Learn Better Together

Problem

- Students are interested in the social aspect of learning, but study groups tend to have poor matches
- Lecturers have difficulty getting enough TAs to grade all the assignments

Solution

- We propose to create a way for students to match with others based off of study habits to facilitate group formation

Tasks

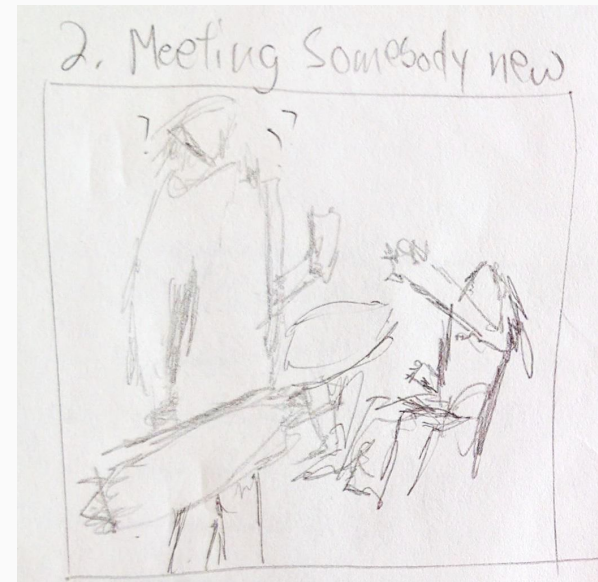

Simple Task

- Look for New Study Partners
 - Quickly decide about matches with other people

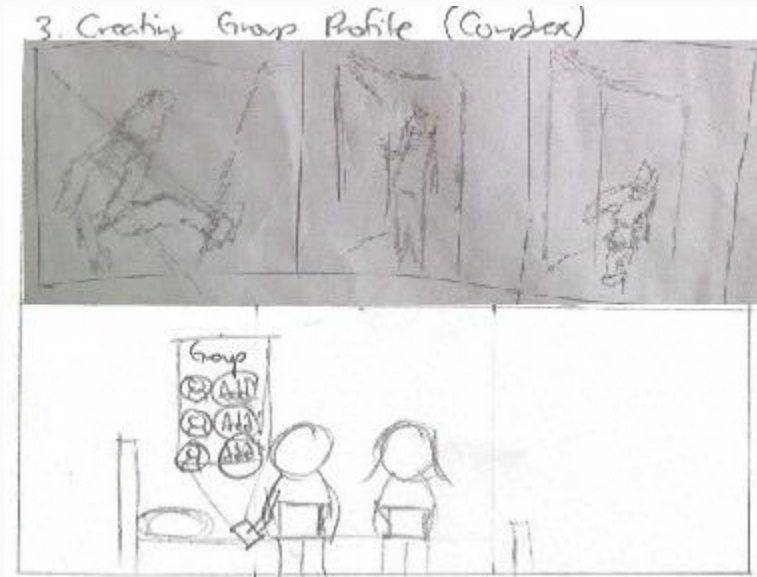

Medium Task

- Meet up with somebody new
 - Core functionality of meeting somebody for the first time to study

Hard Task

- Create a group profile and manage a group
 - Managing a group is rare, especially if people form partnerships
