Section R

The government is considering various types of changes in order to attract more young men into military service. We are interested in knowing how people like yourself would react if some of the changes they are considering were actually adopted. First, let's read through some of the proposed changes.

A. Higher Pay - Military pay starting at $5,000 per year and reaching $7,200 for the fourth and last year. You would pay for your own food and lodging.

B. Guaranteed Assignment - Before you enlist, you are given a guaranteed job assignment, including necessary training, in the military specialty of your choice. Before enlisting you would be tested to see if you could meet the requirements of your specialty choice. Here are some examples of specialties: draftsman, electronic technician, bulldozer driver, paratrooper, auto or aircraft mechanic, foreign language expert, pilot.

C. Paid Schooling - The government agrees to assume the cost, including living expenses, for up to four years of schooling at a college or technical/vocational school to which you can get accepted. In return, you serve on active duty for four years. You must enlist first, but the schooling could come either before or after you serve.

D. Shorter Enlistment Period - An enlistment period of only two years.

T4 1059 4IR1. Consider the changes that you have in front of you. Which one of them would make military service most attractive to you?

Master Code C

The first digit of the three digit Master Code C is designed to pick up references to the self, i.e., qualities of the individual's own personality, abilities, patterns of behavior, etc. In other words, we want to distinguish those cases when R gives the impression that the happiness or unhappiness or worry is something R feels is coming from inside himself (or inside other boys in Questions C5) rather than from the environment. The code is:

T1 689-694
698-706

T2 617-622
626-634

1. Mention definitely refers to self-concept
3. Mention may refer to self-concept, but not certain
5. No mention or NA whether mention of self-concept

Examples:

1. I don't know if I have the ability to go to college. (Code 1)
2. I don't like my boss. (Code 3)
3. I worry about doing well in school. (Code 3 -- It's not clear whether he worries because of something about himself, such as ability.)

There is an additional code 7 to be used only on Question C5, 5a and 5b. You will use the code 7 in place of the self-concept code only when R says I worry about -- instead of they worry about ---.

Above does not apply at T2.

[2]These codes are to be used at the discretion of the study, i.e. the study rules will direct you whether to code such cases in these codes or to code a prior occupation.

[3]An average score of 19 was assigned for NA on V0003; a missing data code of 99 was coded for NA.

[4]The socio-economic score for the census occupation classification 991 ("Discharged from the Armed Forces") is only to be used for those who were members of the armed forces, now discharged, but not retired, who have not yet obtained employment.

APPENDIX D

Product-Moment Correlations Among Boys' Criteria

Two matrixes of product-moment correlations are shown here. The first matrix, which includes variables from Times 1, 2, and 3, was used in Volume II of the monograph series to explore the stability of some criteria during the high school years. The subsample used in this matrix consists of those respondents who responded at all of the first three points in time and who remained in the same high school at all three times. The unweighted number of cases is 1,374; the weighted frequency is 1,584. The correlations were computed using weighted data. A comparison of the special longitudinal subsample and the original sample is presented in Table 1, for Time 1 variables.

The second matrix includes variables from Times 1, 2, 3, and 4. The subsample in this matrix consists of all Time 4 respondents (total N=1,620). The correlations are unweighted.

The following variables in this second matrix may not be elsewhere defined:

Variable number	Variable name	
1	SIX ITEM S.E.S.	@M
2	1T QUICK TEST	@M
3	1T GATB-J	@M
4	1T GATES	@M

Variables 1-4 are arithmetic mean scores per school on variables 5 through 8 respectively. The mean is based on all valid data from all Time 1 respondents. There are no missing data.

Variable number	Variable name
12	PhS EDUC=1,OTHER=0

This is a dichotomy, coded "1" (N=838) if respondent was primarily a student in any post-high school education at Time 4, including Technical/Vocational colleges; and coded "0" otherwise (N 781). There is one missing data case.

DECK AND COLUMN TAPE LOCATIONS

FOR CARD IMAGE FORMAT USERS

Each listing includes the deck number at the top of the page, the column locations for the beginning and end of each variable, the variable name, variable number, the number of responses, the width of the variable, and the number of decimal places, if any.

To access this information, the user should locate the variable number in the documentation, and then refer to the corresponding number in the third column of the deck and column locations listing.

OSIRIS DICTIONARY LISTINGS

The dictionaries list the variables by name and number and supply for each the starting tape location of the variable in the OSIRIS dataset, the width of the variable, the number of responses, and the missing data codes, if any.

To access this information the user need only locate the variable number in the documentation and then refer to the corresponding number in the OSIRIS dictionary.
