Preliminary Remark

As a result of the increased number and volume of recent surveys connected with the Eurobarometer survey series, the Inter-university Consortium for Political and Social Research (ICPSR), the Zentralarchiv für Empirische Sozialforschung (ZA), and the Swedish Social Science Data Service (SSD) have entered into a co-operative arrangement for the production and distribution of these important data collections. The present codebook is a product of this joint endeavour. Under this agreement, ICPSR and ZA alternately assume responsibility for the production of each survey. In this way all users will receive Eurobarometer data sets and codebooks in identical standard formats although each archive will employ its own study number to identify each survey.

Since this co-operation presupposes common standards for data and codebook preparation, the formatting may in some details diverge from the usual ICPSR, ZA, or SSD standards. For example, all frequency tables in this codebook are based on unweighted data while ICPSR codebooks generally contain only weighted frequency counts.

Bibliographic Citation

Publications based on ICPSR or ZA data collections should acknowledge those sources by means of bibliographic citations. To ensure that such source attributions are captured for social science bibliographic utilities, citations must appear in footnotes or in the reference section of publications. The bibliographic citation for this data collection is:

Request for Information on use of ICPSR/ZA Resources

To provide funding agencies with essential information about use of archival resources and to facilitate the exchange of information about related research activities, users of the data are requested to send to ICPSR or ZA respectively bibliographic citations for each completed manuscript or thesis abstract. Please indicate in a cover letter which data (surveys and respective variables) were used.

Data Disclaimer

The original collector of the data, ICPSR, ZA, SSD, and the relevant funding agency bear no responsibility for uses of this collection or for interpretations or inferences based upon such uses.

The Eurobarometer (a.k.a. Euro-Barometer) Survey Series

The Eurobarometer surveys are the products of a unique program of crossnational and crosstemporal social science research. The effort began in early 1970, when the Commission of the European Community sponsored simultaneous surveys of the publics of the European Community. These surveys were designed to measure public awareness of, and attitudes toward, the Common Market and other European Community institutions, in complementary fashion. They also probed the goals given top priority for one's own nation. These concerns have remained a central part of the European Community's research efforts -- which were carried forward in the summer of 1971 with another six-nation survey that gave special attention to agricultural problems. These themes were of central interest again in a survey of the publics of the European Community countries -- then nine in number -- carried out in September 1973.

After 1973, the surveys took on a somewhat broader scope in content as well as in geographical coverage, with measures of subjective satisfaction and the perceived quality of life becoming standard features of the European Community public opinion surveys. In 1974, the Commission of the European Community launched the Eurobarometer series, designed to provide a regular monitoring of the social and political attitudes of the publics of the nine member-nations: France, Germany, the United Kingdom, Italy, the Netherlands, Belgium, Denmark, Ireland, Luxembourg. These Eurobarometers are carried out in the spring and fall of each year. In addition to obtaining regular readings of support for European integration and the perceived quality of life, each of the Eurobarometers has explored a variety of special topics. Also, attitudes toward the organization and role of the European Parliament have been explored in each Eurobarometer beginning with Barometer 7 in the spring of 1977.

The Eurobarometer surveys have included Greece since Autumn 1980 (Number 14), Portugal and Spain since Autumn 1985 (Number 24), the former German Democratic Republic since Autumn 1990 (Number 34), Norway since the fall of 1991 (Number 36), Finland since the spring of 1993 (Number 39), and Sweden and Austria since the fall of 1994 (Number 42).

Note that beginning with Eurobarometer 43 and Central and Eastern Eurobarometer 6, the archival survey titles in these ICPSR series no longer contain a hyphen separating 'Euro' and 'Barometer', in keeping with current usage. Other archives may follow different naming practices for this survey series.

(*) Preliminary edition without machine-readable codebook

This series of surveys was originally conducted under the direction of Jacques-Rene Rabier. Since 1987, Dr. Karlheinz Reif has directed the "Surveys, Research and Analysis" division of the Commission of the European Communities (European Commission) under the Directorate General for "Information, Communication and Culture" (DG X), together with Dr. Anna Melich and Eric Marlier.

Starting with Eurobarometer 38.0 the ICPSR, ZA and SSD are co-operating in the cleaning and processing of the study. Identical datasets, SPSS setups and English-language codebooks will be distributed by both archives.
Further information on the Eurobarometer survey series is available through the World Wide Web, via Zentralarchiv URL: http://www.za.uni-koeln.de.

Study Description

This round of Eurobarometer surveys queried respondents on standard Eurobarometer measures such as public awareness of and attitudes toward the European Union (EU), and also focused on the European Year of Education and Training Throughout Life, the common European currency, Third World development, food product quality labels, the 1996 InterGovernmental Conference, and the European Parliament.

Questions concerning education and training throughout life were asked only of respondents 15-24 years old and covered topics such as reasons for learning throughout life, the likelihood that continuing training throughout life would improve the respondent's work and personal life, participation in a training course in the last year, the main role of schools, and satisfaction with the way schools help develop children's personalities, broaden their abilities, and teach children to live in society and adapt to changes. Also covered were the most important qualities for a person to have and the importance of the parent, school, and working environment in developing those qualities. Parents' level of involvement in education was also explored, with questions on choosing children's schools, following their school work, talking to teachers, and helping children if they have difficulties. Respondents were also queried on the role businesses should play in schools and vocational training, the role of the EU in continuing education, and the influence of technology and new communication techniques on education and instruction.

Questions on the common European currency included respondents' preference for or against having one currency in all EU member states, how well-informed respondents were about the common European currency, their knowledge of the conditions member countries must meet to join the European Economic and Monetary Union, and their opinions on when European currency would be introduced. Opinions were also elicited on the effects of the European currency on economic growth, jobs, shopping,currency exchange, cross-border travel, the costs of doing business between Monetary Union member states, the degree of turmoil and volatility in international currency markets, inflation, and the disparity between the rich and the poor. In addition, respondents were queried about Third World development, including what the important development problems were and whether decisions about those problems should be made by member countries of the EU acting together or by each country separately, information sources about Third World countries and the main topics covered by those sources, attitudes toward helping Third World countries, what the principal aim should be in relations with Third World countries, whether industrialized countries were currently helping Third World countries to become less poor, to lead the Third World to economic independence, or to enable them to solve their own problems, who provided the most help to Third World countries (the EU, international organizations, the United Nations, private companies, or non-governmental agencies), what conditions should be met before help is given, and whether the major part of the EU's assistance to the Third World was devoted to emergency humanitarian action or to longer-term development. Questions concerning quality labels for food products included how often the household bought various categories of food products, the three most important things people take into account when buying food products, awareness of and trust in quality labels on food products, awareness of and purchase frequency for food products with a 'Designation of Origin' label and what the label means,

willingness to pay more for food products of guaranteed origin, consumption frequency for food products made or produced in the traditional way, and confidence level if a food product were guaranteed by the EU as to origin and traditional method of production. Regarding the 1996 InterGovernmental Conference, respondents were queried on their awareness of the conference and which fundamental objectives the EU should set within the scope of that conference. Further questions probed for respondents' opinions on the degree of influence that big and powerful member states in the EU had, whether trade unions, political parties, professional organizations, newspapers, radio stations, and TV stations represented respondents' views about Europe and the EU, how soon the countries of Central and Eastern Europe such as the Czech Republic, Hungary, Poland, and Slovakia should become members of the EU, and why they should become members. Other conference topics included the preferred effect of granting EU membership to Central and Eastern European countries on aid to farmers, how much weight should go to each vote in the EU Council of Ministers, which rights were most important for citizens of the EU, which aims should be given priority in the EU over the next ten years, the role of the EU in avoiding war between member states, what the level of cuts in Social Security benefits should be, Europe's competitiveness in world markets, how helpful all member states were in working together to fight unemployment and create jobs, the relative influence of the opinions of people like the respondent on the decisions made by their national government versus those made by the institutions of the EU, and the respondent's length of stay in other countries of the EU. Topics relating to the European Parliament (EP) included the extent that its decisions were in the interest of people like the respondent, the EP's importance in the life of the EU, and areas of policy the EP should pay particular attention to. Demographic items include age, gender, marital status, size of household, education, occupation, and household income.

Note: Questions on attitudes towards the Single European Currency (Q.3 and Q.9 to Q.21) are repeated from Eurobarometer 44.0 and should always be analysed in combination. Questions on education and training throughout life and children's education at school (Q.92 TO Q.118) are also repeated from Eurobarometer 44.0, but are only asked to respondents aged 15-24 years. Meaningful results are obtained for the total population on the 44.0 data; for the target group of young people one should combine the 44.1 youth subsample with the corresponding 44.0 data.

Sampling and Fieldwork

From November 11 to December 19, 1995, International Research Associates of Europe, INRA (Europe), carried out the fieldwork for this Eurobarometer, at the request of the "Survey, Research, Analysis" Unit of the Directorate General X, "Information, Communication and Culture", of the European Commission (URL: http://europa.eu.int/en/comm/dg10/infcom/epo/polls.html). INRA (Europe) is a European network of market and public opinion research agencies, co-ordinated by the European Co-ordination Office (ECO), Avenue R.Vandendriessche 18, B-1150 Brussels (URL: http://www.inra.com). In all member states, fieldwork was conducted on the basis of detailed and uniform instructions prepared by the ECO.

INRA (Europe) developed equivalent French and English questionnaires for this Eurobarometer. These questionnaires were translated into other languages by the firms responsible for interviewing in each country.

In all, Eurobarometer 44.1 interviewed 17.298 citizens of the 15 countries in the European Union (nationals and non-nationals but EU-citizens). Respondents were aged 15 and over. Separate samples were drawn for Northern Ireland and East Germany. In addition, 952 Norwegian citizens aged 15 and over were interviewed with a subset of questions.

A multi-stage sampling design was used for this Eurobarometer. In the first stage, primary sampling units (PSU) were selected from each of the administrative regions in every country (i.e., Statistical Office of the European Community, EUROSTAT regions). PSU selection was systematic with probability proportional to population size, from sampling frames stratified by the degree of urbanization. In the next stage, a cluster of addresses was selected from each sampled PSU. Addresses were chosen systematically using standard random route procedures, beginning with an initial address selected at random. In each household, a respondent was selected, by a random procedure. Up to three recalls were made to obtain an interview with the selected respondent. No more than one interview was conducted in each household. Interviews were conducted face-to-face in respondents' homes in the appropriate national language. Sweden is using a random sample bought at the government census bureau.

The firms responsible for carrying out each national survey are shown below, together with interviewing dates for each country. Users should contact these organizations for more detailed information regarding sampling methods.

Weighting Information

Ten weight variables are provided in this dataset: four Nation Weights (WEIGHT RESULT FROM TARGET, WEIGHT ADJUSTED TO STANDARD SIZE, WEIGHT SPECIAL UNITED KINGDOM, WEIGHT SPECIAL GERMANY), and eight European Weights (WEIGHT EURO 6, WEIGHT EURO 9, WEIGHT EURO 10, WEIGHT EURO 12, WEIGHT EURO 12+, WEIGHT EURO 15, WEIGHT TOTAL including NORWAY, and EURO WEIGHT +3 for the three new member countries).

Nation Weights incorporate post-stratification adjustments based on crosstabulations of national populations by sex, age, region, and size of locality. In some countries, cross-tabulations of a higher dimension were used, by cross-tabulating with additional variables. Data for post-stratification were provided by EUROSTAT and the survey firms in each country. WEIGHT RESULT FROM TARGET and WEIGHT ADJUSTED TO STANDARD SIZE are for use in separate analyses of individual countries.

WEIGHT RESULT FROM TARGET reproduces the real number of cases for each country. British and Northern Irish as well as East and West German samples are weighted separately. This weight is corresponds to former NATION WEIGHT II (up to Eurobarometer 31).

WEIGHT ADJUSTED TO STANDARD SIZE is equivalent to WEIGHT RESULT FROM TARGET adjusting all samples to the standard size of 1000 cases (respectively 300 for Northern Ireland and 500 for Luxembourg).

WEIGHT SPECIAL UNITED KINGDOM adjusts the British and the Northern Irish samples to their respective proportions in the United Kingdom and should be used whenever the United Kingdom is to be analyzed as a whole. All national weights are included and (unlike the corresponding former NATION are included and (unlike the former NATION WEIGHT I up to WEIGHT I up to Eurobarometer 31) all samples are adjusted to the standard size.

WEIGHT SPECIAL GERMANY adjusts the East and the West German samples to their respective proportions in the united Germany. All national weights are included and all samples adjusted to the standard size. This weight should be used whenever the united Germany is to be analyzed as a whole.

EURO WEIGHT 12+ includes an adjustment of each national sample in proportion to its share in the total population of the European Community, ages 15 and over. These post-stratification adjustments were based on population figures published by EUROSTAT in the Regional Statistics Yearbook. EURO WEIGHT 12+ is intended for use in analyses of the European Community nations as a whole. Austria, Sweden, Finland and Norway are weighted by zero.

EURO WEIGHT 15 includes the future member countries Austria, Sweden and Finland; WEIGHT TOTAL (WEIGHT EURO 15+) includes the new member countries plus Norway.

EURO WEIGHT 12 is similar to EURO WEIGHT 12+, but excludes East Germany. In addition EURO WEIGHT 10 excludes Spain and Portugal, EURO WEIGHT 9 also excludes Greece. EURO WEIGHT 6 only refers to the six EC founder members (France, Belgium, Netherlands, West Germany, Italy and Luxembourg). The European weights equal zero for all excluded countries.

All European Weight Variables include the national weighting factors for each sample and - unlike the former EUROPEAN WEIGHT up to Eurobarometer 31A - also contain the adjustment to the standard sample size.

Table: Number of Respondents and Sums of Weights

	Number of Respondents	Sum of WEIGHT UK	Sum of WEIGHT GERMANY	Sum of EURO WEIGHT 15
France	1.000	1.000	1.000	2.404
Belgium	1.013	1.000	1.000	461
The Netherlands	1.020	1.000	1.000	619
Germany	2.114	2.000	2.000	3.622
Germany (West)	(1.095)	(1.000)	(1.583)	(2.872)
Germany (East)	(1.019)	(1.000)	(417)	(750)
Italy	1.028	1.000	1.000	2.454
Luxembourg	770	500	500	21
Denmark	1.000	1.000	1.000	225
Ireland	1.000	1.000	1.000	141
United Kingdom	1.381	1.300	1.300	2.503
Great Britain	(1.070)	(1.267)	(1.000)	(2.439)
Northern Ireland	(311)	(32)	(300)	(64)

Codebook Information

The following abbreviations are used to indicate countries:

France	F
Belgium	B
The Netherlands	NL
Germany	D
Germany (West)	D-W
Germany (East)	D-E
Italy	I
Luxembourg	L
Denmark	DK
Ireland	IRE
United Kingdom	UK
Great Britain	GB
Northern Ireland	NIRL
Greece	GR
Spain	E
Portugal	P
Norway	N
Finland	FIN
Sweden	S
Austria	A

The following example reproduces the information appearing in the machine-readable codebook for a typical variable; the numbers in brackets do not appear but are references to the descriptions:

V65 <POLDISC> Q4 POLITICAL DISCUSSION - FREQUENCY
<1> <2> <3>
Location: 147 MD1: 0
Width: 1 MD2: 4 Decimal Places: n
<4> <5> <6>
<7>
Q.4 When you get together with friends, would you say you discuss political matters frequently, occasionally, or never?

<8>
<Last trend: EB44.0 Q.2>
<9> <10>
1. Frequently
2. Occasionally
3. Never

4. DK
0. NA
9. Inap., not asked in ...

<11>

<1> Indicates the variable number. A serial variable number is assigned to each variable in the data collection.

<2> Unique MNEMO-technical abbreviations are assigned to to selected main trend variables in the data collection. This feature is not available in the present edition.

<3> Indicates the abbreviated variable name (maximum of 40 characters) used to identify the variable for the user. These variable names are identical to corresponding SPSS variable labels. The variable label usually includes the question number assigned in the questionnaire.

<4> Indicates the starting location and width of this variable when the data set is stored. If the variable is of a multiple-response type, the width referenced is that of a single response. In this example the variable is 1 column wide.

<5> Indicates the code values of missing data. In this example, 0 (MD1) and 4 (MD2) or any code greater than 4, are missing data. Most analysis software packages require that certain types of data which the user desires to be excluded from analysis be designated as "MISSING DATA," e.g., inappropriate, unascertained, unascertainable, or ambiguous data categories. Although these codes are defined as missing data categories, this does not mean that the user should not or cannot use them in a substantive role and modify the corresponding SPSS definition if so desired.

<6> Indicates the number (n) of decimal places defined for the respective variable.

<7> This is the full text (question) supplied by the investigator to describe the variable. The question text and the numbers and letters that may appear at the beginning reflect the wording of the questionnaire item.

<8> Comments in brackets are references which do not appear in the original questionnaire. They delineate explanatory text added by INRA or ICPSR, ZA or SSD. In this case the last appearance of the present question is referenced; in the case of multiple response variables (dummy variables) the corresponding full question text is referenced.

<9> Indicates the code values occurring in the data for this variable.

<10> Indicates the textual definitions of the codes. Abbreviations commonly used in the code definitions are "DK" (Don't Know), "NA" (Not Ascertained), and "Inap." (Inappropriate).

<11> The absolute frequencies for each country refer to the number of cases in the unweighted dataset. The relative frequencies for each country refer to the valid cases, i.e., the unweighted total number of cases reduced by the number of cases defined as missing data (M). The Sum refers to the total number of each country's cases in the unweighted dataset. Please notice that unlike other ICPSR codebooks all tables contain unweighted frequency counts.

Data Preparation and Formatting

The data received by ZA from INRA (EUROPE) were checked for missing and duplicate records, for illegal (wild) codes and for consistency of response patterns. Errors discovered by these procedures were corrected or noted in this codebook. Indices and other derived summary variables were also checked and corrected as necessary. Complete machine-readable documentation was also created for this dataset by ZA.

To facilitate analyses of the data, ZA created new variables which consolidate information dispersed over two or more variables in the original INRA dataset. Five variables containing condensed information were created by ZA for this Eurobarometer: NATION I, NATION III and REGION II.
Users should be aware that ZA's process of condensing information sometimes produces coding schemes that differ from those in earlier Eurobarometers.

ZA also added "Inappropriate" (Inap.) codes to indicate intentionally skipped questions when it could be determined that the appropriate skip instruction in the INRA questionnaire was adhered to for (almost) every respondent.

Users should note that INRA has occasionally represented answers to a question by a series of binary "dummy" variables (i.e. variables which take on values of one and zero only) creating separate "dummy" variables to explicitly represent "Don't know", "No answer" or other residual responses, such as "None of the above". ZA has recoded these residual responses in the case of inconsistencies with respect to the series of principal answers.

ZA has recoded the missing answers (NA) represented in the INRA data set by blanks.

Question text and contingency text appearing in this codebook and ZA's machine-readable documentation is taken from INRA's English language version of the basic bilingual questionnaire. Coding schemes and other documentation are based on INRA's English language version of the basic bilingual questionnaire, INRA's codebook (in English) and INRA's SPSS setup for its dataset as received by ZA. Whenever a discrepancy occurs between INRA's codebook, questionnaires, SPSS setup and dataset with respect to the coding scheme of a variable, ZA has carried out any correction in agreement with INRA.

If the documentation for country-specific questions or coding is provided by INRA in other languages than English, ZA documents the original language wording and supplies the English translation in brackets.

The data file for this Eurobarometer is available from ZA with a single logical record of 1173 columns per respondent. The machine-readable (or hard-copy) codebook and SPSS control cards have also been prepared by ZA. These control cards contain formatting information as well as variable and value labels for all the variables in the collection and document cards for country-specific labelling.

V1 STUDY NUMBER

Location: 1
Width: 4

Archive Study Number

<Respective study number of the involved archive.>

V2 EDITION NUMBER

Location: 5
Width: 1

Edition Number

<The number identifying the release edition of this dataset.>

1. Early release version
2. 1st codebook edition

V3 PART NUMBER

Location: 6
Width: 1

Part Number

<The number identifying this part of a 1-part study.>

1. EUROBAROMETER 44.1

V4 ID SERIAL NUMBER

Location: 7
Width: 5

Sequential respondent identification number assigned by ZA

<A unique serial number is assigned to each respondent.>

V5 NATION I (UNITED KINGDOM)

Location: 12
Width: 2

Nation of interview I

<Twelve EC countries including separate samples for East and West Germany and with the addition of Norway>

		Ungewichtet Abs.	%
01.	France	1000	5.78
02.	Belgium	1013	5.86
03.	The Netherlands	1020	5.90
04.	Germany	1095	6.33
05.	Italy	1028	5.94
06.	Luxembourg	770	4.45

08.	Ireland	1000	5.78
09.	United Kingdom	1381	7.98
10.	Greece	1008	5.83
11.	Spain	1000	5.78
12.	Portugal	936	5.41
13.	Germany - east	1019	5.89
14.	Norway	952	5.50
15.	Finland	1050	6.07
16.	Sweden	990	5.72
17.	Austria	1036	5.99
		17298	100.00

V6 WEIGHT SPECIAL UNITED KINGDOM

Location: 14
Width: 7 Decimal Places: 4

Nation Weight I (WEIGHT SPECIAL UNITED KINGDOM)

<This variable adjusts the British and Northern Irish samples to their respective proportions in the United Kingdom. All EC nation weights are included. Norway is weighted by "zero". -

Unlike the "Nation Weight I" in earlier Eurobarometers up to 31 this weight adjusts all samples to the standard size.>

V7 NATION II (GB AND NORTHERN IRELAND)

Location: 21
Width: 2

Nation of interview II

<The two samples for the United Kingdom - Great Britain and Northern Ireland - are coded separately.>

		Ungewichtet Abs.	%
01.	France	1000	5.78
02.	Belgium	1013	5.86
03.	The Netherlands	1020	5.90
04.	Germany - west	1095	6.33
05.	Italy	1028	5.94
06.	Luxembourg	770	4.45
07.	Denmark	1000	5.78
08.	Ireland	1000	5.78
09.	Great Britain	1070	6.19
10.	Northern Ireland	311	1.80

12.	Spain	1000	5.78
13.	Portugal	936	5.41
14.	Germany - east	1019	5.89
15.	Norway	952	5.50
16.	Finland	1050	6.07
17.	Sweden	990	5.72
18.	Austria	1036	5.99
		17298	100.00

V8 WEIGHT RESULT FROM TARGET

Location: 23
Width: 7 Decimal Places: 4

Nation Weight IIa (WEIGHT RESULT FROM TARGET)

<This variable contains weights that adjust the weighted samples to make them representative for the countries from which they were drawn. It reproduces the real number of cases for each EC country. Great Britain and Northern Ireland are treated as independent samples. Norway is weighted by "zero".-

This weight corresponds to "Nation Weight II" in earlier Eurobarometers up to 31.>

V9 WEIGHT ADJUSTED TO STANDARD SIZE

Location: 30
Width: 7 Decimal Places: 4

Nation Weight IIb (WEIGHT ADJUSTED TO STANDARD SIZE)

<This variable corresponds to "Weight Result from Target" adjusting all samples to the standard size of 1000 respectively 300 (Northern Ireland) or 500 (Luxembourg). Great Britain (n=1000) and Northern Ireland (n=300) are weighted as independent samples. Norway is weighted by "zero".>

V10 NATION III (UNITED GERMANY)

Location: 37
Width: 2

Nation of interview III

<East and West Germany are coded together: United Germany.>

		Ungewichtet Abs.	%
01.	France	1000	5.78
02.	Belgium	1013	5.86
03.	The Netherlands	1020	5.90
04.	Germany	2114	12.22
05.	Italy	1028	5.94
06.	Luxembourg	770	4.45
07.	Denmark	1000	5.78
08.	Ireland	1000	5.78
09.	Great Britain	1070	6.19
10.	Northern Ireland	311	1.80
11.	Greece	1008	5.83
12.	Spain	1000	5.78
13.	Portugal	936	5.41
14.	Norway	952	5.50
15.	Finland	1050	6.07
16.	Sweden	990	5.72
17.	Austria	1036	5.99
		17298	100.00

V11 WEIGHT SPECIAL GERMANY

Location: 39
Width: 7 Decimal Places: 4

Nation Weight III (WEIGHT SPECIAL GERMANY)

<This variable adjusts the East and West German samples to their respective proportions in the united Germany. All EC nation weights are included and all samples adjusted to the standard size. Norway is weighted by "zero".>

V12 WEIGHT EURO 6

Location: 46
Width: 7 Decimal Places: 4

European Weight Ia (WEIGHT EURO 6)

<This variable contains weights that adjust each national sample in proportion to its nation's share in the total population of the European Community countries in their historic composition:

EURO 6 only refers to the six EC founder-members (France, Belgium, the Netherlands, West Germany, Italy and Luxembourg). This weight variable includes the national weights for each sample and contains the adjustment to the standard size.>

V13 WEIGHT EURO 9

Location: 53
Width: 7 Decimal Places: 4

European Weight Ib (WEIGHT EURO 9)

<This variable contains weights that adjust each national sample in proportion to its nation's share in the total population of the European Community countries in their historic composition:

EURO 9 refers to the EC member countries before the joining of Greece (France, Belgium, the Netherlands, West Germany, Italy, Luxembourg, Denmark, Ireland and the United Kingdom). This weight variable includes the national weights for each sample and contains the adjustment to the standard size.>

V14 WEIGHT EURO 10

Location: 60
Width: 7 Decimal Places: 4

European Weight II (WEIGHT EURO 10)

<This variable contains weights that adjust each national sample in proportion to its nation's share in the total population of the European Community countries in their historic composition:

EURO 10 refers to the EC member countries before the joining of Spain and Portugal (France, Belgium, the Netherlands, West Germany, Italy, Luxembourg, Denmark, Ireland, the United Kingdom and Greece). This weight variables includes the national weights for each sample and contains the adjustment to the standard size.>

V15 WEIGHT EURO 12

Location: 67
Width: 7 Decimal Places: 4

European Weight III (WEIGHT EURO 12)

<This variable contains weights that adjust each national sample in proportion to its nation's share in the total population of the European Community countries in their historic composition:

EURO 12 refers to the EC member countries before the German Unification (France, Belgium, the Netherlands, West Germany, Italy, Luxembourg, Denmark, Ireland, the United Kingdom, Greece, Spain and Portugal). This weight variables includes the national weights for each sample and contains the adjustment to the standard size.>

V16 WEIGHT EURO 12 +

Location: 74
Width: 7 Decimal Places: 4

European Weight IV (WEIGHT EURO 12 +)

<This variable contains weights that adjust each national sample in proportion to its nation's share in the total population of all the European Community countries. It equals EURO12 plus East Germany>.

V17 WEIGHT EURO + 3

Location: 81
Width: 7 Decimal Places: 4

European Weight plus 3 (WEIGHT EURO +3)

<This variable contains weights that adjust each national sample of the three new member countries Finland, Sweden and Austria in proportion to its nation's share in the total population of these countries.>

V18 WEIGHT EURO 15

Location: 88
Width: 7 Decimal Places: 4

European Weight V (WEIGHT EURO 15)

<EURO 15 adjusts each national sample in proportion to it's nation's share in the total population (aged 15 and older) of the European Union countries in it's present composition, i.e. including the new members Sweden, Finland and Austria.>

Unlike the "EUROPEAN WEIGHT" in earlier Eurobarometers up to 31 this weight contains the adjustment to the standard size.>

V19 WEIGHT TOTAL (EURO 15 + NORWAY)

Location: 95
Width: 7 Decimal Places: 4

European Weight VI (WEIGHT EURO 15 +)

<WEIGHT 15+ adjusts each national sample in proportion to it's nation's share in the total population (aged 15 and older) of the European Union countries in it's present compsition plus the non-member country Norway, i.e. EURO 15 plus Norway.>

V132 Q12 EU MONETARY UNION CONDITIONS KNOWN

Location: 214 MD1: 0
Width: 1

Q.12 The "Maastricht Treaty" which was signed and ratified by all member states, says that full European Economic and Monetary Union will start by January 1999 at the latest. From then on exchange rates will be locked between the countries which meet the relevant conditions of the Treaty. After that, one European currency will replace national currencies. Do you know any of the conditions member countries must meet in order to join the European Economic and Monetary Union? (IF YES) Please tell me which ones.

<Last trend: EB44.0 Q.10>

V375 Q41 EU POLICY DEVELOPMENT - PREFERENCE

Location: 459 MD1: 0
Width: 1 MD2: 3

Q.41 For some time there has been talk of a "TWO SPEED EUROPE". This means that some countries would be ready to intensify the development of a common European policy in certain important areas, while other countries would not. As regards this idea of a "TWO SPEED EUROPE", which of the following comes closest to your personal preference? (SHOW CARD - READ OUT)

<Last trend modified: EB43.1 Q.20>

1. That those countries which are ready to intensify the development of a common European policy in certain important areas should do so without having to wait for the others ...
2. Or that countries which are ready to intensify the development of a common European policy in certain important areas should wait until all Member States of the European Union are ready for it

V563 Q60 EASTERN EU MEMBERS - REASONS

Location: 647 MD1: 0
Width: 1 MD2: 5

Q.60 (IF CODES 1, 2 OR 3 AT Q.59)
Why do you think these countries should become members of the European Union? (SHOW CARD - READ OUT - ONE ANSWER ONLY)

1. Because we have a moral duty to welcome them
2. Because we have a strong economic interest to welcome them
3. Because it is in the interest of our mutual security to have them as European Union members
4. None of these (SPONTANEOUS)

V564 Q61 EASTERN EU MEMBERS - AID TO FARMERS

Location: 648 MD1: 0
Width: 1 MD2: 4

Q.61 At present time, farmers in all member states as well as the less developed regions of the European Union, mainly in Greece, Ireland, Southern Italy, Portugal and Spain receive aid from the European Union.
Imagine that in ten years from now, several countries from Central and Eastern Europe are members of the European Union. If their level of economic development is lower than the European Union average, and the share of agriculture in their economies is higher than the European Union average : what would you prefer to happen? (SHOW CARD - READ OUT)

1. Increase the amount of money available so that both current and new member states can receive aid according to the same rules as now
2. Keep the total amount of money available the same, and share it out between current and new member states according to stricter rules
3. Exclude the new member states from aid programmes during a transition period

V565 Q62_A EU COUNCIL DECIS - VOTE PREFERENCE

Location: 649 MD1: 0
Width: 1 MD2: 4

Q.62 SPLIT BALLOT A:
When the Minister from Member State governments take joint decisions by vote in the European Union Council of Ministers, which of the following would you prefer? (SHOW CARD - READ OUT)

1. Their votes should have a weight in proportion to the population of each country: if a country has twice as many inhabitants as another, it should have twice as much weight ...
2. Their vote should have a weight which does not only take into account the population of each country: if a country has twice as many inhabitants as another, it should have more weight but not twice as much
3. Each country, big or small, should have one vote

V591 Q68 EU ECON COMPETITION VS SOC SECURITY

Location: 675 MD1: 0
Width: 1 MD2: 4

Q.68 Which one of the following comes closest to your opinion? (SHOW CARD - READ OUT - ONE ANSWER ONLY)

1. If we want Europe to be competitive on world markets, we must drastically cut the current levels of social security benefits
2. If we want Europe to be competitive on world markets, we must accept some significant cuts in current levels of social security benefits
3. Europe is capable of being competitive on world markets, while still keeping levels of social security more or less as today

V598 Q74A PROBLEMS: REGIONAL DIFFERENCES

Location: 682 MD1: 0
Width: 1 MD2: 5

Q.74 Here is a list of problems that people of (NATIONALITY) are interested in to varying degrees (SHOW CARD)

A. Could you please tell me for each one whether you personally consider it is a very important problem, quite important, not very important, or not at all important?

B. And for each of these problems, could you tell me whether it is preferable that decisions about it should be taken by the member countries of the European Union acting together or by each country separatly?

Q.74Aa <Importance of problem>

Reducing the differences between regions of our country by helping the less developed regions or those in most need

<Last trend: EB36 Q.75>

1. Very important
2. Quite important
3. Not very important
4. Not at all important

V654 Q78 THIRD WORLD RELATIONS - FIRST AIM

Location: 738 MD1: 0
Width: 1 MD2: 5

Q.78 In your opinion, what should be our principal aim in our relations with the countries of the Third World?
(SHOW CARD - ONE ANSWER ONLY - READ OUT)

<Last trend: EB36 Q.83>

1. Help them to become less poor
2. Co-operate with them so that they become economically independent and enable them to resolve their basic problems (food, health, education, ...)
3. Work with these countries towards their becoming real partners in the world economy
4. None of these things (SPONTANEOUS)

V1032 D21A OCCUPATION HEAD OF HOUSEHOLD

Location: 1135 MD1: 00
Width: 2 MD2: 99

D.21a a) What is the current occupation of the person who contributes most to the household income?

<Last trend: EB44.0 D.21a>

NON-ACTIVE

01. Responsible for ordinary shopping and looking after the home, or without any current occupation, not working
02. Student
03. Unemployed or temporarily not working
04. Retired or unable to work through illness

SELF EMPLOYED

05. Farmer
06. Fisherman
07. Professional (lawyer, medical practitioner, accountant, architect, ...)
08. Owner of a shop, craftsmen, other self employed person
09. Business proprietors, owner (full or partner) of a company

EMPLOYED

10. Employed professional (employed doctor, lawyer, accountant, architect)
11. General management, director or top management (managing directors, director general, other director)
12. Middle management, other management (department head, junior manager, teacher, technician)
13. Employed position, working mainly at a desk
14. Employed position, not at a desk but travelling (salesmen, driver, ...)
15. Employed position, not at a desk, but in a service job (hospital, restaurant, police, fireman, ...)
16. Supervisor
17. Skilled manual worker
18. Other (unskilled) manual worker, servant

V1036 D29 INCOME HH

Location: 1141 MD1: 00
Width: 2 MD2: 97

D.29 We also need some information about the income of this household to be able to analyse the survey results for different types of households. Here is a list of income groups. (SHOW CARD)

Please count the total wages and salaries per month of all members of this household; all pensions and all social insurance benefits; child allowances and any other income like rents, etc... Of course, your answer as all other replies in this interview will be treated confidentially and referring back to you or your household will be impossible. Please give me the letter <non-alphabetical, irregular order> of the income group your household falls into before tax and other deductions.

V1048 C1 OPINION LEADERSHIP INDEX

Location: 1159 MD1: 0
Width: 1

C.1 OPINION LEADERSHIP INDEX

Cognitive Mobilisation Index 1

<This index is based on the answers to the following two questions: "When you, yourself hold a strong opinion, do you ever find yourself persuading your friends, relatives or fellow workers to share your views? If so, does this happen often, from time to time or rarely?" (Q.5) and "When you get together with your friends, would you say you discuss political matters frequently, occasionally or never?" (Q.4). Interviewees giving affirmative answers to both questions are labelled + +. Interviewees giving negative answers to both questions are labelled - -. Middle categories (+ and -) are constituted correspondingly.

This variable forms an indicator of the individual's potential to take an active role in the political process. For a complete discussion of this variable and its correlates see Ronald Inglehart, The Silent Revolution: Changing Values and Political Styles among Western Publics (Princeton University Press, 1977).>

1. - - low <coded 3, 4, 5 or 0 for V66 and 3 for V65; or coded 3 or 4 for V66 and 3, 4 or 0 for V65>

V1049 C4 SOCIO PROF STATUS (OCCUPATION RECODE)

Location: 1160 MD1: 0
Width: 2

C.4 SOCIO PROFESSIONAL STATUS

<Roughly half of the representative sample of the European Community public was without paid work. Basing cross-analyses on "occupation" (D.15A) would exclude half of the respondents from analysis. An alternative is to base analyses on (non-marxist) concept of "objective social class" using "occupation of the head of household" as reference. In order to classify as many respondents as possible with respect to their socio-professional setting, a new classification was created called "socio-professional status" of the main income earner (MIE). The following standard was used if the respondent is the MIE: For those in paid work it is based on the respondents' own present occupation (D.15A). For those not in paid work, "former occupation" (D.15B) was used, if applicable. If the respondent is not the MIE, the occupation of the "person who contributes most to the household income" (D.21A) was used and if the head of household was not performing paid works at the time of the interview, his or her "former occupation" (D.21B) was used, if applicable.

Consequently, socio-professional status is a classification "that comes as close to the respondent himself/herself as possible" but that draws upon additional background information to the extent necessary and available, in order to avoid a single measure of interviewees' socio-professional setting and to include the maximum number of respondents in the respective analyses. For more details see standard report EUROBAROMETER 44, April 1996, Brussels, C.11 f.>

V1050 C5 EUROPEAN POL PARTY PREFERENCE

Location: 1162 MD1: 00
Width: 2 MD2: 99

C.5 EUROPEAN PARTY PARLIAMENTARY PREFERENCE INDEX

<This index is based upon the vote intention question D.4: "If there were a "General Election" tomorrow (SAY IF CONTACT UNDER 18 YEARS: and you had a vote), which party would you vote for?"

Answers are grouped according to the affiliation of the representatives of the respective party to a group in the European Parliament.

If a party was not represented in the European Parliament at the time the survey was carried out but had been represented before, its supporters are included in the European Parliament group their party has previously been affiliated with. Supporters of parties represented in the European Parliament whose members (of the European Parliament) are not affiliated with any group are labelled N.I., supporters of parties not represented in the European Parliament are labelled "other". Labels are presented in the order in which they occur in the "list of members" of the European Parliament of 1994.>

01. (PSE) Socialist Group
02. (PPE) Group of the European People's Party (Christian Democratic Group)
03. (UFE) Group Union for Europe
04. (ELDR) Group of the European Liberal, Democrat and Reform Party
05. (GUE/NGL) Confederal Group of the European United Left / Nordic Green Left
06. (V) The Green Group in the European Parliament
07. (ARE) Group of the European Radical Alliance
08. (IEDN) Group of Independents for a Europe of Nations
09. (N.I.) Non-affiliated
10. Not represented (other parties)

00. Other answers <including NA>
99. Inap., not available for Norway <coded 15 in V7>

V1051 C12 EUROP SOCIAL GRADE

Location: 1164 MD1: 0
Width: 1

C.12 European Social Grade (ESOMAR 7-point scale)

<This scale is based on the recommendation of the European Society for Opinion and Marketing Research to harmonise the measurement of social grade across borders. This approach uses three different types of input variables:

I) Occupation of the main income earner (MIE) is based on 16 occupation groups E1 to E16:

- E1 General management, director or top management (6 employees or more)
- E2 Self employed professional
- E3 Employed professional
- E4 General management, director or top management (5 employees or less)
- E5 Middle management, other management (6 employees or more)
- E6 Middle management, other management (5 employees or less)
- E7 Business proprietors, owner (full/partner) of company and owner of a shop, craftsmen, other self employed (6 employees or more)
- E8 employed position, working mainly at a desk
- E9 business proprietors, owner (full/partner) of company (5 employees or less)
- E10 student
- E11 employed position, not at a desk but travelling or in a service job
- E12 farmer and fisherman
- E13 responsible for ordinary shopping and looking after the home, housewife
- E14 supervisor and skilled manual worker
- E15 other (unskilled) manual worker, servant
- E16 retired or unable to work through illness, unemployed or temporarily not working

II) The education level of the main income earner (MIE) is based on a classification into 6 groups of education level (adjusting the finishing age of general education in accordance with extra general education or specific apprenticeship and/or professional training): 1) up to 14 years; 2) 15-16 years; 3) 17-18 years; 4) 19-20 years; 5) 21-24 years; 6) 25 years and over.

III) Household ownership of selected durable is based on ownership in terms of number of products owned (D.14): a colour TV set - a video recorder - a video camera - a radio-clock - a PC/home computer - a still camera - an electric drill - an electric deep fat fryer - two or more cars - a second home or a holiday home/flat.

The combination of these input variables results in a new social grade classification with, as categories (upper to lower): A B C D E1 E2 E3. For more details see standard report EUROBAROMETER 44, April 1996, Brussels, C.15 f.>
