtual worlds and online games.

4 units, not given this year

#### STS 180. Imagining the Computer, Wiring the World

(Same as STS 280) The theme of revolution in the popular imagination about computing. How people imagine themselves as members of a global network society, navigating cyberspace and pioneering a bold, new information age. But where did modern information technology come from? Has it brought about revolution, and if so for whom? The cultural and political visions that shaped modern computing, and how the resulting technology has shaped a globalizing sociopolitical order.

4 units, Spr (Slayton, R)

#### STS 190. Junior Honors Seminar

For juniors intending to pursue honors in STS or a related discipline. Goal is to identify a research problem and identify key components of honors research and thesis writing such as literature reviews, methodologies, theoretical frameworks, and writing standards.

3-4 units, Win (Slayton, R)

#### STS 199. Individual Work

1-5 units, Aut (Staff), Win (Staff), Spr (Staff)

#### STS 200. Senior Colloquium

Analytical and theoretical texts treating the natures and interplay of science, technology, and society. Prerequisite: STS major with senior standing and four STS core courses, or consent of instructor.

4 units, Win (Roberts, E; Windham, P)

#### STS 210. Ethics, Science, and Technology

Ethical issues raised by advances in science and technology. Topics: biotechnology including agriculture and reproduction, the built environment, energy technologies, and information technology. Prerequisite: 110 or another course in ethics. Limited enrollment. GER:DB-Hum

4 units, Spr (McGinn, R)

**STS 290A. Senior Honors Seminar**

For seniors pursuing STS honors. Goal is to write a literature review with adviser consultation.

*1-5 units, Aut (Slayton, R)*

**STS 290B. Senior Honors Seminar**

For seniors pursuing STS honors. Goal is to analyze data and write up results.

*1-5 units, Win (Slayton, R)*

**STS 290C. Senior Honors Seminar**

For seniors pursuing STS honors. Goal is to complete final thesis.

*1-5 units, Spr (Slayton, R)*

## GRADUATE COURSES IN SCIENCE, TECHNOLOGY, AND SOCIETY

**STS 201. Science, Technology, and Contemporary Society**

(Same as ENGR 130, STS 101) Key social, cultural, and values issues raised by contemporary scientific and technological developments; distinctive features of science and engineering as socio-technical activities; major influences of scientific and technological developments on 20th-century society, including transformations and problems of work, leisure, human values, the fine arts, and international relations; ethical conflicts in scientific and engineering practice; and the social shaping and management of contemporary science and technology.

*4-5 units, Aut (McGinn, R)*

**STS 280. Imagining the Computer, Wiring the World**

(Same as STS 180) The theme of revolution in the popular imagination about computing. How people imagine themselves as members of a global network society, navigating cyberspace and pioneering a bold, new information age. But where did modern information technology come from? Has it brought about revolution, and if so for whom? The cultural and political visions that shaped modern computing, and how the resulting technology has shaped a globalizing sociopolitical order.

*4 units, Spr (Slayton, R)*

**STS 299. Advanced Individual Work**

(Staff)

*1-5 units, Aut (Staff), Win (Staff), Spr (Staff)*

## SLAVIC GENERAL (SLAVGEN)

### UNDERGRADUATE COURSES IN SLAVIC GENERAL

**SLAVGEN 13N. Russia and the Russian Experience**

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. The political and cultural history of Russia and the Russians: prominent persons, prominent events, and how they shape current attitudes and society. Short works by Russian authors. GER:DB-Hum

*3-4 units, Win (Schupbach, R)*

**SLAVGEN 77Q. Russia's Weird Classic: Nikolai Gogol**

(S,Sem) Stanford Introductory Seminar. Preference to sophomores. The work and life of Nikolai Gogol, the eccentric founder of Fantastic Realism. The relationship between romanticism and realism in Russian literature, and between popular Ukrainian culture and high Russian and W. European traditions in Gogol's oeuvre. The impact of his work on 20th-century modernist literature, music, and art, including Nabokov, literature of the absurd, Shostakovich, Meyerhold, and Chagall. GER:DB-Hum

*3-4 units, Aut (Fleishman, L)*

**SLAVGEN 110. The Gogol Bordello: Ukraine as a Meeting House of Cultures**

(Same as SLAVGEN 210) The cohabitation of authors and cultural geography in multiethnic Ukraine. Comparison of Ukrainian texts, images of Ukraine and Ukrainians by their Polish, Jewish, German, and Russian cohabitants. Possible authors include: Andruhovich, Aleichem, Babel, Celan, Franko, Gogol, Lewycka, Mickiewicz, Shevchenko, Pushkin, Schulz, Ukraina, and Zabuzhko. GER:DB-Hum

*3-5 units, not given this year*

**SLAVGEN 122. Yiddish Story**

(Same as SLAVGEN 222) The humor, drama, anger, and artistry of modern E. European and American Yiddish writers including Sholem Aleichem, I. L. Peretz, Isaac Bashevis Singer, Chaim Grade, and Yankev Glatshteyn. In English. GER:DB-Hum, EC-GlobalCom

*5 units, not given this year*

**SLAVGEN 123. The Yiddish Novel**

(Same as SLAVGEN 223) How Yiddish novels reveal changes in modern Jewish life and literature in Europe and the U.S. The influences of folklore, traditional Jewish culture, and European literature. Works by Isaac and Joshua Singer, Joseph Opatoshu, Der Nister, Chava Rosenfarb, Sholem Asch, and David Bergelson. Readings in English; optional sessions for close readings in Yiddish. GER:DB-Hum

*3-4 units, not given this year*

**SLAVGEN 133. Poles and Others: Literature and History in Modern Poland**

(Same as SLAVGEN 233) The physical and cultural territories of the former Polish-Lithuanian Commonwealth have long been objects of contest. The 20th century witnessed two or three rebirths of Poland and one or two deaths; a belated modernization of Polish society; the final inclusion of Polish-speaking peasants and burghers in a Polish national identity; and the exclusion of Jews, Germans, Lithuanians, Belarusians, Ukrainians, and others from the state and participation in a partially shared culture. GER:DB-Hum

*3-4 units, not given this year*

**SLAVGEN 141. Staging the Revolution: Russian Theater and Society, 1917-1937**

(Same as SLAVGEN 241) Between 1917 and 1937, artistic experimentation in the Russian theater coincided with political and social changes in Russian society. Modernist artists interpreted the revolution as an artistic possibility to demolish conventions of representation. Mass festivals, circus, and street performances replaced the old theater. In the time of the Great Terror and staged trials, theater and opera remained among the leading arts, but state patronage caused a major reorientation of artistic practices. Readings include plays by Mayakovsky, Bulgakov, Babel, Tretiakov, and Erdman. Readings in English. GER:DB-Hum

*4 units, not given this year*

**SLAVGEN 145. Age of Experiment: From Pushkin to Gogol**

(Same as SLAVGEN 245) The Russian leap into European culture after the Napoleonic Wars and the formative period of Russian literature. Readings seen as local literary developments and contemporary European trends including Pushkin's Eugene Onegin, The Belkin Tales, and The Captain's Daughter; Lermontov's Hero of Our Time; and Gogol's Petersburg Tales and Dead Souls. GER:DB-Hum, EC-GlobalCom

*3-4 units, Aut (Greenleaf, M)*

**SLAVGEN 146. The Great Russian Novel: History and Other Theories of Time and Action**

(Same as SLAVGEN 246) Connections of philosophy to literary form in Turgenev's Fathers and Sons, Tolstoy's War and Peace, Dostoevsky's The Brothers Karamazov, and Chekov's The Cherry Orchard, and other stories. GER:DB-Hum, EC-GlobalCom

*3-4 units, Win (Greenleaf, M)*

**SLAVGEN 148. Dissent and Disenchantment: A Survey of Russian Literature and Culture, 1953 to the Present**

(Same as SLAVGEN 248) From the death of Stalin to post-communist Russia. Literature of the thaw and de-Stalinization, official and unofficial literature of dissent, samizdat, village and urban prose, literature of the new emigration, late Soviet underground, sots-art, perestroika, and post-communist literature and culture. Texts in English translation. For graduate credit for research paper, register for 399. GER:DB-Hum, EC-GlobalCom

*3-4 units, Spr (Staff)*

**SLAVGEN 150. Countercultures in Conversation: Russian and American Rock Music and Protest Poetry**

(Same as SLAVGEN 250) Non-conformist protest movements in contemporary Russian poetry; historical and cultural context; and comparison with similar processes in American social and cultural life. Sources include Russian and American poetry, songs, and DVDs. Fourth unit for readings in Russian. GER:DB-Hum

*3-4 units, not given this year*

**SLAVGEN 151. Dostoevsky and His Times**

(Same as COMPLIT 119, COMPLIT 219, SLAVGEN 251) Open to juniors, seniors, and graduate students. Major works in English translation with reference to related developments in Russian and European culture, literary criticism, and intellectual history. GER:DB-Hum

4 units, Win (Frank, J)

**SLAVGEN 153. Russian Jewish Literature**

(Same as SLAVGEN 253) Russian Jewish experience inspired books and films in Hebrew, Yiddish, Russian and English that reveal a world of conflict, humor and beauty. From the mid-19th century to the 21st century. Authors include Haim Nahman Bialik, Sholem Aleichem, Isaac Babel, Osip Mandelstam, Joseph Brodsky, Leonid Tsypkin, Ludmila Ulitskaia, Gary Shteyngardt. GER:DB-Hum

3-4 units, not given this year

**SLAVGEN 162. Gender Images in Film**

(Same as SLAVGEN 262) Film creates permanent new images of femininity. One of its conscious prerequisites is the notion of social stereotypes. The development of enduring images of the film heroine, 1914-90, through a comparison of the Russian, American, and W. European cinema, and analytical approaches to them from feminist film theory. GER:EC-Gender

3 units, not given this year

**SLAVGEN 163. Gender in Postwar Russian Culture**

(Same as SLAVGEN 263) Issues of femininity and masculinity in Russian literature, film, and popular culture from the 40s to the present. Readings include fiction, memoirs, poetry, drama, and theoretical works in gender studies. GER:EC-Gender

3-4 units, not given this year

**SLAVGEN 165. Poetry, Painting, and Music of the Russian Avant Garde**

(Same as SLAVGEN 265) Interrelationships between poetry and other arts in Russia, 1905-30. The pursuit of synthesis of arts and the modernist agenda of life creation and immortality. Parallel developments in literature, painting, and music, and style and poetics. Russian modernist poetry in the context of changes in the language of visual arts and music. Women poets and artists. Native sources and Western influences; non-Russian elements and transnational tendencies. The impact of scientific discoveries and technological inventions on artistic experimentation.

3-4 units, not given this year

**SLAVGEN 169. Mermaids, the Firebird, and the Singing Tree: Russian Folklore and Its Theory**

(Same as SLAVGEN 269) Russian culture through its oral folklore and music. Theory, current data and its interpretation, how scholars collect and understand traditional oral poetry, and the lessons of folklore. GER:DB-Hum

3-5 units, not given this year

**SLAVGEN 181. Philosophy and Literature**

(Same as CLASSGEN 81, COMPLIT 181, ENGLISH 81, FRENCH 181, ITALGEN 181, GERGEN 181) Required gateway course for Philosophical and Literary Thought; crosslisted in departments sponsoring the Philosophy and Literature track: majors should register in their home department; non-majors may register in any sponsoring department. Introduction to major problems at the intersection of philosophy and literature. Issues may include authorship, selfhood, truth and fiction, the importance of literary form to philosophical works, and the ethical significance of literary works. Texts include philosophical analyses of literature, works of imaginative literature, and works of both philosophical and literary significance. Authors may include Plato, Montaigne, Nietzsche, Borges, Beckett, Barthes, Foucault, Nussbaum, Walton, Nehamas, Pavel, and Pippin. GER:DB-Hum

4-5 units, Win (Anderson, L; Landy, J)

**GRADUATE COURSES IN SLAVIC GENERAL****SLAVGEN 210. The Gogol Bordello: Ukraine as a Meeting House of Cultures**

(Same as SLAVGEN 110) The cohabitation of authors and cultural geography in multiethnic Ukraine. Comparison of Ukrainian texts, images of Ukraine and Ukrainians by their Polish, Jewish, Ger-

man, and Russian cohabitants. Possible authors include : Andruk-hovych, Aleichem, Babel, Celan, Franko, Gogol, Lewycka, Mickiewicz, Shevchenko, Pushkin, Schulz, Ukraina, and Zabuzhko.

3-5 units, not given this year

**SLAVGEN 221. Modernism and the Jewish Voice in Europe**

(Same as COMPLIT 247, GERGEN 221A) Some of the most haunting literary voices of the 20th century emerged from the Jewish communities of Eastern and Central Europe. The Jewishness of the modernists is thematized, asking whether it contributed to shared attitudes toward text, history, or identity. Their works are situated in specific linguistic traditions: Yiddish, Hebrew, Russian, Polish, or German. Primary readings from Ansky, Bialik, Mandelstam, Babel, Schulz, Kafka, Celan; secondary readings in history, E. European literature, and theory, including Marx, Freud, Benjamin, and Arendt.

3-4 units, Spr (Eshel, A; Safran, G)

**SLAVGEN 222. Yiddish Story**

(Same as SLAVGEN 122) The humor, drama, anger, and artistry of modern E. European and American Yiddish writers including Sholem Aleichem, I. L. Peretz, Isaac Bashevis Singer, Chaim Grade, and Yankev Glatshteyn. In English.

5 units, not given this year

**SLAVGEN 223. The Yiddish Novel**

(Same as SLAVGEN 123) How Yiddish novels reveal changes in modern Jewish life and literature in Europe and the U.S. The influences of folklore, traditional Jewish culture, and European literature. Works by Isaac and Joshua Singer, Joseph Opatoshu, Der Nister, Chava Rosenfarb, Sholem Asch, and David Bergelson. Readings in English; optional sessions for close readings in Yiddish.

3-4 units, not given this year

**SLAVGEN 233. Poles and Others: Literature and History in Modern Poland**

(Same as SLAVGEN 133) The physical and cultural territories of the former Polish-Lithuanian Commonwealth have long been objects of contest. The 20th century witnessed two or three rebirths of Poland and one or two deaths; a belated modernization of Polish society; the final inclusion of Polish-speaking peasants and burghers in a Polish national identity; and the exclusion of Jews, Germans, Lithuanians, Belarusians, Ukrainians, and others from the state and participation in a partially shared culture.

3-4 units, not given this year

**SLAVGEN 241. Staging the Revolution: Russian Theater and Society, 1917-1937**

(Same as SLAVGEN 141) Between 1917 and 1937, artistic experimentation in the Russian theater coincided with political and social changes in Russian society. Modernist artists interpreted the revolution as an artistic possibility to demolish conventions of representation. Mass festivals, circus, and street performances replaced the old theater. In the time of the Great Terror and staged trials, theater and opera remained among the leading arts, but state patronage caused a major reorientation of artistic practices. Readings include plays by Mayakovsky, Bulgakov, Babel, Tretiakov, and Erdman. Readings in English.

4 units, not given this year

**SLAVGEN 245. Age of Experiment: From Pushkin to Gogol**

(Same as SLAVGEN 145) The Russian leap into European culture after the Napoleonic Wars and the formative period of Russian literature. Readings seen as local literary developments and contemporary European trends including Pushkin's Eugene Onegin, The Belkin Tales, and The Captain's Daughter; Lermontov's Hero of Our Time; and Gogol's Petersburg Tales and Dead Souls.

3-4 units, Aut (Greenleaf, M)

**SLAVGEN 246. The Great Russian Novel: History and Other Theories of Time and Action**

(Same as SLAVGEN 146) Connections of philosophy to literary form in Turgenev's Fathers and Sons, Tolstoy's War and Peace, Dostoevsky's The Brothers Karamazov, and Chekov's The Cherry Orchard, and other stories.

3-4 units, Win (Greenleaf, M)

**SLAVGEN 248. Dissent and Disenchantment: A Survey of Russian Literature and Culture, 1953 to the Present**

(Same as SLAVGEN 148) From the death of Stalin to post-communist Russia. Literature of the thaw and de-Stalinization,

official and unofficial literature of dissent, samizdat, village and urban prose, literature of the new emigration, late Soviet underground, sots-art, perestroika, and post-communist literature and culture. Texts in English translation. For graduate credit for research paper, register for 399.

3-4 units, Spr (Staff)

**SLAVGEN 250. Countercultures in Conversation: Russian and American Rock Music and Protest Poetry**

(Same as SLAVGEN 150) Non-conformist protest movements in contemporary Russian poetry; historical and cultural context; and comparison with similar processes in American social and cultural life. Sources include Russian and American poetry, songs, and DVDs. Fourth unit for readings in Russian.

3-4 units, not given this year

**SLAVGEN 251. Dostoevsky and His Times**

(Same as COMPLIT 119, COMPLIT 219, SLAVGEN 151) Open to juniors, seniors, and graduate students. Major works in English translation with reference to related developments in Russian and European culture, literary criticism, and intellectual history.

4 units, Win (Frank, J)

**SLAVGEN 253. Russian Jewish Literature**

(Same as SLAVGEN 153) Russian Jewish experience inspired books and films in Hebrew, Yiddish, Russian and English that reveal a world of conflict, humor and beauty. From the mid-19th century to the 21st century. Authors include Haim Nahman Bialik, Sholem Aleichem, Isaac Babel, Osip Mandelstam, Joseph Brodsky, Leonid Tsyppkin, Ludmila Ulitskaia, Gary Shteyngardt.

3-4 units, not given this year

**SLAVGEN 262. Gender Images in Film**

(Same as SLAVGEN 162) Film creates permanent new images of femininity. One of its conscious prerequisites is the notion of social stereotypes. The development of enduring images of the film heroine, 1914-90, through a comparison of the Russian, American, and W. European cinema, and analytical approaches to them from feminist film theory.

3 units, not given this year

**SLAVGEN 263. Gender in Postwar Russian Culture**

(Same as SLAVGEN 163) Issues of femininity and masculinity in Russian literature, film, and popular culture from the 40s to the present. Readings include fiction, memoirs, poetry, drama, and theoretical works in gender studies.

3-4 units, not given this year

**SLAVGEN 265. Poetry, Painting, and Music of the Russian Avant Garde**

(Same as SLAVGEN 165) Interrelationships between poetry and other arts in Russia, 1905-30. The pursuit of synthesis of arts and the modernist agenda of life creation and immortality. Parallel developments in literature, painting, and music, and style and poetics. Russian modernist poetry in the context of changes in the language of visual arts and music). Women poets and artists. Native sources and Western influences; non-Russian elements and transnational tendencies. The impact of scientific discoveries and technological inventions on artistic experimentation.

3-4 units, not given this year

**SLAVGEN 269. Mermaids, the Firebird, and the Singing Tree: Russian Folklore and Its Theory**

(Same as SLAVGEN 169) Russian culture through its oral folklore and music. Theory, current data and its interpretation, how scholars collect and understand traditional oral poetry, and the lessons of folklore.

3-5 units, not given this year

**SLAVGEN 313. Visuality and Literacy Workshop**

Relationships among visual arts, theater, and literature in the culture of modernity.

1-2 units, not given this year

## SLAVIC LANGUAGE (SLAVLANG)

### UNDERGRADUATE COURSES IN SLAVIC LANGUAGE

**SLAVLANG 1. First-Year Russian, First Quarter**

Functionally-based communicative approach, including essential Russian grammar. Discussions of Russian culture and the Russian view of reality. 1: Aut, 2: Win, 3: Spr

5 units, Aut (Khassina, E)

**SLAVLANG 2. First-Year Russian, Second Quarter**

Continuation of 1. Prerequisite 1 or equivalent.

5 units, Win (Khassina, E)

**SLAVLANG 3. First-Year Russian, Third Quarter**

Continuation of 2. Prerequisite 2 or equivalent.

5 units, Spr (Khassina, E; Gruen, I)

**SLAVLANG 5. Russian for Native Speakers, First Quarter**

Self-paced. Reading and writing skills and communicating in formal and informal settings. Does not fulfill the University foreign language requirement.

2 units, Aut (Staff)

**SLAVLANG 6. Russian for Native Speakers, Second Quarter**

Continuation of 5.

2 units, Win (Khassina, E)

**SLAVLANG 7. Russian for Native Speakers, Third Quarter**

Continuation of 6.

2 units, Spr (Staff)

**SLAVLANG 42. Russian for Returnees**

For students returning from the Stanford Program in Moscow; others welcome. Goal is to prepare students who took first-year Russian abroad for SLAVLANG 53.

2 units, Win (Schupbach, R)

**SLAVLANG 51. Second-Year Russian, First Quarter**

More difficult grammar such as numbers, verb conjugation, and aspect. Vocabulary, speaking skills. Prerequisite 3 or equivalent.

5 units, Aut (Khassina, E)

**SLAVLANG 52. Second-Year Russian, Second Quarter**

Continuation of 51. Prerequisite 51 or equivalent.

5 units, Win (Khassina, E)

**SLAVLANG 53. Second-Year Russian, Third Quarter**

Continuation of 52. Prerequisite 52 or equivalent.

5 units, Spr (Khassina, E)

**SLAVLANG 55. Intermediate Russian Conversation**

May be repeated for credit. Prerequisite: first-year Russian or equivalent placement.

2 units, not given this year

**SLAVLANG 60A. Beginning Russian Conversation**

1 unit, Aut (Schupbach, R)

**SLAVLANG 60B. Intermediate Russian Conversation**

1 unit, Win (Schupbach, R)

**SLAVLANG 60C. Advanced Russian Conversation**

1 unit, Spr (Schupbach, R)

**SLAVLANG 60D. East European Breweries and Brewing (Staff)**

1 unit, Win (Schupbach, R), Spr (Schupbach, R)

**SLAVLANG 60F. Slavic Films Series**

1 unit, Win (Schupbach, R)

**SLAVLANG 60P. Slav Dom Theme Projects**

1 unit, Aut (Schupbach, R), Win (Schupbach, R), Spr (Schupbach, R)

**SLAVLANG 60T. Teaching Slavic Conversation**

1 unit, Aut (Schupbach, R), Win (Schupbach, R), Spr (Schupbach, R)

**SLAVLANG 99. Language Specials**

Prerequisite: consent of instructor.

1-5 units, Aut (Staff), Win (Staff), Spr (Staff)

**SLAVLANG 111. Third-Year Russian, First Quarter**

A snapshot of Russian life. Reading comprehension, conversation-

al competence, grammatical accuracy, and cultural sophistication.  
111: Aut, 112: Win, 113: Spr  
4 units, Aut (Greenhill, R)

**SLAVLANG 112. Third-Year Russian, Second Quarter**  
Continuation of 111. Prerequisite 111 or equivalent.  
4 units, Win (Greenhill, R)

**SLAVLANG 113. Third-Year Russian, Third Quarter**  
Continuation of 112. Prerequisite 112 or equivalent.  
4 units, Spr (Greenhill, R)

**SLAVLANG 177. Fourth-Year Russian**  
Culture, history, and current events. Films, classical and contemporary writers, newspaper articles, documentaries, radio and TV programs, and music. Review and fine-tuning of grammar and idiomatic usage. Prerequisite: 113 or equivalent.  
3 units, Aut (Greenhill, R)

**SLAVLANG 178. Fourth-Year Russian**  
Continuation of 177. Prerequisite: 117 or equivalent.  
3 units, Win (Greenhill, R)

**SLAVLANG 179. Fourth-Year Russian**  
Continuation of 178. Prerequisite: 178 or equivalent.  
3 units, Spr (Greenhill, R)

**SLAVLANG 181. Fifth-Year Russian, First Quarter**  
Language proficiency maintenance; appropriate for majors and non-majors with significant language experience overseas. Discussions, oral presentations, and writing essays on contemporary Russia.  
3 units, Aut (Greenhill, R)

**SLAVLANG 182. Fifth-Year Russian, Second Quarter**  
Continuation of 181. Prerequisite 181 or equivalent.  
3 units, Win (Greenhill, R)

**SLAVLANG 183. Fifth-Year Russian, Third Quarter**  
Continuation of 182. Prerequisite 182.  
3 units, Spr (Greenhill, R)

**SLAVLANG 184A. Russian Advanced Conversation and Composition**  
Proficiency in spoken and written Russian through literary and non-literary texts, movies, and contemporary media. Emphasis is on debate, oral presentations, and essay writing.  
2-3 units, Aut (Staff)

**SLAVLANG 184B. Russian Advanced Conversation and Composition**  
Proficiency in spoken and written Russian through literary and non-literary texts, movies, and contemporary media. Emphasis is on debate, oral presentations, and essay writing.  
2-3 units, not given this year

**SLAVLANG 184C. Russian Advanced Conversation and Composition**  
Proficiency in spoken and written Russian through literary and non-literary texts, movies, and contemporary media. Emphasis is on debate, oral presentations, and essay writing.  
2-3 units, not given this year

**SLAVLANG 199. Individual Work**  
Prerequisite: consent of instructor.  
1-5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

## GRADUATE COURSES IN SLAVIC LANGUAGE

**SLAVLANG 299. Independent Study**  
1-5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**SLAVLANG 395. Graduate Studies in Russian**  
Prerequisite: consent of instructor. (Staff)  
2-5 units, Aut (Staff), Win (Staff), Spr (Staff)

## SLAVIC LITERATURE (SLAVLIT)

### UNDERGRADUATE COURSES IN SLAVIC LITERATURE

**SLAVLIT 129. Poetry as System: Introduction to Theory and**

**Practice of Russian Verse**  
(Same as SLAVLIT 229) The history and theory of Russian versification from the 17th to the 20th century. Prerequisite: reading knowledge of Russian. GER:DB-Hum  
4 units, Win (Fleishman, L)

**SLAVLIT 167. Introduction to Russian Cultural Studies**  
The fundamentals of literary analysis of poetics and rhetoric, as well as concepts and topics in Russian intellectual history. Goal is to improve students' comprehension and expression in Russian while building a conceptual vocabulary for understanding Russian literature and historical thought. In Russian. Prerequisite: third-year Russian or equivalent.  
3-5 units, Aut (Staff)

**SLAVLIT 169. Advanced Russian Seminar: Reading Pushkin's *Evgenii Onegin* (in Russian)**  
5 units, Win (Fleishman, L)

**SLAVLIT 179. Literature from Old Rus' and Medieval Russia**  
(Same as SLAVLIT 279) From earliest times through the 17th century. The development of literary and historical genres, and links among literature and art, architecture, and religious culture. Readings in English; graduate students read in original.  
4 units, not given this year

**SLAVLIT 183. Readings in the Russian Press**  
(Same as SLAVLIT 283) For students at the fifth-year Russian level. Advanced language training based on Russian newspapers and magazines. Discussion of issues regarding the Russian media and reading articles of a typical Russian press format.  
4 units, not given this year

**SLAVLIT 184. The History of the Russian Literary Language**  
(Same as SLAVLIT 284) Major structural and semantic changes from the 10th to the 19th centuries. Recommended: 211, 212.  
4-5 units, Win (Schupbach, R)

**SLAVLIT 187. Russian Poetry of the 18th and 19th Centuries**  
(Same as SLAVLIT 287) Required of majors in Russian language and literature; open to undergraduates who have completed three years of Russian, and to graduate students. The major poetic styles of the 19th century as they intersected with late classicism, the romantic movement, and the realist and post-realist traditions. Representative poems by Lomonosov, Derzhavin, Zhukovskii, Pushkin, Baratynskii, Lermontov, Tiutchev, Nekrasov, Fet, Soloviev. In Russian.  
3-4 units, not given this year

**SLAVLIT 188. From Alexander Blok to Joseph Brodsky: Russian Poetry of the 20th Century**  
(Same as SLAVLIT 288) Required of majors in Russian literature. Developments in 20th-century Russian poetry including symbolism, acmeism, futurism, and literature of the absurd. Emphasis is on close readings of individual poems. Discussions in Russian.  
3-4 units, Spr (Fleishman, L)

**SLAVLIT 189A. Honors Research**  
Senior honors students enroll for 5 units in Winter while writing the honors thesis, and may enroll in 189B for 2 units in Spring while revising the thesis. Prerequisite: DLCL 189.  
5 units, Win (Staff), Spr (Staff)

**SLAVLIT 189B. Honors Research**  
Open to juniors with consent of adviser while drafting honors proposal. Open to senior honors students while revising honors thesis. Prerequisites for seniors: 189A, DLCL 189.  
2 units, Aut (Staff), Spr (Staff)

**SLAVLIT 199. Individual Work for Undergraduates**  
Open to Russian majors or students working on special projects. May be repeated for credit. Prerequisite: consent of instructor.  
1-5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

### GRADUATE COURSES IN SLAVIC LITERATURE

**SLAVLIT 200A. Introduction to Russian Literary Scholarship: Russian Formalism and Structuralism**  
Required of first-year Slavic graduate students and honors students. Elements of literary work and principles of literary history. 20th-century Russian literary scholarship emphasizing Russian formalism and structuralism. The relationship of literary studies

with the other areas of humanistic research such as linguistics, history, art criticism, semiotics, and cultural studies. Bibliographic and archival research.

3-4 units, Aut (Fleishman, L)

**SLAVLIT 200B. Proseminar in Russian Literary Theory**

Corequisite: 305.

1 unit, Aut (Fleishman, L)

**SLAVLIT 203. Academic Russian**

How to read and analyze secondary sources, formulate arguments, and present intellectual work in Russian. In Russian. Prerequisite: four years of Russian or equivalent.

3 units, not given this year

**SLAVLIT 211. Introduction to Old Church Slavic**

The first written language of the Slavic people. Grammar. Primarily a skills course, with attention to the historical context of Old Church Slavic.

4 units, not given this year

**SLAVLIT 225. Readings in Russian Realism**

Open to graduate students and advanced undergraduates. Russian realist and naturalist prose emerged in a historical context that fostered specific ideas about the function and form of the literary word. Readings from Turgenev, Goncharov, Leskov, Saltykov-Shchedrin, Dostoevsky, Garshin, Tolstoy, Chekhov, Gorky, Bunin. Discussions in English.

4 units, Aut (Safran, G)

**SLAVLIT 229. Poetry as System: Introduction to Theory and Practice of Russian Verse**

(Same as SLAVLIT 129) The history and theory of Russian versification from the 17th to the 20th century. Prerequisite: reading knowledge of Russian.

4 units, Win (Fleishman, L)

**SLAVLIT 269. Pushkin and the Golden Age**

Graduate seminar. The formation of a simultaneously imperial and Enlightenment culture under Catherine the Great, and how Pushkin and his contemporaries realized its potentials and contradictions. Literary texts in light of other verbal discourses and artistic media; the field of 18th-century and imperial studies in Russia. Undergraduates require consent of instructor.

3 units, Aut (Greenleaf, M)

**SLAVLIT 272. Osip Mandelstam and the Modernist Paradigm**

His poetry, prose, cultural criticism as an expression of Russian modernism in contexts including: symbolism, acmeism, and the avant garde; NEP culture; and Stalinism. Mandelstam's legacy in art and Russian postmodernism. Myth of the poet. The cultural paradigm of Soviet civilization. Knowledge of Russian desirable but not necessary. See <http://www.stanford.edu/class/slavic272>.

2-4 units, not given this year

**SLAVLIT 279. Literature from Old Rus' and Medieval Russia**

(Same as SLAVLIT 179) From earliest times through the 17th century. The development of literary and historical genres, and links among literature and art, architecture, and religious culture. Readings in English; graduate students read in original.

4 units, not given this year

**SLAVLIT 283. Readings in the Russian Press**

(Same as SLAVLIT 183) For students at the fifth-year Russian level. Advanced language training based on Russian newspapers and magazines. Discussion of issues regarding the Russian media and reading articles of a typical Russian press format.

4 units, not given this year

**SLAVLIT 284. The History of the Russian Literary Language**

(Same as SLAVLIT 184) Major structural and semantic changes from the 10th to the 19th centuries. Recommended: 211, 212.

4-5 units, Win (Schupbach, R)

**SLAVLIT 287. Russian Poetry of the 18th and 19th Centuries**

(Same as SLAVLIT 187) Required of majors in Russian language and literature; open to undergraduates who have completed three years of Russian, and to graduate students. The major poetic styles of the 19th century as they intersected with late classicism, the romantic movement, and the realist and post-realist traditions. Representative poems by Lomonosov, Derzhavin, Zhukovskii, Pushkin, Baratynskii, Lermontov, Tiutchev, Nekrasov, Fet, Soloviev. In Russian.

3-4 units, not given this year

**SLAVLIT 288. From Alexander Blok to Joseph Brodsky: Russian Poetry of the 20th Century**

(Same as SLAVLIT 188) Required of majors in Russian literature. Developments in 20th-century Russian poetry including symbolism, acmeism, futurism, and literature of the absurd. Emphasis is on close readings of individual poems. Discussions in Russian.

3-4 units, Spr (Fleishman, L)

**SLAVLIT 299. Individual Work for Graduate Students**

For graduate students in Slavic working on theses or engaged in special work. Prerequisite: written consent of instructor.

1-12 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**SLAVLIT 310. Civilizing Process: Paradigms of Society and Culture in Modern Russian Literature and Film**

Texts representing theoretical models of society and culture in confrontation with works of Russian fiction and film. Emphasis is on Norbert Elias's civilizing process and related theories. Topics: body and desire (Freud, Bakhtin); manners and civilizing process (Elias, Cuddihy, Lotman); symbolic forms, ritual, and systems (Geertz, Zorin); identities and practices (de Certeau, Bourdieu); subcultures (Hebdidge). Authors include Mayakovsky, Babel, Mandelstam, Bulgakov, Platonov, Zoshchenko, Erofeev, Pelevin, Trifonov, and Petrushevskaia; film makers: Mamin and Rogozhkin. Recommended: knowledge of Russian.

2-4 units, Spr (Freidin, G)

**SLAVLIT 399. Advanced Research Seminar in Russian Literature**

Follow-up to 200- or 300-series seminars, as needed. May be repeated for credit.

2-4 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

## SOCIOLOGY (SOC)

### UNDERGRADUATE COURSES IN SOCIOLOGY

**SOC 1. Introduction to Sociology**

Concepts, methods, and theoretical orientations. Sociological imagination illustrated by recent theory and research. Possible topics: the persistence of class cleavages; ethnic, racial, and gender inequalities; religious beliefs and the process of secularization; functions and dysfunctions of educational institutions; criminology and social deviance; social movements and social protest; production and reproduction of culture; rise of organizational society. GER:DB-SocSci

5 units, Aut (Szelenyi, S)

**SOC 45Q. Understanding Race and Ethnicity in American Society**

(S,Sem) Stanford Introductory Seminar. Preference to sophomores. A brief historical overview of race in America, race and violence, race and socioeconomic wellbeing, and the future of race relations in America. Enrollment limited to 16. GER:DB-SocSci

5 units, Aut (Snipp, C)

**SOC 46N. Race, Ethnic, and National Identities: Imagined Communities**

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. How new identities are created and legitimated. What does it mean to try on a different identity? National groups and ethnic groups are so large that one individual can know only an infinitesimal fraction of other group members. What explains the seeming coherence of groups? If identities are a product of the imagination, why are people willing to fight and die for them? Enrollment limited to 16. GER:DB-SocSci

3 units, Aut (Rosenfeld, M)

**SOC 103A. Tutoring: Seeing a Child through Literacy**

(Same as EDUC 103A, EDUC 203A, SOC 203A) Experience tutoring grade school readers in a low income community near Stanford under supervision. Training in tutoring; the role of instruction in developing literacy; challenges facing low income students and those whose first language is not English. How to see school and print through the eyes of a child. Ravenswood Reads tutors encouraged to enroll. GER:DB-SocSci

4 units, Aut (Juel, C)

**SOC 106. Political Sociology**

(Same as SOC 206) The body of state rules and institutions that work in generating legitimate and illegitimate policy claims. Interests and identities that challenged the capacity of the national state to produce effective policies. Economic processes above the national level have that undermine the role of the state as the arena for the composition of disparate interests. GER:DB-SocSci

5 units, not given this year

**SOC 107. China After Mao**

(Same as SOC 207) China's post-1976 recovery from the late Mao era; its reorientation toward an open market-oriented economy; the consequences of this new model and runaway economic growth for standards of living, social life, inequality, and local governance; the political conflicts that have accompanied these changes. GER:DB-SocSci

5 units, not given this year

**SOC 108. Historical Sociology**

(Same as SOC 208) The differences between historical and sociological analysis of past events. The difference between constructing sociological explanations and describing past events. Topics include: the rise of Christianity, the mafia in a Sicilian village, the trade network of the East India Company. GER:DB-SocSci

5 units, Spr (Parigi, P)

**SOC 109. Sociology of Terrorism**

(Same as PUBLPOL 119, SOC 209) Multidisciplinary, including psychology, sociology, political science, and economics. Comparison of terrorist organizations and movements across institutions, places, and times; their motives, tactics, financing, and organization. Guest lecturers. Sources include movies, novels, and research literature. GER:DB-SocSci

5 units, Spr (Meyersson Milgrom, E)

**SOC 110. Politics and Society**

(Same as SOC 210) (Graduate students register for 210.) Themes of political sociology, conceptions of power and state structures throughout history, the origins and expansion of the modern state, linkages between state and society, impact of the modern world system on national policies, internal distribution of power and authority, structure of political group formation and individual participation in modern states, and future trends of politics and society in a globalized world. Emphasis is on developing conceptual understandings of state, society, and politics in the modern world. GER:DB-SocSci

5 units, not given this year

**SOC 114. Economic Sociology**

(Same as SOC 214) (Graduate students register for 214.) The sociological approach to production, distribution, consumption, and markets, emphasizing the impact of norms, power, social structure, and institutions on the economy. Comparison of classic and contemporary approaches to the economy among the social science disciplines. Topics: consumption, labor markets, organization of professions such as law and medicine, the economic role of informal networks, industrial organization, including the structure and history of the computer and popular music industries, business alliances, capitalism in non-Western societies, and the transition from state socialism in E. Europe and China. GER:DB-SocSci

5 units, Aut (Granovetter, M)

**SOC 115. Topics in Economic Sociology**

(Same as SOC 315) (Graduate students register for 315.) Discussion of topics initially explored in 114/214, with emphasis on countries and cultures outside N. America. Possible topics: families and ethnic groups in the economy, corporate governance and control, corporate strategy, relations among firms in industrial districts and business groups, the impact of national institutions and cultures on economic outcomes, transitions from state socialism and the role of the state in economic development. Possible case studies: the U.S., Germany, Italy, Britain, France, Brazil, Korea, India, Japan, and China. Prerequisite: 114/214 or 314. GER:DB-SocSci

5 units, not given this year

**SOC 117A. China Under Mao**

(Same as SOC 217A) (Graduate students register for 217A.) The transformation of Chinese society from the 1949 revolution to the eve of China's reforms in 1978: creation of a socialist economy, reorganization of rural society and urban workplaces, emergence

of new inequalities of power and opportunity, and new forms of social conflict during Mao's Cultural Revolution of 1966-69 and its aftermath. GER:DB-SocSci, EC-GlobalCom

5 units, Spr (Walder, A)

**SOC 118. Social Movements and Collective Action**

(Same as SOC 218) Why social movements arise, who participates in them, the obstacles they face, the tactics they choose, and how to gauge movement success or failure. Theory and empirical research. Application of concepts and methods to social movements such as civil rights, environmental justice, antiglobalization, and anti-war. GER:DB-SocSci

5 units, Win (McAdam, D)

**SOC 119. Understanding Large-Scale Societal Change: The Case of the 1960s**

(Same as SOC 219) The demographic, economic, political, and cultural roots of social change in the 60s; its legacy in the present U.S. GER:DB-SocSci

5 units, not given this year

**SOC 120. Interpersonal Relations**

(Same as SOC 220) (Graduate students register for 220.) Forming ties, developing norms, status, conformity, deviance, social exchange, power, and coalition formation; important traditions of research have developed from the basic theories of these processes. Emphasis is on understanding basic theories and drawing out their implications for change in a broad range of situations, families, work groups, and friendship groups. GER:DB-SocSci

5 units, Win (Ridgeway, C)

**SOC 123. Sex and Love in Modern Society**

(Same as SOC 223) Social influences on private intimate relations involving romantic love and sexuality. Topics include the sexual revolution, contraception, dating, hook-ups, cohabitation, sexual orientation, and changing cultural meanings of marriage, gender, and romantic love. GER:DB-SocSci, EC-Gender

5 units, not given this year

**SOC 125A. Understanding Religion in a Global Context**

(Same as SOC 225A) American and western scholarly thought about religion from social and sociological perspectives. Challenges to assumptions in the 21st century. A framework for understanding issues such as global religious movements, religious nationalism, secular nationalism, and violence as a means to religious ends. Topics include American religious history, contemporary American religions, legal and social interpretations of freedom of religion, definitions of religious rights across the global culture, and strategic responses by policymakers. GER:DB-SocSci

5 units, Win (Chang, P)

**SOC 126. Introduction to Social Networks**

(Same as SOC 226) (Graduate students register for 226.) Theory, methods, and research. Concepts such as density, homogeneity, and centrality; applications to substantive areas. The impact of social network structure on individuals and groups in areas such as communities, neighborhoods, families, work life, and innovations. GER:DB-SocSci

5 units, not given this year

**SOC 127. Bargaining, Power, and Influence in Social Interaction**

(Same as SOC 227) (Graduate students register for 227.) Research and theoretical work on bargaining, social influence, and issues of power and justice in social settings such as teams, work groups, and organizations. Theoretical approaches to the exercise of power and influence in social groups and related issues in social interaction such as the promotion of cooperation, effects of competition and conflict, negotiation, and intergroup relations. Enrollment limited to 40. GER:DB-SocSci

5 units, not given this year

**SOC 128. Introduction to Social Network Analysis**

(Same as SOC 228) (Graduate students register for SOC 228.) Theory and methods of network analysis in sociology (with an emphasis on social movements), anthropology, history, social psychology, economics, political science, and public health. Prerequisite: basic mathematics.

1-5 units, Win (Parigi, P)

**SOC 129X. Urban Education**

(Same as EDUC 112X, EDUC 212X, SOC 229X) (Graduate stu-

dents register for EDUC 212X or SOC 229X). Combination of social science and historical perspectives trace the major developments, contexts, tensions, challenges, and policy issues of urban education. GER:DB-SocSci

3-4 units, Spr (Carter, P)

### **SOC 130. Education and Society**

(Same as EDUC 220C, SOC 230) The effects of schools and schooling on individuals, the stratification system, and society. Education as socializing individuals and as legitimizing social institutions. The social and individual factors affecting the expansion of schooling, individual educational attainment, and the organizational structure of schooling. GER:DB-SocSci

4-5 units, Aut (Ramirez, F)

### **SOC 132. Sociology of Education: The Social Organization of Schools**

(Same as EDUC 110, EDUC 310, SOC 332) Seminar. Key sociological theories and empirical studies of the links between education and its role in modern society, focusing on frameworks that deal with sources of educational change, the organizational context of schooling, the impact of schooling on social stratification, and the relationships between the educational system and other social institutions such as families, neighborhoods, and the economy. GER:DB-SocSci

4 units, Win (Carter, P)

### **SOC 133. Law and Wikinomics: The Economic and Social Organization of the Legal Profession**

(Same as SOC 333) (Graduate and Law students enroll in 333.) Seminar. Emphasis is on the labor market for large-firm lawyers, including the market for entry-level lawyers, attorney retention and promotion practices, lateral hiring of partners, and increased use of forms of employment such as the non-equity form of partnership. Race and gender discrimination and occupational segregation; market-based pressure tactics for organizational reform. Students groups collect and analyze data about the profession and its markets. Multimedia tools for analysis and for producing workplace reforms. May be repeated for credit. Prerequisite: consent of instructor.

1-5 units, Win (Dauber, M)

### **SOC 134. Education, Gender, and Development**

(Same as EDUC 197) Theories and perspectives from the social sciences relevant to the role of education in changing, modifying, or reproducing structures of gender differentiation and hierarchy. Cross-national research on the status of girls and women and the role of development organizations and processes. (SSPEP) GER:EC-Gender

4 units, Spr (Wotipka, C)

### **SOC 135. Poverty, Inequality, and Social Policy in the United States**

(Same as SOC 235) Causes and consequences. Effects of antipoverty policies, and debates over effective social policies. Focus is on how poverty and inequality are experienced by families, children, and communities. Topics include welfare reform and labor market policies, education, and community-based antipoverty strategies. GER:DB-SocSci

5 units, not given this year

### **SOC 136. Sociology of Law**

(Same as SOC 236) (Graduate students register for 236; same as LAW 538.) Major issues and debates. Topics include: historical perspectives on the origins of law; rationality and legal sanctions; normative decision making and morality; cognitive decision making; crime and deviance; the law in action versus the law on the books; organizational responses to law in the context of labor and employment; the roles of lawyers, judges, and juries; and law and social change emphasizing the American civil rights movement. GER:DB-SocSci

5 units, not given this year

### **SOC 136A. Law and Society**

Law and social inequality. Major sociological perspectives on where the law comes from, what law and justice systems do, and how they work.

5 units, Spr (Sandefur, R)

### **SOC 136B. Advanced Topics in Sociology of Law**

Historical perspectives on the origins of law, rationality and legal sanctions, law on the books versus the law in action, crime and

deviance, school desegregation, privatization of prisons, American civil rights, file sharing, jury decision making, the role of lawyers and judges, cynicism about the American legal system.

5 units, Win (Dauber, M)

### **SOC 138. American Indians in Comparative Historical Perspective**

(Same as SOC 238) (Graduate students register for 238.) Demographic, political, and economic processes and events that shaped relations between Euro-Americans and American Indians, 1600-1890. How the intersection of these processes affected the outcome of conflicts between these two groups, and how this conflict was decisive in determining the social position of American Indians in the late 19th century and the evolution of the doctrine of tribal sovereignty. GER:DB-SocSci, EC-AmerCul

5 units, not given this year

### **SOC 139. American Indians in Contemporary Society**

(Same as SOC 239) (Graduate students register for 239.) The social position of American Indians in contemporary American society, 1890 to the present. The demographic resurgence of American Indians, changes in social and economic status, ethnic identification and political mobilization, and institutions such as tribal governments and the Bureau of Indian Affairs. Recommended: 138 or a course in American history. GER:DB-SocSci, EC-AmerCul

5 units, Spr (Snipp, C)

### **SOC 140. Introduction to Social Stratification**

(Same as SOC 240) (Graduate students register for 240.) The main classical and modern explanations of the causes of social, economic, and political inequality. Issues include: power; processes that create and maintain inequality; the central axes of inequality in contemporary societies (race, ethnicity, class, and gender); the consequences of inequality for individuals and groups; and how social policy can mitigate and exacerbate inequality. Cases include technologically simple groups, the Indian caste system, and the modern U.S. GER:DB-SocSci

5 units, Win (Sandefur, R)

### **SOC 141. Controversies about Inequality**

(Same as SOC 241) (Graduate students register for 241.) Debate format involving Stanford and guest faculty. Forms of inequality including racial, ethnic, and gender stratification; possible policy interventions. Topics such as welfare reform, immigration policy, affirmative action, discrimination in labor markets, sources of income inequality, the duty of rich nations to help poor nations, and causes of gender inequality. GER:DB-SocSci

5 units, Spr (Grusky, D)

### **SOC 142. Sociology of Gender**

(Same as SOC 242) (Graduate students register for 242.) Gender inequality in contemporary American society and how it is maintained. The social and relative nature of knowledge and the problems this poses for understanding sex differences and gendered behavior in society. Analytical levels of explanation for gender inequalities: socialization, interaction processes, and socioeconomic processes; arguments and evidence for each approach. The social consequences of gender inequality such as the feminization of poverty, and problems of interpersonal relations. GER:EC-Gender

5 units, Win (Correll, S)

### **SOC 143. Society and Culture in Israel**

(Same as SOC 243) The ideologic origins and development of Israeli society; religious, ethnic and national cleavages, and their manifestations in Israeli public life, institutions of communication, and politics.

5 units, Aut (Lev-On, A)

### **SOC 144. Inequality and the Workplace**

(Same as SOC 244) How characteristics of workplaces, such as hiring practices, workforce diversity, organizational policies and legal mandates, produce variation in inequality. Examines the sources, extent, and consequences of workplace inequality across gender, racial and ethnic lines. Topics include earnings, social status, geographical location, and opportunities for people in the workforce.

1-5 units, Aut (Correll, S)

### **SOC 145. Race and Ethnic Relations**

(Same as SOC 245) (Graduate students register for 245.) Race and ethnic relations in the U.S. and elsewhere. The processes that render ethnic and racial boundary markers, such as skin color, lan-

guage, and culture, salient in interaction situations. Why only some groups become targets of ethnic attacks. The social dynamics of ethnic hostility and ethnic/racial protest movements. GER:DB-SocSci, EC-AmerCul

5 units, not given this year

**SOC 146. Introduction to Comparative Studies in Race and Ethnicity**

(Same as CSRE 196C, ENGLISH 172D, PSYCH 155) How different disciplines approach topics and issues central to the study of ethnic and race relations in the U.S. and elsewhere. Lectures by senior faculty affiliated with CSRE. Discussions led by CSRE teaching fellows. GER:DB-SocSci, EC-AmerCul

5 units, Spr (Moya, P; Markus, H)

**SOC 147A. Comparative Ethnic Conflict**

(Same as SOC 247A) Causes and consequences of racial and ethnic conflict, including nationalist movements, ethnic genocide, civil war, ethnic separatism, politics, indigenous peoples' movements, and minority rights movements around the world. GER:DB-SocSci, EC-GlobalCom

5 units, Spr (Olzak, S)

**SOC 148. Racial Identity**

(Same as SOC 248) The construction and meanings of racial identities in the U.S. Attention is on multiracial identities and the shifting boundaries of racial categories in contemporary America. GER:DB-SocSci, EC-AmerCul

5 units, not given this year

**SOC 149. The Urban Underclass**

(Same as SOC 249, URBANST 112) (Graduate students register for 249.) Recent research and theory on the urban underclass, including evidence on the concentration of African Americans in urban ghettos, and the debate surrounding the causes of poverty in urban settings. Ethnic/racial conflict, residential segregation, and changes in the family structure of the urban poor. GER:DB-SocSci, EC-AmerCul

5 units, Win (Rosenfeld, M)

**SOC 149X. Urban Politics**

(Same as POLISCI 121, SOC 249X, URBANST 111) The major actors, institutions, processes, and policies of sub-state government in the U.S., emphasizing city general-purpose governments through a comparative examination of historical and contemporary politics. Issues related to federalism, representation, voting, race, poverty, housing, and finances. Prerequisite: POLISCI 2 or consent of instructor. GER:DB-SocSci

5 units, not given this year

**SOC 155. The Changing American Family**

(Same as SOC 255) Family change from historical, social, demographic, and legal perspectives. Extramarital cohabitation, divorce, later marriage, interracial marriage, and same-sex cohabitation. The emergence of same-sex marriage as a political issue. Are recent changes in the American family really as dramatic as they seem? Theories about what causes family systems to change. GER:DB-SocSci, EC-AmerCul

5 units, Aut (Rosenfeld, M)

**SOC 160. Formal Organizations**

(Same as SOC 260) (Graduate students register for 260.) The roles of formal organizations in production processes, market transactions, and social movements; and as sources of income and ladders of mobility. Relationships of modern organizations to environments and internal structures and processes. Concepts, models, and tools for analyzing organizational phenomena in contemporary societies. Sources include the literature and case studies. GER:DB-SocSci

5 units, Aut (Zhou, X)

**SOC 161. The Social Science of Entrepreneurship**

(Same as SOC 261) (Graduate students register for 261.) Who is likely to become an entrepreneur and where is entrepreneurship likely to occur? Classic and contemporary theory and research. Interaction with expert practitioners in creating entrepreneurial opportunities including venture and corporate capitalists. The role of culture, markets, hierarchies, and networks. Market creation and change, and factors that affect success of new organizations. Field projects on entrepreneurial environments such as technology licensing offices, entrepreneurial development organizations, venture capital firms, and corporate venturing groups. GER:DB-SocSci

5 units, Spr (Thornton, P)

**SOC 164. Immigration and the Changing United States**

(Same as SOC 264) The role of race and ethnicity in immigrant group integration in the U.S. Topics include: theories of integration; racial and ethnic identity formation; racial and ethnic change; immigration policy; intermarriage; hybrid racial and ethnic identities; comparisons between contemporary and historical waves of immigration. GER:DB-SocSci

5 units, Win (Jimenez, T)

**SOC 166. Mexicans, Mexican Americans, and Chicanos in American Society**

(Same as SOC 266) Contemporary sociological issues affecting Mexican-origin people in the U.S. Topics include: the immigrant experience, immigration policy, identity, socioeconomic integration, internal diversity, and theories of incorporation. GER:DB-SocSci

5 units, Aut (Jimenez, T)

**SOC 167A. Asia-Pacific Transformation**

(Same as SOC 267A) Post-WW II transformation in the Asia-Pacific region, with focus on the ascent of Japan, the development of newly industrialized capitalist countries (S. Korea and Taiwan), the emergence of socialist states (China and N. Korea), and the changing relationship between the U.S. and these countries. GER:DB-SocSci, EC-GlobalCom

5 units, Win (Shin, G)

**SOC 170. Classics of Modern Social Theory**

(Same as SOC 270) (Graduate students register for 270). Preference to Sociology majors. Contributions of Marx, Weber, and Durkheim to contemporary sociology. Topics: the problem of social order and the nature of social conflict; capitalism and bureaucracy; the relationship between social structure and politics; the social sources of religion and political ideology; and the evolution of modern societies. Examples from contemporary research illustrate the impact of these traditions. Limited enrollment. GER:DB-SocSci

5 units, Spr (McDermott, M)

**SOC 180A. Foundations of Social Research**

(Same as SOC 280A) Formulating a research question, developing hypotheses, probability and non-probability sampling, developing valid and reliable measures, qualitative and quantitative data, choosing research design and data collection methods, challenges of making causal inference, and criteria for evaluating the quality of social research. Emphasis is on how social research is done, rather than application of different methods. Limited enrollment; preference to Sociology and Urban Studies majors, and Sociology coterms. GER:DB-SocSci

5 units, Aut (Sorensen, A), Spr (Sorensen, A)

**SOC 180B. Evaluation of Evidence**

(Same as SOC 280B) Methods for analyzing and evaluating data in sociological research: comparative historical methods, ethnographic observation, quantitative analysis of survey data, experimentation, and simulation. Emphasis is on application of these methods through small data analysis projects. Limited enrollment; preference to Sociology majors. GER:DB-SocSci

5 units, Win (Rosenfeld, M)

**SOC 181B. Sociological Methods: Statistics**

(Same as SOC 281B) (Graduate students register for 281B.) Statistical methods of relevance to sociology: contingency tables, correlation, and regression.

5 units, not given this year

**SOC 186. Advanced Social Network Analysis**

Practical experience and an interdisciplinary perspective on the collection, management, exploration, and analysis of social network data. Emphasis is on developing technical skills for studying large-scale social networks. Topics include theories of social order, small worlds, scientific computing, network sampling, and network dynamics.

5 units, Aut (Haynes, J)

**SOC 190. Undergraduate Individual Study**

Prior arrangement required.

1-5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**SOC 191. Undergraduate Directed Research**

Work on a project of student's choice under supervision of a faculty member. Prior arrangement required.

1-5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**SOC 192. Undergraduate Research Apprenticeship**

Work in an apprentice-like relationship with faculty on an ongoing research project. Prior arrangement required.

1-5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**SOC 193. Undergraduate Teaching Apprenticeship**

1-5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**SOC 196. Senior Thesis**

Work on an honors thesis project under faculty supervision (see description of honors program). Must be arranged early in the year of graduation or before.

1-15 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**SOC 200. Junior/Senior Seminar for Majors**

For Sociology majors. Capstone course in which sociological problems are framed, linked to theories, and answers pursued through research designs. Independent research. How to formulate a research question; how to integrate theory and methods. Prerequisites: SOC 170, 180B.

5 units, Aut (Ku, M), Spr (McDermott, M)

**SOC 201. Preparation for Senior Project**

(Same as URBANST 201) First part of capstone experience for Urban Studies majors pursuing an internship-based research project or honors thesis. Individually arranged internship beginning in Winter Quarter, 8 hours per week. Prospective students must consult with internship coordinator early in Autumn Quarter to plan placement. Reflections and assignments culminate in a research proposal, which may be submitted for funding. Internship normally continues in Spring Quarter; research proposed in the final assignment may be carried out in Spring or Summer Quarter; consent required for Autumn Quarter research. Corequisite: URBANST 201A.

5 units, Win (Kahan, M)

**SOC 202. Preparation for Honors Thesis**

(Same as URBANST 202) Primarily for juniors in Sociology; sophomores who plan to be off-campus Winter Quarter of their junior year may register with consent of instructor. Students write a research prospectus and grant proposal, which may be submitted for funding. Research proposal in final assignment may be carried out in Spring or Summer Quarter; consent required for Autumn Quarter research. WIM

5 units, Win (McAdam, D)

**GRADUATE COURSES IN SOCIOLOGY****SOC 203A. Tutoring: Seeing a Child through Literacy**

(Same as EDUC 103A, EDUC 203A, SOC 103A) Experience tutoring grade school readers in a low income community near Stanford under supervision. Training in tutoring; the role of instruction in developing literacy; challenges facing low income students and those whose first language is not English. How to see school and print through the eyes of a child. Ravenswood Reads tutors encouraged to enroll.

4 units, Aut (Juel, C)

**SOC 206. Political Sociology**

(Same as SOC 106) The body of state rules and institutions that work in generating legitimate and illegitimate policy claims. Interests and identities that challenged the capacity of the national state to produce effective policies. Economic processes above the national level have that undermine the role of the state as the arena for the composition of disparate interests.

5 units, not given this year

**SOC 207. China After Mao**

(Same as SOC 107) China's post-1976 recovery from the late Mao era; its reorientation toward an open market-oriented economy; the consequences of this new model and runaway economic growth for standards of living, social life, inequality, and local governance; the political conflicts that have accompanied these changes.

5 units, not given this year

**SOC 208. Historical Sociology**

(Same as SOC 108) The differences between historical and sociological analysis of past events. The difference between constructing sociological explanations and describing past events. Topics include: the rise of Christianity, the mafia in a Sicilian village, the trade network of the East India Company.

5 units, Spr (Parigi, P)

**SOC 209. Sociology of Terrorism**

(Same as PUBLPOL 119, SOC 109) Multidisciplinary, including psychology, sociology, political science, and economics. Comparison of terrorist organizations and movements across institutions, places, and times; their motives, tactics, financing, and organization. Guest lecturers. Sources include movies, novels, and research literature.

5 units, Spr (Meyersson Milgrom, E)

**SOC 210. Politics and Society**

(Same as SOC 110) (Graduate students register for 210.) Themes of political sociology, conceptions of power and state structures throughout history, the origins and expansion of the modern state, linkages between state and society, impact of the modern world system on national policies, internal distribution of power and authority, structure of political group formation and individual participation in modern states, and future trends of politics and society in a globalized world. Emphasis is on developing conceptual understandings of state, society, and politics in the modern world.

5 units, not given this year

**SOC 214. Economic Sociology**

(Same as SOC 114) (Graduate students register for 214.) The sociological approach to production, distribution, consumption, and markets, emphasizing the impact of norms, power, social structure, and institutions on the economy. Comparison of classic and contemporary approaches to the economy among the social science disciplines. Topics: consumption, labor markets, organization of professions such as law and medicine, the economic role of informal networks, industrial organization, including the structure and history of the computer and popular music industries, business alliances, capitalism in non-Western societies, and the transition from state socialism in E. Europe and China.

5 units, Aut (Granovetter, M)

**SOC 217A. China Under Mao**

(Same as SOC 117A) (Graduate students register for 217A.) The transformation of Chinese society from the 1949 revolution to the eve of China's reforms in 1978: creation of a socialist economy, reorganization of rural society and urban workplaces, emergence of new inequalities of power and opportunity, and new forms of social conflict during Mao's Cultural Revolution of 1966-69 and its aftermath.

5 units, Spr (Walder, A)

**SOC 218. Social Movements and Collective Action**

(Same as SOC 118) Why social movements arise, who participates in them, the obstacles they face, the tactics they choose, and how to gauge movement success or failure. Theory and empirical research. Application of concepts and methods to social movements such as civil rights, environmental justice, antiglobalization, and anti-war.

5 units, Win (McAdam, D)

**SOC 219. Understanding Large-Scale Societal Change: The Case of the 1960s**

(Same as SOC 119) The demographic, economic, political, and cultural roots of social change in the 60s; its legacy in the present U.S.

5 units, not given this year

**SOC 220. Interpersonal Relations**

(Same as SOC 120) (Graduate students register for 220.) Forming ties, developing norms, status, conformity, deviance, social exchange, power, and coalition formation; important traditions of research have developed from the basic theories of these processes. Emphasis is on understanding basic theories and drawing out their implications for change in a broad range of situations, families, work groups, and friendship groups.

5 units, Win (Ridgeway, C)

**SOC 223. Sex and Love in Modern Society**

(Same as SOC 123) Social influences on private intimate relations involving romantic love and sexuality. Topics include the sexual revolution, contraception, dating, hook-ups, cohabitation, sexual orientation, and changing cultural meanings of marriage, gender, and romantic love.

5 units, not given this year

**SOC 225A. Understanding Religion in a Global Context**

(Same as SOC 125A) American and western scholarly thought

about religion from social and sociological perspectives. Challenges to assumptions in the 21st century. A framework for understanding issues such as global religious movements, religious nationalism, secular nationalism, and violence as a means to religious ends. Topics include American religious history, contemporary American religions, legal and social interpretations of freedom of religion, definitions of religious rights across the global culture, and strategic responses by policymakers.

5 units, Win (*Chang, P*)

#### **SOC 226. Introduction to Social Networks**

(Same as SOC 126) (Graduate students register for 226.) Theory, methods, and research. Concepts such as density, homogeneity, and centrality; applications to substantive areas. The impact of social network structure on individuals and groups in areas such as communities, neighborhoods, families, work life, and innovations.

5 units, not given this year

#### **SOC 227. Bargaining, Power, and Influence in Social Interaction**

(Same as SOC 127) (Graduate students register for 227.) Research and theoretical work on bargaining, social influence, and issues of power and justice in social settings such as teams, work groups, and organizations. Theoretical approaches to the exercise of power and influence in social groups and related issues in social interaction such as the promotion of cooperation, effects of competition and conflict, negotiation, and intergroup relations. Enrollment limited to 40.

5 units, not given this year

#### **SOC 228. Introduction to Social Network Analysis**

(Same as SOC 128) (Graduate students register for SOC 228.) Theory and methods of network analysis in sociology (with an emphasis on social movements), anthropology, history, social psychology, economics, political science, and public health. Prerequisite: basic mathematics.

1-5 units, Win (*Parigi, P*)

#### **SOC 229X. Urban Education**

(Same as EDUC 112X, EDUC 212X, SOC 129X) (Graduate students register for EDUC 212X or SOC 229X). Combination of social science and historical perspectives trace the major developments, contexts, tensions, challenges, and policy issues of urban education.

3-4 units, Spr (*Carter, P*)

#### **SOC 230. Education and Society**

(Same as EDUC 220C, SOC 130) The effects of schools and schooling on individuals, the stratification system, and society. Education as socializing individuals and as legitimizing social institutions. The social and individual factors affecting the expansion of schooling, individual educational attainment, and the organizational structure of schooling.

4-5 units, Aut (*Ramirez, F*)

#### **SOC 231. World, Societal, and Educational Change: Comparative Perspectives**

(Same as EDUC 136, EDUC 306D) Theoretical perspectives and empirical studies on the structural and cultural sources of educational expansion and differentiation, and on the cultural and structural consequences of educational institutionalization. Research topics: education and nation building; education, mobility, and equality; education, international organizations, and world culture.

4-5 units, Win (*Ramirez, F*)

#### **SOC 235. Poverty, Inequality, and Social Policy in the United States**

(Same as SOC 135) Causes and consequences. Effects of antipoverty policies, and debates over effective social policies. Focus is on how poverty and inequality are experienced by families, children, and communities. Topics include welfare reform and labor market policies, education, and community-based antipoverty strategies.

5 units, not given this year

#### **SOC 236. Sociology of Law**

(Same as SOC 136) (Graduate students register for 236; same as LAW 538.) Major issues and debates. Topics include: historical perspectives on the origins of law; rationality and legal sanctions; normative decision making and morality; cognitive decision making; crime and deviance; the law in action versus the law on the books; organizational responses to law in the context of labor and

employment; the roles of lawyers, judges, and juries; and law and social change emphasizing the American civil rights movement.

5 units, not given this year

#### **SOC 238. American Indians in Comparative Historical Perspective**

(Same as SOC 138) (Graduate students register for 238.) Demographic, political, and economic processes and events that shaped relations between Euro-Americans and American Indians, 1600-1890. How the intersection of these processes affected the outcome of conflicts between these two groups, and how this conflict was decisive in determining the social position of American Indians in the late 19th century and the evolution of the doctrine of tribal sovereignty.

5 units, not given this year

#### **SOC 239. American Indians in Contemporary Society**

(Same as SOC 139) (Graduate students register for 239.) The social position of American Indians in contemporary American society, 1890 to the present. The demographic resurgence of American Indians, changes in social and economic status, ethnic identification and political mobilization, and institutions such as tribal governments and the Bureau of Indian Affairs. Recommended: 138 or a course in American history.

5 units, Spr (*Snipp, C*)

#### **SOC 240. Introduction to Social Stratification**

(Same as SOC 140) (Graduate students register for 240.) The main classical and modern explanations of the causes of social, economic, and political inequality. Issues include: power; processes that create and maintain inequality; the central axes of inequality in contemporary societies (race, ethnicity, class, and gender); the consequences of inequality for individuals and groups; and how social policy can mitigate and exacerbate inequality. Cases include technologically simple groups, the Indian caste system, and the modern U.S.

5 units, Win (*Sandefur, R*)

#### **SOC 241. Controversies about Inequality**

(Same as SOC 141) (Graduate students register for 241.) Debate format involving Stanford and guest faculty. Forms of inequality including racial, ethnic, and gender stratification; possible policy interventions. Topics such as welfare reform, immigration policy, affirmative action, discrimination in labor markets, sources of income inequality, the duty of rich nations to help poor nations, and causes of gender inequality.

5 units, Spr (*Grusky, D*)

#### **SOC 242. Sociology of Gender**

(Same as SOC 142) (Graduate students register for 242.) Gender inequality in contemporary American society and how it is maintained. The social and relative nature of knowledge and the problems this poses for understanding sex differences and gendered behavior in society. Analytical levels of explanation for gender inequalities: socialization, interaction processes, and socioeconomic processes; arguments and evidence for each approach. The social consequences of gender inequality such as the feminization of poverty, and problems of interpersonal relations.

5 units, Win (*Correll, S*)

#### **SOC 243. Society and Culture in Israel**

(Same as SOC 143) The ideologic origins and development of Israeli society; religious, ethnic and national cleavages, and their manifestations in Israeli public life, institutions of communication, and politics.

5 units, Aut (*Lev-On, A*)

#### **SOC 244. Inequality and the Workplace**

(Same as SOC 144) How characteristics of workplaces, such as hiring practices, workforce diversity, organizational policies and legal mandates, produce variation in inequality. Examines the sources, extent, and consequences of workplace inequality across gender, racial and ethnic lines. Topics include earnings, social status, geographical location, and opportunities for people in the workforce.

1-5 units, Aut (*Correll, S*)

#### **SOC 245. Race and Ethnic Relations**

(Same as SOC 145) (Graduate students register for 245.) Race and ethnic relations in the U.S. and elsewhere. The processes that render ethnic and racial boundary markers, such as skin color, language, and culture, salient in interaction situations. Why only some

groups become targets of ethnic attacks. The social dynamics of ethnic hostility and ethnic/racial protest movements.

*5 units, not given this year*

**SOC 247A. Comparative Ethnic Conflict**

(Same as SOC 147A) Causes and consequences of racial and ethnic conflict, including nationalist movements, ethnic genocide, civil war, ethnic separatism, politics, indigenous peoples' movements, and minority rights movements around the world.

*5 units, Spr (Olzak, S)*

**SOC 248. Racial Identity**

(Same as SOC 148) The construction and meanings of racial identities in the U.S. Attention is on multiracial identities and the shifting boundaries of racial categories in contemporary America.

*5 units, not given this year*

**SOC 249. The Urban Underclass**

(Same as SOC 149, URBANST 112) (Graduate students register for 249.) Recent research and theory on the urban underclass, including evidence on the concentration of African Americans in urban ghettos, and the debate surrounding the causes of poverty in urban settings. Ethnic/racial conflict, residential segregation, and changes in the family structure of the urban poor.

*5 units, Win (Rosenfeld, M)*

**SOC 249X. Urban Politics**

(Same as POLISCI 121, SOC 149X, URBANST 111) The major actors, institutions, processes, and policies of sub-state government in the U.S., emphasizing city general-purpose governments through a comparative examination of historical and contemporary politics. Issues related to federalism, representation, voting, race, poverty, housing, and finances. Prerequisite: POLISCI 2 or consent of instructor.

*5 units, not given this year*

**SOC 255. The Changing American Family**

(Same as SOC 155) Family change from historical, social, demographic, and legal perspectives. Extramarital cohabitation, divorce, later marriage, interracial marriage, and same-sex cohabitation. The emergence of same-sex marriage as a political issue. Are recent changes in the American family really as dramatic as they seem? Theories about what causes family systems to change.

*5 units, Aut (Rosenfeld, M)*

**SOC 257. Causal Inference in Quantitative Educational and Social Science Research**

(Same as EDUC 255B) Quantitative methods to make causal inferences in the absence of randomized experiment including the use of natural and quasi-experiments, instrumental variables, regression discontinuity, matching estimators, longitudinal methods, fixed effects estimators, and selection modeling. Assumptions implicit in these approaches, and appropriateness in research situations. Students develop research proposals relying on these methods. Prerequisites: exposure to quantitative research methods; multivariate regression.

*3-5 units, Win (Staff)*

**SOC 260. Formal Organizations**

(Same as SOC 160) (Graduate students register for 260.) The roles of formal organizations in production processes, market transactions, and social movements; and as sources of income and ladders of mobility. Relationships of modern organizations to environments and internal structures and processes. Concepts, models, and tools for analyzing organizational phenomena in contemporary societies. Sources include the literature and case studies.

*5 units, Aut (Zhou, X)*

**SOC 261. The Social Science of Entrepreneurship**

(Same as SOC 161) (Graduate students register for 261.) Who is likely to become an entrepreneur and where is entrepreneurship likely to occur? Classic and contemporary theory and research. Interaction with expert practitioners in creating entrepreneurial opportunities including venture and corporate capitalists. The role of culture, markets, hierarchies, and networks. Market creation and change, and factors that affect success of new organizations. Field projects on entrepreneurial environments such as technology licensing offices, entrepreneurial development organizations, venture capital firms, and corporate venturing groups.

*5 units, Spr (Thornton, P)*

**SOC 264. Immigration and the Changing United States**

(Same as SOC 164) The role of race and ethnicity in immigrant group integration in the U.S. Topics include: theories of integration; racial and ethnic identity formation; racial and ethnic change; immigration policy; intermarriage; hybrid racial and ethnic identities; comparisons between contemporary and historical waves of immigration.

*5 units, Win (Jimenez, T)*

**SOC 266. Mexicans, Mexican Americans, and Chicanos in American Society**

(Same as SOC 166) Contemporary sociological issues affecting Mexican-origin people in the U.S. Topics include: the immigrant experience, immigration policy, identity, socioeconomic integration, internal diversity, and theories of incorporation.

*5 units, Aut (Jimenez, T)*

**SOC 267A. Asia-Pacific Transformation**

(Same as SOC 167A) Post-WW II transformation in the Asia-Pacific region, with focus on the ascent of Japan, the development of newly industrialized capitalist countries (S. Korea and Taiwan), the emergence of socialist states (China and N. Korea), and the changing relationship between the U.S. and these countries.

*5 units, Win (Shin, G)*

**SOC 270. Classics of Modern Social Theory**

(Same as SOC 170) (Graduate students register for 270). Preference to Sociology majors. Contributions of Marx, Weber, and Durkheim to contemporary sociology. Topics: the problem of social order and the nature of social conflict; capitalism and bureaucracy; the relationship between social structure and politics; the social sources of religion and political ideology; and the evolution of modern societies. Examples from contemporary research illustrate the impact of these traditions. Limited enrollment.

*5 units, Spr (McDermott, M)*

**SOC 273. Gender and Higher Education: National and International Perspectives**

(Same as EDUC 273) The effects of interactions between gender and the structures of higher education; policies seeking changes in those structures. Topics: undergraduate and graduate education, faculty field of specialization, rewards and career patterns, sexual harassment, and the development of feminist scholarship and pedagogy.

*4 units, not given this year*

**SOC 280A. Foundations of Social Research**

(Same as SOC 180A) Formulating a research question, developing hypotheses, probability and non-probability sampling, developing valid and reliable measures, qualitative and quantitative data, choosing research design and data collection methods, challenges of making causal inference, and criteria for evaluating the quality of social research. Emphasis is on how social research is done, rather than application of different methods. Limited enrollment; preference to Sociology and Urban Studies majors, and Sociology coterms.

*5 units, Aut (Sorensen, A), Spr (Sorensen, A)*

**SOC 280B. Evaluation of Evidence**

(Same as SOC 180B) Methods for analyzing and evaluating data in sociological research: comparative historical methods, ethnographic observation, quantitative analysis of survey data, experimentation, and simulation. Emphasis is on application of these methods through small data analysis projects. Limited enrollment; preference to Sociology majors.

*5 units, Win (Rosenfeld, M)*

**SOC 281B. Sociological Methods: Statistics**

(Same as SOC 181B) (Graduate students register for 281B.) Statistical methods of relevance to sociology: contingency tables, correlation, and regression.

*5 units, not given this year*

**SOC 300. Workshop: Teaching Development**

For first-year Sociology doctoral students only. The principles for becoming an effective instructor, adviser, and mentor to undergraduates. Topics: ethics, course organization and syllabus development, test construction and grading, conflict resolution, common classroom problems, and University policies related to matters such as sexual harassment. Technologies and other topics related to making effective presentations, and campus resources to improve classroom performance. Roundtable discussions with faculty

and advanced graduate students known for teaching excellence. Students may be asked to give a demonstration lecture.

2 units, *Spr* (Young, K)

**SOC 305. Graduate Proseminar**

For first-year Sociology doctoral students only. Introduction and orientation to the field of Sociology.

1 unit, *Aut* (Staff)

**SOC 308. Social Demography**

For graduate students and advanced undergraduates. Topics: models of fertility behavior, migration models, stable population theory, life table analysis, data sources, and measurement problems. How population behavior affects social processes, and how social processes influence population dynamics. Recommended: sociological research methods; basic regression analysis and log linear models.

4-5 units, *Aut* (Snipp, C)

**SOC 309. Nations and Nationalism**

The nation as a form of collective identity in the modern era. Major works in the study of nations and nationalism from comparative perspectives with focus on Europe and E. Asia.

4-5 units, *Win* (Shin, G)

**SOC 310. Political Sociology**

Theory and research on the relationship between social structure and politics. Social foundations of political order, the generation and transformation of ideologies and political identities, social origins of revolutionary movements, and social consequences of political revolution. Prerequisite: doctoral student.

4-5 units, *not given this year*

**SOC 311A. Workshop: Comparative Studies of Educational and Political Systems**

(Same as EDUC 387A) Analysis of quantitative and longitudinal data on national educational systems and political structures. May be repeated for credit. Prerequisite: consent of instructor. (SSPEP/ICE)

1-5 units, *Aut* (Ramirez, F)

**SOC 311B. Workshop: Comparative Systems of Educational and Political Systems**

(Same as EDUC 387B) Analysis of quantitative and longitudinal data on national educational systems and political structures. May be repeated for credit. Prerequisite: consent of instructor. (SSPEP/ICE)

1-5 units, *Win* (Ramirez, F)

**SOC 311C. Workshop: Comparative Studies of Educational and Political Systems**

(Same as EDUC 387C) Analysis of quantitative and longitudinal data on national educational systems and political structures. Prerequisite: consent of instructor. May be repeated for credit. (SSPEP/ICE)

1-5 units, *Spr* (Ramirez, F)

**SOC 312W. Workshop: Political Sociology, Social Movements, and Collective Action**

Faculty and student presentations of ongoing research on topics including: social movement and organizations, and the relationship between them; democracy movements; legislative and policy outcomes; and collective action tactics, strategies, and trajectories. May be repeated for credit. Restricted to Sociology doctoral students; others by consent of instructor.

1-2 units, *Aut* (McAdam, D; Olzak, S; Walder, A), *Win* (McAdam, D; Parigi, P; Olzak, S; Walder, A), *Spr* (Walder, A; McAdam, D; Parigi, P; Olzak, S)

**SOC 314. Economic Sociology**

Classical and contemporary literature covering the sociological approach to markets and the economy, and comparing it to other disciplines. Topics: consumption, labor, professions, industrial organization, and the varieties of capitalism; historical and comparative perspectives on market and non-market provision of goods and services, and on transitions among economic systems. The relative impact of culture, institutions, norms, social networks, technology, and material conditions. Prerequisite: doctoral student status or consent of instructor.

4-5 units, *Aut* (Granovetter, M)

**SOC 315. Topics in Economic Sociology**

(Same as SOC 115) (Graduate students register for 315.) Discus-

sion of topics initially explored in 114/214, with emphasis on countries and cultures outside N. America. Possible topics: families and ethnic groups in the economy, corporate governance and control, corporate strategy, relations among firms in industrial districts and business groups, the impact of national institutions and cultures on economic outcomes, transitions from state socialism and the role of the state in economic development. Possible case studies: the U.S., Germany, Italy, Britain, France, Brazil, Korea, India, Japan, and China. Prerequisite: 114/214 or 314.

5 units, *not given this year*

**SOC 315W. Workshop: Economic Sociology and Organizations**

Theory, methods, and research in the sociology of the economy and of formal organizations, through presentations of ongoing work by students, faculty, and guest speakers, and discussion of recent literature and controversies. May be repeated for credit. Restricted to Sociology doctoral students; others by consent of instructor.

1-2 units, *Aut* (Granovetter, M; Zhou, X), *Win* (Granovetter, M; Zhou, X), *Spr* (Granovetter, M; Zhou, X)

**SOC 316. Historical and Comparative Sociology**

Theory and research on macro-historical changes of sociological significance such as the rise of capitalism, the causes and consequences of revolutions, and the formation of the modern nation state and global world system. Methodological issues in historical and comparative sociology.

4-5 units, *not given this year*

**SOC 318. Social Movements and Collective Action**

Topics: causes, dynamics, and outcomes of social movements; organizational dimensions of collective action; and causes and consequences of individual activism.

4-5 units, *alternate years, not given this year*

**SOC 320. Foundations of Social Psychology**

Major theoretical perspectives, and their assumptions and problems, in interpersonal processes and social psychology. Techniques of investigation and methodological issues. Perspectives: symbolic interaction, social structure and personality, and cognitive and group processes.

4-5 units, *Win* (Ridgeway, C)

**SOC 321W. Workshop: Social Psychology and Social Structure**

Advanced graduate student workshop in social psychology. Current theories and research agendas, recent publications, and presentations of ongoing research by faculty and students. May be repeated for credit. Prerequisite: consent of instructor.

1-2 units, *Aut* (Cook, K; Ridgeway, C; Correll, S), *Win* (Cook, K; Ridgeway, C; Correll, S), *Spr* (Cook, K; Ridgeway, C; Correll, S)

**SOC 322. Social Interaction, Social Structure, and Social Exchange**

Current theory and research on topics such as social cognition and identity, group processes, bargaining and negotiation, social justice, social dilemmas and exchange, and networks and collective action. The social exchange approach.

4-5 units, *not given this year*

**SOC 323. Sociology of the Family**

Sociological research on changing family forms. Topics include courtship, marriage, fertility, divorce, conflict, relationship skills and satisfaction, gender patterns, power relations within the family, and class and race differences in patterns.

4-5 units, *Win* (England, P)

**SOC 324. Social Networks**

How the study of social networks contributes to sociological research. Application of core concepts to patterns of relations among actors, including connectivity and clusters, duality of categories and networks, centrality and power, balance and transitivity, structural equivalence, and blockmodels. Friendship and kinship networks, diffusion of ideas and infectious diseases, brokerage in markets and organizations, and patronage and political influence in historical contexts.

3-5 units, *not given this year*

**SOC 327. Frontiers of Social Psychology**

Advanced topics, current developments, theory, and empirical

research. Possible topics include social identity processes, status beliefs and processes, social exchange, affect and social cohesion, legitimacy, social difference and inequality, norms, and social dilemmas.

*1-5 units, not given this year*

**SOC 330. Sociology of Knowledge Creation**

(Same as EDUC 320X) The sociology of knowledge creation explores systematic relationships between thought and social structure in order to examine how human beings construct, interpret, and view "reality." The objective of this course is to explain how knowledge is socially constructed, patterned, and used, and how our everyday and tacit forms of knowledge are achieved. The course will place special emphasis on the creation and patterning of scientific paradigms, social science disciplines, and the field of education itself.

*3-4 units, Aut (McFarland, D)*

**SOC 332. Sociology of Education: The Social Organization of Schools**

(Same as EDUC 110, EDUC 310, SOC 132) Seminar. Key sociological theories and empirical studies of the links between education and its role in modern society, focusing on frameworks that deal with sources of educational change, the organizational context of schooling, the impact of schooling on social stratification, and the relationships between the educational system and other social institutions such as families, neighborhoods, and the economy.

*4 units, Win (Carter, P)*

**SOC 333. Law and Wikinomics: The Economic and Social Organization of the Legal Profession**

(Same as SOC 133) (Graduate and Law students enroll in 333.) Seminar. Emphasis is on the labor market for large-firm lawyers, including the market for entry-level lawyers, attorney retention and promotion practices, lateral hiring of partners, and increased use of forms of employment such as the non-equity form of partnership. Race and gender discrimination and occupational segregation; market-based pressure tactics for organizational reform. Students groups collect and analyze data about the profession and its markets. Multimedia tools for analysis and for producing workplace reforms. May be repeated for credit. Prerequisite: consent of instructor.

*1-5 units, Win (Dauber, M)*

**SOC 338W. Workshop: Sociology of Law**

(Same as LAW 581.) Required for joint degree J.D./Ph.D. students in Sociology in the first three years of program; open to Ph.D. students in Sociology and related disciplines. Empirical, sociological study of law and legal institutions. Topics such as the relation of law to inequality and stratification, social movements, organizations and institutions, political sociology and state development, and the social construction of disputes and dispute resolution processes. Research presentations. Career development issues. May be repeated for credit.

*1-5 units, Win (Sandefur, R)*

**SOC 339. Gender Meanings and Processes**

Current theories and research on the social processes, such as socialization, status processes, stereotyping, and cognition, that produce gender difference and inequality. Intersections of gender with race, class, and bodies. Applications to workplaces, schools, families, and intimate relationships. Prerequisite: Sociology doctoral student or consent of instructor

*1-5 units, not given this year*

**SOC 340. Social Stratification**

Classical and contemporary approaches to the unequal distribution of goods, status, and power. Modern analytic models of the effects of social contact, cultural capital, family background, and luck in producing inequality. The role of education in stratification. The causes and consequences of inequality by race and gender. The structure of social classes, status groupings, and prestige hierarchies in various societies. Labor markets and their role in inequality. The implications of inequality for individual lifestyles. The rise of the new class, the underclass, and other emerging forms of stratification. Prerequisite: Ph.D. student or consent of instructor.

*4-5 units, Spr (Grusky, D)*

**SOC 341W. Workshop: Inequality**

Causes, consequences, and structure of inequality; how inequality results from and shapes social classes, occupations, professions,

and other aspects of the economy. Research presentations by students, faculty, and guest speakers. Discussion of controversies, theories, and recent writings. May be repeated for credit. Restricted to Sociology doctoral students; others by consent of instructor.

*1-2 units, Aut (Grusky, D; Correll, S), Win (Grusky, D; Correll, S; Tuma, N), Spr (Grusky, D; Correll, S; Tuma, N)*

**SOC 342B. Gender and Social Structure**

The role of gender in structuring contemporary life. Social forces affecting gender at the psychological, interactional, and structural levels. Gender inequality in labor markets, education, the household, and other institutions. Theories and research literature.

*4-5 units, not given this year*

**SOC 345. Seminar in Comparative Race and Ethnic Relations**

Restricted to doctoral students. Factors that create, maintain, and diminish the salience of race and ethnic boundaries. Theoretical debates surrounding the emergence, persistence, and change in racial and ethnic boundaries, nationalism and sovereignty, and mobilization. Empirical evidence on race and ethnic tensions, conflict, and warfare. The relationship between democracy, immigration, and diversity.

*4-5 units, Spr (Olzak, S)*

**SOC 346. Workshop: Ethnography**

Restricted to doctoral students. Student research employing ethnographic methods. May be repeated for credit. Prerequisite: consent of instructor.

*1-2 units, Aut (McDermott, M), Win (McDermott, M), Spr (McDermott, M)*

**SOC 347. Race and Ethnicity in Society and Institutions**

(Same as EDUC 315X) Primarily for doctoral students. Major theories and empirical research. Emphasis is on schooling and race, racial identity, urban issues, and the impact of immigration on race relations.

*1-5 units, not given this year*

**SOC 348. Advanced Topics in the Sociology of Gender**

Seminar for graduate students who have research projects in progress that focus on questions about gender and society. Research projects can be at any stage from the initial development to the final writing up of results. Focus is on questions posed by the research projects of the seminar participants. Readings include relevant background to each other's questions and present their own work in progress. A final paper reports the progress on the seminar member's research project.

*3-5 units, Spr (Ridgeway, C)*

**SOC 357. Immigration and Assimilation**

Major theoretical debates and empirical applications in the study of immigrant assimilation. Topics include racial and ethnic identity, socioeconomic integration, political participation, and national identity. Companion to SOC 358.

*3-5 units, Win (Jimenez, T)*

**SOC 358. Sociology of Immigration**

Topics include: the process of migration; historical perspectives; immigrant integration; transnationalism; immigration policy; labor; nations and nationalism.

*1-5 units, not given this year*

**SOC 359. Organizations and Uncertainty**

Organizations and environments characterized by institutional uncertainty. Beliefs at the roots of shared routines and institutional myths are absent. Institutionalists and neo-institutionalists, organizations facing uncertain institutional environments.

*3-5 units, Spr (Parigi, P)*

**SOC 361. Social Psychology of Organizations**

Seminar. Social psychological theories and research relevant to organizational behavior. Current research topics; theories in micro-organizational behavior. Topics include models of attribution, choice and decision making, intergroup behavior, stereotyping, and social influence. Prerequisites: Ph.D student; graduate-level social psychology course.

*4 units, Win (Staff)*

**SOC 361W. Workshop: Networks and Organizations**

(Same as EDUC 361) For students doing advanced research. Group comments and criticism on dissertation projects at any phase of completion, including data problems, empirical and theo-

retical challenges, presentation refinement, and job market presentations. Collaboration, debate, and shaping research ideas. Prerequisite: courses in organizational theory or social network analysis.

*1-3 units, Aut (McFarland, D; Powell, W), Win (McFarland, D; Powell, W), Spr (McFarland, D; Powell, W)*

### **SOC 362. Organization and Environment**

Leading sociological approaches to analyzing relations of organizations and environments emphasizing dynamics. Theoretical formulations, research designs, and results of empirical studies.

*4 units, Aut (Carroll, G)*

### **SOC 363. Social and Political Process in Organizations**

(Same as OB 676) Cognition, attitudes, and behavior in organizations. Social psychological and sociological research at the meso, or intermediate between micro and macro, level of analysis. Topics vary from year to year, but may include: organizational learning and decision making; power and conflict; emotions in organizations; mobility and stratification; gender inequality and discrimination; networks; organizational justice and legitimacy; and cultural perspectives on organizations. Prerequisite: Ph.D student.

*4 units, Spr (Staff)*

### **SOC 363A. Seminar on Organizational Theory**

(Same as EDUC 375A, MS&E 389) The social science literature on organizations assessed through consideration of the major theoretical traditions and lines of research predominant in the field.

*5 units, Aut (Powell, W)*

### **SOC 363B. Seminar on Organizations: Institutional Analysis**

(Same as EDUC 375B) Seminar. Key lines of inquiry on organizational change, emphasizing network, institutional, and evolutionary arguments.

*3-5 units, not given this year*

### **SOC 366. Organization Studies: Theories and Analyses**

(Same as EDUC 288) Principles of organizational behavior and analysis; theories of group and individual behavior; organizational culture; and applications to school organization and design. Case studies.

*5 units, Spr (Staff)*

### **SOC 366A. Organizational Ecology**

(Same as OB 601) This seminar examines theoretical and methodological issues in the study of the ecology of organizations. Particular attention is given to the dynamics that characterize the interface between organizational populations and their audiences. Prerequisites: Enrollment in a PhD program.

*4 units*

### **SOC 367. Institutional Analysis of Organizations**

Reading and research on the nature, origins, and effects of the modern institutional system. Emphasis is on the effects of institutional systems on organizational structure.

*3-5 units, not given this year*

### **SOC 368W. Workshop: China Social Science**

(Same as POLISCI 348R) For Ph.D. students in the social sciences and history. Research on contemporary society and politics in the People's Republic of China. May be repeated for credit. Prerequisite: consent of instructor.

*1-2 units, Aut (Walder, A; Oi, J), Win (Walder, A; Chan, C; Oi, J), Spr (Walder, A; Zhou, X; Oi, J)*

### **SOC 369. Social Network Analysis**

(Same as EDUC 316) Introduction to social network theory, methods, and research applications in sociology. Network concepts of interactionist (balance, cohesion, centrality) and structuralist (structural equivalence, roles, duality) traditions are defined and applied to topics in small groups, social movements, organizations, communities. Students apply these techniques to data on schools and classrooms. (SSPEP)

*4-5 units, Aut (McFarland, D)*

### **SOC 370A. Sociological Theory: Social Structure, Inequality, and Conflict**

Restricted to doctoral students. The traditions of structural analysis derived from the work of Marx, Weber, and related thinkers. Antecedent ideas in foundational works are traced through contemporary theory and research on political conflict, social stratification, formal organization, and the economy.

*5 units, Aut (Olzak, S)*

### **SOC 370B. Social Interaction and Group Process**

Theoretical strategies for the study of interaction, group, and network processes, including rational choice and exchange theory, the theory of action, symbolic interactionism, formal sociology, and social phenomenology. Antecedent ideas in foundational works and contemporary programs of theoretical research.

*3-5 units, alternate years, not given this year*

### **SOC 372. Theoretical Analysis and Design**

Theoretical analysis and the logical elements of design, including the systematic analysis of the logical structure of arguments, the relationship of arguments to more encompassing theoretical or metatheoretical assumptions, the derivation of logical implications from arguments, assessments of theoretically significant problems or gaps in knowledge.

*3-5 units, Aut (Zelditch, M)*

### **SOC 374. Philanthropy and Civil Society**

(Same as EDUC 374, POLISCI 334) Associated with the Center for Philanthropy and Civil Society (PACS). Year-long workshop for doctoral students and advanced undergraduates writing senior theses on the nature of civil society or philanthropy. Focus is on pursuit of progressive research and writing contributing to the current scholarly knowledge of the nonprofit sector and philanthropy. Accomplished in a large part through peer review. Readings include recent scholarship in aforementioned fields. May be repeated for credit for a maximum of 9 units.

*1-3 units, Aut (Powell, W; Reich, R), Win (Powell, W; Reich, R), Spr (Powell, W; Reich, R)*

### **SOC 376. Perspectives on Organization and Environment**

Sociologists and organizational scholars have increasingly come to recognize that networks are not simply relevant as conduits for the flow of information and resources, but are critical determinants of identity, shaping preferences and influencing perceptions of the qualities that inhere in actors. Research that informs the link between networks and identity based on intellectual traditions such as social exchange theory, role theory, and economic and historical sociology.

*4 units, Win (Staff)*

### **SOC 377. Comparing Institutional Forms: Public, Private, and Nonprofit**

(Same as EDUC 377, GSBGEN 346) Seminar. For students interested in the nonprofit sector, and those in the joint Business and Education program. The missions, functions, and capabilities of nonprofit, public, and private organizations. Focus is on sectors with significant competition among institutional forms, including health care, social services, the arts, and education. Sources include scholarly articles, cases, and historical materials. Advanced undergraduates require consent of instructor.

*4 units*

### **SOC 378. Seminar on Institutional Theory and World Society**

Sociological analyses of the rise and impact of the expanded modern world order, with its internationalized organizations and globalized discourse. Consequences for national and local society: education, political organization, economic structure, the environment, and science. The centrality of the individual and the rationalized organization as legitimated actors.

*1-5 units, Win (Meyer, J)*

### **SOC 380. Qualitative Methods**

Priority to Sociology doctoral students. Emphasis is on observational and interview-based research. Limited enrollment.

*3-5 units, not given this year*

### **SOC 381. Sociological Methodology I: Introduction**

Enrollment limited to first-year Sociology doctoral students. Basic math and statistics. Types of variables, how to recode and transform variables, and how to manage different types of data sets. Introduction to statistical packages and programming.

*4 units, Aut (Cumberworth, E)*

### **SOC 382. Sociological Methodology II: The General Linear Model**

Preference to Sociology doctoral students. The general linear model for discrete and continuous variables. Introduction to model selection, the principles of estimation, assessment of fit, and modeling diagnostics. Enrollment limited to 15. Prerequisites: 281A,B or equivalents.

*5-6 units, Win (Tuma, N)*

**SOC 383. Sociological Methodology III: Advanced Models for Discrete Outcomes**

Required for Ph.D. in Sociology; enrollment limited to first-year Sociology doctoral students. The rationale for and interpretation of static and dynamic models for the analysis of discrete variables. Prerequisites: 281A,B and 382, or equivalents.

5 units, Spr (Tuma, N)

**SOC 384. New Models and Methods in the Social Sciences**

Two-week intensive introduction to new statistical approaches. Emphasis is on applications. Topics may include network models, multilevel models, latent class models, mixed methods, new qualitative methods, growth models, geostatistical tools, survey-based experiments, new methods for estimating causal effects, web-based surveys, advanced discrete choice models, and diffusion models.

2-5 units, Sum (Grusky, D)

**SOC 385A. Research Practicum I**

Workshop on research methods for second year Sociology doctoral students. Ongoing student research, methodological problems, and possible solutions. Required for second year paper.

3 units, Aut (England, P)

**SOC 385B. Research Practicum II**

Continuation of 385A. Workshop on research methods for second year Sociology doctoral students. Ongoing student research, methodological problems, and possible solutions. Required for second year paper.

3 units, Win (England, P)

**SOC 388. Log-Linear Models**

Analysis of categorical data with log-linear and negative binomial models. Measures of fit and hypothesis testing.

3-5 units, not given this year

**SOC 389. Mixed Method Research Design and Analysis**

Research designs that incorporate qualitative and quantitative analyses in a single project. The tension between thinking case-wise and variable-wise; how the focus on relationships between variables that is the hallmark of the quantitative approach can be brought into qualitative work.

3-5 units, not given this year

**SOC 390. Graduate Individual Study**

May be repeated for credit.

1-5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**SOC 391. Graduate Directed Research**

May be repeated for credit.

1-5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**SOC 392. Research Apprenticeship**

May be repeated for credit.

1-5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**SOC 393. Teaching Apprenticeship**

1-15 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**SOPHOMORE COLLEGE (SCS)**

See Undergraduate Education section for more information.

**ANTHRO 10SC. Darwin, Evolution, and Galapagos**

(Same as HUMBIO 17SC) Lessons from the study of flora and fauna in Galapagos from Darwin's time to today. Adaptation, sexual selection, speciation, and adaptive radiation. The challenges the Galapagos Islands pose for conservation.

2 units, Aut (Durham, W)

**BIO 10SC. Natural History, Marine Biology, and Research**

The biology of Monterey Bay and the coastal mountains and redwood forests of Big Sur. Literary, artistic, and political history. Topics: conservation, sanctuary, and stewardship of the oceans and coastal lands. Meetings with conservationists, authors, environmentalists, politicians, land-use planners, lawyers, scientists, and educators.

2 units, Aut (Thompson, S)

**COMPLIT 12SC. Ghost Stories: Why the Dead Return and What They Want From Us**

Anxiety about morality and wisdom about the cultural place of the past is found in the enduring genre of the ghost story. Memory and

regret, mourning and forgetting, past deeds and future actions are depicted in classical literature to popular film. Classic short story authors such as Henry James, P.G. Wodehouse, Eudora Welty, and Ray Bradbury, and novelists Shirley Jackson, Peter Straub, Ann Siddens and Jonathan Carroll, ghost films and fieldtrips to haunting at Stanford and the Bay Area.

2 units, Aut (Berman, R)

**CS 11SC. Great Ideas in Computer Science**

Intellectual foundations of computer science of program applications, social networking, and web information. Topics include: mathematical theories of social networking, computer intelligence, and the boundaries of what is possible to compute. Field trips to Silicon Valley companies and institutions.

2 units, Aut (Sahami, M)

**DRAMA 11SC. Learning Theater: From Audience to Critic at the Oregon Shakespeare Festival**

13 days and ten plays at the Oregon Shakespeare Festival in Ashland. The details of the plays, their interpretation, production, and acting, and their value as entertainment and challenge.

2 units, Aut (Rayner, A; Paulson, L)

**EDUC 11SC. Work and Family**

Examination into the forces behind the rise in women's paid work and subsequent changes in the workplace and in families. Topics include gendered division of labor, decisions about marriage and childrearing, economic issues, employers' role in structuring work and family, and public policy issues such as anti-discrimination laws, divorce laws, and subsidized child care.

2 units, Aut (Strober, M)

**EE 10SC. Mathematics of the Information Age**

The world may be made of earth, wind, fire, and water, but it runs on information. The mathematics of the Information Age include CD players, cellular phones, imaging, and the Internet. Behind-the-scenes look at how mathematics is used to shape and direct modern life and work.

2 units, Aut (Osgood, B)

**EESS 12SC. Environmental and Geological Field Studies in the Rocky Mountains**

(Same as GES 12SC) Geologic origin from three billion years ago, paleoclimatology and glacial history, long- and short-term carbon cycle and global climate change, and environmental issues related to changing land-use patterns and increased demand for natural resources. Small groups analyze data to prepare reports and maps.

2 units, Aut (Chamberlain, P)

**ETHICSOC 10SC. The Meaning of Life: Moral and Spiritual Inquiry through Literature**

Reflection on ethical values and the purpose of life through literature, including F. Scott Fitzgerald's *The Great Gatsby*, George Bernard Shaw's *Major Barbara*, Hermann Hesse's *Siddhartha*, Jane Smiley's *Good Will*, Robert Bolt's *A Man for All Seasons*, and John Steinbeck's *Of Mice and Men*. Undergraduates from the University of Oxford participate with Stanford students. Field trips include an overnight camping experience.

2 units, Aut (McLennan, W)

**GES 12SC. Environmental and Geological Field Studies in the Rocky Mountains**

(Same as EESS 12SC) Geologic origin from three billion years ago, paleoclimatology and glacial history, long- and short-term carbon cycle and global climate change, and environmental issues related to changing land-use patterns and increased demand for natural resources. Small groups analyze data to prepare reports and maps.

2 units, Aut (Chamberlain, P)

**HISTORY 21SC. Celluloid America: Explorations in Film and History**

Examination of U.S. history and culture through film, from perspective of the history of film and film representations of U.S. history. Topics include the invention of moving picture technology, the creation of cinema language, the rise and fall of the Hollywood studio system, the emergence and evolution of film genres (westerns, romantic comedies, film noir, science fiction, Blaxploitation), the quest for overseas markets for American movies, race and film, and the future of movies in the digital age.

2 units, Aut (Campbell, J)

### **HUMBIO 17SC. Darwin, Evolution, and Galapagos**

(Same as ANTHRO 10SC) Lessons from the study of flora and fauna in Galapagos from Darwin's time to today. Adaptation, sexual selection, speciation, and adaptive radiation. The challenges the Galapagos Islands pose for conservation.

2 units, Aut (Durham, W)

### **MATSCI 11SC. Energy Technologies for a Sustainable Future**

Introduction to the scope of global energy issues, and investigation of sustainable energy solutions. Focus is on the scientific basis of sustainable, cutting-edge technologies, including solar cells, fuel cells, and biofuels, with emphasis on the fundamental science behind the technologies. Laboratory work and field trips to alternative energy companies.

2 units, Aut (Clemens, B)

### **MI 17SC. Smallpox: Lethal Legacy, Forbidding Future**

Case studies related to the evolutionary origins of smallpox, monkeypox, and other emerging pox infections. Topics include public health policy, sociocultural factors related to pox eradication, research funding, and the use of pox viruses in bioterrorism and as vectors for gene therapy. Field trips and guest speakers on the development of novel drugs, personal accounts of the eradication efforts, current clinical trials for pox vaccines, and current laboratory studies of pox.

2 units, Aut (Siegel, R)

### **POLISCI 19SC. Food and Politics**

The politics of food production and distribution; organic and sustainable farming; federal farm and free trade policies; genetically modified food; animal ethics; and the political context of famine and obesity.

2 units, Aut (Reich, R)

### **POLISCI 22SC. The Face of Battle**

The complexity of translating strategy into tactical decisions by officers and foot soldiers on the field of battle, with a focus on three important battles in American history: Gettysburg, the Battle of Little Bighorn, and Mogadishu. Field trips to Gettysburg, Pennsylvania, and the Little Bighorn battlefield in Montana.

2 units, Aut (Sagan, S)

### **POLISCI 23SC. American Foreign Policy and the Challenges of the Twenty-First Century**

Investigation of foreign policy challenges and choices facing the Obama administration. Topics include: examination of domestic constraints such as public opinion; Congress and bureaucracy on foreign policy and international challenges of climate change and energy, nuclear policy, biological security; failing states and regional conflict; terrorism; global economic crisis; and the ongoing crises in the broader Middle East. Course includes a 48-hour simulation.

2 units, Aut (Stedman, S)

## SPANISH LANGUAGE (SPANLANG)

### **UNDERGRADUATE COURSES IN SPANISH LANGUAGE**

#### **SPANLANG 1. First-Year Spanish, First Quarter**

Emphasis is on developing socially and culturally appropriate proficiency in interpersonal, interpretive, and presentational spheres. Influences shaping the production of oral and written texts in the Spanish- and English-speaking world.

5 units, Aut (Perales, O), Win (Catoira, L), Spr (Reinhold, V)

#### **SPANLANG 1A. Accelerated First-Year Spanish**

Completes first-year sequence in two rather than three quarters. For students with previous knowledge of Spanish, or those with a strong background in another Romance language. 2A fulfills the University language requirement. Prerequisite: written and oral placement tests.

5 units, Aut (Ortiz Cuevas, C), Win (Del Carpio, C)

#### **SPANLANG 2. First-Year Spanish, Second Quarter**

Continuation of 1.

5 units, Aut (Del Carpio, C), Win (Perales, O), Spr (Catoira, L)

#### **SPANLANG 2A. Accelerated First-Year Spanish**

Continuation of 1A. Fulfills the University language requirement.

Prerequisite: written and oral placement tests.

5 units, Win (Ortiz Cuevas, C), Spr (Del Carpio, C)

#### **SPANLANG 3. First-Year Spanish, Third Quarter**

Continuation of 2. Fulfills the University language requirement.

5 units, Aut (Urruela, M), Win (Del Carpio, C), Spr (Perales, O)

#### **SPANLANG 5A. Intensive First-Year Spanish, Part A**

Goal is to engage in interactions with Spanish speakers in socially and culturally appropriate forms. Social and cultural influences shaping the production of oral and written texts in the Spanish- and English-speaking world. Stanford graduate students restricted to 9 units register for 205A,B,C.

5 units, Sum (Weikel, K)

#### **SPANLANG 5B. Intensive First-Year Spanish, Part B**

Continuation of 5A.

5 units, Sum (Renfro, C)

#### **SPANLANG 5C. Intensive First-Year Spanish, Part C**

Continuation of 5B.

5 units, Sum (Schmidt, S)

#### **SPANLANG 10. Beginning Oral Communication**

Additional pronunciation, vocabulary, and speaking skills. May be repeated once for credit. Prerequisite: one quarter of Spanish, demonstrated oral proficiency above the novice level; may be taken concurrently with 2, 2A, or 3.

2 units, Aut (Won, H), Win (Brates, V), Spr (Corso, I)

#### **SPANLANG 11C. Second-Year Spanish: Cultural Emphasis, First Quarter**

Sequence integrating culture and language. Emphasis is on advanced proficiency in oral and written discourse including presentational language and socioculturally appropriate discourse in formal and informal, academic, and professional contexts. Prerequisite: one year of college Spanish or equivalent.

4-5 units, Aut (Renfro, C), Win (Staff, Spr (Sanchez, K)

#### **SPANLANG 11R. Second-Year Spanish: Emphasis on International Relations, First Quarter**

Sequence integrating geopolitics and language. Emphasis is on advanced proficiency in oral and written discourse including presentational language, international relations, and socioeconomics of the Spanish-speaking world. Prerequisite: one year of college Spanish or equivalent. 11R: Aut, 12R: Win, 13R: Spr

4-5 units, Aut (Brates, V)

#### **SPANLANG 12C. Second-Year Spanish: Cultural Emphasis, Second Quarter**

Continuation of 11C. Prerequisite: 11C or equivalent.

4-5 units, Aut (Renfro, C), Win (Ortiz Cuevas, C), Spr (Urruela, M)

#### **SPANLANG 12R. Second-Year Spanish: Emphasis on International Relations, Second Quarter**

Continuation of 11R. Prerequisite 11R or equivalent.

4-5 units, Win (Brates, V)

#### **SPANLANG 13C. Second-Year Spanish: Cultural Emphasis, Third Quarter**

Continuation of 12C. Prerequisite: 12C or equivalent placement.

4-5 units, Aut (Perales, O), Win (Staff), Spr (Ortiz Cuevas, C)

#### **SPANLANG 13R. Second-Year Spanish: Emphasis on International Relations, Third Quarter**

Continuation of 12R. Prerequisite: 12R or equivalent. Fulfills the IR major language requirement.

4-5 units, Spr (Brates, V)

#### **SPANLANG 15. Intermediate Oral Communication**

Emphasis is on interaction in Spanish locally and globally. Regional vocabularies and cultures at home and abroad. Interaction with local native Spanish speakers and communities globally via the Internet. May be repeated once for credit. Prerequisite: first-year Spanish and demonstrated oral proficiency above the low intermediate level.

3 units, Aut (Won, H), Win (Brates, V), Spr (Brates, V), Sum

#### **SPANLANG 21B. Second-Year Spanish for Heritage Language Students, First Quarter**

Emphasis is on ability to communicate orally and in writing. Spelling and the written accent. Goal is to understand, interpret, and analyze texts, movies, radio, and television. Written language skills include rules for editing written language. Third quarter focus is on the development of written and oral styles and registers

used in more formal settings. 21B: Aut, 22B: Win, 23B: Spr  
3-5 units, Aut (Nunez, M)

**SPANLANG 22B. Second-Year Spanish for Heritage Language Students, Second Quarter**

Continuation of 21B. Prerequisite 21b or equivalent.  
3-5 units, Win (Renfro, C)

**SPANLANG 23B. Second-Year Spanish for Heritage Language Students, Third Quarter**

Continuation of 22B. Quarter focus is on the development of written and oral styles and registers used in more formal settings. Prerequisite: 22B or equivalent.  
3-5 units, Spr (Renfro, C)

**SPANLANG 25A. Intensive Second-Year Spanish, Part A**

Sequence integrating culture and language. Emphasis is on advanced proficiency in oral and written discourse including presentational language and socioculturally appropriate discourse in formal and informal, academic, and professional contexts. Prerequisite: one year of college Spanish or equivalent.  
4 units, Sum (Nissler, P)

**SPANLANG 25B. Intensive Second-Year Spanish, Part B**

Continuation of 25A. Prerequisite: 25A or equivalent.  
4 units, Sum (Ortiz Cuevas, C)

**SPANLANG 25C. Intensive Second-Year Spanish, Part C**

Continuation of 25B. Prerequisite: 25B or equivalent.  
4 units, Sum (Builes, R)

**SPANLANG 60A. Beginning Spanish Conversation**

1 unit, Aut (Urruela, M)

**SPANLANG 60B. Intermediate Spanish Conversation**

1 unit, Win (Urruela, M), Spr (Staff)

**SPANLANG 60C. Advanced Spanish Conversation**

1 unit, Aut (Staff), Win (Staff), Spr (Staff)

**SPANLANG 60K. Cooking Class**

1 unit, Win (Urruela, M)

**SPANLANG 60M. Movie Series**

1 unit, Aut (Urruela, M)

**SPANLANG 60P. Yost Lecture Series**

1 unit, Aut (Madison, V), Win (Madison, V), Spr (Madison, V)

**SPANLANG 60T. Teaching Spanish Conversation**

1 unit, Aut (Urruela, M), Win (Urruela, M), Spr (Urruela, M)

**SPANLANG 99. Language Specials**

May be repeated for credit. Prerequisite: consent of instructor.  
1-5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**SPANLANG 100. Advanced Oral Communication**

For students who have completed second-year Spanish or who have oral skills above the intermediate level. Interactive activities require students to persuade, analyze, support opinions, and gather and interpret others' points of view. Focus is on vocabulary enrichment and idiomatic expressions. Cultural, literary, political, and journalistic readings. May be repeated once for credit. Prerequisite: 13 or equivalent.

3 units, Aut (Reinhold, V), Win (Reinhold, V), Spr (Reinhold, V)

**SPANLANG 101. The Structure of Spanish**

Criteria and skills to analyze Spanish grammatical structure. Identification of word functions in sentences and texts, types of sentences, and terminology. Structure of nouns, adjectives, and verbs, and their relationship with meaning. The differences between Spanish grammar as a formal system and in everyday life. Prerequisite: 13C, 13R, 23B, or equivalent. (Sierra)

3-5 units, Aut (Miano, A)

**SPANLANG 102. Composition and Writing Workshop**

Individual development of the ability to write in Spanish. Emphasis is on style and diction, and on preparing and writing essays on literary topics. Non-Spanish majors or minors may choose topics more closely related to their studies for projects. Prerequisite: two years of college Spanish or equivalent. WIM

3-5 units, Aut (Brates, V), Win (Miano, A), Spr (Brates, V)

**SPANLANG 121M. Spanish for Medical Students**

(Same as HRP 280) Goal is a practical and culturally appropriate command of spoken Spanish. Emphasis is on taking the medical history. Topics include the human body, hospital procedures, diagnostics, food, and essential doctor-patient phrases when dealing

with Spanish-speaking patients. Series can be taken independently, depending on the level of prior knowledge.

3 units, Aut (Corso, I)

**SPANLANG 122M. Spanish for Medical Students**

(Same as HRP 281) Goal is a practical and culturally appropriate command of spoken Spanish. Emphasis is on performing a physical examination. Topics include the human body, hospital procedures, diagnostics, food, and essential doctor-patient phrases when dealing with Spanish-speaking patients. Series can be taken independently, depending on the level of prior knowledge.

3 units, Win (Corso, I)

**SPANLANG 123M. Spanish for Medical Students**

(Same as HRP 282) Goal is a practical and culturally appropriate command of spoken Spanish. Emphasis is on different specialties and medical conditions. Topics include the human body, hospital procedures, diagnostics, food, and essential doctor-patient phrases when dealing with Spanish-speaking patients. Series can be taken independently, depending on the level of prior knowledge.

3 units, Spr (Corso, I)

**SPANLANG 131M. Spanish for Heritage and Foreign Language Pre-Med and Public Health Students**

For pre-med or public health students who grew up in homes where Spanish is spoken or for students who possess a considerable command of Spanish. Focus is on developing the ability to provide information on health-related topics to Spanish speakers in the U.S. Students participate in the organization and delivery of information on preventive health care in a workshop setting to a Spanish-speaking community.

3-4 units, Aut (Sierra, A), Spr (Sierra, A)

**SPANLANG 199. Individual Reading**

May be repeated for credit. Prerequisite: consent of instructor.  
1-5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

## GRADUATE COURSES IN SPANISH LANGUAGE

**SPANLANG 1G. Accelerated First-Year Business Spanish, Part 1**

For GSB students only. Limited enrollment.

4 units, Win (Staff), Spr (Staff)

**SPANLANG 2G. Accelerated First-Year Business Spanish, Part 2**

Continuation of 1G. For GSB students only. Limited enrollment

4 units, Win (Staff), Spr (Reinhold, V)

**SPANLANG 50. Reading Spanish**

For students who have already taken Spanish for at least one year or have superior reading proficiency in another Romance language. Emphasis is on academic texts. Fulfills University reading requirements for advanced degrees if students earn a grade of 'B.'

3 units, Win (Sierra, A)

**SPANLANG 205A. Intensive First-Year Spanish, Part A**

Goal is to engage in interactions with Spanish speakers using socially and culturally appropriate forms. Social and cultural influences shaping the production of oral and written texts in the Spanish- and English-speaking world. Stanford graduate students restricted to 9 units may take all three courses for a total of 9 units, or two of the courses for a total of 9 units.

3-5 units, Sum (Staff)

**SPANLANG 205B. Intensive First-Year Spanish, Part B**

Continuation of 205A. For Stanford graduate students restricted to 9 units.

3-5 units, Sum (Staff)

**SPANLANG 205C. Intensive First-Year Spanish**

Continuation of 205B. For Stanford graduate students restricted to 9 units.

3-5 units, Sum (Staff)

**SPANLANG 394. Graduate Studies in Spanish Conversation**

Prerequisite: consent of instructor.

1-3 units, Aut (Staff), Win (Staff), Spr (Staff)

**SPANLANG 395. Graduate Studies in Spanish**

Prerequisite: consent of instructor.

2-5 units, Aut (Staff), Win (Staff), Spr (Staff)

# SPECIAL LANGUAGE PROGRAM (SPECLANG)

## UNDERGRADUATE COURSES IN SPECIAL LANGUAGE PROGRAM

### **SPECLANG 75. Greek Culture, Ideals, and Themes**

Introduction to Greek culture and its global influence in a social historical context, through images from its past and institutions in contemporary Greek society. Limited enrollment. GER:DB-Hum, EC-GlobalCom

3 units, Spr (Prionas, E)

### **SPECLANG 104A. Beginning Albanian, First Quarter**

3 units, Aut (Staff)

### **SPECLANG 104B. Beginning Albanian, Second Quarter**

3 units, Win (Staff)

### **SPECLANG 104C. Beginning Albanian, Third Quarter**

3 units, Spr (Staff)

### **SPECLANG 107A. Beginning Bulgarian, First Quarter**

3 units, Aut (Staff)

### **SPECLANG 107B. Beginning Bulgarian, Second Quarter**

3 units, Win (Staff)

### **SPECLANG 107C. Beginning Bulgarian, Third Quarter**

3 units, Spr (Staff)

### **SPECLANG 112A. Intermediate Hungarian Conversation, First Quarter**

3 units, Aut (Szoke, E)

### **SPECLANG 112B. Intermediate Hungarian Conversation, Second Quarter**

3 units, Win (Szoke, E)

### **SPECLANG 112C. Intermediate Hungarian Conversation, Third Quarter**

3 units, Spr (Szoke, E)

### **SPECLANG 129A. Beginning Ukrainian, First Quarter**

Grammatical structures, vocabulary, and sentence patterns through speaking, reading, writing, and listening. Ukrainian culture.

3 units, Aut (Jarboe, L)

### **SPECLANG 129B. Beginning Ukrainian, Second Quarter**

Continuation of 129A.

3 units, Win (Jarboe, L)

### **SPECLANG 129C. Beginning Ukrainian, Third Quarter**

Grammatical structures, vocabulary, and sentence patterns through speaking, reading, writing, and listening. Ukrainian culture.

3 units, Spr (Jarboe, L)

### **SPECLANG 130A. Intermediate Ukrainian, First Quarter**

Continuation of 129C.

3 units, Aut (Jarboe, L)

### **SPECLANG 130B. Intermediate Ukrainian, Second Quarter**

Continuation of 130A.

3 units, Win (Jarboe, L)

### **SPECLANG 130C. Intermediate Ukrainian, Third Quarter**

Continuation of 130B.

3 units, Spr (Jarboe, L)

### **SPECLANG 134A. Beginning Haitian Creole**

Grammatical structures, vocabulary, and sentence patterns through speaking, reading, writing, and listening. Haitian culture.

3 units, not given this year

### **SPECLANG 144A. Beginning Tagalog, First Quarter**

Grammatical structures, vocabulary, and sentence patterns through speaking, reading, writing, and listening. Tagalog culture.

3 units, Aut (Staff)

### **SPECLANG 144B. Beginning Tagalog, Second Quarter**

Continuation of 144A.

3 units, Win (Staff)

### **SPECLANG 144C. Beginning Tagalog, Third Quarter**

Continuation of 144B.

3 units, Spr (Staff)

### **SPECLANG 145A. Intermediate Tagalog, First Quarter**

Grammar structures and vocabulary through authentic materials. Cultural proficiency. Fulfills the University language requirement.

3 units, Aut (Staff)

### **SPECLANG 145B. Intermediate Tagalog, Second Quarter**

Continuation of 145A.

3 units, Win (Staff)

### **SPECLANG 145C. Intermediate Tagalog, Third Quarter**

Continuation of 145B.

3 units, Spr (Staff)

### **SPECLANG 146A. Advanced Tagalog, First Quarter**

3 units, Aut (Staff)

### **SPECLANG 146B. Advanced Tagalog, Second Quarter**

3 units, Win (Staff)

### **SPECLANG 146C. Advanced Tagalog, Third Quarter**

3 units, Spr (Staff)

### **SPECLANG 150A. Beginning Vietnamese, First Quarter**

Grammatical structures, vocabulary, and sentence patterns through speaking, reading, writing, and listening. Vietnamese culture.

3 units, Aut (Nguyen, D)

### **SPECLANG 150B. Beginning Vietnamese, Second Quarter**

Continuation of 150A.

3 units, Win (Nguyen, D)

### **SPECLANG 150C. Beginning Vietnamese, Third Quarter**

Continuation of 150B.

3 units, Spr (Nguyen, D)

### **SPECLANG 151A. Intermediate Vietnamese, First Quarter**

Continuation of 150C. Fulfills the University language requirement.

3 units, Aut (Nguyen, D)

### **SPECLANG 151B. Intermediate Vietnamese, Second quarter**

Continuation of 151A.

3 units, Win (Nguyen, D)

### **SPECLANG 151C. Intermediate Vietnamese, Third Quarter**

Continuation of 151B.

3 units, Spr (Nguyen, D)

### **SPECLANG 152A. Beginning Hindi, First Quarter**

Grammatical structures, vocabulary, and sentence patterns through speaking, reading, writing, and listening. Hindi culture.

4 units, Aut (Desai, S)

### **SPECLANG 152B. Beginning Hindi, Second Quarter**

Continuation of 152A.

4 units, Win (Malhotra, P)

### **SPECLANG 152C. Beginning Hindi, Third Quarter**

Continuation of 152B. Fulfills the University language requirement.

4 units, Spr (Malhotra, P)

### **SPECLANG 153A. Intermediate Hindi, First Quarter**

Second year sequence requires completion of first year or consent of the instructor. Focus on expanding all language skills, mastering grammar patterns and new vocabulary through authentic readings, writing essays, oral presentations and the use of multimedia-based materials. Focus on cultural proficiency.

4 units, Aut (Desai, S)

### **SPECLANG 153B. Intermediate Hindi, Second Quarter**

Continuation of 153A.

4 units, Win (Desai, S)

### **SPECLANG 153C. Intermediate Hindi, Third Quarter**

Continuation of 153B.

4 units, Spr (Desai, S)

### **SPECLANG 154A. Advanced Hindi, First Quarter**

Continuation of 153C.

4 units, Aut (Staff)

### **SPECLANG 154B. Advanced Hindi, Second Quarter**

Continuation of 154A.

4 units, Win (Maini, S)

### **SPECLANG 154C. Advanced Hindi, Third Quarter**

Continuation of 154B.

4 units, Spr (Maini, S)

**SPECLANG 164A. Beginning Czech, First Quarter**  
Grammatical structures, vocabulary, and sentence patterns through speaking, reading, writing, and listening. Czech culture.  
*3 units, Aut (Dusatko, J)*

**SPECLANG 164B. Beginning Czech, Second Quarter**  
Continuation of 164A.  
*3 units, Win (Dusatko, J)*

**SPECLANG 164C. Beginning Czech, Third Quarter**  
Continuation of 164B.  
*3 units, Spr (Dusatko, J)*

**SPECLANG 165A. Intermediate Czech, First Quarter**  
Continuation of 164C. Fulfills University language requirement.  
*3 units, Aut (Dusatko, J)*

**SPECLANG 165B. Intermediate Czech, Second Quarter**  
Continuation of 165A.  
*3 units, Win (Dusatko, J)*

**SPECLANG 165C. Intermediate Czech, Third Quarter**  
Continuation of 165B.  
*3 units, Spr (Dusatko, J)*

**SPECLANG 167A. Beginning Polish, First Quarter**  
Grammatical structures, vocabulary, and sentence patterns through speaking, reading, writing, and listening. Polish culture.  
*3 units, Aut (Bartoszewski, L)*

**SPECLANG 167B. Beginning Polish, Second Quarter**  
Continuation of 167A.  
*3 units, Win (Bartoszewski, L)*

**SPECLANG 167C. Beginning Polish, Third Quarter**  
Continuation of 167B.  
*3 units, Spr (Bartoszewski, L)*

**SPECLANG 168A. Intermediate Polish, First Quarter**  
Continuation of 167C. Fulfills the University language requirement.  
*3 units, Aut (Bartoszewski, L)*

**SPECLANG 168B. Intermediate Polish, Second Quarter**  
Continuation of 168A.  
*3 units, Win (Bartoszewski, L)*

**SPECLANG 168C. Intermediate Polish, Third Quarter**  
Continuation of 168B.  
*3 units, Spr (Bartoszewski, L)*

**SPECLANG 170A. Beginning Modern Greek, First Quarter**  
Grammatical structures, vocabulary, and sentence patterns through speaking, reading, writing, and listening. Greek culture.  
*4 units, Aut (Prionas, E)*

**SPECLANG 170B. Beginning Modern Greek, Second Quarter**  
Continuation of 170A.  
*4 units, Win (Prionas, E)*

**SPECLANG 170C. Beginning Modern Greek, Third Quarter**  
Continuation of 170B. Emphasis on speaking, reading, writing and listening. Student-centered, interactive approach focuses on mastering the basic grammar structures and basic vocabulary through a multimodal approach. Introduction to the Greek culture. Fulfills the University language requirement.  
*4 units, Spr (Prionas, E)*

**SPECLANG 173A. Beginning Hungarian, First Quarter**  
Grammatical structures, vocabulary, and sentence patterns through speaking, reading, writing, and listening. Hungarian culture.  
*3 units, Aut (Szoke, E)*

**SPECLANG 173B. Beginning Hungarian, Second Quarter**  
Continuation of 173A.  
*3 units, Win (Szoke, E)*

**SPECLANG 173C. Beginning Hungarian, Third Quarter**  
Emphasis on speaking, reading, writing and listening. Student-centered, interactive approach focuses on mastering the basic grammar structures and basic vocabulary. Introduction to the Hungarian culture.  
*3 units, Spr (Szoke, E)*

**SPECLANG 174A. Beginning Quechua, First Quarter**  
Grammatical structures, vocabulary, and sentence patterns through speaking, reading, writing, and listening. Quechua culture.  
*3 units, Aut (Fajardo, J)*

**SPECLANG 174B. Beginning Quechua, Second Quarter**  
Continuation of 174A.  
*3 units, Win (Fajardo, J)*

**SPECLANG 174C. Beginning Quechua, Third Quarter**  
Continuation of 174B.  
*3 units, Spr (Fajardo, J)*

**SPECLANG 176B. Beginning Thai, Second Quarter**  
Grammatical structures, vocabulary, and sentence patterns through speaking, reading, writing, and listening. Thai culture.  
*3 units, Win (Moore, R)*

**SPECLANG 177A. Intermediate Thai, First Quarter**  
Grammar structures and vocabulary through authentic materials. Cultural proficiency.  
*3 units, Aut (Staff)*

**SPECLANG 177B. Intermediate Thai, Second Quarter**  
Grammar structures and vocabulary through authentic materials. Cultural proficiency.  
*3 units, Win (Staff)*

**SPECLANG 177C. Intermediate Thai, Third Quarter**  
Grammar structures and vocabulary through authentic materials. Cultural proficiency.  
*3 units, Spr (Moore, R)*

**SPECLANG 178A. Beginning Sign Language, First Quarter**  
Comprehension and production skills; cultural awareness necessary for communication. Limited enrollment.  
*4 units, Aut (Haas, C)*

**SPECLANG 178B. Beginning Sign Language, Second Quarter**  
continuation of 178A.  
*4 units, Win (Haas, C)*

**SPECLANG 178C. Beginning Sign Language, Third Quarter**  
Continuation of 178B. Fulfills the University language requirement.  
*4 units, Spr (Haas, C)*

**SPECLANG 179A. Intermediate Sign Language, First Quarter**  
Additional functional structures, lexical items, and history. Limited enrollment.  
*4 units, Aut (Haas, C)*

**SPECLANG 179B. Intermediate Sign Language, Second Quarter**  
Continuation of 179A. Limited enrollment.  
*4 units, Win (Haas, C)*

**SPECLANG 179C. Intermediate Sign Language, Third Quarter**  
Continuation of 179B. Limited enrollment.  
*4 units, Spr (Haas, C)*

**SPECLANG 184A. Intermediate Sanskrit, First Quarter**  
Fulfills the University language requirement.  
*3 units, Aut (Porta, F)*

**SPECLANG 184B. Intermediate Sanskrit, Second Quarter**  
Continuation of 184A.  
*3 units, Win (Porta, F)*

**SPECLANG 184C. Intermediate Sanskrit, Third Quarter**  
Continuation of 184B.  
*3 units, Spr (Porta, F)*

**SPECLANG 186A. Beginning Serbo-Croatian, First Quarter**  
Grammatical structures, vocabulary, and sentence patterns through speaking, reading, writing, and listening. Serb and Croat culture.  
*3 units, Aut (Staff)*

**SPECLANG 186B. Beginning Serbo-Croatian, Second Quarter**  
Continuation of 186A.  
*3 units, Win (Staff)*

**SPECLANG 186C. Beginning Serbo-Croatian, Third Quarter**  
Continuation of 186B.  
*3 units, Spr (Staff)*

**SPECLANG 188B. Advanced Serbo-Croatian, Second Quarter**  
*3 units, not given this year*

**SPECLANG 192A. Beginning Kazakh, First Quarter**  
Grammatical structures, vocabulary, and sentence patterns through speaking, reading, writing, and listening. Kazakh culture.  
*3 units, Aut (Kunanbaeva, A)*

**SPECLANG 192B. Beginning Kazakh, Second Quarter**

Continuation of 192A.  
3 units, Win (Kunanbaeva, A)

**SPECLANG 192C. Beginning Kazakh, Third Quarter**

Continuation of 192B.  
3 units, Spr (Kunanbaeva, A)

**SPECLANG 193A. Intermediate Kazakh, First Quarter**

Continuation of 192C. Fulfills the University language requirement.  
3 units, Aut (Kunanbaeva, A)

**SPECLANG 193B. Intermediate Kazakh, Second Quarter**

Continuation of 193A.  
3 units, Win (Kunanbaeva, A)

**SPECLANG 193C. Intermediate Kazakh, Third Quarter**

Continuation of 193B.  
3 units, Spr (Kunanbaeva, A)

**SPECLANG 198Q. Modern Greece in Film and Literature**

(S,Sem) Stanford Introductory Seminar. Preference to sophomores. Cultural and literary highlights. Filmmakers include Kakoyannis, Dassen, Boulmetis, Angelopoulos, and Scorsese; readings from Eugenides, Gage, Kavafis, Kazantzakis, Samarakis, Seferis, and Elytis. GER:DB-Hum, DB-Hum, EC-GlobalCom  
3-5 units, Aut (Prionas, E)

**SPECLANG 215A. Modern Greek for Heritage Language Learners, First Quarter**

For students of Greek background. Sources include authentic texts, multimedia materials, and Greek media.  
2-4 units, Aut (Prionas, E)

**SPECLANG 215B. Modern Greek for Heritage Language Learners, Second Quarter**

Continuation of 215A.  
2-4 units, Win (Prionas, E)

**SPECLANG 215C. Modern Greek for Heritage Language Learners, Third Quarter**

Continuation of 215B.  
2-4 units, Spr (Prionas, E)

**SPECLANG 238A. Beginning Uzbek, First Quarter**

3 units, Aut (Kunanbaeva, A)

**SPECLANG 238B. Beginning Uzbek, Second Quarter**

Continuation of 238A.  
3 units, Win (Kunanbaeva, A)

**SPECLANG 238C. Beginning Uzbek, Third Quarter**

Continuation of 238B.  
3 units, Spr (Kunanbaeva, A)

**SPECLANG 241A. Ukrainian for Speakers of a Slavic Language, First Quarter**

3 units, Aut (Staff)

**SPECLANG 241B. Ukrainian for Speakers of a Slavic Language, Second Quarter**

Continuation of 241A.  
3 units, Win (Staff)

**SPECLANG 241C. Ukrainian for Speakers of a Slavic Language, Third Quarter**

Continuation of 241B.  
3 units, Spr (Staff)

**SPECLANG 250A. Beginning Romanian, First Quarter**

3 units, Aut (Negip-Schatt, S)

**SPECLANG 250B. Beginning Romanian, Second Quarter**

3 units, Win (Negip-Schatt, S)

**SPECLANG 250C. Beginning Romanian, Third Quarter**

3 units, Spr (Negip-Schatt, S)

**SPECLANG 251A. Intermediate Romanian, First Quarter**

3 units, Aut (Staff)

**SPECLANG 251B. Intermediate Romanian, Second Quarter**

3 units, Win (Negip-Schatt, S)

**SPECLANG 251C. Intermediate Romanian, Third Quarter**

3 units, Spr (Negip-Schatt, S)

**GRADUATE COURSES IN SPECIAL LANGUAGE PROGRAM****SPECLANG 297. Directed Reading**

Prerequisite: consent of instructor.  
1-4 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff), by arrangement

**SPECLANG 395. Graduate Studies in Special Language**

Prerequisite: consent of instructor.  
1-4 units, Aut (Staff), Win (Staff), Spr (Staff)

**STATISTICS (STATS)****UNDERGRADUATE COURSES IN STATISTICS****STATS 47N. Breaking the Code?**

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Cryptography and its counterpart, cryptanalysis or code breaking. How the earliest cryptanalysts used statistical tools to decrypt messages by uncovering recurring patterns. How such frequency-analysis tools have been used to analyze biblical texts to produce a Bible code, and to detect genes in the human genome. Overview of codes and ciphers. Statistical tools useful for code breaking. Students use simple computer programs to apply these tools to break codes and explore applications to various kinds of data. GER:DB-Math

3 units, Aut (Holmes, S)

**STATS 50. Mathematics of Sports**

(Same as MCS 100) The use of mathematics, statistics, and probability in the analysis of sports performance, sports records, and strategy. Topics include mathematical analysis of the physics of sports and the determinations of optimal strategies. New diagnostic statistics and strategies for each sport. Corequisite: STATS 116. GER:DB-Math

3 units, Aut (Cover, T)

**STATS 60. Introduction to Statistical Methods: Precalculus**

(Same as PSYCH 10, STATS 160) Techniques for organizing data, computing, and interpreting measures of central tendency, variability, and association. Estimation, confidence intervals, tests of hypotheses, t-tests, correlation, and regression. Possible topics: analysis of variance and chi-square tests, computer statistical packages. GER:DB-Math

5 units, Aut (Switzer, P), Win (Thomas, E), Spr (Walther, G), Sum (Staff)

**STATS 110. Statistical Methods in Engineering and the Physical Sciences**

Introduction to statistics for engineers and physical scientists. Topics: descriptive statistics, probability, interval estimation, tests of hypotheses, nonparametric methods, linear regression, analysis of variance, elementary experimental design. Prerequisite: one year of calculus. GER:DB-Math

4-5 units, Aut (De la Cruz Cabrera, O), Sum (Staff)

**STATS 116. Theory of Probability**

Probability spaces as models for phenomena with statistical regularity. Discrete spaces (binomial, hypergeometric, Poisson). Continuous spaces (normal, exponential) and densities. Random variables, expectation, independence, conditional probability. Introduction to the laws of large numbers and central limit theorem. Prerequisites: MATH 52 and familiarity with infinite series, or equivalent. GER:DB-Math

3-5 units, Aut (Siegmond, D), Spr (Walther, G), Sum (Staff)

**STATS 141. Biostatistics**

(Same as BIO 141) Introductory statistical methods for biological data: describing data (numerical and graphical summaries); introduction to probability; and statistical inference (hypothesis tests and confidence intervals). Intermediate statistical methods: comparing groups (analysis of variance); analyzing associations (linear and logistic regression); and methods for categorical data (contingency tables and odds ratio). Course content integrated with statistical computing in R. GER:DB-Math

4-5 units, Aut (Boik, J), Win (Feldman, M)

**STATS 166. Computational Biology**

(Same as BIOMEDIN 366, STATS 366) Methods to understand sequence alignments and phylogenetic trees built from molecular data, and general genetic data. Phylogenetic trees, median networks, microarray analysis, Bayesian statistics. Binary labeled trees as combinatorial objects, graphs, and networks. Distances between trees. Multivariate methods (PCA, CA, multidimensional scaling). Combining data, nonparametric inference. Algorithms used: branch and bound, dynamic programming, Markov chain approach to combinatorial optimization (simulated annealing, Markov chain Monte Carlo, approximate counting, exact tests). Software such as Matlab, Phylip, Seq-gen, Arlequin, Puzzle, Splitstree, XGobi.

2-3 units, Spr (Zhang, N)

**STATS 167. Probability: Ten Great Ideas About Chance**

(Same as PHIL 166, PHIL 266, STATS 267) Foundational approaches to thinking about chance in matters such as gambling, the law, and everyday affairs. Topics include: chance and decisions; the mathematics of chance; frequencies, symmetry, and chance; Bayes great idea; chance and psychology; misuses of chance; and harnessing chance. Emphasis is on the philosophical underpinnings and problems. Prerequisite: exposure to probability or a first course in statistics at the level of STATS 60 or 116. GER:DB-Math

4 units, Spr (Skrms, B; Diaconis, P)

**STATS 191. Introduction to Applied Statistics**

Statistical tools for modern data analysis. Topics include regression and prediction, elements of the analysis of variance, bootstrap, and cross-validation. Emphasis is on conceptual rather than theoretical understanding. Applications to social/biological sciences. Student assignments/projects require use of the software package R. Recommended: 60, 110, or 141. GER:DB-Math

3-4 units, Win (Taylor, J)

**STATS 199. Independent Study**

For undergraduates.

1-15 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**GRADUATE COURSES IN STATISTICS****STATS 160. Introduction to Statistical Methods: Precalculus**

(Same as PSYCH 10, STATS 60) Techniques for organizing data, computing, and interpreting measures of central tendency, variability, and association. Estimation, confidence intervals, tests of hypotheses, t-tests, correlation, and regression. Possible topics: analysis of variance and chi-square tests, computer statistical packages.

5 units, Aut (Switzer, P), Win (Thomas, E), Spr (Walther, G), Sum (Staff)

**STATS 200. Introduction to Statistical Inference**

Modern statistical concepts and procedures derived from a mathematical framework. Statistical inference, decision theory; point and interval estimation, tests of hypotheses; Neyman-Pearson theory. Bayesian analysis; maximum likelihood, large sample theory. Prerequisite: 116.

3 units, Win (Siegmond, D), Sum (Staff)

**STATS 202. Data Mining and Analysis**

Data mining is used to discover patterns and relationships in data. Emphasis is on large complex data sets such as those in very large databases or through web mining. Topics: decision trees, neural networks, association rules, clustering, case based methods, and data visualization.

3 units, Aut (Taylor, J), Sum (Staff)

**STATS 203. Introduction to Regression Models and Analysis of Variance**

Modeling and interpretation of observational and experimental data using linear and nonlinear regression methods. Model building and selection methods. Multivariable analysis. Fixed and random effects models. Experimental design. Pre- or corequisite: 200.

3 units, Win (Zhang, N)

**STATS 206. Applied Multivariate Analysis**

Introduction to the statistical analysis of several quantitative measurements on each observational unit. Emphasis is on concepts, computer-intensive methods. Examples from economics, education, geology, psychology. Topics: multiple regression, multivariate analysis of variance, principal components, factor analysis,

canonical correlations, multidimensional scaling, clustering. Pre- or corequisite: 200.

3 units, Aut (De la Cruz Cabrera, O)

**STATS 208. Introduction to the Bootstrap**

The bootstrap is a computer-based method for assigning measures of accuracy to statistical estimates. By substituting computation in place of mathematical formulas, it permits the statistical analysis of complicated estimators. Topics: nonparametric assessment of standard errors, biases, and confidence intervals; related resampling methods including the jackknife, cross-validation, and permutation tests. Theory and applications. Prerequisite: course in statistics or probability.

3 units, not given this year

**STATS 209. Understanding Statistical Models and their Social Science Applications**

(Same as EDUC 260X, HRP 239) Critical examination of statistical methods in social science applications, especially for cause and effect determinations. Topics: path analysis, multilevel models, matching and propensity score methods, analysis of covariance, instrumental variables, compliance, longitudinal data, mediating and moderating variables. See <http://www-stat.stanford.edu/~rag/stat209>. Prerequisite: intermediate-level statistical methods

3 units, Win (Rogosa, D)

**STATS 211. Topics in Quantitative Methods: Meta-Analysis**

Meta-analysis as a quantitative method for combining the results of independent studies enabling researchers to evaluate available evidence. Examples of meta-analysis in medicine, education, and social and behavioral sciences. Statistical methods include nonparametric methods, contingency tables, regression and analysis of variance, and Bayesian methods. Project involving an existing published meta-analysis. Prerequisite: basic sequence in statistics.

1-3 units, Win (Olkin, I; McMahan, D)

**STATS 212. Applied Statistics with SAS**

Data analysis and implementation of statistical tools in SAS. Topics: reading in and describing data, categorical data, dates and longitudinal data, correlation and regression, nonparametric comparisons, ANOVA, multiple regression, multivariate data analysis, using arrays and macros in SAS. Prerequisite: statistical techniques at the level of STATS 191 or 203; knowledge of SAS not required.

3 units, Sum (Staff)

**STATS 214. Randomness in the Physical World**

(Same as APPPHYS 214) Topics include: random numbers, and their generation and application; disordered systems, quenching, and annealing; percolation and fractal structures; universality, the renormalization group, and limit theorems; path integrals, partition functions, and Wiener measure; random matrices; and optical estimation. Prerequisite: introductory course in statistical mechanics or analysis.

3 units, alternate years, not given this year

**STATS 215. Statistical Models in Biology**

Poisson and renewal processes, Markov chains in discrete and continuous time, branching processes, diffusion. Applications to models of nucleotide evolution, recombination, the Wright-Fisher process, coalescence, genetic mapping, sequence analysis. Theoretical material approximately the same as in STATS 217, but emphasis is on examples drawn from applications in biology, especially genetics. Prerequisite: 116 or equivalent.

3 units, Win (Zhang, N)

**STATS 217. Introduction to Stochastic Processes**

Discrete and continuous time Markov chains, point processes, random walks, branching processes, first passage times, recurrence and transience, stationary distributions. Prerequisite: STATS 116 or consent of instructor.

3 units, Win (Rajaratnam, B), Sum (Staff)

**STATS 218. Introduction to Stochastic Processes**

Renewal theory, Brownian motion, Gaussian processes, second order processes, martingales.

3 units, Spr (Staff), Sum (Alsmeyer, G)

**STATS 219. Stochastic Processes**

(Same as MATH 136) Introduction to measure theory, Lp spaces and Hilbert spaces. Random variables, expectation, conditional expectation, conditional distribution. Uniform integrability, almost

sure and  $L_p$  convergence. Stochastic processes: definition, stationarity, sample path continuity. Examples: random walk, Markov chains, Gaussian processes, Poisson processes, Martingales. Construction and basic properties of Brownian motion. Prerequisite: STATS 116 or MATH 151 or equivalent. Recommended: MATH 115 or equivalent.

3 units, Aut (Staff)

**STATS 237. Time Series Modeling and Forecasting**

Box-Jenkins and Bayesian approaches. State-space and change-point models. Application to revenue prediction, forecasting product demand, and other real world problems. Development and assessment of models and forecasts in practical applications. Hands-on experience with real data.

3 units, Sum (Staff)

**STATS 239A. Workshop in Quantitative Finance**

Topics of current interest.

1 unit, not given this year

**STATS 239B. Workshop in Quantitative Finance**

Topics of current interest. May be repeated for credit.

1 unit, not given this year

**STATS 240. Statistical Methods in Finance**

(SCPD students register for 240P.) Regression analysis and applications to investment models. Principal components and multivariate analysis. Parametric inference. Financial time series. Estimation and modeling of volatilities. Statistical methods for portfolio management. Bayesian and empirical Bayes methods.

3-4 units, Aut (Lai, T)

**STATS 240P. Statistical Methods in Finance**

For SCPD students; see 240.

3 units, Aut (Lai, T)

**STATS 241. Financial Modeling and Risk Management**

(SCPD students register for 241P.) Substantive and empirical modeling approaches in financial markets. Statistical trading strategies and their evaluation. High-frequency data and microstructure. Advanced time series modeling and forecasting. Nonparametric regression. Statistical models for market and credit risks. Back-testing, stress testing and Monte Carlo methods. Prerequisite: 240 or equivalent.

3-4 units, Spr (Lai, T)

**STATS 241P. Financial Modeling and Risk Management**

For SCPD students; see 241.

3 units, Spr (Lai, T)

**STATS 243. Introduction to Mathematical Finance**

Interest rate and discounted value. Financial derivatives, hedging, and risk management. Stochastic models of financial markets, introduction to Ito calculus and stochastic differential equations. Black-Scholes pricing of European options. Optimal stopping and American options. Prerequisites: MATH 53, STATS 116, or equivalents.

3-4 units, Sum (Staff)

**STATS 250. Mathematical Finance**

(Same as MATH 238) Stochastic models of financial markets. Forward and futures contracts. European options and equivalent martingale measures. Hedging strategies and management of risk. Term structure models and interest rate derivatives. Optimal stopping and American options. Corequisites: MATH 236 and 227 or equivalent.

3 units, Win (Papanicolaou, G)

**STATS 253. Spatial Statistics**

(Same as STATS 352) Statistical descriptions of spatial variability, spatial random functions, grid models, spatial partitions, spatial sampling, linear and nonlinear interpolation and smoothing with error estimation, Bayes methods and pattern simulation from posterior distributions, multivariate spatial statistics, spatial classification, nonstationary spatial statistics, space-time statistics and estimation of time trends from monitoring data, spatial point patterns, models of attraction and repulsion. Applications to earth and environmental sciences, meteorology, astronomy, remote-sensing, ecology, materials.

3 units, not given this year

**STATS 260A. Workshop in Biostatistics**

(Same as HRP 260A) Applications of statistical techniques to current problems in medical science.

1-2 units, Aut (Olshen, R)

**STATS 260B. Workshop in Biostatistics**

(Same as HRP 260B) Applications of statistical techniques to current problems in medical science.

1-2 units, Win (Olshen, R)

**STATS 260C. Workshop in Biostatistics**

(Same as HRP 260C) Applications of statistical techniques to current problems in medical science.

1-2 units, Spr (Olshen, R)

**STATS 261. Intermediate Biostatistics: Analysis of Discrete Data**

(Same as BIOMEDIN 233, HRP 261) Methods for analyzing data from case-control and cross-sectional studies: the 2x2 table, chi-square test, Fisher's exact test, odds ratios, Mantel-Haenzel methods, stratification, tests for matched data, logistic regression, conditional logistic regression. Emphasis is on data analysis in SAS. Special topics: cross-fold validation and bootstrap inference.

3 units, Win (Sainani, K)

**STATS 262. Intermediate Biostatistics: Regression, Prediction, Survival Analysis**

(Same as HRP 262) Methods for analyzing longitudinal data. Topics include Kaplan-Meier methods, Cox regression, hazard ratios, time-dependent variables, longitudinal data structures, profile plots, missing data, modeling change, MANOVA, repeated-measures ANOVA, GEE, and mixed models. Emphasis is on practical applications. Prerequisites: basic ANOVA and linear regression.

3 units, Spr (Staff)

**STATS 267. Probability: Ten Great Ideas About Chance**

(Same as PHIL 166, PHIL 266, STATS 167) Foundational approaches to thinking about chance in matters such as gambling, the law, and everyday affairs. Topics include: chance and decisions; the mathematics of chance; frequencies, symmetry, and chance; Bayes great idea; chance and psychology; misuses of chance; and harnessing chance. Emphasis is on the philosophical underpinnings and problems. Prerequisite: exposure to probability or a first course in statistics at the level of STATS 60 or 116.

4 units, Spr (Skyrms, B; Diaconis, P)

**STATS 270. A Course in Bayesian Statistics**

(Same as STATS 370) Advanced-level Bayesian statistics. Topics: Discussion of the mathematical and theoretical foundation for Bayesian inferential procedures. Examination of the construction of priors and the asymptotic properties of likelihoods and posterior densities. Discussion including but not limited to the case of finite dimensional parameter space. Prerequisite: familiarity with standard probability and multivariate distribution theory.

3 units, Win (Wong, W)

**STATS 290. Paradigms for Computing with Data**

For Statistics graduate students and others whose research involves data analysis and development of associated computational software. Programming and computing techniques to support projects in data analysis and related research. Prerequisites: CS 106, and STATS 110 or 141, or equivalent background.

3 units, Win (Narasimhan, B; Chambers, J)

**STATS 297. Practical Training**

For students in the M.S. program in Financial Mathematics only. Students obtain employment in a relevant industrial or research activity to enhance their professional experience. May be repeated for credit once. Prerequisite: consent of adviser.

1-3 units, Aut (Lai, T), Win (Lai, T), Spr (Lai, T), Sum (Lai, T)

**STATS 298. Industrial Research for Statisticians**

Masters-level research as in 299, but must be conducted for an off-campus employer. Final report required. Prerequisite: enrollment in Statistics M.S. or Ph.D. program, prior to candidacy.

1-9 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**STATS 299. Independent Study**

For Statistics M.S. students only. Reading or research program under the supervision of a Statistics faculty member. May be repeated for credit.

1-10 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**STATS 300. Advanced Topics in Statistics**

May be repeated for credit.

3 units, Sum (Staff)

**STATS 300A. Theory of Statistics**

Elementary decision theory; loss and risk functions, Bayes estimation; UMVU estimator, minimax estimators, shrinkage estimators. Hypothesis testing and confidence intervals: Neyman-Pearson theory; UMP tests and uniformly most accurate confidence intervals; use of unbiasedness and invariance to eliminate nuisance parameters. Large sample theory: basic convergence concepts; robustness; efficiency; contiguity, locally asymptotically normal experiments; convolution theorem; asymptotically UMP and maximin tests. Asymptotic theory of likelihood ratio and score tests. Rank permutation and randomization tests; jackknife, bootstrap, subsampling and other resampling methods. Further topics: sequential analysis, optimal experimental design, empirical processes with applications to statistics, Edgeworth expansions, density estimation, time series.

2-4 units, Aut (Johnstone, I)

**STATS 300B. Theory of Statistics**

Elementary decision theory; loss and risk functions, Bayes estimation; UMVU estimator, minimax estimators, shrinkage estimators. Hypothesis testing and confidence intervals: Neyman-Pearson theory; UMP tests and uniformly most accurate confidence intervals; use of unbiasedness and invariance to eliminate nuisance parameters. Large sample theory: basic convergence concepts; robustness; efficiency; contiguity, locally asymptotically normal experiments; convolution theorem; asymptotically UMP and maximin tests. Asymptotic theory of likelihood ratio and score tests. Rank permutation and randomization tests; jackknife, bootstrap, subsampling and other resampling methods. Further topics: sequential analysis, optimal experimental design, empirical processes with applications to statistics, Edgeworth expansions, density estimation, time series.

2-4 units, Win (Romano, J)

**STATS 300C. Theory of Statistics**

Decision theory formulation of statistical problems. Minimax, admissible procedures. Complete class theorems ("all" minimax or admissible procedures are "Bayes"), Bayes procedures, conjugate priors, hierarchical models. Bayesian non parametrics: diaichlet, tail free, poly trees, bayesian sieves. Inconsistency of bayes rules.

2-4 units, Spr (Diaconis, P)

**STATS 305. Introduction to Statistical Modeling**

The linear model: simple linear regression, polynomial regression, multiple regression, anova models; and with some extensions, orthogonal series regression, wavelets, radial basis functions, and MARS. Topics: normal theory inference (tests, confidence intervals, power), related distributions (t, chi-square, F), numerical methods (QR, SVD), model selection/regularization (Cp, AIC, BIC), diagnostics of model inadequacy, and remedies including bootstrap inference, and cross-validation. Emphasis is on problem sets involving substantial computations with data sets, including developing extensions of existing methods. Prerequisites: consent of instructor, 116, 200, applied statistics course, CS 106A, MATH 114.

2-4 units, Aut (Owen, A)

**STATS 306A. Methods for Applied Statistics**

Extension of modeling techniques of 305: binary and discrete response data and nonlinear least squares. Topics include regression, Poisson loglinear models, classification methods, clustering. May be repeated for credit. Prerequisite: 305 or equivalent.

2-4 units, Win (Johnstone, I)

**STATS 306B. Methods for Applied Statistics**

Unsupervised learning techniques in statistics, machine learning, and data mining.

2-4 units, Spr (Taylor, J)

**STATS 310A. Theory of Probability**

(Same as MATH 230A) Mathematical tools: asymptotics, metric spaces; measure and integration;  $L_p$  spaces; some Hilbert spaces theory. Probability: independence, Borel-Cantelli lemmas, almost sure and  $L_p$  convergence, weak and strong laws of large numbers. Weak convergence and characteristic functions; central limit theorems; local limit theorems; Poisson convergence. Prerequisites: 116, MATH 171.

2-4 units, Aut (Montanari, A)

**STATS 310B. Theory of Probability**

(Same as MATH 230B) Stopping times, 0-1 laws, Kolmogorov

consistency theorem. Uniform integrability. Radon-Nikodym theorem, branching processes, conditional expectation, discrete time martingales. Exchangeability. Large deviations. Laws of the iterated logarithm. Birkhoff's and Kingman's ergodic theorems. Recurrence, entropy. Prerequisite: 310A or MATH 230A.

2-4 units, Win (Siegmund, D)

**STATS 310C. Theory of Probability**

(Same as MATH 230C) Infinitely divisible laws. Continuous time martingales, random walks and Brownian motion. Invariance principle. Markov and strong Markov property. Processes with stationary independent increments. Prerequisite: 310B or MATH 230B.

2-4 units, Spr (Dembo, A)

**STATS 314. Advanced Statistical Methods**

Topic this year is multiple hypothesis testing. The demand for new methodology for the simultaneous testing of many hypotheses as driven by modern applications in genomics, imaging, astronomy, and finance. High dimensionality: how tests of many hypotheses may be considered simultaneously. Classical techniques, and recent developments. Stepwise methods, generalized error rates such as the false discovery rate, and the role of resampling. May be repeated for credit.

2-3 units, Aut (Romano, J)

**STATS 315A. Modern Applied Statistics: Learning**

Overview of supervised learning. Linear regression and related methods. Least angle regression and the lasso. Classification. Support vector machines (SVMs). Kernels and string kernels. Basic expansions and regularization. Generalized additive models. Kernel smoothing. Gaussian mixtures and EM algorithm. Model assessment and selection: cross-validation and the bootstrap. Pathwise coordinate descent and the fused lasso. Sparse graphical models. Discrete graphical models. Prerequisite: STATS 305, 306A,B or consent of instructor

2-3 units, Win (Staff)

**STATS 315B. Modern Applied Statistics: Data Mining**

Three-part sequence. New techniques for predictive and descriptive learning using ideas that bridge gaps among statistics, computer science, and artificial intelligence. Emphasis is on statistical aspects of their application and integration with more standard statistical methodology. Predictive learning refers to estimating models from data with the goal of predicting future outcomes, in particular, regression and classification models. Descriptive learning is used to discover general patterns and relationships in data without a predictive goal, viewed from a statistical perspective as computer automated exploratory analysis of large complex data sets.

2-3 units, Spr (Friedman, J)

**STATS 315C. Modern Applied Statistics: Transposable data**

Topics: clustering, biclustering, and spectral clustering. Data analysis using the singular value decomposition, nonnegative decomposition, and generalizations. Plaid model, aspect model, and additive clustering. Correspondence analysis, Rasch model, and independent component analysis. Page rank, hubs, and authorities. Probabilistic latent semantic indexing. Recommender systems. Applications to genomics and information retrieval. Prerequisite: 315A,B, 305/306A,B, or consent of instructor.

2-3 units, not given this year

**STATS 316. Stochastic Processes on Graphs**

Local weak convergence, Gibbs measures on trees, cavity method, and replica symmetry breaking. Examples include random  $k$ -satisfiability, the assignment problem, spin glasses, and neural networks. Prerequisite: 310A or equivalent.

1-3 units, Spr (Dembo, A; Montanari, A)

**STATS 317. Stochastic Processes**

Semimartingales, stochastic integration, Ito's formula, Girsanov's theorem. Gaussian and related processes. Stationary/isotropic processes. Integral geometry and geometric probability. Maxima of random fields and applications to spatial statistics and imaging.

2-3 units, not given this year

**STATS 318. Modern Markov Chains**

Tools for understanding Markov chains as they arise in applications. Random walk on graphs, reversible Markov chains, Metropolis algorithm, Gibbs sampler, hybrid Monte Carlo, auxiliary variables, hit and run, Swedson-Wong algorithms, geometric theory, Poincare-Nash-Cheger-Log-Sobolov inequalities. Compar-

ison techniques, coupling, stationary times, Harris recurrence, central limit theorems, and large deviations.

2-3 units, not given this year

### STATS 319. Literature of Statistics

Literature study of topics in statistics and probability culminating in oral and written reports. May be repeated for credit.

1-3 units, Aut (Donoho, D), Spr (Taylor, J)

### STATS 322. Function Estimation in White Noise

Gaussian white noise model sequence space form. Hyperrectangles, quadratic convexity, and Pinsker's theorem. Minimax estimation on  $L_p$  balls and Besov spaces. Role of wavelets and unconditional bases. Linear and threshold estimators. Oracle inequalities. Optimal recovery and universal thresholding. Stein's unbiased risk estimator and threshold choice. Complexity penalized model selection. Connecting fast wavelet algorithms and theory. Beyond orthogonal bases.

2-3 units, not given this year

### STATS 324. Multivariate Analysis

Classic multivariate statistics: properties of the multivariate normal distribution, determinants, volumes, projections, matrix square roots, the singular value decomposition; Wishart distributions, Hotelling's T-square; principal components, canonical correlations, Fisher's discriminant, the Cauchy projection formula.

2-3 units, not given this year

### STATS 329. Large-Scale Simultaneous Inference

Estimation, testing, and prediction for microarray-like data. Modern scientific technologies, typified by microarrays and imaging devices, produce inference problems with thousands of parallel cases to consider simultaneously. Topics: empirical Bayes techniques, James-Stein estimation, large-scale simultaneous testing, false discovery rates, local fdr, proper choice of null hypothesis (theoretical, permutation, empirical nulls), power, effects of correlation on tests and estimation accuracy, prediction methods, related sets of cases ("enrichment"), effect size estimation. Theory and methods illustrated on a variety of large-scale data sets.

1-3 units, Win (Efron, B)

### STATS 330. An Introduction to Compressed Sensing

Compressed sensing is a new data acquisition theory asserting that one can design nonadaptive sampling techniques that condense the information in a compressible signal into a small amount of data. This revelation may change the way engineers think about signal acquisition. Course covers fundamental theoretical ideas, numerical methods in large-scale convex optimization, hardware implementations, connections with statistical estimation in high dimensions, and extensions such as recovery of data matrices from few entries (famous Netflix Prize).

2-3 units, Spr (Candes, E)

### STATS 338. Topics in Biostatistics

Data monitoring and interim analysis of clinical trials. Design of Phase I, II, III trials. Survival analysis. Longitudinal data analysis.

3 units, Aut (Lai, T)

### STATS 345. Computational Algorithms for Statistical Genetics

(Same as GENE 245) Computational algorithms for human genetics research. Topics include: permutation, bootstrap, expectation maximization, hidden Markov model, and Markov chain Monte Carlo. Rationales and techniques illustrated with existing implementations commonly used in population genetics research, disease association studies, and genomics analysis. Prerequisite: GENE 244 or consent of instructor.

2-3 units, alternate years, not given this year

### STATS 351A. An Introduction to Random Matrix Theory

(Same as MATH 231A) Patterns in the eigenvalue distribution of typical large matrices, which also show up in physics (energy distribution in scattering experiments), combinatorics (length of longest increasing subsequence), first passage percolation and number theory (zeros of the zeta function). Classical compact ensembles (random orthogonal matrices). The tools of determinantal point processes.

3 units, Aut (Staff)

### STATS 352. Spatial Statistics

(Same as STATS 253) Statistical descriptions of spatial variability, spatial random functions, grid models, spatial partitions, spatial sampling, linear and nonlinear interpolation and smoothing with

error estimation, Bayes methods and pattern simulation from posterior distributions, multivariate spatial statistics, spatial classification, nonstationary spatial statistics, space-time statistics and estimation of time trends from monitoring data, spatial point patterns, models of attraction and repulsion. Applications to earth and environmental sciences, meteorology, astronomy, remote-sensing, ecology, materials.

3 units, not given this year

### STATS 362. Monte Carlo Sampling

Fundamentals of Monte Carlo methods. Generating uniform and nonuniform variables, random vectors and processes. Monte Carlo integration and variance reduction. Quasi-Monte Carlo sampling. Markov chain Monte Carlo, including Gibbs sampling and Metropolis-Hastings. Examples, problems and motivations from Bayesian statistics, computational finance, computer graphics, physics.

2-3 units, Aut (Owen, A)

### STATS 366. Computational Biology

(Same as BIOMEDIN 366, STATS 166) Methods to understand sequence alignments and phylogenetic trees built from molecular data, and general genetic data. Phylogenetic trees, median networks, microarray analysis, Bayesian statistics. Binary labeled trees as combinatorial objects, graphs, and networks. Distances between trees. Multivariate methods (PCA, CA, multidimensional scaling). Combining data, nonparametric inference. Algorithms used: branch and bound, dynamic programming, Markov chain approach to combinatorial optimization (simulated annealing, Markov chain Monte Carlo, approximate counting, exact tests). Software such as Matlab, Phylip, Seq-gen, Arlequin, Puzzle, Splitstree, XGobi.

2-3 units, Spr (Zhang, N)

### STATS 370. A Course in Bayesian Statistics

(Same as STATS 270) Advanced-level Bayesian statistics. Topics: Discussion of the mathematical and theoretical foundation for Bayesian inferential procedures. Examination of the construction of priors and the asymptotic properties of likelihoods and posterior densities. Discussion including but not limited to the case of finite dimensional parameter space. Prerequisite: familiarity with standard probability and multivariate distribution theory.

3 units, Win (Wong, W)

### STATS 390. Consulting Workshop

Skills required of practicing statistical consultants, including exposure to statistical applications. Students participate as consultants in the department's drop-in consulting service, analyze client data, and prepare formal written reports. Seminar provides supervised experience in short term consulting. May be repeated for credit. Prerequisites: course work in applied statistics or data analysis, and consent of instructor.

1-3 units, Aut (Olshen, R), Win (Holmes, S), Spr (Switzer, P), Sum (Staff)

### STATS 398. Industrial Research for Statisticians

Doctoral research as in 298, but must be conducted for an off-campus employer. Final report required. May be repeated for credit. Prerequisite: Statistics Ph.D. candidate.

1-9 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

### STATS 399. Research

Research work as distinguished from independent study of nonresearch character listed in 199. May be repeated for credit.

1-10 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

## STRUCTURAL BIOLOGY (SBIO)

### UNDERGRADUATE COURSES IN STRUCTURAL BIOLOGY

#### SBIO 199. Undergraduate Research

Students undertake investigations sponsored by individual faculty members. Prerequisite: consent of instructor.

1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

## GRADUATE COURSES IN STRUCTURAL BIOLOGY

### SBIO 228. Computational Structural Biology

(Same as BIOPHYS 228) Interatomic forces and interactions such as electrostatics and hydrophobicity, and protein structure in terms of amino acid properties, local chain conformation, secondary structure, domains, and families of folds. How protein motion can be simulated. Bioinformatics introduced in terms of methods that compare proteins via their amino acid sequences and their three-dimensional structures. Structure prediction via simple comparative modeling. How to detect and model remote homologues. Predicting the structure of a protein from knowledge of its amino acid sequence. Via Internet.

3 units, not given this year

### SBIO 241. Biological Macromolecules

(Same as BIOC 241, BIOPHYS 241) The physical and chemical basis of macromolecular function. Forces that stabilize biopolymers with three-dimensional structures and their functional implications. Thermodynamics, molecular forces, and kinetics of enzymatic and diffusional processes, and relationship to their practical application in experimental design and interpretation. Biological function and the level of individual molecular interactions and at the level of complex processes. Case studies. Prerequisites: introductory biochemistry and physical chemistry or consent of instructor.

3-5 units, Aut (Herschlag, D; Garcia, K; Ferrell, J; Block, S; Weis, W)

### SBIO 242. Methods in Molecular Biophysics

(Same as BIOPHYS 242) Experimental methods in molecular biophysics from theoretical and practical standpoints. Emphasis is on X-ray diffraction, nuclear magnetic resonance, and fluorescence spectroscopy. Prerequisite: physical chemistry or consent of instructor.

3 units, alternate years, not given this year

### SBIO 274. Topics in Nucleic Acid Structure and Function

Principles of nucleic acid structure and function. Methods for investigating nucleic acid structure. Limited to graduate students and postdoctoral fellows in structural biology. Prerequisite: consent of instructor.

2 units, not given this year

### SBIO 299. Directed Reading in Structural Biology

Prerequisite: consent of instructor.

1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

### SBIO 370. Medical Scholars Research

Provides an opportunity for student and faculty interaction, as well as academic credit and financial support, to medical students who undertake original research. Enrollment is limited to students with approved projects.

4-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

### SBIO 399. Graduate Research

Students undertake investigations sponsored by individual faculty members. Prerequisite: consent of instructor.

1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

## STRUCTURED LIBERAL EDUCATION (SLE)

### UNDERGRADUATE COURSES IN STRUCTURED LIBERAL EDUCATION

#### SLE 91. Structured Liberal Education

Three quarter sequence; restricted to and required of SLE students. Comprehensive study of the intellectual foundations of the western tradition in dialogue with eastern, indigenous, and postcolonial perspectives. The cultural foundations of western civilization in ancient Greece, Rome, and the Middle East, with attention to Buddhist and Hindu counterparts and the questions these traditions address in common. Texts and authors include Homer, Plato, Aristotle, Greek tragedy, Sappho, the Hebrew Bible, the New Testament, Saint Augustine, and texts from Hindu and Buddhist tradi-

tions. GER:DB-Hum, IHUM-1

9 units, Aut (Lougee Chappell, C; Greenberg, S; Watkins, G)

#### SLE 92. Structured Liberal Education

Three quarter sequence; restricted to and required of SLE students. Comprehensive study of the intellectual foundations of the western tradition in dialogue with eastern, indigenous, and postcolonial perspectives. The foundations of the modern world, from late antiquity through the Middle Ages, the Renaissance, the Enlightenment, and the Scientific Revolution. Authors include Dante, Descartes, Shakespeare, and texts from Chinese and Islamic traditions. GER:DB-Hum, IHUM-2

9 units, Win (Lougee Chappell, C; Greenberg, S; Watkins, G)

#### SLE 93. Structured Liberal Education

Three quarter sequence; restricted to and required of SLE students. Comprehensive study of the intellectual foundations of the western tradition in dialogue with eastern, indigenous, and postcolonial perspectives. Modernity as a period in intellectual history and a problem in the human sciences. Authors include Marx, Nietzsche, Freud, Kafka, Woolf, Eliot, and Sartre. GER:DB-Hum, IHUM-3

10 units, Spr (Lougee Chappell, C; Greenberg, S; Watkins, G)

#### SLE 199. Teaching SLE

1-3 units, Aut (Lougee Chappell, C; Greenberg, S), Win (Mancall, M; Greenberg, S), Spr (Greenberg, S; Greene, R)

## SURGERY (SURG)

### UNDERGRADUATE COURSES IN SURGERY

#### SURG 68Q. Current Concepts in Transplantation

(S,Sem) Stanford Introductory Seminar. Preference to sophomores. Biological aspects of cell and organ transplantation, including issues that arise in the media. Diseases for which transplantation is a treatment, the state of the art in human transplantation, transplantation of animal tissue into humans (xenotransplantation), development of new tissue and organs in the laboratory (tissue engineering and cloning), and development of drugs and biological strategies to promote long-term survival of the tissue or organ (tolerance). How to write a scientific abstract, critique scientific literature, and research and present topics in contemporary transplantation.

3 units, Spr (Martinez, O; Krams, S)

#### SURG 69Q. It's All in the Head: Understanding Diversity, Development, and Deformities of the Face

(S,Sem) Stanford Introductory Seminar. Preference to sophomores. How the face conveys moods and emotions, and elicits reactions when disease or genetic disorders leave behind disfigurement. New work by evolutionary and molecular biologists concerning how variations in facial form are elicited; how tissues and molecules interact to form the face. How differences in facial anatomy affect an individual's self-perception and their acceptance in our beauty-conscious society.

3-4 units, Win (Helms, J; Brugmann, S)

#### SURG 70Q. Surgical Anatomy of the Hand: From Rodin to Reconstruction

(F,Dial) Stanford Introductory Dialogue. The surgical anatomy of the hand is extremely complex in terms of structure and function. Exploration of the anatomy of the hand in different contexts: its representation in art forms, the historical development of the study of hand anatomy, current operative techniques for reconstruction, advances in tissue engineering, and the future of hand transplantation.

2 units, Win (Chang, J)

#### SURG 101. Regional Study of Human Structure

Preference to seniors. Lectures in regional anatomy and dissection of the human cadaver; the anatomy of the trunk and limbs through the dissection process, excluding the head and neck.

5 units, Win (Gosling, J; Whitmore, I)

#### SURG 102. Theory of International Humanitarian Surgery

(Same as SURG 202) Open to undergraduate, graduate, and medical students. Focus is on understanding the ethics of international surgical aid, the role of surgery in international health, humanita-

rian theory, the role of students in the international health setting, and business and medicine in the social sector. Opportunities for international health service. Guest speakers include world-renowned physicians, CEOs, and public health workers.

4 units, Win (Samagh, S; Samagh, S; Laub, D; Chang, J)

**SURG 111A. Emergency Medical Technician (EMT-1): Training and Application**

(Same as SURG 211A) (Graduate students register for 211A.) Basics of life support outside the hospital setting; readiness training for emergencies on- or off-campus. Topics include emergency patient assessments, and cardiac, respiratory, and neurological emergencies. Lectures, practicals, and applications. Upon completion of SURG 111A,B,C or 211A,B,C, students are eligible to sit for the National Registry EMT licensure exam. Prerequisites: CPR certification; application (see <http://surg211.stanford.edu>), and consent of instructor.

3 units, Aut (Gilbert, G; D'Souza, P; Espinoza, N)

**SURG 111B. Emergency Medical Technician (EMT-1): Training and Application**

(Same as SURG 211B) (Graduate students register for 211B.) Continuation of 111A/211A. Approach to traumatic injuries. Topics include head, neck, and trunk injuries, bleeding and shock, burn emergencies, and environmental emergencies. Lectures, practicals, and applications. Upon completion of SURG 111A,B,C or 211A,B,C, students are eligible to sit for the National Registry EMT licensure exam. Prerequisite: 111A/211A and consent of instructor.

3 units, Win (Gilbert, G; D'Souza, P; Espinoza, N)

**SURG 111C. Emergency Medical Technician (EMT-1): Training and Application**

(Same as SURG 211C) (Graduate students register for 211C.) Continuation of 111B/211B. Special topics in EMS; topics include pediatric, obstetric, and gynecologic emergencies, EMS operations, mass casualty incidents, and assault. Lectures, practicals, and applications. Upon completion of SURG 111A,B,C or 211A,B,C, students are eligible to sit for the National Registry EMT certification exam. Prerequisite: 111B/211B, CPR-PR certification, and consent of instructor.

3 units, Spr (Gilbert, G; D'Souza, P; Espinoza, N)

**SURG 112A. Advanced Reading and Teaching for the EMT-1**

(Same as SURG 212A) Advanced Topics in EMS and training in teaching BLS skills (Graduate students register for 212A.) Topics include advanced airway and stroke management, abdominal emergencies, and prehospital pharmacology. Prerequisites: SURG 111/211 A-C (or equivalent EMT-Basic certification), CPR for the Professional Rescuer certification, and consent of instructor. May be repeated for credit.

2-3 units, Aut (Gilbert, G; D'Souza, P; Espinoza, N)

**SURG 112B. Advanced Reading and Teaching for the EMT-1**

(Same as SURG 212B) Advanced Topics in EMS and training in teaching BLS skills. (Graduate students register for 212B.) Topics include advanced assessment and treatment of the undifferentiated trauma patient (including advanced airway management, monitoring, and evaluation) and prehospital care in nontraditional locations. Prerequisites: SURG 111/211 A-C (or equivalent EMT-Basic certification), CPR for the Professional Rescuer certification, and consent of instructor. May be repeated for credit.

2-3 units, Win (Gilbert, G; D'Souza, P; Espinoza, N)

**SURG 112C. Advanced Reading and Teaching for the EMT-1**

(Same as SURG 212C) Advanced Topics in EMS and training in teaching BLS skills. (Graduate students register for 212C.) Topics include advanced assessment and treatment of patients in difficult and advanced situations - mass casualty incidents, assaults, pediatrics; and advanced emergency skills - ultrasound, suturing. Prerequisites: SURG 111/211 A-C (or equivalent EMT-Basic certification), CPR for the Professional Rescuer certification, and consent of instructor. May be repeated for credit.

2-3 units, Spr (Gilbert, G; D'Souza, P; Espinoza, N)

**SURG 199. Undergraduate Research**

Investigations sponsored by individual faculty members. Prerequisite: consent of instructor.

1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

## GRADUATE COURSES IN SURGERY

**SURG 201. Basic Cardiac Life Support**

All medical students must be certified in Basic Cardiac Life Support before the end of the first (autumn) quarter. Students who provide documentation of certification received within six months prior to the date of matriculation will be exempted from the requirement. The course teaches one- and two-rescuer CPR, management of an obstructed airway, and CPR for infants and children. Upon completion of the course, students receive an American Heart Association certificate in BLS.

1 unit, Aut (Smith-Coggins, R)

**SURG 202. Theory of International Humanitarian Surgery**

(Same as SURG 102) Open to undergraduate, graduate, and medical students. Focus is on understanding the ethics of international surgical aid, the role of surgery in international health, humanitarian theory, the role of students in the international health setting, and business and medicine in the social sector. Opportunities for international health service. Guest speakers include world-renowned physicians, CEOs, and public health workers.

4 units, Win (Samagh, S; Samagh, S; Laub, D; Chang, J)

**SURG 203A. Human Anatomy**

Introduction to human structure and function presented from a medical perspective. Introduction to the physical examination and frequently-used medical imaging techniques. Students are required to attend lectures, actively participate in seminar groups, and engage in dissection of the human body in the anatomy laboratory. Surgery 203A presents structure of the thorax, abdomen, pelvis and limbs.

11 units, Aut (Gosling, J; Whitmore, I)

**SURG 203B. Human Anatomy**

Continues the introduction to human structure and function from a medical perspective, the physical examination, and frequently-used medical imaging techniques. Students are required to attend lectures, actively participate in seminar groups, and engage in dissection of the human body in the anatomy laboratory. Surgery 203B presents structure of the head, neck and back.

4 units, Win (Gosling, J; Whitmore, I)

**SURG 204. Introduction to Surgery and Surgical Techniques**

Innovative introduction to the various aspects of surgery directed at pre-clinical MD students. Students participate in interactive clinical surgical scenarios animated by attending physicians. Covers the spectrum of surgical specialties. Includes scrubbing techniques, basic instrument handling, and the opportunity to scrub in on operations at Stanford Hospital.

1 unit, Aut (Greco, R)

**SURG 205. Advanced Suturing Techniques**

Builds upon skills taught in the Surgical Interest Group's introductory suturing workshops. Techniques such as suturing in a hole, suturing different tissues, and hand, instrument and laparoscopic knot tying.

1 unit, Aut (Woodard, G; Visser, B)

**SURG 208. Plastic Surgery Tutorial**

Diagnosis, theory, and practice of plastic and reconstructive surgery. Limited to two students per faculty member.

2 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**SURG 209. Plastic Surgery**

Students participate in plastic and reconstructive surgery as functioning members of the clinical team. Students are exposed to operative surgery, emergency and trauma care, evaluation of operative candidates in the outpatient setting, and also attend teaching conferences. Limited to four students. Prerequisite: completion of first year or clinical experience.

1-18 units, Aut (Chang, J; Schendel, S; Lorenz, H; Longaker, M; Gurtner, G; Girod, S; Hentz, V; Lee, G), Win (Chang, J; Schendel, S; Lorenz, H; Longaker, M; Gurtner, G; Girod, S; Hentz, V; Lee, G), Spr (Staff), Sum (Chang, J; Schendel, S; Lorenz, H; Lo

**SURG 211A. Emergency Medical Technician (EMT-1): Training and Application**

(Same as SURG 111A) (Graduate students register for 211A.) Basics of life support outside the hospital setting; readiness training for emergencies on- or off-campus. Topics include emergency patient assessments, and cardiac, respiratory, and neurological

emergencies. Lectures, practicals, and applications. Upon completion of SURG 111A,B,C or 211A,B,C, students are eligible to sit for the National Registry EMT licensure exam. Prerequisites: CPR certification; application (see <http://surg211.stanford.edu>), and consent of instructor.

3 units, Aut (Gilbert, G; D'Souza, P; Espinoza, N)

**SURG 211B. Emergency Medical Technician (EMT-1): Training and Application**

(Same as SURG 111B) (Graduate students register for 211B.) Continuation of 111A/211A. Approach to traumatic injuries. Topics include head, neck, and trunk injuries, bleeding and shock, burn emergencies, and environmental emergencies. Lectures, practicals, and applications. Upon completion of SURG 111A,B,C or 211A,B,C, students are eligible to sit for the National Registry EMT licensure exam. Prerequisite: 111A/211A and consent of instructor.

3 units, Win (Gilbert, G; D'Souza, P; Espinoza, N)

**SURG 211C. Emergency Medical Technician (EMT-1): Training and Application**

(Same as SURG 111C) (Graduate students register for 211C.) Continuation of 111B/211B. Special topics in EMS; topics include pediatric, obstetric, and gynecologic emergencies, EMS operations, mass casualty incidents, and assault. Lectures, practicals, and applications. Upon completion of SURG 111A,B,C or 211A,B,C, students are eligible to sit for the National Registry EMT certification exam. Prerequisite: 111B/211B, CPR-PR certification, and consent of instructor.

3 units, Spr (Gilbert, G; D'Souza, P; Espinoza, N)

**SURG 212A. Advanced Reading and Teaching for the EMT-1**

(Same as SURG 112A) Advanced Topics in EMS and training in teaching BLS skills. (Graduate students register for 212A.) Topics include advanced airway and stroke management, abdominal emergencies, and prehospital pharmacology. Prerequisites: SURG 111/211 A-C (or equivalent EMT-Basic certification), CPR for the Professional Rescuer certification, and consent of instructor. May be repeated for credit.

2-3 units, Aut (Gilbert, G; D'Souza, P; Espinoza, N)

**SURG 212B. Advanced Reading and Teaching for the EMT-1**

(Same as SURG 112B) Advanced Topics in EMS and training in teaching BLS skills. (Graduate students register for 212B.) Topics include advanced assessment and treatment of the undifferentiated trauma patient (including advanced airway management, monitoring, and evaluation) and prehospital care in nontraditional locations. Prerequisites: SURG 111/211 A-C (or equivalent EMT-Basic certification), CPR for the Professional Rescuer certification, and consent of instructor. May be repeated for credit.

2-3 units, Win (Gilbert, G; D'Souza, P; Espinoza, N)

**SURG 212C. Advanced Reading and Teaching for the EMT-1**

(Same as SURG 112C) Advanced Topics in EMS and training in teaching BLS skills. (Graduate students register for 212C.) Topics include advanced assessment and treatment of patients in difficult and advanced situations - mass casualty incidents, assaults, pediatrics; and advanced emergency skills - ultrasound, suturing. Prerequisites: SURG 111/211 A-C (or equivalent EMT-Basic certification), CPR for the Professional Rescuer certification, and consent of instructor. May be repeated for credit.

2-3 units, Spr (Gilbert, G; D'Souza, P; Espinoza, N)

**SURG 223. Wilderness Medicine**

Open to all students. Wilderness-related illnesses and injuries; framework for dealing with emergencies in the backcountry. Hands-on workshops. Topics include high altitude medicine, backcountry orthopedics, hypothermia, snake envenomations, search and rescue, and travel medicine. Opportunity for certification in Wilderness First Aid.

4 units, Spr (Weiss, E; Lipman, G)

**SURG 225. Transplantation Science**

Offers medical students a more in-depth understanding of the field of transplantation. Develops an understanding of transplant immunology, tissue typing, immunopharmacology, and transplant pathology. Includes such topics as heart and heart/lung transplantation, kidney/pancreas transplantation, liver transplantation, bone marrow transplantation, and donor issues. Focus is on the field of transplantation as it relates to preoperative care and management of patients prior to transplantation as well as the long term care and

follow-up of patients. Guest speakers. Prerequisites: SURG 218 (Anatomy); BIOC 200 (may be taken concurrently).

1 unit, Win (Esquivel, C)

**SURG 230. Obesity in America**

Prevalence and effects of the obesity epidemic in America and the growing prevalence of associated comorbidities such as diabetes, hypertension, hyperlipidemia, sleep apnea, and joint problems. Risk factors, multi-disciplinary treatment options, the role of food in society, patients' perspectives, and current research in the field. Includes fieldtrips to grocery stores and restaurants.

1 unit, Win (Morton, J; Woodard, G)

**SURG 231. Healthcare in Developing Countries: Haiti and Beyond**

Lunchtime lecture series open to all students. Aims to answer the deceptively simple question: How can we improve health in the developing world? Topics range from water sanitation to supply-side incentivization, from family planning to war zone surgery. Students gain useful skills for experience in international medicine. MD students and are eligible to apply for a sub-internship in surgery at Hopital Albert Schweitzer in Dechappelle, Haiti.

1 unit, Spr (Greco, R)

**SURG 370. Medical Scholars Research**

Provides an opportunity for student and faculty interaction, as well as academic credit and financial support, to medical students who undertake original research. Enrollment is limited to students with approved projects.

4-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

## SYMBOLIC SYSTEMS (SYMSYS)

### UNDERGRADUATE COURSES IN SYMBOLIC SYSTEMS

**SYMSYS 10. Symbolic Systems Forum**

A weekly lecture series, featuring different speakers who report on research of general interest to Symbolic Systems students and faculty. Regular attendance required for credit. May be repeated for credit.

1 unit, Aut (Davies, T), Win (Davies, T), Spr (Davies, T)

**SYMSYS 100. Introduction to Cognitive and Information Sciences**

(Same as LINGUIST 144, PHIL 190, PSYCH 132) The history, foundations, and accomplishments of the cognitive sciences, including presentations by leading Stanford researchers in artificial intelligence, linguistics, philosophy, and psychology. Overview of the issues addressed in the Symbolic Systems major. GER:DB-SocSci

4 units, Spr (Wasow, T; McClelland, J)

**SYMSYS 145. Cognition in Interaction Design**

Interactive systems from the standpoint of human cognition. Topics include skill acquisition, complex learning, reasoning, language, perception, methods in usability testing, special computational techniques such as intelligent and adaptive interfaces, and design for people with cognitive disabilities. Students conduct analyses of real world problems of their own choosing and redesign/analyze a project of an interactive system. GER:DB-SocSci

3 units, Win (Shrager, J)

**SYMSYS 170. Decision Behavior: Theory and Evidence**

(Same as SYMSYS 270) Introduction to the study of judgment and decision making, relating theory and evidence from disciplines such as psychology, economics, statistics, neuroscience, and philosophy. The development and critique of Homo economicus as a model of human behavior, and more recent theories based on empirical findings. Recommended: background in formal reasoning.

3-4 units, Spr (Staff)

**SYMSYS 190. Senior Honors Tutorial**

Under the supervision of their faculty honors adviser, students work on their senior honors project. May be repeated for credit.

1-5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**SYMSYS 191. Senior Honors Seminar**

Recommended for seniors doing an honors project. Under the leadership of the Symbolic Systems program coordinator, students

discuss, and present their honors project.

*1 unit, Aut (Davies, T)*

#### **SYMSYS 196. Independent Study**

Independent work under the supervision of a faculty member. Can be repeated for credit.

*1-15 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

## **GRADUATE COURSES IN SYMBOLIC SYSTEMS**

#### **SYMSYS 200. Symbolic Systems in Practice**

Applying a Symbolic Systems education at Stanford and outside. Introduction to the basics of research and practice. Students develop and present a project, and investigate different career paths - academic, industrial, professional, and public service - through interviews with alumni.

*3 units, Win (Staff)*

#### **SYMSYS 201. ICT, Society, and Democracy**

The impact of information and communication technologies on social and political life. Interdisciplinary. Classic and contemporary readings focusing on topics such as social networks, virtual versus face-to-face communication, the public sphere, voting technology, and collaborative production.

*3 units, not given this year*

#### **SYMSYS 206. Topics in the Philosophy of Neuroscience**

Does understanding the brain or computational models of the brain allow understanding of the mind? Recent literature on neurophilosophical and neuroskeptical approaches to the mind including perception, neurophenomenology, sensorimotor accounts, computational models, and eliminativism. Prerequisites: PHIL 80, and familiarity with philosophy or neuroscience, or consent of instructor. May be repeated for credit.

*3 units, not given this year*

#### **SYMSYS 209. Battles Over Bits**

The changing nature of information in the Internet age and its relationship to human behavior. Philosophical assumptions underlying practices such as open source software development, file sharing, common carriage, and community wireless networks, contrasted with arguments for protecting private and commercial interests such as software patents, copy protection, copyright infringement lawsuits, and regulatory barriers. Theory and evidence from disciplines including psychology, economics, computer science, law, and political science. Prerequisite: PSYCH 40, 55, 70, or SYMSYS 202.

*3 units, not given this year*

#### **SYMSYS 210. Learning Facial Emotions: Art and Psychology**

Artistic and psychological learning approaches to emotion recognition from facial expressions. The advantages of learning by drawing from live models when there are cognitive deficits due to aging, autism, or Aspergers. Comparative analysis uses brain studies, learning theory, and human-computer interaction. Psychological and artistic training methods for emotion recognition. Studio component conveys the art drawing approach. Prerequisites: PSYCH 1 or consent of instructor.

*3 units, Win (Wilkins, D)*

#### **SYMSYS 211. Learning Facial Emotions: Art, Psychology, Human-Computer Interaction**

Learning to recognize facial emotions by drawing a live model versus the psychology method of using classified images of subtle and micro expressions. Dimensions of analysis include cognitive modeling and neuroscience. The design of human-computer interaction systems for people with cognitive deficits such as autism and Aspergers, which integrate the art and psychology approaches using methods such as robot heads, avatars, and facial recognition software. Prerequisites: PSYCH 1 or consent of instructor.

*3 units, not given this year*

#### **SYMSYS 270. Decision Behavior: Theory and Evidence**

(Same as SYMSYS 170) Introduction to the study of judgment and decision making, relating theory and evidence from disciplines such as psychology, economics, statistics, neuroscience, and philosophy. The development and critique of Homo economicus as a model of human behavior, and more recent theories based on empirical findings. Recommended: background in formal reasoning.

*3-4 units, Spr (Staff)*

#### **SYMSYS 290. Master's Degree Project**

*1-15 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

#### **SYMSYS 291. Master's Program Seminar**

Enrollment limited to students in the Symbolic Systems M.S. degree program. May be repeated for credit.

*1 unit, Aut (Davies, T), Win (Davies, T), Spr (Davies, T)*

## **TIBETAN LANGUAGE (TIBETLNG)**

### **UNDERGRADUATE COURSES IN TIBETAN LANGUAGE**

#### **TIBETLNG 1. First-Year Tibetan, First Quarter**

Grammar, reading, and composition. Tibetan culture and the Tibetan view of reality.

*5 units, Aut (Clark, R)*

#### **TIBETLNG 2. First Year Tibetan, Second Quarter**

Continuation of 1.

*5 units, Win (Clark, R)*

#### **TIBETLNG 3. First Year Tibetan, Third Quarter**

Continuation of 2.

*5 units, Spr (Clark, R)*

#### **TIBETLNG 199. Individual Work**

May be repeated for credit. Prerequisite: consent of instructor.

*1-5 units, Aut (Staff), Win (Staff), Spr (Staff)*

### **GRADUATE COURSES IN TIBETAN LANGUAGE**

#### **TIBETLNG 395. Graduate Studies in Tibetan**

May be repeated for credit. Prerequisite: consent of instructor.

*2-5 units, Aut (Staff), Win (Staff), Spr (Staff)*

## **URBAN STUDIES (URBANST)**

### **UNDERGRADUATE COURSES IN URBAN STUDIES**

#### **URBANST 110. Introduction to Urban Studies**

The study of cities and urban civilization. History of urbanization and current issues such as suburbanization, racial discrimination, globalization, terrorism, and the environment. Public policies designed to address these issues. GER:DB-SocSci, EC-AmerCul

*4 units, Aut (Stout, F), Win (Stout, F), Spr (Kahan, M)*

#### **URBANST 111. Urban Politics**

(Same as POLISCI 121, SOC 149X, SOC 249X) The major actors, institutions, processes, and policies of sub-state government in the U.S., emphasizing city general-purpose governments through a comparative examination of historical and contemporary politics. Issues related to federalism, representation, voting, race, poverty, housing, and finances. Prerequisite: POLISCI 2 or consent of instructor. GER:DB-SocSci

*5 units, not given this year*

#### **URBANST 112. The Urban Underclass**

(Same as SOC 149, SOC 249) (Graduate students register for 249.) Recent research and theory on the urban underclass, including evidence on the concentration of African Americans in urban ghettos, and the debate surrounding the causes of poverty in urban settings. Ethnic/racial conflict, residential segregation, and changes in the family structure of the urban poor. GER:DB-SocSci, EC-AmerCul

*5 units, Win (Rosenfeld, M)*

#### **URBANST 113. Introduction to Urban Design: Contemporary Urban Design in Theory and Practice**

Comparative studies in N. America and abroad of neighborhood conservation, central city regeneration, and growth policies for metropolitan regions. Case studies, team projects, and class workshops in San Francisco. Two required workshops in San Francisco Sat Jan 16 and Sat Jan 30. GER:DB-SocSci

*5 units, Win (Gast, G)*

**URBANST 114. Cities in Comparative Perspective**

(Same as ANTHRO 126) Core course for Urban Studies majors. The city as interdisciplinary object. Discourses about cities such as the projects, practices, plans, representations, and sensibilities that combine to create what people know about urban spaces. Local, national, and transnational spatial scales. Conversations across regional boundaries; geographies of difference. Case studies. GER:DB-SocSci

5 units, Aut (Inoue, M; Roque, A)

**URBANST 115. Urban Sustainability: Long-Term Archaeological Perspectives**

(Same as CLASSGEN 123, CLASSGEN 223) Comparative and archaeological view of urban design and sustainability. How fast changing cities challenge human relationships with nature. Innovation and change, growth, industrial development, the consumption of goods and materials. Five millennia of city life including Near Eastern city states, Graeco-Roman antiquity, the Indus Valley, and the Americas.

3-5 units, Win (Shanks, M)

**URBANST 123. Approaching Research and the Community**

Comparative perspective on research with communities and basic overview of research methodologies, with an emphasis on the principles and practices of doing community-based research as a collaborative enterprise between academic researchers and community members. How academic scholarship can be made useful to communities. How service experiences and interests can be used to develop research questions in collaboration with communities and serve as a starting point for developing senior theses or other independent research projects.

2 units, Aut (Visconti, V), Spr (Visconti, V)

**URBANST 126. Spirituality and Nonviolent Urban and Social Transformation**

A life of engagement in social transformation is often built on a foundation of spiritual and religious commitments. Case studies of nonviolent social change agents including Rosa Parks in the civil rights movement, César Chávez in the labor movement, and William Sloane Coffin in the peace movement; the religious and spiritual underpinnings of their commitments. Theory and principles of nonviolence. Films and readings. Service learning component includes placements in organizations engaged in social transformation. GER:DB-Hum

5 units, Win (Sanders, J; Karlin-Neumann, P; McLennan, W; Sanders, J)

**URBANST 127. Community Planning Workshop**

Students work in teams to conduct research, analyze and evaluate alternatives, and make recommendations for possible solutions to local community development issues. Provides students with an opportunity to work with community partners and blend theory and practice to accomplish a community based project.

4-5 units, Aut (Johnson, B)

**URBANST 131. Social Innovation and the Social Entrepreneur**

Invited lecture series. Perspectives and endeavors of thought leaders and entrepreneurs who address social needs in the U.S. and internationally through private for-profit and nonprofit organizations, nongovernmental organizations, or public institutions.

1 unit, Aut (Edwards, M)

**URBANST 132. Concepts and Analytic Skills for the Social Sector**

How to create and grow innovative, non-profit and for-profit ventures which have the primary goal of solving social and environmental problems. Topics include organizational mission, strategy, marketing, financing and evaluation. Opportunities and limits of methods from the for-profit sector to meet social goals. Perspectives from the field of social entrepreneurship. Focus is on the integrating theory with practical application. Enrollment limited to 20. GER:DB-SocSci

4 units, Win (Litvak, L)

**URBANST 133. Social Entrepreneurship Collaboratory**

Interdisciplinary student teams create and develop U.S. and international social entrepreneurship initiatives. Proposed initiatives may be new entities, or innovative projects, partnerships, and/or strategies impacting existing organizations and social issues in the U.S. and internationally. Focus is on each team's research and on planning documents to further project development. Project development varies with the quarter and the skill set of each team, but

should include: issue and needs identification; market research; design and development of an innovative and feasible solution; and drafting of planning documents. In advanced cases, solicitation of funding and implementation of a pilot project. Enrollment limited to 30. May be repeated for credit. Prerequisites: 131 and 132, or consent of instructor.

4 units, Aut (Edwards, M), Spr (Scher, L)

**URBANST 137. Innovations in Microcredit and Development Finance**

The role of innovative financial institutions in supporting economic development, the alleviation of rural and urban poverty, and gender equity. Analysis of the strengths and limits of commercial banks, public development banks, credit unions, and microcredit organizations both in the U.S. and internationally. Readings include academic journal articles, formal case studies, evaluations, and annual reports. Priority to students who have taken any portion of the social innovation series: URBANST 131, 132, or 133. Recommended: ECON 1A or 1B.

4 units, Spr (Kieschnick, M)

**URBANST 161. U.S. Urban History since 1920**

The end of European immigration and its impact on cities; the Depression and cities; WW II and the martial metropolis; de-industrialization; suburbanization; African American migration; urban renewal; riots, race, and the narrative of urban crisis; the impact of immigration from Asia, Latin America, and Africa; homelessness; the rise of the Sunbelt cities; gentrification; globalization and cities. Final project is history of a San Francisco neighborhood, based on primary sources and site visit. GER:DB-SocSci, EC-AmerCul

5 units, not given this year

**URBANST 162. Managing Local Governments**

In-the-trenches approach. Issues in leading and managing local governments in an era of accelerating and discontinuous change. Focus is on practical strategies related to financing, public services impacted by increasing demand and revenue constraints, the politics of urban planning, private-public partnerships, public sector marketing, entrepreneurial problem solving, promoting a learning and risk-taking organizational culture, and developing careers in local government. Enrollment limited to 25; preference to Urban Studies majors. GER:DB-SocSci

3-4 units, not given this year

**URBANST 163. Land Use Control**

Methods of land use control related to the pattern and scale of development and the protection of land and water resources. Emphasis is on the relationship between the desired land use goal and geographical landscape, physical externalities, land use law, and regulatory agencies. Topics include the historical roots of modern land use controls; urban reforms of the 19th century; private ownership of land; zoning; local, state, and federal land use regulation; and land trusts preservation. Smart growth, environmental impact consideration, private property rights, and special purpose agencies are related to current issues. GER:DB-SocSci

4 units, not given this year

**URBANST 165. Sustainable Urban and Regional Transportation Planning**

Environmental, economic, and equity aspects of urban transportation in 21st-century U.S. Expanded choices in urban and regional mobility that do not diminish resources for future generations. Implications for the global environment and the livability of communities. GER:DB-SocSci

4-5 units, Spr (Kott, J)

**URBANST 171. Urban Design Studio**

The practical application of urban design theory. Projects focus on designing neighborhood and downtown regions to balance livability, revitalization, population growth, and historic preservation.

5 units, Spr (Glanz, D)

**URBANST 190. Urban Professions Seminar**

Workshop. Contemporary practice of urban design and planning, community development, urban education, public service law, and related fields. Topics depend partly on student interests. Bay Area professionals lecture and respond to questions concerning their day-to-day work, impressions of their field, and the academic background recommended for their work.

1 unit, not given this year

**URBANST 194. Internship in Urban Studies**

For Urban Studies majors only. Students organize an internship in an office of a government agency, a community organization, or a private firm directly relevant to the major. Reading supplements internship. Paper summarizes internship experience and related readings.

2-4 units, Aut (Staff), Win (Staff), Spr (Staff)

**URBANST 195. Special Projects in Urban Studies**

1-5 units, Aut (Staff), Win (Staff), Spr (Staff)

**URBANST 197. Directed Reading**

1-5 units, Aut (Kahan, M), Win (Kahan, M), Spr (Kahan, M)

**URBANST 198. Senior Research in Public Service**

Limited to seniors approved by their departments for honors thesis and admitted to the year-round Public Service Scholars Program sponsored by the Haas Center for Public Service. What standards in addition to those expected by the academy apply to research conducted as a form of public service? How can communities benefit from research? Theory and practice of research as a form of public service readings, thesis workshops, and public presentation of completed research. May be repeated for credit. Corequisite: 199.

1-5 units, Aut (Visconti, V), Win (Visconti, V), Spr (Visconti, V)

**URBANST 199. Senior Honors Thesis**

1-10 units, Aut (Staff), Win (Staff), Spr (Staff)

**URBANST 201. Preparation for Senior Project**

(Same as SOC 201) First part of capstone experience for Urban Studies majors pursuing an internship-based research project or honors thesis. Individually arranged internship beginning in Winter Quarter, 8 hours per week. Prospective students must consult with internship coordinator early in Autumn Quarter to plan placement. Reflections and assignments culminate in a research proposal, which may be submitted for funding. Internship normally continues in Spring Quarter; research proposed in the final assignment may be carried out in Spring or Summer Quarter; consent required for Autumn Quarter research. Corequisite: URBANST 201A.

5 units, Win (Kahan, M)

**URBANST 201A. Capstone Internship in Urban Studies**

Restricted to Urban Studies majors. Students work at least 80 hours with a supervisor, establish learning goals, and create products demonstrating progress. Reflection on service and integration of internship with senior research plans. Must be completed by start of Winter Quarter senior year. May continue for additional quarter as 194. Corequisite: 201 or consent of instructor.

3 units, Aut (Kahan, M), Win (Kahan, M), Spr (Kahan, M)

**URBANST 202. Preparation for Honors Thesis**

(Same as SOC 202) Primarily for juniors in Sociology; sophomores who plan to be off-campus Winter Quarter of their junior year may register with consent of instructor. Students write a research prospectus and grant proposal, which may be submitted for funding. Research proposal in final assignment may be carried out in Spring or Summer Quarter; consent required for Autumn Quarter research.

5 units, Win (McAdam, D)

**URBANST 203. Senior Seminar**

Conclusion of capstone sequence. Students write a substantial paper based on the research project developed in 201 or 202. Students in the honors program may incorporate paper into their thesis. Guest scholar chosen by students. WIM

5 units, Aut (Kahan, M)

## WRITING AND RHETORIC, PROGRAM IN (PWR)

### UNDERGRADUATE COURSES IN WRITING AND RHETORIC, PROGRAM IN

**PWR 1. Writing and Rhetoric 1**

Fulfills first level of the writing requirement. Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor.

4 units, not given this year

**PWR 1AO. Writing & Rhetoric 1: Visual Rhetoric across the Globe: Capturing Culture in Images**

Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. Students explore how various images shape key international issues; analyze a range of political cartoons, billboard advertisements, and street-scene photographs; and visit the Cantor Museum and the Hoover Collection to look at the power of propaganda and election posters. Students meet with other students around the world through video conferences or collaborative blogging. See [http://ual.stanford.edu/AP/univ\\_req/PWR/Req.html](http://ual.stanford.edu/AP/univ_req/PWR/Req.html).

4 units, Aut (O'Brien, A)

**PWR 1CA. Writing & Rhetoric 1: The Rhetoric of Gaming**

Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. Topics include how gameplay in a variety of genres operates as argument about cultural values and how games function as sites of community building, social networking, and learning. Students produce research-based arguments on these issues and merge practice and production in storyboarding rhetorically persuasive games. See [http://ual.stanford.edu/AP/univ\\_req/PWR/Req.html](http://ual.stanford.edu/AP/univ_req/PWR/Req.html).

4 units, Aut (Alfano, C)

**PWR 1DH. Writing & Rhetoric 1: The Virtue of Vice and the Vice of Virtue: The Rhetoric of Criminality**

Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. Students investigate language and images that construct criminals, analyzing how these representations shape personal and cultural beliefs. Analysis of the costs and benefits of retributive, restorative, and transformative justice systems. See [http://ual.stanford.edu/AP/univ\\_req/PWR/Req.html](http://ual.stanford.edu/AP/univ_req/PWR/Req.html).

4 units, Aut (Hunter, D)

**PWR 1GAZ. Writing & Rhetoric 1: From Cradle to Grave: The Rhetoric of Age and Aging**

Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. Topics include the history of aging in America; developments in reproductive science; the proverbial mid-life crisis; and how people cope with the ultimate horizon of death. See [http://ual.stanford.edu/AP/univ\\_req/PWR/Req.html](http://ual.stanford.edu/AP/univ_req/PWR/Req.html).

4 units, Aut (Vander Zee, A)

**PWR 1GEV. Writing & Rhetoric 1: All the World's a Stage: The Rhetoric of Theater**

Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. Students investigate the role theater plays in the rhetorical strategies of various literary and non-literary texts as well as visual materials such as films and cartoons. See [http://ual.stanford.edu/AP/univ\\_req/PWR/Req.html](http://ual.stanford.edu/AP/univ_req/PWR/Req.html).

4 units, Aut (Vyroubalova, E)

**PWR 1GMR. Writing & Rhetoric 1: Fearful Symmetry: The Rhetoric of the Double**

Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. Students read literary, social, and scientific sources to explore topics including identity theft, human cloning, and the literary device of the double. See [http://ual.stanford.edu/AP/univ\\_req/PWR/Req.html](http://ual.stanford.edu/AP/univ_req/PWR/Req.html).

4 units, Aut (Reid, M)

**PWR 1GRA. Writing & Rhetoric 1: Millions Like Us: The Rhetoric of Crowds**

Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. Topics include symbolic meaning of rock, sports, and political events; virtual crowds online; and use of crowds to shape ideology. See [http://ual.stanford.edu/AP/univ\\_req/PWR/Req.html](http://ual.stanford.edu/AP/univ_req/PWR/Req.html).

4 units, Aut (Arnold, R)

**PWR 1JB. Writing & Rhetoric 1: From Mad Cow to Mad Corn: The Rhetoric of Food Science and Politics**

Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. Topics include how activists, nutritionists, food scientists, chemical companies, and legislative bodies articulate their concerns and argue their positions and how agribusiness and government respond to consumer concerns about food produced with the aid of chemicals. See [http://ual.stanford.edu/AP/univ\\_req/PWR/Req.html](http://ual.stanford.edu/AP/univ_req/PWR/Req.html).

4 units, Aut (Bleakney, J)

**PWR 1JP. Writing & Rhetoric 1: The Rhetoric of Consumer Culture**

Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. Students explore what consumerism says about the larger culture and the segmented groups within it, analyzing popular and scholarly texts as well as current trends in pop culture, to research how the activities of consumerism shape culture. See [http://ual.stanford.edu/AP/univ\\_req/PWR/Req.html](http://ual.stanford.edu/AP/univ_req/PWR/Req.html).

4 units, Aut (Peterson, J)

**PWR 1KE. Writing & Rhetoric 1: The Science of Sports**

Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. Topics include sports at the level of cells and psychology, the science of sports equipment and sports spaces, the ethics of performance enhancement, and sports-related research projects on the Stanford campus. See [http://ual.stanford.edu/AP/univ\\_req/PWR/Req.html](http://ual.stanford.edu/AP/univ_req/PWR/Req.html).

4 units, Aut (Myers, K)

**PWR 1KM. Writing & Rhetoric 1: If These Walls Could Talk: The Rhetoric of Places and Spaces**

Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. Explores the 'language' of man-made environments such as universities, theme parks, monuments, shopping malls, museums, and public buildings. Students analyze space through physical exploration and critical inquiry and discover the applications of rhetoric not only to traditional texts but to physical structures and spaces as well. See [http://ual.stanford.edu/AP/univ\\_req/PWR/Req.html](http://ual.stanford.edu/AP/univ_req/PWR/Req.html).

4 units, Aut (Moekle, K)

**PWR 1LK. Writing & Rhetoric 1: The Rhetoric and Politics of Satire**

Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. Explores the ways that satirists use irony, exaggeration, and humor--among other rhetorical techniques--to make serious statements about the world. Juxtaposes historical and recent satirical writing to illuminate intellectual problems that are thousands of years old and sharply contemporary. See [http://ual.stanford.edu/AP/univ\\_req/PWR/Req.html](http://ual.stanford.edu/AP/univ_req/PWR/Req.html).

4 units, Aut (Konstantinou, L)

**PWR 1MJ. Writing & Rhetoric 1: Rock 'n' Rhetoric**

Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. Topics include rhetorical strategies and meaning of the lyrics of songs with multiple interpretations and how rock musicians construct arguments in their songs. Analysis of how surrounding cultural and historical contexts influence the significance and meaning of rock songs. See [http://ual.stanford.edu/AP/univ\\_req/PWR/Req.html](http://ual.stanford.edu/AP/univ_req/PWR/Req.html).

4 units, Aut (Ford, M)

**PWR 1NB. Writing & Rhetoric 1: Ain't that America?: Rhetoric and American Culture**

Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with in-

structor. Topics include the relationship between U.S. ideology and its culture, and how American trends and popular texts comment on and shape conversations about the U.S. and its values of life, liberty, and the pursuit of happiness. See [http://ual.stanford.edu/AP/univ\\_req/PWR/Req.html](http://ual.stanford.edu/AP/univ_req/PWR/Req.html).

4 units, Aut (Buffington, N)

**PWR 1PH. Writing & Rhetoric 1: He Said, She Said: The Rhetoric of Gender Politics**

Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. Topics include the ways in which news articles, movie clips, magazine advertisements, television commercials, and other texts present gender roles, and how the roles and bodies of both sexes are presented as objects open to scrutiny, critique, exploitation, abuse, and awe. See [http://ual.stanford.edu/AP/univ\\_req/PWR/Req.html](http://ual.stanford.edu/AP/univ_req/PWR/Req.html).

4 units, Aut (Hanlon-Baker, P)

**PWR 1SB. Writing & Rhetoric 1: Machine Dreams: The Rhetoric of Technology**

Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. Topics include the arguments we make about technology, the arguments various technologies produce about us, and the ways in which rhetoric itself might be productively viewed as a technology for producing arguments. Students explore the social, economic, political, and psychological consequences of rapidly developing technologies. See [http://ual.stanford.edu/AP/univ\\_req/PWR/Req.html](http://ual.stanford.edu/AP/univ_req/PWR/Req.html).

4 units, Aut (Brawn, S)

**PWR 1SH. Writing & Rhetoric 1: Strange Art, Stranger Politics: Absurdism and the Rhetoric of Social Action**

Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. Topics include the benefits and drawbacks of deploying strange art as artistic and political protest, how breaking the aesthetic rules sometimes serves to argue for social change, and how absurdist protests succeed or fail to gain social traction. See [http://ual.stanford.edu/AP/univ\\_req/PWR/Req.html](http://ual.stanford.edu/AP/univ_req/PWR/Req.html).

4 units, Aut (Herndon, S)

**PWR 1SL. Writing & Rhetoric 1: New Media Rhetoric and the Revolution in Communication Culture**

Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. Students define new media and debate the ideas of web 2.0; the virtue of Web 2.0 in digital game modifications and the potential subversive effects of web 2.0 on advertising restrictions; and look into the possibilities and limitations of democracy 2.0. See [http://ual.stanford.edu/AP/univ\\_req/PWR/Req.html](http://ual.stanford.edu/AP/univ_req/PWR/Req.html).

4 units, Aut (Lee, S)

**PWR 1SS. Writing & Rhetoric 1: Soap Operas and Soapboxes: The Rhetoric of Performance**

Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. Students explore identity as a social, political, and cultural performance; how different situations call for particular styles of rhetorical performance; and how people evaluate and analyze different types of performances, including artistic and political performances, as well as the performances of everyday life. See [http://ual.stanford.edu/AP/univ\\_req/PWR/Req.html](http://ual.stanford.edu/AP/univ_req/PWR/Req.html).

4 units, Aut (Schuyler, S)

**PWR 2. Writing and Rhetoric 2**

Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. Prerequisite: PWR 1.

4 units, not given this year

**PWR 2AH. Writing & Rhetoric 2: The Rhetoric of Ethnic Identity**

Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written

and oral/multimedia presentation of research. Exploration of how race and ethnicity in America have become subjects of personal negotiations and public perception. Addresses various topics such as biracial and bicultural identity, acculturation, and stereotyping. See [http://ual.stanford.edu/AP/univ\\_req/PWR/Req.html](http://ual.stanford.edu/AP/univ_req/PWR/Req.html).

4 units, Aut (*Heredia, A*)

**PWR 2CR. Writing & Rhetoric 2: (R)evolutions in Environmental Rhetoric**

Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. Examination of the motivations and appeals of environmental arguments, considering underlying assumptions and contexts of time, culture, audience, purpose, and mode of delivery. Participation in Community Writing Project, working with local non-profit environmental organizations to produce real-world writing, multimedia, and/or speaking projects on these organizations' behalf. Work in the community will form the basis of the major research project. See [http://ual.stanford.edu/AP/univ\\_req/PWR/Req.html](http://ual.stanford.edu/AP/univ_req/PWR/Req.html).

4 units, Aut (*Ross, C*)

**PWR 2DC. Writing & Rhetoric 2: The Popular Science of Sex**

Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. Exploration of the intersection between social debate and scientific research about sex and gender; how social debates draw on, represent, respond to, and influence scientific studies; and how the process shapes our knowledge and beliefs about sex and gender. See [http://ual.stanford.edu/AP/univ\\_req/PWR/Req.html](http://ual.stanford.edu/AP/univ_req/PWR/Req.html).

4 units, Aut (*Carluccio, D*)

**PWR 2GM. Writing & Rhetoric 2: Unpredictable Dialogue: The Art of the Interview**

Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. Study of the rhetorical craft of the interview, exploring structure, language, timing, and development in a range of forums, including documentaries, radio, transcription, campus conversations, and television. Research of a Stanford professor's work, including interview. Presentation of findings from research and interview to the class. See [http://ual.stanford.edu/AP/univ\\_req/PWR/Req.html](http://ual.stanford.edu/AP/univ_req/PWR/Req.html).

4 units, Aut (*Moyer, G*)

**PWR 2HR. Writing & Rhetoric 2: What's So Funny? Humor, Race, Class and Gender**

Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. Analysis of cartoons and jokes about and by feminists, LGBTs, ethnic minorities, and rednecks. Discussion of how jokes reflect important moral values about race, sex, gender, and religion. Exploration of how satire works as social criticism. See [http://ual.stanford.edu/AP/univ\\_req/PWR/Req.html](http://ual.stanford.edu/AP/univ_req/PWR/Req.html).

4 units, Aut (*Rytkonen, H*)

**PWR 2JH. Writing & Rhetoric 2: Cred: Rhetoric and Credibility in Research, Politics, and Everyday Life**

Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. Work on making students more effective researchers and communicators in their areas of interest, with a focus on gaining and projecting credibility. Exploration of how speakers and writers gain and lose credibility, how people evaluate the credibility of others, and how the rules of credibility are different in politics, in scholarship, and in popular culture. See [http://ual.stanford.edu/AP/univ\\_req/PWR/Req.html](http://ual.stanford.edu/AP/univ_req/PWR/Req.html).

4 units, Aut (*Hunt, J*)

**PWR 2JL. Writing & Rhetoric 2: Doomsday Rhetoric**

Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. Investigation of how the doomsday epic expresses real concerns emerging from fields like technology, environmental studies, pathobiology, and politics. Consideration of apocalypticism as a mode of argument. Examination of how belief in the imminent destruction of the present world order influences our political decisions and personal behavior.

Topics in religious eschatology and apocalypticism illuminate the genre's origins. See

[http://ual.stanford.edu/AP/univ\\_req/PWR/Req.html](http://ual.stanford.edu/AP/univ_req/PWR/Req.html).

4 units, Aut (*Lee, J*)

**PWR 2KD. Writing & Rhetoric 2: Performing Writing: Drama and the New Media**

Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. Exploration of how the application of performance techniques makes academic or professional presentations more compelling. Scripting and delivering of group research projects. Research in new forms of media, analysis of how the conventions of a particular medium affect the content of the message. See [http://ual.stanford.edu/AP/univ\\_req/PWR/Req.html](http://ual.stanford.edu/AP/univ_req/PWR/Req.html).

4 units, Aut (*DiPirro, K*)

**PWR 2KS. Writing & Rhetoric 2: The Measure of Happiness**

Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. How the emerging field of happiness studies involves psychologists, economists and policy-makers in defining what happiness is and determining how society might create the conditions in which it can flourish. Exploration of how happiness studies can uncover happiness at the heart of arguments about democracy, religion, and personal lifestyles, exploring what makes people happy across cultural, social, and national contexts. See [http://ual.stanford.edu/AP/univ\\_req/PWR/Req.html](http://ual.stanford.edu/AP/univ_req/PWR/Req.html).

4 units, Aut (*Savelson, K*)

**PWR 2PB. Writing & Rhetoric 2: The Power of Political Photograph**

Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. Topics include the role of photographers and photo-journalists in helping viewers see the world differently and the political implications of fashion photography, environmental photography, music photography, and fashion photography. Traditional readings as well as archival and field research. See [http://ual.stanford.edu/AP/univ\\_req/PWR/Req.html](http://ual.stanford.edu/AP/univ_req/PWR/Req.html).

4 units, Aut (*Bator, P*)

**PWR 2RT. Writing & Rhetoric 2: Stepping Out of the Shadows: Music, Bass Guitar, and the Rhetoric of Revolution**

Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. Analysis of how the emergence of the electric bass in the fifties helped usher in a revolution that challenged commonplace assumptions concerning nationality, race, gender, and sexuality. Exploration of the history of the electric bass as a case study of musical revolutions, focusing on how music revolutions reflect emerging ideologies in any given culture. See [http://ual.stanford.edu/AP/univ\\_req/PWR/Req.html](http://ual.stanford.edu/AP/univ_req/PWR/Req.html).

4 units, Aut (*Taylor, R*)

**PWR 2SM. Writing & Rhetoric 2: Dirty, Pretty Things: The Rhetoric of Objects and Objectification**

Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. Study of objects and objectification, from the relationships shared by cultures, objects, and people to how human beings have been objectified through colonialism, enslavement, sex-trafficking, and organ trade. Material objects discussed in terms of staging, collecting, design, location, inheritance, and cultural meaning. One section of this class participates in the Community Writing Project: students complete one or more assignments in cooperation with a campus or community agency; their work will directly benefit local communities and non-profits. See [http://ual.stanford.edu/AP/univ\\_req/PWR/Req.html](http://ual.stanford.edu/AP/univ_req/PWR/Req.html).

4 units, Aut (*Mediratta, S*)

**PWR 2SU. Writing & Rhetoric 2: Hollywood Bollywood: Rhetoric of India in Global Cinema**

Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. Exploration of how

the rhetoric of India is constructed for an international audience through films and how such representations have coincided with India's recent economic success to give rise to a new trend in global popular culture. See [http://ual.stanford.edu/AP/univ\\_req/PWR/Req.html](http://ual.stanford.edu/AP/univ_req/PWR/Req.html).  
4 units, Aut (Chakravarty, S)

**PWR 2SW. Writing & Rhetoric 2: The Rhetoric of World War II: Global Strategies of Persuasion in WarTime**

Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. Through work with the Hoover Archives, exploration of how written, visual, and film sources were used by a variety of countries to influence their citizens during WWII. Topics include the rhetoric of eugenics, political speeches, war posters, and how advertising during WWII pursued clear agendas to support government goals. See [http://ual.stanford.edu/AP/univ\\_req/PWR/Req.html](http://ual.stanford.edu/AP/univ_req/PWR/Req.html).  
4 units, Aut (Wyle, S)

**PWR 2WG. Writing & Rhetoric 2: All That Jazz: The Rhetoric of American Musical Theater**

Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. Exploration of the conventions and strategies that define the genre of American musical theater. Analysis of how contemporary musicals mirror, revise, and even subvert traditional rules while addressing a range of current issues. See [http://ual.stanford.edu/AP/univ\\_req/PWR/Req.html](http://ual.stanford.edu/AP/univ_req/PWR/Req.html).  
4 units, Aut (Goldberg, W)

**PWR 4. Directed Writing**

Further work on developing writing. Analysis and research-based argument, writing for a range of audiences and in varied disciplinary contexts. Workshops and individual conferences. May be repeated for credit. Prerequisite: first two levels of the writing requirement or equivalent transfer credit.  
3-4 units, Aut (Staff), Win (Staff)

**PWR 5. Independent Writing**

Individual writing project under the guidance of a PWR instructor. May be repeated for credit. Prerequisite: first two levels of the writing requirement or equivalent transfer credit.  
1-5 units, Aut (Diogenes, M), Win (Diogenes, M), Spr (Diogenes, M), Sum (Staff)

**PWR 6. Writing Workshop**

1-2 units, Aut (Diogenes, M), Win (Staff), Spr (Staff)

**PWR 91. Intermediate Writing**

For students who have completed the first two levels of the writing requirement and want further work in developing writing abilities, especially within discipline-specific contexts and nonfiction genres. Individual conferences with instructor and peer workshops. Prerequisite: first two levels of the writing requirement or equivalent transfer credit.  
3 units, Spr (Staff)

**PWR 191. Advanced Writing**

Open to undergraduates and graduate students. Crafting nonfiction prose in a range of genres. Focus is on the relationship of genre and form; attention to developing stylistic versatility. Individual conferences with instructor. Prerequisite: first two levels of the writing requirement or equivalent transfer credit.  
3 units, Spr (Staff)

**PWR 192. Projects in Research, Writing, and Rhetoric**

Advanced work on research projects, early drafts of theses, proposals. Shared work, discussions, and examination of methods, rhetorics, and styles in all disciplines. May be repeated for credit. Prerequisite: first two levels of the writing requirement or equivalent transfer credit.  
1-5 units, Aut (Obenzinger, H)

**PWR 193. Writing the Honors Thesis**

For students from all majors in the process of writing an honors thesis. Review of key elements of thesis process, including literature reviews, structure, argumentation, style, and documentation. Group and individual workshops. Prerequisite: first two levels of the writing requirement or equivalent transfer credit.  
1-5 units, Win (Obenzinger, H), Spr (Obenzinger, H)

**PWR 194. Topics in Writing and Rhetoric: Law and the Rhetorical Tradition**

(Same as LAW 304.) Interdisciplinary seminar. The rhetorical underpinnings of legal argument. Goal is understanding rhetoric as readers and interpreters of legal texts and to develop skills as writers and speakers. Prerequisite: first two levels of the writing requirement or equivalent transfer credit.  
4 units, Win (Staff)

**PWR 195. Writing Center Peer Tutor Seminar**

For students selected to serve as peer writing tutors in the Stanford Writing Center and/or at other campus sites. Readings on and reflection about writing processes, the dynamics of writing and tutoring situations, tutoring techniques, learning styles, diversity, and ethics. Observation of tutoring sessions, written responses to readings, and other written work.  
3 units, Spr (Moneyhun, C)

# CENTERS, LABORATORIES, AND INSTITUTES

Independent research laboratories, centers, and institutes perform multidisciplinary research that extends beyond the scope of any one of the University's organized schools. Consult the links below for full information on these units.

Information on academic programs for undergraduates is provided by following the links on the right.

## OFFICE OF VICE PROVOST AND DEAN OF RESEARCH

*Vice Provost and Dean of Research and Dean of the Independent*

*Laboratories, Centers, and Institutes:* Ann M. Arvin

*Offices:* 450 Serra Mall, Main Quadrangle, Building 60

*Mail Code:* 94305-2064

*Office Phone:* 650-723-8789

*Office Fax:* 650-723-0662

*Web Site:* <http://stanford.edu/dept/DoR>

The following independent Laboratories, Centers, and Institutes report to the Vice Provost and Dean of Research:

### BIOLOGICAL AND LIFE SCIENCES

Bio-X, the interdisciplinary program related to bioengineering, biomedicine, and biosciences, <http://biox.stanford.edu>

### ENVIRONMENTAL SCIENCES

Global Climate and Energy Project (G-CEP), <http://gcep.stanford.edu>

Precourt Institute for Energy Efficiency, <http://piee.stanford.edu>

Woods Institute for the Environment, <http://woods.stanford.edu>

### HUMANITIES AND SOCIAL SCIENCES

Center for Advanced Study in the Behavioral Sciences (CASBS), <http://www.casbs.org>

Freeman Spogli Institute for International Studies (FSI), <http://fsi.stanford.edu>

- Center on Democracy, Development, and the Rule of Law (CDDRL), <http://cddrl.stanford.edu>
- Center for Health Policy/Center for Primary Care and Outcomes Research (CHP/PCOR), <http://healthpolicy.stanford.edu>
- Center for International Security and Cooperation (CISAC) <http://cisac.stanford.edu>
- Walter H. Shorenstein Asia-Pacific Research Center (Shorenstein APARC), <http://aparc.stanford.edu>
- Program on Food Security and the Environment, <http://fse.stanford.edu>
- Forum on Contemporary Europe (FCE), <http://fce.stanford.edu>
- Inter-University Center for Japanese Language Studies (IUC), <http://www.stanford.edu/dept/IUC>
- Program on Energy and Sustainable Development (PESD), <http://pesd.stanford.edu>
- Program on Global Justice (PGJ), <http://globaljustice.stanford.edu>
- Stanford Center on International Conflict and Negotiation (SCICN), <http://www.law.stanford.edu/program/centers/scicn>
- Stanford Program on International and Cross-Cultural Education (SPICE), <http://spice.stanford.edu>

- Human-Sciences and Technologies Advance Research Institute (H-STAR), <http://hstar.stanford.edu>
- Center for the Study of Language And Information (CSLI), <http://www-csli.stanford.edu>
- Media-X, <http://mediax.stanford.edu>
- Stanford Center for Innovations in Learning (SCIL), <http://scil.stanford.edu>

Stanford Center on Longevity (SCL), <http://longevity.stanford.edu>

Stanford Humanities Center, <http://shc.stanford.edu>

Stanford Institute for Economic Policy Research (SIEPR), <http://siepr.stanford.edu>

### PHYSICAL SCIENCES

Edward L. Ginzton Laboratory, <http://stanford.edu/group/ginzton>

Geballe Laboratory for Advanced Materials (GLAM), <http://stanford.edu/group/glam>

Kavli Institute for Particle Astrophysics and Cosmology (KIPAC), <http://www-group.slac.stanford.edu/kipac>, operated jointly with SLAC National Accelerator Laboratory

Photon Ultrafast Laser Science and Engineering (PULSE), <http://pulse.slac.stanford.edu>, operated jointly with SLAC National Accelerator Laboratory

Stanford Institute for Materials and Energy Sciences (SIMES), <http://simes.slac.stanford.edu>, operated jointly with SLAC National Accelerator Laboratory

W. W. Hansen Experimental Physics Laboratory (HEPL), <http://hepl.stanford.edu>

### CENTERS REPORTING TO THE DEAN OF HUMANITIES AND SCIENCES

Center for Space Science and Astrophysics, <http://www.stanford.edu/group/CSSA>

Institute for Research in the Social Sciences (IRiSS), <http://iriss.stanford.edu>

- Stanford Center for Population Research (SCPR) (web site in development)
- Stanford Center for the Study of Poverty and Inequality (CPI), <http://iriss.stanford.edu/CPI>
- Stanford Center for American Democracy (SCAD) (web site in development)
- Stanford Center on Philanthropy and Civil Society (PACS), <http://pacscenter.stanford.edu>
- Social Science History Program (SSH), <http://iriss.stanford.edu/sshp>

Michelle R. Clayman Institute for Gender Research, <http://gender.stanford.edu>

Morrison Institute for Population and Resource Studies, <http://www.stanford.edu/group/morrinst>

### OTHER ACADEMIC PROGRAMS AND CENTERS, AND INDEPENDENT RESEARCH LABORATORIES, CENTERS, AND INSTITUTES

Hoover Institution on War, Revolution and Peace, <http://www.hoover.org>

SLAC National Accelerator Laboratory (SLAC), <http://www.slac.stanford.edu>

Stanford Synchrotron Radiation Laboratory (SSRL), <http://ssrl.slac.stanford.edu>

## CENTER FOR SPACE SCIENCE AND ASTROPHYSICS

*Emeriti: (Professors)* Robert Cannon, I-Dee Chang, Daniel B. DeBra, W. Gary Ernst, Von R. Eshleman, Robert A. Helliwell, Bruce B. Lusignan, Ronald J. P. Lyon, Laurence A. Manning, Bradford W. Parkinson, J. David Powell, Peter A. Sturrock, G. Leonard Tyler, Robert V. Wagoner; *(Professors, Research)* Donald L. Carpenter, Aldo V. daRosa, Antony Fraser-Smith

*Director:* Roger W. Romani

*Associate Directors:* Umrans S. Inan, Roger W. Romani, Philip H. Scherrer

*Professors:* Roger Blandford (Physics, SLAC), Elliot Bloom (SLAC), Lambertus Hesselink (Electrical Engineering), Umrans S. Inan (Electrical Engineering), Steven Kahn (Physics, SLAC), Tune Kame (SLAC), Peter F. Michelson (Physics), Vahé Petrosian (Physics), Roger W. Romani (Physics), Norman H. Sleep (Geophysics), Howard Zebker (Electrical Engineering, Geophysics)

*Associate Professors:* Tom Abel (Physics, SLAC), Steve Allen (Physics, SLAC), Sarah Church (Physics), Guenther Walther (Statistics)

*Assistant Professors:* Stefan Funk (Physics, SLAC), Chao-Lin Kuo (Physics, SLAC), Risa Wechler (Physics, SLAC)

*Professors (Research):* C-W. Francis Everitt (HEPL), Philip H. Scherrer (Physics)

*Consulting Professor:* Martin Walt (Electrical Engineering)

*SLAC Staff Physicist:* Grzegorz Madejski

*Center Offices:* Varian, Room 316

*Mail Code:* 94305-4060

*Phone:* (650) 723-1439

*Email:* danav@stanford.edu

*Web Site:* <http://www.stanford.edu/group/CSSA>

The Center for Space Science and Astrophysics is an interdepartmental organization coordinating research in space science and astrophysics. Its members are drawn from the Department of Geological and Environmental Sciences in the School of Earth Sciences; the departments of Aeronautics and Astronautics, Electrical Engineering, and Mechanical Engineering in the School of Engineering; the departments of Applied Physics, Physics, and Statistics in the School of Humanities and Sciences; the W. W. Hansen Experimental Physics Laboratory; and the SLAC National Accelerator Laboratory. Its membership also includes all faculty and appropriate staff at the Kavli Institute for Particle Astrophysics and Cosmology, located at SLAC and the Physics department.

The facilities of the center are available to any interested and qualified student, who must be admitted by and registered in a department. The departments of Aeronautics and Astronautics, Applied Physics, Electrical Engineering, Mechanical Engineering, and Physics offer opportunities leading to an M.S. or Ph.D. degree for work in space science or astrophysics. The center also offers opportunities to undergraduates who may, for instance, participate in research projects in their junior or senior years, on a part-time basis during the school year or on a full-time basis during the summer. The Astronomy Course Program operates a small student observatory where students may gain practical experience in astronomical observing.

## FREEMAN SPOGLI INSTITUTE FOR INTERNATIONAL STUDIES (FSI)

The Freeman Spogli Institute for International Studies (FSI) provides opportunities for undergraduate research through the CISAC Interschool Honors Program in International Security Studies and the CDDRL Undergraduate Honors Program. For information on the institute that manages student fellowship programs, see <http://fsi.stanford.edu/fellowships/>.

### INTERSCHOOL HONORS PROGRAM IN INTERNATIONAL SECURITY STUDIES

*Co-Directors:* Michael M. May, Paul Stockton

The Center for International Security and Cooperation (CISAC) coordinates a University-wide Interschool Honors Program in International Security Studies. Students chosen for the honors program intern with a security-related organization, attend the program's honors college in Washington, D.C. in September, attend a year-long core seminar on international security research, and produce an honors thesis with policy implications. Upon fulfilling individual department course requirements and completing the honors program, students graduate in their major with a certificate in Honors in International Security Studies. To be considered for the program, students must demonstrate sufficient depth and breadth of international security course work. Ideally, applicants to the program should have taken: POLISCI 114S, International Security in a Changing World; MS&E 193, Technology and National Security; and at least one related course such as ECON 150/PUBLPOL 104, Economic Policy Analysis; STS 110/MS&E 197/PUBLPOL 103B, Ethics and Public Policy; SOC 160, Formal Organizations; PUBLPOL 102/SOC 166, Organizations and Public Policy; POLISCI 110B, Strategy, War, and Politics; and POLISCI 114T, Major Issues in International Conflict Management.

Students in the program enroll in IIS 199, Interschool Honors Program in International Security Studies, in Autumn, Winter, and Spring quarters.

Information about and applications to this program may be obtained from the Center for International Security and Cooperation, C223 Encina Hall Central, telephone (650) 723-9626, or <http://cisac.stanford.edu>.

### CENTER ON DEMOCRACY, DEVELOPMENT, AND THE RULE OF LAW (CDDRL) HONORS PROGRAM

The Center on Democracy, Development, and the Rule of Law (CDDRL) Honors Program provides students majoring in International Relations the opportunity to conduct an independent research project focused on issues of democracy, development, and the rule of law under CDDRL faculty guidance. Students interested in the program consult with their prospective honors advisers in their junior year and must submit their honors thesis proposal in the Spring Quarter of that year. Honors students present a formal defense of their theses in mid-May of the senior year. Prerequisites for the program are a 3.5 grade-point average, a strong overall academic record, and demonstrated skills in writing and conducting independent research.

Required course work includes INTNLREL 199, an honors research seminar that focuses on democracy, development, and the rule of law in developing countries as well as INTNLREL/POLISCI 114D, CDDRL's flagship undergraduate lecture course taught every Autumn Quarter. Honors students meet bi-weekly with faculty and their peers to present project theses and receive feedback. Students must attend honors college in Septem-

ber before Autumn Quarter classes begin and the weekly CDDRL seminar.

For more information, contact the Center on Democracy, Development, and the Rule of Law, Encina Hall C100, phone (650) 724-7197; or see <http://cddrl.stanford.edu>.

## WOODS INSTITUTE FOR THE ENVIRONMENT: GOLDMAN INTERSCHOOL HONORS PROGRAM IN ENVIRONMENTAL SCIENCE, TECHNOLOGY, AND POLICY

---

The Woods Institute for the Environment coordinates a University-wide interschool honors program in environmental science, technology, and policy. Undergraduates planning to participate in the honors program are required to pursue studies in environmental sciences, technology, and policy, with a concentration in a single discipline. After completion of the prerequisite units, students join small group honors seminars to work with faculty members in the environmental field on an honors thesis that incorporates both scientific principles and policy aspects of environmental issues.

Courses in environmental studies appear under the course listings of the schools of Earth Sciences, Engineering, and Humanities and Sciences. Information about and applications to this program may be obtained by phoning (650) 723-5697 and at <http://woods.stanford.edu/education/goldman>.

The Woods Institute provides support for student group projects focusing on the environment and sustainability. For details, see <http://woods.stanford.edu/students/projects.html>.

The Woods Institute also sponsors a weekly series of talks on a broad range of energy topics under the rubric of CEE/ENERGY 301, Energy Seminar. For more information, see <http://woods.stanford.edu/cgi-bin/energyseminar.php>. Libraries and Computing Resources

## STANFORD UNIVERSITY LIBRARIES AND ACADEMIC INFORMATION RESOURCES

*University Librarian and Director of Academic Information Resources:* Michael A. Keller

*Web Site:* <http://library.stanford.edu>

Stanford University Libraries and Academic Information Resources (SULAIR) includes more than 30 libraries and programs supporting research, teaching, and learning at Stanford University. SULAIR acquires and delivers library collections in all formats, establishes policies and standards to guide the use of academic information resources, develops training and support programs for academic uses of computers, and maintains a broad array of electronic information resources, including the online library catalog and several hundred article and indexing databases and electronic journal subscriptions.

In each library unit, knowledgeable professional staff provide assistance in locating and using print and online information resources. Subject specialists and reference librarians are available for individual consultation, group classes, demonstrations, and special workshops by request.

Libraries throughout campus provide group and individual study spaces, public computers, personal laptop connections, photocopy machines, and digital scanners for use by Stanford faculty, staff, and students.

For information about library hours, see <http://libraryhours.stanford.edu>.

In support of the University's academic mission, Academic Computing Services provides technology expertise, resources and services to students and faculty. Academic Computing Services supports the use of technology in teaching, learning, research, and community; operates and manages technology-enabled teaching and learning environments including classrooms and public study spaces, the Multimedia Studio in Meyer Library, the Digital Language Lab, and computer clusters in Green Library, Tresidder Union, and the student residences; provides technology education, consulting support, and multimedia services at Meyer and in the residences; provides faculty-specific computing resources through the Academic Technology Specialist Program and Academic Technology Lab; and provides technology support to Stanford University Libraries' services.

Information about the library collections, facilities, services, and policies is available at <http://library.stanford.edu>.

Further information about library services and resources is available from the Information Center staff in Cecil H. Green Library at <http://infocenter.stanford.edu>, and from reference staff in all University libraries.

### CENTRAL CAMPUS LIBRARIES

The Cecil H. Green Library (East and Bing Wings) maintains research collections in the humanities, social sciences, area studies, and interdisciplinary areas. These collections number approximate-

ly 2.8 million volumes. Major services in Green Library include: the Information Center, the Media Microtext Center, the Jonsson Reading Room, the Lane Reading Room, the Bender Room, Loan Desk and Privileges, Interlibrary Services, course reserves, the Department of Special Collections, and the University Archives.

The J. Henry Meyer Memorial Library houses the East Asia Library as well as the Academic Computing Services group of SULAIR and provides study, multimedia, consulting, and instructional support services. In addition, Meyer Library houses the University's Digital Language Lab, technology enabled study spaces and classrooms, the Academic Technology Lab, and the central offices of Student Computing and Academic Computing Services.

## BRANCH LIBRARIES

Humanities and Social Sciences Branch Libraries include the Art and Architecture Library, Cubberley Education Library, East Asia Library, Music Library, and Archive of Recorded Sound.

Science Branch Libraries include the Branner Earth Sciences Library, Engineering Library, Falconer Biology Library, Mathematical and Computer Sciences Library, Harold A. Miller Library at the Hopkins Marine Station, Physics Library, and Swain Library of Chemistry and Chemical Engineering.

For a complete list of campus libraries, see: <http://libraries.stanford.edu>.

## COORDINATE LIBRARIES

### *J. Hugh Jackson Library, Graduate School of Business*

*Director:* Kathy Long

### *Lane Medical Library*

*Director:* Debra Ketchell

### *Crown Law Library*

*Director:* Paul Lomio

### *SLAC National Accelerator Laboratory Library*

*Director of Technical Information Services:* Patricia Kreitz

## HOOVER INSTITUTION ON WAR, REVOLUTION AND PEACE

*Director:* John Raisian

*Web Site:* <http://www.hoover.org>

Since its founding by Herbert Hoover in 1919 as a special collection dealing with the causes and consequences of World War I, the Hoover Institution has become an international center for documentation, research, and publication on political, economic, social, and educational change in the 20th and 21st centuries.

The Hoover Library and Archives include one of the largest private archives in the world and contain outstanding area collections on Africa, East Asia, Eastern Europe, Russia and the former Soviet Union, Latin America, the Middle East, North America, and Western Europe.

Holdings include government documents, files of newspapers and serials, manuscripts, memoirs, diaries, and personal papers of men and women who have played significant roles in the events of these centuries, the publications of societies and of resistance and underground movements, the publications and records of national and international bodies, both official and unofficial, and books and pamphlets, many of them rare and irreplaceable. The materials are open to all Stanford students, faculty, and staff, to scholars from outside the University, and to the public at large.

## INFORMATION TECHNOLOGY SERVICES (IT SERVICES)

*Web Site:* <http://it-services.stanford.edu>

IT Services manages the University's central information technology infrastructure and provides hundreds of services and applications for use in academic and business activities. Support is provided in four layers:

- Participation and client-focused leadership in institutional IT planning, including strategies for data center expansion, centrally managed storage and backup, and business continuity and disaster recovery.
- Applications and services for departments and end-users including email, calendaring, wireless connectivity, web authentication, and Windows and Linux server hosting. These services are supported by a help desk, contract-support consultants, online self-help, and training.
- Applications and services that support other campus service providers, including the help desk, change management, and network registration systems.
- A communications and collaboration infrastructure robust enough to support advanced network, voice, and web-based services.

To learn about the variety of information technology resources available at Stanford, see <http://computing.stanford.edu>. For assistance with technology services at Stanford, contact the Stanford IT Help Desk at (650) 725-HELP (5-4357) or submit a request through <http://helpsu.stanford.edu>.

# THE CONTINUING STUDIES PROGRAM

*Dean and Associate Provost:* Charles Junkerman  
*Associate Dean and Director:* Dan Colman  
*Program Offices:* 482 Galvez Mall  
*Mail Code:* 94305-6079  
*Phone:* (650) 725-2650; *Fax:* (650) 725-4248  
*Email:* [continuingstudies@stanford.edu](mailto:continuingstudies@stanford.edu)  
*Web Site:* <http://continuingstudies.stanford.edu>

The Continuing Studies Program provides adults from Stanford and surrounding communities the opportunity to take classes on a part-time basis for intellectual enrichment, both personal and professional. Courses and events are offered in all four academic quarters, with over 350 courses planned throughout the year.

The faculty are primarily drawn from the ranks of the University's professoriate. The program presents a wide variety of courses, with a central concentration in the liberal arts, including literature, history, art and architecture, and music.

Tuition discounts are available to University employees, Stanford students and faculty, Stanford Alumni Association members, educators, and those over age 65.

For a course catalogue, contact the Continuing Studies Program by mail, phone, or email as above.

The Continuing Studies Program also administers the Master of Liberal Arts Program and Summer Session.

## MASTER OF LIBERAL ARTS PROGRAM

*Associate Dean and Director:* Linda Paulson

*Participating Faculty:* Russell Berman (Comparative Literature and German Studies), Marc Bertrand (French and Italian, emeritus), Jay Bhattacharya (Medicine), Eamonn Callan (Education), Gerry Dorfman (Hoover Institute and Political Science), Michele Elam (English), Martin Evans (English), Paula Findlen (History), Larry Friedlander (English), Kenneth Fields (English), Hester Gelber (Religious Studies), Albert Gelpi (English, emeritus), Barbara Gelpi (English, emerita), Robert Gregg (Religious Studies, emeritus), Tom Grey (Music), Hans Ulrich Gumbrecht (French and Italian), Van Harvey (Religious Studies, emeritus), Gavin Jones (English), Charles Junkerman (Continuing Studies Program), Nancy Kollmann (History), Marsh McCall (Classics, emeritus), Mark Mancall (History, emeritus), The Rev. Scotty McLennan (Religious Life), David Palumbo-Liu (Comparative Literature), Linda Paulson (English), Denis Phillips (Education, and, by courtesy, Philosophy, emeritus), Ronald Rebolz (English, emeritus), Rush Rehm (Drama and Classics), John Rick (Anthropology), John Rickford (Linguistics), Paul Robinson (History, emeritus), Ramón Saldívar (English), Paul Seaver (History, emeritus), Thomas Sheehan (Religious Studies), Robert Siegel (Microbiology and Immunology), Peter Stansky (History, emeritus), Stephen Stedman (Freeman Spogli Institute for International Studies, and, by courtesy, Political Science), Thomas Wasow (Linguistics), Ernlé Young (Center for Biomedical Ethics), Steven Zipperstein (History)

*Program Offices:* 482 Galvez Mall  
*Mail Code:* 94305-6079  
*Phone:* (650) 725-0061  
*Email:* [mlaprogram@stanford.edu](mailto:mlaprogram@stanford.edu)  
*Web Site:* <http://mla.stanford.edu>

Courses offered by the Master of Liberal Arts Program are listed under the subject code MLA on the *Stanford Bulletin's* ExploreCourses web site.

*Program Description*—The Master of Liberal Arts (MLA) program aims to provide a flexible, interdisciplinary program for returning adult students who seek a broad education in the liberal arts. The underlying premise of the MLA program is that knowledge gained through an interdisciplinary course of study leads to intellectual independence and satisfaction not always found in discipline-based programs of study. The goals of the MLA program are to develop advanced critical thinking, to foster intellectual range and flexibility, and to cultivate an individual's ability to find the connections among different areas of human thought: art, history, literature, music, philosophy, political science, science, and theology.

The program is designed with part-time students in mind: seminars meet in the evening, and students complete the degree in 4-5 years. All master's seminars are taught by members of the Stanford faculty. Seminar size is limited to 20 students.

*Degree Requirements*—Candidates for the MLA degree must complete a minimum of 50 units of course work with at least a grade point average of 3.3 (B+). These units must include a three-quarter foundation course (equal to 12 units total), one 4-unit core introductory seminar for second-year students, at least seven 4-unit MLA seminars, and a 6-unit master's thesis. Students must also fulfill distribution requirements in each of the following areas: humanities; social science or social policy; and science, engineering, or medicine.

*Foundation Course*—During the Autumn, Winter, and Spring following admission to the program, there is a three-quarter foundation course required of all students. The purpose of this course is to lay the groundwork for the interdisciplinary, intercultural studies the student will shortly undertake. The foundation course will introduce students to the broad framework of history, literature, philosophy, political science, and art.

*Core Seminar*—During the first quarter of the second year, new students take the core introductory seminar, MLA 102, The Plague: An Introduction to Interdisciplinary Graduate Study. This seminar aims to prepare students for interdisciplinary graduate work at Stanford. Students concentrate on writing a critical graduate paper, conducting library research, presenting the results of their research, and productively participating in a collaborative seminar.

*MLA Seminars*—Students are required to take at least seven MLA seminars of four units each. Each year, at least nine seminars are offered in the MLA program. Each MLA course requires a substantial seminar paper. Students are encouraged to use these papers as a way to investigate new fields of interest, as well as a way to develop different perspectives on issues in which they have an ongoing interest.

*Master's Thesis*—The MLA program culminates in the master's thesis. Students approaching the end of the program write a thesis, approximately 75-100 pages in length, that evolves out of work they have pursued during their MLA studies. The thesis is undertaken with the prior approval of the MLA program, and under the supervision of a Stanford faculty member. During the process of writing the thesis, students are members of a work-in-progress group, which meets regularly to provide peer critiques, motivation, and advice. Each student presents the penultimate draft of the thesis to a colloquium of MLA faculty and students, in preparation for revising and submitting the final draft to the adviser and to the MLA program.

*Enrollment Requirements*—MLA students must enroll for each academic year from the time of original matriculation until conferral of the degree. To remain active, students must either: (a) complete a minimum of two courses (eight units) in one academic year, defined as from the beginning of Autumn Quarter through the end of the following Summer Quarter; or (b) be actively working on their theses and regularly attend a minimum of three quarters of the

work-in-progress meetings from the time the student enrolls in work-in-progress through graduation.

*Timeline for completion*—All requirements for the Master of Liberal Arts degree must be completed within five years after the student's first term of enrollment in the program. If extraordinary circumstances prevent completion within five years, a student may submit a written petition for a maximum one-year extension to the Associate Dean and Director. This petition is reviewed by a committee which makes a recommendation to the Director; the final decision is at the discretion of the Director. To be considered, the petition must be submitted on or before May 1 of the student's fifth year in the program.

*Registration*—Master of Liberal Arts students enroll in courses through Stanford's Axxess system.

## SUMMER SESSION

*Associate Dean:* Patricia Brandt

*Assistant Dean of Summer College:* Jim Sirianni

*Program Offices:* 482 Galvez Mall

*Mail Code:* 94305-6079

*Phone:* (650) 723-3109; *Fax:* (650) 725-6080

*Email:* [summersession@stanford.edu](mailto:summersession@stanford.edu)

*Web Site:* <http://summer.stanford.edu>

Students attending Stanford Summer Session are enrolled in either a regular degree program, the Summer Visitor Program, or the Summer College program for High School Students.

The regular degree program is for students who are candidates for a Stanford degree and who are continuing their academic work in Summer Quarter. Degree-seeking Stanford students should indicate on Axxess during Spring Quarter that they intend to register for Summer Quarter. Separate application is not required.

The Summer Visitor Program is for students who are not presently candidates for a Stanford degree. It is open to students who are currently enrolled in or have graduated from another college or university. Qualified high school students who have completed at least their sophomore year may apply to the Summer College program.

Students in Summer Session, in general, enjoy the privileges of students in the regular degree programs except that work completed cannot be applied toward a Stanford degree or credential until the student has been admitted to regular standing. Admission as a summer visitor does not imply later admission to matriculated status. However, should the visitor matriculate at a later date through normal admission procedures, the summer work may be applied toward the requirements for a Stanford degree or credential at the discretion of the University or academic department.

For more information, contact Summer Session by email, mail, phone, or fax using the listings above. Information is updated annually in January and may also be found online at <http://summer.stanford.edu>.

# STUDENT AFFAIRS

*Vice Provost for Student Affairs:* Greg Boardman

*Web Site:* <http://stanford.edu/dept/vpsa>

Student Affairs supports the academic mission of the University by fostering a climate conducive to living and learning in a diverse community. The division encompasses programs and services for undergraduates and graduate students which include the Office of Residential Education, University Registrar, Vaden Health Center, Career Development Center, Office of Accessible Education, Graduate Life Office, Haas Center for Public Service, Judicial Affairs, Bechtel International Center, Asian American Activities Center, Black Community Services Center, El Centro Chicano, LGBT Community Resources Center, Native American Cultural Center, Women's Community Center, and Office of Student Activities. The Vice Provost for Student Affairs reports directly to the Provost and is responsible for providing leadership, policy direction, administrative support for budget, personnel, facilities, and development, as well as oversight of the efficiency and effectiveness of each of the division's units. The Vice Provost interacts with the President, the Provost, the University Cabinet, faculty, schools, department representatives, students, and parents. The Vice Provost also serves as an ex officio member of the Senate of the Academic Council.

## STUDENT SERVICES CENTER

*Student Services Center Supervisor:* Lori Gager

*Office:* Tresidder Memorial Union, 2nd floor

*Contact* via <https://remedyweb.stanford.edu/helpsu/helpsu?pcat=StuAcct&dtag=10772> *HelpSU:*

*Phone:* (650) 723-7772 or (866) 993-7772 (toll-free)

*Web Site:* <http://studentservicescenter.stanford.edu>

The Student Services Center (SSC) is committed to providing a single point of friendly, professional service for answers to questions concerning administrative and financial issues. We strive to resolve 90% of students' issues upon first contact. We represent the following offices: Student Financial Services, Office of the University Registrar, University Cashier's Office, the Financial Aid Office, and Stanford ID Card Services. We are able to assist students with questions related to University Billing, Financial Aid Disbursements, Refunds, Payroll Deductions, Payment Plan, Enrollment, Stanford Degree Policies & Procedures, Stanford ID Card, forms pickup and submission, and more.

## DEAN OF STUDENT LIFE

*Dean of Student Life:* Chris Griffith

*Office:* Old Union

*Phone:* (650) 723-2733

*Web Site:* <http://stanford.edu/dept/vpsa>

The Dean of Student Life has responsibility for overseeing the development, implementation, and monitoring of comprehensive student life programs. The unit consists of the Graduate Life Office, Office of Student Activities, Judicial Affairs, Organizational Conduct Board, Old Union and 5-SURE. The Dean reports to the Vice Provost for Student Affairs and is a member of his executive group.

# DEAN OF EDUCATIONAL RESOURCES

---

*Dean of Educational Resources:* Sally Dickson  
*Office:* Old Union  
*Phone:* (650) 721-4037  
*Web Site:* <http://stanford.edu/dept/vpsa>

The Dean of Educational Resources is responsible for overseeing the development, implementation, and monitoring of comprehensive programs relating to ethnic, gender, career, and learning needs and interests of student groups. The unit is comprised of the Asian American Activities Center, Black Community Services Center, El Centro Chicano, LGBT Community Resources Center, Native American Cultural Center, Women's Community Center, Bechtel International Center, Career Development Center, and the Office of Accessible Education. The Dean also has oversight responsibility for the Haas Center for Public Service, as well as responsibility for the Acts of Intolerance Protocol. The Dean reports to the Vice Provost for Student Affairs and serves as a member of his executive group.

## OFFICE OF ACCESSIBLE EDUCATION (OAE)

---

*Offices:* 563 Salvatierra Walk  
*Phone:* (650) 723-1066; TDD (650) 723-1067  
*Web Site:* <http://stanford.edu/group/OAE>

The Office of Accessible Education provides services and resources to students with disabilities through its four primary centers.

### STUDENT DISABILITY RESOURCE CENTER (SDRC)

The SDRC coordinates academic and other accommodations for undergraduates and graduate students who have disabilities including mobility impairments, chronic illness, sensory disabilities, learning disabilities, and psychological disabilities. The center's goal is to enable students with disabilities to participate fully in the educational experience at Stanford while meeting the academic standards maintained by the university.

In accordance with the provisions of the Americans with Disabilities Act of 1990 and Section 504 of the Rehabilitation Act of 1973, the SDRC offers an array of accommodations and auxiliary aids and services to students with documented disabilities. Direct support services include, but are not limited to, note-taking, Braille, oral or sign language interpretation, books on tape or electronic text, examination accommodations, and special housing arrangements. During the academic year, the SDRC runs a golf cart service called DisGo Cart for use by students who have temporary and permanent mobility impairments or who use a wheelchair. To arrange for an on-campus ride call 725-2484 (5-CHUG).

### ASSISTIVE LEARNING TECHNOLOGY CENTER (ALTEC)

ALTEC is the technology arm of the Office of Accessible Education providing resources to make information technology and education more accessible for students with disabilities. Students can access assistive technology software such as screen magnification, speech recognition, text-to-speech screen readers, and composition tools from many of the computing clusters throughout the University and residences.

ALTEC's Alternative Format Production Facility (AFPF) converts printed text to computer files (e-text), large print, or Braille using high-speed scanners and Braille embossers. The Equipment

and Software Loan Library (EaSLL) allows students to borrow certain assistive technology for short-term evaluation purposes.

ALTEC's services are available to eligible students who need assistance due to a disability. Students should contact the SDRC at (650) 723-1066 for more information.

### SCHWAB LEARNING CENTER

The Schwab Learning Center offers enhanced services for students with learning differences (LD) and attention deficit hyperactivity disorder (ADHD).

### CENTER FOR UNIVERSAL DESIGN IN EDUCATION

Application of the principles of universal design for instruction (UDI) represents a new approach to teaching that promotes proactive design and use of inclusive instructional practices that benefit all students. The center seeks to advance the development of instructional methods, tools, and strategies that are flexible, can be customized, and are accessible to students from different backgrounds, learning styles, abilities, and disabilities in a variety of learning contexts.

## CAREER DEVELOPMENT CENTER

---

*Center Office:* 563 Salvatierra Walk  
*Web Site:* <http://cardinalcareers.stanford.edu>

*Counseling Services*—Monday through Friday, 9 a.m. to 12 noon, 1 p.m. to 5 p.m.; (650) 725-1789.

*Employment Services*—Monday through Friday, 8:15 a.m. to 4:30 p.m.; (650) 723-9014.

*Reference File Services*—Monday through Friday, 10 a.m. to 12 noon, 1 p.m. to 4 p.m.; (650) 723-1548.

The Career Development Center (CDC) offers services such as counseling, workshops, presentations, on-campus recruiting, job/internship databases, reference file services, library resources, and alumni networking, to help students make informed decisions and to plan for life after Stanford.

Services are available to undergraduate and graduate students, and all students are encouraged to visit in person or via the web. Programs and services are free to students; limited services are available to alumni and student spouses/domestic partners.

The following suggestions may assist students in getting the most out of the CDC:

- Visit early in a Stanford career.
- Register with the CDC's Cardinal Career online system to access internships, part-time and full-time.
- Gather general career information through the career resource library, jobs and internship database, handouts, and alumni network.
- Inquire about individual counseling for all stages of career planning and development.
- Participate in workshops and other programs to clarify career goals.
- Use the Reference File Service to ease the management of applications for graduate school or employment.

## COMMUNITY CENTERS

---

There are six ethnic and community centers that support students who seek services associated with a particular group or community. Each center has its own site and professional staff who advise and counsel students. In addition, the centers sponsor programs throughout the year that foster intellectual, personal, and cultural growth. Detailed information is available on the following web sites:

- Asian American Activities Center: <http://stanford.edu/group/a3c>
- Black Community Services Center: <http://stanford.edu/dept/BCSC>
- El Centro Chicano: <http://stanford.edu/dept/elcentro>
- LGBT Community Resources Center: <http://lgbt.stanford.edu>
- Native American Cultural Center: <http://stanford.edu/dept/nacc>
- Women's Community Center: <http://womenscntr.stanford.edu>

## GRADUATE LIFE OFFICE

*Graduate Life Office:* Escondido Village Office, 859 Comstock Circle

*Graduate Life Office, Graduate Community Center:* 750 Escondido Road

*Phone:* (650) 736-7078

*Email:* [graduatelife@stanford.edu](mailto:graduatelife@stanford.edu)

*Web Site:* <http://glo.stanford.edu>

The Graduate Life Office (GLO) works with students on and off campus and with student groups, including Community Associates (student residence staff), the Graduate Student Programming Board, and the Graduate Student Council, to create an inclusive environment through programs in the residences and campus-wide. The Graduate Community Center (GCC) serves as a focal point for meetings and activities in the graduate community.

The GLO staff also works with individual students who need information and support or who may be experiencing personal difficulties. Staff members are knowledgeable about and have access to support and resources available throughout the University. Staff work closely with student services administrators in academic departments to provide consultation and services to students in need.

## GRADUATE STUDENT RESIDENCE PROGRAM

The University's philosophy of graduate student housing is based on the premise that supporting high quality graduate scholarship and research is central to the mission of the University. By providing affordable housing in proximity to academic resources, the University creates an environment conducive to research and intellectual dialogue among students, their peers, and faculty members. The Community Associate (CA) program in the residences serves as a supportive resource for residents and to connect student neighbors through social events and activities to build a sense of community in the residences.

## HAAS CENTER FOR PUBLIC SERVICE

*Center Offices:* 562 Salvatierra Walk

*Mail Code:* 8620

*Phone:* (650) 723-0992

*Web Site:* <http://haas.stanford.edu>

The Haas Center for Public Service connects academic study with public service to strengthen communities and develop effective public leaders. The Center aspires to develop aware, engaged, and thoughtful citizens who contribute to the realization of a more just and humane world.

To accomplish these objectives, the center collaborates with associated units at Stanford to implement programs in the following areas of work.

- Through the center's fellowship programs, undergraduates perform summer internships in nonprofit organizations, foundations, and government agencies locally, nationally, and internationally. Postgraduate fellowships allow graduating se-

niors to work with a mentor in a nonprofit or public agency for a year.

- The Public Service Leadership Fellows Program provides an opportunity for students who want to be intentional about their leadership development. Center staff also provides leadership development through training, advising, and resources to Stanford in Government, Alternative Spring Break, and other student groups engaged in service.
- With support from the center, Stanford faculty members have created service-learning courses that involve Stanford students in providing direct service and community-based research efforts in collaboration with local schools and other partner agencies. The center's Public Service Scholars Program supports seniors writing honors theses that combine academic research with service to communities.
- Faculty from Stanford's School of Education collaborate with center staff to provide curriculum guidance and training for tutors and mentors at nearby schools. Another program trains Stanford students to bring results of scientific research to neighborhood programs. The federally supported Community Service Work-Study program, administered in conjunction with the University's Financial Aid Office, allows students to satisfy work-study obligations year-round by working in community organizations and public agencies.
- The postgraduate and alumni programs help students, particularly graduating seniors, identify opportunities to assist in launching their public service careers in nonprofit and government agencies, and in the private sector in service-related positions. The Haas Center houses the Center on Philanthropy and Civil Society, a program of the Institute for Research in the Social Sciences (IRiSS).

Students interested in public service fellowships, service-learning courses, community-based research, public and community service internships for youth and education, or service organization leadership development should contact the center.

## BECHTEL INTERNATIONAL CENTER

*Web Site:* <http://icenter.stanford.edu>

The Bechtel International Center (I-Center) is a meeting place for students and senior research scholars at Stanford from throughout the world and for internationally oriented U.S. students, faculty, and short-term visitors on the campus. Through a variety of social, cultural, and educational programs, I-Center facilities are utilized to acquaint students and scholars with the life of the University and the community, and to bring them together in activities of mutual interest.

The Center believes that international educational exchange nurtures a lifelong global perspective, and plays a key role in supporting Stanford's standing as a truly international university in the following ways:

- Provides information about and assistance with obtaining and maintaining legal status in the U.S. to foreign students, scholars, and Stanford departments.
- Advises U.S. students who are pursuing scholarships for study and research abroad.
- Enables foreign students, scholars, and their family members at Stanford to receive maximum academic, cultural, and personal benefit from their stays in the U.S.
- Contributes to international activities at Stanford by helping to create a welcoming and supportive environment that is responsive to the needs of the international community.

- Facilitates professional meetings between visiting international delegations and their Stanford counterparts.
- Provides opportunities for Stanford students, faculty, staff, and members of the local community to broaden their horizons by interacting with people from different cultures through programs to increase international awareness and understanding.

## JUDICIAL AFFAIRS AND STUDENT CONDUCT

Office: Tresidder Memorial Union, 2nd floor  
 Mailing Address: 459 Lagunita Drive, Suite 9  
 Mail Code: 94305-3010  
 Phone: (650) 725-2485  
 Fax: (650) 736-0247  
 Web Site: <http://judicialaffairs.stanford.edu>  
 Email: [judicial.affairs@stanford.edu](mailto:judicial.affairs@stanford.edu)

The primary codes of conduct for students are the Fundamental Standard and Honor Code. The Student Judicial Charter of 1997 was approved by the Associated Students of Stanford University, the Senate of the Academic Council, and the President of the University during Spring Quarter 1996-97 and Autumn Quarter 1997-98, replacing the earlier charter and becoming effective in January 1998. Cases of alleged violations of the University's Honor Code, Fundamental Standard, and other student conduct policies now proceed through an established student judicial process based upon the Student Judicial Charter of 1997, which can be found in its entirety at the University's Office of Judicial Affairs web site at <http://judicialaffairs.stanford.edu>. The web site also contains the policies, rules, and interpretations, as well as the University's Student Conduct Penalty Code, applicable to those students found responsible for violating the Honor Code, the Fundamental Standard, or other University policy or rule.

When a violation of the Fundamental Standard, Honor Code, or other University policy or rule governing student conduct is alleged, or whenever a member of the University community believes such a violation has occurred, he or she should contact the Office of Judicial Affairs.

### THE FUNDAMENTAL STANDARD

Students at Stanford are expected to know, understand, and abide by the Fundamental Standard, which is the University's basic statement on behavioral expectations articulated in 1896 by Stanford's first President, David Starr Jordan, as follows:

"Students are expected to show both within and without the University such respect for order, morality, personal honor, and the rights of others as is demanded of good citizens. Failure to do this will be sufficient cause for removal from the University."

*Actions that have been found to be in violation of the Fundamental Standard include:*

- Physical assault
- Property damage
- Forgery
- Theft
- Sexual harassment or other sexual misconduct
- Misrepresentation in seeking financial aid, University housing, University meals, or other University benefits
- Driving on campus while under the influence of alcohol
- Misuse of computer equipment or email
- Sending threatening or obscene messages

There is no standard penalty which applies to violations of the Fundamental Standard. Penalties range from a formal warning to expulsion. Each case is fact specific; considerations include the nature and seriousness of the offense, the motivation underlying the offense, and precedent in similar cases.

### THE HONOR CODE

The Honor Code is the University's statement on academic integrity. It is essentially the application of the Fundamental Standard to academic matters. Provisions of the Honor Code date from 1921, when the honor system was established by the Academic Council of the University Faculty at the request of the student body and with the approval of the President. The Honor Code reads:

- The Honor Code is an undertaking of the students, individually and collectively:
  - that they will not give or receive aid in examinations; that they will not give or receive unpermitted aid in class work, in the preparation of reports, or in any other work that is to be used by the instructor as the basis of grading;
  - that they will do their share and take an active part in seeing to it that others as well as themselves uphold the spirit and letter of the Honor Code.
- The faculty on its part manifests its confidence in the honor of its students by refraining from proctoring examinations and from taking unusual and unreasonable precautions to prevent the forms of dishonesty mentioned above. The faculty will also avoid, as far as practicable, academic procedures that create temptations to violate the Honor Code.
- While the faculty alone has the right and obligation to set academic requirements, the students and faculty will work together to establish optimal conditions for honorable academic work.

*Examples of conduct that has been found to be in violation of the Honor Code include:*

- Copying from another's examination paper or allowing another to copy from one's own paper
- Unpermitted collaboration
- Plagiarism
- Revising and resubmitting a quiz or exam for regrading without the instructor's knowledge and consent
- Representing as one's own work the work of another
- Giving or receiving aid on an academic assignment under circumstances in which a reasonable person should have known that such aid was not permitted

For more information, see the Interpretations and Applications of the Honor Code at <http://stanford.edu/dept/vpsa/judicialaffairs/guiding/honorcode>.

The standard penalty for a first offense is a one quarter suspension from the University and 40 hours of community service. In addition, many faculty members issue a 'No Pass' for the course in which the violation occurred.

### OLD UNION

Stanford's student union, known as the Old Union, serves as a hub for student activities on campus. The central structure in a three-building complex, the Old Union has administrative offices for ASSU, Office of Student Activities (OSA), Dean of Student Life, and Dean of Educational Resources. It also houses a multi-faith center known as CIRCLE (Center for Inter-Religious Community, Learning, and Experiences), meeting rooms for student use, and the Axe and Palm which offers casual dining. Adjoining the Old Union, the Nitery houses a black-box theater and El Centro Chicano, and the Clubhouse is home to the Asian American Activities Center and the Native American Cultural Center.

### OFFICE OF RESIDENTIAL EDUCATION

Web Site: <http://www.stanford.edu/dept/resed/>

The Office of Residential Education is responsible for developing the policies, programs, and staffing which support the intellectual, educational, and community-building activities in student residences. The conviction behind the Stanford residence program is that formal teaching, informal learning, and personal support in residences play an important role in a Stanford education.

## RESIDENTIAL EDUCATION PROGRAM

The Residential Education program provides Stanford undergraduates with a small community experience within a large research university. Residential Education programs extend the classroom into the residences and complement the academic curriculum with activities and experiences that contribute to students' preparation for a life of leadership, intellectual engagement, citizenship, and service. An extensive network of staff, including many who live in the residence halls, supports students during their undergraduate careers.

## RESIDENCE DEANS

Residence Deans provide assistance to on- and off-campus undergraduate students. They can advise students about personal matters, occasionally intervene directly in behavioral problems or mental health concerns, and assist with personal emergencies. Advice is also available on issues of academic probation or suspension, leaves of absence, special concerns of students, and administrative matters. Residence Deans work closely with the Dean of Student Life and other University offices. They are assigned to specific residences and to off-campus students. For further information, undergraduates should call Residential Education at (650) 725-2800. For assistance, graduate students can consult Assistant Deans in the Graduate Life Office at (650) 736-7078.

## OFFICE OF STUDENT ACTIVITIES

*Web Site:* <http://www.stanford.edu/dept/OSA>

The Office of Student Activities, located in Old Union, supports student activities, over 600 student organizations and the ASSU through publications, workshops, one-on-one consultation, advising and major event planning support. The OSA also provides fundraising expertise for student groups and leadership opportunities for students.

## VOLUNTARY STUDENT ORGANIZATIONS

There are over 600 different Voluntary Student Organizations (VSOs) at Stanford. VSOs are those organizations: (1) in which membership is not mandatory and is nondiscriminatory, (2) in which membership is both open and limited to current Stanford students registered in a degree-granting program, (3) in which students make all organizational decisions, and (4) whose purposes and procedures are consistent with the goals and standards of the University. In order to use University facilities, the Stanford name, or to receive ASSU funding, all voluntary student organizations must register with the University through the Office of Student Activities, Old Union, room 206.

As a condition of registration, each voluntary student organization must file and have approved each of the following:

1. A statement of purpose and organizational constitution.
2. A statement about membership eligibility.
3. Clear procedures for officer elections.
4. Identification of the authorized representatives of the group, who must be a currently registered student, and at least five active members in the organization who are currently registered students.

Each voluntary student organization must renew its registration with the University annually, early in Autumn Quarter, by submitting new registration materials.

If a voluntary student organization that is registered with the University seeks to use University facilities for meetings open to more than its own members and to specifically invited guests, such meetings shall be subject to the regulations of the Committee on Public Events. All organization events held in University facilities must receive event approval from the Office of Student Activities and Stanford Events.

A voluntary student religious organization may hold open meetings in University facilities only with the approval of the Office of the Dean for Religious Life.

A registered voluntary student organization may advocate publicly a position on a public issue, provided the organization clearly identifies itself, and provided such an organization in any public statement makes clear it does not represent or speak for the University or for the Associated Students.

No student group may use University space or facilities or receive other University support for purposes of supporting candidates for public office. Groups may use public places such as White Plaza for tables, speeches, and similar activities; may have intermittent use of on-campus meeting rooms; and may request to reserve auditoriums and similar space for public events including speeches by political candidates as long as all University guidelines are followed.

## TRESIDDER MEMORIAL UNION

Tresidder Memorial Union (TMU) is a center of community activity on the Stanford campus. It houses a variety of restaurants and meeting rooms, a ticket office and campus information center, a convenience store, banking and credit union offices with ATMs, a fitness center, FedEx/Kinkos and a hair salon.

TMU is also the home of several administrative offices: Meeting Services, Judicial Affairs, Residential Education, Student Services Center, Stanford Catering, Stanford Dining (Meal Card program), the LAIR computer center and the Office of the Vice Provost for Student Affairs.

## VADEN HEALTH CENTER

*Center Office:* 866 Campus Drive  
*Web Site:* <http://vaden.stanford.edu>

The Allene G. Vaden Health Center strictly protects the confidentiality of information obtained in medical care and counseling.

## MEDICAL SERVICES

Medical Services (650-498-2336, ext. 1) is the first stop for diagnosis and treatment of illness, injury, and ongoing conditions, as well as preventive counseling and education. Services available without additional charge for students who have paid the Campus Health Service fee include:

- Medical appointments in general medicine and sports medicine.
- Medical advice for routine concerns throughout the day. When Medical Services is closed, advice for urgent conditions is available from the on-call physician.
- Referral to specialists, primarily at Stanford Hospital and Clinics and Menlo Medical Clinic.

Additional services (fees apply):

- Allergy injections, immunizations, travel services, physical exams for employment and scholarships, HIV testing, laboratory, X-rays, drug screening (academic year only).
- Pharmacy (650-498-2336, ext. 3) and physical therapy (650-723-3195) are available on site.

## COUNSELING AND PSYCHOLOGICAL SERVICES (CAPS)

CAPS (650-723-3785) helps students who experience a wide variety of personal, academic, and relationship concerns. Services available without additional charge for students who have paid the Campus Health Service Fee include:

- Evaluation and brief counseling, including personal, couples and group therapy. Students requesting or requiring longer, ongoing therapy incur fees.
- Workshops and groups that focus on students' social, personal and academic effectiveness.
- Crisis counseling for urgent situations 24 hours a day.
- Consultation and outreach to faculty, staff, and student organizations.

## YWCA SEXUAL ASSAULT CENTER AT STANFORD

The YWCA Sexual Assault Center at Stanford assists students, staff, faculty and other Stanford campus affiliates who are victims of sexual assault. Located on the first floor of Vaden Health Center, it is open by appointment or drop-in office hours, Monday through Thursday, 2:00-4:00 PM. The center also can be reached at its 24-hour campus telephone line (650) 725-9955.

## HEALTH PROMOTION SERVICES

Health Promotion Services (650-723-0821) educates and supports students to help them make informed, healthy decisions about their lifestyle. Services include:

- Individual preventive counseling and resource referral concerning nutrition, weight management, eating and body image, alcohol, tobacco and other drug use, sexual assault and harassment, relationships, intimacy and gender issues, and sexual health.
- Health education speakers, programs, and events and workshops at student residences, community centers, student organizations, and for new students (such as Real World: Stanford).
- Academic courses and internships.
- Student groups and volunteer opportunities including Peer Health Educators, HIV Peer Anonymous Counseling and Testing (HIV\*PACT), Sexual Health Peer Resource Center (SHPRC), and CPR/First Aid classes.

## HEALTH INSURANCE

All registered students are required to have health insurance. Call (650) 723-2135 for more information. Cardinal Care, the University-sponsored plan for students, fulfills this requirement. Insured by Aetna Student Health (medical), and ValueOptions (mental health), Cardinal Care features comprehensive, worldwide coverage, services by referral at Stanford University Medical Center and Menlo Medical Clinic, and lowest costs when one initiates care at Vaden Health Center. Stanford does not sponsor a health insurance plan for dependents; for available options, see <http://vaden.stanford.edu/insurance/dependent.html>. Options for voluntary dental insurance are also offered.

# OTHER SERVICES AND PROGRAMS

## BOOKSTORE

*Web Site:* <http://stanfordbookstore.com>

Organized in 1897, Stanford Bookstore, (650) 329-1217, located at 519 Lasuen Mall (White Plaza), provides a diverse selection of books, course materials, and supplies to the students, faculty, staff, and community in and surrounding Stanford. The bookstore carries over 130,000 titles, including a wide selection of medical books and books written by Stanford authors, making it one of the largest bookstores in the nation. The bookstore also carries medical instruments, Stanford logo apparel, gifts and souvenirs, periodicals, and features a café that provides an enhanced shopping experience. The Computer Store, in the main branch, sells academically priced computer hardware and software. Other services include shipping of purchases, gift cards, book buyback, fax service, postage stamp sales, an ATM, and Enterprise Rent-A-Car hotline. There are four branches in addition to the Stanford Bookstore that also serve the community: the Track House Sports Shop, (650) 327-8870, at the corner of Campus Drive and Galvez Street, is the headquarters for Stanford Athletic Gear; Tresidder Express convenience store, (650) 723-9224 in Tresidder Union; the Stanford Shop, (650) 614-0295, at the Stanford Shopping Center, provides Stanford apparel; and the Bookshop, (650) 725-2775, at the Cantor Center for the Arts, carries books on the arts, fine gifts, apparel, and jewelry.

## DIVERSITY AND ACCESS OFFICE

*Office:* Mariposa House, 585 Capistrano Way

*Mail Code:* 94305-8230

*Phone:* (650) 723-0755; *TTY:* (650) 723-1216

*Email:* [equal.opportunity@stanford.edu](mailto:equal.opportunity@stanford.edu), [disability.access@stanford.edu](mailto:disability.access@stanford.edu)

*Web Site:* <http://stanford.edu/dept/diversityaccess>

The Diversity and Access Office has two primary missions:

1. To oversee University compliance with nondiscrimination and equal opportunity laws as well as the regulations relating to affirmative action. This includes collecting, monitoring, reporting, and analyzing major personnel data regarding the hiring, promotion, and retention of women and minorities.
2. To oversee University compliance with federal and state disability-related laws, including (but not limited to) the Americans with Disabilities Act, and Sections 503 and 504 of the Rehabilitation Act. This includes providing certain non-academic services (and accommodations) to students with disabilities, and providing assistance and information to staff and faculty with disabilities needing workplace accommodations. The office also provides auxiliary aids and services to the public visiting Stanford and attending public events. In addition, the office monitors disability access on campus and provides information regarding web accessibility.

## STANFORD CONFERENCE SERVICES

*Phone:* (650) 723-3126

*Email:* [conferenceinquiries@stanford.edu](mailto:conferenceinquiries@stanford.edu)

*Web Site:* <http://conference.stanford.edu>

A conference is defined as any student, youth, or adult group that convenes for part of a day (including a luncheon), overnight, or for several days, outside the regular or summer academic sessions for registered students. Policies concerning conferences are the responsibility of the offices of the President and the Provost.

To make arrangements for hosting a new, academically sponsored residential summer conference during the mid-June through late-August time frame, contact Stanford Conference Services by phone or email as listed above. Stanford Conference Services also offers meeting planning services on a year-round basis for academically sponsored conference groups seeking assistance with planning and managing residential and non-residential conferences. In addition, conference organizers seeking to conduct conferences outside of the late August to early June time frame can also contact the non-academic facilities scheduling in the Office of the University Registrar, (650) 723-6755 or [reg-events@stanford.edu](mailto:reg-events@stanford.edu), or contact Stanford Events, (650) 723-2551 or [stanfordevents@stanford.edu](mailto:stanfordevents@stanford.edu).

Academic sponsorship by a Stanford dean or department head is required for first time conferences hosted by University departments or by conferences hosted by external organizations interested in meeting at Stanford. Conferences initiated by University departments or external organizations must demonstrate consistency with the University's academic mission. For summer conferences, the sponsoring department submits its proposal to the Director of Stanford Conference Services for review in terms of available facilities and for the approval of the President's Office. At least half of the participants in any summer conference at Stanford hosted by an external organization must be housed in Stanford's campus residences and participate in daily meal plans provided by Stanford Dining. On-campus residential housing and dining services are normally available from the Sunday following Commencement through late August.

Summer conference groups should contact Stanford Conference Services concerning arrangements for tables, chairs, audio-visual aids, signage, janitorial services, trash pick-up and removal, sprinkler shutoffs, and other conference-related products/services. During the academic year, housing arrangements for University-sponsored visitors can be made through the Stanford Guest House, (650) 926-2800, or at <http://guesthouse.stanford.edu>.

## OMBUDS

*Stanford University Ombuds:* David Rasch  
*Ombuds Office:* Mariposa House, 585 Capistrano Way, Room 210  
*Phone:* (650) 723-3682  
*Mail Code:* 94305-8200  
*Email:* [rasch@stanford.edu](mailto:rasch@stanford.edu)  
*Web Site:* <http://stanford.edu/dept/ombuds>  
*School of Medicine Ombuds:* <http://med.stanford.edu/ombuds>

The charge to the Ombuds office at Stanford is: "The Ombuds-person's task is to protect the interests and rights of members of the Stanford community from injustices or abuses of discretion, from gross inefficiency, from unnecessary delay and complication in the administration of University rules and regulations, and from inconsistency, unfairness, unresponsiveness, and prejudice in the individual's experience with University activities. The Ombuds-person's office exists to receive, examine, and channel the complaints and grievances of members of the Stanford community, and to secure expeditious and impartial redress."

Any troublesome matter in the University community may be discussed in confidence with the University Ombuds. Services of the office are available to students, staff, and faculty. Although possessing no decision making authority, the Ombuds has wide powers of inquiry. The Ombuds refers matters to the proper person or office expeditiously and also provides conflict resolution services. For the role of the office of the Ombuds in cases of sexual ha-

arrassment, see the "Non-Academic Regulations" section of this bulletin.

## POLICE SERVICES

*Department Office:* Corner of Campus Drive and Serra Street  
*Phone:* (650) 723-9633  
*Web Site:* <http://police.stanford.edu>

The Stanford Department of Public Safety is a full service police department that operates 24 hours a day, 7 days a week. For police, fire, or ambulance response, dial 9-1-1, or 9-9-1-1 from a University phone. Emergency assistance can also be obtained by using one of the nearly 100 Blue Emergency Phone Towers strategically placed around campus.

The department is comprised of the following divisions:

The Field Services Division consists of sworn and non-sworn officers who patrol the campus and respond to calls for service. Sworn officers receive their police powers through the Santa Clara County Sheriff's Office. Sworn officers have the legal authority to stop vehicles, make arrests, and enforce all laws. Non-sworn officers assist the sworn officers with security patrols, evidence collection, crime prevention presentations, and other assigned tasks.

Community Service Division: Community Service Officers (CSOs) enforce the parking rules and regulations on campus, and provide traffic control at special events, construction zones, and accident scenes. CSOs also provide building security during emergency or critical incidents.

The Support Services Division provides logistical, technical, and accounting support to the department. Special events are handled through this division as well. Special Events Personnel (SEPs) provide security at campus events including athletic events, concerts, student-sponsored events, and dignitary visits. SEPs are available for hire by groups needing security at their University events. Contact the special events office at (650) 723-4924, or email [event\\_security@stanford.edu](mailto:event_security@stanford.edu), for more information.

The Administrative Support Division supports the department through training, recruiting, payroll, human resources, and other business functions.

For additional safety information or to view the yearly crime statistics, see the Stanford Safety and Security Almanac, available free from Public Safety, or see <http://police.stanford.edu>.

## OFFICE FOR RELIGIOUS LIFE

*Office:* Memorial Church  
*Phone:* (650) 723-1762  
*Web Site:* <http://religiouslife.stanford.edu>

The mission of the Office for Religious Life (ORL) is to guide and enhance spiritual, religious, and ethical life within the Stanford University community. Multifaith exploration and dialogue, central in Stanford's history from its founding, is a vital part of both its ethos and education.

The ORL is committed to welcoming students of all genders and sexual identities, all religious and non-religious traditions, and all cultural backgrounds, striving to ensure that students, faculty, and staff have access to supportive contexts in which to pursue their spiritual journeys on the Stanford campus.

The ORL oversees and provides support for Stanford Associated Religions (SAR), more than thirty religious organizations that offer their spiritual services to the campus, as well as the Center for Inter-Religious Community, Learning, and Experiences (the CIRCLE). Located on the third floor of the remodeled Old Union, the CIRCLE offers an interfaith sanctuary, a seminar room, a common room, a student lounge, a non-lending library, and offices housing many SAR member groups.

# STANFORD ALUMNI ASSOCIATION

Web Site: <http://stanfordalumni.org>

Phone: (800) 786-2586 or (650) 723-2021

The Stanford Alumni Association (SAA) seeks to serve all Stanford alumni and students by offering programs and services such as reunions, regional events, *Stanford Magazine*, online services, volunteer and learning opportunities, and the alumni directory.

The Stanford Alumni Association's alumni and student class outreach department (ASCO) provides undergraduates and graduate students with networking opportunities, celebratory and social events, and programs that enhance their Stanford experience and help connect them to the 200,000 alumni worldwide who make up the Stanford alumni community. ASCO programs bring students and alumni together through Reunion Homecoming Weekend each autumn and Commencement weekend in the spring, along with alumni networking events throughout the year.

For students, SAA sponsors events such as student tailgates, alumni panels, Senior Send-off, Senior Dinner on the Quad, and Class Day. The Alumni Association gives out the J.E. Wallace Sterling Award and the Stanford Award of Excellence annually to honor graduating seniors for exemplary service to the University. For more information on student programs at the Stanford Alumni Association, see <http://www.stanfordalumni.org/students/home.html>.

## STANFORD EVENTS

Stanford Events supports the mission and goals of Stanford University through open engagement of the campus community and the worldwide public. The department has three divisions: Public Events, Stanford Lively Arts, and the Stanford Ticket Office.

Public Events oversees, advises, and produces University events and ceremonies as designated by the President's office such as: Commencement, Baccalaureate, the University President's inaugurations, New Student Orientation Convocation, Community Day/Founders' Celebration, and other high-profile university events. This division also serves in an advisory capacity to the schools, departments, and student groups on campus, and oversees University policy and procedure regarding campus events. The Public Events office has final approval authority of Stanford facility and open space use for non-academic public events on campus. For information about University event planning, policies, procedures, and University facilities, see <http://stanfordevents.stanford.edu>, or call (650) 723-2551.

Stanford Lively Arts, the University's presenting program, annually brings to campus a full season of music, dance, and theater by world-famous artists and exceptional newcomers. It furthers research and creativity through world premieres, collaborations, and commissions. In addition to on-stage performances, Lively Arts extends and supplements the academic life of the University through master classes, extended residencies, workshops, lectures and demonstrations, and group discussions. Internationally acclaimed artists perform serious work with Stanford students in classrooms as well as in residence halls. Discounts on performances are available for faculty, staff, and students. For tickets and more information, see <http://livelyarts.stanford.edu>, or call (650) 725-ARTS (2787).

Stanford Ticket Office provides ticketing services for the arts and entertainment events of Stanford University. Tickets for Stanford Lively Arts, Stanford music and drama departments, Stanford Jazz Workshop/Festival, and the ASSU Concert Network are among the event tickets that are available through this office. For

more information, see <http://tickets.stanford.edu>, or call (650) 725-ARTS (2787).

## AWARDS AND HONORS

### FACULTY AND STAFF AWARDS

#### KENNETH M. CUTHBERTSON AWARD

The Kenneth M. Cuthbertson Award was established in 1981 to recognize exceptional service to Stanford University. It was established by members of the faculty who wish to remain anonymous. All members of the Stanford community are eligible for the award; the sole criterion is the quality of the contribution that the recipients have made to the University. The award provides a way of honoring members of the staff and faculty for their efforts on behalf of the University.

Ordinarily, one award is made each year. The award was first presented in 1981 to the person for whom it is named. Kenneth M. Cuthbertson was one of the early architects of Stanford's long-term financial planning and fundraising program. His service to Stanford set an enduring standard for those who will come after him. The award is made annually at the University Commencement Ceremony.

#### LLOYD W. DINKELSPIEL AWARDS

The Lloyd W. Dinkelspiel Awards recognize distinctive and exceptional contributions to undergraduate education at Stanford University. The two principal awards are made to the faculty or staff members adjudged to have made the most distinctive contribution to the development and enrichment of undergraduate education in its broadest sense. Two awards are also made to graduating seniors who combine academic achievement with effective contributions to undergraduate student life. Preference is given to service in the School of Humanities and Sciences in the area of liberal education. The awards are made from an endowment fund established in memory of Lloyd W. Dinkelspiel, a Stanford alumnus and trustee. The awards are made annually at the University Commencement Ceremony.

#### WALTER J. GORES AWARDS

The Walter J. Gores Faculty Achievement Awards for excellence in teaching were established by bequest of Walter J. Gores, Stanford Alumnus of the Class of 1917 and a professor at the University of Michigan for 30 years. Teaching is understood in its broadest sense and includes, in particular, lecturing, leading discussions, tutoring, and advising at the undergraduate or graduate levels. Any member of the teaching staff of the University is eligible for an award, including all faculty of professorial rank, instructors, lecturers, teaching fellows, and teaching and course assistants. Ordinarily, awards are made to a senior faculty member (associate or full professor) or senior lecturer; a junior faculty member or member of the teaching staff; and a teaching assistant (graduate or undergraduate student). The awards are made annually at the University Commencement Ceremony.

#### ALLAN COX MEDAL FOR FACULTY EXCELLENCE FOSTERING UNDERGRADUATE RESEARCH

The Allan Cox Medal for Faculty Excellence Fostering Undergraduate Research is awarded annually to a faculty member who has established a record of excellence directing undergraduate research over a number of years. It may also go to a faculty member who has done an especially outstanding job with just one or two undergraduates who have demonstrated superior work. The medal was established in memory of the former professor of Geophysics and Dean of the School of Earth Sciences, a strong supporter of faculty-student research collaboration.

## HERBERT HOOVER MEDAL FOR DISTINGUISHED SERVICE

David Starr Jordan's belief that every academic degree should represent work actually done in or under the direction of the institution granting it has meant that, since its founding, Stanford has awarded no honorary degrees. As a means of recognizing extraordinary individuals who deserve special acknowledgment, the Stanford Alumni Association in 1962 voted to establish the Herbert Hoover Medal for Distinguished Service. The name pays tribute to the former President's example of service to his University, to his country, and to the cause of world humanitarianism. Indeed, Mr. Hoover was the first award recipient. The gold medal is presented following selection by an anonymous committee appointed by the Chair of the Board of Directors of the Alumni Association.

## STUDENT AWARDS

### BOOTHE PRIZE FOR EXCELLENCE IN WRITING

Awarded during the freshman year, the Boothe Prize recognizes excellence in writing. Students are selected for this honor on the basis of essays written for courses fulfilling the Introduction to the Humanities or Writing and Rhetoric requirements. The prize is named for Mr. and Mrs. D. Power Boothe, Jr., whose gifts to the University reflect their interest in the humanities.

### PRESIDENT'S AWARD FOR ACADEMIC EXCELLENCE IN THE FRESHMAN YEAR

The President's Award honors students who have exceptionally distinguished academic records that exemplify a strong program of study in the freshman year. Students eligible for the award normally have completed Writing and Rhetoric and Introduction to the Humanities requirements during their first year at Stanford.

### DEANS' AWARD FOR ACADEMIC ACHIEVEMENT

The Deans of Earth Sciences, Engineering, and Humanities and Sciences recognize from five to ten undergraduate students each year for their academic endeavors. Honorees are cited for noteworthy accomplishments which represent more than a high grade point average or success in course work. Faculty nominate students who have exceptional tangible achievements in classes or independent research, national academic competitions, a presentation or publication for a regional or national audience, or exceptional performance in the creative arts.

### FIRESTONE MEDAL FOR EXCELLENCE IN RESEARCH

The Firestone Medal is awarded to seniors in recognition of excellence in undergraduate research. Departments in the School of Humanities and Sciences nominate students who have completed outstanding honors projects in the social, physical, and natural sciences.

### ROBERT M. GOLDEN MEDAL FOR EXCELLENCE IN THE HUMANITIES AND CREATIVE ARTS

The Golden Medal recognizes outstanding achievement in the humanities and the creative arts. Seniors receive these medals upon nomination by their major department.

### HOEFER PRIZE FOR EXCELLENCE IN UNDERGRADUATE WRITING

The Hoefer Prize recognizes students and faculty for their work in courses that meet the University Writing Requirement for writing in the major. Prizes are awarded in each of the five areas of the undergraduate curriculum: humanities, social sciences, natural sciences, engineering, and earth sciences.

## FREDERICK EMMONS TERMAN ENGINEERING SCHOLASTIC AWARD

The School of Engineering annually presents the Terman Award to seniors for outstanding academic achievement. The awardees share their award with a high school teacher of their nomination.

## PHI BETA KAPPA

Phi Beta Kappa is a nationwide society honoring students for the excellence and breadth of their undergraduate scholarly accomplishments. Membership in the Stanford Chapter (Beta of California) is open to undergraduates of all majors. To be elected to Phi Beta Kappa at Stanford, a student must achieve academic distinction in the major as well as in courses across a broad range of fields.

Approximately a tenth of the members of a graduating class are elected to Phi Beta Kappa. Of this number, about one fifth are chosen in their junior year, the remainder in their senior year.

The chapter's election guidelines define breadth of study as excellence beyond the major field. To be considered for election, a student must have taken at least three courses of 3 units or more at Stanford by the time elections are held early in the Spring Quarter with a letter grade of 'B-' or better in each of the following three major domains of knowledge: humanities; science, engineering, and math; and social sciences. Students who transfer in their junior year must have taken at least two courses at Stanford in two of the major domains and at least one course in the third domain, and must have completed a minimum of 75 units of academic work at Stanford by the end of Winter Quarter. Students who transfer in their sophomore year must have taken at least two courses at Stanford in each of the major domains.

There is no direct correlation between Stanford University General Education Requirements (GERs) and Phi Beta Kappa breadth requirements. The elections committee analyzes the content of individual courses to determine which major domain requirement they may satisfy. IHUM, PWR, and first-year language courses do not satisfy the PBK breadth criterion.

A grade of '+' or 'CR' is not considered a sign of distinction. Minimally satisfying the breadth criterion is not considered a sign of distinction.

The academic records of eligible students are automatically reviewed, so no special action is required for students wishing to be considered for membership. Anonymity in the election process is ensured by removal of the students' names from their academic records before consideration. Students who desire that their records not be made available for consideration by the Stanford chapter of Phi Beta Kappa should inform the Registrar, 630 Serra Street, Suite 120, Stanford, CA 94305-6032.

## EXCHANGE PROGRAMS AND CROSS-ENROLLMENT AGREEMENTS

Stanford has exchange programs and cross-enrollment agreements with a number of other colleges and universities. The purpose of these programs and agreements is to offer Stanford students courses and training that are not available in the Stanford curriculum.

### EXCHANGE PROGRAMS UNDERGRADUATE

Stanford has exchange programs with four colleges and universities that allow students to exchange schools for a quarter/semester or for a year, depending on the school. These programs are best suited to students in their junior year, when the

major area of study has been determined. Stanford students register for zero units at Stanford during the quarter(s) in which they are attending another college or university and pay the regular Stanford tuition. Courses taken at the other institution are treated as transfer credit back to Stanford. Students should contact the External Credit Evaluation section of the Office of the University Registrar to determine whether the courses taken through an exchange program may qualify for credit toward a Stanford degree. Only the number of units accepted in transfer, not the course titles or the grades received, are recorded on the Stanford transcript.

Exchange programs are currently available at three historically black institutions: Howard University in Washington D.C.; and Morehouse College and Spelman College in Atlanta, Georgia. The exchange program at Dartmouth College in Hanover, New Hampshire, focuses on Native American Studies. Further information is available at the Undergraduate Advising and Research Center.

## GRADUATE

The Exchange Scholar Program is open to doctoral students in the fields of humanities, social sciences, and sciences who have completed one full year of study at one of the participating institutions. These students may apply to study at Stanford, and Stanford students may apply to one of these other institutions, for a maximum of one academic year (Autumn, Winter, and Spring quarters) to take advantage of particular educational opportunities not available on the home campus. The participating institutions are Brown University, University of Chicago, Columbia University, Cornell University, Harvard University, Massachusetts Institute of Technology, Princeton University, Stanford University, University of Pennsylvania, and Yale University. Further information on the program may be obtained from the Office of the University Registrar, or the graduate dean's office at participating institutions. Some institutions may place restrictions on specific departments.

Stanford also has separate exchange programs with the University of California, Berkeley, and the University of California, San Francisco. Further information may be obtained at the Office of the University Registrar.

## CROSS-ENROLLMENT AGREEMENTS FOR ROTC

Stanford has cross-enrollment agreements for the Reserve Officers' Training Corps (ROTC) with the Navy and Marine Corps ROTC program at the University of California at Berkeley, the Army ROTC program at Santa Clara University, and the Air Force ROTC program at San Jose State University. The purpose of these agreements is to allow Stanford students to engage in military training while working on their degrees from Stanford. Courses taken in ROTC programs are offered by and through UC Berkeley, Santa Clara, and San Jose State. The courses do not qualify to be used towards the 12-unit requirement for full-time registration status or satisfactory academic progress requirements for Stanford undergraduates. Certain ROTC courses may be eligible to be used as transfer credit if they qualify under Stanford's transfer credit practices.

Normally, students who participate in ROTC training complete a four-year course of instruction at the respective institution that consists of two years of basic courses during the freshmen and sophomore years, and an advanced course of instruction during the junior and senior years. Students who accept ROTC scholarships are generally subject to a service obligation, depending on the regulation of the particular service.

Stanford students who are enrolled in ROTC programs under the cross-enrollment agreements are eligible to compete for scholarships to include full tuition and a monthly stipend (Navy and Air Force), or other varying amounts (Army). Students normally compete for national scholarships as high school seniors, although current Stanford students may be eligible to enroll in ROTC on a non-scholarship basis. Non-scholarship ROTC students are eligible to compete for scholarships, and individual services may offer additional scholarship programs to current qualifying undergra-

duate and graduate students. Interested students should contact the appropriate military professor at the host institution to obtain information on these programs and to initiate application procedures (see below).

Students who satisfactorily complete an ROTC program and are awarded a Stanford degree qualify for a commission as a Second Lieutenant in the U.S. Army, an Ensign in the U.S. Navy, a Second Lieutenant in the U.S. Marines, or a Second Lieutenant in the U.S. Air Force.

For questions concerning the ROTC programs, Stanford students should consult one of the following: Air Force ROTC, San Jose State University, San Jose, CA 95192-0051, telephone (408) 924-2960; Army ROTC, Department of Military Science, Santa Clara University, Santa Clara, CA 95053, telephone (408) 554-4034; Naval ROTC, 152 Hearst Gym, University of California, Berkeley, CA 94720-3640, telephone (510) 642-7602.

## AIR FORCE ROTC

The following are offered by San Jose State University. See also <http://info.sjsu.edu/web-dbggen/catalog/departments/AS.html>.

**AS 001A,B. The Foundation of the United States Air Force**  
Freshman year. Introduces students to the Air Force and AFROTC. The characteristics, missions, and organization of the Air Force. Officership and professionalism, career opportunities, military customs and courtesies, and communication skills. Required leadership lab.

### AS 002A,B. The Evolution of the United States Air And Space Power

Sophomore year. Air and space power through historical study and analysis. The capabilities, function, and doctrinal employment of aerospace forces. Emphasis is on oral and written communication skills. Required leadership lab.

### AS 131A,B. Air Force Leadership Studies

Junior year. Leadership, management fundamentals, professional knowledge, Air Force personnel system, ethics, and communication skills. Application-level knowledge of skills required of junior Air Force officer through case studies, practical exercises, and seminar discussion. Required leadership lab. Prerequisites: AS 001A,B, AS 002A,B, or as determined by department chair.

### AS 141A. National Security Affairs

Senior year. The national security process, international and regional relations, advanced leadership ethics, and Air Force doctrine with focus on the military as a profession, officership, military justice, civilian control of the military, and current issues affecting military professionalism. Required leadership lab. Pre- or corequisites: AS 131A, or as determined by department chair.

### AS 141B. Preparation for Active Duty

Senior year. The role of the Air Force officer in contemporary society emphasizing skills to facilitate a smooth transition from civilian to military life. Required leadership lab. Pre- or corequisites: AS 131A,B, or as determined by department chair.

### Leadership Laboratory (LLAB)

Mandatory. Hands-on. Drill and ceremony; Air Force customs and courtesies; leadership and followership skills. Guest speakers.

## ARMY ROTC

See also <http://scu.edu/rotc>.

## FRESHMAN YEAR

### MILS 11. Leadership and Personal Development

Taught on Stanford campus. Personal challenges and competencies for effective leadership. How life skills such as goal setting, time management, physical fitness, and stress management relate to leadership and officership. Development of a personal fitness program under the guidance of an Army master fitness trainer. Two 60-minute classes per week. Weekly 3-hour leadership labs required. One four-day weekend field exercise away from the University.

### MILS 12. Foundations in Leadership I

Taught on Stanford Campus. Leadership fundamentals such as

setting direction, problem solving, listening, presenting briefs, providing feedback, and effective writing skills. Leadership dimensions and values. Two 60-minute classes per week. Weekly 3-hour leadership labs required. One evening military formal dinner.

#### **MILS 13. Foundations in Leadership II**

Taught on Stanford campus. Leadership framework; practical applications in fundamentals such as problem solving, listening, presenting briefs, and effective writing skills. Values, attributes, skills, and actions in the context of practical and interactive exercises. Two 60-minute classes per week. Weekly 3-hour leadership labs required. One four-day weekend field training exercise away from the University.

### **SOPHOMORE YEAR**

#### **MILS 21. Innovative Leadership**

Taught on Stanford campus. Creative and innovative leadership strategies and styles through historical cases and interactive exercises. Personal motivation and team building through team exercises. Focus is on leadership values and attributes through organizational customs and courtesies. Leadership case studies; individual creeds and organizational ethos. Two 60-minute classes per week. Weekly 3-hour labs required. One four-day weekend field training exercise away from the University.

#### **MILS 22. Leadership in Changing Environments**

Taught on Stanford campus. The challenges of leading in contemporary operational environments. Crosscultural challenges and applications to leadership tasks and situations. Case studies. Two 60-minute classes per week. Weekly 3-hour labs required. One evening military formal dinner.

#### **MILS 23. Team Leading Procedures**

Taught on Stanford campus. Plans and orders that enable small units to complete assigned tasks and the decision making process. Planning techniques to develop orders, briefing plans, and decisions. Two 60-minute classes per week. Five 3-hour labs per quarter. One four-day weekend field training exercise away from the University.

### **JUNIOR YEAR**

#### **MILS 131. Adaptive Team Leadership**

Taught at Santa Clara University. Adaptive leadership skills and the demands of the ROTC Leader Development Assessment Course (LDAC). Scenarios related to small-unit tactical operations to develop self awareness and thinking skills. Feedback on student leadership abilities. Two 90-minute classes per week. Weekly 3-hour labs required. One mandatory four-day field training exercise away from the University. Prerequisites: MILS 11, 12, 13, 21, 22, and 23, or consent of department chair.

#### **MILS 132. Situational Leadership I**

Taught at Santa Clara University. Skills in leading small units, including decision making, persuading, and motivating team members when under fire. Two 90 minute classes per week. Weekly 3-hour labs required. One evening military formal dinner. Prerequisite: MILS 131, or consent of department chair.

#### **MILS 133. Situational Leadership II**

Taught at Santa Clara University. Applications of situational leadership challenges in decision making, persuading, and motivating team members when under fire. Preparation for ROTC Leader Development Assessment Course (LDAC). Two 90-minute classes per week. Weekly 3-hour labs required. One mandatory four-day field training exercise away from the University. Prerequisite: MILS 132, or consent of department chair.

### **SENIOR YEAR**

#### **MILS 141. Developing Adaptive Leaders**

Taught at Santa Clara University. Planning, executing, and assessing complex operations, functioning as a member of staff, and providing leadership performance feedback to subordinates. Situational opportunities to assess risk, make ethical decisions, and provide coaching to fellow ROTC students. Responsibilities of key staff. Two 90-minute seminars per week. Weekly 3-hour labs required. One mandatory four-day weekend field training exercise away from the University. Prerequisite: MILS 133, or consent of department chair.

#### **MILS 142. Leadership in a Complex World I**

Taught at Santa Clara University. Differences in customs and cour-

tesies, military law, principles of war, and rules of engagement in the face of international terrorism. Interacting with nongovernmental organizations, civilians on the battlefield, and host nation support. Two 90-minute seminars per week. Weekly 3-hour labs required. One evening military formal dinner. Prerequisite: MILS 141.

#### **MILS 143. Leadership in a Complex World II**

Taught at Santa Clara University. Preparation for first unit of assignment and transition to Lieutenant. Case studies, scenarios, and exercises to prepare for complex ethical and practical demands as commissioned officers in the U.S. Army. Two 90-minute seminars per week. Weekly 3-hour labs required. One mandatory four-day weekend field training exercise away from the University. Prerequisite: MILS 142.

### **MILITARY HISTORY**

#### **MILS 199. Dynamics of Leadership in Military History**

Taught at Santa Clara University. Dynamics that drive decisions made by history's military leaders and followers. Wars and battles from 1861 to present. Techniques and innovations in military training, weapon systems, political timing, and their effect they have on strategies. Combined arms experiences.

### **NAVAL ROTC**

The Department of Naval Science at UC Berkeley offers programs of instruction for men and women leading to active duty reserve commissions in the U.S. Navy or U.S. Marine Corps. Navy option students enrolled in one of the four-year programs normally complete the following courses during the first two years. Students should consult <http://navyrotc.berkeley.edu> for more information and changes to course offerings.

### **FRESHMAN YEAR**

#### **NS 1. Introduction to Naval Science**

#### **NS 2. Sea Power**

### **SOPHOMORE YEAR**

#### **NS 3. Leadership and Management**

#### **NS 10. Naval Ship Systems I: Engineering**

Navy option students enrolled in either the four- or two-year program normally complete the following courses during their junior and senior years.

### **JUNIOR YEAR**

#### **NS 12A. Navigation and Naval Operations I**

#### **NS 12B. Navigation and Naval Operations II**

### **SENIOR YEAR**

#### **NS 401. Naval Ship Systems**

#### **NS 412. Leadership and Ethics**

In addition to the above courses, Navy option ROTC students are required to participate in weekly professional development laboratories (drill) at UC Berkeley and complete a number of other courses at Stanford including one year of calculus, physics, and English, and one quarter of computer science, and military history or national security policy.

In lieu of NS 401, NS 10, NS 12A and NS 12B, Marine option students participate in Marine Seminars and complete MA 154, History of Littoral Warfare, and MA 20, Evolution of Warfare, or a designated equivalent course. Marine option students also participate in the weekly professional development laboratories.

# NONACADEMIC REGULATIONS

## NONDISCRIMINATION POLICY

Stanford University admits students of either sex and any race, color, religion, sexual orientation, or national and ethnic origin to all the rights, privileges, programs, and activities generally accorded or made available to students at the University. Consistent with its obligations under the law, it prohibits discrimination, including harassment, against students on the basis of sex, race, age, color, disability, religion, sexual orientation, gender identity, national and ethnic origin, and any other characteristic protected by applicable law in the administration of its educational policies, admissions policies, scholarships and loan programs, and athletic and other University-administered programs. The following person has been designated to handle inquiries regarding this policy: the Director of the Diversity and Access Office, Mariposa House, 585 Capistrano Way, Stanford University, Stanford, CA 94305-8230; (650) 723-0755 (voice), (650) 723-1216 (TTY), (650) 723-1791 (fax), [equal.opportunity@stanford.edu](mailto:equal.opportunity@stanford.edu) (email).

## ADA (AMERICANS WITH DISABILITIES ACT)/SECTION 504 GRIEVANCE PROCEDURE (STUDENT)

For information concerning policies and procedures for students with disabilities, see [http://www.stanford.edu/dept/diversityaccess/access/student\\_grievance.html](http://www.stanford.edu/dept/diversityaccess/access/student_grievance.html), or the ADA/Section 504 Compliance Officer, Diversity and Access Office, Mariposa House, 585 Capistrano Way, Stanford University, Stanford CA, 94305-8230, (650) 723-0755 (voice), (650) 723-1216 (TTY), (650) 723-1791 (fax), [equal.opportunity@stanford.edu](mailto:equal.opportunity@stanford.edu) (email); see also the Student Disability Resource Center at <http://www.stanford.edu/group/DRC>.

### POLICY

*The following is quoted from the policy:*

#### I. Policy

Stanford University, in compliance with state and federal laws and regulations, including the Americans with Disabilities Act of 1990 (ADA) and Section 504 of the Rehabilitation Act of 1973 (Section 504), does not discriminate on the basis of disability in administration of its education-related programs and activities, and has an institutional commitment to provide equal educational opportunities for disabled students who are otherwise qualified.

Students who believe they have been subjected to discrimination on the basis of disability, or have been denied access to services or accommodations required by law, have the right to use this grievance procedure.

#### II. Applicability

The grievance procedure set forth below is applicable to undergraduate and graduate students of the University. In general, it is designed to address disputes concerning the following:

- Disagreements regarding a requested service, accommodation, or modification of a University practice or requirement;
- Inaccessibility of a program or activity;
- Harassment or discrimination on the basis of disability;
- Violation of privacy in the context of disability.

For disputes regarding certain specific academic accommodations or modification of academic requirements (such as reduction in the number of academic course units taken quarterly or yearly, requests for substitution of courses, or issues relating to academic standing), the alternate procedure set forth in Section V (C) of the Stanford University Policy and

Procedure for Student Requests for Services and Accommodations should be followed. For questions regarding which procedure is applicable, contact the Compliance Officer at the Diversity and Access Office.

These two sets of procedures supplant the Statement on Student Academic Grievance Procedures (set forth in the *Stanford Bulletin*) for disability-related grievances.

#### III. Compliance Officers

Stanford University's Compliance Officers are responsible for administering this grievance procedure as well as ensuring compliance with applicable laws. The Director of the Diversity and Access Office is the designated ADA/Section 504 Compliance Officer. The office is located in Mariposa House, 585 Capistrano Way, Stanford, CA 94305-8230, (650) 723-0755 (voice), (650) 723-1216 (TTY), (650) 723-1791 (fax), [equal.opportunity@stanford.edu](mailto:equal.opportunity@stanford.edu) (email).

Additional Compliance Officers may be designated from time to time by the Provost from those faculty and staff members knowledgeable concerning disability issues and the legal mandates of state and federal disability statutes.

#### IV. Informal Resolution

Prior to initiating the formal complaint procedure set forth below, the student should, in general, first discuss the matter orally or in writing with the individual(s) most directly responsible. If no resolution results, or if direct contact is inappropriate under the circumstances, the student should then consult with the Compliance Officer at the Diversity and Access Office who will attempt to facilitate a resolution.

If the Compliance Officer is not successful in quickly achieving a satisfactory resolution (that is, generally within seven calendar days), the Compliance Officer will inform the student of his or her efforts and the student's right to file a formal complaint.

#### V. Formal Complaint

If the procedure set forth above for informal resolution does not yield a successful resolution, then the student may file a formal complaint in the following manner:

- When to File Complaint:* Complaints shall be filed as soon as possible, but in no event later than 10 days after the end of the quarter in which the concern arose.
- What to File:* a complaint must be in writing and include the following:
  - The grievant's name, address, email address, and phone number
  - A full description of the problem
  - A description of what efforts have been made to resolve the issue informally
  - A statement of the remedy requested
- Where to File Complaint:* the complaint shall be filed with the Compliance Officer at the Diversity and Access Office, Mariposa House, 585 Capistrano Way, Stanford CA 94305-8230; (650) 723-0755 (voice), (650) 723-1216 (TTY), (650) 723-1791 (fax), [equal.opportunity@stanford.edu](mailto:equal.opportunity@stanford.edu) (email).
- Notice of Receipt:* upon receipt of the complaint, the Compliance Officer reviews the complaint for timeliness and appropriateness for this grievance procedure, and provides the grievant with written notice acknowledging its receipt.
- Investigation:* the Compliance Officer or his or her designee (hereafter collectively referred to as the "grievance officer") shall promptly initiate an investigation. In undertaking the investigation, the grievance officer may interview, consult with and/or request a written response to the issues raised in the grievance from any individual the grievance officer believes to have relevant information, including faculty, staff, and students.
- Representation:* the grievant and the party against whom the grievance is directed shall have the right to have a representative. The party shall indicate whether he or she is to be assisted by a representative and, if so, the name of that representative. For purposes of this procedure, an attorney is not an appropriate representative.

- G. *Findings and Notification*: upon completion of the investigation, the Compliance Officer will prepare and transmit to the student, and to the party against whom the grievance is directed, a final report containing a summary of the investigation, written findings, and a proposed disposition. This transmission will be expected within 45 calendar days of the filing of the formal complaint. The deadline may be extended by the Compliance Office for good cause (including for reasons relating to breaks in the academic calendar). The final report shall also be provided, where appropriate, to any University officer whose authority will be needed to carry out the proposed disposition or to determine whether any personnel action is appropriate.
- H. *Final Disposition*: the disposition proposed by the Compliance Officer shall be put into effect promptly. The grievant or any party against whom the grievance or the proposed disposition is directed may appeal. The appeal to the Provost (as set forth below) will not suspend the implementation of the disposition proposed by the Compliance Officer, except in those circumstances where the Provost decides that good cause exists making the suspension of implementation appropriate.

#### VI. *Urgent Matters*

Whenever the application of any of the time deadlines or procedures set forth in this grievance procedure creates a problem due to the nature of the complaint, the urgency of the matter, or the proximity of the upcoming event, the Compliance Officer will, at the request of the grievant, determine whether an appropriate expedited procedure can be fashioned.

#### VII. *Remedies*

Possible remedies under this grievance procedure include corrective steps, actions to reverse the effects of discrimination or to end harassment, and measures to provide a reasonable accommodation or proper ongoing treatment. As stated above, a copy of the Compliance Officer's report may, where appropriate, be sent to University officer(s) to determine whether any personnel action should be pursued.

#### VIII. *Appeal*

Within ten calendar days of the issuance of the final report, the grievant or the party against whom the grievance is directed may appeal to the Provost the Compliance Officer's determination.

An appeal is taken by filing a written request for review with the Compliance Officer at the Diversity and Access Office, Mariposa House, 585 Capistrano Way, Stanford CA 94305-8230; (650) 723-0755 (voice), (650) 723-1216 (TTY), (650) 723-1791 (fax), [equal.opportunity@stanford.edu](mailto:equal.opportunity@stanford.edu) (email).

The written request for review must specify the particular substantive and/or procedural basis for the appeal, and must be made on grounds other than general dissatisfaction with the proposed disposition. Furthermore, the appeal must be directed only to issues raised in the formal complaint as filed or to procedural errors in the conduct of the grievance procedure itself, and not to new issues.

The Compliance Officer shall forward the appeal to the Provost, and also provide copies to the other party or parties. If the grievance involves a decision that is being challenged, the review by the Provost or his or her designee usually will be limited to the following considerations:

1. Were the proper facts and criteria brought to bear on the decision? Were improper or extraneous facts or criteria brought to bear that substantially affected the decision to the detriment of the grievant?
2. Were there any procedural irregularities that substantially affected the outcome of the matter to the detriment of the grievant?
3. Given the proper facts, criteria, and procedures, was the decision one which a person in the position of the decision maker might reasonably have made?

A copy of the Provost's written decision will be expected within 30 calendar days of the filing of the appeal and shall be sent to the parties, the Compliance Officer and, if appropriate, to the Uni-

versity officer whose authority will be needed to carry out the disposition. The deadline may be extended by the Provost for good cause (including for reasons relating to breaks in the academic calendar). The decision of the Provost on the appeal is final.

## TITLE IX OF THE EDUCATION AMENDMENTS OF 1972

It is the policy of Stanford University to comply with Title IX of the Education Amendment of 1972 and its regulations, which prohibit discrimination on the basis of sex. The Title IX Compliance Officer is the tor of the Diversity and Access Office, who has been appointed to coordinate the University's efforts to comply with the law. Anyone who believes that, in some respect, Stanford is not in compliance with Title IX and its regulations should contact the Title IX Compliance Officer, the Director of the Diversity Access Office, Mariposa House, 585 Capistrano Way, Stanford, CA 94305-8230, (650) 723-0755 (voice), (650) 723-1216 (TTY), (650) 723-1791 (fax), [equal.opportunity@stanford.edu](mailto:equal.opportunity@stanford.edu) (email). Grievance procedures to address complaints of discrimination on the basis of sex are set forth in the "Student Non-Academic Grievance Procedure". See also Administrative Guide Memo 23 at <http://adminguide.stanford.edu/23.pdf>.

## TITLE VI OF THE CIVIL RIGHTS ACT OF 1964

It is the policy of Stanford University to comply with Title VI of the Civil Rights Act of 1964 and its regulations, which prohibit discrimination on the basis of race, color, and national origin. The Title VI Compliance Officer is the Director of the Diversity and Access Office, who has been appointed to coordinate the University's efforts to comply with the law. Anyone who believes that, in some respect, Stanford is not in compliance with Title VI and its regulations should contact the Director of the Diversity and Access Office, Mariposa House, 585 Capistrano Way, Stanford University, Stanford, CA 94305-8230; (650) 723-0755 (voice), (650) 723-1216 (TTY), (650) 723-1791 (fax), [equal.opportunity@stanford.edu](mailto:equal.opportunity@stanford.edu) (email). Grievance procedures to address complaints of discrimination on the basis of race, color, and national origin are set forth in the "Student Non-Academic Grievance Procedure." See also Administrative Guide Memo 23 at <http://adminguide.stanford.edu/23.pdf>.

## GRIEVANCES

A Stanford undergraduate or graduate student who believes that he or she has been subject to an improper decision on an academic matter may file a grievance pursuant to the Statement on Student Academic Grievance Procedures (see the "Academic Policies and Statements" section of this bulletin). For other types of grievances, students should review the section that follows on the Student Non-Academic Grievance Procedure, and consult concerning applicable procedures with the Director of the Diversity and Access Office, Mariposa House, 585 Capistrano Way, Stanford University, Stanford, CA 94305-8230; (650) 723-0755 (voice), (650) 723-1216 (TTY), (650) 723-1791 (fax), [equal.opportunity@stanford.edu](mailto:equal.opportunity@stanford.edu) (email).

## STUDENT NON-ACADEMIC GRIEVANCE PROCEDURE

### POLICY

The following is the policy:

1. *Applicability*
  - a. It is perhaps inevitable in any university that some students may at times feel improperly treated, and that concerns about unfairness (including potential discrimination and harassment) may also at times arise. In this regard (and although this grievance procedure is not limited to concerns of discrimination), Stanford University's Nondiscrimination Policy provides in part:

- “Stanford University admits students of either sex and any race, color, religion, sexual orientation, or national and ethnic origin to all the rights, privileges, programs, and activities generally accorded or made available to students at the University. Consistent with its obligations under the law, it prohibits discrimination, including harassment, against students on the basis of sex, race, age, color, disability, religion, sexual orientation, gender identity, national and ethnic origin, and any other characteristic protected by applicable law in the administration of its educational policies, admissions policies, scholarships and loan programs, and athletic and other University-administered programs.”
- b. At Stanford, there are a number of grievance procedures through which students can raise and seek redress for what they believe to be unfair, improper or discriminatory decisions, actions, or treatment. For example:
    1. If the matter involves an academic decision, the Student Academic Grievance Procedure may be the applicable procedure.
    1. If the matter involves a disability-related concern, the Student ADA/Section 504 Grievance Procedure may be applicable.
    2. If the matter involves a student-athlete and his or her sport, the Student-Athlete Grievance Procedure may be applicable.
  - c. The purpose of the Student Non-Academic Grievance Procedure is to provide a process for students to seek resolution of disputes and grievances that may not fall within the scope of one of the other grievance processes, including those which may arise in a student’s capacity as a student-employee.
  - d. This procedure is available to undergraduate and graduate students at Stanford University. It is designed to address individual decisions or individual actions that affect the grievant personally in his or her capacity as a student. This is not a grievance procedure to address the concerns of student groups. Similarly and as a general proposition, dissatisfaction with a departmental, school or University policy or practice of broad or general application is not grounds for a grievance under this procedure; the Director of the Diversity and Access Office (hereafter “the Director”) may, in his or her discretion, entertain such a grievance in exceptional circumstances, such as where (for example) the policy or practice is alleged to be contrary to law. In the same way, the Director may entertain a grievance under this procedure brought by a non-student, in an appropriate case.
  - e. The Director is responsible for administering this Student Non-Academic Grievance Procedure.
    1. The Director may be contacted at: Director of the Diversity and Access Office, Mariposa House, 585 Capistrano Way, Stanford University, Stanford, CA 94305-8230; (650) 723-0755 (voice), (650) 723-1216 (TTY), (650) 723-1791 (fax), equal.opportunity@stanford.edu (email), <http://www.stanford.edu/dept/ocr>.
    2. The Director in his or her sole discretion can decide whether to refer a grievance brought under this procedure to another grievance process. In cases involving allegations of sexual harassment in particular, the Director may wish to consult with the Director of the Sexual Harassment Policy Office as to the most appropriate way to proceed; see Section 5.d below. In cases involving student employment, the Director may wish to consult with the University’s Department of Human Resources.
2. *Informal Resolution*
    - a. As a general proposition (and although particular circumstances may warrant an exception), the student should first discuss the problem and seek a solution with the individual(s) most directly involved.
      - b. If no resolution results (or if circumstances make discussion inappropriate with the person most directly involved), the student should then consult with the individual at the next (higher) administrative level in the department, school, residence or University administrative unit. Serious efforts should be made to resolve the issue locally at an informal level without resort to a formal grievance; such efforts may continue even after the formal process is underway.
  3. *Formal Grievance*
    - a. If informal means of resolution prove inadequate, the student should set forth in writing the substance of the complaint, the grounds for it and the evidence on which it is based, and the efforts taken to date to resolve the matter. It is at this stage that the complaint becomes a formal grievance.
    - b. The grievance document should be submitted to the Director. A grievance should be filed in a timely fashion, i.e., normally within thirty days of the end of the academic quarter in which the action that is the subject of the grievance occurred. A delay in filing a grievance may be grounds for rejection of that grievance.
    - c. The Director shall promptly initiate a review, which should normally be completed within sixty days. The Director may attempt to resolve the matter informally, and may refer the matter (or any part of it) to a grievance officer or other designee, who will look into and/or address the matter as the Director directs. The Director may also, in appropriate cases, remand the matter to the appropriate administrator (including to the administrative level at which the grievance arose) for further consideration.
    - d. In undertaking this review, either the Director, his or her designee, or the grievance officer may request a response to the issues raised in the grievance from any individuals believed to have information the reviewer considers relevant, including faculty, staff and students.
    - e. The Director (or his or her designee) shall issue his or her decision in writing, and take steps to initiate such corrective action as is called for (if any). Conduct meriting discipline shall be brought to the attention of the appropriate disciplinary process.
  4. *Appeal*
    - a. If the student is dissatisfied with the disposition by the Director (or his or her designee), he or she may appeal to the Provost (Office of the President and Provost, Building 10, Stanford, CA 94305-2061; phone 650-725-4075; fax 650-725-1347). The appeal should be filed in writing with the Provost within ten days of the issuance of the decision by the Director (or his or her designee); a delay in filing the appeal may be grounds for rejection of that appeal.
    - b. The Provost may attempt to resolve the matter informally, and may refer the matter (or any part of it) to a grievance appeal officer, who will review the matter at the Provost’s direction. The Provost may also, in appropriate cases, remand the matter to the appropriate administrator (including to the administrative level at which the grievance arose) for further consideration.
    - c. The Provost should normally complete his or her review of the appeal and issue his or her decision in writing within forty-five days. That decision is final.
  5. *General Provisions*
    - a. *Time Guidelines*—The time frames set forth herein are guidelines. They may be extended by the Director or Provost, as applicable, in his or her discretion for good cause (including for reasons relating to breaks in the academic calendar).
    - b. *Advisers*—A student initiating or participating in a grievance under this procedure may be accompanied by an adviser in any discussion with the Director, the Provost or their designees, or a grievance or grievance appeal officer

- under this procedure; any adviser must be a current Stanford faculty, staff member or student.
- c. *Ombuds*—Students should be aware that the University Ombuds (<http://www.stanford.edu/dept/ocr/ombuds>) is available to discuss and advise on any matters of University concern and frequently help expedite resolution of such matters. Although it has no decision making authority, the Ombuds' Office has wide powers of inquiry.
  - d. *Sexual Harassment*—For further information and resources concerning sexual harassment, students should refer to the web page of the Sexual Harassment Policy Office at <http://harass.stanford.edu>.
  - e. *No retaliation*—Stanford University prohibits retaliation or reprisals against individuals based on their pursuit in good faith of a grievance under this procedure, or their participation in good faith in the grievance process.
  - f. *Standards for Review*—If the grievance involves a decision that is being challenged, the review by the Director, as well as the review by the Provost on appeal, usually will be limited to the following considerations:
    1. Were the proper facts and criteria brought to bear on the decision? Were improper or extraneous facts or criteria brought to bear that substantially affected the decision to the detriment of the grievant?
    2. Were there any procedural irregularities that substantially affected the outcome of the matter to the detriment of the grievant?
    3. Given the proper facts, criteria, and procedures, was the decision one which a person in the position of the decision maker might reasonably have made?

## OWNERSHIP AND USE OF STANFORD NAME AND TRADEMARKS

Stanford registered marks, as well as other names, seals, logos, and other symbols and marks that are representative of Stanford, may be used solely with permission of Stanford. Merchandise bearing Stanford's names and marks, such as t-shirts, glassware, and notebooks, must be licensed. For complete text of the currently applicable policy, including the University officers authorized to grant permission to use the Stanford name and marks, see Administrative Guide Memo 15.5, Ownership and Use of Stanford Name and Trademarks at [http://adminguide.stanford.edu/15\\_5.pdf](http://adminguide.stanford.edu/15_5.pdf).

## COPYRIGHT

Copyright laws protect original works of authorship and give the owners of copyrights the exclusive right to do and to authorize others to do certain things in regard to a copyrighted work, including: make copies, distribute the work, display or perform the work publicly, and create derivative works. Copyright laws apply to nearly all forms of captured content, including traditional works like books, photographs, music, drama and sculpture. The laws also adapt to changes in technologies, and include in their scope modern forms of works like motion pictures, web sites, electronic media, software, multimedia works and some databases. Registration is not required to obtain a copyright, so if in doubt, assume a copyright applies.

Unless an exception to the copyright owner's exclusive rights applies, you must obtain permission from the copyright owner to copy, distribute, display or perform a copyrighted work in any medium for any purpose. Be especially mindful of copyright principles when using the Internet. Just because a work is posted on the Internet does not mean that the owner of the copyright has given you permission to use it. And, you should not be posting material onto the Internet without copyright clearance.

Stanford University Libraries have licenses with many publishers, which permit copying of materials in accordance with the educational, research or administrative functions of the University. In addition, there are four major exceptions to the copyright owner's exclusive rights, which (if applicable) permit limited use without permission. These are: the fair use exception, the library exception,

the face-to-face teaching exception, and the distance-learning exception. For a more detailed explanation of these exceptions, the copyright laws and Stanford's copyright policies, please review the University's Copyright Reminder at [http://www-sul.stanford.edu/libraries/collections/copyright\\_reminders/](http://www-sul.stanford.edu/libraries/collections/copyright_reminders/). It is each person's responsibility to be aware of and abide by copyright law; violation may result in civil or criminal liability, and constitutes grounds for University discipline, up to and including discharge, dismissal and expulsion.

## PEER-TO-PEER FILE SHARING

The use of file-sharing networks and software to download and share copyrighted works like software, music, movies, television programs, and books can violate copyright laws. Both the person who makes an illegal copy of a copyrighted work available and the person who receives or downloads an illegal copy have violated the law and Stanford policies. Many file-sharing programs have default settings that share copyrighted files, such as music and movies, through the Internet. Before enabling any of these programs students, faculty, or staff must read the fine print, make sure to understand the program itself, and only use such programs lawfully. Under the Digital Millennium Copyright Act (DMCA), copyright owners are entitled to notify Internet service providers, such as Stanford, that IP addresses linked to the Stanford network are sharing copies of music, movies, or other content without authorization. The law requires the University to respond to such complaints by eliminating access to the infringing materials. Stanford will disconnect students who fail to respond to a DMCA complaint promptly, and Stanford will charge reconnection fees starting at \$100 and going up as high as \$1,000 for successive DMCA complaints. Furthermore, the University also will suspend or terminate computer access to the Stanford network, including termination of the SUNet ID, to members of the community who continue to violate copyright laws. Finally, the University will take action through the student, employee, or faculty disciplinary processes if necessary. Beyond University consequences, copyright holders may file civil lawsuits against copyright infringers seeking extensive monetary damages. If compelled by a lawful subpoena, Stanford may be required to identify students, faculty, staff, or others who have violated copyright law. For more information about file-sharing, refer to Residential Computing's online resource, File-Sharing and Copyright Law at <http://rescomp.stanford.edu/info/dmca>.

## DOMESTIC PARTNERS

In October 1990, Stanford University adopted a domestic partners policy. This policy, which implements the University's nondiscrimination policy, makes services that have historically been available to married students available on an equal basis to students with same-sex or opposite-sex domestic partners. These services include access to student housing, a courtesy card that provides access to University facilities, and the ability to purchase medical care at Vaden Health Service. A domestic partnership is defined as an established long-term partnership with an exclusive mutual commitment in which the partners share the necessities of life and ongoing responsibility for their common welfare.

## SEXUAL HARASSMENT AND CONSENSUAL SEXUAL OR ROMANTIC RELATIONSHIPS

For the complete text of the currently applicable version of this policy, see Administrative Guide Memo 23.2, Sexual Harassment, [http://adminguide.stanford.edu/23\\_2.pdf](http://adminguide.stanford.edu/23_2.pdf). It is also available from the Sexual Harassment Policy Office homepage, <http://harass.stanford.edu>.

## SUMMARY

Stanford University strives to provide a place of work and study free of sexual harassment, intimidation or exploitation.

Where sexual harassment is found to have occurred, the University will act to stop the harassment, prevent its recurrence, and discipline and/or take other appropriate action against those responsible.

## POLICY

The following is quoted from the policy:

### 1. *In General*

- a. *Applicability and Sanctions for Policy Violations*—This policy applies to all students, faculty and staff of Stanford University, as well as to others who participate in Stanford programs and activities. Its application includes Stanford programs and activities both on and off-campus, including overseas programs. Individuals who violate this policy are subject to discipline up to and including discharge, expulsion, and/or other appropriate sanction or action.
- b. *Respect for Each Other*—Stanford University strives to provide a place of work and study free of sexual harassment, intimidation or exploitation. It is expected that students, faculty, staff and other individuals covered by this policy will treat one another with respect.
- c. *Prompt Attention*—Reports of sexual harassment are taken seriously and will be dealt with promptly. The specific action taken in any particular case depends on the nature and gravity of the conduct reported, and may include intervention, mediation, investigation and the initiation of grievance and disciplinary processes as discussed more fully below. Where sexual harassment is found to have occurred, the University will act to stop the harassment, prevent its recurrence, and discipline and/or take other appropriate action against those responsible.
- d. *Confidentiality*—The University recognizes that confidentiality is important. Sexual harassment advisers and others responsible to implement this policy will respect the confidentiality and privacy of individuals reporting or accused of sexual harassment to the extent reasonably possible. Examples of situations where confidentiality cannot be maintained include circumstances when the University is required by law to disclose information (such as in response to legal process) and when disclosure is required by the University's outweighing interest in protecting the rights of others.
- e. *Protection Against Retaliation*—Retaliation and/or reprisals against an individual who in good faith reports or provides information in an investigation about behavior that may violate this policy are against the law and will not be tolerated. Intentionally making a false report or providing false information, however, is grounds for discipline.
- f. *Relationship to Freedom of Expression*—Stanford is committed to the principles of free inquiry and free expression. Vigorous discussion and debate are fundamental to the University, and this policy is not intended to stifle teaching methods or freedom of expression generally, nor will it be permitted to do so. Sexual harassment, however, is neither legally protected expression nor the proper exercise of academic freedom; it compromises the integrity of the University, its tradition of intellectual freedom and the trust placed in its members.

### 2. *What Is Sexual Harassment?*

Unwelcome sexual advances, requests for sexual favors, and other visual, verbal or physical conduct of a sexual nature constitute sexual harassment when:

- a. It is implicitly or explicitly suggested that submission to or rejection of the conduct will be a factor in academic or employment decisions or evaluations, or permission to participate in a University activity; *or*
  - b. The conduct has the purpose or effect of unreasonably interfering with an individual's academic or work performance or creating an intimidating or hostile academic, work or student living environment.
- Determining what constitutes sexual harassment depends upon the specific facts and the context in which the con-

duct occurs. Sexual harassment may take many forms—subtle and indirect, or blatant and overt. For example,

- It may be conducted toward an individual of the opposite sex or the same sex.
- It may occur between peers or between individuals in a hierarchical relationship.
- It may be aimed at coercing an individual to participate in an unwanted sexual relationship or it may have the effect of causing an individual to change behavior or work performance.
- It may consist of repeated actions or may even arise from a single incident if sufficiently egregious.

The University's Policy on Sexual Assault (see Guide Memo 23.3, Sexual Assault, ([http://adminguide.stanford.edu/23\\_3.pdf](http://adminguide.stanford.edu/23_3.pdf)) may also apply when sexual harassment involves physical contact.

### 3. *What To Do About Sexual Harassment*

Individuals seeking further information are directed to the following resources:

- The Sexual Harassment Policy Office (Mariposa House, 585 Capistrano Way, Room 208-209, Stanford University, Stanford, CA, 94305-8230; (650) 723-1583; email: [harass@stanford.edu](mailto:harass@stanford.edu) for information, consultation, advice, or to lodge a complaint. Note that anonymous inquiries can be made to the SHPO by phone during business hours.
- The Sexual Harassment Policy Office web page at <http://harass.stanford.edu>.
- Any designated Sexual Harassment Adviser or resource person listed in 3.a or 5.a.

The following are the primary methods for dealing with sexual harassment at Stanford. They are not required to be followed in any specific order. However, early informal methods are often effective in correcting questionable behavior.

- a. *Consultation*—Consultation about sexual harassment is available from the Sexual Harassment Policy Office, Sexual Harassment Advisers (including residence deans), human resources officers, employee relations specialists, counselors at Counseling and Psychological Services (CAPS) or the Help Center, chaplains at Memorial Church, ombudspersons and others. A current list of Sexual Harassment Advisers is available from the Sexual Harassment Policy Office and at <http://harass.stanford.edu/SHadvisers.html>. Consultation is available for anyone who wants to discuss issues related to sexual harassment, whether or not "harassment" actually has occurred, and whether the person seeking information is a complainant, a person who believes his or her own actions may be the subject of criticism (even if unwarranted), or a third party.

Often there is a desire that a consultation be confidential or "off the record." This can usually be achieved when individuals discuss concerns about sexual harassment without identifying the other persons involved, and sometimes even without identifying themselves. Confidential consultations about sexual harassment also may be available from persons who, by law, have special professional status, such as:

- Counselors at Counseling and Psychological Services (CAPS), <http://caps.stanford.edu>
- Counselors at the Help Center, <http://www.stanford.edu/dept/helpcenter>
- Chaplains at Memorial Church
- The University Ombudsperson, <http://www.stanford.edu/dept/ombuds>

In these latter cases, the level of confidentiality depends on what legal protections are held by the specific persons receiving the information and should be addressed with them before specific facts are disclosed. For more information see <http://harass.stanford.edu/confidential.html>.

- For further information on confidentiality, see Section 1(d) above.
- b. *Direct Communication*—An individual may act on concerns about sexual harassment directly, by addressing the other party in person or writing a letter describing the unwelcome behavior and its effect and stating that the behavior must stop. A Sexual Harassment Adviser can help the individual plan what to say or write, and likewise can counsel persons who receive such communications. Retaliation against an individual who in good faith initiates such a communication violate this policy.
  - c. *Third Party Intervention*—Depending on the circumstances, third party intervention in the workplace, student residence or academic setting may be attempted. Third party intervenors may be the Sexual Harassment Advisers, human resources professionals, the ombudspersons, other faculty or staff, or sometimes mediators unrelated to the University.  
When third party intervention is used, typically the third party (or third parties) will meet privately with each of the persons involved, try to clarify their perceptions and attempt to develop a mutually acceptable understanding that can insure that the parties are comfortable with their future interactions. Other processes, such as a mediated discussion among the parties or with a supervisor, may also be explored in appropriate cases.  
Possible outcomes of third party intervention include explicit agreements about future conduct, changes in workplace assignments, substitution of one class for another, or other relief, where appropriate.
  - d. *Formal Grievance, Appeal, and Disciplinary Processes*—Grievance, appeal, or disciplinary processes may be pursued as applicable.

1. *Grievances and Appeals*—The applicable procedure depends on the circumstances and the status of the person bringing the charge and the person against whom the charge is brought. Generally, the process consists of the individual's submission of a written statement, a process of fact-finding or investigation by a University representative, followed by a decision and, in some cases, the possibility of one or more appeals, usually to Stanford administrative officers at higher levels. The relevant procedure (see below) should be read carefully, since the procedures vary considerably.

If the identified University fact-finder or grievance officer has a conflict of interest, an alternate will be arranged, and the Director of the Sexual Harassment Policy Office or the Director of Employee and Labor Relations can help assure that this occurs.

In most cases, grievances and appeals must be brought within a specified time after the action complained of. While informal resolution efforts will not automatically extend the time limits for filing a grievance or appeal, in appropriate circumstances the complainant and the other relevant parties may mutually agree in writing to extend the time for filing a grievance or appeal.

A list of the established grievance and appeal procedures is located at [http://hrweb.stanford.edu/elr/policies/list\\_grievance\\_procedures.html](http://hrweb.stanford.edu/elr/policies/list_grievance_procedures.html). Copies may also be obtained from the Sexual Harassment Policy Office, <http://www.stanford.edu/group/SexHarass>.

Copies of the following may be obtained from Employee and Labor Relations, 651 Serra Street:

- “Solving Workplace Problems at Stanford: Understanding the Staff Dispute Resolution Policy” (also at <http://hrweb.stanford.edu/forms/staffresolution.pdf>.)
- “Solving Workplace Problems at Stanford: Information for Academic Staff – Librarians and Academic Staff – Research Associates”
- “The Dispute Resolution Process (A User’s Guide)”

1. *Disciplinary Procedures*—In appropriate cases, disciplinary procedures may be initiated. The applicable disciplinary procedure depends on the status of the individual whose conduct is in question. For example, faculty are subject to the Statement on Faculty Discipline <http://www.stanford.edu/dept/provost/faculty/policies/handbook/ch4.html#statementonfacultydiscipline>, and students to the Fundamental Standard. For additional information related to student judicial affairs, see <http://www.stanford.edu/dept/vpsa/judicialaffairs>.

The individuals referenced in this section are available to discuss these options and differing methods for dealing with sexual harassment.

#### 4. *Procedural Matters*

- a. *Investigations*—If significant facts are contested, an investigation may be undertaken. The investigation will be conducted in a way that respects, to the extent possible, the privacy of all of the persons involved. In appropriate cases, professional investigators may be asked to assist in the investigation. The results of the investigation may be used in the third party intervention process or in a grievance or disciplinary action.

- b. *Recordkeeping*—The Sexual Harassment Policy Office will track reports of sexual harassment for statistical purposes and report at least annually to the University President concerning their number, nature and disposition.

The Sexual Harassment Policy Office may keep confidential records of reports of sexual harassment and the actions taken in response to those reports, and use them for purposes such as to identify individuals or departments likely to benefit from training so that training priorities can be established. No identifying information will be retained in cases where the individual accused was not informed that there was a complaint.

- c. *Indemnification and Costs*—The question sometimes arises as to whether the University will defend and indemnify a Stanford employee accused of sexual harassment. California law provides, in part, “An employer shall indemnify [its] employee for all that the employee necessarily expends or loses in direct consequence of the discharge of his [or her] duties as such . . . .” The issue of indemnification depends on the facts and circumstances of each situation. Individuals who violate this policy, however, should be aware that they and/or their schools, institutes, or other units may be required to pay or contribute to any judgments, costs and expenses incurred as a result of behavior that is wrongful and/or contrary to the discharge of the employee’s duties. In general, see Administrative Guide Memo 15.7 ([http://adminguide.stanford.edu/15\\_7.pdf](http://adminguide.stanford.edu/15_7.pdf)).

#### 5. *Resources for Dealing with Sexual Harassment*

- a. *Advice*—Persons who have concerns about sexual harassment should contact the Sexual Harassment Policy Office, any Sexual Harassment Adviser at <http://harass.stanford.edu/SHadvisers.html> or one of the other individuals listed below. Reports should be made as soon as possible: the earlier the report, the easier it is to investigate and take appropriate remedial action. When reports are long delayed, the University will try to act to the extent it is reasonable to do so, but it may be impossible to achieve a satisfactory result after much time has passed.

Likewise, anyone who receives a report or a grievance involving sexual harassment should promptly consult with the Sexual Harassment Policy Office or with a Sexual Harassment Adviser.

There are a number of individuals specially trained and charged with specific responsibilities in the area of sexual harassment. In brief, they are:

- *Sexual Harassment Advisers* (<http://harass.stanford.edu/SHadvisers.html>) serve as resources to individuals who wish to discuss issues of sexual harassment, either because they have been ha-

passed or because they want information about the University's policy and procedures. There is usually at least one Adviser assigned to each of the schools at the University and to each large work unit; most of the residence deans also have been appointed as Sexual Harassment Advisers. Advisers are also authorized to receive complaints.

- *The Director of the Sexual Harassment Policy Office* is responsible for the implementation of this policy. The Director's Office also provides advice and consultation to individuals when requested; receives complaints and coordinates their handling; supervises the other Advisers; encourages and assists prevention education for students, faculty and staff; keeps records showing the disposition of complaints; and generally coordinates matters arising under this policy. Because education and awareness are the best ways to prevent sexual harassment; developing awareness, education and training programs and publishing informational material are among the most important functions of the Sexual Harassment Policy Office (<http://harass.stanford.edu>).
  - As stated above, individuals with concerns about sexual harassment may also discuss their concerns informally with psychological counselors (for example through CAPS or the HELP Center), chaplains (through the Memorial Chapel), or the University ombudsperson. For more information, see <http://harass.stanford.edu/resources.html>.
- b. *External Reporting*—Sexual harassment is prohibited by state and federal law. In addition to the internal resources described above, individuals may pursue complaints directly with the government agencies that deal with unlawful harassment and discrimination claims, e.g., the U.S. Equal Employment Opportunity Commission (EEOC), the Office for Civil Rights (OCR) of the U.S. Department of Education, and the State of California Department of Fair Employment and Housing (DFEH). These agencies are listed in the Government section of the telephone book. A violation of this policy may exist even where the conduct in question does not violate the law.
6. *Consensual Sexual or Romantic Relationships*
- a. *In General*—There are special risks in any sexual or romantic relationship between individuals in inherently unequal positions, and parties in such a relationship assume those risks. In the University context, such positions include (but are not limited to) teacher and student, supervisor and employee, senior faculty and junior faculty, mentor and trainee, adviser and advisee, teaching assistant and student, coach and athlete, and the individuals who supervise the day-to-day student living environment and student residents. Because of the potential for conflict of interest, exploitation, favoritism, and bias, such relationships may undermine the real or perceived integrity of the supervision and evaluation provided, and the trust inherent particularly in the teacher-student context. They may, moreover, be less consensual than the individual whose position confers power or authority believes. The relationship is likely to be perceived in different ways by each of the parties to it, especially in retrospect.

Moreover, such relationships may harm or injure others in the academic or work environment. Relationships in which one party is in a position to review the work or influence the career of the other may provide grounds for complaint by third parties when that relationship gives undue access or advantage, restricts opportunities, or creates a perception of these problems. Furthermore, circumstances may change, and conduct that was previously welcome may become unwelcome. Even when both parties have consented at the outset to a romantic involvement, this past consent does not remove grounds for a charge based upon subsequent unwelcome conduct.

Where such a relationship exists, the person in the position of greater authority or power will bear the primary burden of accountability, and must ensure that he or she—and this is particularly important for teachers—does not exercise any supervisory or evaluative function over the other person in the relationship. Where such recusal is required, the recusing party must also notify his or her supervisor, department chair or dean, so that such chair, dean or supervisor can exercise his or her responsibility to evaluate the adequacy of the alternative supervisory or evaluative arrangements to be put in place. Staff members may notify their local human resources officers. To reiterate, the responsibility for recusal and notification rests with the person in the position of greater authority or power. Failure to comply with these recusal and notification requirements is a violation of this policy, and therefore grounds for discipline. The University has the option to take any action necessary to insure compliance with the spirit of this recusal policy, including transferring either or both employees in order to minimize disruption of the work group. In those extraordinarily rare situations where it is programmatically infeasible to provide alternative supervision or evaluation, the cognizant Dean or Director must approve all evaluative and compensation actions.

- b. *With Students*—At a university, the role of the teacher is multi-faceted, including serving as intellectual guide, counselor, mentor and advisor; the teacher's influence and authority extend far beyond the classroom. Consequently and as a general proposition, the University believes that a sexual or romantic relationship between a teacher and a student, even where consensual and whether or not the student would otherwise be subject to supervision or evaluation by the teacher, is inconsistent with the proper role of the teacher, and should be avoided. The University therefore very strongly discourages such relationships.
7. *Policy Review and Evaluation*—This policy went into effect on October 6, 1993, and was amended on November 30, 1995, and on May 30, 2002. It is subject to periodic review, and any comments or suggestions should be forwarded to the Director of the Sexual Harassment Policy Office.

## RESOURCES

*The following is a summary of resources concerning sexual harassment available to members of the Stanford Community:*

A brochure containing the policy, a list of current sexual harassment advisers, confidential resources, and other helpful information is available online at <http://harass.stanford.edu>, and in printed form from the Sexual Harassment Policy Office at Mariposa House, 585 Capistrano Way, Room 208-209, Stanford University, Stanford, CA, 94305-8230; (650) 723-1583; email: [harass@stanford.edu](mailto:harass@stanford.edu). Copies of the University policy on sexual assault, which complements this sexual harassment policy, as well as all other documents mentioned in this section, are also available at the Sexual Harassment Policy Office.

All faculty, staff, and students who have questions regarding this policy and its enforcement can consult with a Sexual Harassment Adviser or can be directed to the local Personnel Officer or Regional Human Resources Manager. Faculty members should contact their dean or department chair, and students should contact the Director of the Sexual Harassment Policy Office or the Dean of Student Affairs.

*Sexual Harassment Policy Office*—telephone: (650) 723-1583; email: [harass@stanford.edu](mailto:harass@stanford.edu).

*Director:* Laraine Zappert (Clinical Professor, Psychiatry and Behavioral Sciences)

*Assistant Director:* Nanette Andrews

## SEXUAL ASSAULT

The University's Policy on Sexual Assault is published in complete form in the Administrative Guide Memo 23.3, available at

[http://adminguide.stanford.edu/23\\_3.pdf](http://adminguide.stanford.edu/23_3.pdf), and on the Judicial Affairs Office web site at <http://www.stanford.edu/dept/vpsa/judicialaffairs/index.html>.

## SUMMARY

*The following summarizes the policy on Sexual Assault and provides information on resources available to members of the Stanford community.*

**Background**—This policy has been enacted by Stanford University in accordance with California State Law, Assembly Bill 3098, Postsecondary Education: Student Safety, July, 1990.

**Policy**—Sexual assault is unacceptable and will not be tolerated at Stanford University. Any member of the Stanford community who commits sexual assault at or on the grounds of the University, or at any of the University's off-campus facilities or activities, or at the facilities or activities of any affiliated student organization, will face maximal institutional sanctions, in addition to any prosecutions external authorities may undertake. Stanford University is committed to providing information on services, resources, and treatment available to victims of sexual assault. A comprehensive website containing a list of resources can be found at <http://www.stanford.edu/group/svab/>.

**Definition**—For purposes of this policy, sexual assault is defined as the commission of an unwanted sexual act, occurring without consent of both individuals, or occurring under threat or coercion. It can occur either forcibly and/or against a person's will, or when a person is incapable of giving consent (if under 18 years of age; if intoxicated by drugs or alcohol; if developmentally disabled; if temporarily or permanently mentally or physically unable to do so). Sexual assault includes but is not limited to rape, forcible sodomy, forcible oral copulation, rape with an object, sexual battery, forcible fondling, and threat of sexual assault.

**Notification**—With the consent of the victim, charges of sexual assault received by University offices or personnel shall be communicated promptly to the Department of Public Safety, 711 Serra Street, telephone 9-911 for emergency response or (650) 723-9633 during normal business hours, or, in the case of a student, to the sexual assault response team at YWCA Sexual Assault Center at Stanford at Vaden Health Service, 866 Campus Drive, telephone 725-9955.

**Legal Reporting Requirements**—Health care professionals are expected to fulfill legally mandated reporting requirements.

**Emergency Services Available to Victims**—Victims of sexual assault are urged to seek immediate attention from emergency police, medical, and counseling services. On the Stanford campus and in the immediate vicinity, the following provide 24-hour response and will arrange for police assistance, medical assistance, emotional support services, and advocacy and support:

“911” Emergency Network: dial 9-911 from University phones or 911 from outside phones

Santa Clara Valley Medical Center, 751 South Bascom Avenue, San Jose, telephone (408) 885-5000

YWCA Sexual Assault Center at Stanford, for students, at the Vaden Health Service, telephone (650) 725-9955

Stanford Hospital and Clinics, 300 Pasteur Drive, Stanford, telephone (650) 723-5111

**Non-Emergency Resources**—Additional resources for students are available at Vaden Health Service at (650) 723-3785, including short-term counseling, referral to long-term therapy, follow-up pregnancy testing, and testing and treatment for sexually transmitted diseases. Additional services for faculty and staff are available at the University's HELP Center, Galvez House (723-4577), including general counseling, information, support, and referral. The University ombudsperson (723-3682) is available to all in the Stanford community for general counseling, advice, and advocacy.

**Ongoing Case Management Procedures**—Both informal procedures and formal grievance procedures for case management of sexual assault charges are given in the University's policy on Sexual Harassment appearing as Administrative Guide Memo 23.2 and published annually in the Stanford Bulletin. Victims are to be kept informed by those responsible for those procedures of the status of

any disciplinary proceedings and the results of any disciplinary action or appeal, providing that the victim agrees in advance, in writing, to treat this information as confidential. The offices of the Dean of Students are available to help student victims deal with academic difficulties that may arise because of the victimization and its impact.

**Information Requests and Confidentiality**—The University offices responding to charges of sexual assault have established protocols for protecting confidentiality and for handling inquiries from the press, concerned students, and parents.

**Information about Options**—The University offices responding to charges of sexual assault will inform victims, at a minimum, of the options of: criminal prosecution, civil prosecution, the disciplinary process, the appropriate grievance procedure, the availability of mediation, alternative housing assignments, and academic assistance alternatives.

## POLITICAL ACTIVITIES

For the complete text of the currently applicable version of this policy, see Administrative Guide Memo 15.1, Political Activities, available at [http://adminguide.stanford.edu/15\\_1.pdf](http://adminguide.stanford.edu/15_1.pdf).

### SUMMARY

*The following summarizes the policy on Political Activities:*

Stanford University, as a charitable entity, is subject to federal, state, and local laws and regulations regarding political activities: campaign activities, lobbying, and the giving of gifts to public officials.

While all members of the University community are naturally free to express their political opinions and engage in political activities to whatever extent they wish, it is very important that they do so only in their individual capacities and avoid even the appearance that they are speaking or acting for the University in political matters.

In the limited circumstances where individuals must speak or act on behalf of the University in the political arena, they must do so in accordance with the provisions of this Guide Memo.

### POLICY

*The following is quoted from the policy:*

#### 1. Summary of Legal Requirements and Restrictions

a. **Campaign Activities:** contributions of money, goods, or services to candidates for political office and in support of or opposition to ballot measure campaigns are subject to a wide variety of political laws. Depending on the jurisdiction and the campaign, political contributions may be prohibited or limited and, in nearly all cases, are subject to a complicated series of disclosure rules. Because of the University's tax-exempt status, the University is legally prohibited from endorsing candidates for political office or making any contribution of money, goods, or services to candidates. It is important, therefore, that no person inadvertently cause the University to make such a contribution.

b. **Lobbying:** lobbying can generally be described as any attempt to influence the action of any legislative body (for example, Congress, state legislatures, county boards, city councils, and their staffs) or any federal, state, or local government agency. Laws regulating lobbying exist at the federal, state, and local levels but can differ widely in scope, depending on the jurisdiction. Some laws, for example, only regulate lobbying of the legislative branch. Others, however, also cover lobbying of administrative agencies and officers in the executive branch (for example, lobbying for federally-funded grants). To one degree or another, however, most lobbying laws require registration and reporting by individuals engaged in attempts to influence governmental action.

Tax-exempt organizations are permitted to lobby, and the University engages in lobbying on a limited number of issues, mostly those affecting education, research, and related activities. There is usually some threshold of time

or money spent on lobbying that triggers registration and reporting requirements. Regardless of thresholds, however, no University employee—other than the following individuals, on matters under their jurisdiction—may lobby on behalf of the University without specific authorization:

- President
- Provost
- Deans of the Seven Schools
- Vice Provost and Dean of Research
- Vice President for Business Affairs and Chief Financial Officer
- Executive Director of Human Resources
- Director of the Stanford Linear Accelerator Center
- Director of the Hoover Institution
- General Counsel
- Vice President for Public Affairs

The Vice Provost and Dean of Research may grant permission to faculty members to lobby on behalf of the University for specific purposes. The Director of Government and Community Relations may grant permission to staff members to lobby on behalf of the University for specific purposes. All lobbying on behalf of the University should be coordinated with the Director of Government and Community Relations.

- c. *Giving of Gifts to Public Officials and Staff:* almost all jurisdictions have strict rules on the extent to which gifts and honoraria may be given to public officials (both elected and non-elected officials and, often, staff). In some cases gifts and honoraria are prohibited; in others they are limited; and in most cases they are subject to detailed disclosure. In addition, in some jurisdictions such as California, gifts to both state and local public officials can result in a public official's disqualification from participation in any governmental action affecting the interests of the donor. Meals, travel, and entertainment are the most common types of gifts, but gift rules can also apply in cases where public officials attend a reception or receive tickets to sporting or other events.  
As a non-profit organization, the University generally does not give gifts to public officials and, in those limited cases where it does give such gifts, it must do so in accordance with all applicable laws and regulations. Therefore, any University employee who, on behalf of the University, wishes to make a gift to a public official must receive prior approval from the Director of Government and Community Relations before making such a gift.
  - d. *Reporting of Political Activities:* the University must report most of its political activities above certain thresholds. Therefore, any University employee engaging in such activities on behalf of the University should carefully review the remainder of this Guide Memo and should discuss the relevant activities in advance with the Director of Government and Community Relations.
2. *Prohibited and Restricted Political Activities*
    - a. *In General:*
    - b. No person may, on behalf of the University, engage in any political activity in support of or opposition to any candidate for elective public office (including giving or receiving funds or endorsements), nor shall any University resources be used for such purpose.
    - c. No person may, on behalf of the University, lobby (or use University resources to lobby) any federal, state, or local legislative or administrative official or staff member unless specifically authorized to do so. Any lobbying activity, even when authorized, must be conducted in compliance with this Guide Memo, other applicable University policies, and applicable law.
    - d. No person may, on behalf of the University, give a gift (or use any University resources to give a gift) to any federal, state, or local official or staff member, except in com-

pliance with this Guide Memo, other applicable University policies, and applicable law.

- e. No person supporting candidates for public office or engaging in other political activities may use University space or facilities or receive University support, except in the limited ways described in section 3A, below.
  - f. No person may use for lobbying activities federally-funded contract or grant money received by the University. Even the foregoing activities that are only restricted, rather than prohibited, may be subject to limitations imposed by law. Therefore, any person engaging in the activity, or contemplating doing so, should consult with the Director of Government and Community Relations.
  - g. *Guidelines for Avoiding Prohibited Partisan Political Activities:* the following guidelines should assist in preventing the involvement or apparent involvement of the University in political activities in support of or opposition to any candidate for elective public office, that is, partisan political activities. Except in the limited circumstances set forth in section 3.b., below:
    1. *Use of Name and Seal:* neither the name nor seal of the University or of any of its schools, departments, or institutions should be used on letters or other materials intended for partisan political purposes.
    2. *Use of Address and Telephones:* no University office should be used as a return mailing address for partisan political mailings, and telephone service that is paid by the University, likewise, should not be used for partisan political purposes. (Obviously, a student's dormitory room and telephone service that are personal to the student may be used for these purposes.)
    3. *Use of Title:* the University title of a faculty or staff member or other person should be used only for identification and should be accompanied by a statement that the person is speaking as an individual and not as a representative of the University.
    4. *Use of Services and Equipment:* University services, such as Interdepartmental Mail; equipment, such as duplicating machines, computers, and telephones; and supplies should not be used for partisan political purposes.
    5. *Use of Personnel:* no University employee may, as part of his or her job, be requested to perform tasks in any way related to partisan political purposes.
3. *Permissible Activities*
    - a. *In General:* as noted above, the federal, state, and local laws which limit the partisan political activities that can take place in University facilities and with University support in no way inhibit the expression of personal political views by any individual in the University community. Nor do they forbid faculty, students, or staff from joining with others in support of candidates for office or in furtherance of political causes. There is no restriction on discussion of political issues or teaching of political techniques. Academic endeavors which address public policy issues are in no way affected.  
Because the University encourages freedom of expression, political activities which do not reasonably imply University involvement or identification may be undertaken so long as regular University procedures are followed for use of facilities. Examples of permissible activities are:
      1. Use of areas, such as White Plaza, for tables, speeches, and similar activities.
      2. Use of auditoriums for speeches by political candidates, but subject to rules of the Internal Revenue Service, the Federal Election Commission, and the California Fair Political Practices Commission, and other applicable laws. Arrangements must be made with University Events and Services. (See also Guide Memo 82.1, Public Events, for more information.)

To reiterate, because tax and political compliance laws impose restrictions, and even prohibitions, on certain political activities and on the use of buildings and equipment at a non-profit institution such as the University, any such activities must be in compliance with these legal requirements. Individuals taking political positions for themselves or groups with which they are associated, but not as representatives of the University, should clearly indicate, by words and actions, that their positions are not those of the University and are not being taken in an official capacity on behalf of the University.

- b. *Limited University Political Activities*: limited activities relating to specific federal, state, or local legislation or ballot initiatives are permissible where (1) the subject matter is directly related to core interests of the University's activities; (2) the President has determined that the University should take a position; and (3) the individuals who speak or write on the University's behalf are specifically authorized to do so.
4. *Responsibility for Interpretation*: the Director of Government and Community Relations, in consultation with the General Counsel, is the administrative officer responsible for interpretation and application of the above guidelines. Questions on whether planned student activities are consistent with the University's obligations should be directed to the Dean of Students, who will consult with the Director of Government and Community Relations and/or the General Counsel. All other questions on whether planned activities are consistent with the University's obligations should be addressed directly to the Director of Government and Community Relations or the General Counsel.

## CAMPUS DISRUPTIONS

The University's policy on campus disruption applies to students, faculty, and staff. It is published in its complete form on the Judicial Affairs Office web site at <http://www.stanford.edu/dept/vpsa/judicialaffairs/index.html>.

### POLICY

*The following is quoted from the policy:*

Because the rights of free speech and peaceable assembly are fundamental to the democratic process, Stanford firmly supports the rights of all members of the University community to express their views or to protest against actions and opinions with which they disagree.

All members of the University also share a concurrent obligation to maintain on the campus an atmosphere conducive to scholarly pursuits, to preserve the dignity and seriousness of University ceremonies and public exercises, and to respect the rights of all individuals.

*The following regulations are intended to reconcile these objectives.*

It is a violation of University policy for a member of the faculty, staff, or student body to:

1. prevent or disrupt the effective carrying out of a University function or approved activity, such as lectures, meetings, interviews, ceremonies, the conduct of University business in a University office, and public events.
2. obstruct the legitimate movement of any person about the campus or in any University building or facility.

Members of the faculty, staff, and student body have an obligation to leave a University building or facility when asked to do so in the furtherance of the above regulations by a member of the University community acting in an official role and identifying himself or herself as such; members of the faculty, staff, or student body also have an obligation to identify themselves, when requested to do so by such a member of the University community who has reasonable grounds to believe that the person(s) has violated section (1) or (2) of this policy and who has so informed the person(s).

## APPLICATION

*The following are examples to illustrate the policy:*

The policy has been applied to the following actions: refusal to leave a building which has been declared closed; obstructing the passage into or out of buildings by sitting in front of doorways; preventing University employees from entering their workplace; preventing members of a class from hearing a lecture or taking an examination, or preventing the instructor from giving a lecture, by means of shouts, interruptions, or chants; preventing others from hearing a scheduled speaker by means of shouts, interruptions, or chants; refusing to leave a closed meeting when unauthorized to attend; and intruding upon or refusing to leave a private interview.

It should be understood that while the above are examples of extraordinarily disruptive behavior, the application of the policy also takes situational factors into consideration. Thus, for example, conduct appropriate at a political rally might constitute a violation of the Policy on Campus Disruption if it occurred within a classroom.

There is no "ordinary" penalty which attaches to violations of the Policy on Campus Disruption. Each case is fact-specific; considerations would include: the gravity of the offense, and prior similar misconduct. As a general rule, the more serious the offense, the less it matters that the violation had otherwise not done wrong.

## USE OF THE MAIN QUADRANGLE AND MEMORIAL COURT

### POLICY

*The following is quoted from the policy:*

The Main Quadrangle and Memorial Court are part of Stanford University's academic preserve due to their locations at the heart of the campus. To protect and enhance their historic status, University policy limits activities primarily to established or traditional ceremonies and events.

To schedule an event, approval must be obtained in advance from the Office of Stanford Events (see below). Unscheduled events, protests, or activities are prohibited.

Requests for waivers to this policy must be submitted in advance and in writing to the Office of Stanford Events. Exceptions may be granted only in extraordinary cases.

### RESOURCES

*The following is a summary of resources available:*

For instructions on use of the Main Quadrangle/Memorial Court, contact the Office of Stanford Events at (650) 723-2551, <http://stanfordevents.stanford.edu>. Note that other venues on campus (such as White Plaza) are made available for events other than scheduled "established or traditional ceremonies and events" including those that may involve amplified sound. For further information on the use of such other venues, contact the Office of Student Activities at (650) 723-2733, <http://stanford.edu/dept/OSA>.

## OVAL POLICY

The Oval is considered to be the initial and official visual entrance to the Stanford University campus. Given this historic and aesthetic status, it is in the best interests of the University community and visiting members of the public to maintain its open and pristine space, to help preserve its natural beauty and environmental integrity. The Oval also presents the formal academic image of the University, leading directly to departments, classrooms and other academic space, and faculty and graduate student offices, and thus is subject to the University's Noise Policy.

Because of its location, historically, aesthetically, and academically, the University prohibits formal or informal events of any kind to take place in the Oval. Gatherings such as demonstrations, rallies, or dances may take place in White Plaza, which can be reserved through the Office of Student Activities. Weddings also are not allowed in the Oval but are in certain circumstances allowed in Memorial Church (refer to Memorial Church wedding ceremony guidelines).

The Oval is considered a pedestrian zone and appropriate use of its space includes walking, running, reading, relaxing, and other limited recreational use of the lawn area (such as quiet, very small picnics and Frisbee), unless or until such use damages or otherwise harms the property.

Cooking food or use of any grill/barbecue or open flame is strictly prohibited. Fireworks or the use of other incendiary devices represent a safety hazard to the area and are therefore prohibited. Amplified sound from items such as boom boxes, musical instruments, or the use of bullhorns or amplified speakers is also prohibited. Only authorized Stanford service vehicles are permitted inside the Oval areas.

As the official entrance to the University, the Oval offers public access to general parking spaces in the marked areas surrounding the outer perimeter of the Oval; drivers are expected to obey all traffic signs and limitations.

For further information regarding this policy, please contact the Executive Director at the Stanford Events Office, 723-2551.

## NOISE AND AMPLIFIED SOUND

### POLICY

*The following is quoted from the policy:*

Stanford is not only an academic institution but a residential community as well. It is the responsibility of all faculty, students, and staff to moderate noise especially during an event or activity held on campus. Supporting the mission of the University and respecting those who are studying, researching, or otherwise carrying out academic-related activities is a Stanford priority. The campus must require a conducive atmosphere to ensure these endeavors are accomplished and supported. Disturbing noise in or around a residence or other campus buildings which infringe on the rights of other residents or members of the University community is considered a violation of this policy. As part of the event planning process, the event sponsor must obtain all appropriate approvals regarding the use of amplified sound during an event or activity.

### RESOURCES

Information regarding whether and how the use of amplified sound is permitted is available from the following sources, which must be consulted for prior approval:

- The Office of Student Activities: phone: 723-2733, or see <http://osa.stanford.edu/publications/soh/2002-2003/>
- Registrar's Scheduling Office: phone (650) 723-6755, or see <http://registrar.stanford.edu/event/>.
- The Office of Stanford Events: phone (650) 723-2551, or see <http://stanfordevents.stanford.edu>.

## PROHIBITION OF THE POSSESSION OF DANGEROUS WEAPONS ON CAMPUS

The University's policy prohibiting weapons on campus is published in its complete form on the Judicial Affairs Office web site <http://stanford.edu/dept/vpsa.judicialaffairs/index.html>.

### POLICY

*The following is quoted from the policy:*

Except for authorized academic purposes, the knowing possession by any student on any Stanford campus of the following is prohibited: firearms, explosives, or any instrument or weapon of the kind commonly known as blackjack, slingshot, billy club, sandclub, sandbag, or metal knuckles.

Notwithstanding the paragraph above, a student who is a resident of a Stanford campus may store a weapon on such campus if both of the following conditions are met:

- The student has complied with all state and federal regulations regarding the use and possession of said weapon, or, in the case of a foreign campus, with the laws of the country in which the campus is located.

- The student stores such weapons with the Stanford Department of Public Safety (SDPS) or, in the case of a foreign campus, in a facility provided by the director of such campus.

Students may remove their weapons from storage only in accordance with regulations established by the SDPS or by the director of the foreign campus at which the weapon is stored. A student who is a resident of a Stanford campus may bring any of the above weapons on campus for purposes of storage only if the student has previously notified the SDPS of the intention to do so, but in no event more than six hours after arrival on the campus. When the student removes the weapon from storage, it must be taken off campus as soon as is practicable, but in no event more than one hour after such removal.

The term "Stanford campus" shall include all the lands and facilities of Leland Stanford Junior University, whether owned or leased, and whether located in the United States or abroad.

## CONTROLLED SUBSTANCES AND ALCOHOL

### STUDENT CONDUCT

Student conduct is guided by the Fundamental Standard. Implicit in the Standard is the understanding that students are responsible for making their own decisions and accepting the consequences of those decisions.

In order to make informed decisions about alcohol and other drug use, students should educate themselves about the health and safety risks associated with their use, as well as about state and local laws on possessing, serving, and consuming alcohol. It is widely recognized that the misuse and abuse of drugs ("controlled substances")\* and the abuse of alcohol are major contributors to serious health problems, as well as to social and civic concerns. Among the health risks associated with the use of illicit drugs and the abuse of alcohol are various deleterious physical and mental consequences including dependency, severe disability, even death. Information concerning the known effects of alcohol and specific drugs is available from the Alcohol and Other Drug Abuse Prevention Program at Vaden Student Health Service.

The goal of this University's policy is to reduce the abuse and illegal use of alcohol and other drugs, and the human and material costs associated with it. The University, as an educational institution, approaches student conduct issues from a perspective that places emphasis on individual responsibility and development. Education about and prevention of alcohol and other drug-related problems will continue to be the primary emphasis and goal. However, the University expects students, as individuals and as members of groups, to conduct themselves in accordance with this and all other University policies governing student conduct.

\* Controlled substances are those defined in 21 U.S.C. 812; they include, but are not limited to, such substances as marijuana, heroin, cocaine, and amphetamines.

### POLICY

The University's policy on controlled substances and alcohol is published in its complete form in the Administrative Guide as Administrative Guide Memo 23.6, available at [http://adminguide.stanford.edu/23\\_6.pdf](http://adminguide.stanford.edu/23_6.pdf), and on the Judicial Affairs Office web site <http://stanford.edu/dept/vpsa/judicialaffairs/index.html>.

*The following is quoted from the policy:*

It is the policy of the University to maintain a drug-free workplace and campus. The unlawful manufacture, distribution, dispensation, possession, and/or use of controlled substances or the unlawful possession, use, or distribution of alcohol is prohibited on the Stanford campus, in the workplace, or as part of any of the University's activities. The workplace and campus are presumed to include all Stanford premises where the activities of the University are conducted. Violation of this policy may result in disciplinary sanctions up to and including termination of employment or expulsion of students. Violations may also be referred to the appropriate authorities for prosecution.

This policy will be reviewed at least biennially.

## APPLICATIONS

*The following are examples to illustrate the policy:*

No University funds or funds collected by the University may be used in a way that violates the alcohol policy. In student residences, house funds (funds collected by the Student Financial Services or other University offices) may not be used to buy alcohol because the majority of undergraduates are under the legal drinking age of 21. The decision to use student-collected funds to buy alcohol should be made lawfully, thoughtfully, fairly, and in a way that respects the views of all students. Students must not be required to contribute to a student-collected fund for the purposes of purchasing alcohol. No alcoholic beverages may be served at all freshman house events in common area spaces (e.g., lounges, hallways, patios/outdoor areas).

Party planners are responsible for planning and carrying out events in compliance with this policy. At least one house or organization officer must assume responsibility for an event's compliance with the policy, and their names must be made available to Stanford's Department of Public Safety and the University upon request.

## CONSEQUENCES OF VIOLATION

Educational and rehabilitative measures will be the preferred response to infractions of the Policy unaccompanied by more egregious misconduct. Penalties are calibrated according to the severity of the violation. Misbehavior associated with drug or alcohol use and abuse may result in one or more of the following University consequences:

Individuals who violate the University Residence Agreement may lose their University student housing privileges and/or be reported to the Judicial Affairs Office.

Individuals who violate the University's terms and conditions for student organization recognition as defined in the *Student Organization Handbook* may be subject to expulsion from the student organization.

Student groups which violate the Policy may face suspension of social privileges, as well as the loss of University recognition, meeting space, and housing or other related privileges.

Students should understand that inebriation is never an excuse for misconduct, that the careless or willful reduction, through the use of alcohol or other intoxicants, of their own ability to think clearly, exercise good judgment, and respond to rational intervention may invoke more stringent penalties than otherwise might be levied.

Penalties will be imposed according to the facts and circumstances of each case. They can be imposed singly or in combination by the Office of Residential Education/Graduate Residences, the Office of Student Activities, the Dean of Students Office, and the Office of Judicial Affairs.

## CIVIL LIABILITY

While the law regarding civil liability is complex, it is important to know that under some circumstances party hosts, sponsors, bartenders, or others might be held legally liable for the consequences of serving alcohol to underage drinkers or to obviously intoxicated persons. Social hosts or party planners could be sued and found personally responsible for damages to the injured party(ies) including:

Specific damages. These are damages which are measurable. For example, when bodily injury results in medical expenses or lost wages.

General damages. These are damages which cannot not be specifically measured in terms of dollar amount. For example, pain and suffering resulting from bodily injury.

Punitive damages. These are damages which are intended to serve as an example to others and to discourage behavior which is deemed highly undesirable to society.

## CRIMINAL LIABILITY

Stanford University is not a sanctuary from the enforcement of state and local laws. Students and others on campus who violate the law may be and have been arrested and prosecuted. Primary responsibility for law enforcement, including that related to alcohol, rests with law enforcement agencies, primarily the Stanford University Department of Public Safety. Uniformed officers who patrol the campus and respond to calls are deputized by the Sheriff of Santa Clara County and are fully empowered and authorized to stop vehicles, make arrests, and enforce all laws. Laws are subject to change; consequently, the following information is illustrative but must not be relied on as a complete and current citing of relevant laws. More information is available at the Stanford Department of Public Safety, 711 Serra Street.

Generally, it is a criminal offense:

1. To provide any alcoholic beverage to a person under 21.
2. To provide any alcoholic beverage to an obviously intoxicated person.
3. For any person under age 21 to purchase alcohol.
4. To be under the influence of alcohol or another drug in a public place and unable to exercise care for one's own safety or that of others.
5. For persons under 21 to possess alcohol in any public place or any place open to the public (for example, public places in student residences).
6. To operate a motor vehicle while under the influence of alcohol or any other drug. Presumed to be driving under the influence (DUI) with a blood alcohol level (BAL) of 0.08% or higher.
7. To ride a bicycle while under the influence of alcohol, drugs, or both.
8. To have an open container of alcohol in a motor vehicle; and, for persons under 21 to drive a vehicle carrying alcohol or to possess alcohol while in a motor vehicle.
9. To have in one's possession, or to use, false evidence of age and identity to purchase alcohol.
10. To possess an open container of alcohol in a public place or any place open to the public. Applies in Palo Alto jurisdiction.
11. To be in possession of an unregistered keg. All kegs sold must be registered at the time of purchase. Identification tags must be placed on all kegs in order to allow kegs to be traced if the contents are used in violation of the law.

## WHERE TO GET HELP

In the event of life threatening emergencies call 9-911 from on-campus and 911 from off-campus.

*Campus Resources*—(Area Code 650) Counseling and Psychological Services, 24 hours (723-3785); The Alcohol and Other Drug Abuse Prevention Program (723-3429); Stanford Alcohol and Drug Treatment Center (723-6682); Vaden Health Service's Medical Advice Line, 24 hours (723-4841); The Bridge, 24-hour Peer Counseling (723-3392).

The Alcohol and Other Drug Abuse Prevention Program at Vaden Health Service: provides information and referral, educational training and workshops, and non-clinical consultations for groups and individuals. The program utilizes a harm reduction approach to prevent problems associated with the use of alcohol, tobacco, and other drugs (723-3429).

The Office of Student Activities at Tresidder Memorial Union: provides workshops and training, publications, and party planning consultations. Web site: <http://www-leland.stanford.edu/dept/OSA/party/> (723-2733).

*Community Resources*—Alcoholics Anonymous (650) 592-2364, Alanon (650) 873-2356 or (408) 379-1051.

## HAZING POLICY

Hazing is not permitted at Stanford University. No individual, recognized student organization, club, team, or any other Stanford-affiliated student group is permitted to plan, engage in, or condone hazing, on or off the Stanford campus.

## DEFINITION OF HAZING AT STANFORD UNIVERSITY

Hazing includes any activity done in connection with a student organization, regardless of whether the organization is officially recognized at Stanford, that causes or is reasonably likely to cause another student to suffer bodily danger, physical harm, or significant personal degradation or humiliation, even if no bodily danger, physical harm, or significant degradation or humiliation in fact results. Hazing might occur during initiation or pre-initiation into a student organization, but is not limited to these time frames. Any individual who plans or intentionally assists in hazing activity has engaged in hazing, regardless of whether that individual is present when the hazing activity occurs.

## CONSEQUENCES OF A VIOLATION

Stanford University expects its students to conduct themselves in socially responsible and respectful ways. Thus, participation in hazing, either as an individual or as part of any student group, may result in serious individual and organizational consequences including, but not limited to: disciplinary action up to and including expulsion; permanent loss of organizational recognition; and loss of eligibility to remain a member of any club, team, or other Stanford-affiliated student group. Consent, implied or expressed, is not a defense to any complaint or charge alleging a hazing violation.

A number of University offices may take institutional action, including: the Organizational Conduct Board; Judicial Affairs; or other University offices, such as the Vice Provost for Student Affairs or the Department of Athletics.

## APPLICATIONS

Stanford's hazing policy is distinct from and broader than California Penal Code section 245.6, which prohibits: "any method of initiation or preinitiation into a student organization or student body, whether or not the organization or body is officially recognized by an educational institution, which is likely to cause serious bodily injury to any former, current, or prospective student of any school, community college, college, university or other educational institution in this state." A violation of Penal Code Section 245.6 that does not result in serious bodily injury is punishable as a misdemeanor, while a violation that results in death or injury is punishable as a felony or a misdemeanor.

Nothing in this hazing policy prevents Stanford from taking institutional action against hazing activity that falls outside the narrower definition of Penal Code section 245.6.

Stanford's hazing policy is not intended to prohibit student recruitment or new or continuing member activities that are positive and educational in nature, designed to instill a group ethos or unity. Its intent is to deter those behaviors that cause or are likely to cause danger, harm or humiliation to another student.

Stanford's hazing policy is not intended to apply to customary athletic events or other similar institutionally-approved contests or competitions.

Some examples of hazing activities or events may be found at [http://osa.stanford.edu/publications/soh/critical\\_policies--hazing.shtml](http://osa.stanford.edu/publications/soh/critical_policies--hazing.shtml). Questions should be directed to the Office of Student Activities, (650) 723-2733.

## SMOKE-FREE ENVIRONMENT

The University's policy on a smoke-free environment is published in its complete form in the Administrative Guide as Administrative Guide Memo 23.4, available at [http://adminguide.stanford.edu/23\\_4.pdf](http://adminguide.stanford.edu/23_4.pdf), and Judicial Affairs Office web site at <http://www.stanford.edu/dept/vpsa/judicialaffairs/index.html>.

*Applicability*—This policy applies to all academic and administrative units of Stanford University, including the SLAC National Accelerator Laboratory, and all campus student housing. This policy does not supersede more restrictive policies which may be in force in compliance with federal, state, or local laws or ordinances.

Note also that the School of Medicine has adopted a more restrictive policy; see <http://med.stanford.edu/tobaccofree>.

## POLICY

*The following is quoted from the policy:*

1. *Policy*  
It is the policy of Stanford University that the smoking of tobacco products in enclosed buildings and facilities and during indoor or outdoor events (and the selling of tobacco products) on the campus is prohibited.
2. *Guidelines*
  - a. *Smoking-Prohibited Areas*—Specifically, smoking is prohibited in classrooms and offices, all enclosed buildings and facilities, in covered walkways, in University vehicles, during indoor and outdoor athletic events, and during other University sponsored or designated indoor or outdoor events.
    - Ashtrays will not be provided in any enclosed University building or facility.
    - "Smoking Prohibited" signs will be posted.
  - b. *Outdoor Smoking Areas*—Smoking is permitted in outdoor areas, except during organized events. Outdoor smoking areas should be located far enough away from doorways, open windows, covered walkways, and ventilation systems to prevent smoke from entering enclosed buildings and facilities. To accommodate faculty, staff, and students who smoke, Vice Presidents, Vice Provosts, and Deans may designate certain areas of existing courtyards and patios as smoking areas in which case ashtrays must be provided. Costs associated with providing designated smoking areas and ashtrays will be absorbed by the specific academic or administrative unit(s).
3. *Enforcement*—This policy relies on the consideration and cooperation of smokers and non-smokers. It is the responsibility of all members of the University community to observe and follow this policy and its guidelines.
  - a. *Smoking Cessation Information*—Smoking cessation programs are available for faculty and staff through the Center for Research in Disease Prevention, and the Health Improvement Program (HIP). Students may contact the Health Promotion Program (HPP) through the Student Health Center for smoking cessation information or programs.
  - b. *Repeated Violations*—Faculty, staff, and students repeatedly violating this policy may be subject to appropriate action to correct any violation(s) and prevent future occurrences.
4. *Implementation and Distribution*—Copies of this policy will be disseminated by the Manager of HR Policy/Staff and Labor Relations and the Vice Provost for Student Affairs to all faculty, staff, and students, and to all new members of the University community.

## UNIVERSITY STATEMENT ON PRIVACY

Stanford University has an interest in ensuring that the privacy of its students, faculty, and staff is respected, and that no activities interfere with education, research, or residential life.

The University is private property; however, some areas of the campus typically are open to visitors. These areas include White Plaza, public eating areas (such as those at Tresidder Union), outdoor touring areas, and locations to which the public has been invited by advertised notice (such as for public educational, cultural, or athletic events). Even in these locations, visitors must not interfere with the privacy of students, faculty, and staff, or with educational, research, and residential activities. The University may revoke at any time permission to be present in these, or any other areas. Visitors should not be in academic or residential areas unless they have been invited for appropriate business or social purposes by the responsible faculty member, student, or staff member.

No commercial activity, including taking photos or similar audio or visual recordings that are sold to others or otherwise used for commercial purposes, may occur on the campus without the

University's permission. Requests for permission should be submitted to the Director of University Communications or, as appropriate, the Dean of Students, the Department of Athletics, or the Office of Public Events. Recognized student groups and official units of the University will be granted such permission so long as they do not violate privacy or property interests of others; so long as any sale of their products is predominantly on campus to students, faculty, and staff; and so long as they comply with applicable University policies and procedures.

Violators of this policy may be subject to criminal and/or civil liability, as well as University disciplinary action.

## COMPUTER AND NETWORK USAGE

For a complete text of the currently applicable version of this policy, see Administrative Guide Memo 62, Computer and Network Usage Policy, available at <http://adminguide.stanford.edu/62.pdf>.

### POLICY

*The following is quoted from the policy:*

Users of Stanford network and computer resources have a responsibility not to abuse the network and resources. This policy provides guidelines for the appropriate and inappropriate use of information technologies.

### SUMMARY

*The following summarizes the policy:*

In particular, the policy provides that users of University information resources must respect software copyrights and licenses, respect the integrity of computer-based information resources, refrain from seeking to gain or permitting others to gain unauthorized access, including by sharing passwords, and respect the rights of other computer users.

This policy covers appropriate use of computers, networks, and information contained therein. As to political, personal and commercial use, the University is a non-profit, tax-exempt organization and, as such, is subject to specific federal, state, and local laws regarding sources of income, political activities, use of property, and similar matters. It also is a contractor with government and other entities, and thus must assure proper use of property under its control and allocation of overhead and similar costs. For these reasons, University information resources must not be used for partisan political activities where prohibited by federal, state, or other applicable laws, and may be used for other political activities only when in compliance with federal, state, and other laws, and in compliance with applicable University policies. Similarly, University information resources should not be used for personal activities not related to appropriate University functions, except in a purely incidental manner. In addition, University information resources should not be used for commercial purposes, except in a purely incidental manner or except as permitted under other written policies of the University or with the written approval of a University officer having the authority to give such approval. Any such commercial use should be properly related to University activities, take into account proper cost allocations for government and other overhead determinations, and provide for appropriate reimbursement to the University for taxes and other costs the University may incur by reason of the commercial use. Users also are reminded that the .edu domain on the Internet has rules restricting or prohibiting commercial use, and thus activities not appropriately within the .edu domain and which otherwise are permissible within the University computing resources should use one or more other domains, as appropriate.

The University's Information Security Officer is authorized in appropriate circumstances to inspect or monitor private data (including email), such as when there is a reasonable cause to suspect improper use of computer or network resources.

For further information on the topic of peer-to-peer file sharing, see the section above on Copyright.

## CHAT ROOMS, BLOGS, AND OTHER FORUMS USING STANFORD DOMAINS OR COMPUTER SERVICES

For a complete text of the currently applicable version of this policy, see Administrative Guide Memo 66, Chat Rooms and Other Forums Using Stanford Domains or Computer Services, available at <http://adminguide.stanford.edu/66.pdf>.

### POLICY

*The following is quoted from the policy:*

1. *Definition*  
From time to time, University departments, faculty, students and others may host electronic communication forums, such as chat rooms, newsgroups, bulletin boards, blogs, or web sites, whereby various parties may contribute their thoughts on various subjects and where such communication is made available for others to read and comment upon. For purposes of this policy, these sites are collectively referred to as forums.
2. *Establishment of Forums*
  - a. *Connection with University Activities*—Forums that either use the Stanford.edu, Stanford.org, or other Stanford domains, or use University computing facilities, should be established only in connection with legitimate activities of the University.
  - b. *University Role*—Unless specifically sponsored by an academic administrative unit of the University, the University's role in connection with these forums will be solely as a passive Internet service provider.
  - c. *Terms of Use*—In all cases, as a condition to establishing a forum, forum homepages (where they exist) and each individual forum page should contain a header that states: Subject to Terms of Use and all pages should include a link to the page maintained by the University entitled "Terms of Use." The URL is <http://www.stanford.edu/home/atoz/terms.html>.
3. *Operation of Forums*

All forums shall be operated in compliance with the Terms of Use, as modified from time to time, and the University's various policies regarding computer facilities and services.

## PROTECTION OF SENSITIVE DATA

Stanford University maintains sensitive non-public data data protected by laws and agreements, including Social Security numbers, financial information, health information, and student records. It is incumbent on every member of the Stanford community with access to such data to be familiar with and abide by Stanford's data classifications requirements provided at [http://www.stanford.edu/group/security/securecomputing/dataclass\\_chart.html](http://www.stanford.edu/group/security/securecomputing/dataclass_chart.html). Members of the Stanford community should also familiarize themselves with applicable laws and University policies on privacy as provided by the University, including Administrative Guide Memo 63, Information Security, <http://adminguide.stanford.edu/63.pdf>, Administrative Guide Memo 64, Identification and Authentication of Systems, <http://adminguide.stanford.edu/64.pdf>, Administrative Guide Memo 65, Electronic Commerce, <http://adminguide.stanford.edu/65.pdf>, and Administrative Guide Memo 67, Information Security Incident Response, <http://adminguide.stanford.edu/67.pdf>. For information on best practices for securing mobile computing devices, see [http://www.stanford.edu/group/security/securecomputing/mobile\\_devices.html](http://www.stanford.edu/group/security/securecomputing/mobile_devices.html).

## CAMPUS SAFETY & CRIMINAL STATISTICS

Stanford University complies with the Jeanne Clery Disclosure of Campus Security Policy and Crime Statistics Act. A copy of Stanford's policies and statistics under this act are posted on the Department of Public Safety web site at <http://stanford.edu/group/SUDPS/safety-report.shtml>. A paper copy can be obtained by calling the Stanford Department of Public Safety at (650) 723-9633.
